Upland hay is light, but owing to the beautiful rain in June, the meadow hay is quite an average crop. Roots are doing well. There are no beans grown about here, and very few peas.

Sheep have done well, and there has been a fair trade for good quality lambs. At the recent fairs ewes and lambs made 2s. to 3s. per head more than last year. Cattle have done well, but there is a very poor trade for fat cattle, except those that are of the very best quality.

Hops are very promising.

One of the most remarkable features of the season has been the extremes of weather. Previous to June 6 the weather was much against all growth. The eight nights' frosts in May were followed by dry winds, and everything was deteriorating daily, but the splendid rain in the second week of June, which continued for a week, quite altered the situation, there now being a promise of good average crops all round.

FREDERICK CORYTON.

August 2, 1905.

Harvest in Hampshire.

SIR,—Wheat and oats are nearly all cut in this district, but the fine rain we are having to-day will stop all harvest operations for a day or two. Wheat generally is above an average. Winter and February sown oats are good, but later sown pieces are generally light and cut down very disappointingly. Barley an average crop, but I think it has ripened too quickly to be a good sample, and will be ready for the binder in a few days: I heard of one piece being cut on the 1st. Hay (clover, mixtures, and sainfoin), although only two-thirds of an average crop, was generally well secured, and, with a quantity of old hay on hand, we are well provided for another winter.

Sheep and cattle have done well. Lambs are specially dear, and, with an improved prospect of roots after to-day's rain, they are likely to become more so. J. H. G.

August 3, 1905.

Messrs. Alexander Cross and Sons, Ltd. of Glasgow, who handle the production of basic slag (Thomas Phosphate Powder) in Scotland, have just entered into a contract with the Cargo Fleet Iron and Steel Company, of Middlesbrough, to dispose of their make. It is expected that the production will begin in September, and will be from 10,000 to 15,000 tons for the first year, increasing to 30,000 to 40,000 tons during the succeeding years. Large though these figures are, this is not really a great quantity of this valuable manure material, the efficacy of which is daily being more seen and understood by agriculturists throughout the country. It is, therefore, anticipated that the whole make will go into consumption round the seat of production. Mr. R. G. Hill, of Hull, has been appointed manager of the grinding plant at Cargo Fleet and salesman, and will shortly open an offices there.

OBITUARY.

Mr. J. A. Hempson.

We regret to record the death of Mr. J. A. Hempson, of Arwarton Hall, Suffolk, who was well known in agricultural circles in East Suffolk. His form had been a prominent aand familiar one for many years at the various meetings of the Suffolk Agricultural Association, the East Suffolk Chamber of Agriculture, and other county and local organisations more or less intimately connected with the great agricultural cause.

The late Mr. Hempson had attained the ripe age of eighty-three years, and much sympathy will be felt with his family.

Proposed Agricultural Organisation Society for Scotland.

The agricultural organisation and co-operation movement is growing strong in Scotland, and it has been decided to form a Scottish Agricultural Organisation Society on similar lines to the English association. At a recent meeting of the Preliminary Committee (Sir John Gilmour of Montrave, Bart., in the chair), it was announced that guarantees had already been received from landed proprietors and farmers to the amount of £647 per annum towards meeting expenses for each of the first three years.

It was decided, however, to make an effort to increase the guarantee fund to £1,000 per annum, for the double purpose of spreading the interest in the movement and enabling the committee to make the calls on the individual guarantors as low as possible. The meeting resolved to take immediate steps to appoint a secretary, and also to hold a meeting in the beginning of November for the purpose of formally inaugurating the society.

The Park Royal Shows: Some Suggestions.

A correspondent of the "Daily Telegraph," writing under the nom de plume of "Popularity," makes the following interesting remarks concerning the Royal Shows at Park Royal, and we think there are many who will agree with him in his proposal re the Crystal Palace. He says:

"Why is Park Royal not successful in drawing a good 'gate'? It is because the fact is not boldly recognised that the sightseers of the metropolis take a superficial interest in agriculture. But the London public will attend an exhibition which promises them entertainment as well as instruction. And Londoners do not stand alone in this respect. Park Royal, in fact, in order to draw more visitors from all parts of the country, must offer extraneous attractions. Tring Park Show sets the example—it 'descends' to fireworks even. I use the word 'descend' because I am afraid that the Royal Agricultural Society may consider it beneath their dignity to adopt a popular programme. Then, too, there is the question of ways and means, the suitability of Park Royal for an agricultural fête, and the aptitude of its staff to become showmen in the ordinary entertaining sense.

"But there is an alternative. I would suggest that the society sell Park Royal. The 100 acres as a building estate would bring in the £30,000 which they cost. The next step would be to open up negotiations with the directors of the Crystal Palace. If automobile exhibitions can be so largely attended at Sydenham, and football contests draw thither immense crowds, it is equally possible an agricultural show would also be immensely successful.

"In any event, the society need run no risk. The Crystal Palace Company, no doubt, would pay for the privilege. The building offers unexampled facilities for such a show, and the grounds are all that could be desired, with space for cattle pens and arenas for horsemanship displays already laid out. Run upon popular lines, with the regular programme of the Crystal Palace to supplement it, and including special firework displays, I can readily conceive that an agricultural show of an up-to-date character would prove not only useful, but remunerative."

Leeds Municipal Milk.—At a meeting of the Leeds City Council, on Wednesday, the Lord Mayor stated that as a result of a consultation which the Town Clerk had had with eminent counsel they had come to the conclusion that the Corporation had no legal power to proceed with a municipal milk depot. Believing, however, in the desirability for the establishment of such an institution, he was prepared to give £200 towards the formation of such a depot on voluntary lines pending the obtaining of the necessary legal powers to found a municipal milk depot.

The Royal Agricultural Society.

PARK ROYAL SHOW. ... ... Expenditure £19,000. Receipts ... £11,200.

ADJOURNED ANNUAL MEETING.

The adjourned annual general meeting of governors and members of the Royal Agricultural Society was held at 13, Hanover Square, London, W., on Tuesday last, Sir John Thorold, Bart., president, in the chair. There were present:—Earl of Feversham, the Earl of Jersey, Lord Middleton, Mr. F. S. W. Cornwallis, Colonel Sir Nigel Kingscote, Sir Walter Gilbey, Mr. Victor Cavendish, M.P., Sir Wilfrid Lawson, M.P., and Sir John Gilmour, the attendance numbering upwards of one hundred and fifty.

After the Chairman had called upon the Secretary (Sir Ernest Clarke) to read the notice summoning the meeting, he explained that the ordinary business of the society was transacted at the meeting at Park Royal, and they were assembled that day in exceptional circumstances in order to enable the new Council, elected for the first time in the several districts, to get to work as soon as possible. They hoped to have the advantage of the exceptional experience of the Earl of Onslow as president this year, but he had come to the conclusion that the demands likely to be made on his time would keep him fully occupied, and that considering his duties elsewhere he had better be excused. They would still, however, have his assistance and advice as an elected member of the Council. They might think themselves fortunate in the fact that they were able to propose for the presidency Mr. F. S. W. Cornwallis, of Linton Park, Maidstone. He was well known for his countesy, patience, clear-headedness, and insight into affairs—qualities which would be invaluable during the somewhat critical times on which the society had entered. He moved that Mr. Cornwallis be elected to hold the office of president until the next annual meeting.

Mr. Lawrence Hardy, M.P., seconded the motion, and it was carried with much heartiness.

Mr. Cornwallis, in responding, said he trusted that by their united efforts they would once again be able to estabusn the society on a sound and hopeful basis.

The following were elected as trustees for the ensuing year:—The Prince of Wales, the Duke of Bedford, Earl Cawdor, the Earl of Coventry, the Earl of Derby, Earl Egerton of Tatton, Sir Walter Gilbey, Colonel Sir Nigel Kingscote, Lord Middleton, Lord Moreton, Earl Spencer, and Sir John H. Thorold.

The President, in submitting the names of eleven governors for election as vice-presidents made feeling allusion to the death of Sir Jacob Wilson.

The following were elected vice-presidents, the president intimating that the appointment to the vacancy caused by the death of Sir Jacob Wilson would be made by the Council:—Prince Christian, Mr. J. Bowen-Jones, Mr. Victor C. W. Cavendish, M.P., Mr Henry Chaplin, M.P., Mr. P. Crutchley, Mr. J. Marshall Dugdale, Mr. Ailwyn E. Fellowes, M.P., the Earl of Feversham, the Earl of Jersey, the Hon. Cecil T. Parker, and Mr. C. Whitehead.

The President next announced the names of the ordinary members of Council who had been elected to represent the several divisions of the society. Of the forty-eight divisions entitled to representation on the Council four were given two members, and one (London) three members, the rest having one each. Four vacancies for Cornwall, Dorset, Essex, and South Wales were still to be filled, and this would be done by the Council, as no effective nominations had been made. In eleven districts contested elections had taken place, and of the fifty members elected to the Council twenty-six were old members and twenty-four.

The full list of the new Council appeared in our issue for July 31, page 148.

Park Royal Deficit.

The President made a statement as to the loss on the show held at Park Royal a month ago. "You will understand," he said, "there is a good deal to be settled by various committees who will not, in the exceptional situation arising out of the operation of the new by-laws, have an opportunity of meeting until the new Council is duly constituted and come into office, as it will do immediately after this meeting. It is estimated that the total expenditure on the show will be £19,000, of which only £11,200 will be covered by the receipts of the show itself. The donations and guarantees promised to the show fund will yield about £6,300, so that the difference of £7,800 between expenditure and receipts will be reduced to some £1,500—a charge which must of course, fall upon the society's general fund, already largely depleted by heavy losses on shows of previous years. The situation requires patience and calmness, if the best interests of the society are to be safeguarded, and I feel confident it will be your wish to give the new Council, reinforced as it has been by so many fresh members, adequate time to consider in all its bearings the difficult, but, I hope, not irremediable position in which the society after two generations of usefulness now unfortunately finds itself." (Hear, hear.)

In response to the usual question put from the chair as to whether those present had any suggestion to make,

Surgeon-Major Ince advised that they should get rid of Park Royal and should take steps to dispose of the palace in which they were then sitting. Other quarters would serve the purposes of the society, and he suggested that they might resume at 12, Hanover Square, where they were sufficiently well housed for a number of years.

Mr. E. Hamlyn, one of the candidates for Surrey, said he was much struck during his candidature at the number of landowners, masters of hounds, and others in Surrey who were not members, and had not been asked to become members. What the society needed was more members, and he suggested that each County Committee should act as a recruiting committee. Rather than give up the fine building the society possessed, he advocated that it should be converted into a club-house, which could be done at little expense, and in that way many new members would doubtless be induced to join.

Mr. Packard regarded the present buildings as unnecessarily extravagant. If the new Council succeeded in giving some evidence of improving the affairs of the society, many life members would, he believed, be willing to forego their privileges as such, and become ordinary members. Park Royal, from the exhibitor's point of view, had been a greater success than any other locality ever selected for the show, and that, he submitted, ought to be considered in dealing with the future of the society. Drastic economies were imperative. Mr. Packard also asked if the Secretary would undertake the editorship of the society's journal in addition to his present duties.

The Chairman replied that that was a matter which would come under the cognisance of the new council.

Mr. Simmons advocated that the society should give up its premises, fix the secretary's salary at £500 a year, limit the expenses to £2,000 a year, have a show "pure and simple," and sell the estate at Park Royal for building purposes.

Sir Wilfrid Lawson, in moving a vote of thanks to the president, congratulated the meeting on the peaceful way in which the proceedings had been got through, and regarded the circumstance as a happy augury of a successful issue from their difficulties.

Mr. E. Hamlyn seconded the motion, which was carried unanimously.

Sir John Thorold, in replying, pointed out that if they sold that house the debenture-holders would have to be paid, and they would have to take another place. It might be possible to let off some rooms to other societies, and probably that would be the most economical course. He was sure that whatever differences of opinion there might be, they were all actuated by the one desire to do the very best that could be done for the future success of the society and to meet all difficulties with spirit and good temper.

The Council Meeting.

A monthly council was held on Tuesday, Mr. F. S. W. Cornwallis (President) in the chair.

The President, in opening the proceedings, said that as by the goodwill of the general body of members he had been called upon to take the Chair at a crisis of the Society's history, he would like to take advantage of the opprtunity of first addressing the Council, not only to thank the Society for this mark of its confidence in electing him as President, but of asking—as he knew he would not do in vain—for their kindness and consideration if he fell short of all that was expected in the occupant of the Chair. Those of them who had had seats on the old Council were glad to have their ranks reinforced by the fresher minds of so many new colleagues. They cordially welcomed them all, and felt sure that their help and counsel would be of the greatest possible service to the Society at large. Their first duty would be, in the words of the report presented to the general meeting last December, "to deliberate and decide as to the future of the Society's shows, and as to the character and scope of the Society's other operations." These were matters which would obviously demand their immediate and serious attention, though it would not be expected that they could come to any decision without careful deliberation and, doubtless, prolonged discussion.

The Late Sir Jacob Wilson.

The President said it was his melancholy duty to notify to the Council a vacancy in the list of Vice-Presidents, caused by the lamented death of Sir Jacob Wilson. The eloquent testimony borne by Sir John Thorold at the general meeting of members, held that morning, to the great esteem and personal affection which they all had for Sir Jacob, was so fresh in their minds that he would only ask to be allowed to say that they associated themselves with every word that fell from Sir John Thorold.

In accordance with the Standing Orders, the vacancy would be referred to the Committee of Selection, who would, at a later date, present to them a recommendation on the subject.

Finance—Loss on the Show.

Sir Nigel Kingscote reported from the Finance Committee that the accounts for the period ended July 29, 1905, as certified by the Society's accountants, showed receipts amounting to £6,438 6s. 8d., and expenditure amounting to £7,146 15s. 2d. Accounts amounting in all to £12,035 12s. 5d. relating to the recent show (including cheques for the prizes awarded), and to £1,671 8s. 11d., relating to the ordinary business of the Society, or £13,707 1s. 4d. in all, had ben passed and were recommended for payment. The Committee also presented a special report, giving particulars of the Society's obligations, and stating that, irrespective of the Guarantee Fund, the actual receipts for the show of 1905 were £11,200, while the expenses would be some £19,000, or a deficit of £7,800. The donations of £6.300 would reduce the actual loss, which would fall on the Society's general funds from the holding of the show of 1905, to about £1,500.

Appointment of Standing Committee.

Sir John Thorold, pursuant to notice, moved for the appointment of a committee consisting of old and new members of the Council, with the President, ex-officio, to consider the composition of each of the Standing Committees, such committee to be asked to sit after the rising of the Council.

Colonel Curtis-Hayward seconded the motion for the appointment of the committee.

Mr. C. W. Wilson thought the committee proposed was too small, and suggested the appointment of a General Purposes Committee of business men capable of grasping the whole situation, which would obviate the appointment of some of these committees.

Mr. Harrison thought the work of appointing committees should be done by the Council themselves, and wished to move an amendment that the appointment of committees should be proceeded with at once.

Earl Spencer said he had much experience in various capacities as to the formation of committees, and he considered the best course would be for the Council to appoint a Committee for this purpose.

The Earl of Onslow entirely agreed with Lord Spencer's views. It would be very invidious, extremely difficult, and not at all satisfactory to endeavour to elect all the committees of the Council at that meeting. At the same time, he agreed that a committee of eight members, with the President, would be too small, and he would ask Sir John Thorold whether he would agree to enlarge his proposed committee to sixteen members, or even more.

Sir John Thoroid said that what he had suggested was in effect that the Council should delegate to a committee the duty of reconstructing the various Standing Committees, and he was quite willing that such committee should be enlarged to sixteen members, or any other number that might be preferred. The Standing Committees as reconstituted by the Special Committee would all be summoned as usual to meet on the day before the next Council, and the first item of each of their reports would be a mention of the names of those composing the committee. It would then be open to any member of the Council to move an amendment to the constitution of such committee if he wished to do so.

Mr. Aveling thought there might be hesitation in moving such an amendment in Council.

Mr. Howard suggested that members who desired to be on particular committees should communicate with the Secretary, in order that such requests might be duly considered.

Mr. Ralph Palmer said he was convinced that

an executive committee was the proper solution of the Society's difficulties in managing its business, and he desired an opportunity of taking the sense of the Council on the subject.

After some further discussion as to the proposed committee and the composition thereof, the appointment of a committee of sixteen members was unanimously agreed to, and the committee was constituted as follows:—

The President, Lord Middleton, the Hon. Cecil Parker, Sir Gilbert Greenall, Bart., Sir John Thorold, Bart., Mr. Adeane, Mr. Aveling, Mr. Bowen-Jones, Mr. Carr, Mr. Cooper, Mr. Forrest, Mr. Harrison, Mr. Ingram, Mr. Rowell, M. Stratton, Mr. Thornton, Mr. Wheeler.

This Committee sat after the Council, under the chairmanship of Sir John Thorold, and completed its labours. It was agreed that the first meetings of the Standing Committees as reconstituted should be held on October 3.

Vacancies on the Council.

The President reported that no representatives had been elected to serve upon the Council for the Electoral Districts of Cornwall, Dorset, Essex, and South Wales, and he suggested that the question of filling up these vacancies under By-law 90 should be referred to the Committee of Selection. This course was, after a short discussion, agreed to.

Suggested Show at Blackpool.

A letter from the Town Clerk of Blackpool, inquiring "if it would be convenient at any and what date for the Society to receive a deputation from the borough with a view to the show of the Royal Agricultural Society being held at Blackpool at a date to be arranged," was postponed for future consideration.

The Position of the Society.

The Council then resolved itself into Committee for the purpose of discussing the general position of the Society.

Mr. Bowen-Jones said he had received a letter from Mr. Ryland, who, he was sorry to say, was too unwell to attend their meeting that day, putting forward certain suggestions. Mr. Ryland suggested that an entirely independent Committee of old and new members of the Council qualified by practical business knowledge should be forthwith appointed, with power to call for any information from officials, and to employ professional assistance, if they consider it necessary, from accountants, solicitors, and valuers, to thoroughly investigate the entire position of the Society, and to make a report to the Council as to what reforms and economies they considered desirable to put the Society on a sound footing again.

Mr. Forrest having seconded the motion for the appointment of such a Committee,

Mr. Stratton said he desired strongly to support the proposition made by Mr. Bowen-Jones. He thought that a Committee of the kind mentioned was most desirable in order to restore the confidence of the members. He thought it would be expected of the members of the Council that they would ventilate their views with regard to the future of the Society. They were undoubtedly in a serious position, but a Society like theirs with 10,000 members had not lost its prestige, and would go on and prosper provided they started on economical lines. The show had, unfortunately, been a great source of loss for some years, so far as making money at the gates was concerned; but so far as general business was concerned, and the quality of the exhibits, they had never had a better show than that held at Park Royal this year. That view was endorsed by the implement makers, as well as by the exhibitors of stock, and he maintained that there lay the element of their success. He was of opinion that those who profited by the show should pay a larger share of the expenses. They could not be continually appealing to the public to carry on the show. Those who exhibited gained benefit by the show, and every owner of pure-bred stock was a great gainer. If the show ceased to exist, the value of pedigree stock would go down throughout the country. He had always been of opinion that it was necessary to offer high prizes, and to have small entry fees, but he was bound to admit that high prizes were not necessary to secure a first-class show. He must also admit that they could not get low entrance fees; it was the duty of exhibitors to pay higher fees. He maintained if they could not do that they could not have the show. The show would, he believed, be none the worse if they charged double the present fees. Another question was with regard to the size of the show. It seemed to him that the ground might be very considerably curtailed, and they might let off a portion, if not sell a portion, and possibly better terms could be arranged than those offered at the present time.

He was aware that it was said that as they had borrowed money on low terms on Hardwood House it did not cost them much more than ordinary offices would cost. He could not help thinking, however, that members looked upon that house as a standing hindrance to economy. The house was certainly a most valuable asset, but to continue to use it as offices for the Society in its present position was certainly the reverse of economical. It was necessary to dispose of the house to propitiate their members, and unless they were propitiated the Society would never be successful. The sooner the public knew they were going to work on those lines, the sooner their membership would increase.

With regard to the Journal, the general opinion was that it was not worth the money it cost, and if they had to curtail anything, they must curtail expense in that direction.

Sir Walter Gilbey felt that he must disabuse Mr. Stratton's mind on one point. He was certain that they could not increase their income by increasing the entry fees for the show. He was persuaded that few even of those present were aware of the great cost that every agricultural show entailed. He had had the honour of being President of the Society for the Leicester Show, and he thought it would surprise them to know how much money was locally subscribed, not only coming out of the pocket of the Mayor, but money from the district to secure the show being held.

Mr. Harrison said he had supported the show going to Park Royal this year, as they were aware, although at the present time he was in favour of the migratory shows; and he would like to explain why he supported going to Park Royal this year. It would be in the remembrance of many members that they had called a meeting of the Implement Exhibitors to consent or otherwise to a show being held. The only possible place at which a show in 1905 could be held was Park Royal, and, after some difficulty, the Implement Exhibitors decided to go there. He might say now, however, that he feared Park Royal would not receive the same support again from Implement Exhibitors. He thought that if any sensible man would look at the facts, he would see that Park Royal as a site for the show was doomed. With respect to migratory shows, he was not at all in agreement with Sir Walter Gilbey. He (Mr. Harrison) was fully of opinion that if they went back to the country, and associated themselves with the county societies, they would get invitations to hold the show in the country. The great question was finance, and the acquisition of new members. To his mind, the show was the practical expression of the Society, and if the show did not exist, the membership would fall down, and Hanover Square could not exist. The administrative expenses might be said to be a perennial question, but it was a vital question. He quite agreed with a previous speaker that the new Council would have to act very drastically with the expenditure at Hanover Square. He could say at once that he knew of five or six towns where there was a site available for the show, if they would go backto the provinces. Park Royal was, he hoped, their great asset. Although they might not hold another show at Park Royal, they should try to retain the land at Park Royal as a land speculation, and he believed that even with the interest paid, by the time the right of pre-emption expired, they would get such a sum as would leave a good profit.

Mr. Mathews said he thought the Committee ought to know the view of the members generally, because he thought that was a mistake they made some time ago, when they decided to have a permanent show at Park Royal. He would like a circular sent to every member of the society, to include a number of questions as to whether:

1. The member is in favour of holding a show in 1906?

2. If so, whether it should take place at Park Royal or elsewhere?

3. If in favour of the show, he would contribute, in the case of a life member £1, and in the case of an ordinary member £2, towards the show?

4. If not in favour of continuing the shows, what should the society do to keep itself in evidence before the members?

He suggested that each member of Council should undertake to send out such a circular to the members of the society resident in his own county. The answers should be sent to the member of Council, and he should be asked to analyse them, and send the results to the Special Committee, as it would be a great help to the Committee in coming to a decision with regard to the show. His own impression was that the majority of replies would be in favour of a show somewhere next year.

Colonel Curtis-Hayward said that before a committee set to work on the question as to how to put their house in order, he thought they ought to decide the question as to whether or not a permanent showyard was the best for the society. He believed that the majority of their members considered that the whole of their disasters were caused by their having given up the migratory show, but he thought that they could not sufficiently have read the report of the committee, which showed the failure of the migratory show system. A suggestion had been made that day that they should call a conference of representatives of the local agricultural societies. If this proposal was adopted, the Council could ascertain authoritatively whether there were any sites in the different districts for the society's show, whether the county societies were prepared to co-operate, and whether they would give up their own shows at the time that the Royal came into their neighbourhood. The Council would then know whether a return to the system of migratory shows was possible. Until that was decided the Special Committee could not tell in what directions they were to reform.

After some further discussion, Mr. Bowen-Jones formally moved, and Mr. Forrest seconded, the following resolution, which, on being put, was declared by the President to be carried unanimously:—"That a Special Committee be appointed, with power to call for any information from officials, and to employ professional assistance, if they consider it necessary, from accountants, solicitors, and valuers, to thoroughly investigate the entire position of the society, and to make a report to the Council after the recess as to what reforms and economies they consider desirable to put the society on a sound footing."

This committee was constituted as follows:—The President, Mr. T. L. Aveling, Mr. Richardson Carr, Mr. R. P. Cooper, Mr. R. Forrest, Sir John Gilmour, Bart., Sir Gilbert Greenall, Bart., Mr. W. Harrison, the Earl of Jersey, Mr. Christopher Middleton, Mr. T. S. Minton, Mr. F. Reynard, Mr. John Rowell, Mr. E. W. Stanyforth, Mr. Richard Stratton, Mr. George Taylor, Mr. John Thornton, and Mr. C. W. Wilson.

(This committee subsequently held a preliminary meeting and decided to sit again on September 20 and 21.)

The Council then adjourned until Wednesday, October 4 next.

Agricultural Imports.

The following is an account showing the quantities of certain kinds of agricultural produce imported into the United Kingdom in the week ended July 29, 1905, together with the quantities imported in the corresponding week of the previous year:—

	1904.	1905.		1904.	1905.

London and County Bank.—The half-yearly meeting of the London and County Bank was held at the Cannon Street Hotel, on Thursday, and was presided over by the Hon. G. J. Goschen, M.P., who said the report was highly satisfactory. The net profit had been £264,065, as compared with £265,809 at the same date last year. During the past six months, however, the Bank rate had been £2 13s. 8d., as compared with £3 11s. 11d. last year. The discount rate for three months' bills had been £2 4s. 6d., as compared with £2 13s. 10d., and the average rate for daily money £2 1s. 8d., as compared with £2 8s. They had placed £50,000 to reserve fund, which now stood at £1,400,000, as compared with £1,300,000 a year ago. Customers' balances were £44,615,591, showing an increase of £1,287,826. This was probably the most satisfactory feature of the report, especially when they remembered the times through which they had gone. The directors had declared a dividend of 10 per cent. for the half year, which left £80,456 to be carried forward. The report was approved.

Harvest Weather.

The "Mark Lane Express" Special Three-Day Forecast.

1, Essex Street, Strand, Friday, August 4th, 1905.

GENERAL PREDICTION.

The general character of the weather has temporarily become windy and showery, owing to the arrival of a deep cyclonic system over Ireland from the S.W., and its passage north-eastwards across the British area.

During its transit and departure within the ensuing three days the sequence will be: Over England and Scotland, strong to fresh S.E. to S.W. and W. winds, showers at times in most districts, particularly Nos. 2, 7 and 4, Wales and Scotland. Later S.W. to W. or N.W. fresh to moderate winds, fairer more generally, especially in Districts 3, 4, 5 and 8. Finally, W. to S.W. winds, freshening, fair to cloudy, some showers in Ireland, South and West, Wales, and Districts 7 and 8. For Ireland in detail, see District 6. The temperature will be mostly mild to cooler, and then mild or warm

LOCAL PREDICTIONS.

No 1.—Scotland:—S.E. to E. and N. to N.W. and W. winds, strong to fresh and then moderate; cloudy and showery at first, then fairer with passing showers; finally fair to cloudy; temperature, normal to cool and then milder.

„ 2.—England (N.E.) and part of Scotland:—Peebles, Selkirk, Durham, Lincoln, Northumberland, Roxburgh, Yorkshire, (N. & E. Ridings). —The same as No. 1, but with winds changing from S. to S.W. and W. and temperature mild to normal or cool, and then milder.

„ 3—England (East):—Bedford, Cambridge, Essex, Hertfordshire, Huntingdonshire, Norfolk.—The same as No. 2, with only temporary showery spells.

„ 4—Midland Counties:—Buckingham, Derby, Gloucester (part), Hereford, Leicester, Northampton, Nottinghamshire, Oxford-Rutland, Shropshire, Stafford, Warwick, Worcestershire, York, shire (West Riding).—At first some rain at times; later fairer; finally fair to cloudy; wind and temperature as in General Prediction.

No. 5.—England (South):—Middlesex, Berkshire, Kent, Surrey, Sussex, Wiltshire, Channel Islands, Hampshire.—At first showers and bright intervals; later fairer; the temperature generally will be warm or mild; in other respects similar to No. 4.

„ 6.—Ireland.—At first variable S.E. to N.W. strong and fresh winds; rain at times; later N.W. to W. winds and fairer; finally W. to S.W. or S.E. winds, fair to cloudy and some showers, chiefly in the West.

„ 7.—England (North-West) and North Wales. Cheshire, Lancashire, Westmoreland, Anglesey, Carnarvon, Denbigh, Flint, Merioneth, Montgomery.—At first winds varying from S.E. to N.W., strong to fresh, some rain at times; later N.W. winds, fresh to moderate, some passing showers to fairer; finally S.W. to S.E. fair to cloudy. Temperature mild to cooler, and then normal to mild.

„ 8.—England (South-West) and South Wales:—Brecon, Cardigan, Carmarthen, Glamorgan, Pembroke, Radnor, Cornwall, Devon, Gloucester (part), Monmouth, Somerset.—At first strong to fresh S.W. to W. winds, cloudy and showery at times, with bright intervals; later W. to N.W. winds, moderating; some showers to fairer; finally W. to S. winds; fair to cloudy; some showers.

When local wind directions are not specifically indicated, they may be taken to approximate to those under General Prediction.

THE SUN AND MOON.

Sun Rises	...	4.30 a.m.
„ Sets...	...	7.42 p.m.
Moon Rises	...	8.20 a.m.
„ Sets	...	9.26 p.m.

Age of Moon—Four days.

One-Day Forecast prepared by the Meteorological Office at 11 a.m. on Friday, August 4th.

GENERAL INFERENCE. The deep depression which is now centred over the St. George's Channel appears likely to travel in a Northerly direction. The strong winds may, therefore, be expected to subside gradually during the ensuing 24 hours and the general character of the weather to improve.

SCOTLAND, N. and E.—Increasing winds from between South-East and North-East; dull, rainy.

ENGLAND, N.E.—Fresh or strong to moderate winds, mainly Southerly; changeable, showery, warm.

ENGLAND, E., MIDLAND COUNTIES, and ENGLAND, S. (London and Channel).—Southerly winds, strong to moderate, squally, occasional showers, otherwise fair; warm.

SCOTLAND, W.—Same as Scotland, N. and E.

ENGLAND, N.W. (and N. Wales).—South-Easterly to Southerly or South-Westerly winds, strong to moderate, rainy, then improving.

ENGLAND, S.W. (and S. Wales).—Southerly and South-Westerly winds, very strong to moderate, changeable, showery.

IRELAND, N. and S.—Fresh or strong winds between North-East and North-West, rainy intervals, cool.

Home Notes.

The Borough.

It is with much regret that I find myself unable to speak of any improvement in the situation of the market. Like Paddy's wages, the rise is downhill, as the continued favourable reports from the plantations have apparently excited a panic amongst the free holders, who, to use the words of one of our merchants, are "almost tumbling over each other in their anxiety to realise." But we know that there are other reasons: the picking time is rapidly approaching, money is required for the coming crop, and it is not every planter who can afford to be indifferent to the claims of his future engagements. With regard to the prospects of the crop, all observers agree that the amount and strength of the bine is almost phenomenal, but it does not necessarily follow from this fact that the yield of hops will be proportionately great. There are many contingencies that may, even in the short interval that remains, yet interfere with the full development of the cones. It is an old saying that "we cannot weigh the crop till we have the pockets filled." Therefore, until that time has arrived, it appears to be foolish to anticipate, and to throw away good stock that may yet be more valuable than present quotations suggest. In the meantime there is sufficient willingness to buy, to furnish a fair number of inquiries, from which sales result, if buyers can induce holders to accept their offers. The business done has, however, not been large; but it is sufficient, as I think, to demonstrate that the stocks of consumers cannot be more than are required for early use. It is therefore expected that when the new hops come forward, brewers will be very ready to operate, and, as yearlings are necessary in certain proportion, we may fairly conclude that they will probably retain their present value, and, possibly, considering their scarcity, realise higher prices than are quoted at present.

Foreign Crop Prospects.

America.

The situation is practically unchanged. From all districts the reports of the growing crops are favourable, with the possible exception of Oregon, from which State there continue to be rumours of the presence of lice, which seem to be sufficiently plentiful to make the estimates somewhat uncertain. The general outlook, however, favours a full yield, as there appears to be no hindrance at present observable to the progress of the growth in California, Washington, or New York State. Consequently the markets are very quiet, and the tendency of values is rather in a downward direction.

Nuremberg.

The crop outlooks remain very favourable in nearly all districts, but there are some complaints of the want of rain, which is necessary for the full development of the cones. Throughout Bavaria the prospects are very encouraging, a similar condition being general in Bohemia. According to the most conservative estimates, the yield of Germany and Austria will come out from 20 to 30 per cent. in excess of last year. Market values are falling, but at the reduced prices the demand by local consumers is fairly active, and the small stocks are being rapidly reduced.

Belgium.

There is no interruption to the promising aspect of the plantations either in Alost or Poperingbe. All insect pests have entirely disappeared, the burr is fully out on the white bines, and the later sorts are rapidly coming into flower. The weather is just what is desired for the completion of the growth, as the coolness of the soil has enabled the plants to resist the effects of the prolonged sunshine. Demand for hops being somewhat slow, there is some inclination towards lower prices, but this tendency is kept in check by the reduction of stocks, therefore values remain fairly steady on the whole.

All official reports and notices of the National Association of English Hop Growers are printed in the MARK LANE EXPRESS, *and current information from all parts of the world, likely to be of interest and benefit to the members of the society, and Hop Growers generally.*

POULTRY.

Special Course For Fatteners.

At the present time there is a very large and apparently increasing demand for working fatters, men who are qualified to deal with table poultry in all its branches, and good wages can be obtained. For good workers, such as sons of small farmers and better-class labourers, this industry offers at the present time an excellent opportunity. The University College, Reading, has therefore arranged for a special course upon the college poultry farm, Theale, designed to meet the requirements of those who have had some experience with general poultry keeping and fattening, and who desire to increase their knowledge.

The course will commence on Thursday, October 5, 1905, and conclude on Wednesday, November 15, 1905.

The class will be limited to twelve students, and only men can be accepted. Should the number of entries be insufficient, the college reserves the right to postpone the course.

The work will be chiefly practical, embracing trough feeding, cramming, killing, plucking, shaping, dressing, and trussing. Training will be given in the making of cages, shaping boards, packages, etc. Occasional lectures will be given dealing with foods and feeding, selection of birds, diseases, and marketing.

Board and lodging for students can be arranged in the village of Theale, by the college, at a cost of 15s. per week.

Registration fee, 1s. Tuition fee for the course, £6, payable in advance to the Registrar.

Applications for permission to attend the course, accompanied by a deposit of one guinea, should be made to the Registrar, University College, Reading, not later than a fortnight prior to the commencement of the course.

Londonderry City fair was held on Wednesday, when there was a very small supply, which met a poor demand except springers, these selling well. Prices:—Calves, 2nd class, £3 10s. to £4; yearlings, 1st class, £9; 2nd class, £5 10s. to £6 15s.; two-years-old, 1st class, £11 to £11 15s.; 2nd class, £8 to £8 15s.; springers, 1st class, £16 15s. to £18 5s.; 2nd class, £12 10s. to £14 5s.; 3rd class, £8 5s. to £10 2s. 6d.

Foreign Crop Prospects.

FRANCE.—Although considerable damage to crops has accrued from storms, it is believed that the loss will not be so heavy as seemed probable two or three weeks ago. Harvest work is being actively pushed on, and is finished in the earlier districts. There is the possibility that after all vicissitudes the yield will not be inferior to that of last year.

HOLLAND AND BELGIUM.—Brilliant weather revived hopes of fair harvest results, but as wheat and barley had suffered from storms sunshine came too late to rehabilitate them, and a shortage in outturn appears inevitable. Potatoes do not promise a good crop.

GERMANY.—Finer weather having succeeded the rain and storms of previous week, harvest has become general, and the general outlook for the crops is more satisfactory.

AUSTRIA-HUNGARY.—Up to the present only a few samples of new wheat have appeared on Budapest market, the quality generally is satisfactory; although the yield is larger the grain is inferior to last year's. Harvest is almost completed, and farmers are busy thrashing. Rain fell at the end of last week, but more is required for the maize crop.

ITALY. — Now that the wheat crop has been secured in good condition attention is turned towards maize, which requires rain and a quiet time to develop after the recent storms.

SPAIN.—The wheat crop is not equal even to the poor estimate formed early in the season, and harvest has been hindered by storms, hail, and rain.

SWITZERLAND.—Advices from Zurich say that the harvest is in progress, but the yield will not be equal to expectation, as storms laid a considerable area of the grain fields.

RUSSIA.—Taken all round, crop prospects in the Empire of the Czar are as good, if not better, than they were a year ago. According to latest official report winter wheat will exceed an average. Spring wheat is expected to produce an average. Rye will probably be under an average. In the aggregate barley and oats promise to exceed an average.

ROUMANIA.—Advices of 24th inst. stated that wheat is a good average harvest, but the natural weight is below that of last year; it is generally from 74 to 78 kilos, but there is also wheat of from 79 to 80 kilos. The crop of rye is also a good average. Barley about an average yield. Oats have suffered greatly from the excessive heat, and the maize crop stands in need of rain.

UNITED STATES. — The excitement produced by statements of widespread rust in the spring wheat crop was of short duration. Official experts exposed the fallacy of these rumours, and the market sagged down to its former level. It must be taken for granted that the last has been heard of rust scares, as a year ago the "crop blighters" returned to the charge time after time, and their asseverations were partially fulfilled. This season crop conditions are regarded as being more favourable. Winter wheat harvest is completed, and threshing is well under way.

ARGENTINA. — Our cable from Buenos Ayres tells of continued fine weather, and wheat and linseed crop advices are very favourable.

INDIA. — Although the monsoon rains began late, the fall generally was seasonably sufficient and well distributed and agricultural prospects are favourable to fair in all districts except in parts of Madras, South Bombay, and North Rajputana. There is no anxiety respecting famine, as grain stocks are sufficient everywhere, and prices normal.

AUSTRALIA. — The latest information respecting the agricultural outlook is distinctly favourable. Farmers hold the balance of the wheat crop in expectation of better prices in the autumn.—*Dornbusch* (July 29).

CORN MARKETS.

COUNTRY.

Ashford. Tuesday.—Samples of new oats, grown in Thanet, were sold at 17s to 18s per qr.; they were of good quality, and weighed 40lb. to the bushel. New peas offered at 52s. No new wheat on sale; old wheat made 32s to 34s. English feeding barley, 25s to 28s; Mazagan beans, 32s to 34s; ticks, 34s to 36s; flat maize, 27s; round, 28s; oats, 20s to 24s per qr.

Banbury. Thursday. Wheat, red, new, 29s to 30s; ditto white, old, 32s to 33s; barley, 24s to 27s; beans, old, 32s to 33s 6d; oats, 18s to 19s; ditto, old, 20s to 24s; peas, old, 30s to 34s per qr.

Birmingham. Thursday.—A very thin attendance at market, and very little business doing. Foreign wheats are quite inactive at the following quotations:—River Plate, 31s to 34s 6d per qr. (496lb.); Russian, 31s 6d to 33s 6d per qr.; Indian, 31s per qr. and upwards, all at Sharpness. Grinding barley is 3d lower at 20s per 400lb. at Sharpness. Plate maize is unchanged at 25s per 480lb. at Sharpness. There are one or two samples of new oats and wheat on the market, but value of same can scarcely be fixed at present.

Boston. Wednesday. A sample of new wheat in good quality realised 32s on rails. Grinding barley 24s to 25s; old oats, 20s to 21s; beans, 32s to 33s; maize, 25s to 26s per qr.

Bristol. Thursday.—There was a small attendance on market to-day. No English wheat offering as yet. Foreign unchanged. Barley and oats 3d lower. Maize unchanged. Flour firm at late rates.—GRACE BROTHERS.

Chichester. Wednesday. There was a fair attendance considering it was race week, but there was not much trade done. Quotations:—White wheat, 34s to 34s 6d; red ditto, 34s to 34s 6d; grinding barley, 20s to 23s; English oats, 18s to 23s; maize, 25s to 26s; flour, 27s to 28s.

Devizes. Thursday.—The following were the quotations:—New wheat, 16s 6d to 17s 6d; secondary, 15s to 16s 6d; best barley, 26s to 32s 6d; secondary, 20s to 24s; rye, 22s to 24s; old black oats, 22s to 23s; white ditto, 20s to 23s; malting barley, 26s to 32s; beans, 16s to 18s; fine flour, 24s to 26s; extra fine, 27s to 30s; best bread, 10d.

Edinburgh. Wednesday.—The supplies and sales were:—Wheat 702 qrs., 377 sold, top price 33s—down 3d; oats 1,848 qrs., 285 sold, top price 23s—down 6d; no barley offered.

Glasgow. Wednesday.—There was the usual attendance at our corn exchange. Wheat and flour quiet and unchanged, with little business passing. Indian corn and maize 3d cheaper on the week. Other articles of the trade quietly firm at unchanged values.—GIBSON AND CLARK.

Glasgow. Wednesday. — Wheat dull, and business passing not sufficient to test values. Flour also slow; buyers prefer to await the result of the new crop before adding to stocks. Mixed American maize 3d per 280lb. lower on the week at 14s; round unchanged at 14s 9d. Feeding stuffs easier to buy, except grinding beans, which are held owing to scarcity.

Hereford. Wednesday.—Very small attendance. New grain made its appearance for the first time, parcels of winter oats being purchased at 18s per qr. New wheat expected next week. Old wheat nominally unchanged. Old oats very firm.

Ipswich. Tuesday.—The attendance was small, and there was scarcely any old wheat offering, and very little demand for it. Some new samples were offered in good condition, and of nice quality, having been threshed out of the field in favourable weather; these found buyers at 31s to 32s per 504lb. Oats and lentils were steady; also grinding barley. Beans the turn dearer, and maize steady at 25s to 25s 6d per qr. Oil-cakes, milling offals, and other feeding stuffs firm on the week.

Leeds. Tuesday.—Harvest has commenced throughout England, being so far favoured by the weather. The Wheat trade continues quiet and inactive, buyers operating from hand to mouth; prices, however, remain steady. Holders are by no means anxious sellers, as many ups and downs are possible during the next few weeks. Maize, 6d lower; beans and oats steady. — DUNNS AND CO.

Louth. Wednesday.—Though harvest operations have commenced in this district, most kinds of grain are not ready for the market. The first new samples of the season were shown to-day, and consisted entirely of winter oats, which realised 17s to 18s per qr.

Manchester. Thursday.—English wheat was in small supply at full rates. Foreign was steady, and unchanged on the week. Flour fairly firm. Indian corn: Mixed American quoted 5s 4½d to arrive; Plate about 1d lower. Oats rather dull. Foreign barley easier, and feeding stuffs unchanged.

Newark. Wednesday.—Wheat a nominal trade at about last week's prices. A few samples of new oats showing; prices irregular. Quotations: White wheat, 34s to 36s; white oats, 19s to 22s; old beans, 34s to 36s per qr.

Ripon. Thursday.—A very dull market. Maize shows a downward tendency. Fair attendance. English wheat 33s 6d to 34s; foreign wheat, 32s to 36s; grinding barley, 23 to 24s; oats, 20s to 21s; round maize, 26s to 27s; flat maize, 26s to 27s per qr.

Plymouth. Thursday. The attendance on our market to-day was very good, but little business doing. Wheat unchanged. Maize scarce; on spot firm. Barley on spot firm, and oats easier.—ORLANDO DAVIS AND CO.

Wolverhampton. Wednesday. There was a small attendance, and but little business was transacted. Quotations: Wheat, 13s to 14s per 476lb.; English beans, 13s 6d per 196lb.; oats, 13s 6d per 196lb.

Worksop. Wednesday.—Very poor attendance, and very little grain on offer. White wheat, 32s 6d to 33s 6d; red wheat, 32s to 33s; barley, 26s to 28s; grinding ditto, 24s to 25s; white oats, 22s to 24s; black oats, 20s to 22s; round maize, 27s to 29s; flat maize, 26s to 27s; beans, 36s to 37s per qr.

EGGS.

(Price at 1s., except where otherwise stated.)

Wednesday.—Barnsley: 11 and 12. Boston: 14. Colne: 1s 8d to 1s 10d per score. Dorchester: 1s to 1s 2d per dozen. Goole: 13 and 14. Hereford: 12 to 14. Holsworthy: 14. Keighley: 11 and 12. Kirbymoorside: 13 and 14. Knaresborough: 12. Market Drayton: 13 and 14. Newton Abbot: 1s to 1s 1d per dozen. Northallerton: 11. Truro: 9d to 10d per dozen. Uttoxeter: 1s 6d to 1s 7d per score.

Thursday.—Axminster: 8d to 9d per dozen. Birmingham: 10 to 12. Brigg: 12 to 14. Driffield: 15 and 16. Devizes: 14 to 16. Evesham: 10½d per dozen. Kidderminster: 14. Northtawton: 12. Penistone: 12. Plymouth: 12. Ripon: 12. Scarborough: 11. Wellington (Salop), 12 and 13. Wetherby: 12 and 13.

CHEESE.

Glasgow. Wednesday.—Fine arrivals, and business fair to good for both Cheddars and Dunlops; prices 2s per cwt. dearer. Cheddars, 54s to 58s per cwt. Dunlops 2s less. Canadians are still quoted about 1s 6d to 2s 6d under this side.

Newport. Wednesday.—Quotations:—Cheddars, 48s to 54s per cwt.; fancy dairies, 56s to 58s; factories, 52s to 58s; Derbys, 57s to 58s. A supply of about eight tons was notified.

GAME AND POULTRY.

Smithfield. Thursday.—Fair supplies were to hand, but met a quieter demand. Quotations:—Fowls: Yorkshire, 2s 6d to 3s; Essex, 2s to 2s 8d; Welsh, 2s to 2s 6d; Surrey, 3s to 3s 6d; Sussex, 3s to 3s 3d; Irish, 1s 9d to 2s 3d; geese, 5s to 6s each; ducks, 1s 3d to 1s 9d; Barbaux pigeons, 11d to 1s 1d; cauliflower, 9d to 1s 1d; Aylesbury ducks, 3s to 3s 3d; country, 2s 3d to 2s 9d; wild rabbits, 6d to 8d each; tame, 1s 3d to 1s 6d each; Australian, 6s to 8s per dozen; venison, haunches, 15s to 20s each; horsepartners, 3d per lb.

Review of the British Corn Trade

DURING THE PAST WEEK

Written exclusively for the Mark Lane Express.

The weather of July was extremely hot all over Europe, and the mean temperature in Great Britain was two to three degrees above the average. The British Isles, therefore, lay on the edge of a great heat wave without being submerged thereon. The extra temperature was enough to help the wheat and other cereal crops, without being too exhausting either for wheat or barley. On oats the effect was sometimes too great, but this was only on soils where the cultivation of this cereal is seldom to be recommended. The July record of weather thus runs for Middlesex and Surrey:—

1905	Rainfall inches.	Sunshine hours.	Warmth degrees.	Character of month.
January	1·03	45	38·0	Fine
February	0·70	61	42·5	Dry
March	3·70	103	48·0	Showery
April	1·80	90	47·5	Chilly
May	0·81	215	52·0	Dry
June	4·50	171	59·0	Wet
July	1·17	240	65·0	Hot

The counties of Buckingham, Oxford, Leicester, Northampton, Lincoln, Norfolk, Suffolk, and Essex, a very important cereal-producing region, had, in July, an average rainfall of only half an inch, but the region where the Surrey-Middlesex average was exceeded included Kent, Sussex, and Hampshire, as well as the customarily wetter South-West, West, and North-West.

Since August came in, we have had both sunshine and showers; the latter will benefit the barley and the later-sown oats. The harvest is in full progress south of the Thames, both for wheat and spring oats, but will not start, as a rule, in East Anglia until Tuesday the 8th. The first offers of new winter oats at Mark Lane were made on Wednesday, and prices made ranged from 18s. to 20s. per 336 lb. We only note in this connection samples with a certain bulk of grain for delivering behind them. Rubbed out samples, and samples where no delivery can be made, are interesting as crop evidences, but have no market position.

Spring wheat has begun to be reaped in Dakota, Nebraska, and Iowa, and farmers are in excellent spirits. The discovery of falsified accounts in the American Board of Agriculture Cotton Department has been the subject of extravagant writing even for the American Press. The evil is one that no government department can hope to be absolutely protected against so long as men are liable to succumb to temptation. There is, we understand, no substantial reason to suspect the present rectified cotton reports, nor has the trouble touched the side of the office which deals with cereals. The enormous crops with which the Bureau at Washington has to deal are liable to be made the subject of excessive generalisation, but this is practically inevitable, and is corrected later by the careful returns collected on the basis of actual threshings.

The latest estimates of the French crops are more favourable than those current in July, and it is now believed that Germany, Austria, Hungary, Roumania, and Servia have decidedly over-average wheat yields when considered as a united area under the title of Central Europe. The Russian wheat yield is provisionally estimated at 80,000,000 qr., against 84,000,000 last year, and the Italian wheat yield is put at half a million qr. more than last year; on the other hand, a comparatively large deficiency is revealed in Spain, estimates for the Iberian Peninsula being as follows:—

	Quarters.
1905	16,500,000
1904	13,500,000
1903	14,000,000
1902	14,500,000
1901	15,100,000

Requirements have never been estimated officially, but are put by the trade at 15,000,000 qr. In this case the not inconsiderable imports of 4,500,000 qr. are forecast, but the Spaniards are a frugal people accustomed to live hard, and it is probable that they will reduce their consumption of bread in a bad year. We doubt if more than three millions will actually be imported.

Supplies of grain on passage to the United Kingdom since the new year came in have been as follows, the unit in each case being thousands of quarters:

1905	Wheat	Barley	Oats	Maize	Linseed
1 Jan.	2,400	540	218	770	155
1 Feb.	2,666	520	155	720	294
1 March	4,003	470	260	437	405
1 April	3,996	400	450	325	288
1 May	3,336	400	325	450	270
1 June	2,636	296	382	725	382
1 July	2,076	230	370	835	280
1 Aug.	2,666	196	317	1,025	216

The present expectations are very small of barley, but decidedly large of maize. The other items do not differ greatly from the average.

The sales of British wheat at the statute markets since September 1 have been as follows:—

	Per Qr.
This Season, 1,613,000 qrs., at	30s. 9d.
Last Season, 2,040,000 quarters, at	27s. 1d.

The advance on the twelvemonth is 3s. 8d., while the last recorded average showed 4s. 3d. improvement from the like date in the preceding year.

The sales of British barley have been good, and yet the price made exceeds that of the preceding season. We seem to be gradually getting out of the protracted period of low prices, for barley, and the moderate imports of that cereal, are encouraging to English growers.

	Per Qr.
This Season, 3,132,000 quarters, at	24s. 9d.
Last Season, 2,774,000 quarters, at	22s. 0d.

The sales of British oats for the two seasons thus compare:—

	Per Qr.
This Season, 1,131,000 quarters, at	17s. 1d.
Last Season, 2,774,000 quarters, at	16s. 4d.

The price of oats in the country is now 19s. 3d., but August usually witnesses a good price made for the old and seasoned corn of the previous year's harvest.

Of other British crops it may briefly be remarked that tares and buckwheat are decidedly dearer from a year ago, that new rapeseed and trefoliumseed are meeting with appreciation, and that both beans and peas are firm with a slight tendency to advance.

The imports of the United Kingdom last week were as follows:—

Wheat, 669,000 quarters; an extraordinary supply.
Flour, 56,400 sacks; a third of an average.
Barley, 61,000 quarters; half an average.
Oats, 204,000 quarters; a very large arrival.
Maize, 152,000 quarters; under an average.

The arrivals of foreign breadstuffs since harvest have been as follows:—

	Quarters.
Wheat	22,488,000
Flour	3,401,000
Breadstuffs	25,889,000

In the like period of last cereal year the total imports were 25,900,000 qr., so that the very large imports of wheat have been balanced by the striking diminution in the use of imported flour. Our mills have done a magnificent trade, and have been enjoying a period of prosperity unrivalled since the great year 1875, when the roller-mill came into use.

The sales of foreign feeding stuffs since September 1 have been as follows:—

	This Season. Quarters.	Last Season. Quarters.
Barley	5,574,000	8,265,000
Oats	5,819,000	5,146,000
Maize	8,901,000	11,097,000

On the whole, our supply of foreign feeding stuffs has been below the average.

London averages since New Year's Day are as follows:—

1905.	Wheat.	Barley.	Oats.
Jan.	31s. 0d.	24s. 1d.	17s. 6d.
Feb.	31s. 10d.	24s. 5d.	17s. 10d.
March	32s. 1d.	24s. 1d.	17s. 10d.
April	30s. 11d.	22s. 10d.	17s. 7d.
May	31s. 10d.	23s. 0d.	18s. 7d.
June	32s. 3d.	—	20s. 2d.
July	33s. 0d.	—	20s. 1d.

Wheat will be seen to have advanced from January 1 to August 1 2s. per qr., and oats 2s. 7d. per qr. The decline of 10d. in barley is regrettable, but is a very slight matter as against the very natural changes for the better in established quotations.

Top-price flour is 1s. cheaper from January 1. Household flour is 1s. 9d. cheaper, and Iron Duke flour is 3s. 9d. down. The fall in American is, of course very noticeable.

Maize on August 1 was 2s. dearer from the opening of the year, an event against which the betting on New Year's Day would have amounted to long odds.

Some minor imports into London for the month of July were 827,300 qr. of malt, 2,400 qr. of beans, 8,000 qr. of peas, 106 qr. of tares, and 14,500 qr. of various seeds.

Eleven months' imports of flour into the great estuaries were: The Clyde, 1,391,000 sacks, against 2,500,000 sacks last season; and the Mersey, 1,044,000 sacks, against 2,107,000 sacks last season.

July shipments of wheat from the chief exporting countries were as follows:—

	Quarters.
From America	190,000
,, Argentina	1,310,000
,, Russia	2,376,000
,, Roumania	507,000
,, India	919,000
,, Australia	138,000
Total	5,340,000

This total is a good deal above the average.

LATEST MARKETS.

MARK LANE, FRIDAY, August 4.

[FIRST REPORT.]

The market was very firm for Old English wheat, of which, perhaps, not more than 300 quarters were available for delivery. A sample or two of new wheat from Essex was offered at 32s. to 33s.; but new wheat is not yet really "on the market." Foreign wheat was the turn in buyers' favour; 31s. 6d. was accepted for some Indian white, 32s. 3d. for some Buenos Ayres, and 34s. for good Baltic Russian. Some offers of American red at 33s. per 480 lb., for delivery after the 7th, were made. Some barley from Nicolaieff fetched 20s. 3d. per 400 lb., thereby giving an indication of values for feeding type generally. There were buyers of screened Ouchak at 30s., of unscreened Smyrna at 24s., and of English chicken barley at 26s. Oats freshly arrived from Baltic ports were pressed on sale at 14s. 6d., with buyers at 14s. per 304 lb. Clipped American were slow at 16s. 3d per 320 lb. Argentine, at 15s., were in fair request. Swedish and Dutch sorts were very scarce. Maize reached 24s. 6d. without difficulty for either flat or yellow corn, while round sorts remained as they have now done for months, beyond the ideas of all ordinary buyers. Split Egyptian beans, at half a guinea for the 160 lb. bag, sold rather well; so did green Indian peas at 22s. 6d. cash; and Dun peas (English) at 31s. each per 504 lb.

THE FLOUR TRADE.

MARK LANE, FRIDAY, August 4.

While the finest Household flour made 26s., a shilling under that level continued to command fair average quality. No. 1 Supers made 29s. 9d., and Paste flour was obtainable at 21s. 6d. per sack. "Cascadia" and "Granardia" realised 25s. to 26s. per sack. Country flour was unchanged, so, too, were the Hungarian, Australian, and Argentine sorts on offer. American was neglected, and barley as good in selling value as on July 31. The new flour from Red Winter wheat is offered for September shipment at 26s. 6d. Maize flour was held for 17s. 9d. per sack; maize starch for 9s. per cwt., and American maize cones fetched 17s. per 280 lb. Farma or potato flour was held for ten guineas per ton, but there was quality obtainable for 30s. under this price. Rye flour was quoted 21s. 6d. per sack for finest, 19s. 6d. for Konigsberg, and 17s. 6d. for common Russian. Oatmeal made £15 10s. per ton for finest special Midlothian, £12 for "Calmila," and £12 5s. for Deeside. Oat flour realised £16 10s. per ton for finest Midlothian, £11 12s. 6d. for Aberdeen, and £12 5s. for Deeside. Ground linseed cake made £8 per ton.

LONDON TERM MARKET.

This market is open to elected members only, and is held at the Baltic Club, St. Mary Axe. No business except for future delivery is done, and the smallest quantity that can be purchased is 1,000 quarters, or 4,800 cental.

Prices quoted on Friday at the close of the week's trade were:—

WHEAT (per cental).

No. 2 American Red	6s. 8d.	Aug.	delivery.
,, ,,	6s. 7d.	Sept.	,,
,, ,,	6s. 6d.	Oct.	,,

MAIZE (per cental).

American	4s. 9d.	Aug.	de'ivery.
,,	4s. 8d.	Sept.	,,
,,	4s. 7d.	Oct.	,,

These are not official prices, but will, we believe, be found practically correct. Official quotations, we hear, are likely to be resumed very shortly.

The market will be closed until the 8th inst. It will be seen that the value both for wheat and maize futures is a penny per cental lower on the week.

There being but one statute market in the following counties that market average is the average for the county:—

	s.	d.		
Derby	28	10	..	Derbyshire.
Oakham	28	9	..	Rutland.
Chester	28	3	..	Cheshire.
Welshpool	28	5	..	Montgomery.
Haverfordwest	33	2	..	Pembroke.
Cardiff	27	10	..	Glamorgan.
Brecon	31	10	..	Brecknock.

During 1904 no wheat sales were recorded in the counties of Westmorland, Anglesey, Carnarvon, and Cardigan.

Wheat sales were under 100 quarters for the year at Brecon, Denbigh, Penrith, Cockermouth, Carlisle, Alnwick, and Ludlow.

THE BALTIC.

Wheat cargo sales since the close of July include Australian arrived at 31s. 9d. per 480 lb. and on passage at 32s., Bahia Blanca at 30s. 6d. per 480 lb. on passage, Rosario at 29s. 9d. on passage, and Santa Fé at 29s. 6d. on passage. Three cargoes of White Calcutta have been placed for August shipment at 30s. 9d. per 492 lb., and two cargoes of new Roumanian crop for September export found buyers at 30s. per 492 lb. There were no transactions in American, Californian, Canadian, or New Zealand wheat cargoes to record before the adjournment for the Bank Holiday. Prices of wheat cargoes on August 1, 1905, and 1904 thus compare:—

	1905.		1904.	
Russian Winter	34s.	0d.	33s.	6d.
Odessa Ghirka	32s.	0d.	32s.	0d.
Australian	31s.	9d.	31s.	9d.
Argentine	30s.	0d.	31s.	6d.
White Calcutta	30s.	9d.	29s.	6d.

Maize cargoes since July 31 have realised 22s. 9d. per 480 lb. for La Plata, the sale reported in the *Times* of Thursday of 4,300 tons at 32s. 1½d. is not authentic, but we are unable to trace the error. No sales of Russian or American cargoes were reported. The following is a comparison of maize prices on August 1 this and last year, prices, that is to say, for which cargoes are held:—

	1905.		1904.	
Argentine	22s.	9d.	21s.	0d.
American	22s.	9d.	21s.	9d.
Russian	27s.	0d.	23s.	0d.

No fresh transactions in barley are reported, but the present value of Russian on passage is about 18s. 9d. per 400 lb., as compared with 16s. 6d. at this time last year. A steamer just left Archangel with White Sea oats was placed on Thursday at 13s. 7½d. per 304 lb., and a cargo of Argentine linseed on passage made 39s. 3d. per 416 lb.

MARKET REPORTS.

LINCOLN (August 4).—A few samples of excellent new wheat were shown at market to-day; 32s. was made. For old wheat trade was quiet.—(Special to *M.L.E.*)

LIVERPOOL (August 4).—Market less depressed from Tuesday. American red winter wheat 6s. 7d. to 6s. 9d. per cental; American mixed maize 4s. 9d. to 4s. 11d. per cental.—(Special to *M.L.E.*)

HAY AND STRAW.

Manchester. Wednesday.—Hay, old, 5½d; ditto new, 4¾d to 5d; clover, old, 5¾d to 6½d; ditto new, 4¾d to 5½d; wheat straw, 4½d; oat ditto, 3½d to 3¾d per stone.

Whitechapel. Thursday.—Trade proved of a quiet nature this morning, and heavy supplies were submitted, while prices were easier for the better kinds of hay. Quotations: Best clover, 75s to 82s 6d; inferior ditto, 60s to 70s; specially picked hay, 77s; good ditto, 53s to 72s; inferior ditto, 45s to 60s; mixture and Sainfoin, 67s to 75s; and straw, 30s to 42s per load.

LIVE STOCK AND MEAT TRADE REVIEW

(WRITTEN SPECIALLY FOR THE "MARK LANE EXPRESS.")

Trade in London.

There was a slightly larger supply of both prime and second quality beasts at Islington, of which the majority arrived from the Midlands (as is usual at this season of the year); amongst the arrivals were 15 Devons; Scotch, however, were conspicuous by their absence. Trade on the first market day of the week was of a very disappointing nature, rates ruling 2d. per 8 lb. in favour of the buyer; but on Thursday, partly owing to a brisk trade at the Dead Meat Market, prices were firmer here, and were quoted 2d. higher all round. The Irish arrivals on Monday comprised 70 Dublins (10 of which were Black Polled beasts) and 42 Waterfords; these shared in the general depression, rates ruling from 1d. to 2d. per 8 lb. lower. Fat butchering cows and bulls met with little enquiry on Monday by both town and country buyers, but were brisker on Thursday.

At Deptford there was a fair average supply and a fairly steady trade, consequently rates were well upheld. The total number of beasts on offer up to the time of our going to press, which is early on account of the holiday, was 1,050 British (increase 100), 1,047 from the United States, and 694 Canadians. The following were the top rates obtained per 8 lb. (sinking the offal): 80 to 90 stone Black Polled Dublins, 4s. 5d.; 80 to 90 stone Devons, 4s. 6d.; 90 to 95 stone Herefords, 4s. 6d. ex., 4s. 8d.; 95 stone Runts, 4s. 6d.; 100 stone Shorthorns, 3s. 10d. to 4s.; 95 stone Irish, 3s. 10d. to 4s. 2d.; 90 stone fat cows, 3s. 10d.; 90 stone States, 4s.; Canadian, 3s. 10d.

The trade for both wethers and ewes was of a very sluggish nature on the first day, but brisker on Thursday with an advance in value. Scotch and Yorkshire breeds are now falling off in point of number. Lambs on Monday were in excess of the demand at 2d. less money, but on Thursday were quoted 2d. higher. At the Foreign Cattle Market, Deptford, 263 Canadian sheep were offered for sale and met with a fair enquiry. The total number penned at both markets was 10,743, consisting of 10,480 British and 263 Canadian, up to the time of our going to press. Best pens made, per 8 lb., as follows:—7½ to 8 stone Downs, 5s. 4d. to 5s. 6d.; 8 stone Scotch, 5s. 8d.; 9 stone Downs, 5s. 4d.; 10 stone Irish, 5s. 4d.; 10 stone Half-breds, 5s. 2d.; 10 stone ewes, 4s.; 9 stone Yorkshires, 4s. 8d.; 8 stone Canadians, 3s. 10d. to 4s.; 5 stone Fat Down Lambs, 6s. 4d.; 6 stone Half-bred ditto, 6s.; 6 stone Irish Lambs, 6s.

Calves numbered 60. Trade slow, best making from 4s. 10d. to 5s. 2d. per 8 lb.

No pigs on offer.

Trade in Scotland.

The number of cattle on offer this week was rather larger. Everything of a good class met a better inquiry, and prices would be 10s. a head higher. A large show of fat cows, and they met a similar trade. Sheep in fair numbers, but the supply of the better class was limited. These sold well at about 1s. a head more, and secondary sheep maintained previous rates. Ewes, owing to their scarcity, made from 1s. to 2s. a head more. Fat lambs in large supply, and a fair trade was experienced without change in prices. A very large supply of fat calves, which made less money. Owing to the restrictions, there was a very short supply of pigs, and they made the highest prices for several months. Very few store cattle on offer. The demand was excedingly dull, and few sales were effected. Store sheep in moderate numbers, and they got well cleared out at previous prices. There was a large supply of milch cows, and they met a very bad trade, with part left unsold. Quotations:—Top price of cattle per live cwt., 38s.; current from 35s, to 36s.; mutton to 8¾d. per lb.—JOHN SWAN AND SONS, LTD.

bded ditto, 6s.; 6 stone Irish Lambs, 6s.

Trade in the West.

The local markets continue to be more than adequately supplied with store stock of all kinds, and there are also full deliveries of sheep at the summer fairs, as well as the special sales now in progress at many of the chief centres. In support of our assertion that the trade is by no means unsatisfactory we may state that draft ewes are bringing from about 36s. for ordinary runs to 51s. each for more useful grades; two-teeth ewes, 45s. up to 56s.; four-teeth, 53s. to 55s.; grazing ewes, 28s. to 38s.; mixed lambs, 44s. to 49s. for best, and 25s. to 39s. for plainer; working wether lambs, 28s. to 36s. 6d.; ewe lambs, 27s. to 34s. 6d.; and couples, 52s. to 58s. In some cases where there is something special the foregoing

rates have been exceeded. But very few sheep or lambs remain over unsold at any of the markets, showing that the demand still keeps pace with the supply, and, should the corn harvest only prove equal to confident anticipations, no doubt the autumn fairs will be productive of satisfactory prices as far as sellers are concerned. Milch beasts have jumped up to no small extent within the last fortnight or so (the rise during the past week alone amounting to from 20s. to 30s ahead) in consequence of many milk purveyors being obliged to make extra purchases, owing to the dry weather, to keep their milk supplyup to its ordinary level.

There is nothing specially to comment upon in regard to fat stock, either beasts or sheep. Supplies of really prime fat bullocks come very sparingly to hand, and, as a consequence, experience keen competition, well-finished steers and heifers of small or medium weights making £17 up to £23 apiece (or quite 11s. to 12s. per score for the best quarters) and nothing under. Fat cows of heavy weights or coarse bulls are but little wanted this hot weather—though the heat has somewhat modified—and unless butchers can buy on very reasonable terms, say 9s. to 9s. 9d. per score, they are not particularly anxious about purchasing. Calves have somewhat recovered from the decline recently recorded. Once more best vealers are making 8½d. per lb. and over for medium weights; heavier calves being less saleable at 7½d. to 8d. In mutton, wethers continue to meet by far the best trade at prices ranging from 7½d. to 8½d. per lb., or up to 58s. each; young ewes, 7d. to 7¼d.; old ewes, 6d. to 6½d. Fat lambs have a wide range in value, small weights bringing 30s. to 40s. (or 10d.), and heavier kinds (young mutton) bringing 9d. to 9½d. All the neater weights in pigs continue to meet a good demand at 9s. to 10s. per score; but coarse weights are not in very general demand, current rates being from 7s. 6d. to 8s. 6d.

LONDON.

Islington, Thursday.—Arrivals of beasts consisted of forty fat butchering cows and bulls from the Midland Counties, which experienced a fairly good demand with an upward tendency in values, choice grades making 1d to 2d per 8lb improvement; inferior, 2s 10d, second 3s 6d. Sheep entries mark a decrease of 1,280, the supply including a few lambs, which had a firm trade at an advance of 2d to 4d per 8lb. Both wethers and ewes were in steady request, the former ruling 2d per 8lb. higher; inferior sheep, 3s 8d; seconds, 4s 10d; firsts, 5s 8d; inferior lambs, 5s 4d; seconds, 6s 2d; firsts, 6s 6d. Quotations:—7½ to 8 stone downs, 5s 8d; 9 st, 5s 6d; 10 st, 5s 4d; 10 st half-breds, 5s 2d to 5s 4d; 10 st down ewes, 4s to 4s 2d; 5 st fat down lambs, 6s 6d; 6 st half-breds, 4s 2d. Calves selling readily at fully last currencies; inferior, 3s 8d; second, 4s 10d; first, 5s 6d. Beasts 40, sheep and lambs 2,400, and calves 40.

London (Central), Thursday.—Heavy supplies were forthcoming, but a very slow inquiry again predominated all round, at about late rates. Arrivals of beef included 40 tons Scotch, 1,150 Liverpool sides, 2,000 hindquarters, and 850 forequarters American refrigerated, also 900 Argentine chilled hindquarters and forequarters. Quotations:—Beef: Scotch short sides, 4s 2d to 4s 4d; extreme, 4s 6d; long sides, 3s 10d to 4s; English, 3s 6d to 3s 9d; American Deptford killed, 3s 3d to 3s 6d; Liverpool sides, 3s 1d to 3s 5d; American refrigerated hindquarters (best), 3s 6d to 3s 8d; forequarters, 2s to 2s 3d; Argentine chilled hindquarters, 2s 8d to 2s 10d; forequarters, 1s 6d to 1s 8d, Mutton: Scotch range from 4s 4d to 5s 2d; ewes, 3s 6d to 3s 8d; English wethers, 4s to 4s 8d, extreme 4s 10d; ewes, 3s 6d to 3s 8d; Dutch wethers, 4s 4d to 4s 6d; ewes, 3s 6d, Lamb: English, 4s 8d to 5s 4d; New Zealand, 3s 6d to 3s 10d; Dutch, 4s 8d to 4s 10d. Veal: English firm, and Dutch 3s 4d to 4s 6d; Irish, 2s 8d to 2s 10d. Pork: English, 3s 8d to 4s 2d; and Dutch, 3s 8d to 4s per 8lb.

COUNTRY.

Ashford, Tuesday.—Beef trade quiet, at unchanged rates; best making up to 4s 10d per stone. Mutton fell 2d per stone; Down wethers making 6s 2d to 5s 8d; and neat Kents, 4s 8d to 5s. Lamb cheaper, 6s 2d to 6s 10d. Pork firm at 4s for prime small porkers, and 3s. 6d to 3s 8d for large hogs.

Basingstoke, Wednesday.—At Raynbird and Sons' sale-yard there was a good attendance of buyers to meet a supply of 23 fat beasts, 57 calves, 487 fat sheep and lambs, 166 pigs, and 96 head of dairy and store cattle, for which the following prices were realised:—Fat Devon steers made up to £19; cows, £16 5s; Shorthorn steers, £19 5s, cows up to £14 10s; West Highland steers, £19; Polled steers, £17 10s; fat calves, 50s to £5 5s; small, 20s to 50s; fat porkers, 30s to 65s; store pigs, 10s to 20s; dairy cows, £10 10s to £21 15s; prime Down wethers and young ewes, 56s to 58s, small, 45s to 48s, six months old lambs, 42s to 50s; small, 30s to 38s; three months old sucking lambs, 22s to 40s; old ewes, 36s to 46s; rams, 42s to 52s, three months old Southdown lambs, 50s to 54s crossbreds, 44s; small crossbred lambs, 27s to 28s. A short supply of fat beasts met a slow trade, the best lots making about last week's figures. A good show of fat sheep and fat lambs attracted a good company of buyers from local and distant markets. Prime choice lambs and small prime sheep were cleared at an advance, but the demand for big, overfed sheep and old ewes was an indifferent one and satisfactory sales were difficult to make. A good number of the best lambs were taken by south-coast buyers. There was a brisk inquiry for all the best dairy milch cows, which sold readily at satisfactory prices. Store cattle, owing to continuous dry weather, met with a little demand. Fat calves a slightly better trade than of late markets. Fat porkers of medium weights found buyers at recent quotations. Store pigs sold readily, with a good demand. Ruling values:—Prime Devon beasts, 6¾d to 7¼d; Shorthorn ditto, 6d to 6¾d; bulls, cows, and inferior, 5d to 5½d per lb.; best quality fat sheep and big lambs, 8½d to 9d, ditto 7¾d to 8d; old ewes, rams, and inferior, 6d to 6¾d; choice fat sucking lambs, 9d to 10½d per lb., fat calves, 6½d to 7d per lb.; fat porkers, 8s 6d to 10s per score.

Bath Wednesday At the fortnightly market the following were the prices realised:—Fat steers., £17 10s to £22; fat heifers, £17 to £18 15s; fat cows, £15 5s to £18; cows and calves, £13 to £15; fat calves, 79s to 100s; weaning calves, 35s to 53s; fat sheep, 46s to 54s; fat lambs, 32s 6d to 66s 6d.

Birmingham, Thursday.—A fair number of cattle on offer, but demand quiet. Best Herefords, 6¾d to 7d; Shorthorns, 6¼d to 6¾d; bulls and cows, 4¾d to 5¼d; wether sheep, 8d to 8¼d; ewes and rams, 6d to 7d; lambs, 8d per lb. A short supply of pigs, but trade good; bacon pigs, 9s 8d; porkets, 9s 9d; sows, 7s 3d to 7s 6d per score.

Boston, Wednesday.—A small show of cattle. Stores £16 and £16 10s, young beasts £12 to 12 10s, milch cows £18 to £20; best beef 7s 6d to 7s 9d per stone, wether mutton 8d, and ewe mutton 5½d per lb.

Bristol, Thursday.—The market was of a very average character, and trade quiet. Beef, which was in fair quantity, was not in much demand, and trade was dull at prices slightly less than last week. There was about the usual supply of sheep and lambs, and steady business was done without any quotable alteration in values. Pigs in decreased numbers, and prices of porkers fell slightly.

Calne, Friday.—Present prices for prime pigs, in lots of not less than ten, on rail within 100 miles of Calne.

Prime Stores.	Thickness of fat in any part of Back.	Price per Sc. s. d.
&c. 10 lb. to 9 sc. 10 lb.	2½ in. and under	9 6
Under 10 sc.	Not exceeding 2½ in. ..	9 6
Under 11 sc. 10 lb. ...	2¾ in. ...	9 0
Under 12 sc.	3 in. ...	8 6

C. AND T. HARRIS AND CO., LTD.

Chester, Thursday.—Good supply of stock, but, the attendance of buyers being poor, there was a slow trade. Prices all round had a lower tendency, and in some cases substantial reductions were made to induce business. Prices:—Milch cows, £16 to £21; calves, £14 to £18; barrens, £10 to £12; heifers, £9 to £14; and stirks, £6 to £10. Sheep made 16s to 37s, but many remained unsold.

Chichester, Wednesday.—Messrs. Stride and Son held their third special sale of about 2,000 Southdown and other lambs and sheep, and their usual fortnightly sale of fat and dairy cattle. Owing to the Goodwood Races and the very fine weather for harvesting, there was not so large an attendance as usual, and trade for sheep was rather lifeless at about late rates. Quotations: Prime Devon steers, 4s 6d to 4s 10d; prime Sussex steers, 4s 4d to 4s 8d; prime polled Scotch steers, 4s 4d to 4s 8d; fat cows, 3s 6d to 3s 8d; best Southdown sheep, 6s 2d to 6s 4d; best West Country sheep, 5s 8d to 6s; fat ewes, 4s 2d to 4s 6d; fat lambs, 7s 2d to 7s 6d; veal, 4s 6d to 4s 10d; porkers, 3s 8d to 4s; store pigs, 15s 6d to 23s.

Doncaster, Tuesday.—The supply of beef was well up to the average and met with a fair demand. There was a slight upward tendency perceptible in prices on the week. The attendance of butchers was also much larger than has been the case of late. Beef was quoted at 7s 6d per stone for the best qualities, and from 7s to 7s 3d for secondary sorts. The supply of mutton was rather in excess of requirements, but the quotation remained at 8d per lb. Veal was also a slow trade at 8d per lb, and lamb was very stagnant at 9d.

Dorchester, Wednesday.—Full supplies at to-day's market, and a good demand. Calves ruled firm, and made up to 8¼d per lb. for the best; coarser calves, 7d to 7½d. Best wether mutton a ready sale at 8d per lb.; coarser mutton a dragging trade. Lambs made 10d per lb. and over, and plainer kinds 9½d. Small porkers and neat baconers made 9s to 10s per score; heavier pigs met a dragging trade.

Dorchester, Wednesday. — Heavy fat calves were again slow, the range in value being from £3 15s to £5 5s each; medium size a good sale, at 52s to 70s each (or 8d to 8½d per lb for best and 7d to 7½d for seconds); rearers in less demand, at 20s to 35s. Wether mutton, best, made 8d to 8¼d (or from 46s to 54s each); fat ewes slow sale, except for young animals, which brought 7½d, and coarse sheep 6½d to 7d. Small lamb, 7½d to 10d per lb (or from 32s to 38s each); heavier lamb 39s to 41s (or 9s). Small neat porkers made 40s to 52s each (or 9s 6d to 10s per score); baconers, 57s to 92s (or 8s 6d to 9s); sows from £4 to £15 17s 6d; heavy pigs being a dragging trade, owing to the heat.

Dublin, Thursday.—Beasts 8,470, increase 293; sheep 8,354, decrease 434; calves, 49, decrease 3. Trade for cattle again ruled slow and dragging; choice qualities with difficulty bringing last week's rates, and rough sorts moving in favour of buyer. Sheep and lambs easier sold at last week's prices. Cattle (best), 30s to 32s 6d per cwt.; secondary and inferior qualities, 26s to 30s per cwt., Mutton, 5¾d to 7¾d per lb.—GANLY, SONS AND CO.

Dumfries, Wednesday.—Good show of prime fat stock, but sheep were in shorter supply. A brisk demand prevailed for both beef and mutton at late rates. Crosshorned bullocks sold up to £20 5s; polled ditto, to £19; Galloways, to £20 5s; Ayrshire bullocks, to £17 10s; Ayrshire calving cows, to £18 12s; Galloway calving cows, to £14; calved cows and heifers, to £14 12s.

Edinburgh, Wednesday.—A fair show of sheep, with a slow trade; half-breds sold to 39s and Cheviots to 36s. each. Cattle slow of sale; horned bullocks to £10 17s 6d, polled bullocks to £11, bulls to £10, and Shorthorn cows to £23 per head.

Glasgow, Wednesday.—Top Scotch cattle scarcer at 63s. to 65s.; secondary, 60s. to 62s.; Irish, 57s. to 59s.; Canadian and States 20s per head dearer at 54s to 56s per cwt. Home sheep more plentiful, but prices sustained, top, 8½d to 8¾d; lambs dearer at 8¾d to 9d per lb. Dead meat steady; top beef, 5¾d to 6d; mutton 7½ to 7¾ per lb.

Hereford, Wednesday.—The beef trade showed a light improvement, although the quality was chiefly medium; best bullock and heifer 6d to 6¼d per lb, fat cow 5d to 6d per lb. A good supply of fat calves sold well at 6d to 7d per lb. Sheep were also in demand, wethers at 7¾d to 8d per lb., ewe 6d per lb. Fat lambs, also a good supply, did not go so well at 8d to 8½ per lb. Trade was fair for ashort supply of store lambs. Porks were slow at 5d to 5¼ per lb. No bacons on offer. Store cattle a fair supply, with moderate trade.

Leeds, Tuesday.—Supplies larger than last week, except beasts, which were 202 fewer. Trade slow. Quotations: Beasts, 5d to 6½d; sheep, 5d to 7¾d; lambs to 8¾d; calves to 7d per lb; pigs to 6s 6d per stone. At market: Beasts, 483; sheep, 2,550; calves, 20; pigs, 27.

Leicester, Wednesday In view of the holidays there was a short supply of beef, and trade was the turn firmer; best sorts made 6¾d to 6¾d, secondary 6d, and cows 5d to 5¾d per lb. A moderate show of mutton, for which the demand was slower; top 7¾d to 8d, heavier sorts 7d to 7¼d, and ewes about 6d per lb A fair supply of lamb at 8d to 9d; veal, 7¼ to 7¾d per lb. Pork in small request at recent rates.

Lynn, Tuesday.—A large show of fat beasts made late rates, 7s to 7s 3d per stone. Very few store beasts, and sold at £6 to £11 each. Average show of fat sheep, trade slow, about 8s 9d to 9s per stone. Store sheep 33s to 44s; store lambs 25s to 30s; fat lambs 35s to 40s each.

Nottingham, Wednesday.—Rather short supply of cattle. Best beef, 7s 6d to 7s 9d; second quality, 7s to 7s 6d; cows and bulls, 6s 9d to 7s. Fair show of sheep; best small weights, 8¾d; large weights, 8d; ewes and tups, 6¾d to 7d; good show of lambs at 9¼d and 10¼; calves, 8d per lb.

Romford, Wednesday.—Average supply of fat beasts; trade slow; Best animals, 4s 2d to 4s 4d; middlings, 3s 10d to 4s per stone. Calves scarce; trade better, at 4s 8d to 4s 10 per stone. Sheep in short supply; average trade: Best sheep 5s 4d to 5s 6d; middlings, 5s to 5s 2d; ewes, 4s to 4s 2d per stone. Lamb trade better, at 6s 6d to 6s 8d per stone. Slow demand for store beasts. Pig trade quiet.

Thame, Tuesday.—There was again a very large show of all descriptions of stock, and, with a capital attendance of buyers, chiefly from Aylesbury, Wycombe, Oxford, and the river towns, a clearing trade ruled throughout, although it was difficult to maintain late rates. Best quality cattle were in demand. Cows were difficult to dispose of. Veal in request. Bacon and pork selling readily at advanced figures. Messrs Bond and Burrows' sale comprised 102 fat beasts, 416 fat and store sheep, 48 fat and weaning calves, and 44 pigs. Fat oxen made from £16 10s to £22; fat heifers, £15 to £18 17s 6d; fat wethers, 48s to 52s 6d; fat ewes, 40s to 52s; fat lambs, 30s to 42s 6d; fat calves, £3 to £5; weaning cow calves, 32s to 56s; bull calves, 15s to 48s; bacon hogs, £3 10s to £5; porkers, 26s to 46s; store pigs, 10s to 22s.

Wakefield, Wednesday.—There was a fairly brisk inquiry for choice young sheep, which made 7¼d to 8d; heavy sheep met with a somewhat slow demand at 6d to 7d, and ewes and tops moved off very slowly at 5d to 5¾d per lb. A quiet trade for lambs at 8d to 9d per lb. Choice young heifers and bullocks met with a fair inquiry at 6d to 6¼d, beasts of secondary quality 6¼d to 5¾d, inferior sorts 5d to 5¼d, and calves 6d to 7¼d per lb., a few stores being sold at 18s to 24s each. Milch beasts made £15 to £21, stores £9 to £13, and laying-off cows £15 to £20 each. Store pigs 15s to 50s each, and porkers 6s to 6s 6d per stone.

Wolverhampton, Wednesday.—A small supply, and slow trade all round. Quotations: Beef, 5d to 7d per lb.; mutton, 6¼d to 8¼d per lb.; lamb, 8d to 9d per lb.; veal, 6d to 7d per lb.

York, Thursday.—There was not a big show of shearling sheep, but a very good trade up to 45s per head. Lambs were in good supply, but it is a little too early to expect any great demand, especially when the dried-up condition of the pastures is taken into account, and trade was very slow at 22s to 29s per head. Practically no English store cattle on offer, and only a handful of Irish. Buyers were also conspicuous by their absence, and trade was really at a standstill. There was a large offer of calving and milch cows, but the majority were of inferior quality. Very few off buyers were present, and trade was very bad, with the result that sales could only be effected at a reduction of 20s to 30s per head, and even then many were left unsold. Really good animals made in a few cases up to £21 10s. but the general run of prices was from £14 10s to £18 10s.

FEEDING STUFFS.

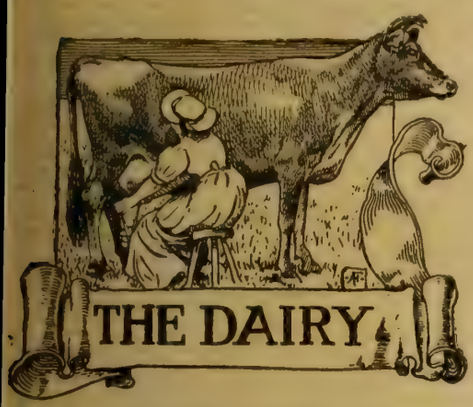
London, Thursday.—Linseed: The market has been very depressed during the week owing to pressure by Plate shippers, but this being withdrawn the tone has improved, and values have partly recovered. Calcutta-London: Spot, June-July and July-August 39s 3d, August-September 39s 6d, September-October 39s 9d. La Plata, July-August 38s 6d. Hull: A good business has been done at the decline. La Plata spot38s 3d, passage 39s 3d, July-August 38s 9d, August-September 38s 6d, September-October 38s 9d. Rapeseed has contined very inactive, and prices continue nominal. Brown Cawnpore, August-September 35s; brown Calcutta, August-September, afloat 33s 9d; Cottonseed: The market has been slow at a slight decline in values. London: Passage £5 13s 9d, August £5 13s 9d sellers, September Fayoumi £6, November-January £6. Hull: Spot and passage and August £5 12s 6d, September, Fayoumi buyers £5 18s 9d, November-January £5 18s 9d Linseed oil has experienced a smart drop, but some improvement has taken place from the lowest point touched. We quote spot and month in pipes £1 8Ts 6d, barrels £18 10s, August £18 10s, September-December £18 17s 6d, January-April £19 5s. Hull naked spot £18 2s 6d, August £18 5s, September-December £18 15s. Rape oil steady but quiet. Brown oil naked in all positions £19 15s. Refined £22 10s in casks. Ravison oil £18 17s 6d naked nearest value on the spot, and £18 10s forward. Cotton oil inactive. Crude on the spot £16 10s. Refined spot £17 to £19 10s, according to make and package. Hull, spot naked £16 7s 6d, August £16 7s 6d, November-April £16 7s 6d. Oil cakes: Linseed cakes firm. London made £7 12s 6d to £7 15s. Cotton cakes firmer. London made £4 12s 6d.—THE PRODUCE BROKERS CO., LTD.

MOLASSINE FEEDING MEAL, packed in bags of 1 cwt. each. Price per ton, £6 15s., in ton lots and upwards, £7 10s. per ton in less than ton lots. Free on rail, Liverpool or London. Uniform delivered price for small quantities, 10s. per bag of 1 cwt.

WOOL.

Glasgow and Leith.—The activity reported in our last circular has been continued during July. At the Leith sales on 11th and 12th, as well as at Glasgow on 25th and 26th, values were well maintained. Compared with the same period last year, values at these sales, as well as at the principal country markets, showed a substantial advance all round. Now that a considerable quantity of all kinds has changed hands, there is likely to be a decreased volume of business for a time, although it is not expected that there will be any giving way in prices. Indeed, in some cases notably in Cheviot hoggs of fine staple prices have been improving. Not much change can be reported in half breds, but crosses are a shade easier. Blackfaced is now coming forward in considerable quantity, and is being taken up to a moderate extent, both by home and foreign buyers, at current rates. Stocks of all classes are very firmly held.—J. AND W. GREIG.

London, Friday Fleeces. South Down hoggs, £12 10s to £11; half bred hoggs £12 10s to £13 10s; ditto wethers, £12 10s to £13; Kent fleeces, £12 to £12 10s; South Down ewes and wethers, £12 to £13 10s; Leicester ditto, £12 to £12 10s; Colonial per lb—Vic., fleece super., 1s 11d to 2s 1d; scoured good, 2s 3d to 2s 5d; scoured average, 1s 11d to 2s; greasy average to fair, 1s 1½d to 1s 3½d; N.S.W., scoured average, 1s 8d to 1s 9d; greasy average, 11d to 11½d; S. Aus., greasy average, 9d to 9½d; N.Z., scoured average, 1s 9d to 1s 9½d; greasy average, 10½d to 11½d; Cape, scoured super., 1s 9d to 1s 10d; fleece average, 9½d to 10d; greasy average, 7¾d to 8¼d; Natal, scoured, 1s 5d to 1s 6d; greasy average, 8¾d to 9¾d, crossbreds-grs. Vic., good to super, 1s 2d to 1s 3d; New Zealand, fine, 1s 2d to 1s 3d; ditto medium, 1s 0½d to 1s 1d; ditto coarse, 10d to 11d.



Bath and West Cheese School.

The first draft (nearly 31 cwt.) of this year's cheese made during the month of April at the Cheese School carried on by the Bath and West and Southern Counties Society for the Somerset County Council, at Glendale Farm, Wedmore, has been sold to Messrs. Hill Bros., of Evereech, at 56s. per cwt. of 112 lb. 3,701 gallons of milk made 3,655 lb. of green cheese, which, when sold in the middle of July, weighed 3,453 lb. The school has been well attended by students, 30 having already entered, while other applications are still being received.

Whitchurch Cheese Fair.

There was an average pitch of sixty-nine tons on Wednesday, and the general quality was good. Buyers were anxious to do business at prices a shade over previous quotations, and all the lots were cleared quickly. Best qualities realised 53s. to 58s., and medium and lower grades 45s. to 52s. per cwt.

Edinburgh's Milk Supply.

Sir Henry Littlejohn, Medical Officer of Health to the city of Edinburgh, has prepared for the Health Committee of the Town Council a statement regarding a motion by Councillor Wilson that depots for the sale of milk should be established in the poorer districts of Edinburgh. Sir Henry reminds the committee that the connection of milk with such diseases as diphtheria, scarlet fever, typhoid, and tuberculosis is now fully recognised; but in the manufacturing districts of England, with their dense and imperfectly housed population, there are special circumstances which have led to the use of processes for preserving milk, and thus preventing it undergoing those changes which in the case of infants have led to a large mortality. Depots have been established in the English towns for the purpose of supplying pure milk to the artisans, and processes of sterilisation and Pasteurisation have been adopted for the purpose.

It has been found that the usual process of sterilisation has not been attended with satisfastory results, for, while those bacilli which are regarded as harmful are no doubt removed, the other bacilli which are useful in aiding the digestion of the milk are destroyed. Medical officers of health have reported that the use of sterilised milk, instead of being beneficial, is, in their opinion, the cause of the prevalence of rickets in such circumstances. Pasteurisation, on the other hand, merely raises the temperature of the milk to 194 degrees (Fahrenheit), and there can be no doubt, the report continues, that the supply of such milk, so treated, has in the Midland counties been attended with good results.

The question, the report proceeds, is whether there is any urgent necessity for the introduction of this system into Edinburgh, where milk is abundant and of good quality even in the poorest districts, the only adulteration being the "occasional admixture of water," though even this is kept in check by the sanitary inspector and his staff. "I am satisfied from my inquiries," Sir Henry continues, "that the artisans and the respectable poor have no cause to complain of their milk supply, either as regards quantity or quality." For some time past Sir Henry has conducted inquiries in certain districts of the city as to the milk supplied to the poor, and has taken supplies from thirty-two dairy shops, sixteen of these in the High Street, Canongate, and immediate neighbourhood; and sixteen in the Cowgate, Grassmarket, and immediate neighbourhood. In no single case has the bacillus of consumption or other noxious organism been detected. The specimens of milk were otherwise, to taste and appearance, perfectly satisfactory.

With the prospect of the important step about to be considered by the Health Committee—i.e., hospital provision for advanced cases of consumption, when they are most infectious, and which will entail considerable expense, Sir Henry is unable to advise the committee to undertake the sale of milk in various districts of the city, and possibly at the same time to provide this free of charge to the very poor.

National Diploma in Dairying.

The National Agricultural Examination Board announce that the annual examination of candidates for the national diploma in the science and practice of dairying will be held, for English students, at the Reading College from September 18 to 21, and for Scottish students at the Dairy Institute, Kilmarnock, from September 25 to 28. The last date for the receipt of applications to sit at either of these centres is August 31. The subjects of examination are the general management of a dairy farm, the management of a dairy, chemistry and bacteriology, practical skill in dairy work, and capacity for imparting instructions to others. Forms of entry and copies of the regulations may be obtained of Sir Ernest Clarke, 15, Hanover Square, London, W., or Mr. James Macdonald, 3, George IV. Bridge, Edinburgh.

Kent's Fruit Crops: Poor Yields.

"A bad year" is the Kentish fruit-growers' verdict with regard to 1905. Soft fruits, the season for which is now practically at an end, were generally disappointing alike in quantity and quality. As the returns we published in June went to show, cherries, the most esteemed of all the Kentish soft fruits, were sadly deficient in both respects, strawberries, so extensively cultivated in Kent, being also lacking in flavour, though more satisfactory in point of bulk. These two crops are the governing factors in the soft fruit position, and their failure this year to come up to standard means that the soft fruit season has proved far from prosperous to those concerned as growers. Fortunately, the exceedingly favourable weather which has attended the marketing of the crops has made some amends for the shortcomings of the orchards and plantations, and with a good demand nearly all the time, growers must have done better than could have been expected at the outset.

In regard to bulk, the crops of hard fruit are in much the same condition as were the crops of soft fruit. We have collected returns from growers in nearly fifty parishes, and the position these returns reveal is in some respects truly depressing. The apple crop is a grievous disappointment, being, generally, as much as 75 per cent. below the average. There are rare instances where half a crop may be gathered, and even a three-quarter crop is looked for in one parish, but on the other hand two or three returns are as low as 10 per cent. of the average. Pears vary surprisingly. As in the case of apples, there are some districts in which the crop is almost a total failure, yet in four parishes an average or even more is expected from the orchards.

On the whole pears come out rather better than apples, but it is to the commoner sorts that the advantage is attributable. Plums vary considerably, but not to so striking an extent as pears, the returns pointing to a yield equal to about three-quarters of an average crop. Damsons are about in the same position, with a tendency in the right direction, but this is a crop which, owing to it unremunerativeness, is far less extensively grown than was the case a few years ago, thousands of trees having been grubbed.

The cultivation of cob-nuts on a large scale is not general, the plantations being confined to soils considered specially suitable. This fact explains the absence of returns for this particular crop from several parishes. The outlook in regard to yield is not very rosy, but the majority of growers expect half the average, and in a few favoured situations there is a promise of something like an abundance, the top figure being 120. — *South-Eastern Gazette* (August 1).

Preferential Railway Rates: Railway Official's Views.

The Earl of Jersey's Committee, inquiring into the alleged preferential railway rates to foreign and Colonial over home agricultural produce, had before them on Tuesday Mr Robert Millar, the general manager of the Caledonian Railway Company, who replied to the evidence given by Mr. Drysdale, the president of the Scottish Chamber of Agriculture. Witness's argument was to take rates between Leith and Glasgow and claim similar rates between other places on a basis proportionate to the distance; but these rates were actually fixed by a compromise with the traders, and embodied in an Act of Parliament of 1892. That scale was made in the interests of the public, so as to enable Leith to compete as a port, and not to give a monopoly of certain traffics over certain districts to the port of Glasgow, thereby holding the balance between ports on the east and west of Scotland.

It was a common error of those who complained of railway rates to overlook the extra services given in the one case and not in the other. It did not matter to the railway company whether the goods at Leith were home or foreign; they were charged alike for similar services under similar circumstances. Equal mileage rates had been suggested, but if it were carried out it would restrict a great deal of commerce to purely local markets. As to railway rates preventing the Scottish farmers from competing with foreigners in *petit* culture, the farmers did not worry themselves about it, but devoted their attention to raising large crops. There was no home sale for produce in butter, eggs, or poultry which was at all comparable to that which would be imported.

University College of North Wales.

The college authorities have appointed Mr. Robert George White, B.Sc., to the vacant Assistant Lectureship in Agriculture. Mr. White was educated at the Archbishop Holgate's School, York, where he was successful in gaining one of the major scholarships awarded by the North Riding County Council, and proceeded to the Yorkshire College, Leeds. He took the course for the degree of B.Sc. of the Victoria University in Agriculture, and graduated in 1904, being placed in the first division. After graduating Mr. White returned to college and devoted himself to analytical work in connection with manures and food stuffs, and in May of the present year he obtained the National Diploma in Agriculture with honours. He has since made a special study of dairying.

Royal Agricultural College, Cirencester.

The summer term of this college closed on Wednesday, when the principal, the Rev. J. B. McClellan, M.A., conferred the diplomas, scholarships, and other honours on the successful students. Referring to the agricultural education and forestry exhibition at Park Royal, he said it was of interest to them that the Royal Agricultural College was the only college in the country that contributed to both departments of that exhibition, and had done so for two years, the results of their manurial experiments on grasses being of especial value. Referring to their old students, he said Messrs. Matthews, Browne, and Leech had passed the examination for the professional associateship of the Surveyors' Institution, Mr. Matthews obtaining the Beadel prize. Mr. Muir Mackenzie, M.R.A.C., had been appointed an ordinary member of the Council of the Government of Bombay. The principal alluded in feeling terms to the death of their distinguished old student, Sir Jacob Wilson, and announced that Mr. J. Bowen Jones, M.R.A.C., had succeeded him as corresponding member of the College Board of Studies. The chief awards in the classes were as follows: —

Honour diploma of membership (maximum marks 2,100, qualifying marks 1,400):—Eric C. Barker, The Cedars, Esher, Surrey, 1,721; Alan Peter Slingsby, Scriven Park, Knaresborough, 1,519.

Scholarships (open to the whole college, maximum marks 3,900, qualifying marks 3,250): — First scholarship, £25: Albert Sasson, Alexandria, Egypt, 3,672. Second and third scholarships, £10 each: Miles Ponsonby Knowlby, Steeple Ashton Vicarage, Trowbridge, 3,545; Robert Henry Price, Cloudesdale Road, Balham, 3,515.

Proxime accessit:—Akers.

Honourable mention on the term's work (in alphabetical order):—Archer, Dobbs, Henniker, Joynson, Parry, Waller, Whittington.

Live Stock Record.

SOME FORGOTTEN BREEDS OF SHEEP.

The breeds of sheep in England were once much more numerous than they are at the present period. A century ago almost every English county had its own particular variety, and some big counties owned two or three sorts. Devon, indeed, had three kinds, the old Bampton, in the northern part, from which has descended the modern Devon long-wool; the South Hams, now termed the South Devon; and the Dartmoor, which derived its name from its native mountain. Parkinson, whose "Treatise on Live Stock" was published in 1810, enumerated thirty-seven breeds of English sheep as existing in his time, and he expressed the opinion that "any unprejudiced man who looks into the Book of Nature will perceive in the long run that the sheep found in the different counties will, in a general way, prove by continuance the most healthy and profitable, although by proper crosses they may be improved."

No doubt many who read this dictum of Parkinson will desire to know how it happens, if it be held to be correct, that so many of Parkinson's thirty-seven breeds have long since become extinct, and the greater part of the remainder derived such complete transformations by crossings that their characteristics have very little in common with the races from which they originally sprang. But the Lincoln breed maintains dominion over the broad Fens from Peterboro' to the ocean, just as the Southdowns do on the Sussex hills. The rule asserted by Parkinson must be accepted in its general outlines For instance, no one would expect Lincoln sheep to retain their immense substance or wealth in either flesh or wool production if transferred to the Sussex Downs, or the native breed of the latter climate yield profit if kept in any low-lying marshes.

The late Colonel Luttrell once tried an experiment by placing Southdowns and Devon longwool sheep to graze together in the Somerset Fens. But during the summer he sent to the butcher three successive lays of longwools, while the Southdowns remained with little more flesh than they had at first. Parkinson relates a very similar fact, in which two breeds were not so dissimilar as those above mentioned figured. At the time he wrote his treatise the landed gentry, with King George III. at their head, were using every effort to get Merinos bred in England. Mr. Bridge was a distinguished breeder of Dorset Horns, but that he might supersede them by Merinos or their crosses the King made him a present of a Merino ram. After making endeavour to go with the stream, and give the fashionable sort a fair trial, Parkinson states that "he was obliged to banish and do away with not only the breed itself, but every cross of it."

Further, it is as necessary as ever it was for those who would derive profit from sheep in any district to adopt the kinds which have yielded the best returns in the past. Those that have done so in modern times are perhaps very dissimilar from those which were kept even fifty years since. But most probably the changes in their forms and characteristics were gradually, not suddenly, effected. And we may be well assured now that if any breeder desires to effect changes to-day he must likewise work gradually and very cautiously, for whenever any race has become thoroughly acclimatised and inured to peculiarities of soil, situation, and climate, it thrives all the better for it, and hardihood and thrift might be sacrificed if quality were infused too hastily.

Most of the old breeds which appear to be extinct have their blood still transmitted by amalgamation with other races. The Berks and Wilts were allied, the West-country Down being the offspring, which after refinement by Southdown ram agency produced the modern Hampshire. A century ago nearly all the mutton marketed was from longwool sheep. Southdown mutton was a luxury for the rich, just as Mountain mutton is now. Thus the sheep that would yield the biggest and weightiest carcasses were the most valuable. Parkinson wrote: "I have not met with any breed of sheep brought to fair sale at Smithfield that equalled Mr. Chapman's, of the Hertford breed. In 1807, he sold 207 crocks for £5 2s. 11d. each. They must therefore have weighed about 146 lb. a carcass. There is another instance of forty-five Lincoln sheep weighing 140 lb. a carcass."

This condition of things got to be completely changed before the middle of last century, and graziers on all medium-class soils had to cross longwool ewes with Down rams to satisfy their customers, and when the town artisans and the agricultural labourers became mutton eaters, even they insisted on small joints with lean flesh. The comparatively new breeds of the Shropshire, Hampshire, Oxfordshire, and Suffolk now supply the want, but they have had gradual creation by the amalgamation of the older breeds.

Prominent British Breeders.

Mr. G. TALFOURD INMAN,
Highmoor Hall, Henley-on-Thames.
BREEDER OF BERKSHIRE PIGS.

STOCK AND SHOW NOTES.

By Herdsman.

We would remind intending exhibitors at the Birmingham Autumnal Shorthorn Show and Sale that the entries close on Thursday next, 10th inst. Prize lists and entry forms may be obtained from Mr. W. H. Lythall, Bingley Hall, Birmingham. Eight prizes are offered in four classes for cows, heifers, and heifer calves, and for bulls from twelve to eighteen months old there are five prizes ranging from £15 to £3. In addition there is also an extra stock class for bulls and bull calves of any age.

Volume II. of the South Devon Flock-Book, just issued, is one on which the South Devon Flock-Book Association is to be congratulated, for it bears eloquent testimony to the progress of the new venture. A comparison between the members' roll published in the initial volume and that of No. 2 shows a notable increase in the latter, whilst the flocks entered also are more numerous; in fact, it is said that practically none of the leading flocks of South Devons remain unregistered now, and to have secured this result in so short a time is a triumph the Society can afford to be proud of. Volume II. is well arranged, nicely printed, and altogether a good one. Applications for copies and all details relating to it must be made to the secretary and editor, Mr. W. W. Chapman, 4, Mowbray House, Norfolk Street, Strand, W.C.

I learn that a very fine Large White boar and an unrelated sow from the Holywell Manor herd have recently been forwarded by Messrs. Sanders Spencer, and Son to a very old customer in France, Monsieur Guy de Valence, who inspected the large herd in the small county of Huntingdon many years since, and who periodically places orders for Large White pigs to keep up his herd to the high state which it has held for a very long time as one of the best in France.

Starting nine years ago with a very primitive exhibition, and a total prize value of £160, the Mid-Cheshire Farmers'. Association have gradually increased their prizes and extended their area until for this year's show, their tenth venture, they are able to offer a sum of over £800 in class prizes, and in addition numerous specials, etc. The show has, on its merits alone, grown each year in favour, and the event on Saturday next, September 2, should prove the most successful of the series. Classes are provided for horses, cattle, sheep, pigs, farm and garden produce, poultry, pigeons, dogs, implements, etc., so that all sorts of tastes are catered for. A new feature is a scheme for the encouragement of nature study amongst children, prizes being offered for the best essays on the subject, the competition being confined to children attending the elementary schools within the area of the show district. The entries have already far exceeded the most sanguine hopes of any member of the association, for over 800 essays, etc., have been sent in so far, in addition to others from schools outside the show area, which cannot, of course, take part in the competition; but I understand they may be recompensed in some tangible way. Evidently nature study is not a neglected subject in Cheshire, and the essays should provide interesting reading. The show will be held in a field near to Blue Bell Farm, Manchester Road, Knutsford, on the date mentioned above (September 2), and entries close on Wednesday, August 23, with the secretary, Mr. W. Page, Lower Peover, Knutsford.

Prize-money to the extent of £500 is offered for competition at the show of the Stokesley Agricultural Society, at Stokesley, on September 21, and there are numerous open classes, so that entries from districts outside the Society's area may be expected. Entries close on September 9 with the secretaries, Messrs. W. Hodgson, T. G. Eeles, and F. Wardell, Stokesley, R.S.O., from whom entry forms, prize schedules, etc., can be obtained.

On account of all the farms on the estate having been let, the Hon. Henry Cubitt, M.P., has instructed Messrs. Strude and Son to dispose of his entire flock of pure-bred Southdown sheep, and the sale will take place at the Home Farm, Birtley, Bramley, Surrey, on Thursday next, the 10th inst. The stock consists of about 1,000 head, in ages as follows:—160 shearling ewes, 110 four-teeth ewes, 93 six-teeth ewes, 139 fullmouthed ewes, 45 draft-ewes, 204 ewe lambs, 232 wether lambs, and six rams. The flock was founded in the year 1882 by the purchase of ewes from some of the best Hill Flocks in East Sussex, and the rams used have been chiefly selected from the famous prize-winning flocks of Mr. Edwin Ellis, Mr. William Toop, Messrs. Murrieta, Mr. Geo. Peel, Mr. Alfred Heasman, and Mr. F. N. Hobgen. The Birtley ewes thus embrace some of the best and most fashionable strains of Southdown blood.

Volume XVII. of the Oxford Down Flock-Book contains entries of rams from No. 4242 to 4503, and ewes 1536 to 1616 inclusive, whilst in addition there is the usual details concerning the society, a show record of the breed for the year 1904, and other data. Copies of the book, which is published at 10s. 6d. by the Oxford Down Sheep Breeders' Association, can be had on application to the secretary, Mr. A. F. Milton Druce, Estate Office, 11, Queen Street, Oxford.

The entire flock of pure-bred Southdown sheep belonging to Sir N. W. G. Throckmorton, Bart., is to be dispersed by auction on Friday, the 18th inst., at Buckland, Faringdon, Berks, the auctioneers being Messrs. J. Thornton and Co. The history of the Buckland flock would virtually form a brief history of Southdown sheep, for the flock has been in existence since about the year 1800, when Sir John Throckmorton, Bart., purchased ewes direct from the Sussex Downs—the home of the breed; also from the famous flock kept by Francis, fifth Duke of Bedford, at Woburn, and from Mr. Williams, grandfather of the present agent at Buckland, who kept a flock at Ashtree Farm, Buckland, and who, in the year 1850, exhibited three twenty-months-old Southdown wethers at the Smithfield Show, taking the first prize of £20, and the gold and silver medals. Sales and lettings of rams were commenced as far back as the year 1814, when sheep from Buckland were the means of great improvement in other varieties. Prizes were won at the Smithfield Club Shows early in the last century, and at many shows of the Royal Agricultural Society since its formation in 1839. In tracing the lengthy pedigrees of prize sheep it is noticeable how many of them go back to this old source of Southdown blood that has been preserved in its purity at Buckland for so many years. The flock has never been kept to a large size; it is now in good natural breeding condition, and will be unreservedly sold in consequence of the proposed letting of the Home Farm.

The Richmond (Surrey) Horse Show Society, Ltd., have fixed Friday and Saturday, June 15 and 16, 1906, as the date for the next Royal Horse Show at Richmond.

Messrs. Macdonald, Fraser, and Co., Ltd., of Perth, announce that on Tuesday, September 26, they will dispose of a number of the Rev. C. Bolden's pure-bred Aberdeen-Angus cattle at Preston Bissett, Buckinghamshire. This will be the fifth auction sale held at Preston Bissett, and each of the animals to be sold has been bred by Mr. Bolden, who has won numerous prizes at the shows of the Highland, the Royal, the Bath and West, and the Royal Counties Agricultural Societies. All the animals catalogued are young, and will be offered in natural breeding condition. Included in the sale will be five yearling heifers sent by Mr. Bridges from his well-known and old-established herd at Horley, in Surrey.

Few local one-day shows can afford £1,350 in prize-money, but this will be given at Tring on Thursday next in the quiet little nook concentrated in Lord Rothschild's park, not far from Tring station, thirty miles from Euston. The London and North-Western Railway, besides their frequent service, are sending two specials from Euston at 10.20 and 11.40, which will give cross-country passengers ample opportunity to run down quickly (convenient trains run them back at night), also a largely increased local train service. The entries all stand their ground, and are excellent throughout. To lovers of sheep-dog trials none better exist out of Wales than those carried out at Tring Show, and, apart from anything else, are worth a visit alone. There are so many attractions outside the agricultural section that it may almost be termed a ladies' day, as the park, looking now at its best, the gardens, the museum, the music, the kangaroos, ostriches, and emus in a free state in the adjoining park are all to be enjoyed after once entering the gates. Exceptional arrangements are made to make all visitors enjoy their day at Tring, the catering being not the least item towards this end. It cannot be said of Tring that it is the same old show, as visitors from year to year always find fresh items, and, if possible, improved accommodation.

To our already large list of flock, herd, and stud books I suppose we shall soon have to add another, for the exhibition of Welsh Mountain sheep at the Welsh National Agricultural Society's Shows have been such good ones that a wish has been expressed that a Welsh Mountain Sheep Flock-Book should be started. At the show last week a representative meeting of breeders was held at which it was unanimously resolved that the time had arrived to form a flock-book on the same lines as the Kerry Hill Flock-Book. It was decided to leave the drawing-up of the rules to the chairman, in consultation with other members present, and a meeting to discuss these will be held at the Corwen Show on September 22.

This year's Buxton Horse Show will be held on Friday, September 1, under the presidency of Colonel Cotton-Jodrell. Over £300 is offered in prizes, and in addition challenge cups and gold and silver medals; whilst for the best hunter there is a 50-guinea challenge cup. Entries close on Tuesday, August 22, with the secretaries, Messrs. Hampson Bros., 8, The Quadrant, Buxton, from whom forms, prize schedules, etc., can be had.

The date of the Thame Horse Show is Thursday, September 14, entries closing on September 2, and at double fees on September 12. Mr. I. Bush, Thame, is the secretary.

The New South Wales Government Statistician reports that 7,152,700 lambs were marked in New South Wales as the result of the autumnal lambing, as against 6,651,216 marked last year. The pastures are reported to be in excellent condition.

Our Australian Colonists have recently been shipping a good many first-class cattle and horses to the other side. The Wilcannia carried a number of Shorthorn cattle, some Shropshire rams, and a couple of Berkshire pigs for Adelaide.

Messrs. Waters and Rawlence have been instructed by Mr. James Flower to let and sell by auction, at the famous Britford Fair, on Saturday next, 100 ram lambs, two shearling rams, and 100 grand breeding ewes, from his registered Hampshire Down flock. As all sheep breeders are aware, Mr. Flower has for many years enjoyed an important and almost unparalleled prize-winning career in all the showyards of England, and this season the Chilmark flock has fully maintained that high position which it has won in the Hampshire Down world, and the animals to be sold on Saturday will be found worthy representatives of the flock.

Notes and Jottings.

Since last week the country, as regards its more northerly and midland section, has been visited with some very grateful rains, which are freshening the pastures, and will be of immense worth to the root crops, though they have proved rather damaging to the corn crops by knocking them down badly in places. Roots were in many cases completely set fast for moisture, and it is now quite probable that we shall see a revival in the cattle trade as well as in the grass and roots that they feed upon; indeed, some of the beef markets have shown quite a tendency to become more brisk since the highest temperature passed away. The air has now become much cooler and clearer, the nights being quite chilly and autumnal.

Two or three very important shows of cattle were held during last week; indeed, two of the most important in the country in some respects. These were the Welsh National at Aberystwyth and the Royal Lancashire at Liverpool. The former show was celebrating it second anniversary and had an excellent entry of cattle, the total being very much in excess of the opening show of last year. Shorthorns, despite the tedious journey and long distance from their homes, were in great force, and there was a very close battle between some of the leading animals. Mr. Stratton's fine bull, Great Mogul, however, secured the first prize in his class, as well as the male championship; his symmetry and the evenness of his flesh are quite a pleasing feature, and in addition to these points he has a dairylike appearance.

Mr. R. P. Cooper's Meteor, though milk white, has so much style and quality about him, mellow flesh and substance that he took the second place; and Lord Powis's Alastair, who has several times been first this year and champion upon one or two occasions, made a famous third. He is very big and massive at the present time, and is proving a good sire. It is not often that three such bulls as these meet in competition in any show, and it is a triumph of Shorthorn breeding that after such a demand from foreign breeders there should still be so many high-class animals left at home. It is well, however, that this should be so, and that our leading breeders should have the courage to refuse the high prices that this class of bulls would readily fetch, and so add to the future prospects of the Shorthorn at home.

Herefords were also quite an extraordinary display at the Welsh National, the classes being quite as good or better than at the earlier shows of the season, even at that of the Worcester and Hereford, their stronghold. The young stock, of both sexes and the cows, too, were most satisfactory, but when it comes to criticising the aged bulls one's mouth almost becomes sealed. It is many years since two such bulls of this famous white-faced beef-making breed have been before the public as Mr. Peter Coates's Evedale, bred by his owner, and the get of Comerie, who won the first prize, and Mr. C. T. Pulley's Eaton Champion, by Protection, bred by Sir Joseph Pulley, Bart. The wealth and mellowness of flesh on each of these animals is quite wonderful.

Evedale is a larger bull, perhaps, than his opponent, and the famous loin, the beautiful symmetry, and the level evenness of his flesh are of surpassing beauty. His weight, too, must be enormous, yet he walks with the greatest ease and activity. The second bull, Eaton Champion is big and massive, coming almost to the ground, and he, too, carries a wealth of mellow flesh evenly laid on. He has fine Hereford character, too, and, like the first prize one, is very active. When the famous Archibald was in the midst of his successful showyard career his breast was but a few inches from the ground, and it was said that, after he was exported to Buenos Ayres, an operation was performed upon him to relieve this enormous chest weight.

The native Black Welsh cattle were in strong force at this same show, and these were of much improved character. Several breeders were exhibiting whose names are not known in the ordinary course of the show season, and some of the animals from the herds of these new exhibitors were quite of a more true Welsh type, some of the cows had also very good legs. The rather plain shape of some of them, the want of neatness at the setting on of the tail, and the comparatively bad handling were the greatest failings (and bad enough these, it may be said) in these cattle, but these sore points do not affect the weighing or the butchering value to any appreciable extent. A little more quality would be of advantage to a great many of our store cattle of all breeds.

Before we bid adieu to the white faces, or rather the feeding breeds, reference may be made to a letter that has been going the round of the agricultural papers to the effect that some Hereford cows in Ireland have been unable to bring up their offspring for lack of a better supply of milk. It is a matter of surprise that when cows are bred, turned out in the foldyard or the fields to bring up their own calves generation after generation, that they should eventually almost cease to give milk at all, indeed, it is a wonder that even the calf can get a draught. Milk soon ceases when animals are put upon feeding treatment only, and the fact of the calf biting and pulling the teats giving great pain often to the cow, has the effect of making them hold up their milk, and so speedily become dry.

The management of dairy cattle is a point that should receive more attention than is devoted to it at the present time. Particularly is this so with the young stock, and experience has proved over and over again that, however well heifers may be bred for milk both on the side of the sire and dam, if they are allowed to become as may be said completely fattened up whilst young, the chances are nine to one that they will never become great milkers afterwards. Abundance of exercise, and feed that will assist in growth and muscle are the best things to assist in making heifers become great milkers when they have arrived at maturity and are brought into the dairy.

Contagious Diseases of Animals.

Summary of Returns issued by the Board of Agriculture for the week ending July 29, 1905 :—

			Period.	Swine Slaughtered as Diseased or Exposed to Infection. No.	Outbreaks. No.	Outbreaks Reported. No.	Rabies. Cases Confirmed. Oth'r Anim'ls. No.	Rabies. Cases Confirmed. Dogs. NOTE.—The figures for the current year are approximate only.

Chard August Fair. This important West Country Fair was held on Wednesday, and, considering the dry season, trade was particularly brisk, and excellent prices were realised for all kinds of stock. Buyers were present from all parts of the West of England, and there was a good entry of stock for sale at the two auctions held by Messrs. Jeffery and Simmons, and Messrs. H. M. Hext and Sons. Cows and calves made from £15 2s. 6d. to £18 15s.; store steers up to £14; fat heifers, £15 to £18. Veal averaged 7½d. per lb. There was a good demand for sheep. Off ewes realised from 41s. to 48s. 6d.; lambs, 2os. 6d. to 3os. 6d.; rams from 5½ guineas to 7½ guineas; wethers from 38s. to 43s. Swine ships from 2os. to 40s.; fat pigs up to £4 15s.

Horse Notes.

"He doth nothing but talk of his horse."
—Merchant of Venice.

A few days ago I happened to be in the company of some men who were discussing the burning question of the day—the increasing expenditure of governing bodies, and the means to be adopted to raise the necessary money. After some time had been spent in discussion, one man soberly proposed that all horses should be taxed, whilst all taxation should be taken off motor vehicles of all sorts. Another gentleman immediately endorsed his opinion. I mildly inquired where the cavalry horses were to come from in another war. "Oh," said one gentleman, "we leave that to you." "And," said the other, "there are plenty of horses in Canada—get them in Canada"; whilst a third said that the omnibus horses that were requisitioned in the late war were of no use.

I made a somewhat emphatic protest against providing the country with horses at regulation prices and paying a tax on them as well, as may be readily imagined. Looking back on that conversation I can scarcely think the gentlemen who made the observations I have quoted were speaking seriously; indeed, I scarcely thought that they were at the time, for they are men of sense. Indeed, I do not know that I should have taken any further notice of the conversation had it not been brought back to my memory by the very excellent article in the current number of *Baily's Magazine*, entitled "Are we a horsey nation?" from the pen of my esteemed friend, "Borderer."

I am no pessimist; I do not always agree with the gloomy views on horse breeding entertained by "Borderer" and other of my friends, as those who read these columns will scarcely require reminding. But in answering the question, "Are we a horsey nation"? I must join my friend "Borderer" in an emphatic NO. We were a horsey nation once, but for the last twenty-five years we have been going from bad to worse in this respect. Our gilded youth, and even our youth that is not so very much gilded, "has become conversant with ease and idleness," and horsemanship, if a labour of love to the horseman, is none the less a labour for all that. One only has to look with an observant eye over the ordinary hunting field to see how we have degenerated as horsemen. "Borderer" tells us the young man of the present day will not ride a four-year-old even cub-hunting. But this is not all, the young man of the present day, if his purse be long enough, will not take pains to accustom an older horse to his handling.

There can be no doubt whatever that, as a nation of horsemen, we are resting on the traditions of the past. We believe we are a nation of horsemen, but we are nursing an illusion. How many gentlemen "make" their own horses nowadays compared with the number that made them in the days gone by? A scanty few indeed. Then, a crucial test, compare our gentlemen riders not the few who come to the front but the rank and file of them with the rank and file of fifty years ago. In the hunting field you will see more men ride hard for a bit than was the case half a century ago. But, as "Borderer" points out, they are nearly all on "made" horses. There is also another thing to be borne in mind, and that is that the country is not so difficult to cross as it was. There are fewer fences they are not so rough and the going is better.

THE TENS OF THOUSANDS of users of MOLASSINE MEAL should see that their stock have a portion in every feed all the year round, not simply as a condiment when an animal is out of condition, or occasionally as a fillip. MOLASSINE MEAL is the most valuable and economical food, displacing all condiments, and should be given in place of the same weight of oats, beans, grain, cake, or other feeding stuffs. Sold by all corn merchants and the MOLASSINE CO., Ltd., 36, Mark Lane, London, E.C. —[ADVT.]

To what, then, is due this decadence? Is it to any sudden dislike which people have taken to horses? I think not. It is, in my opinion, due, in a great measure, to the "soft" bringing up of our modern youth. Fifty years ago boys were expected to rough it, and did rough it, and were all the better for it. But increasing wealth has brought increasing luxury and ease. When a horse was the only means of transit in country places, it was essential that a boy should be a horseman. He rode accordingly, and even if he did not ride to hounds, he could handle a horse without appearing ridiculous, and he was proud of his accomplishment. But as one cannot play bowls without rubs, so one cannot ride a horse without falling sometimes, and without occasionally getting hurt. And one would think, to hear some people talk, that a broken collar-bone was one of the most serious things on earth. It is painful, it is true, and rather more inconvenient than painful; I have had some experience and I know; but a man is no worse for it, and he is all the better for risking it. "Borderer" says that the motor-car and golf are at the bottom of our no longer being a nation of horsemen. I do not quite agree with him. The motor-car may have something to do with it; but it is, I think, the love of ease and the hatred of taking trouble that is bringing us down from our high position as the most horsey nation in the world.

What is the remedy, then, for the existing state of things? Or is it beyond remedy? I would like to hope that it is not, for the manliness of a nation must deteriorate when its men go in for a life of self-indulgence. But the remedy lies in the young men of the rising generation, and the boys who are growing up after them. It can come from no outside source. There may, however, be an outside influence. It is noted by "Borderer" that as there are not the number of capable horsemen that there ought to be, so there are far more capable horsewomen than there were. It is to them, then, that we must look, and one of the most pleasing things I saw last hunting season was a lady showing her son how to go to hounds; telling him what to do when in difficulties, and encouraging him when he had rather an awkward spill. I do not know which was the most pleasing sight, the keenness of the teacher or the keenness of the pupil. But some of our modern mothers would have been hysterical if they had seen a son of theirs and his pony all in a tangle at the bottom of a deep bluish ditch, and would have ruined his nerve for ever.

The best type of heavy horse has always been a subject of considerable discussion, and men have held and do hold tenacious opinions about it, and sometimes are found to argue in a vicious circle as well as with considerable rancour when the subject crops up for discussion. At one time the respective merits of the Clydesdale and Shire horse were eagerly argued, and the admirer of one breed had little good to say of the other. Many of the criticisms of each which found plenty of justification in those days would be altogether wrong now. For instance, the Clydesdale has much increased in weight and substance. Yet in some places there are to be found Clydesdales which are on the light side, and which make up for their lack of weight by their increased activity. Such are the Clydesdales that are to be found in Cumberland, many of which were shown on the 29th ult. at the Cumberland show at Carlisle. They are admirably fitted for the country in which they have to do their work, and a lighter, active horse, with not too much feather about his heels, is the horse best adapted for work amongst the hills.

There is great reason to regret that the old Northumberland Vardy horse was bred out. It is long since the breed became practically extinct, but had a determined effort been made it might have been preserved. The Vardy was a short-legged, compact, and active horse, capable of trotting his eight or nine miles an hour without fatigue, and capable, also, of doing all the work of any hillside farm. There was no hair about his heels, and the mares were well adapted for breeding weight-carrying hunters. This and the growing fashion for a heavier type of horse to do farm work was no doubt the cause of the undoing of the Vardy.

The Vardy was undoubtedly a good foundation for the breeding of troopers if all we are told about him is true, and so is the Cleveland Bay. I had a letter from a breeder of wide experience a few days ago in which he advocated the crossing of thoroughbred mares with Cleveland sires as the best means of breeding cavalry horses, and his argument appears a reasonable one. The weight carrying qualities would come from the Cleveland sire, whilst from the thoroughbred dam would come the stamina, which is so essential in a troop horse. From the Cleveland

Bay would also come a little action, than which there is nothing more desirable when one goes on a long journey on horseback.

But though this may be a good way to breed troopers, it is not the cross I should suggest for a horse to carry a man to hounds. A trooper's horse wants a certain amount of pace, but he does not require so much as a hunter. Neither has he to spread himself over big fences with a heavy weight on when he is going at top speed. No doubt I shall be told that excellent hunters have been bred from the Cleveland sire and thoroughbred mare. That is true enough. Indeed, I have had one myself. But I am of opinion that it is the exception that proves the rule.

THE LOOKER-ON.

Suffolk Horse Society's Sale.

The annual sale of pedigree Suffolk horses, held under the auspices of the Suffolk Horse Society, took place on Monday, in the new large covered-in sale yard of Messrs. Spurling and Sons, at Ipswich, and, as usual, great interest was evinced in the sale, there being a large attendance of gentlemen whose names have been long and closely identified with the Suffolk horse as a distinctive breed. The sale was preceded by a luncheon, at which Mr. R. Eaton White, the vice-president of the society, presided, and in giving the toast of "Success to the Suffolk Horse Society," he said the demand for the chestnuts was on the increase, and the secretary had informed him that the export trade was specially good. That locality was regarded as the home of the Suffolk, and, remembering the state of agriculture, and that the trade in Suffolks was likely to continue to increase, it was advisable that they should do all they could to make that trade worthy of itself, as they had in that district something in regard to which no other country could compete against them. Let them, therefore, set to and produce the best Suffolk horse they could. There was at the present juncture a great demand for Suffolk geldings, but as the demand for stallions was considerable, they had not been able at present to provide sufficient geldings to meet the demand. It was to be hoped, however, that with the increased production of Suffolks they might be better able in a short time to satisfy the demand for geldings.

The nomination foals were judged during the morning, the gentlemen acting as judges being Mr. Samuel Toller and Mr. W. R. Hustler, J.P. The first prize went to a choice horse foal belonging to Mr. W. S. Pipe, Framlingham, which obtained distinction at the recent show at Framlingham, whose dam was purchased at the Suffolk Horse Society's sale two years ago; the second to a filly sent by Mr. W. Thompson, Dallinghoo; the third to another filly bred by Mr. W. Durrant, Butley; and the reserve to a filly bred by Mr. H. Burrows, Dallinghoo.

The auctioneers were Mr. Alfred Preston and Mr. Fred Smith (the secretary of the society), the former gentleman wielding the hammer, and he was faced by a large company. Some fairly good prices were realised, Sir Cuthbert Quilter purchasing the first prize nomination foal for 33 gs., as well as other lots. The top figure of the sale, however, was given by Lord Derby, who had to bid 61 gs. before he could secure Mr. Herbert Turner's Bures Belle, by Hewitt's Mars. The other chief lots were as follows:—

NOMINATION FOALS.

The property of the Suffolk Horse Society.

	Gs.
Albert .....Mr. Carlyle Smith	15
Filly foal, f. March 23 (3rd prize); s. Smith's Prince Horse foal, f. March 19; s. Smith's Prince Albert Messrs. Pratt and Sons	11
Filly foal, f. April 21 (2nd prize); s. Smith's Prince Albert .....Sir Cuthbert Quilter, Bart., M.P.	19
Horse foal, f. March 29 (1st prize); s. Dennington Cupbearer .....Sir Cuthbert Quilter	33
Filly foal, f. April 6 (reserve); s. Boulge Conqueror Mr. J. C. Dawson	14
Filly foal, f. April 4; s. Smith's Saturn Mr. Gerald A. Smith	16½
Halesworth Emperor (Mr. H. S. R. Stanford's), f. April 1, 1905; s. Smith's Prince Albert Mr. Dennis Clarke	32
Horse foal (Mr. H. Hawes's), f. April 8; s. Pratt's Golden Grain .....Mr. Arthur T. Pratt	24

MARES AND FOALS

Notes and Jottings.

A visit to Devonshire enabled me to visit the ram show and sale at Totnes last week, an event arranged and carried out under the control of the South Devon Flock Book Association. This important sale will be found dealt with elsewhere, and, therefore, no remark in respect to this is needful, save to mention the fact that, by holding here and elsewhere combination sales of this description, the council of this society is doing an excellent work, and probably affording its members the very best possible means of making their flocks more uniform, and, at the same time, giving opportunity for comparison of one flock with the others in a manner that can only be possible under circumstances similar to those which control these sales. One special matter, however, in connection with this sale not dealt with by your sale report deserves notice being taken of it, namely, the idiotic manner in which many of these rams were coloured. In many cases it was absolutely impossible to judge with any degree of certainty the character of the fleece. This objectionable practice has become so pronounced that one of the auctioneers called special attention to it, and said he considered that the practice as carried out at the present time was excessive and entirely beyond reason.

The above is an instance of the abuse of the use of colouring matter, but we have now to deal with a time when its proper use will be of the greatest benefit and service to all flockmasters. We allude to the use of colour in the rams' breasts at service time, and in many flocks this is used simply to denote the ewes that have been served and also those that return to service. This use is, of course, quite right, but it is not all it should be. If the rams are to be with the ewes for six weeks then the colours should be red for the first fortnight, blue for the second, and yellow for the third, leaving black to be used in the last resource, namely, on the ram left with the flock to stop any that may have been missed at the former service. Wherever this practice is adopted, or any variation of it as may be necessary, it will result in an immense saving of trouble, etc., at the lambing time.

Worked as indicated above, it will mean that only one-third of the flock will need being taken to the lambing pen at a time; this must be a very great advantage, and yet how few practise this. There is no extra trouble or extra expense incurred. The attention of all flockmasters is asked because from constant observation we are fully convinced the practice is not at all generally adopted.

The ram sale season is now in full swing, and the results are certainly good. Amongst the most notable advance in the average list is Mr. H. C. Stephens, whose grand and successful sale, reported elsewhere, shows just clearly how well it pays to do anything, no matter what it may be, thoroughly and well.

We have in more than one district recently observed a considerable number of cases of lame sheep. In some cases it is undoubtedly foot rot; but in others hardly so. In the latter cases it would be an assistance to drench the lambs with a dose or salts, and give them a bit of powdered sulphur with their food. For many of the lamenesses, particularly of a temporary character, arises from the blood and the need of a cleansing draught than is generally understood. Whether or not the time will arrive when foot rot will be treated as a scheduled disease we know not, but one thing is perfectly clear, and that is this: That any flock owner who knowingly allows sheep visibly affected with foot rot to be driven along any public road, or exposed for sale or otherwise in a public market, should be liable to a heavy fine. It is not that the particular flock owner who owns the sheep suffers, but by exposing his sheep in the market or through driving them along the roads, etc., he renders it possible for any other sound sheep that may follow to become infected also.

There is a difference of opinion on this matter many urging that the disease will break out almost spontaneously and without any apparent reason, and thus urge why should any flock-owner be thus penalised when he is not in the least to blame. It is not that any one who has the disease should be penalised, but that those who have got the disease should not be allowed to give it to either their neighbours or others.

There are many methods advocated for the prevention of the disease, and amongst them experience has shown us that it pays well to have every sheep's hoofs properly pared at least twice in the year. Some flock-owners will say mine never want doing; this may be so, but such cases are few and far between. It may be that there is not much to take off, or perhaps but few that want attention; it is however just this: it may be in a small minority wherein lurks the danger. Once let the disease start, and then it may not be the work of a few hours only, but of months, or even years before the clearance is secured. Well pare the hoofs and run the sheep through a trough with any one of the usual preparations in, and it will be found the expense and trouble will be thoroughly compensated for in any farm or holding where the disease is known to be likely to break out.

South Devons at Totnes.

One of the results of the formation of the South Devon Flock Book Association has been the establishment of a series of special ram sales limited to the sale of registered rams. The above sale, which took place on Monday last, was the first, the others being held later at Liskeard and Truro. The best average this year was made by Mr. E. H. Hoskin, who sent eight, and sold them all at £15 6s. 3d., the range of prices being 20 guineas to 7½ guineas. Two rams made the top price, Messrs. G. A. Northey and T. Wakeham being the purchasers. Messrs. Mathews gave 17½ guineas, Mr. R. B. Trant 17 guineas, Mr. Jas. Turpin 15½ guineas, and Mr. Helmer 12½ guineas for others. Mr. J. P. Mathews averaged £14 8s. 9d. for eight, with a range of from 28 guineas to 7 guineas, Mr. E. H. Hoskin taking one at 28 guineas, Mr. W. Vosper one at 20 guineas, and Mr. Lakeman one at 17 guineas. Mr. J. S. Hallett, for a dozen, realised an average of £13 8s. 3d., meeting with a real good demand, Mr. W. H. Pain taking the highest-priced one (29½ guineas) that was first prize at Tavistock Show, Mr. Solley gave 20 guineas for the first prize at the Devon County Show, and Mr. J. Stook 19½ guineas for the one that took similar honours at the Yealmpton Show this year. Mr. R. H. Ward took a fine ram to Cornwall at 14½ guineas, another making 12½ guineas to Mr. Rogers, from which price the remainder ranged down to 6½ guineas. Two two-shear rams were also sold, Mr. Hellier giving 11 guineas for one, and Mr. Walke 7 guineas for the other.

Mr. W. H. Pain's were a nice even lot, the range of value here was from £15 15s. to £7 7s., giving for the ten sold the capital average of £11 11s. Mr. J. Maddicott gave 15 guineas (the best price), Mr. Whiteway gave 14 guineas for the next sheep, two others made 13½ and 13 guineas, another 12 guineas, and two others 10½ and 10 guineas each. Eight from Mr. J. Stooke's flock were in good request, and ranged from 20 to 7 guineas each, the average working out at £11 7s.

Two from Mr. E. Cornish averaged £10 10s. Mr. Herman Evans had nine sold, here the range of price was from 22 guineas to 7½ guineas, making the average £10 9s.

Mr. H. Fairweather sent forward fourteen, all of which were sold readily at the excellent average of £10 2s. 6d., the prices ranging from 18½ to 6 guineas each.

Mr. Jas. Turpin's lot were in request, and sold

well at from 15½ guineas to Mr. Elliott to 7 guineas, making an average of £10 1s. 3d. Mr. J. H. Cornish sent ten, which were all wanted. These ranged in prices from 20 guineas to 5½ guineas, and made an average of £9 17s. 4d.,

Mr. E. Stooke's lot were very level and good here. The nine offered were all sold at from 13½ to 5½ guineas, making an average of £9 16s. 2d. Messrs. J. and H. Rossiter, who sold at this sale for the first time, secured the capital average of £9 7s. 6d., with a range of prices from 14 guineas to 4½ guineas. Mr. T. S. Walter Symons had a very level lot of rams entered. These ranged from 12½ to 6 guineas, and averaged £8 15s. 6d. Messrs. R. E. and W. Paige sold five at from 16½ to 5 guineas, making the average £8 18s. 4d. Mr. H. Tope averaged £8 13s. 4d. for five, top price 14 guineas. Mr. John Hoare £8 11s. for seven, top price 11 gs. Mr. A. Gilland averaged £7 12s. 3d., top price 8 guineas; Messrs. J. M. Peeke and Sons averaged £7 3s. 6d. for nine, 12 guineas being the top price; Messrs. Wintle and Sons averaged £6 16s. 6d. for four, 9 guineas being the top price; and Messrs. Baron and Sons averaged £6 13s. for six, 12½ guineas being the top price. The respective averages of the other consignors were as follows: —Messrs Harold Pearse 6½ guineas, J. Wood 6 guineas, T. Beams £6 2s. 6d., W. Bastard 5½ guineas, P. Priggs ditto, G. A. Northey 5 guineas, and E. B. Luscombe £5 1s. 11d.

In addition to the rams, there were also sold about 3,000 ewes, which came from many of the leading flocks in the district. The demand was not considered quite so keen as had been the case, but for the best there was a capital demand, prices ranging from 57s. per head.

Sheep Fairs and Sales.

Mr. H Lambert's Hampshire Downs.

Messrs. Chalk, on Thursday, conducted their twentieth annual sale and letting of Mr. Henry Lambert's pure-bred Hampshire Down rams and ram lambs. The sale was a successful one, the average prices of the whole being £8 10s. The highest price for the letting lambs was 28 gs., and the highest for lambs sold 23 gs. Nine shearlings averaged £7 17s. 6d. The principal buyers were: Messrs. Flower (Chilmark), Goodchild (Haverhill), W. Seabrook (Berden), Hanbury Burdas (Lowthorpe), G. H. Francis (Longstanton), H. Gee (Bishop Stortford), Pain's exors., Jackson (Fowlmere), Bennett (East Dereham), Graham (Ipswich), Howard (Matching), Sheldrick A. Spencer (Melbourn), Spicer (Saffron Walden), F. Smith (Linton), Lanvon, Measures, B. J. Chaplin (Fulbourn), A. Tebbit (Toft), Nash (Fowlmere), L. Wallis (Haslingfield), Death (Hunsden), T. F. Buxton (Ware), T. B. Fulcher (Elsenham), the Rev. C. H. Brocklebank (Bartlow), and others.

Suffolks at Ipswich.

The annual sale of Suffolk sheep commenced at Ipswich on Wednesday, when Messrs. Robert Bond and Sons, in conjunction with Mr. Ernest Prentice, sold the ewes and ewe lambs. There were no sensational prices, but the averages on the whole came out very well. One pen of ewe lambs, bred by and the property of Messrs. S. and F. Traylen, Honington, made the record price for the year so far—viz., 75s.—to Earl Cadogan, K.G., the president of the Suffolk Sheep Society. The sale opened with shearling ewes forty the property of Mr. Benjamin Nott, Mount Bures, making 70s. and 65s. in lots of twenty. Thirty belonging to Mr. C. S. Wentworth Reeve, Livermere Park, went at 79s. and 75s. The consignment of Mr. J. D. Cobbold, Holy Wells, Ipswich, made similar prices. Eighty shearling ewes belonging to Mr. E. Ward Snell, Darmsden Hall, averaged 65s. 6d., with a top price of 68s. Mr. T. M. Rudland, Woolverstone, had sixty shearling ewes, the first ten going at 100s., and the next lot 70s., the average of sixty being 73s. The Chesterford Park flock, the property of Major J. E. Platt, was next submitted. Two lots of ten shearling ewes fetched 61s. and 52s., and the two-shear ewes ranged from 65s., 125 ewes averaging 57s. Mr. H. N. Dunnett, of Dedham, sent a number of two-shear and three-shear and older ewes, as well as several lots of selected ewe lambs. Thirty two-shear went at 72s., three-shear at 63s., twenty ewe lambs at 47s. 6d., the average of ninety-four ewes being the satisfactory one of 58s. 6d.

Rain was experienced at the second day's sale, but this did not affect the attendance of buyers, which was very large, and business was brisk throughout the day, very few lots remaining unsold. Over 500 rams were offered, and the work of selling was divided between Mr. Robert B. Bond and Mr. Ernest Prentice. Space forbids a detailed list of the lots sold and prices realised, but the little table appended will give a good idea of how prices went. The rams offered were from the flocks of well-known breeders, and were keenly sought after, with the result that double figure prices were quite common, a large number ofanimals realising over 20 guineas a-piece The best price of the day was 44 guineas, or two guineas more than the highest price at last year's sale. This sum was obtained by Mr. H. G. Smith, whose Walton Grange flock has won for itself a name in all parts. The lamb which realised 44 guineas was by Grange Persimmon, and was bought by Mr. Abbott Green. Another ram lamb from the same flock fetched 35gs., and others up to 22 guineas. The following table gives some details of the principal lots sold:—

	No. Sold. Rams.	Highest Price Gs.	Aver. £ s. d.
Herbert Smith	20	44	16 18 1
S. R. Sherwood	23	20	12 4 8
D Abbott Green	17	25	12 0 3
Thomas Keeble	18	21	11 18 7
J. R. Keeble	9	14	10 4 2
S. and F. Traylen	7	12	10 2 6
J. W. Eagle	36	26	9 12 6
A. H. Stanford	9	12	8 8 0
A. J. Smith	19	11	7 18 0
M. G. Hale	10	11	7 7 0

Sale of Mr. R. J. Colman's Southdowns.

On Thursday Messrs. J. Thornton and Co. disposed of the flock of Southdowns bred by Mr. Russell Colman, at Crown Point Park, Norwich, and although the weather was not favourable to the sale, its importance attracted many buyers, not only from different parts of East Anglia, but from various parts of the country, and, considering that none of the sheep included in the catalogue had been shown, and that they had to rely upon their predecessors for their reputation, the sale was a most successful one. The flock was kept at Easton until the late Mr. J. J. Colman's death in 1899, and then the whole flock was dispersed with the exception of about 100 of the old ewes over four years. These were retained and put on to the Crown Point Park, and, somewhat remarkable to relate, in five years another flock, numbering nearly a thousand, was raised from these hundred ewes, and a few ewes bought of Sir Humphrey de Trafford, the Duke of Richmond, and Sir Thos. Lennard, none of which were sold. It was on this occasion that their produce by the old Easton rams were offered, expert breeders of Southdowns attending the sale acknowledging the great excellence of the flock, which was really a resurrection of the old flock Mr. Garrett Taylor had raised 30 years before, for the late Mr. Colman, an effort which showed remarkable judgment in selection and breeding, resulting in the rearing of a fine flock of Southdowns of true character, from what might almost be called the ashes of the old flock that was sold years before.

The first lot to come into the ring on Thursday were five yearling ewes bred from the late Mr. J. J. Colman's ewes. The first lot, two of them being sired by Colman's General, fetched, after some spirited bidding, 130s., for his Majesty the King; whilst a similar amount was given by Mr. Cazalett for a choice pen of five ear-marked yearling ewes. This, however, was not the top figure, for a remarkably choice pen, for which there was rapid bidding, and the five—three of them by Colman's Swafield II. and two by Colman's General III., went to the bid of Mr. Cazalett at 160s.. Other yearlings made up to 90s. The best of the two-year-old ewes were secured by the King at 150s.; others realising up to 83s., whilst the three-year-olds fetched up to 115s., the four-year-old ewes up to 75s., and ewe lambs up to 43s.

The rams made high prices. The King gave 115 guineas for Colman's Favourite, the sire of his Majesty's champion ram at the Royal. Mr. Adeane, Babraham, 18 guineas for Colman's Favourite II., five years old, and 15 guineas for a three-year-old by Colman's General Favourite. The Duke of Devonshire paid 25 guineas for a two-year-old ram by Colman's General, and Mr. Adeane gave 26 guineas for one by Colman's Swafield. A choice yearling by Colman's General Favourite went to the bid of the Duke of Devonshire at 40 guineas. Some of the ram lambs also sold well. One by Colman's Swafield was knocked down at 20 guineas, but there was a dispute, and the bidding went up to 51 guineas to his Majesty the King, for whom the next one was secured at 15 guineas. Wether lambs fetched from 35s. in lots of ten.

Weyhill.

The great annual summer sheep fair at Weyhill attracted its usual large attendance of buyers from all parts, but the entry was somewhat smaller than usual, something under 2,000 sheep being penned in the open fair, but upwards of 10,000 ewes and lambs were penned for auction, together with about 200 ram lambs for letting and sale.

The auctioneers found that recent prices for ewes and lambs were well maintained, a good fast trade being done, while a complete clearance was all but effected. Business was practically the same as at Overton and Alresford, and a good deal quicker than at Stockbridge. Ewes appeared to be in greater demand than lambs, but for ram lambs there was a particularly good trade. Some of the chief transactions are appended:—

Messrs. Waters and Rawlence, of Salisbury, conducted three important lettings and sales of ram lambs. A draft of fifty ram lambs from the Cholderton Lodge flock, the property of Mr. H. C. Stephens, were first submitted, and of these seven were let at from 20 to 120 guineas, the average being £47 2s., while the selling lambs made from 6 to 140 guineas, the average being £16 10s. From the Marquis of Winchester's Amport flock sixty highly-bred ram lambs were offered—eight to be let, and the remainder for sale. The former were readily hired at prices ranging from 10 to 76 guineas, the average being £35 14s., while those for sale realised from 5½ to 12 guineas, averaging £10 16s. 6d. There were also entered thirty ram lambs from the flock of Mr. Frank A. Holman, of Dunley Manor. Four of them were let at an average of £21, the best price paid being 42 guineas. The remainder were sold at from 5½ to 18 guineas, the prices realised averaging £8 13s.

Messrs. F. Ellen and Son, of the Auction Mart, Andover, conducted a sale of about 7,000 ewes and lambs, 14 rams, and 33 ram lambs and two-tooth rams, and the following was the general run of prices:—Two-tooth rams, 24s. to 60s.; four-tooth rams, 45s.; wether lambs, 34s. to 41s. 6d.; mixed lambs, 22s. 6d. to 34s. 6d.; chilver lambs, 36s.; two-tooth ewes, 43s. to 57s.; two-tooth wethers, 37s. 6d. to 47s.

In addition to the above, Messrs. Ellen offered to competition thirty ram lambs and three two-tooth rams from the well-known flock of Mr S. H. Allen, of Eastover. The former sold for 4, 4½, and 5 guineas each, one or two being withdrawn at 3½ guineas, and the latter were knocked down at 3½, 4, and 5 guineas respectively.

Mr. Allan Herbert, Andover, submitted a catalogue of 2,000 ewes and lambs. Regular draft ewes made 43s.; draft ewes, 25s. 6d., 28s. 6d., 30s. 6d., 34s. 6d., and 35s.; two-tooth ewes, 41s. 6d. to 51s. 6d.; five-tooth ewes, 45s. 6d.; two-tooth and four-tooth wethers, 40s., 41s., and 45s.; wether lambs, 23s. 6d. to 34s.; ewe lambs, 31s. 6d. to 33s.; and mixed lambs, 22s. to 32s.

Alresford.

The supply of sheep at this well-known fair was smaller than last year, but the quality, generally speaking, was superior. There was a large attendance of buyers, and trade was a little brisker, perhaps, at the commencement than towards the conclusion of the fair, but, taken as a whole, it compared favourably with last year's fair, and practically everything entered changed hands. The prices realised were good, a firm trade being done at about the same standard as the recent Overton Fair. Better-class sheep were not, perhaps, as much sought after as last year, but lambs were a trifle dearer, and ewes about the same.

Messrs. James Harris and Son, Winchester, disposed of about 10,550 ewes and lambs, and a number of ram lambs. For the former a good trade was experienced at satisfactory prices, whilst as to the ram lambs, these included thirty from the pure-bred Hampshire Down flock of Mr. Donald Nicoll, of Burntwood, and a second draft of Hampshire Down ram lambs from the flock of Mr. E. A. Philippi, of Crawley Court, a first draft from which was sold at Overton Fair. Mr. Nicoll's lambs sold readily at an average of £5 14s. 2d., the prices realised ranging from 4 to 11½ guineas. The draft from Crawley Court made an average of £3 15s. each, and for both consignments the demand was good.

Messrs. Hall, Pain, and Goldsmith, Petersfield, had again entrusted to them the sale of the annual consignment of ram lambs from the Blendworth flock, the property of Mr. James Goldsmith. The catalogue included some seventy-two lots of lambs, containing all the qualities for which the flock is so well known. The quality of the lambs was better, if anything, than last year, but the sale effected was not quite such a good one. The top price realised was 13 guineas, and several changed hands at 10 and 11 guineas. The prices realised on the whole ranged from 4 guineas up to 13 guineas.

The annual letting and sale of Mr. J. A. K. Falconer's ram lambs took place as usual at this fair, when 60 lambs of nice quality and excellent breeding were submitted by Messrs. Waters and Rawlence, of Salisbury. Six lambs were first let at 20, 15 (twice), 9 (twice), and 7 guineas. The selling lambs made 19, 16, 12, 11, 8½, 8, 7½, 7 guineas, etc., the average of those let and sold being £7 17s.

The Royal Lancashire Show at Liverpool.

The Royal Lancashire has for several years been one of the most go-ahead and energetic of our many societies. The management invariably gives satisfaction, the district in which the society operates is a wealthy one, both as regards live stock and the wherewithal to carry them on, so that all things, so to speak, conspire to make this show a great success. The opening day was Thursday last, and the morning opened with a heavy downpour of rain, which continued more or less until after luncheon, so that, with the heavy traffic, the ground began to cut up in places very badly. In the afternoon the sun asserted itself, and brightened up matters very considerably, so that it must be hoped the loss to the society would not be so heavy as the morning would lead one to anticipate, and with a more favourable state of things on the remaining days, may have a record gate. The live-stock section of the show is very satisfactory throughout, as is usually the case at this show.

Cattle, the most part of which are of the Shorthorn breed (though Jerseys and the little Irish breeds are provided with classes, and fairly well supported) are one of the best collections that have been out this year, there is no doubt—at least, at a county show. show. Both the open and restricted classes of this breed are quite first-rate, and the dairy classes as good or better than those that are open to the beef section only, which is usually much the best. Some of the leading bulls of the latter section were absent from the competition, but, generally speaking, the leading members of the community this season were well in evidence. The first class of Shorthorn bulls was not quite as well filled as some of the later ones, only five entries of these being catalogued, Mr. Peter Blundell having the winner in Montcalm, a massive and level bull, and Mr. J. A. Brown's Micklethwaite Warrior second; another first-class bull followed. Mr. T. Miller's Irish-bred bull, Limepark Champion, who has done a good deal of winning since the Dublin Spring Show, and is in very good form, scored a victory over Mr. R. P. Cooper's white bull, Meteor, who has been very successful throughout the season, and was only just off a long journey from the Welsh National. A class of fourteen entries of well-grown yearling bulls came forward, and both first and second prizes were accorded to bulls from Lord Brougham's herd near Penrith. These are of very good quality and first-rate symmetry, and are half-brothers, being by Stoneytown Pride. Cows in milk calved prior to 1901 was a well-supported class, Messrs. Silcock and Sons being first with their famous dual-purpose cow Clementine, whose udder is proverbial; and Mr. George Harrison's Ursula Raglan, who has been the recipient of many prizes this year, and a rattling good cow, came in second. Sir Oswald Mosley's well-known white, Yours Faithfully, and Mr. William Bell's Ratcleugh Witch, another second-prize winner, were at the head of the three-year-old heifer class. Then Mr. F. Miller's Lady Amy 7th, of Royal fame, came to the front in the two-year-olds, Mr. Alfred Hayley's Bright Jewel 6th, and the Earl of Sefton's Winter Rose 2nd, being the winners, as named, in a very good class of fifteen yearling heifers. The Earl of Lathom and Mr. Rothwell were at the head of the Shorthorn (Coates') dairy class. The series of classes open to the County Palatine, as it is styled, followed on, and in these several of the winners already mentioned repeated their victories.

The dairy cattle classes proper, without restrictions as to breeding, gave quite an extraordinary show of milk and beef—the true dual-purpose kind—but these were not judged until after the other sections. Jerseys are not a large show, but several of the leading breeders were represented, the chief winners being Lady de Rothschild, Mrs. C. McIntosh, Mr. W. J. M. Townley, Lord Cadogan, Lord Ancaster, and one or two others, several of the cows being especially good.

Kerries and Dexters were both breeds remarkably well brought out and strong in numbers. Lady Greenall and the Duchess of Newcastle divided the chief prizes in the former breed, and the cows showed excellent udders. The bulls were not as strong a section. The Duchess of Devonshire and Mr. B. de Bertodano were each of them very strongly represented in Dexters, both in the male and female classes, and the latter, like the Kerry cows showed extraordinary milking points.

Light Horses.

This section of the show commenced with the hunters, which, though good, were not exceptionally strong. There was a good entry of brood mares, Sir Merrik R. Burrell taking the first prize with his mare Speculation. Of the male hunters, Mr. Stokes's Januris, many times winner and champion, Gold Reef, was first in the heavy-weight class, which had but three entries. Whisky, from the same stables, carried off the first honour in the light-weight class. Both are just as good horses as can be found in a day's march. Mr. F. B. Wilkinson's Jupiter, also a well-known winner, got by Johnny Morgan, won the first in the three-year-old class; and his stable companion, Destruction, by Havoc, was the best of fifteen entries of two-year-olds. Mr. William Butler, with a good colt, by Surbiton, was awarded the first prize for yearlings, the class containing eight entries. Hackneys were well shown as regards quality, some of the best steppers being present, but in numbers the classes were not too well supported. Mr. W. B. Tubbs's beautiful quality horse Administrator, by Garton Duke of Connaught, was able to hold his own against all comers in the stallion class foaled before 1902; and in the three-year-old class Mr. Stephen Cliff's Newfold, a very nice colt by Goldfinder 6th, was awarded the premier position. Mr. W. R. Lysaght's Amberly Sir Adam, one of the smart sons of His Majesty, came out at the top of the yearlings. Hackney brood mares had eight entries and had foals at foot; the class included several well-known winners. Three-year-old fillies were also capitally represented, but Messrs. Carr and Co. carried off the first prize in the class with Yapham Molly, by Cornfactor, bred by Mr. Stewart. Two-year-olds were more in number than the three-year-olds, and their quality was very good. Sir Walter Gilbey's Dashing Princess was accounted the best of these, and Mr. R. P. Evans's Cristolia, a daughter of Polonius, headed the yearling fillies. Altogether the breeding section of the hackneys created a good deal of interest, and, in addition to these classes, the harness classes of all sizes were very strong in the sensational steppers of the day. These are judged at various times during the continuation of the show.

Heavy Horses.

Shires were one of the great features of this section of the show. The classes were not only well filled, but the best animals from the Royal and other leading shows were present, and for the most part well brought out. Lancashire, and especially the Liverpool side of the county, contains some of the very best Shire horses the country can produce. In the aged stallion class, for horses foaled in or before 1901, Lord Egerton's Tatton Friar, who ran the London champion very closely the other year, was placed at the head of affairs. He is very weighty, put together properly, and his quality is good too, so that it is not to be wondered at that he took the championship also. Messrs. Forshaw and Sons had a very good horse following in their five-year-old Ring and Bells, a son of Whitstone Ring and Bells, at one time a famous horse in Mr. J. Mucklow's Cornish stud. Three-year-old stallions came out very strong with ten entries, and though the first and second retained their places, as at the Royal, some of the others lost caste rather. The winners were Lord Rothschild's Delamere Chorister and Mr. R. N. Sutton Nelthorpe's Souldern Scylex. The judges, however, were unable to agree respecting the placing of these two horses, so that an umpire had to be requisitioned. Two-year-old stallions, with five entries, were numerically small, but again the Royal winners were included in the company and were once more placed as in London. These were Lord Rothschild's Childwick Champion and Mr. James Gould's Lynn Champion. The former colt looks perhaps quite as much the cart-horse; but the build and quality, as well as style of the latter make him a very close competitor. Mr. Gould was at the head of the yearling stallions with Catterall Black Prince, a carty and good colt by Westminster 2nd; and Mr. J. W. Kenworthy's Delamere Lad, by Delamere Surprise, was accorded the second honour.

Brood mares were about as good a class for their numbers as have been out this season; and, with Tatton Tapestry at their head, made quite an excellent display. This mare has developed the last year or two into quite a Shire mare of the first water. Fillies, three-years-old, were big and good. Lord Rothschild's rare limbed and mighty Rickford Farewell was quite at the top of them, though opposed by some other extra good fillies. Mr. T. Simpson Jay's Johnson Fairy Queen, who has been very much in the luck at recent shows, was awarded the first here in the two-year-old class; and Lord Egerton's Father May Queen was once more able to vanquish all her opponents in the yearling class.

Sheep.

The Shropshire breed comes first in this section, and Mr. R. P. Cooper, whose flock has been such an outstanding one in this season's show-yards, was once more equally well in evidence taking first. In shearling rams, shearling ewes, and ram lambs Mr. Walter C. W. Gretton was also showing some capital sheep, and beating the Shenstone flock in the ewe lamb class with a pen of high quality and breed type.

Oxford Downs were in the hands of Mr. Alfred de Rothschild, Mr. Gibson Heslop, and Mr. H. L. Storey, and some good pens were shown; and in the fast coming popular Wensleydale breed Lord Henry Bentinck and the executor of the late Mr. Thos. Wilks divided the money between them. Herdwicks and Lonks were quite as well and extensively shown as usual. Mr. W. J. Crossly and Mr. James Todd took the first prizes in the former breed; and Mr. John Wrigg, Mr. Blackburn, Mr. Hague, and Messrs. Snowden and Sons were the chief exhibitors of the latter.

Pigs.

Pigs were one of the strongest features of the show as they have been in a general way, and all the different breeds were well represented. Lord Ellesmere and Sir Gilbert Greenall were the chief winners with their well-known Large Whites; and Sir Gilbert Greenall, Mr. L. Paget, and Mr. Simpson Jay in Middle Whites; Mr. Jefferson and the Duchess of Devonshire having their usual quality of Berkshires, and sharing the prizes with Mr. Ibbeton, securing every red card in the Tamworth section; whilst Large Blacks, which were very well shown, and the best of them from Mr. Mariner's herd that has done so well at the Eastern Counties shows, and turned out pigs of quite remarkable dimensions and quality.

JUDGES.

CATTLE.—Shorthorns: Mr. Richard Strarren, The Dutfryn, Newport, Mon.; Mr. John W. Barnes, Aikbank, Wigton, Cumberland. Dairy: Open and county—Mr. Sam W. Gould, Foxley Hall, Lymm; Liverpool cowkeepers' classes—Mr. George Holden, Daisy Hill, Westhoughton, near Bolton. Jersey: Mr. T. H. Weetman, Atherstone, Warwickshire. Kerry and Dexter: Mr. John B. Ross, Lyndale, Rockfield Road, Hereford.

HORSES.—Hunters: Mr. H. M. Wilson, M.F.H., The Hermitage, Holmes Chapel, Cheshire; Mr. Charles M'Neill, M.F.H., Broadway, Worcestershire. Polo and Riding ponies: Mr. Charles M'Neill, M.F.H., Broadway, Worcestershire. Hackneys, riding and driving competitions, and local trade turnouts: Sir Gilbert Greenall, Bart., Waltonhall Warrington; Right Hon. Fredk. Wrench, Killacoona, Ballybrack, Co. Dublin. Shires and agricultural horses: Mr. H. Percy Taunton, Redlynch, near Salisbury; Mr. C. W. Tindall, Wainfleet, Lincolnshire. Jumping competitions: First day—Colonel Wm. Hall Walker, M.P., Gateacre Grange, Liverpool; Mr. A. T. Neilson, Halewood, Liverpool; second day—Lieut.-Colonel Wm. Lee Pilkington, J.P., Edenhurst Roby, Liverpool; Mr. Henry Baxter, The Tower, Rainhill, near Liverpool; third day—Mr. George H. Warren, Strawberry Field, Woolton, Liverpool; Mr. T. P. Powell, Watling Road, Fulwood, Preston; fourth day—Mr. T. B. Sykes, Breck House, Poulton-le-Fylde; Mr. F. Clunie Dale, Plymyard Tower, Bromborough, Cheshire. Lancashire tenant farmers' classes: Cattle—Mr. George Cook, 25, Hardman Street, Liverpool; Draught horses—Mr. James Whinnerah, Warton Hall, Carnforth. Parade of Liverpool cart horses: Mr. Peter Entwistle, Elm Street, Liverpool Road, Manchester; Mr. E. F. Laird, horse superintendent, Messrs. Courage and Co., Ltd., London.

SHEEP.—Shropshire and Oxford Downs: Mr. T. S. Minton, Montford, Shrewsbury; Wensleydales—Mr. A. Ewan, Gooda, Westhouse, Kirkby, Lonsdale; Herdwicks and Lonks—Mr. George Dewhurst, Lonk Villa, Portland Street, Southport.

PIGS.—Whites: Mr. Herbert H. Owtram, Newland Hall, Ellel, Lancaster; Mr. J. Ashforth, Dronfield, Sheffield; Berkshires—Mr. William A. Barnes, Hasluck's Green Farm, Shirley, Birmingham; Tamworths—Mr. A. J. Tomlinson, Bubnell Hall, Baslow, S.O., Derbyshire; Large Blacks—Mr. Horace W. Packard, Over Hall, Shotley, Ipswich.

PRIZE LIST.

Cattle.

SHORTHORNS.

Bull, calved in 1901 or 1902: 1, P. Blundell, Ream Hills, Kirkham; 2, J. A. Brown, Ridley Hall, Tarporley; 3, Wm. Graham, Eden Grove, Bolton, Penrith.

Bull, calved in 1903: 1, F. Miller, La Belen, Clifton Road, Birkenhead; 2, R. P. Cooper, Shenstone Court, Lichfield; 3, S. E. Dean and Sons, Dowsby Hall, Bourne, Lincolnshire.

Bull, calved in 1904: 1 and 2, Lord Brougham and Vaux, Brougham, Penrith; 3, G. Harrison, Gainford Hall, Darlington.

Cow, in milk or in calf, calved in or before 1901: 1, R. Silcock and Sons, Poulton-le-Fylde; 2, G. Harrison; 3, Capt. W. B. Harrison, Aldershaw, Lichfield, Staffs.

Heifer, in milk or in calf, calved in or before 1902: 1, Sir O. Mosley, Bart., Rolleston Hall, Burton-on-Trent; 2, W. Bell, Ratcheugh, Alnwick; 3, C. Bell, Norley Hall, Norley.

Heifer, calved in 1903: 1, F. Miller; 2, T. Atkinson, Rivales, Bury; 3, Sir O. Mosley, Bart.

Heifer, calved in 1904: 1, A. A. Haley, Whitewall, Malton, Yorks; 2, Earl of Sefton, Croxteth Hall, Liverpool; equal 3, T. Atkinson and C. Bell.

Dairy cow in milk, of any age: 1, Earl of Lathom, Lathom House, Ormskirk; 2, R. R. Rothwell, Estate Office, Miller Arcade, Preston; 3, W. Bateman, Beaumont Grange, Halton, Lancaster.

Bull, two years old and under five years: 1, P. Blundell, Ream Hills, Kirkham; 2, T. R. Wilkins, The Grove, Longton, Preston; 3, J. Haslam, Starkies, Bury.

Bull, one year old and under two years: 1, F. Ellis, Minster Lodge, Ormskirk; 2, Mrs. M. Blackburn, Moss Hall Farm, Out Rawcliffe, near Garstang.

Bull, five months old and under twelve months: 1, P. Blundell; 2, T. Atkinson; 3, E. T. Hemelryk, Woolton Heyes, Woolton.

Cow, in milk or in calf, calved in or before 1902: 1, Silcock and Sons; 2, W. Bateman; 3, Earl of Lathom.

Heifer, calved in 1903: 1, T. Atkinson; 2, J. H. Maden, J.P., Rockcliffe House, Bacup; 3, W. Heaton, Lostock, Bolton.

Heifer, calved in 1904: 1, Earl of Sefton; 2, T. Atkinson; 3, M. Lewtas, Stalmine Grange, Stalmine, Poulton-le-Fylde.
Bull, calved in 1904: 1, P. Blundell.
Cow, in milk or in calf: 1, W. Bateman.
Heifer, calved in 1903 or 1904: 1, T. Atkinson.

JERSEYS.

Bull, calved in 1901, 1902, or 1903: 1, Lady de Rothschild, Aston Clinton, Tring, Bucks; 2, Earl of Ancaster, Normanton Park, Stamford; 3, Right Hon. Earl of Cadogan, K.G., Culford Hall, Bury St. Edmunds.
Bull, calved in 1904 or 1905: 1 and 3, Mrs. Charlotte M'Intosh, Havering Park, Romford, Essex; 2, James Joicey, Poulton Priory, Poulton, Fairford, Gloucester.
Cow, in milk or in calf, calved in or before 1902: 1, Lady de Rothschild; 2, Mrs. C. M'Intosh; 3, J. Joicey.
Heifer, in milk or in calf, calved in 1903: 1, Mrs. C. M'Intosh; 2, Bishop of Ipswich, Burgh House, Great Yarmouth; 3, W. G. M. Townley, Hard Cragg, Grange-over-Sands.
Heifer, calved in 1904: 1, J. Joicey; 2, Lady de Rothschild; 3, W. G. M. Townley.

KERRY.

Bull, calved in or before 1903: 1 and 3, Lady Greenall, Walton Hall, Warrington; 2, Her Grace the Duchess of Newcastle, Clumber, Worksop.
Cow or heifer, in milk, calved in or before 1902: 1 and 2, Her Grace the Duchess of Newcastle; 3, Lady Greenall.
Heifer, calved 1903 or 1904: 1 and 2, Lady Greenall.

DEXTER.

Bull, calved in or before 1903: 1, Her Grace the Duchess of Devonshire, Compton Place Eastbourne; 2, H. M. Gibbs, Barrow Court, Flax Bourton, near Bristol; 3, Baldomero de Bertodano, Cowbridge House, Malmesbury, Wilts.
Cow or heifer, in milk, calved in or before 1902: 1, Her Grace the Duchess of Devonshire; 2, Baldomero de Bertodano; 3, H. M. Gibbs.
Heifer, calved in 1903 or 1904: 1, Her Grace the Duchess of Devonshire; 2, Baldomero de Bertodano; 3, the Countess of Sefton.

HORSES.

HUNTERS.

The "Manchester" Challenge Cup, value 50 guineas, for the best brood mare or filly in the show: Sir Merrick R. Burrell.
The "Manchester" Challenge Cup, value 50 guineas, for the best mare or gelding, 4 years old or upwards, shown in saddle: John H. Stokes.
Gold medal, or £5 and a bronze medal, for the best hunter brood mare (by a thoroughbred or registered hunter sire): Capt. Heywood-Lonsdale.
Silver medal, or £1, for the best hunter filly by a thoroughbred horse or registered hunter sire, not exceeding 3 years old: John Prescott.
Silver medal, or £1, for the best hunter mare or gelding of any age: A. L. Goodson.
Hunter mare, with foal at foot: 1, Sir Merrick R. Burrell, Knepp Castle, Horsham; 2, Capt. Heywood-Lonsdale, Shavington, Market Drayton; 3, C. Schwabe, Arden.
Hunter foal, in previous class: 1, H. L. Storey, Bailrigg, Lancaster; 2, Miss Hick, Mytton Hall, Whalley; 3, F. B. Wilkinson, Cavendish Lodge, Edwinstowe, Newark.
Mare or gelding, 4 years old and upwards, to carry up to 15 stone (shown in saddle): 1 and 2, J. H. Stokes, Nether House, Great Bowden, Market Harborough; 3, F. B. Wilkinson.
Mare or gelding, 4 years old and upwards, to carry up to 12 stone (shown in saddle): 1, J. H. Stokes; 2, A. J. Brown, The Grove, York Road, Doncaster; 3, A. L. Goodson, Heathfield, Knutsford.
Filly or gelding, 3 years old: 1, F. B. Wilkinson; 2, J. H. Stokes; 3, A. J. Brown.
Filly or gelding, 2 years old: 1, F. H. Wilkinson, Cavendish Lodge, Edwinstowe, Newark; 2, Mrs. Blockley, Moor Hall, Madeley, near Newcastle; 3, E. S. Jackson, M.D., Carnforth.
Filly, gelding, or colt, 1 year old: 1, W. Butler, Hordley, Ellesmere, Salop; 2, Mrs. Blockley; 3, E. Barton, Warton Grange, Carnforth.
The "Ainscough" Gold Challenge Cup, value 50 guineas, for the best Hackney stallion in the show.—Walter Burnell Tubbs.
The "Foyds" Challenge Cup, value 50 guineas, for the best Hackney mare or filly in the show.—Walter Burnell Tubbs.
The Hackney Horse Society's Silver Medal for the best Hackney stallion, entire colt, or colt foal (registered or eligible for registration in the Hackney Stud Book).—James K. Ford.
The Hackney Horse Society's Silver Medal for the best mare, filly, or filly foal (registered or eligible for registration in the Hackney Stud Book).—Messrs. Carr and Co.
Hackney stallion, foaled in or before 1902.—1, W. Burnell Tubbs, The Paddocks, Mill Hill, London; 2, J. K. Ford, Chellaston, near Derby.
Hackney stallion, foaled in 1903.—1, S. Cliff, Wyndham Hall, Crayke, Easing Wold, Yorkshire; 2, A. A. Haley, Whitehall, Malton, Yorkshire.
Hackney stallion, foaled in 1904.—1, W. R. Lysaght, Chepstow, Mon.; 2, R. P. Evans, Woodhatch House, Reigate, Surrey.
Hackney brood mare, with foal at foot.—1, W. Burnell Tubbs; 2, Cockayne Bros., Sheffield Lane, Paddocks, Sheffield; 3, H. Watson, Newton Kyme, Tadcaster, Yorkshire.
Foal in last class (by registered sire).—1, J. K. Ford; 2, H. Watson; 3, T. B. Sykes, 13, Huskisson Street, Liverpool.
Hackney filly, foaled in 1902 (by registered sire).—Messrs. Carr and Co., Clyde Vale Stud, Carluke, N.B.; 2, S. Cliff; 3, Sir Walter Gilbey, Elsenham Hall, Essex.
Hackney filly, foaled in 1903 (by registered sire).—1, Sir Walter Gilbey; 2, J. W. Astley, Nelson, Lancashire; 3, R. P. Evans, Woodhatch House, Reigate.
Hackney filly, foaled in 1904 (by registered sire).—1, R. P. Evans; 2, W. R. Lysaght; 3, T. B. Sykes.

SHIRES.

The "Derby" Challenge Cup, value £50, for the best stallion: Earl Egerton of Tatton.
The "Greenall" Challenge Cup, value £50, for the best mare or filly: Lord Rothschild.
Gold Medal, value £15, for the best mare or filly exhibited in the Shire classes: Earl Egerton of Tatton.
Stallion foaled in or before 1901.—1, Earl Egerton of Tatton; 2, J. Forshaw and Sons, Carlton-on-Trent, Newark; 3, J. W. Kenworthy, Hurst Hall, Ashton-under-Lyne.
Stallion foaled in 1902.—1, Lord Rothschild, Tring Park, Tring, Herts; 2, R. S. Sutton-Nelthorpe, Scawby, Lincoln; 3, J. Gould, Model Farm, Lymm, Cheshire.
Stallion foaled in 1903.—1, Lord Rothschild; 2, J. Gould; 3, A. Grandage, Bramhope, Leeds.
Stallion foaled in 1904.—1, J. Gould; 2, J. W. Kenworthy; 3, R. W. Hudson.
Brood mare foaled in or before 1902, with foal at foot.—1, R. W. Hudson, Dunsfield, Marlow, Bucks; 2, Earl Egerton of Tatton; 3, P. Stubs, Blundellsands, Longhope.
Foal in last class.—1, Sir Oswald Mosley; 2, P. Stubs, Blundellsands, Longhope; 3, R. W. Hudson, Dunsfield, Marlow.
Filly, foaled in 1902.—Lord Rothschild, Tring Park, Tring; 2, J. Gould, Model Farm, Lymm; 3, A. Grandage, Bramhope, Leeds.
Filly, foaled in 1903.—1, T. S. Jay, Warren Farm, Wimbledon; 2, Earl Egerton of Tatton; 3, J. Gould, Model Farm, Lymm.
Filly, foaled in 1904.—1, Earl Egerton of Tatton; 2, J. Hutchence, Catterall Hall, Garstang; 3, R. Hornby, Ribby Hall Farm, Kirkham.

AGRICULTURAL HORSES.

Barren mare, any breed, for draught purposes, foaled in or before 1901.—1, Sir Oswald Mosley, Rolleston Hall, Burton-on-Trent; 2, A. Grandage, Bramhope, Leeds; 3, Earl Egerton of Tatton.
Gelding, any breed, foaled in or before 1901.—1 and 3, A. C. Sparkes, Oldfield, Altrincham; 2, Liverpool Corporation.

RIDING AND DRIVING CLASSES.

Hack mare or gelding, foaled in or before 1901, and over 15 hands.—1, W. B. Tubbs, The Paddocks, Mill Hill, London, N.W.; 2, T. B. Sykes, 13, Huskisson Street, Liverpool; 3, J. Kerr, M.P., Gaddesden Place, Hemel Hempstead.
Harness pair of geldings or mares or gelding and mare, any height.—1, W. S. Cunard, Hawthorn Hill, Bracknell; 2, J. Kerr, M.P., Gaddesden Place, Hemel Hempstead; 3, W. E Inman, Westfield Lodge, Huddersfield.
Harness pony, mare, or gelding, over 12 hands 2 in., and not exceeding 14 hands.—W. S. Cunard, Hawthorn Hill, Bracknell; 2, C. Clark, Bothomes Hall, Whalley Bridge; 3, W. Ferguson, Prestbury Stud, Macclesfield
Hack mare or gelding, over 14 and not exceeding 15 hands.—1, W. J. Milton, Castle Hotel, 131, Chester Street, Birkenhead; 2, J. H. Peck and Co., Ltd., 26, Vauxhall Road, Liverpool
Harness cob, mare, or gelding, over 14 and not exceeding 15 hands.—1, J. S. Sykes, 13, Huskisson Street, Liverpool; 2, J. H. Ainsworth and Sons, 26, Great George Road, Waterloo, Liverpool; 3, W. J. Milton, Castle Hotel, 131, Chester Street, Birkenhead.

SHEEP.

SHROPSHIRE.

Shearling ram.—1, R. P. Cooper, Shenstone Court, Lichfield; 2, Victor Cavendish, M.P., Holker Hall; 3, J. W. Kenworthy, Hurst Hall, Ashton-under-Lyne
Shearling ewes.—R. P. Cooper; 2, F. Bell, Norley Hall, Cheshire; 3, J. W. Kenworthy.
Ram lamb—1, R. P. Cooper; 2 and 3, Victor Cavendish, M.P.
Ewe lambs.—1, Victor Cavendish, M.P.; 2, R. P. Cooper; 3, F. Bell.

OXFORD DOWN.

Shearling ram.—1, E. Gibson Heslop, Langton, Gainford, near Darlington; 2 and 3, H. L. Storey, Bailrigg, Lancaster.
Shearling ewes.—1, Miss Alice de Rothschild, Waddesdon Manor, Aylesbury; 2 and 3, E. Gibson Heslop.
Ram lamb.—1 and 2, H. L. Storey; 3, E. Gibson Heslop.

WENSLEYDALE.

Ram (two-shear or over).—1 and 2, Lord Henry Bentinck, M.P., Underley Hall, Kirkby Lonsdale.
Shearling ram.—1 and 2, Executors of the late T. Willis, Manor House, Carperby, Aysgarth Station, R.S.O., Yorkshire; 3, Lord Henry Bentinck, M.P.
Shearling ewes.—1, Executors of the late T. Willis; 2 and 3, Lord Henry Bentinck, M.P.
Ram lamb.—Executors of the late T. Willis.
Ewe lamb.—1 and 2, Lord Henry Bentinck, M.P.

HERDWICK.

Shearling ram.—1, W. J. Crossley, Pullwoods, Ambleside; 2 and 3, J. Rothery, Waasdale Head Hall, Gosforth S.O., Cumberland.
Shearling ewes. — 1, W. J. Crossley; 2, J. Todd, Roughholme, Bootle, Cumberland; 3, J. Rothery
Ram lamb.—1, J. Todd; 2, W. J. Crossley; 3, J. Rothery.
Ewe lamb.—1, J. Todd; 2, W. J. Crossley; 3, J. Rothery.

LONK.

Shearling ram.—1, D. Hague, Spread Eagle, Whalley; 2, J. Hague, Spread Eagle, Whalley; 3, J. Akrigg, Moorcock Inn, Walsden.
Shearling ewes.—1, D. Hague; 2, J. Blackburn, Deerplay Inn, Bacup; 3, J. Akrigg.
Ram Lamb.—1 and 2, D. Hague; 3, R. H. Crabtree, Hey Fold, Foulridge, near Colne.

PIGS.

The British Berkshire Society's Silver Challenge Trophy for the best Berkshire pig.—P. J. Jefferson.
Silver Cup, value £5 5s. for the best Large or Middle White pig.—Sir Gilbert Greenall, Bart.
Gold Medal, value £3 3s., for the best animal in the Large White classes.—Sir Gilbert Greenall, Bart.
Gold Medal, value £3 3s., for the best animal in the Middle White classes.—Sir Gilbert Greenall, Bart.
Piece of Plate, value £5, for the best animal in the Tamworth classes, under twelve months old.—R. Ibbotson.
Gold Medal, value £3 3s., for the best animal in the Tamworth classes.—R. Ibbotson.

LARGE WHITES.

Boar, farrowed previous to 1904.—1, The Earl of Ellesmere, Worsley Hall, Manchester; 2, Sir G. Greenall, Bart., Walton Hall, Warrington; 3, R. R. Rothwell, Fulwood Hall, Fulwood, Preston.
Boar, farrowed in 1904.—1 and 2, Sir G. Greenall, Bart.; 3, the Earl of Ellesmere.
Boar, farrowed in 1905.—1, The Earl of Ellesmere; 2, D. R. Daybell, Bottesford, Nottingham; 3, T. Simpson Jay, Warren Farm, Wimbledon.
Sow, farrowed previous to 1904.—1 and 2, Sir G. Greenall, Bart.; 3, the Earl of Ellesmere.
Sow, farrowed in 1904.—1 and 2, Sir G. Greenall, Bart.; 3, R. R. Rothwell, Fulwood Hall Farm, Fulwood.
Sow, farrowed in 1905.—1, 2, and 3, the Earl of Ellesmere.

MIDDLE WHITES.

Boar, farrowed previous to 1905.—1, 2, and 3, Sir G. Greenall, Bart.
Boar, farrowed in 1905.—1, Sir G. Greenall, Bart.; 2, T. Simpson Jay; 3, L. C. Paget, Harewood, Leeds.
Sow, farrowed previous to 1905.—1, L. C. Paget; 2, Sir G. Greenall; 3, Sanders Spencer and Son, Holywell Manor, St Ives, Hunts.
Sow, farrowed in 1905.—1 and 2, T. Simpson Jay; 3, Sanders Spencer and Son.
Large or Middle White sow and litter of pigs, under eight weeks old.—1, Sir G. Greenall, Bart.; 2 and 3, the Earl of Ellesmere.

BERKSHIRE.

Boar, above nine months old.—1, J. Jefferson, Peel Hall, Chester; 2, Lord Calthorpe, Elvetham Park, Winchfield, Hants; 3, the Duchess of Devonshire, Compton Place, Eastbourne.
Boar, not exceeding nine months old.—1 and 2, Duchess of Devonshire; 3, J. Jefferson.
Sow, farrowed previous to 1905.—1, Duchess of Devonshire; 2, Lord Calthorpe; 3, J. Jefferson.
Sow, farrowed in 1905.—1, J. Jefferson; 2, Duchess of Devonshire; 3, Lord Calthorpe.

TAMWORTH.

Boar, farrowed previous to 1905.—1, R. Ibbotson, The Hawthorns, Knowle, Warwickshire; 2, D. W. Philip, The Ashes, Whitacre, Birmingham; 3, H. C. Stephens, Cholderton, Salisbury.
Boar, farrowed in 1905.—1, R. Ibbotson; 2 and 3, A. C. Stephens.
Sow, farrowed previous to 1905.—1, R. Ibbotson; 2, D. W. Philip; 3, H. C. Stephens.
Sow, farrowed in 1905.—1, R. Ibbotson; 2 and 3, H. C. Stephens.

LARGE BLACKS.

Boar, farrowed in 1903 or 1904.—1, C. F. Marriner, Thorpe Hall, Hasketon, Woodbridge; 2, K. M. Clark, Sudbourne Hall, Oxford, Suffolk; 3, J. Jefferson.
Boar, farrowed in 1905.—1 and 2, C. F. Marriner; 3, K. M. Clark.
Sow, farrowed in 1901 to 1904.—1, C. F. Marriner; 2, G. Pedley, The Lowe Farm, Buglawton, Congleton; 3, R. R. Rothwell.

SHOWS IN BRIEF.

Shirley Horse.

The twelfth annual show of the Shirley Horse Show Society, held on Monday, was for once in a way favoured with fine weather, and consequently a larger attendance of visitors, and there was much to interest them for a record entry was received, 220 animals being forward, and the quality was all round good. Agricultural horses made a nice display, all the classes being well filled, and some notable animals were forward. The chief winner was Mr. F. E. Muntz, he carrying off the whole of the first prizes and the majority of the seconds. The classes for hunters were also well patronised, and the competition, generally speaking, was keen. The jumping classes were well filled, but there was a poor entry in the local coach class, and also in the open pair-horse class. There was also a falling off in the entries in regard to tradesmen's turnouts, the cause being generally put down to the prevailing bad trade.

Wellington Farmers' Club.

Brilliant weather, a large number of entries, and a good attendance favoured the annual exhibition held under the auspices of this club at which some of the best animals seen at many of the agricultural exhibitions in the Midlands were forward. The champion prize to the winner of the greatest number of points at the show in horses, cattle, and sheep classes, was again secured by Mr. R. H. Gwynne, of Haygate, and the Shire Horse Society's cup and medal were awarded to Mr. J. M. Belcher. The dairy produce and poultry classes were well filled, and competition was much keener than at previous shows promoted by the Society. An interesting feature of the Society's work is the encouragement given to long service on the part of agricultural labourers, and this year prizes were given to eighty servants, whose total years of service were 2,553, or an average of thirty-one years eleven months. No less than twenty had seen between forty and fifty years of service, and one had been in one employment for fifty-nine years, and another for fifty-eight years.

Harrogate.

For their fourth annual show, the Harrogate and District Agricultural Society offered about £500 in prizes, and this liberal sum drew 336 entries, a slight falling off compared with previous years, but the sections all round were well supported, and the quality was high. Hackneys were a splendid display, and the heavy horses were not far behind them as regards merit, whilst of hunters it may be said they were a credit to the district, though one would have liked to have seen more than were forward. Mr. Harrison, of Gansford Hall, known the country over for his Shorthorns, sent a number of splendid animals, thus making the section a worthy one, and we may add he won with everything he showed, taking precedence in the young bull class with Royal Ensign, by Royal Edward—Rosetta; in the two-year old bull class with Pioneer, which also gained a special prize; in the heifer class with Waterloo Princess, in the two-year old heifer class with Dalmeny Veronica, and in the older female class with Ursula Raglan. The only other first prize takers were the President of the Society (Mr. Henry Williams), whose Waterloo Princess II. headed the yearling heifers, and Mr T. R. D. Wright, who showed the winning bull calf in Lord Raglan, a son of Brigadier and Louise Raglan. Of sheep there was a nice display, the feature of the department being the Wensleydales and crossbreds, whilst other interesting features of a good show were satisfactory displays of pigs, poultry, butter, and eggs.

The Welsh National at Aberystwyth.

That the establishment of the Welsh National Agricultural Society, to use an old phrase, "supplied a long-felt want" was quite evident from the success which attended the second annual show held at Aberystwyth on Tuesday and Wednesday last, and, although only in its infancy, the show has already become to the Principality what the Royal is to England and the Highland to Scotland. The Welsh farmer has readily tumbled to the fact that the show is one worthy of his support, and to his own as well as to the general farmer's interest, and he is therefore giving the Society his whole-hearted support. This is shown by the fact that something like 50 per cent. of the exhibits at this show came from the tenant farmer's class from all parts of Wales, every county in Wales and Monmouth being represented by exhibits from tenant farmers. This is very encouraging, and should do much to improve the farmers' stock.

The Society offered the handsome sum of £1,200 in prizes, besides numerous specials, and this liberality attracted, as it deserved, a most satisfactory entry, the total showing an increase on last year's, whilst there was a better entry in nearly every section, the only decline being in ponies and cobs, which were five fewer than in 1904. The respective figures were as follows:—

	1905.	1904.
Shire horses	56	45
Hunters	19	19
Hackneys	36	31
Ponies and cobs	96	111
Shorthorns	69	—
Welsh Black Cattle	79	56
Herefords	48	29
Sheep	140	117

In addition, there were good displays of butter, cheese, etc. As to the quality of the exhibits, this was, generally speaking, of a high order, and the opinion was freely expressed that the show was a great improvement on the initial venture, and gave promise of becoming a large and important fixture, worthy and representative of Wales. A word as to the attendance of visitors may be added, for this is an important item in the success of a show. The weather was showery on the first day, but beautifully fine on the second, and on both days the number of people who passed the turnstiles was most satisfactory, close on 10,000 visitors paying for admission during the two days.

We append a list of the prizes so that in our description of the various sections we need not go into the details of all the awards, but generally summarise the sections as a whole. First of all came the Shire horses, and of these there was a large and representative display; and, to the satisfaction of home breeders, Montgomeryshire exhibitors came out well in the competition, which in some classes was particularly keen. Stallions and mares were equally good, but the pick of the section was the fillies, who made a really excellent show. There were four classes for hunters, but they were by no means well patronised, there being only eight mares or geldings foaled in 1902, half a dozen brood mares with foal at foot, two fillies or geldings foaled in 1902, and three foaled in 1903. This was disappointing, for in addition to the class prizes no fewer than six specials were offered in the section. Hackneys made a much better show in every respect, the stallion class in particular being a very fine one. The cobs and ponies were in strong force, but the opinion was expressed that they have not made the progress they should have done.

In the cattle section the feature was, of course, the classes for Welsh Blacks, and they made one of the best shows of the breed ever seen; in fact, the judge, Mr. York, said they were the best collection he had ever seen together in a showyard. All the bulls were good, and the cows were also a fine lot. Of course, there was considerable difference in type, some being large and what might be described as coarse, and others were small, fine animals. The judge's difficulty came in discriminating between these two types, of both of which there were some excellent specimens.

Shorthorns suffered somewhat from the show being so close to that of the Royal Lancashire Agricultural Society; but, nevertheless, they made a most creditable display; whilst of Herefords nothing but praise can be said, for they made indeed a magnificent collection, and the lot of the judge who made the awards was by no means an envious one, but his awards gave general satisfaction.

Mr. W. E. Williams, Gwerclas, Corwen, who judged the Welsh sheep, said he had never stood over a better lot of sheep, and he had been judging at a good many shows during the last few years. There were six classes, and in none of these were there less than nine entries. Some idea of the judge's difficult task may be gathered from the fact that he was occupied four hours in selecting the winners. In the class for Welsh mountain ram, any age, the decision at the Royal show was reversed, Mr. Owen Price, Nantyrharn, being placed first and Messrs. Gratton, Abergele, second, and there seemed to be a consensus of opinion that this was the correct award.

Pigs, though not particularly numerous, were a nice lot, whilst other sections included displays of butter, cheese, and implements.

In pursuance of the original arrangement that the show should be held for the first three years at Aberystwyth in order that it should be put on a sound foundation, next year's show, which will be the third year of the society's existence, will be held at the same place; but there seems to be a strong feeling amongst the members of the council in favour of making the show a migratory one, but the matter is one which will, of course, have to be decided by the members of the society as a whole. At the council meeting held during the show the matter was discussed, but no resolution was passed. There is but little doubt, however, that the show will not always be held at Aberystwyth, which certainly has some drawbacks in the matter of accessibility.

Judges.

HORSES.—Shires: Mr. Bonnar Barling, Bollitree, Ross-on-Wye. Hunters: Mr. R. H. Harris, M.F.H., The Croft, St. Clears, Carmarthen. Hackneys: Mr. Alexander Morton, Gowan Bank, Darvel, Ayrshire. Ponies and Cobs: Mr. W. Forrester Addie, Powis Castle Park, Welshpool. Welsh Mountain Ponies: Mr. D. Rees, Brynbedw, Taylorstown. Harness Classes: Messrs. W. Forrester Addie and Alexander Morton.

CATTLE.—Shorthorns: Mr. Walter Crosland, Buscot Park, Faringdon. Welsh Black: Mr. John Chambers, Holdenby, Northampton. Herefords: Mr. Francis Evans, Bredwardine, Hereford.

SHEEP.—Other than Welsh or Kerry Hill: Mr. Thomas Ewart, Dunsmore, Rugby. Kerry Hill Sheep: Mr. Richard Morgan, Bahaillon, Newtown. Welsh Mountain: Mr. Williams, Gwerclas, Corwen.

PIGS.—Mr. T. S. Minton, Montford, Shrewsbury.

PRIZE LIST.

Horses.

SHIRES.

Stallion, any age: 1, Mr. W. F. S. Humphreys, The Gaer, Forden, Welshpool (Hendre Baronet); 2, Mr. E. Green, The Moors, Welshpool (Moors Waggoner); 3, Mr. T. Green, Bank, Pool Quay, Welshpool (Nil Desperandum); r., Mr. J. Lewis, Trwstllewelyn, Garthmyl, Mont. (Arrowside Duke); h.c., The South Rheidol Shire Horse Society, Cambrian Chambers, Aberystwyth.

Stallion, foaled in 1903: 1, Messrs. E. Jones and Sons, The Bank, Pool Quay (Marble Arch); 2 and 3, Mr. E. Green (Moors Harold and Moors Chief); r., Mr. T. Green (Jack Tar); h.c., Mr. F. Lloyd, Eaton House, Wrexham (Eyton Drayman).

Brood mare, any age, and foal at foot: 1, Mr. W. F. S. Humphreys (Darby II.); 2, Messrs. E. Jones and Sons (Queen Bertha); 3, Mr. P. Coats, Sheepcote, Clifford, Herefordshire (Clifford Duchess); r., Mr. I. Jones, Cefnllwynpiod, Llanilar (Ilar Violet).

Special prize for the best exhibit, owned by a bona-fide farmer or occupier making his living by farming in Wales: 1, Mr. W. F. S. Humphreys (Darby II.); r., Mr. E. Jones and Sons (Queen Bertha).

Special prize for the best exhibit in the previous Class 3, owned by a bona-fide farmer or occupier making his living by farming within the Union of Aberystwyth: 1, Mr. I. Jones (Ilar Violet); r., Mr. W. Richards (Reginald Bonny).

Mare, foaled prior to 1902: 1, Sir Alex. Henderson, Bart., M.P., Buscot Park, Faringdon (Argent); 2, Mr. T. Green (Childwick Moss Rose); 3, Mr. P. Coats (Duchess of York); r., Mr. J. W. Phillips, M.P. (West Riding Bute).

Mare, foaled in 1902: 1, Sir A. Henderson (Ivy Fashrion); 2, Mr. J. Lewis (Severn Belle); 3, Mr. P. Coats (Clifford Dinah); r., Mr. J. W. Phillips (Bodenham Lady).

Filly, foaled in 1903: 1, Messrs. E. Jones and Sons (Princess Bertha); 2, Mr. E. Green (Willaston Countess); 3 and r., the Earl of Powis, Welshpool (Welsh Girl and Nelly Grey); h.c., Mr. J. Lewis (Severn Princess); c., Mr. H. Lloyd (Eyton Starlight).

Filly, foaled in 1904: 1, Sir A. Henderson (Buscot Fantasy); 2, Mr. W. F. S. Humphreys (Garthmyl May); 3, Mr. E. Green (Moors Starlight); r., Mr. J. W. Phillips (Lydstep Bloom); h.c., Mr. P. Coats (Clifford Kelpie).

Colt, foaled in 1904: 1, Mr. J. Lewis (Severn Melton); 2, Mr. S. Jones, Penygraig, Llanfarian (Ystwyth Triumph).

Special prize of £3 3s. given for the best Shire filly or colt, owned by a bona fide tenant farmer or occupier making his living by farming in Wales: 1, Messrs. E. Jones and Sons (Princess Bertha).

The Bodnant Silver Challenge Cup, given for the best Shire mare or gelding, any age, in above classes (conditions as in previous special): 1, Mr. W. Jones (Lockinge Perfection).

Shire Horse Society's gold medal, for the best Shire mare or filly exhibited in the above classes: 1, Mr. W. F. S. Humphreys (Darby II.).

HUNTERS.

Brood mare and foal at foot: 1, Mr. J. W. Phillips (Utilist); 2, Mr. J. H. James Moore, High Ercall Hall, Wellington (Bandy); 3, Mr. W. Till, Tremorgan, Ross, Hereford (Aroma); r., Mr. T. C. Downes, Court House, Richards Castle, Ludlow (Rustic Gem); h.c., Mr. F. S. Morris, Old Hall, Sarn, Newtown (Marjorie).

Special prize of £5 given for the best exhibit in the above class, owned by a bona fide tenant farmer making his living by farming in Wales: 1, Mr. F. S. Morris (Marjorie).

Hunters' Improvement Society's gold medal for the best hunter brood mare: 1, Mr. J. W. Phillips (Utilist); r., Mr. J. H. James Moore (Bandy).

Mare or gelding: 1, Mr. W. Till (Satisfaction); 2, Mr. J. W. Phillips (Treffgarne Boy); 3, Mr. J. Williams, Ethinduonisaf, Mydrin, St. Clears (Charlie); r., Mr. H. R. Evans, The Hill, King's Pyon, Woobley, Herefordshire (His Excellence).

Hunter filly or gelding, foaled in 1902: 1, Mrs. Grismond Phillipps, Cwmgwilly, Carmarthen (Balmoral).

Special prize of £5 for the best unbacked exhibit in the previous class, and £2 for the second best, provided they are prize-winners: 1, Mrs. G. Phillipps (Balmoral).

Filly or gelding: 1, Mr. J. Williams (Dinna); 2, Mr. T. Green.

Special prize of £3 3s. for the best exhibit in the two previous classes, owned by a bona-fide tenant farmer or occupier making his living by farming in Wales: 1, Mr. J. Williams (Dinna).

Hunters' Improvement Society's silver medal for the best hunter mare or gelding the property of a member: 1, Mrs. G. Phillipps (Balmoral); r., Mr. W. Till (Satisfaction).

HACKNEYS.

Stallion, any age, over 15 hands: 1, Mr. T. [illegible], Hall Green, Birmingham (Sensation Hackney); 2, Mr. D. Evans, Newcastle Emlyn (Jumbo Junior); 3, Mrs. Ward, Morta, Old Colwyn (Lord Derby); r., Mr. James Davies, M.P., Gregynog, Newtown (Merry Duke); h.c., Messrs. Jenkins, Llanwnnogandd, Llanidloes, Montgomeryshire (Denmark Bright).

Brood mare, any age, 15 hands or over, and foal at foot: 1, the Hon. Mrs. Ward, 2, Mr. A. W. Hickling, Adbolton, Nottingham (Lady Warwick); 3, Mr. C. W. Powell, Brynygog, Tregaron (Cors Bren); r., Mr. S. Davies, Coedpark, Derry Ormond, Lampeter (Linda); h.c., Mr. J. Parry, Glanpath, Aberystwyth (Young Lady Wake).

Special prize of £5 for the best hackney brood mare: 1, Mr. S. Davies (Linda).

Special prize of £2 for the best hackney brood mare owned by a bona fide farmer, etc.: 1, Mr. [illegible] (Polly).

Mare or gelding, foaled in 1902: 1, Mr. D. L. [illegible] (Peter Simmon); 2, Mr. E. D. McNaughten, Milnthorpe, Westmorland (Endora); 3, Messrs. D. Davies and Sons, Newcastle Emlyn (Angel Swell); r., Mr. W. Lewis (Kitty).

Filly or gelding.—1, Messrs. E. R. Owen and Sons (Garthmyl Merry Duchess); 2, Mr. A. W. Hickling (Adbolton Princess); 3, Mr. J. J. Rees, Llwynfortune, Nantcaredig, R.S.O. (Bashful Katie); r., Mr. C. W. Powell, Brynygog, Towyn (Squire); h.c., Mr. W. Richards, Cefnhendre, Aberystwyth (Delham Pat).

Colt or filly, foaled in 1904.—1, Mr. W. Richards; 2, Messrs. Davies and Sons; 3, Mr. H. P. Edwards; h.c., Mr. R. Morgan Jones; r., Mr. T. Price, Llanybyther, R.S.O.

Special prize of £3 3s. for the best exhibit in the previous classes, owned by a bona fide farmer, etc.—1, Mr. W. Richards; r., Messrs. E. R. Owen and Sons.

COBS AND PONIES.

Cob stallion, over 14 hands and not exceeding 15 hands.—1, Mr. T. James, Llechryd, Boncath, R.S.O. (Severn End); 2, Mr. J. Jones, Llandyssul (Guinea Gold); 3, Mr. E. Jones, Manoravon, Llandilo (Confidential); h.c., Mr. D. Jones, Trefedlin, Llanfarian (Edlin Briton).

Stallion, any age, over 13 hands and not exceeding 14 hands.—1, Mr. D. Lloyd Lewis (Cardia Wonder); 2, Mr. W. S. Miller, Brecon (Forest Adbolton); 3, Mr. W. Morgan, Bankymansel, Llanarthney (Lord Mansel Skewbald).

Stallion, over 13.2, and not exceeding 14.2, entered in one of the published volumes of the Welsh Pony and Cob Society's Stud Books.—1, Mr. T. James (Trustful); 2, Mr. R. Alderson, Welshpool (George Horace); 3, Mr. W. Morris, Brecon (Usk Valley Squire).

Stallion, any age, over 12 hands and not exceeding 13 hands.—1, Mr. J. Thomas, Tre'rddol (Klondike); 2, Mr. C. Murless, Wrexham (Prince of Cardiff); 3, Mr. H. Davies, Tymawr, Abergwesin, Garth, R.S.O. (Gwesyn Flyer); r., Mr. S. Davies, Coedpark, Derry Ormond, Lampeter (Prince Nithdale); h.c., Mr. J. Evans, Doleithwen, Caersws (Model King).

Welsh Pony and Cob Society's prizes for the best pony stallion, over 12.2 and not exceeding 13.2, entered in one of the published volumes of the Society's Stud Books.—1, Mr. M. Dugdale (Llwyn True Blue); 2, Mr. S. Morris, Sarn, Newtown (Firebrand); 3, Mr. C. H. Lloyd Edwards (Berkley George); r., Mr. W. S. Miller, Brecon (Forest Goldstone); c., Mr. S. Morris (Mountain Fox).

Welsh Pony and Cob Society's silver medal for the best exhibit in the two previous classes.—1, Mr. T. James (Trustful); r., Mr. C. H. Lloyd Edwards (Berkley George).

Welsh mountain pony stallion, not exceeding 12.2.—1, Mr. E. Jones (Grey Light); 2, Mr. Marshall Dugdale (Llwyn Prince of Wales); 3, Mr. R. Campbell Davys (Mallaen Merry Boy); r., Mr. T. Williams, Llangadock (Brigant); h.c., Mr. R. C. Davys (Mallaen Sirocco).

Pony brood mare.—1, Mr. N. Bennett Owen, Gwernafon, Llanidloes (Glanyrafon); 2, Mr. B. H. Sampson, Pontardulais (Inholmes Princess); 3, Mr. H. P. Edwards (Lady Corsica).

Pony brood mare, with or without foal at foot, over 13.2 and not exceeding 14.2.—1, Mr. J. Owen, Builth Wells, Breconshire; 2, Mr. S. S. James, Ystrad Rhondda, Glamorganshire; 3, Mr. N. Bennett Owen; h.c., Mr. H. P. Edwards; r., Mr. David Davies.

Pony brood mare, any age, over 12.2 and not exceeding 13.2, and foal at foot.—1, Mr. W. Morgan, Llanarthney (Lady Mansel); 2, Mr. W. R. Jones, Llanfihangel, Borth (Lively Girl); 3, Mr. J. Hughes, Garthfawr, Llanilar (Bett); r., Mr. J. Jones (Jenny); h.c., Mr. I. Jones (Bess).

Special prize of £3 for the best exhibit in the previous class, owned by a bona fide tenant farmer, etc.—1, Mr. W. Morgan (Lady Mansel); r., Mr. W. R. Jones (Lively Girl).

A special prize of £2 for the best exhibit in the above special class, owned by a bona fide tenant farmer or occupier making his living by farming within the Union of Aberystwyth.—1, Mr. W. R. Jones (Lively Girl).

Welsh Pony and Cob Society's prize for the best pony brood mare, with or without foal at foot, over 12.2 and not exceeding 13.2, entered in one of the published volumes of the Society's Stud Book.—Mr. Marshall Dugdale.

Pony brood mare, any age, not exceeding 12.2 and foal at foot.—1, Mr. Marshall Dugdale; 2, Messrs. Davies and Sons (Lady Gweneg); 3, Mr. E. Edwards (Llorence); r., Mr. Owen Morris (Bess).

Mountain pony brood mare, not over 12.2 and foal at foot.—1, Mr. D. Davies (Mountain Lass); 2, Mr. W. S. Miller (Queen); 3, Mr. I. Evans (Parke Lass); r., Mr. R. H. Sampson (Merlyn-y-Mynydd); h.c., Mr. W. S. Miller (Young Matchless).

Cob, any age, not exceeding 13 hands, to be ridden in saddle.—1, Mr. W. Foster (Mel Valley Silver Wedding); 2, Mr. J. Edwards (Cefngwyn Hall Prince).

Pony, mare, or gelding, any age, not exceeding 13.2, to be ridden.—1, Mr. W. Foster; 2, Mr. C. W. Jones, Talybont (Bess); 3, Mr. E. J. Williams (Queen Bee); r., Sir Pryse Pryse, Bart. (Lady Mary).

Pony, mare or gelding, any age, not exceeding 13 hands, to be ridden by boys or girls, not exceeding 15 years of age.—1, Mr. W. S. Miller (Fmlyn Midget); 2, Mr. H. P. Edwards (My Honey); 3, Mr. G. Ford (Lord Grey); r., Mr. C. W. Powell (Hafod Lass); h.c., Mr. T. R. Lewis, Ferrum (Queen).

Pony, filly, or gelding, foaled in 1904, to be shown in hand.—1, Mr. E. Jones (Bledwena); 2, Mr. L. O. Williams (Swallow); 3, Mr. D. Bodvel Morgan (Coedmore Lad); r., Mr. J. Roberts, Towyn (Travelling Tom); h.c., Mr. R. C. Davys (Fire Fly).

Pony, filly, or gelding, foaled in 1904, to be shown in hand.—1, Mr. C. W. Powell; 2, Mr. J. Scott; 3, Mr. W. Rowlands; h.c., Mr. Marshall Dugdale; h.c., Mrs. Annie Williams, Frongoch, Glandovey, R.S.O.; h.c., Mr. E. J. Williams; r., Mr. D. L. Jones.

Pony, colt, or filly, foaled in 1904, to be shown in hand.—1, Mr. H. H. Lloyd; 2, Mr. D. Evans; 3, Mr. F. S. Morris; h.c., the Rev. T. Manuel, Aberdare; r., Mr. J. Roberts.

Special prize of £3 given for best pony, colt, filly, or gelding.—1, Mr. J. Scott; r., Mr. W. Rowlands.

Hackney Horse Society's silver medal for best hackney or pony mare, filly or filly foal.—1, Mr. T. Smith (Viscount Hopwood); r., Mr. T. James (Severn End).

HARNESS CLASSES.

Farmer's turn-out, confined to the Union of Aberystwyth.—1, Mr. W. R. Jones (Lively Girl); 2, Mr. H. P. Edwards; 3, Mr. E. M. Jones; h.c., Mr. Wm. Jones (Lady Cleveland).

Exhibit in single harness, not exceeding 12.2 hands.—1, Mr. E. Jones (Greylight); 2, Mr. W. Foster (Mel Valley Silver Wedding); 3, Mr. J. M. Dugdale (Llwyn Nell); r., Mr. C. W. Powell; c., Mr. L. R. Lewis; h.c., Mr. G. Ford.

Exhibit in single harness, not exceeding 14 hands.—1, Mr. W. Foster (Mel Valley Treasure); 2, Mr. W. S. Miller (Forest Adbottom); 3, Messrs. E. R. Owen and Son; h.c., Mr. W. R. Jones.

Hackney mare or gelding, in harness, any age, over 15 hands.—1, Mr. A. E. Evans, Bronwylfa, Wrexham (Princess 15065); 2, Mr. D. Evans; 3, Mr. R. Falkener, Bwlch, Abergwili, Carmarthenshire (Amman Empress); r., Mr. E. Jones.

Cattle.

SHORTHORNS.

Bull, two years old or over.—1, Mr. R. Stratton, Newport, Mon. (Great Mogul); 2, Mr. R. P. Cooper, Lichfield (Meteor); 3, The Earl of Powis, Welshpool (Alastair); h.c., Mr. J. A. Brown, Tarporley, Cheshire (Micklethwaite Warrior 2nd).

Bull, above one and under two years old.—1, Mr. J. E. Footman, Hafodwen, Carmarthen (Towy Cashier); 2, Mr. R. P. Cooper (Shenstone St. Clair); 3, Mr. J. A. Brown, Tarporley, Cheshire (Excelsior); r., The Earl of Powis (Baron Kendal); h.c., Sir A. C. Stepney, Bart., Llanelly (Prince of Latton 8th).

Bull calf, not exceeding twelve months.—1 and 2, The Earl of Powis (Alastair 2nd and Handicrof); 3, Mr. J. E. Footman, Carmarthen (Towy Spectre); r., Sir A. C. Stepney (Fitz Augustus).

Special prize of £5 for the best exhibit in the above three classes, owned by a bona-fide tenant farmer or occupier making his living by farming in Wales.—1, Mr. D. Evans (Pitlivie Governor); r., Mr. J. E. Footman (Towy Cashier).

Special prize of £5 for the best exhibit in the above three classes, owned by a bona-fide tenant farmer or occupier making his living by farming in the county of Cardiganshire.—1, Mr. D. Morgan (Towy Combination); r., Mr. T. Lewis (Telegram).

Shorthorn Society's champion prize of £10 for the best Shorthorn bull exhibited, entered in or eligible for Coates' Herd Book.—1, Mr. R. Stratton (Great Mogul); r., Mr. R. P. Cooper (Meteor).

Cow, in calf or in milk.—1, The Earl of Powis (Lady Sybil); 2 and 3, Lord Tredegar (Ruby 20th and Rosaline 2nd); h.c., Sir A. C. Stepney (Challenge).

Two-year-old heifer.—1 and 2, Lord Tredegar (Tulip 20th and Lady Llangibby); 3, Mr. J. Lloyd Morgan Rhiwfelin, Carmarthen (White Heather); r., Mr. R. P. Cooper (Ada 3rd); h.c., Mr. D. Rees, Tynpark, Borth (Tulip).

Special prize for the best exhibit in classes 39 and 40, owned by a bona-fide tenant farmer or occupier making his living by farming in Wales.—1 and 2, Mr. J. Morgan (White Heather and Lady of the Valley).

Yearling heifer.—1, Earl of Powis (Welsh Maid); 2, Mr. R. P. Cooper (Aldboro' Missil 2nd); 3, Mr. W. A. H. Bass, Burton-on-Trent (Whitewall Anna); h.c., Capt. D. H. Mytton, Garth, Welshpool (Sample).

Heifer calf, not exceeding twelve months old.—1, Mr. R. C. Cooper (Shenstone Superb 4th); 2, Earl of Powis (Lady Augusta); 3, Major J. J. Bonsall, Fronfraith, Aberystwyth (Nonpareil Lady 5th); c., Mr. E. Lewis (Apricot) and Mr. D. Morgan, Crosswood (Fair Ellen); h.c., Sir A. C. Stepney (Truth) and Lord Tredegar (Tredegar Grace Lass).

Special prize of £5 given for the best exhibit in the two previous classes, owned by a bona-fide tenant farmer or occupier making his living by farming in Wales.—Mr. J. Lloyd-Morgan (Lady Hamilton).

WELSH BLACKS.

Bull, two years old or over.—1, Lord Stanley of Alderley, Penrhos, Holyhead (Ap Klondike); 2, Mr. J. Scourfield, Blaenwernddu (Whitland Lloffwr); 3, Mrs. Wynne, Bettws-y-Coed (Cramp); h.c., Lord Harlech, The Glyn, Talsarnau (Tudor).

Bull, above one and under two years old.—1, Mr. J. Owen, Llwynderw, Whitland (Derw Boy); 2, Mr. R. W. Pritchard, Coedmarion, Carnarvon (Marion Prince 3rd); 3, The University College of Wales, Aberystwyth (King of the Blacks); c., Mr. J. Roberts (Marion Idwal); c., Mr. R. M. Greaves (Wern Defender); h.c., Mr. R. Thomas, Great Pale, Whitland (Prince Arthur).

Bull calf, not exceeding twelve months old.—1, Mr. T. Roberts (Berw Aber); 2, Mr. J. B. Owen (Cadfridog); 3, Mr. J. J. Davies (Cardi); h.c., Mr. J. B. Owen (Brython).

The Ysguborwen challenge cup, value £25, for the best Welsh Black bull.—Lord Stanley (Ap Klondike).

Special prize of £5 for the best Welsh Black bull owned by a bona fide tenant farmer or occupier making his living by farming in Wales.—1, Mr. J. Owen (Derw Boy).

Steer, any age.—1, Mr. R. Roberts, Bronygadair (Jack); 2, Mr. R. M. Greaves (Twrch); 3, Mr. D. Jones (Twm Shon Catti); r., Mr. Owen Morris.

Special prize of £5 given for the best Steer owned by a bona-fide tenant farmer or occupier making his living by farming in Wales.—1, Mr. D. Jones (Twm Shon Catti).

Cow, in calf or milk.—1, Mr. R. M. Greaves; 2, Mr. W. Jones (Llwyngwyn Lass); 3 and r., Mr. J. B. Owen (Blodwen and Brythones); h.c., Mr. R. M. Greaves and Mr. O. Parry Jones.

Two-year-old heifer.—1, Mr. W. Jones; 2, Mr. R. M. Greaves; 3, Mr. J. Roberts; h.c., Mr. R. W. Pritchard (Marion Blodwen).

Special prize of £5 given for the best cow or heifer in two previous classes.—1, Mr. W. Jones (Llwyngwyn Lass).

Yearling heifer.—1, Mr. R. M. Greaves; 2, Mr. J. W. Griffiths, Penally; 3, Mr. T. Roberts, Aber, Bangor; h.c., Mr. R. W. Pritchard (Marion Queen); h.c., Mr. R. Thomas, Whitland.

Heifer calf, not exceeding 12 months old: 1, Mr. R. Thomas; 2, Mr. T. Roberts (Gelliwan VI.); 3 and h.c., Mr. O. Parry Jones (Plas Abel and Plas Kitty); r. and h.c., Mr. J. Scourfield, Blaenwernddu, Whitland (Gwennie).

HEREFORDS.

Three years old or over: 1, Mr. P. Coates (Evedale); 2, Mr. C. T. Pulley, Lower Eaton, Hereford (Eaton Champion); 3, Mr. G. D. Faber, M.P., Wallingford, Berks (Prime Minister); r., Mr. T. Jones, Kerry (Prince Richard II.).

Two-year-old bull: 1, Capt. E. L. A. Heygate, Buckland, Leominster (Primate); 2, Sir J. R. G. Cotterell, Bart. (Priam); 3, Mr. P. Coates (Golden Valley).

Bull, calved in 1904: 1 and h.c., Capt. E. L. A. Heygate (Coronet and Cameronian); 2, Mr. A. P. Turner, Pembridge (Antonio); 3 and c., Mr. A. E. Hughes (Premier and Pearl King); r., Mr. Lawton Moore, Brampton Brian, Herefordshire (Brampton Banner); c., Mr. J. Smith, Monkton, Hereford (Forest Lad); Sir J. R. G. Cotterell (Rameses 2nd).

Bull calf, not exceeding 12 months old: 1, Mr. H. R. Hall, Orleton (Vendale); 2, Mr. Lawton Moore (Brampton Bonaza); 3, Mr. W. M. Price (Briton); r., Mr. W. H. Davies (Obelisk); c., Mr. W. M. Price (Breconshire).

Special prize given for the best exhibit in the above four classes, owned by a bona-fide tenant farmer or occupier making his living by farming in Wales: 1, Mr. T. Jones (Prince Richard II.); r., Mr. W. M. Price (Briton).

Cow in calf or milk: 1, Mr. W. M. Price, Great Weston (Spangle 5th); 2, Mr. P. Coates (Pearl 15th); 3, Mr. G. D. Faber (Ivy Lass); r., Mr. W. M. Price (Primrose 3rd).

Two-year-old heifer: 1, Mr. A. E. Hughes (Ivington Plum); 2, Mr. J. R. Hill (Western Star); 3, Mrs. Hamlen Williams, Hereford (Vega); r., Mr. P. Coates (Dewy May).

and Kirsty).

Special prize of £5 given for the best exhibit in the two previous classes, owned by a bona-fide tenant farmer: 1, Mr. D. Pryce (Spangle 5th); r., Mr. W. M. Pryce (Primrose 3rd).

Yearling heifer: 1, Mr. C. T. Pulley, Lower Eaton (Ashleaf 3rd); 2, Mr. Lawton Moore (Brampton Agnes); 3, Mr. P. Coates (Pearl); r., Mr. J. Smith (Ashleaf 3rd); h.c., etc., Mr. D. Pryce (Claribel and Noblesse); Mr. A. G. Montford, Churchstroke (Mime); Mr. W. H. Davies (Longsides).

Heifer calf, not exceeding 12 months old: 1, Mr. W. M. Price (Bella).

Special prize of £5 given for the best exhibit in the two previous classes, owned by a bona-fide tenant farmer, etc.: 1 and r., Mr. D. Pryce (Noblesse and Claribel).

Sheep.

ANY PURE BREED, EXCEPT WELSH MOUNTAIN AND KERRY HILL SHEEP.

Ram, of any age: 1, Mr. P. Lichfield; 2, Mr. J. Rees, Llanybyther (Heredity); 3, Mr. D. Morgan, Crosswood (Crosswood Swell); r., Mr. W. H. Davies, Hereford (Monark).

Pen of three ewes: 1, Mr. R. Cooper; 2, Mr. R. Williams, Anglesey; 3, Mr. W. H. Davies; r., Mr. J. Thomas, Llanfallteg; h.c., Mr. A. N. Henderson, Lutterworth.

Yearling ram: 1, Mr R. P. Cooper; 2, Mr. J. Thomas (Norton Bay); 3, Mr. J. Rees (Perhaps); r., Mr. A. N. Henderson; c., Mr. R. Williams (Manchester Guardian 3rd).

Pen of three yearling ewes: 1, Mr. R. P. Cooper; 2, Mr. J. Rees; 3, Mr. D. Price; r., Mr. W. H. Davies.

Ram lamb: 1 and 2, Mr. R. P. Cooper; 3, Mr. J. Rees (Radium); r., Mr. R. Williams (Sherlowe Gem 3rd); h.c., Mr. D. Pryce.

Pen of three ewe lambs: 1, Mr. R. P. Cooper; 2, Mr. J. Rees; 3, Mr. D. Price; r., Mr. W. H. Dayes; h.c., Mr. R. Williams.

Special prize of £2 for the best exhibit in the first three sheep classes, owned by a bona-fide tenant farmer, etc.: 1, Mr D. Morgan (Crosswood Swell).

Special prize of £2 for the best exhibit in the ewe classes, owned by a tenant farmer, etc.: 1, Mr. R. Williams; r., Mr. J. Rees.

Shropshire Sheep Breeders' Association and Flock-Book Society's gold medal to the exhibitor winning the greatest number of points for prizes won by the Shropshire sheep in the above classes: 1, Mr. R. P. Cooper.

Special prize of £5 5s. for the best Shropshire yearling ram exhibited in class 57: 1, Mr. R. P. Cooper.

Special prize of £5 5s. for the best three yearling Shropshire ewes exhibited in Class 57: 1, Mr. R. P. Cooper.

KERRY HILL.

Ram, of any age: 1, Mr. J. R. Bache, Knighton (Ragdon Adamant); 2, Mr. T. Jones, Gwernybuarth, Llandyssil (Heirloom); 3 and h.c., Mr. Lawton Moore (Brampton Dictator and Brampton Challenger); v.h.c., Messrs. G. B. Price and Sons, Leintwardine, R.S.O. (Bahaillon Chancellor); h.c., Messrs. J. and R. Phillips, Llwynybrain, Caersws (Llwynybrain Speckleface); c., Mr. J. R. Bache (Bahaillon Defiance); and Mr. P. Coates (Up-to-date).

Pen of three ewes: 1 and 3, Mr. J. Venables, Pengelly, Kerry; 2, Mr. T. E. Kinsey, Maesmawr, Caersws; h.c., Messrs. J. and R. Phillips; c., Mr. J. C Jones.

Yearling ram: 1, Mr T. E. Kinsey (Marker); 2 and h.c., Messrs. Phillips (Carnedd and King George); 3, Mr. Lawton Moore (Brampton Emblem); h.c., Mr. W. Alderson (Bahaillon Elevator).

Pen of three yearling ewes: 1, Mr. J. Venables; 2, Messrs. J. and R. Phillips; 3, Mr. Lawton Moore.

Ram lamb: 1, Mr. Phillips (Carnedd Edward VII.); 2, Messrs. J. and R. Phillips (Llwynybrain National A1); 3, Mr. P. Coates; v.h.c., Mr. T. E. Kinsey (Meditation).

Pen of three ewe lambs: 1, Mrs. Phillips, Carnedd, Caersws; 2, Mr. J. C. Jones, Llanfair; 3, Mr. T. E. Kinsey; v.h.c., Mr. P. Coates.

Special prize of £2 for the best exhibit in the three previous ram classes, owned by a bona-fide tenant farmer, etc.: 1, Mr. J. R. Bache (Ragdon Adamant).

Special prize of £2 for the best exhibit in three previous ewe classes, owned by a bona-fide tenant farmer, etc.: 1, Mr. J. Venables.

"RATIONAL PIG-KEEPING."

If you wish to learn all about Pig-Keeping, and have the subject analysed and placed before you in simple language, read this book. You can readily obtain all the information you require. *Beautifully Illustrated.*

Arranged in ten sections, each with many sub-sections.

1, Essex Street, Strand, W.C.

PRICE ONE SHILLING.
BY POST, 1/3.

Bound in cloth and gold lettering, 2/-; by post, 2/3.

Kerry Hill Flock-Book Society's Challenge Cup for the best male exhibited in above classes: 1, Mr. J. R. Bache (Ragdon Adamant).

Challenge Cup, value £5 5s., for best three females exhibited in the above classes: 1, Mr. J. Venables.

WELSH MOUNTAIN.

Ram, any age: 1, Mr. Owen Price (Twm-or-Nant 2nd); 2, Messrs. Gratton, Abergele (Hero); 3 and h.c., Mr. W. Conwy Bell, Brynffynon, Rhuddlan; r., Mr. W. Morgan (King of Hero); c., Mr. E. Mirris.

Pen of three ewes: 1, Messrs. Gratton; 2, Mr. W. Conwy Bell; 3, Messrs. Gratton; r., Mr. H. O. Ellis; h.c., Mr. R. W. Pritchard.

Yearling ram: 1, Mrs. Wynne Finch (Tim); 2 and 3, Mr. W. Conwy Bell; r., Mr. Owen Price (Tywysog); h.c., Mr. J. Marshall Dugdale (Llwyn Fancy); c., Mr. T. Jones (Robinson).

Pen of three yearling ewes: 1, Mr. J. Marshall Dugdale; 2, Messrs. Gratton; 3, Mr. W. Conwy Bell; h.c., Mr. H. O. Ellis; c., Mr. J. Jones, Corwen.

Ram lamb: 1, Mr. W. Conwy Bell; 2, Mr. J. Marshall Dugdale; 3 and c., Messrs. Gratton; r., Mr. H. O. Ellis (Moelwr Bach); h.c., Mr. R. W. Pritchard.

Pen of three ewe lambs: 1, Mr W. Conwy Bell; 2, Messrs. Gratton; 3 and h.c., Mr. Owen Price; r., Mr. W. Pritchard.

Special prize of £2 for the best exhibit in the Welsh Mountain ram classes, owned by a bona-fide tenant farmer, etc.: 1, Mr. W. Conwy Bell; h.c., Messrs. Gratton.

Special prize of £1, for the best exhibit in Welsh Mountain ram classes, owned by a bona-fide tenant farmer or occupier making his living by farming within the Union of Aberystwyth: 1, Mr. W. Morgan.

Special prize of £2, for the best exhibit in the Welsh Mountain ewe classes, owned by a bona-fide tenant farmer, etc.: 1 and v.h.c., Messrs. Gratton; h.c., Mr. R. W. Pritchard; c., Mr. H. O. Ellis.

Pigs.

WHITE BREEDS.

Boar: 1, the Earl of Ellesmere (Roger); 2, Capt. Lloyd Hughes, Llanrhystyd (Llwyd Llwynog).

Sow, in pig, or with pigs: 1, Earl of Ellesmere (Sowerby Sunbeam); 2, Capt. Hughes (Llwyd Countess); v.h.c. and h.c., Mr. J. Marshall Dugdale.

BLACK BREEDS.

Boar: 1 and r., Her Grace the Duchess of Devonshire (Polgate Domino and Polegate Dictator).

Sow, in pig or with pigs: 1 and 2, Duchess of Devonshire (Polegate Dulce and Polegate Daffodil).

Challenge Cup, value £10 and one guinea for the best Large White pig, any age or sex, bred by the Earl of Ellesmere, the property of a resident in the Principality of Wales: 1, Mr. J. Marshall Dugdale.

Cumberland.

The Cumberland Agricultural Society was unfortunate, so far as the weather was concerned, for their seventy-third annual show, for rain fell nearly the whole of the morning, and undoubtedly kept many visitors away. In the afternoon finer weather prevailed, and a large attendance was recorded, but not so good as in some previous years. The show itself was one of the best the Society has yet held. The entries were about fifty short of last year's total of 1,190, but there was an all-round advance in the quality of the exhibits, and in every section the visitors found many very excellent examples.

The agricultural horses were of fine quality, but the number was only 185, comparing with 242 last year. Clydesdales find favour in Cumberland, and as far as quality goes the show has seldom been equalled, but there have been years when heavier animals have been shown. The object at present appears to be to rear animals of purity in character and clean bone, breeders being content to wait till this object has been attained before striving after greater substance. The champion of the section was a three-year-old filly, Lady Domino, shown by Mr. Mansell, Crossrigg. She has already had several successes in the showyard. Reserved for the championship was a two-year-old filly, Fair Lowthian, the property of Mr. Wilson Hodgson, Burgh-by-Sands, an animal of outstanding merit in her class.

Light horses were more numerous than last year—viz., 285, as compared with 236 entries, and both in the driving and riding classes there was a distinct improvement on last year's show. In the hunter classes, the judges surprised the spectators by placing Mr. Andrew Saunders' Scotch March, a medal winner at the Highland and champion at Longtown, in the second place, putting in front of her in the two-year-old filly class Mrs. Johnston's Hollyhock, from Broadholm, Lockerbie, an animal which was only highly commended at the Highland. Neither of these, however, was adjudged champion of the light horse section, the honour being conferred on a two-year-old gelding belonging to Mr. James, of Oughterside Mill, which had never previously come into competition at the shows in the county. He is a nice colt by Belville out of Patience, both Mr. Parkin Moore's animals, but in the opinion of men of experience it is doubtful whether he is superior to Mr. Saunders' Scotch March. The improvement in the harness horse section was specially noticeable in the older classes, whilst the farmers' turn-outs gained high approval. A better show of hackneys has never been seen at the Cumberland. Mr. M'Naughton and Mr. T. C. M'Kibbin, The Heaning, showed with conspicuous success, and Mr. T. H. R. Threlheld, The Grange, was also a first prize winner.

The Shorthorn cattle made a fine display,

the pick of the lot being the yearling bulls, which were both numerous and excellent in quality. The first prize in the class was won by Mr. T. J. Sowerby, Long Meg, with Merry Prince, a roan which was fourth at the Highland, and which was eventually picked out as the champion of the cattle section here. Another class of more than ordinary interest was the class for groups of three Shorthorns for the challenge cup given by Mr. Watt, Knowefield. This prize was also won by Mr. Sowerby, who showed his yearling bull, yearling heifer, and a cow, all of which had headed their classes. The reserve for this championship was awarded to Mr. Joseph Harris, Brackenburgh Tower, who showed a heifer which was fifth at the Royal. Galloways were a record show, both in quality and numbers. The best aged bull was shown by Mr. A. H. Fox-Brockbank, Kirksanton, which was first at the Highland at Glasgow, and second at the Royal. Of yearling bulls the best was a specimen shown by the Countess of Carlisle, which was purchased at Castle Douglas this spring, and bred by Mrs. Wilson, Craighouse. Cows or heifers were a very good class, the best of them being that of Messrs. Stothert, of Cloughfoot, Haltwhistle, a very easy first.

The sheep section was filled principally by Border Leicester, which were very good in quality. The principal exhibitors were Mr. Joseph James, Oughterside Mill (who won the championship for sheep with a shearling tup), Messrs. Faulder, Oakbank, and Mr. William Bell, St. Martin's Terrace, Brampton. The blackfaced sheep prizes were won chiefly by Mr. Robson, of Newtown, Bellingham, and those for Down sheep by Mr. Toppin, Musgrave Hall, whilst Mr. William Richardson, Kendal, had the best of it with cross sheep. Mr. George Graham, Marshall Hall, and Mr. Robert Watson, Stone House, Hayton, were the chief exhibitors of pigs. In addition to the show of stock, a large dog show was held, embracing 220 entries, the feature of which were the bulldogs, these including some famous exhibits.

Whitchurch (Salop).

The Whitchurch and District Agricultural Association held their second annual show on Wednesday, when there was a large number of entries, and the quality generally was regarded as very superior. The principal prizes were as follows: —

AGRICULTURAL HORSES.

Shire stallions.—1, Captain Heywood-Lonsdale, Shavington (Severn Melbourne); 2, George Perry, Cholmondeley (Willaston Portland).

Pair of cart mares or geldings (four years old).—1 (silver cup), Messrs. G. Lunt and Sons, Higher Morrey; 2, J. Simister, Calverhall; 3, H. Lea, Wem; r., Thos. Wilson, Whitchurch.

Single cart mare or gelding (four years).—1, J. Broad, Worthenbury; 2 and 3, Messrs. G. Lunt and Sons.

Single cart mare or gelding (three years).—1, T. Hulse; 2, J. H. Large, Horseman's Green; 3, H. Lea.

Mare and foal.—1, Captain Heywood-Lonsdale; 2, T. Lea, Ellesmere; 3, T. Hulse.

Foal.—1, N. Forwood-Burleydam; 2, A. O. Lakin, Marbury.

Two-year-old gelding or filly.—1, H. H. Lloyd, Eyton; 2, W. Allen, Church Farm, Adderley; 3, John Broad.

Yearling colt.—1, J. Simister; 2, H. H. Lloyd; 3, Messrs. Lunt and Sons.

Shire Horse Society's Silver Medal. — W. Allen, Adderley.

HUNTERS.

Mare or gelding (four years).—1, W. Brown, Nantwich; 2, Noel Forwood; 3, W. Butler, Hordley.

Mare or gelding (three years).—1, A. Shone, Malpas; 2, N. Foxwood; 3, A. D. Purgold, Whitchurch.

Mare or gelding (two years).—1, Mrs. S. J. Major, Adderley Lees; 2, E. Davies, Eyton Farm.

Yearling.—1, W. Butler; 2, J. Horton, Tilstock.

Mare and foal.—1, Captain Heywood Lonsdale; 2, E. Davies, Hordley.

HACKNEYS.

Best cob.—1, W. Heath, Market Drayton; 2, R. V. Eardley, Colehurst Manor; 3, W. Hitchin, Quoisley.

Best pony.—1, W. Owen, Ellesmere; 2, M. A. Purcell, Ash.

Hackney mare and foal.—1, Mrs. Ravenshaw, Bridleway Gate; 2, H. D. Evans, Whixall.

Hackney Society's Silver Medal.—W. Bibby, Ellesmere.

CATTLE.

Best bull.—1, T. Parton, Crewe; 2, T. Hollins, Crewe; 3, J. Hobson, Audlem.

Pair of dairy cows.—1, S. Chadderton, Peplow; 2, W. Sunnerley, Belton; 3, R. Davies, Tilstock.

Best dairy cow.—1, S. Pierpoint, Worthenbury; 2, S. Chadderton; 3, A. Blake, Malpas.

Best heifer, calved 1903.—1, H. Green; 2, S. Chadderton.

Best heifer, calved 1904.—1, E. K. Bickley, Newtown; 2, S. Chadderton.

Cottagers' class.—Best dairy cow: 1, H. Hall, Whitchurch; 2, S. Powell, Whixall; 3, H. Ashby, Coton.

SHEEP.

Shropshire shearling ram.—1, J. Barnett, Market Drayton; 2, S. F. M. Nevett, Yorton.

Three Shropshire ram lambs.—1, S. F. M. Nevett; 2, W. Sunnerley.

Five Shropshire ewes.—1, S. F. M. Nevett; 2, J. Barnett.

Five Shropshire yearling ewes.—1, J. Barnett; 2, R. C. Price, Harmer Hill.

Five Shropshire ewe lambs.—1, R. C. Price; 2, J. Barnett.

Five wether lambs, any breed.—1, W. J. Powell, Stanton; 2, T. W. Higginson, Ashford Grange.

SHOWS IN BRIEF.

Adlington.

The thirteenth show of the Adlington and District Agricultural Society was held on Wednesday. There was a good show all round, light and heavy horses, hunters, cattle, and turnouts being the most important features. The number of entries was 1,540.

Penrith.

For over sixty years there has been an annual agricultural show at Penrith, and that it is still as popular as ever was proved by the good entry and large attendance of visitors at the sixty-second show held on Tuesday. On paper the display fell behind the shows of the last few years, but duplication of entries having been dropped, the decline was more seeming than real. As was to be expected in such a famous country for its Shorthorns, these animals made quite the feature of the show. Few better collections of stock have been brought together this year for £300. Shorthorns very nearly reached high expectations. The classic herds of Eden Grove, Moresdale Hall, Wigton, Inglewood, Brougham, Calthwaite, Stainton, Great Strickland, Musgrave Hall, Eden Hall, Kirkby Thore, and Lamonby Hall, were represented by something of their best, and in at least half the classes the competition was extensive and close. Nineteen bulls of from one to two years entered, and there were several other large classes, both in the tenant farmer section and divisions with more scope. Cumberland Show winners were thickly scattered through all departments. Agricultural horses were not so numerous as on some previous occasions, but the quality was right, and the same might be said of the light horses; whilst sheep fell somewhat short of anticipation, still they were a nice lot.

Thorney Shire Foal.

Thorney Foal Show Society occupies an unique and pre-eminent position in the Shire horse breeding world, and its remarkable exhibition on Tuesday week again demonstrated the fact that, with the exception of Peterborough, it provides a display hard to equal in any other part of the country. Flourishing in the very heart of the great Fen breeding country, the ducal parish possesses a body of farmers whose studs have turned out some of the best Shire horses that have been seen in the show ring during recent years, and the animals they placed in the ring this year were, if possible, superior in quality and type to any previous shows, though the numbers were not quite so large as in some previous years.

Rural Education.

Mr. T. S. Dymond, his Majesty's Inspector for Rural Education, speaking at a teachers' conference at Gloucester, said children should be taught the geography of their own villages, and even in the teaching of history they missed, he believed, the opportunity of making rural life more dear to the people. There was no school subject which more needed adapting to rural life than arithmetic, which, as generally taught, appeared to be the first subject to be forgotten on leaving school. They needed to deal with shillings and pence rather than with thousands of pounds, with the penny bank rather than the Stock Exchange, with bushels of corn, trusses of hay, cords of wood, hundredweights of manure, acres, roods, and perches of land. It was also necessary to teach decimals.

Mr. H. W. Household (secretary to the Gloucestershire Education Committee), in urging that local geography and history should be first taught, said there were more important matters for the children to learn than the length of the Brahmaputra or the height of the Andes.

Miss Kate Tummey (Bagendon), describing her efforts in a small rural school to give appropriate instruction, said she set the boys to work in her own garden. The lads took great interest in the pursuit, and their fathers often supplied them with seeds and showed them the proper distances apart to plant them.

SOCIETIES.

Smithfield Club.

A meeting of the council was held on July 26, the Earl of Coventry (vice-president) in the chair.

The noble chairman said he was sure they would feel, as he did, very deep regret in the deaths of Earl Cowper and Sir Jacob Wilson, K.C.V.O., vice-president of the club. The late Earl Cowper, although not seen very frequently at their meetings, was an excellent landlord, and was very well known in the agricultural world. Of Sir Jacob Wilson he could say that it was his good fortune to meet him on this council, and on the councils of the Royal Agricultural Society and the Royal Commission on Horse Breeding, and therefore he could claim to speak of the good services Sir Jacob rendered, and testify to the pleasure it was to meet him on all occasions.

Mr. R. W. Hobbs reported that the Stock Prize Committee had selected judges for the forthcoming show, with reserve judges in case any of the gentlemen selected were unable to act, such list to be published when all the judges had signified their acceptance. This report was adopted.

Mr. Martin J. Sutton reported that the Selection Committee recommended that Mr. J. Bowen-Jones be elected a member of the committee in the place of the late Sir Jacob Wilson. This report was adopted.

Mr. J. Harold Howard reported that the rules and regulations and form of application for space at the forthcoming show had been considered and passed by the committee. This report was adopted.

The council then adjourned until November.

British Dairy Farmers'.

A meeting of the Council of the British Dairy Farmers' Association was held at 12, Hanover Square, W., on Wednesday, Sir George Barham, J.P., Vice-President, in the chair.

On behalf of the Finance and General Purposes Committee, Mr. Page reported that the balance at bank on current account on July 31 was £454 17s. 8d., against which payments were recommended amounting to £162 0s. 3d. The Committee submitted a return showing that in the eight weeks ended July 29 the imports of fresh milk into the United Kingdom amounted to 45 cwts., compared with 81 cwts. in the corresponding weeks of last year. In the same period the quantities of cream imported reached a total of 1,032 cwts., compared with 1,670; of preserved milk 266, against 931 cwts.; and of condensed milk, 131,826, compared with 134,215.

Mr. Ashcroft, as Chairman of the Education and Journal Committee, reported the arrangements for the examination of candidates for the society's certificates, to be held at Reading on September 7, 8, and 9; and also the committee's proposals with regard to the contents of the next issue of the society's journal. The report was agreed to, with the addition of a suggested subject for a further paper.

The Show Committee brought up a series of recommendations with regard to matters connected with the Dairy Show to be held on October 3 and three following days, the schedule of prizes for which has now been issued. It was resolved to open the show at nine o'clock on the first day instead of ten o'clock, as in previous years.

On the motion of Mr. W. J. Grant, seconded by Mr. John Welford, Mr. E. W. Caddick, Caradoc, Ross, Herefordshire, was elected a member of the Council to fill the vacancy caused by the retirement of Mr. J. B. Ellis.

A letter was read from the Board of Agriculture, enclosing a copy of one from the Prime Minister, the purport of which has already been published in the agricultural press, giving reason for not acceding to the suggestion that he should receive a deputation from those who are concerned in securing the enactment of the Butter Bill.

An invitation was received from the Organising Committee of the Second International Congress on Dairying, which will meet in Paris from October 16 to 19 next, to nominate one or more representatives of the Association. The Council agreed to take action in this direction.

A discussion, initiated by Mr. A. L. Alexander, took place relative to the difficulties in the milk trade caused by the present standard laid down by the Board of Agriculture, as regards the percentage of fat in milk. No resolution was passed, it being left to Mr. Alexander to again raise the question if he wished to do so.

The other business transacted was of a formal character.

Suffolk Sheep.

At the last Council Meeting of the Suffolk Sheep Society, Mr. W. Reeve presided in the absence of Lord Cadogan. After

the minutes had been read and confirmed, Mr. F. H. Roberts said that he thought it would be only right, before proceeding with business, to make some references to the sad losses which the Council had sustained since their last meeting. The late Mr. Slater was well known to them as one who, with all deference to others, might be regarded as the most useful member of the Council, and, with regard to Mr. Lewin, they missed him all the more because he was in full collar right up to the time that he was taken away. He proposed the following resolution:—"That this meeting of the Council of the Suffolk sheep Society hereby records with deep regret the loss the Society has recently sustained through the deaths of Mr. F. S. Lewin and Mr. S. W. Slater, who for eleven and eighteen years respectively had rendered most valuable services as members of the Council."

The motion was seconded by Mr. S. R. Sherwood in sympathetic words, and carried in silence.

The Committee appointed for the purpose of considering the holding of Annual Flock Competitions made the following recommendations:—

1.—That flock competitions be held annually, the last day for entry to be September 15, and the judging to commence on October 1, or as soon after as may be practicable.

2.—That in lieu of Districts there be two Divisions as follows:—

Division 1.—For flocks which have previously won a cup.

(a) Flocks exceeding 240 ewes.

(b) Flocks not exceeding 240 ewes, and not less than 120 ewes.

Division 2.—For flocks which have never won a cup.

(a) Flocks exceeding 240 ewes.

(b) Flocks not exceeding 240 ewes, and not less than 120 ewes.

3.—That there be no restriction as to the number of entries required in order that any competition takes place.

4.—That competitors owning more than one registered flock must enter and show all the Suffolk breeding ewes comprised in such flocks.

5.—That the other rules of competition remain as heretofore.

Mr. Thomas Keeble formally proposed the adoption of this report, and invited criticism upon it. The Committee had considered the matter very carefully, he said, and this report represented the conclusions at which they arrived.

The only point that evoked any debate was the fourth regulation—"That competitors owning more than one registered flock must enter and show all the Suffolk breeding ewes comprised in such flocks."

Mr. J. R. Keeble said it had always been a bone of contention hitherto that big flocks could be shown against little flocks.

The Secretary: On the other hand you may cut off most of the large flocks under this new regulation, which provides that an owner shall show all the breeding ewes he has got.

Mr. Robertson: Why?

Mr. S. R. Sherwood: The answer, I suppose, is that a second flock is generally a second-rate flock.

Mr. D. Abbott Green, speaking as one of the Committee, said he was quite sure the regulation in question would have the effect of shutting out certain gentlemen who might otherwise compete. His idea was that, as they fixed a minimum number in the one division, so they should fix a maximum number in the other. Five hundred ewes (say) were enough for any judge to look over.

A good deal of conversation followed, but eventually the report of the Committee was adopted.

The Chairman announced that he should be very pleased to give a cup in Division II. (applause), and it appeared that other cups had been given or promised by Lord Bristol, Sir Frederick Adair, Colonel Davies, and Colonel Baird.

Bath and West.

A Council meeting of the Bath and West and Southern Counties Society was held in London, on Tuesday week.

The President (the Earl of Radnor) was in the chair, when six new members were elected.

The Earl of Radnor, on taking his seat for the first time as President, expressed his sense of the honour which had been conferred upon him, and his desire to do everything he could during his year of office for the promotion of the best interests of the Society. He regarded his election not only as a great compliment to himself, but also to the Wilts Agricultural Association, of which he was also president.

Mr. Napier, on behalf of the Finance Committee, brought up the quarterly statement of accounts, and reported that cheques for the prizes awarded at the Nottingham meeting had been sent to all prize winners, with the exception of those with respect to whose animals some further qualification was necessary. On the motion of Mr. Napier, seconded by Mr. Sillifant, the report was adopted.

Swindon Show.

Mr. Edwards, on behalf of the Show Dates Committee, reported that after careful consideration of all the circumstances, and consultation with the local authorities, the committee unanimously recommended that the 1906 exhibition at Swindon be opened on Thursday, May 31, and closed on Tuesday, June 5, the opinion of those well acquainted with the locality being that these were the most suitable dates available.

The adoption of the report was moved by Mr. Edwards, seconded by Colonel the Hon. C. Byng, and agreed to.

Letters were read from the Wilts Agricultural Association and also the Gloucestershire Agricultural Society, stating that both these organisations had unanimously resolved to suspend their shows in 1906 and to join forces with the Bath and West Society, on the terms granted by the latter Society to County Societies within the district of the show. The letters expressed much goodwill towards the Bath and West Society, and promised hearty co-operation in everything which could promote the success of the Swindon meeting.

Mr. Latham said that these communications spoke volumes with respect to the feelings with which the Society was regarded by kindred bodies, and moved that the privileges usually granted to members in such cases be conferred upon the Societies in question. This was seconded by Captain the Hon. J. C. Best and agreed to.

Experiments and Education.

Sir C. T. D. Acland, as chairman of the Experiments and Education Committee, reported with respect to the cheese school conducted by the Society for the Somerset County Council at Wedmore, that there had been a good attendance of students, thirty having, since the opening of the school in April last availed themselves of the advantages it offers, whilst the first draft of cheese had been sold at a satisfactory price.

On the motion of Sir C. T. D. Acland, seconded by Mr. G. Herbert Morrell, M.P., the report was adopted.

Experiments having for their object the ascertaining of the influence of various manures upon the production of mutton were proceeding, and the committee proposed to institute a series of experiments with a view of demonstrating the effects of lime upon certain soils.

Science and Art.

Mr. Farwell, as chairman of the Science and Art Committee, reported that the committee recommended that steps be taken to hold the following exhibitions in connection with the Society's 1906 meeting at Swindon, viz.:—

(a) A nature study exhibition, on somewhat similar lines to those held by the Society during the last three years.

(b) An exhibition of specimens and appliances illustrating the educational work carried on by colleges and kindred institutions.

(c) An exhibition of specimens, appliances, and methods in connection with British forestry.

On the motion of Mr. Farwell, seconded by Sir J. R. G. Cotterell, the report was adopted.

Dairy Conference.

A communication was read from the president of the Committee formed to promote the holding of an International Dairy Conference at Paris, in October next, inviting the Society to be represented thereat. Mr. G. E. Lloyd Baker, Mr. F. J. Lloyd, F.C.S., and the secretary were nominated, but at the request of the latter his name was withdrawn, as at that time important matters in connection with the Society would need his attention at home. Messrs. Baker and Lloyd were then appointed as the Society's representatives.

The Butter Bill.

A letter addressed by the Prime Minister to the president of the Board of Agriculture, and forwarded by the latter in response to a resolution from the Society urging the importance of the Sale of Butter Bill being passed into law this session, was read. In it, Mr. Balfour expressed his anxiety to see this measure, so desirable in the interests of the agricultural community, become law, and his regret at the impediments which obstructed its passage. The letter explained the practical impossibility, in view of the differences prevailing in connection with the Bill, of finding time for its discussion before the termination of the session, and heartily sympathised with the president of the Board in the disappointment of his hopes concerning it, whilst acknowledging his efforts to compose the differences referred to. Sir E. Strachey, M.P., expressed his great regret that the Bill had been shelved.

SUCCESSFUL CHICKEN REARING.

GEORGE SMITH'S
SPECIAL CHICKEN MEAL and GRANULATED DRY CHICKEN FOOD
Rears Chickens, Turkeys, and all kinds of Poultry with the greatest success, direct from the shell.

These Three Tests:

APPEARANCE
ANALYSIS——
PRICE——

Are they Conclusive Guides for Valuing and Buying Compound Cakes and Meals.

? CAKES

WE ANSWER—MOST DECIDEDLY, NO!

For here the old proverb—that "Appearances are deceptive," is often true.

Analysis by itself cannot be relied upon, for damaged and inferior material analyses the same as sound fresh stuff, although the feeding value is very much poorer. Also it is often difficult to detect damaged ingredients when spiced and mixed with other stuff.

SILCOCK'S

Is the lowest priced article the cheapest? We are continually in competition with compound foods having as high, or nearly as high, an analysis as our brands, sold in some cases at 10/- or 15/- per ton less, and claimed to be "just as good as Silcock's." **This is not possible**, considering our exceptional facilities for manufacturing cheaply on a large scale, our extensive experience, and the many valuable patents we own for labour-saving machinery.

There will invariably be found a greater deficiency in feeding value than the difference in price implies.

We have no difficulty in retaining customers who have used our Cakes and Meals regularly, as the more our brands are known the better they are liked, but we have the difficulty of price to contend with in those feeders who do not know our goods. We specially invite such to make a comparative feeding test, feeling sure that it will bring us new customers and also benefit the buyer.

NOTE THIS.

Our first principle has always been to supply the best possible quality, and sell large quantities at a small margin of profit. In feeding stuffs the lowest priced article is certainly not the cheapest. SILCOCK'S brands are the highest standard of Compound Foods. Linseed Cake and Maize are at present priced above their feeding value, and by using Silcock's Cakes and Meals you will obtain really first-class articles and save money.

HOLD THE HARVEST.

Year after year, as October comes round, a word of caution to farmers is called for concerning the inadvisability of selling the new crops too freely, and for too low a price. The tendency was much commented on even in the old Protectionist days, and it has naturally not been diminished by the general impoverishment of cereal farmers, which has been a feature of the quarter of a century since the famous, or, rather, infamous year of agricultural disaster in 1879. In the present year the caution is needed two months earlier than usual—in August instead of October. The tendency to buy forward has extended in a remarkable manner from foreign to English wheat; and several weeks ago we had to note that there are buyers of English crops for September and October delivery. Farmers to-day are being visited by travellers and agents, and are being told that unless they sell their new corn before the foreign crops, stated to be extremely plentiful, get into motion, they will get exceedingly low prices for them. The pleading is specious; but on examination its arguments will be found lacking in real weight. To begin with, barley may be ruled out altogether, no prospects of large foreign supplies are to be discerned. Then, in the case of oats, the unfortunate probability of the home yield of 1905 being a good deal below that of either 1904 or 1905 counterbalances the effect of a good crop in America and of good prospects in Russia. The term "corn," generally used by would-be be buyers, therefore, comes down to wheat, and we have to see if there is much real fear of home markets after October being so swamped by foreign wheat supplies that sales even at a sacrifice had better be put through before Michaelmas.

In the case of wheat, it cannot be denied that the American crop of nearly ninety million quarters is an event of the first magnitude. It would be thoroughly unwise to ignore this. But, on the other hand, the American merchants and shippers are capitalists and men of spirit, and their "record" for the last thirty years at least is of far more firmness in holding wheat for a fair price than the English farmer himself has been in a position to show. The American merchant is not likely to "give the situation away" so long as his hand is not forced by injudiciously heavy deliveries of new English wheat. The need of the new home crop is general and obvious. The fact that farmers are solicited to sell in a way they seldom have been before carries its own suggestion with it. The fine quality of the new wheat makes it fit for prompt use in the mill, and for that advantage the consumer should be prepared to pay. The country is not at all overstocked with foreign wheat, and the oats most nearly competing with English of fine quality are distinctly scarce. The farmer in the past has had to fight his battles with singularly little aid from the banks, but the examples from Russia and elsewhere have latterly shown to our financial magnates that the harvested crops constitute an excellent security in the main, the cases of fraudulent selling of stocks and stores on which money has been advanced being so low a percentage as to represent a minimum of what may be termed fraud-risk.

Wheat held over the four coldest months in the year is worth intrinsically fully two shillings per quarter more money than wheat threshed and sold in the autumn. This rise on four months' holdings—i.e., from November 1 to February 28—represents 20 per cent. per ann. on a thirty-shilling per quarter value. If a farmer thinks that October, or earlier, markets will yield him a better price than March or April ones will do, let him back his own opinion by all means. But let him not sell at a sacrifice without so much as consulting his banker first. The present political situation needs very little comment here; farmers nowadays read a daily paper, and will know for themselves that France and Germany have recently been nearer to war than in any year since 1870, that the war between Russia and Japan still threatens the world with the gravest complications, and that Russia, the second-largest wheat-producing country in the world, is in the throes of home troubles which may have a paralysing influence on her export trade. If 1905 is not "the 1789" of Russia, the prologue to a veritable revolution, whether pacific or otherwise, then all our politicians, irrespective of party, are grievously misreading the signs of the times.

There remains to be considered the great instructive feeling of all countries which have been depleted of grain to renew their private stores out of a good new crop before they think of selling their surplus. America has not been so short of wheat for many years as she has been during the last few months. All precedent points to a country in this position devoting its first energies, so to speak, to good provision against local exhaustion of stores. We should not be at all surprised if the cry a few months hence was not, "What a big new crop America has!" but "Where is the new American crop concealing itself?" in which case it will be our duty as much to remind readers that stored corn is not lost corn as it is now our task to point out that until a substantial proportion of that new crop has actually crossed the Atlantic the English farmer would be unwise in accepting a single shilling less money for his wheat on the ground of American surpluses and American competition.

A Commission to Consider the Motor Question.

At the instance of the President of the Local Government Board a Royal Commission has been appointed to inquire and report as to—

(1) The working of the Motor-car Acts, 1896 and 1903, and of the regulations under them;
(2) The law and practice in relation to motor-cars in the principal foreign countries;
(3) What amendments, if any, should be made in the Motor-car Acts, and the regulations under them;
(4) The injury to the roads alleged to be caused by motor-cars; and
(5) Whether any, and, if so, what, additional charges should be imposed in respect of motor-cars, and how any money thus raised should be applied.

The Commission have power to issue an ad interim report on the first three heads, if that course should appear desirable.

The King has been pleased to approve of the following as Commissioners:—Viscount Selby, Chairman; the Marquess of Winchester (Chairman of the County Council for Hants); Sir William Bower Forwood (late Lord Mayor of Liverpool and Chairman of the Lancashire Quarter Sessions); Mr. H. C. Munro, C.B. (one of the Assistant Secretaries of the Local Government Board); Mr. E. R. Henry, C.B. (Chief Commissioner of the Metropolitan Police); and Mr. W. J. Mure, C.B. (formerly Legal Secretary to the Lord Advocate). It is proposed to add to these a seventh Commissioner.

Mr. Arthur W. Dean, of Dowsby Hall, the well-known South Lincolnshire agriculturist and breeder of long-wool sheep and Shorthorn cattle, has been appointed to the Commission of the Peace. Mr. Dean has qualified to sit on the Bench by making his declaration before Mr. Justice Lawrance.

Seasonable Topics.

A Summer Gale.

There was no mistake about the wind being in a frolic on one or two days during the first week in August, and the way in which it hurled things about reminded one of a March gale more than anything else. We have not heard of any serious damage being done, but large trees were uprooted in several places, while scores of specimens came out of the ordeal minus several limbs. The wind seemed to find considerable amusement in the cornfields by scattering the sheaves that had been set up in shocks in all directions. The greatest misfortune, however, was the way in which unripe apples and pears and green plums were torn from the trees and spread on the ground beneath. This would have been bad enough had crops been plentiful, but in a season when the above fruits are scanty, and only trees here and there are bearing, the loss is all the greater. It is not a difficult matter to set up corn-sheaves again that have been blown over, but it is a thing impossible to replace unripe fruit when it has been severed from the branch.

Birds and Farm Crops.

Various comments have been made in different quarters of late about the damage done by birds to farm crops, and it is thought by some that we are growing a little too sentimental in our views about the protection of the so-called "farmer's friends." We have no sympathy with ruthless destruction of feathered life purely for the sake of doing it, but crops have to be protected, and we have little patience with those individuals who persist in contending (in spite of overwhelming evidence to the contrary) that the birds which the farmer complains about are more his friends than his enemies. As a rule, these well-meaning persons are not either farmers, gardeners, or fruit-growers, or they would know that under certain circumstances common birds represented in excessive numbers can be the cause of considerable damage to crops. Just to show what different views are taken of this matter, we may add that we visited a plum plantation some time ago in which nearly every bud on the trees had been taken by bullfinches. When we asked why no measures had been taken to check the damage we learned that the owner of the plantation is a bird lover, and will not have one killed on any account. We also learnt that he has plenty of money, and it makes no difference to him whether his fruit plantation returns a profit or not, but we are inclined to think that if he had to depend on his plums for a living his views regarding the protection of bullfinches would undergo a radical change. Perhaps the cosmopolitan sparrow is the greatest offender, and it must be said of him that he is protected the least by sentiment, but in their several ways finches, larks, starlings, and rooks are sources of considerable loss and annoyance. Weather, of course, has something to do with the injurious operations of birds, and during the dry weather in July apples, green and unripe, were pecked and spoilt in large numbers. It was of course the moisture in the fruit that the birds wanted, and it has been noticed that since the rain came very little damage has been done. Of course, a good deal can be said to show that birds are farmer's friends, but it is largely a question of numbers, and when injurious members of the feathered tribe get too thick on the ground some combined effort must be made to thin their ranks.

Northern Star Potato.

No potato ever introduced caused such a sensation as Northern Star. Its introduction marked the beginning of the famous boom in varieties, and seed tubers of Stars were sold at prices unheard of before. All this is past history, and we ask what figure is Northern Star cutting in the potato world just now? The boom is over, things have come down to their normal level again, and while some of the potatoes which came out when fortunes were being made out of new varieties are working their way into general cultivation, others seem to have dropped out altogether. Though Northern Star can hardly be classed amongst the latter, it certainly has not upheld its early reputation, and its existence promises to be as short lived, as its advent was exciting. In other words, Northern Star has proved to be disappointing, and its short reign of popularity appears to be nearing its end. Last year Stars did not come up to expectations, and this season it is still more unsatisfactory. At the outset Northern Star was a very vigorous grower, but we have noticed several patches this year with weakly, stunted tops, showing an obvious want of vigour. It is, of course, too early to speak of the crop, but no great things can be expected when the growth is so unsatisfactory. Whatever may be the ultimate fate of Northern Star, its comparative failure so soon after its introduction will tend to shake public faith in any boomed varieties that may appear in the future. It was urged, when Northern Star was being cracked up to the skies, that Up-to-date was worn out and done for, but we have seen a quantity of Dates of late, grown from Scotch seed, which, if appearances are anything to go by, will give points to Northern Star and several other boomed varieties, and beat them hollow.

Lamb Sales.

The predominating item of importance to sheep-breeders just now is lamb sales, and it is satisfactory to learn that these have opened in a favourable manner. At the first of the big Kentish sales, which took place at Ashford, upwards of 9,000 heads, chiefly Kent and half-bred lambs, were disposed of. It is interesting to know the lambs were in excellent condition, bidding was brisk, and a large number of buyers were present. We learn that though no very high prices were realised, sellers had every reason to feel satisfied, as a good average was maintained at a substantial advance on the prices of last year. Lamb sales in Kent are important gatherings about this time of the year, and in the neighbourhood of the celebrated Romney Marsh thousands of heads pass under the hammer and change hands. In some seasons we have known lambs to be passed from sale to sale and then they had to be disposed of at a sacrifice, but things promise better this year, and sheep, wool, and lambs are bright items in the affairs of farmers just now.

A Chance for the Royal.

Almost before the Royal Agricultural Society has had time to turn round after the calamity at Park Royal, and before the future policy is decided, there comes an offer from Blackpool to send a deputation from the borough with a view to arranging for the show of the Society being held at the famous Lancashire holiday resort. The moment, of course was not opportune for deciding anything, and the matter was postponed for future consideration, but we think that if there is any place in Great Britain that could make the show a success, so far as attendance is concerned, it is Blackpool. By adopting a policy of progress and enterprise Blackpool can justly boast of being the most popular holiday resort in Great Britain, and largely on account of the attraction it offers in the way of amusement and recreation the place is visited every season by record crowds. Blackpool is in a position now to make almost anything succeed that it takes in hand, and the Royal Agricultural Society might do worse than to associate itself with the spirit and enterprise of the Brighton of Lancashire.

Trials of Skill.

Not the least interesting and useful features of many agricultural shows in the provinces are the competitions of skill in connection with various agricultural operations, because this kind of thing is a means of encouraging good workmanship. Take a shoeing competition for instance. It is a goodly sight to observe a dozen brawny smiths strip to their shirts and set about making shoes and attaching them to the feet of the horses provided for the purpose. It is extremely important that country forges should be controlled by good shoeing smiths, and competitions of the kind referred to are excellent means of testing skill. Not that the best men always do themselves justice at showyard competitions, because, though they are strong of arm, smiths, like other men, have nerves, which occasionally fail them at a critical moment in trials of skill. Most agricultural societies provide competitions for females, and it is an interesting sight to watch a troup of dainty dairymaids making butter in competition before a crowd of critical spectators. In view of the fact that many farmers' daughters are ignorant of butter making nowadays, these trials of skill cannot fail to be beneficial. To pluck and truss a chicken may not be a fine art, but there is a right and a wrong way of doing it. Poultry instructors teach their pupils the proper way and opportunities are afforded them of testing their skill at agricultural show competitions. Occasionally there are not many entries in the trussing class on account of feminine reluctance to appear in public, but all girls are not troubled with nerves, and we have had the pleasure of watching some members of the gentle sex go through their task in front of a gazing crowd as quietly and confidently as if they were performing on the kitchen table at home. Expert milkers, again, are given opportunities of displaying their powers in open competition at shows and in several other ways is the skill of workers tested. These competitions are by no means novel, but they are homely and useful, and they all help to add interest to agricultural shows.

Rainfall and Evaporation.

The news that the monsoon in India has proved rather disappointing will be received with regret, and when the figures are given (they are not published in the official telegrams) will cause surprise as well. The rainfall which Indian farmers regard as insufficient amounts to 23 inches, or an ample fall to give us in England excellent cereal results. The reason of its insufficiency is, of course, the evaporation, which in India is much greater than in the temperate zone. But the circumstance gives us cause to reflect on a serious weakness in our own meteorological returns. The Meteorological Office is admirably efficient—as far as it goes—but it needs extension. Our rainfall records for an example are adequate, 300 stations are quite enough, and a new one has only just been opened in St. James's Park. But there seems to be no correcting observation of the evaporation which in January may be inappreciable, but in August very material. Thus the whole fall in January may be debited to the soil, but a greater fall in August may enrich the earth to a less extent. The Indian monsoon returns in warning us of this well-known but much neglected natural law may therefore claim to be of interest beyond the confines of India.

Agricultural Imports.

The following is an account showing the quantities of certain kinds of agricultural produce imported into the United Kingdom in the week ended August 5, 1905, together with the quantities imported in the corresponding week of the previous year:—

	1904.	1905.		1904.	1905.
	No.	No.		Cwt.	Cwt.
Cattle ...	11,131	9,355	Wheat ...	1,741,600	2,309,000
Sheep.....	5,384	858	Flour	200,600	231,800

Cheaper Railway Rates for Farmers.—The London correspondent of the *Birmingham Post* understands that there is to be held a meeting of railway managers at an early date for the purpose of considering what steps may be taken, in conjunction with the Board of Agriculture and the canal authorities, for assisting the movement for the cheaper carriage of agricultural produce to the markets. There is a distinct feeling, especially after certain utterances of Mr. Ailwyn Fellowes, the President of the Board of Agriculture, that by combination among the several authorities interested much might be done to cheapen and assist the transport of not only grain, but fruit, to London and other great centres.

AGRICULTURAL POLITICS.

By A LOBBYIST.

I fear me that no distinct advantage will accrue from the labours of the Royal Commission on the Supply of Food and Raw Material in Time of War. The fate of the portentous tome in which the Commissioners record their reports, their reservations, and their dissensions is to be placed upon the shelf and occasionally consulted by scholars, pundits, and pedants. It deserved a nobler doom. There have been few national inquiries conducted with greater dispassion or marked by a more sagacious temper, or inspired by a more patriotic resolve than this. Its very characteristics have, however, acted as a solace to our legislators—that is, where its conclusions have not been a disappointment—rather than as a warning, as an inspiration to a new effort of preparedness, rather than as a pessimistic assurance that there may come a time when a merciless foe may command the seas. The report is a soporific rather than a tocsin. Certain of those legislators whom I have spoken to on the subject justified their intended preoccupation in other problems by declaring that if the main report proved anything at all it proved that there was no real danger of even a successful foeman being able to starve these islands. This view was by no means confined to the Liberals. There were Conservatives—mostly the representatives, by the way, of urban constituencies—who readily repeated it. Of course, there are men who are, as I have said, disappointed—the Parliamentarians who are in favour of the establishment of granaries and the payment of a small bounty to farmers as a compensation for keeping grain longer in the rick, and thus guaranteeing to keep up a wholesome supply in the granaries. These men, however, are not destined to influence Parliamentary thought. Their protest was but a murmur, and was soon submerged in the complacent gratulations of the optimists.

• • •

The three assurances which may specifically be described as the parents of this satisfied mood are: (1) That the wheat supply of the United Kingdom at its maximum is enough for the normal consumption of seventeen weeks, and never falls below sufficient for the supply of seven weeks; (2) That there is likely to be a very rapid enlargement of the sources whence we draw our supply; (3) That there is little likelihood of food being declared contraband in time of war because of the fact that the neutral Powers affected by such a proceeding would inevitably bitterly resent the policy and lodge a protest, which, if disregarded, might extend the area of war. I repeat that I heard several members of Parliament declare explicitly that what this report proved was not the necessity of establishing a national and subsidised system for the storage of grain, but the absolute impossibility of famine being a sequel to war, however protracted that war might be. They declared that the selfish anxiety of Powers not warring with us to reap advantage from the trade which would be withdrawn from our rival belligerent would operate to our own safety and surety. Others Powers would refuse to permit food to be regarded as contraband, not from any overwhelming affection for Great Britain or any diplomatic predilections, but because of their resolve not to have their trade jeopardised.

• • •

The more significant suggestions which were evidently present to the mind of those Commissioners who were headed by the Duke of Sutherland and Mr. Chaplin have not served to seriously disturb this complacence. What if war broke out in the months, say, from June to September, when our resources are at their lowest ebb? What would be the costs of freights and insurances during the progress of the war? How should we recompense owners of ships carrying grain—and indemnity against capture by the enemy is a generally accepted proposition—against the danger which must menace them? Apart from the attitude of neutral Powers trading with us, it is evident that a certain percentage of the two thousand steamers and innumerable sailing vessels would be doomed to capture, if only because of the fact that they would be British-owned and would fly the British flag. Supposing that the enemy gained an initial success, or our own fleet failed to secure a triumph, what height would the price of wheat—the supplies, mind you, having been already reduced to a minimum—attain? We need not stay to examine the assertion of certain witnesses before the Commissioners that it would reach two hundred shillings per quarter. At all events, we are entitled to entertain the fear that the price would be enormous, by the fact that during the Russian crisis of 1877—when war hung in a very delicate balance—there was an advance of no less than fifteen shillings. A large section of the population—that section thrown out of employment by the difficulties attending importation and by the trade-depression invariably following an outbreak of hostilities—would soon be brought to the very verge of starvation, and would, in their misery be a handicapping force upon the Government. Should these thoughts conduce to a serene and happy temper? If only the most modest portion of our commercial fleet were to suffer from hostile depredations, the market would inevitably be rendered the victim of morose speculative fear and the price of food would assuredly go up.

• • •

These points were recapitulated by certain Parliamentarians and by myself with the object of emphasising the necessity of taking steps with a view to diminishing the effect of stringent prices and of—this, indeed, was the more important object—increasing the permanent reserves in this country. It was not necessary in this connection to accept what I may call the storage proposals of which the small minority, headed by the Duke of Sutherland and Mr. Chaplin, are the authors; it was not necessary to accept the calculation that an annual payment of £25,000 a year would lead to an extra week's supply being located in this country; it was not necessary to point out that the augmentation of our reserves to the position of almost complete security could be effected at a cost of about one per cent. of our naval estimates; it was not necessary to reveal that a system of national storage might be an encouragement to the British farmer, and might result in an increase of the wheat-growing area. The majority of our legislators were simply anxious to lull themselves into a conviction of security; and they selected the special features of the report which enabled them to realise the mood. "We must have further inquiry at once," said an intelligent publicist on the morrow of the publication of the report, "with the purpose of adopting the best expedient for averting the most imminent and awful of a great war's contingencies." I repeated this demand again and again. Occasionally there was an expression of sympathy; but, generally speaking, the mood was rather one of we-have-enough-on-our-hands-already, or we-are-perfectly-safe-so-why-bother. The Commissioners have accomplished a great work. Alas! that it should be foredoomed to sterility. We have to educate our Parliamentary masters, and the process should not be delayed.

• • •

It is a pitiable and a depressing fact that the chief value of the report lies, in the esteem of a number of Parliamentarians, in the fact that one assertion of the majority appears to strike a blow at Mr. Chamberlain's colonial-preference ideal. As a fact, it would almost seem to the signatories of the report that colonial preference would constitute a danger. Heed this declaration: "It may also be said that the more numerous the neutral Powers supplying our wants, the less probable is the violation of international law by our enemies. There is, therefore, a certain advantage to us in the fact that the supplies of our principal foodstuffs are drawn in a great proportion from foreign countries than from British possessions." I do not think this statement will evoke any enthusiastic sympathy in the patriotic bosoms of the neo-Protectionists. And yet its common sense justification must be apparent. Colonial vessels laden with colonial wheat would fly the British flag, and would naturally be justifiable objects of capture. Foreign vessels laden with foreign wheat would only—unless the international law were violated and our enemy were willing to provoke the resentment of other countries—have a neutral interest for our foe. Many of the Radical antagonists of Mr. Chamberlain in the House of Commons refused to regard the Commissioners' report as having, as a whole, any vital or vivifying moment; but these particular sentences they rolled upon their tongue as though they were the most delicate and appetising morsels ever offered for their digestion. "I tell you what it is," said a Liberal member for a South of England constituency to me; "this declaration kills the colonial-preference project! How can the Tories, who proclaim themselves to be the only patriots, support the colonial preference policy, when, if carried to the extent Mr. Chamberlain desires, it might mean a menace to these islands in time of war—when it might mean the exclusion of a necessary food supply." Of course, I do not go so far as this enthusiastic anti-Chamberlainite. All the same, the very character of this Commission, and the fact that it included notable Chamberlainites, will invest this assertion with an emphasis and force that will require a good deal of oratorical declamation to subdue. Our home markets are not yet entirely given over to the colonist. The pity on't, though, is that with a report of this gravity, this desultory declaration should have so much importance attached to it to the disregard of its more profound and vital conclusions.

• • •

I hope the organisations associated with county government and rural interests will not disregard two of the duties which have devolved on the Royal Commission on Motor Cars. The first is to inquire into "the injury to the roads alleged to be caused by motor cars." The second is to inquire "whether any, and if so, what additional charges should be imposed in respect to motor cars, and how any money thus raised should be applied." The first purpose of these organisations is by concerted action to see that adequate information is submitted to the Commission. A bitter, but somewhat inarticulate anti-motor cry has gone up from the county councils; this should be formulated and defined and supported by a sufficiency of evidence. Those county councils which declare that the advent of motor cars has mulcted them in a much larger sum for road maintenance, should take care that clear and disciplined evidence is submitted. This Commission will have a character which does not always belong to Commissions. It will be the assured precursor of legislation. The public sentiment in favour of dealing with the problem is fully ripe. To neglect, therefore, the opportunity provided by the inquiry would be something very like a sin.

• • •

Shall we have an election in October? Whether in October is debatable. That it will take place in a few months is apparently certain. Several of the speeches of Ministers delivered in the last days of the Session were undeniably of the nature of valedictory addresses. I instance in particular the speeches of Mr. Balfour, Mr. Arnold-Forster, and Lord Stanley. We are on the eve—that is, if portents go for aught—of the electoral Armageddon.

Ashburton Fair.—At this fair on Thursday there was a large supply, and the demand for bullocks in good condition was good. The sheep trade was very good. Cows off calf made from £14 to £23; cows and calves, £14 to £21; rearing calves, 44s. to 70s.; bulls, £12 to £15; two-year-old steers, £10 to £13; grazing steers, two-and-a-half years old, £12 to £15 10s.; younger steers, £7 to £10; grazing heifers, £11 to £19 2s. 6d. Sheep: Breeding ewes, 35s. to 46s.; store wethers, 35s. to 43s. 6d.; wether lambs, 24s. to 30s.; fat lambs, 33s. 6d. to 38s

EAST ANGLIAN NOTES.

If the unexpected frequently happens in social life, how much more likely is it to occur in matters relating to farming. To day we can see throughout the Eastern Counties the cereal harvest in full swing; in fact, in the southern portion of Essex few fields of corn are now upstanding, the reaper having already done most of the work required, and in this connection one cannot but help noticing that the self-binder this season has been in much greater evidence than in previous years. So expeditiously has been the ingathering of the corn that in a few days we are to have the feast known from time immemorial as the "Harvest Home." Thus we have to record a fairly early harvest, instead of a late one as was expected last June.

It was at Braintree that the first sample of new wheat was sold in East Anglia, and that was on the 26th of last month, when 33s. per qr. was given. Since then new wheat and oats have been hurried forward on to the various markets. Prices, therefore, have fallen both at Colchester, Cambridge, Norwich, Yarmouth, and elsewhere, as the quality had not had time to become fixed. It was not until the Ipswich market on Tuesday week last that any sample of new wheat was shown, and then it was only to show the quality of the grain for this season. There were, however, several samples of new winter oats offered that made 18s. per qr. Now as regards the period to market grain, it is well here to note that wheat improves with keeping, as it has to be severed from the root before it is ripe for milling or marketing purposes, and in this connection we would remind our readers that although there is no particular time that can be named for the business of threshing, inasmuch as the condition in which it was gathered into the stack and state of maturity has to be thought of, still we should note that an old writer of the sixteenth cenury gives the following recommendation:—

"Such wheat as ye keep for the baker to buy
Unthreshed till March, in the sheaf let it lie;
Lest foistiness take it, if sooner ye thresh it,
Although by oft turning ye seem to refresh it."

In these ancient days it was the baker who was master of the mill, and the miller was a subjugated trade. What a difference now, especially in the case of the London bakers! Millers now rule our provincial markets, while they do not forget to hold their tied houses strictly in subjugation, if possible to squeeze the farmers.

The Mayor of King's Lynn presided at a meeting of the Local Committee of the Norfolk Agricultural Show that was held recently, when a most satisfactory statement of the local receipts and expenditure was presented and passed. The total receipts amounted to £419 18s. 1d., comprising £11 19s. 7d. balance brought from the 1898 account and £407 18s. 6d. subscriptions received this year. Of these amounts £150 was the guarantee paid to the Norfolk Agricultural Association, £59 10s. was expended for local prizes, and after payment of all necessary expenses a balance of £50 remains in hand, that has been placed on deposit at the bank.

On August 1, in the days of the Druids, it was the custom for the ancient Britons to present to their gods a loaf made of new corn, in the hope that this offering of the first fruits would secure to them a good harvest. When the country became Christian the custom was continued, and the day came to be called Loaf mass, which in turn was corrupted to Lammas, from the Anglo-Saxon hlaf (loaf or bread), mæsse (feast).

It is some time since we have heard of any extensive damage to cattle from eating the deadly yew, but the writer has just learned of such a case from Lincolnshire. For, while grazing in Blankney Park, a herd of cattle broke into an adjoining plantation and ate freely of some yew trees, with the result that nine of the animals have since died, and the others are very ill from the effects of their poisoned meal.

Steam and power threshing is supposed to have so rapidly displaced the flail, and an old Suffolk farmer to the writer on Tuesday at the Ipswich market, that unequivocal success is claimed for it. So far as present methods of barley threshing are concerned, the claim cannot be admitted without very material reservation, for we have not met finality in relatively any minor detail. And then my Suffolk friend waxed warm on the superior work done by the flail, and said that he had been last March in out of the way Robertson Watson near Narberth (Wales), where the flail is still used, corn threshed in a way that one could be proud of.

A curious find is reported from the sea coast village of Brancaster, Norfolk this week, for while Mr. Thomas Farmer was walking through a field of barley cultivated by himself he noticed what he thought was a stem with twin heads, but on plucking it found that there were four separate ears carried on one straw, and that the largest of the ears contained twenty-four grains. It should be mentioned that Mr. Farmer is nearly eighty years of age, so that this discovery speaks well for the keenness of his sight, and he states that although he has been engaged in agriculture all his life he had never before seen or heard of such a specimen.

Tring Show.

How popular this excellently managed show has become was made perfectly clear at the sixty-sixth annual fixture held on Thursday in Lord Rothschild's beautiful park at Tring, as the attendance was a remarkable one and could not have been far short of 23,000. Every spot of the show had its vast concourse of spectators, but the best idea of the attendance was gained in the afternoon, when the crowd gathered round the special ring to witness the jumping, driving, and other contests. Although each year the size of this ring has been increased every available space was occupied, and drags, carriages, motor cars, etc., many numbers deep, extended nearly the whole of the distance not taken up by the grand stands. The accommodation here was considerable, spacious erections having been constructed, but they proved all too small, large numbers of visitors being unable to gain admission. Such an attendance was very gratifying to the officials of the Society, but they thoroughly deserved the success, for the show is undoubtedly one of the best-managed and most interesting of the one-day fixtures held in this country, whilst it can give points to many of the county shows. The officials of the society, and above all their excellent Secretary, Mr. Frank J. Brown, are always on the *qui vive* for new ideas, with the result that as show succeeds show the organisation advances a stage or two nearer perfection. One of the chief improvements made this year was in the stabling of the agricultural horses. Hitherto they have been tethered in substantial, but not altogether elegant, standings, but this year they were accommodated with conveniently-arranged stabling of converted timber painted white throughout, adding not a little to the general effect of the showyard. The collecting ring for the big ring was also altered by setting it further back and giving more room for carriages between the two, and providing a more level portion of the park for the purpose. In the butter tent an entirely new feature was introduced, the fresh green beds of grass upon which the exhibits have been staged hitherto having been replaced by a miniature water-lily bed, formed by a table with 9 in. of water, having water lilies and leaves on the surface, surmounted by white marble slabs resting on stone blocks just above the water. Upon these the butter was displayed.

The following is a comparative statement of entries for the past four years:—

	1905	1904	1903	1902
Cart Horses	186	197	228	220
Nags and Hunters	214	219	220	273
Shorthorns	94	96	78	94
Jerseys	114	88	119	92
Sheep	60	64	66	37
Pigs	59	71	50	54
Butter and Honey, Poultry	113	121	114	101
Milk and Butter Tests	85	103	93	80
Dogs	113	80	--	—

The gentlemen officiating as judges in the chief sections were:- Shire and Cart Horses—Mr. E. H. Cartwright, Louth; Mr. Peter Davies, Warburton, Cheshire; Mr. James Gould, Lymm; and Mr. E. Green. Hunters, Hacks, and Jumping, etc.—Mr. J. Clem Barton, Fairford, and Mr. J. T. Rogers, Charlton Kings, Cheltenham. Shetland Ponies—Captain and Mrs. Hope Johnstone, Polebrook, Kent. Harness Classes—Mr. W. S. Hall, Watton, and Mr. Alfred Rowell, King's Lynn. Polo Ponies Lieut.-Col. Renton. Shorthorns—Mr. W. Crosland, Buscot Park, Faringdon, and Mr. J. T. Hobbs, Fairford. Dairy Cattle—Mr. G. Taylor, Cranford. Jerseys—Mr. G. P. Mead, Bicton, Shrewsbury, and the Hon. Alex. E. Parker, Doveridge, Derby. Milk and Butter Tests—Mr. E. Mathews, Amersham. Sheep Mr. A. F. T. Drake, Salisbury, and Mr. J. M. Eady, Kettering. Pigs—Mr. J. Hallas, Warrington, and Mr. J. Watts, Chipping Norton.

Shire horses were a magnificent lot, and some were of the opinion that a better group has not been seen at any show in the South this year. The best of the mares foaled previous to 1902 was Sir Alexander Henderson's Argent, a massive and well feathered daughter of Harold and Ivy. Fashion, from the same stud, headed a small class for three-year-old mares. Mr. T. Simpson Jay's Johnson Fairy Queen was the best of the two-year-old fillies, his Majesty's Fascomia being third; but in the yearling class Lady Constance, bred at Wolferton, was an easy winner in spite of the very keen competition. The winning colt was the Messrs. W. and J. Thompson's Derford M.D., and Mr. Hamer Towgood's Rolleston Fuchsia was the best of the mares with foal at foot. A very promising foal is Dunsmore Jameson, bred and exhibited by Sir P. Albert Muntz; he headed quite a large class. The winning filly foal was Sir A. Henderson's Buscot Vera.

The principal prizes in the open classes for hunters were taken by Mr. J. H. Stokes, Mr. J. Drage, Messrs. W. C. and A. J. Flowers, and Mr. C. N. Manning. Local exhibitors also entered an exceptionally good lot of animals. Mr. G. A. Elliott won the three medals given by the Hunters' Improvement Society, with Venus, Pierrette, and Fairplay. Mrs. A. J. Beale was the most successful exhibitor of Shetland, and Miss L. Standish, the Hon. Mrs. Ives, Mr. J. Barker, and the Rev. D. B. Montefiore of polo ponies. In the open harness classes Mrs. Hartley Batt won again with Heathfield Squire, a horse that has taken no less than thirty-one first and champion prizes, besides twenty cups and two gold medals this season; Mr. W. S. Cunard, with Wild Lucy, also a well-known winner; while Lord Jersey and Sir Horace, a pair that made their first appearance yesterday, won in tandems for Mrs. Hartley Batt.

The Tring Show has always been noted for its fine cattle section, and this year the entry was more representative than usual. The Shorthorns were, however, not quite up to the standard of excellence which has been often reached at Tring There were, notwithstanding, several admirable specimens of the breed, notably Mr. C. Birdsey's Primrose, an excellent red and white dairy cow, to which the judges awarded the champion cup. For this honour, Mrs. R. Buckmaster's Braile's Chorus 3rd was reserved, the same exhibitor obtaining various other distinctions. Only four exhibits came before the judge in the pedigree Shorthorn cow class, wherein Messrs. Sherriff and Sons, with Lucella, an animal which undoubtedly answered the requirements of milk, quality, and flesh, were awarded the first prize. Mr. H. S. Leon's grand heifer Roseleaf, was placed first in her class, with the same exhibitor's Silver Florence second; whilst Mr. Leon was also first for heifer calved in 1903 with Lancaster Lass; and his Bletchley Challenger was first for young bulls under one year, and he also supplied the first prize Shorthorn heifer calved in 1902.

Jerseys were as good this year as they have ever been. Most of the leading prize-winners of the year were present excepting those belonging to Lord Rothschild, who does not compete at Tring. The first prize animal in the cow class was the winner of the first prize at Somerset, on May 11, a first at the Bath and West, and a first at the Royal. She is a beautiful cow, and has not been beaten. Bulls were a strong class, especially in the yearling section, and the yearling heifers, too, were very promising. The representatives of the breed at Tring show signs of steady improvement.

There was a creditable show of sheep in both the open and district classes. In the open the leading prize-winners were Mr. R. P. Cooper and Mr. R. Barclay. Mr. J. Williams won Lord Rothschild's special prize, and Mr. R. P. Cooper the cup given by Mr. R. A. Cooper, which, however, he relinquished in favour of Mr. Barclay, who was reserve. Mr. R. W. Hudson, Mr. R. E. Horwood, Mr. A. D. Acland, Mr. T. Henson, and Mr. R. A. Ayre took firsts for pigs, the last-named also winning the champion cup and the two silver medals.

As usual, the sheep dog trials for prizes presented by Mr. Rothschild, M.P., aroused great interest among the visitors to that part of the park which was set apart for their decision being the Crown Prince and Crown Princess of Roumania. Their Highnesses evinced the greatest in the work of the cleverly trained dogs, which were directed in their tasks by some of the best known handlers in the country. Mr. Barcroft, Lord Derby's shepherd on the Scout Moors, near Bury, Lancashire, gave an especial exhibition for the benefit of the Royal visitors with the famous dog Scot. The task which was set each of the eighteen dogs was to gather sheep released from a deer cart, four hundred yards from where the handler was obliged to stay and direct his charge, work the sheep through three sets of hurdles, each in the shape of a false fence, through others in the form of a Maltese cross, and up to the pen, the latter, of course, having a narrow opening. A time limit was set by Mr. R. S. Piggin, the judge, but the bulk of those which penned their sheep averaged but 14 minutes, and the prize money was divided between Mr. T. Dixon's (Kirby Stephen) Swallow, Mr. W. Akrigg's (Sedbergh) Lady, Mr. G. Barcroft's (Bury) Dust, and Mr. J. Mose's (Oswestry) Lassie. The latter was awarded a special prize which was offered for the best-looking working sheep dog.

(*Reports of other Shows will be found on pages* 199, 200, *and* 205 *to* 208.

"BE WISE IN TIME."

FARMERS should take care (especially in view of the comparatively low rates of premium) to insure against loss through **STORMS** and **FIRE.**

The **HOMESTEAD, FURNITURE, OUT-BUILDINGS, LIVE STOCK, IMPLEMENTS, STACKS, AND GROWING CROPS** all represent property which can, by the present modern system of **INSURANCE**, be covered at a trifling annual outlay.

INSURANCE against death or injury through accidents should not be neglected.

ROYAL INSURANCE COMPANY.

FIRE, LIFE, HAILSTORM.

Invested Funds . . £13,062,125.

HAILSTORM INSURANCE.

The Royal, besides being the largest Fire Insurance Company in the world, is one of the few offices that undertakes risk from Hailstorm. The important feature for Agriculturalists when effecting protection on their property is the opportunity afforded them of combining insurance against Hailstorm and that of Fire Insurance in one office.

Gentlemen able to influence introductions with this object are invited to make application for Agencies.

Offices, 28, Lombard Street, London, E.C.

Points of Leicester Sheep.

SIR,—Please answer this question: "What is the colour of the head of a Leicester sheep?" I take in your paper. W. M.

Season in North Wiltshire.

SIR,—The summer has proved far more favourable than seemed probable at the time of my last report, when the cold night-frosts, and dry, harsh winds of May had given the county such a sterile appearance that hopes were abandoned of the hay crop, and the fate of the roots was also hanging in the balance. Then the splendid rains of June worked wonders, and farmers are everywhere expressing satisfaction at the season. The hay—about three-fourths of an average crop—has been well and cheaply made, but the ricks remain mostly unthatched. A large quantity, however, is safe under hay-barns, which are rapidly springing up on every side.

On a large estate in North Wilts no farm is without one, and it is estimated that, compared with thatching, a return of 20 per cent. is made on the outlay—saved in the cost of straw and labour alone.

The corn harvest had well begun and was proceeding smoothly, until the sudden change from beautiful weather to wind and storms of almost autumnal violence caused a check. Many fields are badly laid, and reaping-machines must now give way to hand labour, for which a great cry already goes up. Wheat and barley are good, and should yield well, oats are fair, and roots will be good, though mangolds are either late or show a ragged plant.

Milk has fallen off greatly, but the supply in London is sufficient for the holiday time, and a further glut may be expected after the rains. Graziers are having another bad year; but pigs are profitable both in breeding and fatting.

R. P.

August 8.

Crops in Kerry.

SIR,—On the whole, except in a few places, this may be considered a fair year, hay, although short in quantity, is excellent in quality; at least what was cut early. Early sown roots are doing well, the late rains having much improved them.

Potatoes never looked better, and ought to turn out an excellent crop. Pastures a bit short in keep, but after grass doing well. A plentiful supply of fuel (peat) cut and well saved. The trade for store cattle almost at a standstill. Corn promising well, a bit short in straw, but good in grain.

J. E. B.

August 8, 1905.

Promising Season in Dorset.

SIR,—The season on the whole has been a very satisfactory one. Fine weather is badly needed now to finish harvest. The root crop before the recent rains was in rather a critical state. Now a fair crop of roots is pretty well assured.

Wheat is a heavy crop of excellent quality. The barley crop is quite up to average in quantity. Cannot say yet what the quality will be. The oat crop is the worst. Very few pieces are heavy; all the late sown are very light. Hay is not a heavy crop, but it is unusually well made.

Sheep have done well, and prices have been good. Just at present the mutton trade is rather quiet, but the best quality makes 8½d. per lb. Wool made about 2d. a lb. more than in 1904.

Cow stock have done very well. Milk was scarce in July but now is more plentiful, as London trade has fallen off owing to holidays. If the corn crop can be secured without damage, this will be the best season farmers have had for some years.

G. E. R

August 9.

Crops and Stock in Hampshire.

SIR,—The season so far has been an improvement in most respects in comparison with the last three years. Live stock have done very fairly well, but the prices of summer beef have been somewhat disappointing—demand being very limited, and, on the whole, quite a halfpenny a pound less than a year ago; mutton also is 5 per cent. cheaper, but store sheep have been selling very well indeed all through. Pigs remain cheap.

The hay crop, although not quite an average, has been well secured. Roots are very variable, charlock having in many places starved the young plants beyond all hope of recovery. Mangold cannot be said to be an average, as many pieces had to be ploughed up, and many others are a poor plant; but the crop has grown very much during the last six weeks, and is still thriving fast.

The cereal crops are making a much better show on the whole, but the last seven days have been very showery, and, although not much harm has been done to the crops, fully two-thirds of that time has been lost; but, given another fortnight of fine weather, very little harvesting will be left to be done in this neighbourhood.

The crop of wheat promises to be from two bushels to four bushels over an average, which represents from two to three sacks more than last year, which turned out a miserably low yield.

Barley promises to be rather over an average, and with nice weather good quality. Oats.—Winter oats are the best grown for several years, the area, however, is barely an average. Spring oats, where well farmed and sown during the capital season in February, are a good crop; but those sown later are generally a poor crop; taken all round the crop will not be an average one.

The young grass seeds in corn stubbles appears to be a poor plant, and probably suffered very much from the May drought. On the whole, if prices would only keep to a decent level, things would appear better; but when one hears of the prevailing prices for new rye, winter barley, and winter oats, one does not feel very much encouraged to be optimistic.

E. E.

August 9.

Prospects from Hampshire.

SIR,—The wheat in this district is very good and above the average. Barley looks very well very little cut owing to the unsettled weather. Oats are also very good, except the late sown, which is very short in the straw. Mangold has improved wonderfully of late, the plant in some fields is rather thin and uneven.

Sheep feed promises well, swedes, rape, and turnips are growing well since the rains, except where the fly has almost cleared the young plants. The long spell of dry weather has scorched up the pastures, consequently the supply of milk has fallen off considerably. Sheep and cattle are doing very well, and prices for lambs have been better than last year; this was all the more satisfactory as there was a larger crop of lambs; there was also a very noticeable rise in the price of wool.

The hay crop was under the average, some second cuts have been secured in good condition. A fine spell of sunny weather is now much to be desired, as a great deal of corn in the district is still standing waiting for the machines; very little corn carting has been done.

August 10.

Cattle Poisoned with Weed-killer in Somersetshire.

SIR,—The harvest is now nearly finished, and very good crops are being secured. The storms of last week did some damage and delayed the work somewhat, but as the rain was badly needed for the root crops and the pastures, there was compensations; before that time many had to cart water for the cattle, and as a caution to those who may have to do so again, I desire to report a very regrettable circumstance which has happened near here.

A farmer had some valuable grazing cattle in a field where the landlord was doing some wall building, and for the purpose water had to be carted and run off into a tub for the convenience of the masons. This was done in the field where the cattle were; by and by some of them died, the others being removed, as might be expected. Experts were obtained and poison detected, but how it came there occupied the interested parties a long time, until some one recollected that the water-cart used to bring the water to the field had previously been used by the estate men to distribute a weed-killer on the drives, and as some of it had doubtless been left in the cart, hence the supposed cause of the mischief; it is due to the landlord to state that when these facts were brought to his notice, he at once compensated the tenant.

I recollect another case where a gardener who was using a watering pot to apply some weed-killer to the paths, and while passing the stables with his pot full, turned in to the harness-room to speak to the coachman, and, to ease his arm, stood the pot on the corn bin. When he came to pick it up again he found it had been leaking, and some of the weed-killer had run through a crack in the cover of the bin. Knowing the danger, he cautioned the coachman, and advised him to take out the corn and destroy it; this was done only partially, the consequence was the loss of two valuable carriage horses.

R. B.

August 10.

Berkshire.

SIR,—The warm forcing weather in July brought harvest on rapidly, and winter oats, which are grown to a much greater extent than formerly were cut in some places soon after the middle of the month. The crop was generally good, but much laid by the rain.

Wheat cutting commenced about July 26. The crop is generally good, and quality excellent; not much has yet been stacked, as the heavy rain of August 5 soaked the shocks, and several days since have been more or less showery.

Barley is a fair crop, but in some cases the July heat caused it to ripen prematurely, which will make a thin sample. Spring sown oats never recovered from the drought in May, and are a light crop.

Last week's rain was of great benefit to the roots, which were beginning to give up; they now promise to be a good crop, although on some farms, probably from want of hands, hoeing has been neglected. The rains have also much benefited the pasture which on dry soils were beginning to look brown.

The sheep trade at Ibsley on August was rather slow, especially for ewes, which were in large supply; lambs, which were less numerous, sold better.

Home Notes.

Imports and Exports.

Again, the official returns mark a great falling off in the quantity of imported hops. In June the figure was 1,521 cwt., but last month it dwindled down to 522 cwts., of which America sent in only 43 cwt., and other countries 479 cwt. Comparing July, 1905, with the same month in the two previous years, we find that the most recent figure is a little more than one-sixth of that returned in 1904, and less than one-tenth of the figure of 1903. Our total imports for the first seven months of this year are 32,808 cwt., against 98,790 cwt. in corresponding period of last year, and 52,916 cwt. in 1903.

Turning to our exports, I find that we shipped last month 603 cwt. of English and 597 cwt. of foreign hops, so that our outgoings exceeded our arrivals by 522 cwt. Further examination of our foreign transactions for the seven months ending July 31 shows that in the current year we have exported 11,807 cwt., against 11,035 cwt. in 1904 and 7,598 cwt. in 1903, the net additional supplies being, for seven months, in 1903, 45,318 cwt.; 1904, 87,755 cwt.; and 1905, 21,001 cwt. These figures prove that foreign reserves must now be reduced to the lowest possible point, and suggest that whatever may be this season's yield of plantations abroad the great bulk will probably be required to meet the demand of local consumers.

The Coming Crop.

The atmosphere of "l'Entente Cordiale" that now surrounds us must be my excuse for introducing a quotation in French. It is taken from *Le Petit Journal du Brasseur*, in the last issue of which, my friend the Editor, remarking upon the difficulty of reconciling the hop reports with actual experience, says: "Ceci montre combien le Petit Journal a raison de ne donner dans ses rapports que des faits constatés, et de s'abstenir d'en déduire des prévisions toujours aléatoires." In these words he claims that he is right in only giving "ascertained facts" in his journal, and in avoiding any deductions, or attempting to formulate therefrom any illusive forecasts. My friend is undoubtedly on the safe side in thus deciding but his difficulty, as well as mine, is found in the answer to the question, 'Where are the ascertained facts in connection with hop growing and the hop trade?' For example, can we obtain from any source reliable facts concerning the growing crop? The grower desires to minimise as far as possible the effect of a large yield upon values, speaks eloquently enough about the great growth of bine, but moderates his enthusiasm, as he suggests the possibility of hail storms, the risks of mould and late blight, and the thousand and one other dangers to which the plant is still exposed. He honestly believes what he says, and to him his words are "ascertained facts." But quite another story is heard in the Borough. The merchant refers freely to a phenomenal crop, and does not hesitate to predict an unprecedented yield. Some of the estimates are positively startling, and they are given with such confidence that one cannot but assume that they are "ascertained facts" in the mind of the speaker.

The factor is generally more cautious, although I have heard from some of them some very factlike and bold expressions. He agrees with his client, but does not dispute with his customer. And then, after the season's business is practically settled, appear the belated official estimates, which nobody believes in, but everybody ridicules. Therefore, my editorial friend, while I agree with your wise determination to "stick to facts," I must ask you to tell me where I can find them, and whether I can be sure of their identity when I think I have secured them. We are compelled to deal with a large proportion of supposition in this world, and I fear that we must be content to surmise and to deduce, so long as we see only "as through a glass darkly."

To come to the important problem. Have we any facts to guide us? Yes, there is one that is indisputable. The bine is strong, plentiful, and healthy; every garden in every district testifies to this truth, and if the weather continues favourable a full crop may be safely expected. What weight we shall actually gather depends upon unforeseen contingencies. In many plantations the laterals are disappointing in their promise of hops, and it appears to be generally considered that we shall have to depend mainly upon the top of the bine. This is necessarily exposed to all climatic changes. It is very sensitive to alterations of temperature, the sun scorches it, and cold nights check its development, high winds knock it about, and hail drives upon it with unmitigated force. Therefore a top crop is the most risky, and we have yet to see whether Nature will be sufficiently favourable as to enable us to realise our anticipations. Estimates are therefore at present absolutely unreliable, and cannot be brought into the category of facts. Nevertheless, although the position is certainly somewhat critical, we may assume from present appearances that we can reckon upon a fairly bounteous yield, and expert observers are making their calculations in accordance therewith.

The Borough.

is waiting further developments. Trade is quiet, but there are indications in frequent inquiries that consumers are wanting hops. Of course, values of available stocks are being lowered by the reduced bids of buyers, but there still remain some holders who are willing to abide by their past firmness, and to refuse to accept the very low offers that are made. In another week or two we shall be better informed as to actual prospects; in the meantime, it is wise to abstain from too certain anticipations, and to be prepared for the issue of events, whatever it may be.

Hop Report.

THE VALLEY OF THE MEDWAY (August 12).—The Bramblings are turning fast from burr into hop; they have been in the burr stage a long time, and some mould has appeared as they turn into hop. The Goldings and later sorts are now in burr, but in all the heavy-bined pieces it will be only a top crop. It is estimated by growers in this valley, which, by-the-by, was most fortunate last year, that this year's crop will not exceed last year's; but this, either way, is still uncertain till the Goldings are out in full hop. Picking will not commence much before the end of the month.

Foreign Notes.

U.S.A.

Evidently the opinions of experts as to the crop prospects are not identical. The following reports, recently to hand, show how very far apart are the estimates made by observers, who are each entitled to claim reliability, by reason of their opportunities and their experience. From one source I hear that the conditions are on the whole most excellent. The outlook in California, Washington, and New York could scarcely be better. The estimates are, for California, 70,000 to 75,000 bales, Washington, 45,000, and New York State, 70,000 to 75,000 bales. Oregon has been visited by severe aphis blight, which is said to have been conquered by washing, and although the results are somewhat uncertain, it is calculated that in any event from 100,000 to 120,000 bales may be expected from this State. Thus, according to these figures, the total crop of the U.S.A. is estimated by these correspondents at something like 500,000 bales, or about 25 per cent. in excess of last year.

Now for the other side. A Californian reporter says that in Sacramento County the outlook is poor, owing to unusual weather conditions, and that it does not indicate more than a half crop, similar information coming from Sonoma and Mendocino Counties. At Wheatland, after examining some 1,500 acres, he is opinion that the best grounds show no improvement, and in a large proportion of yards there are unmistakable signs of deterioration. Speaking of one well-known ranche of between 500 and 600 acres, my correspondent says the prospects are as unfavourable as he has seen in California for twenty years, and does not believe that the average of the whole will exceed 1,000 pounds per acre. Quoting an Oregon correspondent, who writes concerning Polk County, where the principal hop yards are found, it is said that the lice are as thick as they can be, and the honeydew is dripping from the leaves, and that unless conditions become more favourable the crop of 1905 cannot possibly be as large as was the 1904 crop. Summarising this information and including that which comes through the same channel from New York, it would appear that the U.S.A. total yield will not exceed that of last year, and will probably fall short of it.

"Who shall decide when doctors disagree?" I will not attempt to reconcile these great differences, but will leave to my readers the task of settling the matter, and forming their opinions accordingly.

There is, however, one point that materially affects the position, and is worthy of notice. I am informed that the amount of hops used in the U.S.A. during the past fiscal year was only 180,000 bales, or 40,000 bales less than was estimated. This is explained by the fact that brewers are reducing the amount of hops per barrel, as beer drinkers seem to prefer lighter beer, and thus a big saving is effected. Should this smaller consumption be continued, it will certainly result in the balance available for exportation being much larger than has heretofore been calculated upon, and if this inference is correct, growers must naturally anticipate that their day of high prices and big profits will soon be concluded. The future of the U.S.A. hop industry is therefore very uncertain, and cannot safely be predicted.

Bavaria.

Spalt.—Early hops are developing, and the later sorts are in burr. A thunderstorm has softened the soil and the plants have been refreshed. If weather continues favourable the crop will be of fine quality. Last year's hops are cleared out.

Pleinfeld.—The condition of the plants is generally good, but there are some weak yards. All are sound, free from blight, and rapidly developing.

Schnattach (Hersbruck). — The hops have recovered from previous unfavourable weather and are generally in good condition, some being very good. Harvesting will begin from the 20th to 25th August.

Neustadt (Aischgrund).—Hops are making good progress, and the early sorts are forming cones. Everything looks very promising.

Wolnzach (Hallertau).—The gardens are coming on nicely, weather being very favourable. All are in burr, and some are showing hops. There is no disease to be seen. Picking will begin about 23rd inst.

Pfaffonhofen (Hallertau). The condition of the hops is good and they are well forward. The harvest will be nearly equal in quantity to last year.

Kinding.—The condition of our hops is unequal. Some have reached the tops of the poles and have very fine laterals with many hop cones. On the other hand, some are of small, weak growth, and have not any laterals. The crop will be smaller than last year.

Belgium.

The development of the plantations both in Alost and Poperinghe is progressing satisfactorily, and the outlook favours a fairly abundant yield. Demand for 1904's is very slow, and prices of available hops are rather weaker. Quotations for October November delivery of new crop are distinctly lower.

All official reports and notices of the National Association of English Hop Growers are printed in the MARK LANE EXPRESS, *and current information from all parts of the world, likely to be of interest and benefit to the members of the society, and Hop Growers generally.*

Harvest Weather.

The "Mark Lane Express" Special Three-Day Forecast.

1. Essex Street, Strand, Friday, August 14th, 1905.

GENERAL PREDICTION.

The slow spread of anti-cyclone North-eastward over the British area, following the recent extensive showery cyclonic system, now over Eastern Russia, is favouring a further short spell of fair weather. The first changes to more unsettled weather may be expected to set in over West Scotland and the S. and S.W. British coasts. The general weather sequence will be as follows:—For the first day or two mostly fine or fair with light breezes, Easterly in the South to Westerly in the North and normally mild to warm. For the remainder of the period, fair to cloudy in the Eastern half of the entire area. Cloudy and some showers in the Western half and Southern districts, wind freshening; temperature warm to cooler.

LOCAL PREDICTIONS.

No 1.—Scotland:—At first cloudy, some showers in the north, fair elsewhere, normal; later, fair to cloudy and some showers in the West, milder. Finally, some passing showers chiefly in the North and West, and cooler. Wind chiefly S.W. to N.W.

„ 2.—England (N.E.) and part of Scotland:—Peebles, Selkirk, Durham, Lincoln, Northumberland, Roxburgh, Yorkshire, (N. & E. Ridings).—Mostly fair, with some probability of showers in the latter part of the period. Wind S.E. to S.W. and W; light to moderate. Temperature normal to warmer and then cooler.

„ 3—England (East):—Bedford, Cambridge, Essex, Hertfordshire, Huntingdonshire, Norfolk.—The same as No. 2, but with less probability of showers.

„ 4—Midland Counties:—Buckingham, Derby, Gloucester (part), Hereford, Leicester, Northampton, Nottinghamshire, Oxford-Rutland, Shropshire, Stafford, Warwick, Worcestershire, York, shire (West Riding).—Fine or fair at first and later fair to cloudy. Finally some showers probably with thunder at first. Temperature mild to warm. and then cooler. Wind E. to N.E. and S.E. or S., and finally S.W. Light to moderate and then freshening.

No. 5.—England (South):—Middlesex, Berkshire, Kent, Surrey, Sussex, Wiltshire, Channel Islands, Hampshire.—The same as No. 4.

„ 6.—Ireland.—At first fine or fair with S.W. and S.E. winds; later fair to cloudy and some showers in the North Western and Southern borders; finally some more general showers at times. Temperature normal to mild and then cooler.

„ 7.—England (North-West) and North Wales. Cheshire, Lancashire, Westmoreland, Anglesey, Carnarvon, Denbigh, Flint, Merioneth, Montgomery.—At first fair and mild to warm with E. to N.E. and S.E. light winds; later S.E. to S.W. winds, fair to cloudy and warm; finally S.W. to W. winds, freshening some showers and cooler.

„ 8.—England (South-West) and South Wales:—Brecon, Cardigan, Carmarthen, Glamorgan, Pembroke, Radnor, Cornwall, Devon, Gloucester (part), Monmouth, Somerset.—At first fine or fair with light S.E. and N.E. winds; later fair to cloudy; finally some showers. Temperature mild to warm and then normal.

Moon Rises	...	7.5 p.m.
„ Sets	...	3.48 a.m.

Age of Moon—Thirteen days.

One-Day Forecast prepared by the Meteorological Office at 11 a.m. on Monday, August 14th.

GENERAL INFERENCE. The anti-cyclone centred over north-western Europe is drifting slowly northward but it is likely to maintain its influence over our Island during the ensuing 24 hours. Fine and rather warm weather may accordingly be expected to continue.

Scotland, N. and E.—Light variable to Westerly breezes, fair or fine generally, rather warmer.

England, N.E.—Variable to Easterly breezes, fine, rather warm inland.

England, E., Midland Counties, and England, S. (London and Channel).—Light Easterly breezes, fine, rather warm.

Scotland, W.—Same as Scotland, N. and E.

England, N.W. (and N. Wales).—Variable to Easterly breezes, fine, rather warm.

England, S.W. (and S. Wales).—Same as Eng. E., Mid. Counties and S.

Ireland, N. and S.—Same as England N. W. (and N. Wales.)

CORN MARKETS.

LONDON.

Mark Lane. Wednesday.—Wheat: English steady, quiet, at about late rates. Foreign, American offered ex ship, to arrive, at rather lower rates. Russian and Indian, ex quay, unchanged. No. 2 Club Calcutta quoted at 31s 6d to 32s. Russians, 31s 6d to 35s. Plata, 32s 6d to 34s. No. 3 Northern Manitoba at 32s 6d to 33s. Flour dull, unchanged. Hungarians quoted at 30s; Pillsbury's Gilt Edge at 20s 3d. Maize steady, quiet. Mixed American, ex ship, quoted at 23s 9d; landed at 24s 6d; and La Plata, ex ship, at 23s 9d. Barley dull. Odessa-Nico-Kherson, July shipment, ex ship, quoted at 19s 6d. Oats slow, unchanged prices. Common sorts quoted at 14s 6d to 15s.

Mark Lane, Friday.—Wheat: English steady, quiet at about late rates; Whites quoted at 32s to 35s; reds, 31s 6d to 34s 6d; foreign held at Wednesday's prices, but demand very limited. South Russians quoted at 31s 6d to 35s; Plata, 31s to 34s; choice white Kurrachee at 30s 9d; No. 2 Northern Manitoba at 35s. Flour slow, unchanged prices; Hungarians quoted at 30s 6d; Iron Dukes at 21s. Maize steady at fully late rates, but inactive; mixed American, landed, quoted at 24s 6d, and River Plate at 24s 3d. Barley firm, but quiet; Odessa-Nico-Kherson, ex ship, quoted at 19s 6d; and landed at 20s 3d. Oats dull, unchanged; common sorts quoted at 14s 3d to 14s 9d.

COUNTRY.

Ashford. Tuesday.—One sample of new white wheat, in poor condition, made 31s; new oats were quoted at 17s at 18s. The market was of a holiday character. Prices for old corn: Wheat, 32s to 34s; English feeding barley, 25s to 28s; mazagan beans, 32s to 34s; tick beans, 34s to 35s; maize, 27s to 28s; black oats, 20s to 22s; white oats, 21s to 24s; flour, white, 31s; seconds, 28s; sealing, 26s per sack.

Banbury. Thursday. Wheat, red (new), 28s to 30s per quarter; barley, 24s to 28s; beans (old), 32s to 34s; oats, 18s to 20s; ditto (old), 20s to 23s; peas (old), 29s to 33s.

Berwick. Saturday.—Attendance small. No change in the prices. No new grain offered.

Birmingham. Thursday.—A very slow market, the attendance being small and buyers scarce. River Plate wheats about 6d per quarter dearer on the week, other descriptions of foreign being about unchanged in value. Plate maize offered at 24s per 480lb. at Sharpness, being 1s down; flat ditto, 24s 3d per quarter at Bristol. Grinding barley offered at 19s 6d per 400lb. at Sharpness, being 6d under last week. There were a few samples of new English wheat on the market, value of same being about 11s 6d per bag (196lb.). Several samples of new oats, which made from 17s to 17s 6d per quarter (312lb.).

Brighton. Thursday.—Very quiet trade and small attendance. There were a few samples of new wheat offering at 31s to 33s. Grinding barley, 22s to 24s; new oats, English, 18s to 19s; old ditto, 20s to 22s; peas, 20s to 31s; beans, 30s to 31s.

Bristol. Thursday.—A quiet holiday market here today. Some few samples new English wheat showing; condition poor owing to damp weather. Foreign wheat unchanged. Barley 6d lower. Maize and oats unchanged. Flour steady at late rates. GRACE BROTHERS.

Bury St. Edmunds. Wednesday. There was a moderate supply of new wheat on the market, generally in good milling condition, but some of the samples offered were soft, and should have been stacked for a time before being brought to market. Useful reds and whites met a fairly steady demand at 29s to 30s per 504lb. Oats and beans firm. New peas sold at 28s to 28s 6d per qr. Maize quiet at 26s per qr. Grinding barley steady for spot, easier for forward delivery. Feeding stuffs all firm.

Cambridge. Saturday.—During the week good progress has been made with the harvest, but the weather has been showery, and wheat is not in first-class condition. At this market there was a fair quantity of new grain offering, but condition was lacking in some samples. Wheat made 28s to 29s, damp and inferior rather less. Oats 8d to 9d per stone, old up to 10d. A few lots of barley offering, but quality not good, and prices not settled. Red wheat, 28s to 29s; and white, up to 30s per

Canterbury. Saturday.—Some of the new wheats were threshed too soon, and prices have receded; values range from 31s to 32s, at which figure lots scaling 65lb. are selling. New grey peas seldom fetch more than 30s, and 19s is the price for oats weighing 44lb. to the bushel.

Chester. Saturday.—Market quiet, with fewer samples on offer, and no new fluctuations in value. A fair demand for feeding stuffs. Indian corn the turn easier on the week. Quotations: Wheat, 4s 6d to 4s 8d per 75lb.; old oats, 2s 9d to 3s 6d per 46lb.; beans, 5s 9d to 6s 6d per 20lb.; Egyptian beans, 17s 6d to 18s per 240lb.; Indian corn, 13s 6d to 14s per 240lb.

Chichester. Wednesday.—Small attendance, probably owing to the sheep sale. A few samples of new wheat, new oats, rye, and barley on offer. Slow trade. New white wheat, 31s to 32s; new red ditto, 31s to 32s; old red ditto, 34s to 34s 6d; winter barley, 25s to 24s; grinding barley, 20s to 20s 3d; oats, English, 16s to 22s; rye, 22s to 24s; tares 4s 6d to 7s; maize, 25s to 26s; flour, 27s to 28s 6d.

Colchester, Saturday.—There was a moderate supply of new wheat here to-day. Farmers were disappointed at the price offered by millers, and had to submit to a reduction of 1s to 2s per quarter from the prices current last week; condition varied. Oats were not freely offered; values unchanged. Peas scarce and inquired for. JOSEPH WILLS AND SON.

Coventry. Friday. There was not a large attendance, and business ruled quiet. Quotations were as follows: Old wheat, 14s to 15s per 504lb.; new wheat, 11s 6d to 14s per 196lb.; barley, 29s to 32s per 448lb.; oats, 5s to 5s per 304lb.; beans, 14s 6d to 15s per 496lb.; peas, 15s 6d to 16s per 496lb. The shows of wheat was of a poor character. A few samples of new wheat were tendered, and the quality was good. Oats were scarce, the new crop not a fine one so far as can be judged by the few samples.

Derby. Friday.—No old wheat on offer, but there were a few samples of new wheat shown at late prices. Spring corn nominal. White wheat, 34s to 35s; red, 33s to 34s; malting barley, 30s to 34s; beans, 30s to 32s; oats, 16s to 18s.

Devizes. Thursday.—There was a very small supply of corn, the broken weather of the past week having hindered harvest work. Prices unaltered. The following were the quotations: Best old wheat, 16s 6d to 17s 6d; secondary ditto, 15s to 16s; new wheat, 12s to 16s; new barley, 13s to 16s 6d; best barley, 20s to 22s; secondary ditto, 17s to 19s; old black oats, 18s to 19s; white ditto, 20s to 22s; malting barley, 20s to 22s; beans, 30s to 32s; tares, 4s to 5s; new flour, 24s to 26s; old flour, 27s to 28s.

Doncaster, Saturday.—Harvest being in full swing in the neighbourhood, the attendance was small. No new local grain showing. English wheat firm. The demand in foreign wheats is chiefly for Indians, which are 6d per quarter dearer. Feeding stuffs firm.

Dorchester, Saturday.—Market only slowly attended, consequent on farmers being in the thick of harvest, which is progressing very satisfactorily, despite occasional interruptions by rain. The few new samples of wheat as yet offering are of good quality, and make from about 29s to 32s. Buyers of foreign were able to acquire their supplies at lower rates. Grinding barley also favoured buyers to a trifling extent; maize, on the contrary, which is none too plentifully offered, brought 3d to 6d per quarter more money.

Dublin, Friday.—Wheat, 18s to 20s; barley, 11s to 12s; ditto malting, 18s 6d to 20s; oats, 11s 3d to 14s 6d; oatmeal, extra pinhead, 11s 6d to 13s; pollard and bran, 6s to 6s 6d.

Exeter, Friday.—Corn slow. English wheat scarce and rather dearer for old sorts; new sold about 3s 9d. Barley 6d cheaper. A few samples of new English barley were shown, but no price can be quoted for a week. Maize unchanged. Old oats firm; new made rather more money. Flour steady. English wheat, 4s to 4s 3d; superfine flour, 26s to 28s; fine, 23s 6d to 26s.

Glasgow, Wednesday. — Wheat and flour quiet on spot, and nominally unchanged on the week. Maize, 3d dearer. Indian corn unchanged, with quiet business passing. Oats 3d to 6d cheaper. Other articles of the trade quietly firm at unchanged values. GIBSON AND CLARK.

Glasgow, Friday. Market easy. Wheat dull, and prices the turn lower. Flour steady on spot, but easier forward, with only a small business passing. Mixed American maize steady at 14s to 14s 1½d per 280lb. Oats pressed for sale at last market-day's prices. Feeding stuffs quietly steady. A few samples of new oats were on offer.

Grantham, Saturday.—Harvesting being in full operation, there was no great bulk of corn on the market. There was a small supply of new wheat, and this was only in fair condition, and commanded 28s to 30s per quarter. Some new black winter oats were also offered, and changed hands at 16s 6d to 14s 6d per quarter. Blue peas of this season's growth were not of very good quality, and 35s to 40s per quarter was paid. Only one sample of new beans was shown, which realised 32s per quarter. No old corn was placed on the market.

Gloucester, Saturday.—A few lots of English wheat offering, reds making 3s 9d per bushel. Foreign steady and unchanged on the week. Maize firmer. Barley 3d lower. Oats unaltered.—WAIT, JAMES AND CO.

Hereford. Wednesday.—Harvesting operations interfered with the attendance, and the recent wet weather prevented new samples being shown. In the absence of business prices remain nominally as last week. Whole sale quotations: Wheat, 3s 10d to 4s per 62lb.; barley, 2s 9d to 4s per 56lb.; oats, 2s 3d to 2s 9d per 40lb.; beans, 3s 9d to 4s per 65½lb.; vetches, 4s 6d to 6s 6d per 65½lb. 3s 9d to 4s per 65½lb.; vetches, 4s 6d to 6s 6d per 65½lb.

Ipswich, Tuesday.—There was only a small quantity of new wheat on the market. Many of the samples were in really nice condition, but others were too soft for milling, and ought not to have been threshed at present. Useful parcels made 31s to 31s 6d per quarter. Grinding barley steady for spot, but somewhat easier for forward delivery; English, 26s to 28s; dressed Russian, 24s to 25s per 448lb; ordinary, 21s to 21s 6d per 400lb. Oats, beans, and peas, old corn, firm; new hardly offering yet. Maize unchanged at 25s per quarter, with only a moderate demand. Feeding stuffs all firm.

Leeds, Tuesday.—A good deal of rain has fallen since Wednesday, delaying harvest work, though very acceptable for root crops and pastures. Although shipments continue liberal and American advices come weaker under better crop reports, wheat must be quoted rather dearer, Indians being 3d to 6d better, but the market is of a holiday character. Maize 6d lower. Beans and oats steady. —DUNNS AND CO.

Leeds. Friday.—Both English and foreign wheats fully maintained. Tuesday's prices, with a firm tendency. New English was in fair condition at from 30s to 32s. There was no change either in malting or feeding barley, but maize was the turn lower. Beans, peas, oats, and flour were without change.

Leicester, Saturday.—Improved attendance of buyers and dealers, with large supplies of new season's home-grown wheats, but the samples came to hand in rather variable condition. Trade ruled steady at firm rates. Old wheat, red, 33s to 35s per 36 stones; white, 34s to 36s per 36 stones; new wheat, 34s 6d to 35s 6d per 36 stones; new oats, 20s per 26 stones; old oats, 24s to 25s per 26 stones.

Lincoln. Friday.—Farmers being busy in the harvest fields, there was only a limited attendance at market, and trade was somewhat quiet. A fair number of new locally-grown wheats came to hand, and realised from 30s to 31s per qr., delivered. A few new black oats were also shown, making 16s 6d to 17s 6d per qr., on rail. Other feeding stuffs quiet and unaltered.

Liverpool. Friday.—Wheat: The market has had a small attendance, but there is a better demand for Argentine wheat at unchanged prices; other sorts are quiet except Indians, which are firm at ½d advance owing to growing scarcity. Flour in quiet demand,, but no actual change is quoted in values of either foreign or home-made brands. Maize: Mixed is very steady, and meets a fair demand at ½d under last Tuesday; Plate ½d lower, but there is a good inquiry at the decline; European sorts are steady without change. Barley: Malting steady, unchanged; feeding is quiet at ½d to ½d decline. Beans are firm at full prices owing to new forward offers. Peas rather more inquired for, and firmly held at late prices. Oats in somewhat improved demand at about recent rates. Oatmeal firmly held at late currencies, but inactive. Oilcake: A quiet trade at late quotations. —SECOR AND TUNNICLIFFE.

Maidstone. Thursday.—Some of the samples of new wheat are good quality, but others not in such dry condition as could be expected after the fine harvest weather. Probably showers affected them. Prices were about 30s to 32s per qr. Very little other new grain on show at present, except a few about the value for yearling stock.

Manchester. Thursday. There was again a small attendance, and the general tone was quiet. Little or no English wheat was offered. Foreign was unchanged on the week, except Russian, which ruled rather in sellers' favour. Flour quiet at late rates. Indian corn favoured buyers. Mixed, to arrive, 5s 5½d to 5s 4d; Plate easier, at 5s 7½d to 5s 5d., to arrive. Oats steady and unchanged. Little new on offer. Barley quiet.

Newark. Wednesday. A small show of new samples, quality good, prices firm, owing to small quantity offering. New oats rather easier, other leading corn unchanged. Wheat, 31s to 34s; oats, 17s to 20s; beans, 34s to 36s per qr.

Newcastle-on-Tyne. Saturday.—A slow demand for wheat at unchanged prices. Maize firm on spot, easier to arrive. Foreign oats steady at last week's prices. Scotch slow to move, and lower prices taken to make sales. Peas firm at last week's quotations. Beans steady, unchanged in values. Barley quiet. JOSEPH POLLARD AND CO.

Northampton, Saturday.—Small attendance, farmers being busy with the harvest. The few samples of new wheat on offer made 28s in the mills. Other prices were: Malting barley, 26s to 32s; barley, 24s to 26s; new white oats, 17s to 18s; new black oats, 16s to 18s; old beans, 32s; flour, 25s to 29s.

Norwich, Saturday.—There were a good many samples of new wheat on offer at our market to-day, the condition being variable, which made from 29s to 30s per quarter. Cooler weather has prevailed during the past week, and harvest is progressing satisfactorily. Wheat, 220—31s. 7½d. —J. ARTHUR MILLS.

Nottingham, Saturday. — Several samples of new wheat offering; the condition and quality good. Prices ruled from 30s 6d to 31s. Grinding barley a little easier. A few new oats offering; fair condition, 18s, 19s., 12 net. Old beans firm.—ROBERT HUBBLE.

Oxford, Saturday.—There was only a small attendance at to-day's market, and very poor demand was experienced all round. Wheat sold up to 30s.

Peterborough, Saturday. — A fair quantity of new wheat offering to-day, quality and condition mostly good, and prices generally 28s to 28s 6d per 36 stone. New oats are disappointing in quality, and made 16s 6d to 17s 6d per 24 stone.—THOMAS HILL AND SON.

Plymouth, Thursday.—There was a small attendance on our market to-day. Wheat quiet. Barley 6d lower. Maize firm owing to scarcity on spot. Oats easier.—ORLANDO DAVIS AND CO.

Preston, Saturday.—The market was poorly attended. The inclement weather has prevented threshing of new grain, and consequently there was nothing doing. Flour was unchanged. During the week the market has been slow, the weakness in America being fully reflected. Sellers of wheat have had to concede 1d to 2d per cental to do business. Maize was also easier, but not quite to the same extent as wheat; prime mixed American was rather scarce. Other articles fully as dear. Quotations: Wheat, white, new, per windle of 220lb., 13s 9d to 14s 6d; ditto red, new, ditto, 13s 6d to 14s; flour, extra superfine, per pack of 240lb., 26s to 26s 6d; ditto superfine, ditto, 24s to 24s 6d ditto, best fine ditto, 22s 6d to 23s; oats, old,, per bushel, 3s to 3s 3d; beans, per windle of 220lb.; 16s 6d to 17s.

Reading, Saturday.—There was again a spare attendance, owing to harvest operations. Wheat trade was transacted was at following prices: Wheat, 32s to 34s; barley, 23s to 26s; old oats, 19s to 22s; new oats, 17s to 19s; pear, 28s to 32s; beans, 33s to 36s; flour, 24s to 27s.

Shrewsbury, Saturday.—The following were the quotations:—Wheat, 14s to 14s 6d; old white oats, 16s to 17s; peas, 13s 6d to 14s; beans, 17s to 17s 6d 225lb.

Retford, Saturday.—Owing to harvest operations the attendance was rather smaller than usual, and very little grain on offer. Without showing any quotable increase wheat well maintained its value, making 32s 6d to 34s per quarter. Maize still continues scarce, and small quantities changed hands for immediate consumption, at 27s to 28s per 34 stones; grinding barley, 24s 6d; English beans, 32s; black oats, 19s to 20s; white ditto, 21s to 22s per quarter.

Ripon, Thursday.—A few samples of new wheat, but little business was done. Both round and flat maize show a downward tendency. Prices: English wheat, 33s 6d to 34s; ditto, foreign, 32s to 36s; barley, grinding, 23s to 24s; oats, 20s to 21s; maize, round, 25s 6d to 26s 6d; ditto flat, 25s 6d to 26s 6d per quarter.

Southampton. Saturday.—A few samples of new English wheat selling at 30s. to 32s. Foreign firm. Barley 3d cheaper on the week. Oats and maize unaltered. Flour steady trade and a shade dearer.—FEAR, COLEBROOK AND CO.

Stamford, Friday. — Fair attendance, but a poor trade. Wheat, new, 28s to 30s; new oats, 19s to 20s 6d; old oats, 24s to 25s per qr. Maize unchanged.

Sunderland, Saturday.—Farmers, being engaged with harvest work, are not offering any grain at present, and there was no business passing at to-day's market. Arrivals coastwise: Wheat, 1,200 quarters; foreign, wheat, 9,692.—E. AND F. RICHARDSON.

Tunbridge Wells, Friday.—New white wheat, 31s to 32s; new red ditto, 30s to 31s; barley, 27s to 32s; grinding ditto, 19s to 23s; oats, English, 19s to 21s; rye, 23s to 24s; peas, 31s to 36s; beans, 32s to 36s; tares, 48s to 56s; maize, 24s to 28s.

Warwick, Saturday.—Few samples of new wheat and oats on offer; condition very variable. Prices about 11s per bag. No old grain on offer. Feeding stuffs slightly easier.

Wisbech, Saturday.—At market to-day several samples of new wheat were on offer; quality and condition mostly good. Prices ranged from 28s 6d to 30s. New oats variable in quality. Prices 16s to 18s.—JAS. FLETCHER.

Wolverhampton. Wednesday. — There was a moderate attendance and trade was quiet. Quotations: Wheat, 14s to 14s 6d per 216lb.; English beans, 13s 6d to 14s per 196lb.; new oats, 11s to 11s 6d; old oats, 13s to 14s per 196lb.

Worksop, Wednesday.—Moderate attendance. Small show of grain, which made practically last week's prices. White wheat, 32s 6d to 33s 6d; red wheat, 32s to 33s; barley, 26s to 28s; grinding ditto, 24s to 25s; white oats, 22s to 24s; black ditto, 20s to 22s; round maize, 27s to 29s; flat maize, 25s to 27s per qr.

Yeovil, Friday.—Many samples of new season's corn on offer, but the condition left something to be desired. This particularly applies to the wheat, which in several instances was quite unfit for milling. Best samples of the new crop made from 31s to 33s 6d per qr.; secondary making 28s 6d to 30s 6d; foreign wheat, 32s 6d to 33s 6d; best barley, 26s to 32s 6d; secondary, 20s to 24s; foreign grinding, 18s to 20s; old white oats, 18s 6d to 22s; new ditto, 20s 6d; old black oats, 20s to 22s 6d; new ditto, 20s 6d to 22s; Irish black, 17s 3d to 17s 9d; tares, spring, 40s to 42s 6d; tares, winter, 47s to 51s; rye, 22s to 24s; beans, 32s to 35s; vetches, 6s to 7s per bushel. Flour sold slowly, without change in values, fine making 26s to 28s; extra fine, 28s to 31s. Millers' offals sold freely, and a good inquiry for meals.

York. Saturday. Farmers are busy harvesting, and there was only a small attendance at the market. There was no change in the price of corn, and very little on offer. Fine white wheat, 34s to 35s; red, mixed, 31s to 34s per quarter of 504 stones. Oats steady; White Tartary, 18s to 19s; black, 18s to 19s; white Garton, 20s to 21s per quarter of 24 stones. Peas, beans, and maize no change.

FOREIGN

Hamburg. Saturday. The weather continues rather unsettled, and barley still in the fields are suffering so that the colour get spoiled. Of new Saale, the samples which have been shown looked rather poor, and also a good many of the Bohemian looked weathered; whilst of Slovacian some really choice samples are shown, but the prices asked for such are extremely high. Of new Hungarian the offers are quite general now, and they seem to be the best value, although for the present there seems to be no demand from England. FRANCIS M. TH. DUHNE.

Hamburg, Saturday.—Weather changeable. We had some sunny days, but also frequent heavy showers, interfering with harvest work. Market quiet for wheat and rye, but firm for feeding stuff. Offers of new wheat are increasing, and fine 61 62lb red Holstein has been sold at 30s 6d to 31s, 60 61lb red Saale to arrive per barge is offering at 31s 6d to 32s per 504lb f.o.b.; American red winter No. 2 August September is held at 29s, hard winter No. 2 30s 3d, 80 ko. River Plate 29s 9d to 30s 9d per 480lb c.i.f. Hamburg. Rye quiet; 9 20 25 South Russian afloat is offering at 24s to 24s 3d, 9 15-20 August-September at 25s 6d per 4801b c.i.f. Hamburg. Good stout Bohemian barley to arrive per barge has been sold at 32s 6d to 33s 6d, common new Saale, rather discoloured, is offering at 29s to 32s per 448lb f.o.b. Fine Chevalier Saale not yet offering. Good new Mecklenburg is selling at 27s 6d to 29s 6d per 448lb f.o.b. Fine Slovakian to arrive per barge is held at 35s to 36s 6d, good middling quality at 31s 6d to 33s, fine stout Bohemian at 34s to 36s per 448lb f.o.b. Feeding barley in better demand; 60-61 ko. South Russian on the spot is selling at 18s. August shipment 17s 3d, September-October at 16s 9d per 4001b c.i.f. Hamburg. Maize firm; mixed and River Plate on the spot 23s 6d, July-August 22s 6d to 22s 9d per 4801b c.i.f. Hamburg.—JOHN TATLOCK.

Paris, Wednesday. The provincial markets continue inactive, offers are increasing, but business is very difficult, farmers having taken up a firm position, while millers will not pay the prices asked. Business at the Bourse de Commerce remains inactive. Sellers are very reserved, whilst buyers are in no hurry to do business, and, as offers are fairly regular in the spot market, the tendency was heavy throughout the day, and prices fell off from 20 to 25c. for flour and from 10 to 15c. for wheat. Rye: Nothing doing, prices nominal. Oats, calmer, with a fall of 5c. in price. At the weekly spot market business in home-grown wheat is becoming brisker, and prices are falling in consequence of larger offers. In rye flour the market is firm, with only little business passing. There is regular inquiry for offals, especially for prompt parcels; prices remain firm. Rye offerings are fairly numerous, but the prices asked cause buyers to hesitate. There are no old oats left now, or, in any case, too small a quantity to cause a reaction in this situation, and new oats will not arrive for about another fifteen days. Barley is being harvested, but operations in the west are being retarded by storms. Some offers are now being made; qualities will only be ordinary upon the score of colour.—*Dornbusch*.

THE BALTIC.

The market for wheat cargoes has been slow in resuming after the Bank Holiday, and very little had been done when the week's trade ended at 1 p.m. on Saturday. We note, however, a cargo of Australian arrived sold at 32s. 6d. per 480 lb., which is a rise for that type, and of Argentine sold at 30s. per 480 lb., which is a slight fall. A cargo of new Roumanian has made 30s. per 492 lb. for October shipment, and No. 3 Manitoba on passage has realised 31s. 3d. per 480 lb.

Maize is firm, 23s. 3d. paid for arrived La Plata, and 23s. on passage—480 lb. Oats have made 14s. 6d. per 304 lb. for prompt shipment of Vologda, and barley is quoted 17s. 9d. per 400 lb. for prompt shipment of Azoff. A cargo of white Calcutta peas sold on Saturday for 28s. per 504 lb.

The arrivals of grain and seed-laden vessels at ports-of-call for the week were 8 wheat (2 Adelaide, 1 B. Blanca, 2 Geelong, 1 Melbourne, 1 Port Pirie, 1 Port Wakefield), 3 linseed (1 Buenos Aires, 2 Rosario)—Total 11.

The sailings of grain and seed-laden vessels from ports-of-call for the week were 5 wheat (1 Birkenhead, 1 Cardiff, 1 Dublin, 1 Glasgow, 1 Grimsby), 2 linseed (1 Harburg, 1 Rochester)—Total 7.

Since January 1, 1905, the total arrivals have been 253 wheat, 2 flour, 2 wheat and oats, 1 wheat and linseed, 1 flour and wheat, 13 barley and wheat, 8 barley, 5 maize, 1 beans, 4 locust beans, and 43 linseed—Total 333.

Last year during the same time the arrivals were 157 wheat, 1 wheat and maize, 31 barley and wheat, 15 barley, 4 maize, 4 beans, 4 locust beans, 1 rye, 23 linseed, and 1 canaryseed—Total 241.

The London Corn Trade Association announces that the following standards of Indian shipments for May have been made up:—

Wheat.—New and old crops: Choice White Kurrachee, Soft Red Kurrachee, Choice White Delhi from Kurrachee. New crop: Choice Red Kurrachee, Choice White Bombay, Atbara from Bombay, Soft Red Bombay, Soft Red Calcutta (April-May). Crop 1905 or new crop: No. 2 Club Calcutta, Atbara from Calcutta. Pease.—Crop 1905 or new crop: White Calcutta, Green Calcutta, Dun Calcutta. Gram.—Kurrachee.

The Association c.i.f. quotations for the settlement of rejections and difference in weights on wheat under Rule No. 4 of the Association East Indian Wheat Contract, are as follows:—Calcutta Club, 31s. 3d.; Soft Red, 30s. 3d.; Bombay Soft White Delhi, 31s. 6d.; Kurrachee Soft White Delhi, 31s. 6d.; Kurrachee—Choice White, 30s. 6d.; Soft White, 30s.; Soft Red, 29s. 6d.—all per 492 lb.

MANURES.

Liverpool, Friday.—Fertilisers as usual at this time are quiet. The trade in feeding stuffs is inactive and likely to be so until the corn harvest is all gathered, yet there are a few inquiries already from dealers and this points to a brisk demand as likely this coming autumn. Both importers and home producers are firm and offer in quantity with caution, under the belief we shall see higher prices in the near future. Present values are as per subscribed:—Nitrate of soda, best quality, 16c, guaranteed 95 per cent. pure, in bags, £12 5s to £10 10s; East India bone meal, in bags, £5 7s 6d to £5 10s; kainit, prime 23 per cent. sulphate of potash, in bags, £2 2s 6d to £2 5s; palm nut cake, prime, in bags, £5 15s to £5 17s 6d; linseed cake, American thin sliping, prime, in bags, £7 7s 6d to £7 15s; ditto English, prime, in bulk, £8 to £8 10s; ditto foreign round, prime, soft, in bags, £7 17s 6d to £8; cottonseed cake, N.A. decorticated, fair to soft, in bags, £6 15s to £7 2s 6d; ditto English decorticated, prime, soft, in bags, £7 5s 6d to £7 7s 6d; ditto English undecorticated, prime, in bulk, £4 10s to £4 17s 6d; cottonseed, crushed, 20 to 25 per cent. oil guaranteed, prime, in bags, £7 to £7 2s 6d; maize germ meal, prime, in bags, £5 15s to £6; coco oil cake, prime, in bags, £6 to £6 2s 6d per ton; linseed, fine bold feeding, in bags, £2 9s 6d per qr. 416lb.; cod liver oil, cattle feeding, prime, in casks, 4s 3d per gal.; treacle, feeding prime, in barrels, 4s 6d per cwt.; D.N.S. brand superphosphate of lime, guaranteed 25 to 27 p.c., in bags; ditto ditto guaranteed 30 to 34 p.c., in bags; ditto ditto guaranteed 35 to 38 p.c., in bags; [illegible] prime quality, guaranteed 36 to 38 per cent. phos., in bags; ditto prime quality, guaranteed 35 to 38 per cent. phos., in bags; ditto finest quality, guaranteed 45 to 50 per cent. phos., in bags—in metal. H. JONES LANGAR AND CO.

FRUIT AND VEGETABLES.

Covent Garden, Saturday.—Strawberries are in good supply and steady demand; cherries are plentiful and prices moderate. Quotations are: English pines, Queens, 3s 6d to 9s per pound; grapes, 2s to 3s per pound; 3s 6d per half sieve; peaches, 2s 6d to 5s per dozen; nectarines, 2s to 15s per dozen; melons, 1s to 4s each; cucumbers, 3s to 4s 6d; plums, 1s to 3s per basket; greengages, 4s 6d to 5s per bag; damsons, 3s to 3s 6d per bag; Duke cherries, 2s to 3s per dozen pounds; Morello cherries, 2s to 3s per dozen; ditto, 1s 6d to 4s per bag; [illegible] 1s 6d to 2s per dozen bunches; vegetable marrows, 1s to 3s per dozen; pumpkins, 1s to 3s each; parsley, 2s 6d to 3s per bag; radishes, 2d to 3d per bunch; lettuces, 1s to 2s per dozen; tomatoes, 1s to 1s 6d per pound; cauliflowers, 1s 6d to 2s 6d per dozen; scarlet runners, 3d to 1s; French beans, 1s to 1s 3d per [illegible]; horseradish, 3s to 10s per dozen bundles; mushrooms, 7s to 15s per 12lb; potatoes, 3s to 5s per ton.

Review of the British Corn Trade

DURING THE PAST WEEK

Written exclusively for the Mark Lane Express.

The excellent promise of the British wheat fields early in July has been transmuted into excellent results a month later in the counties south of the Thames. The rest of the country is only now beginning harvest in earnest, but the grain is ready for the self-binding harvest machines, of which, as of manual labour, there seems this season to be a happily adequate supply. According to the exhaustive survey appearing in the leading journal for the 11th inst., wheat is especially good in Berkshire, Cheshire, Cumberland, Derby, Dorset, Durham, Essex, Gloucester, Kent, Lancashire, Leicester, Northampton, Nottingham, Somerset, Stafford, Sussex, Warwick, Wiltshire, and Yorkshire. These counties are so representative of England as a whole that we may fairly regard the above detached advices as admitting of a synthesis in which the wheat crop of England as a whole will come out decidedly in excess of an average yield.

Barley is of excellent promise in Huntingdon and Northampton, and a full average in East Anglia and Lincoln. It is less satisfactory in Cheshire and Wales, and is also disappointing in parts of Surrey, though in the S.E. angle of England, Kent, and Sussex it is mostly a full yield.

Oats are rather under an average, but the rains since August came in have added to the crop in all the counties where the grain was not ripe when the month came in. There is a fair hope, therefore, that reports collected on the first inst., which showed a crop 32 points in the thousand, and the average will be agreeably falsified on threshings. For the rest it may be observed that beans have improved very remarkably since midsummer; while field peas have not done so. Thus the prospects of July 1 for these two crops are now, in many counties, reversed. Hops should be a very good crop in Kent, Sussex, and the West, but roots, while not at all disastrously bad, are rather disappointing in the majority of counties. They are, however, a crop for which the next six or seven weeks may do much, and there is also time for the ordinary crops of potatoes to come on well.

The American winter wheat crop is put by the Bureau of Washington at 424,400,000 bushels, or 14.3 bushels to the acre. States peculiarly favoured have been Nebraska, Illinois, Indiana, Michigan, Ohio, and Pennsylvania, while singularly poor results are said to be following on threshings in Texas and Missouri. The Kansas crop, though 1.6 bushels better than last year, is not at all equal to the reports published a month ago, when harvest was just beginning.

The spring wheat in America is thus estimated:—

1904	875 points in 1,000
1905	892 points in 1,000
1903	771 points in 1,000
1902	897 points in 1,000

The American 1,000 points or ideal crop is put at 15 bushels, so that 892 points stands for 13.38 bushels per acre. This is less than had been looked for, though it will be seen to show a very great change for the better from 1903, and to be a slight but appreciable improvement on last year. States where the yield is excellent include Dacota and Washington, but Iowa and Minnesota appear to have lost ground since July 1.

Maize in America is of extremely high promise, and if the outlok as officially reported on 12th inst. is fulfilled in October, a yield of 2,693,116,000 bushels, or 28.7 bushels to the acre, should be secured. The barley crop is said to have been over-estimated by about 2 per cent., but it is undoubtedly a better yield than in either 1904 or 1903.

Oats are put at 908 points out of an ideal 1,000, as compared with 866 points a year ago and 795 points in 1903. The crop, roughly speaking, is therefore 4 per cent. above the yield of last year, which was reckoned a full average.

Sales of English wheat at the 187 statute markets have been as follows:

This season, 1,613,000 quarters at 30s 9d per quarter.
Last season, 2,093,000 quarters at 27s 2d per quarter.

The net rise of 3s. 7d. is gratifying, the more so as the price of 30s. 9d. is itself fair. With respect to barley, a rise of 2s. 9d. will be seen to have occurred, but as it has only carried value to 24s. 8d., which is 4d. below the average of the last twenty-five years, it is not so good as the wheat price, which is 9d. above the mean. The following are the returns for barley:—

This season, 2,154,000 quarters at 24s 8d per quarter.
Last season, 2,774,000 quarters at 21s 11d per quarter.

The returns for oats are:

This season, 1,135,000 quarters at 17s 1d per quarter.
Last season, 1,079,000 quarters at 16s 4d per quarter.

The price of oats has now been quite a disappointment for two seasons, but 18s. 4d., which was arranged last week, is a step in the right direction.

Imports of cereals last week into the United Kingdom were as follows:—

Wheat, 539,000 quarters; a very large supply.
Flour, 92,400 sacks; a small supply.
Barley, 70,000 quarters; a very small supply.
Oats, 173,000 quarters; a large supply.
Maize, 252,000 quarters; large arrivals.

In the forty-nine completed weeks of the cereal year the imports of breadstuffs have been as follows:—

	Quarters.
Wheat	23,027,000
Flour	3,478,000
Breadstuffs	26,505,000
Last season	26,373,000

The close similarity in the supply will be noted, also the slight increase this year, but there is no increase in our total stocks of breadstuffs:—

	Quarters.
Decrease in English wheat	445,000
Increase in imports	132,000
Net decrease in stocks	313,000

The imports of spring corn for the 49 weeks were 9,152,000 qr. of maize, 5,647,000 qr. of barley, and 5,991,000 qr. of oats.

Supplies on passage include an average quantity of wheat.

	Quarters.
American	60,000
Russian	265,000
Indian	807,000
Argentine	790,000
Australasian	540,000
Various	50,000
Total	2,512,000

No new crop shipments are as yet reported from California. Of flour, 108,000 sacks are on passage. This is an extremely small quantity.

Expectations of wheat are now so much above the average that holders on spot must feel their position to be one of some difficulty. Nevertheless, maize for August delivery was 3d. dearer on the week.

	Quarters.
Flat corn	300,000
Round corn	20,000
Yellow corn	1,000,000
Total	1,320,000

Of barley, the quantity on passage is a bare third of an average:—

	Quarters.
Russian	125,000
Californian	10,000
Persian	10,000
Smyrna	15,000
Roumanian	5,000
Total	165,000

Of oats, however, the quantity coming (420,000 qr.) is above the average. Other quantities on the high seas are 240,000 qr. of linseed, 23,000 tons of cottonseed, and 59,000 tons of rice.

Maize shipments for the seven completed months—January 1 to July 31, 1905—are thus returned:—

	Quarters.
America, to U.K.	3,453,000
America, to Cont.	4,687,000
Argentina, to U.K.	3,500,000
Argentina, to Cont.	1,900,000
Russia, to U.K.	181,000
Russia, to Cn.	397,000
Turkey, to U.K.	122,000
Turkey, to Cont.	109,000
India, to U.K.	22,000
Total	14,371,000

In the same period of 1904 total shipments were 11,700,000 qr. only, but in 1903 the total was just on 15,500,000 qr. Argentine shipments in 1905 have already been a good deal in excess of any previous year, and this year yellow corn serves most of the purposes for which maize is required.

Since August came in the great shipping countries have been doing a fair business in the export of wheat, but very little barley has been shipped. Of maize shipments, Argentina is the leading source; while for oats September will have to look almost exclusively to Russia. Actual returns of exports are:—America, 55,000 qr. of wheat, 157,000 qr. of maize, and 35,000 sacks of flour; Argentina, 155,000 qr. of wheat, 419,000 qr. of maize, and 26,000 qr. of linseed; Russia, 310,000 qr. of wheat, 41,000 qr. of barley, 40,000 qr. of rye, 324,000 qr. of oats; and 22,000 qr. of maize; Roumania, 75,000 qr. of wheat; India, 123,000 qr. of wheat and 23,000 qr. of linseed; Australasia, 75,000 qr. of wheat; and Turkey, 26,000 qr. of wheat.

HAY AND STRAW.

Whitechapel. Saturday.—Light supplies were submitted this morning, and trade ruled steady at recent prices. Best clover, 75s to 85s 0d; inferior ditto, 60s to 70s; specially picked hay, 77s; good ditto, 65s to 72s; inferior ditto, 45s to 60s; mixture and sainfoin, 67s to

TO-DAY'S MARKETS.

MARK LANE, MONDAY, August 14.

[FIRST REPORT.]

Regular quotations were possible to-day for the first time this season for new wheat, which has opened at about half-a-crown below the level of the old. Quality and condition are satisfactory on the whole; there are some really fine Red lots offering. Foreign wheat was the turn dearer for Australian and Russian, but rather lower for La Plata and Indian, other sorts being unchanged on the fortnight. Maize was 6d. dearer on spot. For Russian barley 3d. less money was accepted. No English or Californian transactions were recorded. Oats were less depressed from the close of July, and beans favoured holders, but on peas a slight decline was allowed. New rye made 21s. to 25s. per qr. Linseed and cottonseed favoured buyers, as did the oils from the same seeds. Rapeseed, poppyseed, and canaryseed, on the other hand, were held for more money on the fortnight.

CLOSE OF THE MARKET.

HOT WEATHER WAS AGAINST THE MARKET, BUT WHEAT WAS FAIRLY STEADY, AND THERE WERE NO CHANGES IN BARLEY OR OATS. FOR MAIZE THERE WAS LESS INQUIRY AT THE CLOSE, BUT PRICES WERE AS PREVIOUSLY REPORTED.

THE FLOUR TRADE.

MARK LANE, MONDAY, August 14.

No price changes in Town Whites or Households occurred to-day. Roller Whites from East Anglia made 23s. to 24s. for ordinary. American on spot was unchanged; for October shipment it is said that 28s. c.f.i. would be taken for grades of which the spot value is 30s. This requires confirmation, but may be correct. New Kansas flour made from red winter wheat was definitely offered for September shipment at 23s. 9d. c.f.i. Australian flour tended to fall in price, and so did Hungarian. Values were unaltered for French, Argentine, and Russian. Coarse middlings had a fair sale at £5 per ton, while fine middlings went a sovereign per ton beyond the coarse in price. A sufficient offer of bran and pollard at a moderate price was recorded.

LONDON TERM MARKET.

This market is open to elected members only, and is held at the Baltic Club, St. Mary Axe. No business except for future delivery is done, and the smallest quantity that can be purchased is 1,000 quarters, or 4,800 cental.

Prices quoted on Saturday at the close of the week's trade were :—

WHEAT (per cental).

No. 2 American Red	6s.	7d.	Sept. delivery.
,, ,,	6s.	7d.	O.t. ,,
,, ,,	6s.	7d.	Nov. ,,

Nearer dates have declined a little, and further dates have improved, so that for the moment we have an unusual parity of values for three months ahead.

MAIZE (per cental).

American	4s.	9d.	Sept. delivery.
,,	4s.	7d.	Nov. ,,
,,	4s.	5d.	Jan. ,,

The changes in maize futures since the 4th inst. are rather significant, near dates being firmer than ever, while remoter futures favour buyers very decidedly.

There are buyers to-day of Red Winter wheat for December delivery at 6s. 7d. per cental, and of American maize, also for December delivery, at 4s. 9d. per cental. Maize for February delivery is offered as low as 4s. 4d. per cental, but as yet there are few, if any, buyers for so remote a future.

GRAIN AND FLOUR FACTORS REPORT.

Flour.—The demand fairly steady; prices continue in buyers' favour.

Offals.—Bran fairly active for this season of the year, and owing to increased local demand and from the Continent, prices generally tending upward. GREENHILL BROS. (Belfast).

Flour.—There is an easier feeling all round owing to lower wheat prices, and 6d. per sack less is taken for flour. Grain.—Although prices to arrive are easier, American corn maintains last week's prices on spot. Fine oats are unchanged, but 38 40 lb. quality is 3d. lower. Barley, owing to arrivals, is down to 15s. 6d. per 320 lb. Pease rather easier. Beans unchanged. Oilcake firm. Mill Stuffs.—Bran and Thirds firm at 82s. 6d. to 85s. per ton.—MCKINNON AND MCDONALD (Glasgow).

Flour has met a quiet demand to-day on the spot at about late prices. Forward offers are easier. Kansas flours are well on the line, whilst Minnesotas are almost within the reach of buyers. —T. S. MEDILL AND SONS.

Milling Offals.—All milling offals are in fair demand, with prices against buyers.—JOHN BAWCOMB AND CO.

FEEDING STUFFS.

London, Monday.—Linseed cake: The improvement in demand is well mantained both for spot and forward. London made is the turn dearer, with prices of foreign about unchanged. Undecorticated cotton cake: Trade quiet, but stock being small full prices are asked. Decorticated cotton cake and meal: Inquiry is very good, and values are well maintained. Linseed: After dropping the greater part of the week the market has recovered, and is now 3d dearer.

ROBERT AND JOHN HEWETSON.

THE BALTIC, 1 p.m.

STATE OF TRADE.

Cargoes of wheat, linseed, and peas favour buyers, those of maize are firm near at hand, but decidedly lower for winter shipment. Steady trade is reported of oats; barley is not lower, but the market lacks strength.

BUSINESS DONE.

WHEAT.—Red Kurrachee, 30s per 492lb., prompt shipment; No 1 Northern Manitoba, 32s 3d per 480lb., November shipment; Australian, 32s 3d per 480lb., arrived; Santa Fé, 29s 9d per 480lb., arrived; Bahia Blanca, 30s 3d per 504lb., prompt shipment.

MAIZE.—Argentine, 23s per 480lb., prompt shipment; American, 23s per 480lb., prompt shipment.

BARLEY.—Azoff, 18s per 400lb., prompt shipment; Azoff, 17s 3d per 400lb., November shipment; Kustendje, 19s per 416lb., prompt shipment.

OATS.—American, 13s 9d per 304lb., prompt shipment; Petersburg, 13s 6d per 304lb., prompt shipment.

PEAS.—Green Calcutta, 22s 6d per 504lb., prompt shipment.

BMEANS.—Smyrna, 30s 6d per 480lb., prompt shipment.

POPPYSEED.—Bombay, 39s 6d per 379lb., on passage.

LINSEED.—Argentine, 38s per 416lb., on passage; Calcutta, 39s per 410lb., September shipment.

COTTONSEED.—Bombay, £4 15s 3d per 2,250lb., October shipment.

HOPS.

London, Monday.—W. H and .H. Le May, 67, Borough, London, report:—The very low prices now being accepted to clear out what remain of the 1904 English growth is attracting the attention of brewers, and fortunate indeed is the consumer who is in a position to buy now. The imports of hops for the month of July, 1905 were 522 cwt.; for the corresponding month last year, 3,014 cwt.. The total imports from January 1 to July 31, 1905, were 32,808 cwt.; less foreign hops reshipped for same period, 6,699 cwt. Total, 26,109 cwt. The total imports from January 1 to July 31, 1904, were 98,790 cwt.; less foregn hops reshipped for same period, 2,776 cwt.; Total, 96,014 cwt. The exports of hops for the month of July, 1905, were 1,200 cwt.; for the corresponding month last year, 541 cwt.

GAME AND POULTRY.

Smithfield. Saturday.—A dull demand for a fair supply. Prices:—Surrey fowls, 3s to 3s 9d; Essex fowls, 2s 3d to 2s 9d; Lincolnshire fowls, 2s to 2s 6d; Irish fowls, 1s 9d to 2s 3d; Russian fowls, 1s 9d to 2s; goslings, 4s to 5s; country ducks, 2s to 2s 6d; Aylesbury ducks, 2s 3d to 3s; spring, 1s to 1s 4d; feathered pigeons, 8d to 9d; Bordeaux pigeons, 10d to 1s 1d; tame rabbits, 1s 3d to 1s 6d; wild rabbits, 7d to 9d; English hares, 2s 6d to 3s 3d; leverets, 1s 9d to 2s 3d; live hens, 1s 6d to 2s each; Australian rabbits, 6s to 8s per dozen. Venison: Haunches, ,6d; forequarters, 3d per lb.

CATTLE.

Metropolitan Market, Islington.

	Monday, Aug. 14, 1905. British	Total.	Monday, Aug. 7, 1904
Beasts	900	900	1,150
Sheep and Lambs	7,200	7,200	7,540
Calves	19	19	5
Milch Cows	59	59	55

Quotations per 8 lbs. (sinking the offal):—

ENGLISH

	Inferior.	Second.	First.
Beasts	3s 10d	4s 4d	4s 8d
Sheep	4s 8d	5s 6d	6s 0d
Lambs	5s 4d	6s 2d	6s 6d

Milch cows, per head, £16 to £21.

British arrivals included as follows: Scotland, nil; Eastern Counties, 27; Midland, Home, and Western Counties, 861; Devon, 15; Ireland, 67.

We note to-day an increase of 200 head compared with Monday last, due to heavier arrivals from the Midland Counties. Ireland was fairly well represented with 60 Dublins and 7 Waterfords, no stores, however, were included. The Irish trade was a disappointing one nevertheless late rates governed all sales. For fat beasts of both prime and second quality trade was dull with a downward tendency in value, although not quotably so. Fat butchering cows and bulls met with a decline of 2d per 8 lbs in value. A clearance is not expected to be made.

The following are top quotations per 8 lbs. (sinking the offal):—

	To-day.	Monday, Aug. 15, 1904.
Devons	4s 4d to 4s 6d	—
Herefords	4s 6d ex 4s 8d	4s 6d to 4s 8d
Runts	4s 0d ex 4s 6d	4s 4d ex 4s 6d
Lincolns	3s 10d ex 4s 0d	4s 0d to 4s 2d ex 4 4
Irish	4s 0d ex 4s 2d	—
Fat Cows	3s 4d ex 3s 6d	3s 6d to 3s 8d

There was an increase of 2,390 in the sheep market compared with Monday last. Trade for both wethers and ewes was of an exceedingly slow nature, late currencies being only with difficulty maintained, wethers, however sold best. Scotch met a fair enquiry at late currencies whilst Irish on the other hand met a decline in value of 2d. per 8 lbs. Lambs being in excess of the demand, sellers had to accept a decline of 2d. to effect sales. A clearance is extremely doubtful.

Undermentioned quotations are at per 8 lbs. (sinking the offal), and are for the best of each class penned:—

	To-day.	Monday, August 15, 1904
7 to 8 st Scotch	5s 10d to 6s 0d	5s 6d to 5s 8d
7½ to 8 st Downs	5s 8d to 5s 10d	5s 6d to 5s 8d
9 st Downs	5s 6d to 5s 8d	5s 4d to 5s 6d
10 st Half-breds	5s 2d to 5s 4d	5s 2d to 5s 4d
10 st Irish	5s 0d to 5s 2d	5s 2d to 5s 4d
10 st Down Ewes	4s 2d to 4s 4d	4s 4d to 4s 6d
11 st Half-bred ditto	4s 0d to 4s 2d	4s 2d to 4s 4d
5 st Down Lambs	6s 4d to 6s 6d	6s 2d to 6s 4d
6 st Half-bred ditto	5s 10d to 6s 0d	5s 10d to 6s 0d

Calf trade not worth noting.

No pigs on offer.

London (Central), Monday. — Fair supply; trade quiet. Beef: Scotch, 3s 10d to 4s 6d; English, 3s 0d to 3s 8d; American, 3s 2d to 3s 7d. Mutton: Scotch wethers, 4s 4d to 4s 10d; ewes, 3s 6d to 3s 8d; English wethers, 4s to 4s 8d; ewes, 3s 4d to 3s 6d. Lamb: English, 4s 8d to 5s 4d; New Zealand, 3s 6d to 3s 10d. Veal: 3s to 4s 4d. Pork: 3s 8d to 4s 2d per 8lbs.

St. Ives (Hunts), Monday.—Beasts, 149; sheep and lambs, 1,669; pigs, 293. Beef, 7s 3d to 8s; mutton, 7s 7d to 10s 6d; lamb, 9d and 10d; pork, 6s to 6s 6d. Fat cattle, sheep and pigs, and store sheep, and pigs good demand. Store cattle fair demand. Milch cows short supply; middling trade. Prices £14 to £22.

FOREIGN.

Deptford, Monday.—Beasts, 1,960. To-day's supply compared with Monday last showed an increase of 1,043 head. Trade was of a slow and dragging nature at a decline of 1d. per 8 lb. on States beasts. Canadians were quoted at late currencies; besides the above, 500 more States cattle were withheld from sale. The best States on offer were quoted at from 3s. 8d. to 3s. 10d.; seconds, 3s. 6d. to 3s 8d; Canadians, 3s 7d to 3s 9d per 8lbs. (offal given in); 274 Canadian sheep were offered for sale and quoted from 42s 2d to 4s 4d per 8lb. On Saturday 1,489 beasts from the United States and 511 from Canada were offered for sale, and met with a slightly better trade, prices being well upheld. Besides the above, 800 more were withheld. The best States on offer were quoted at from 3s 8d to 3s 11d; Canadians, 3s 8d to 3s 9d per 8lbs. (offal given in).

Liverpool, Monday.—Few more cattle in market to-day. Demand better at the full rates current last week. Considerable increase in sheep and lambs in consequence. Trade was very slow, and to effect sales lower prices were accepted. Heavy sheep in particular were difficult to cash. Beef, 6½d to 5d per lb.; mutton, 8d to 6d; lamb, 8½d to 7d. At market: 813 cattle and 11,668 sheep.

SEEDS.

London, Monday.—A fair trade passing for the time, both early and late. Prices firm. Winter tares are now offering, but holders' ideas seem inflated. New trefoil selling freely at reasonable rates. There is no special call for spring sowing seeds.—JOHN PICARD AND CO.

PROVISIONS.

London, Monday.—Bacon: The imports of bacon for the last fortnight were from Ireland 1,[illegible] cwt., and from abroad. With an improved demand and better supplies the bacon market was strong last week, prices showing considerable increase in most sorts, more particularly in the cheaper classes of meat. Prices ranging for:—Irish from 54s to 72s up to 74s; Danish, from 56s to 72s up to 74s; Canadian from 48s to 56s up to 64s, and quoted to 66s. Butter: Taking it all round the butter market was decidedly quieter, the advance in prices tending to check the trade quite as much as daily from exporting standpoint at recent prices. Prices range for:—French, 88s up to 120s; Danish, 104s up to 124s; Russian and Siberian, 80s up to 96s; Irish, 80s up to 116s; Colonial, 90s up to 120s. Lard: The lard market was stronger, with prices ranging for Irish from 48s to 57s, and American from 38s 3d to 40s 9d.

LIVE STOCK AND MEAT TRADE REVIEW

(Written Specially for the "Mark Lane Express.")

Trade in London.

There was a rather smaller number of beasts on offer at Islington during the past week, this being chiefly attributable to the fact that Monday last was a Bank Holiday, and, in consequence, most families were out of town. The supply, as usual at this time of the year, consisting chiefly of consignments from the Midlands, and comprised Herefords and runts. Irish arrivals, though short, were of rather better quality, some choice Black Polled cattle being included in the consignments. Trade for all descriptions of both prime and second quality English beasts was of a slow but steady nature, with a slight upward tendency in regard to value, in some cases to the extent of fully 2d. per 8 lb.; this remark applies equally to Irish descriptions, anything choice finding ready purchasers at fully last week's quotations. Fat shed cows were in very short supply, and met a limited demand from both town and country buyers; nevertheless, late currencies governed all sales. Fat bulls, on the other hand, experienced a slightly better inquiry, an advance of from 1d. to 2d. per 8 lb. being made on most transactions. On Thursday, which for beasts is practically a "dies non," trade was confined entirely to fat butchering cows and bulls at about last Monday's values.

At Deptford during the early part of the week, a slow trade was experienced, but brisked up towards the end. The total number on offer at both markets was 4,730, as against 2,792 during the preceding week, consisting of 830 British (decrease 220) and 3,900 Foreign (increase 2,158), comprising 3,268 from the United States and 632 from Canada. Quotations were as follows:—80 to 90 stone Devons, 4s. 6d.; 90 to 95 stone Herefords, 4s. 6d. to 4s. 8d.; 95 stone Runts, 4s. 2d. to 4s. 6d.; 100 stone Lincoln Shorthorns, 3s. 10d. to 4s.; 80 to 90 stone Black Polled Dublins, 4s. 4d.; 95 stone ordinary ditto, 4s. 2d.; 90 stone States, 3s. 8d. to 3s. 11d.; 95 stone Canadians, 3s. 8d. to 3s. 9d.; 90 stone fat cows, 3s. 6d.

The sheep trade was confined entirely to the Islington market. Trade for all descriptions of both wethers and ewes was of a firmer and steadier nature, with an upward tendency in regard to value to the extent of fully 2d. per 8 lb. Both Scotch and Irish descriptions also shared in the generally better tone of the trade, last week's valuations being well maintained. Of lambs, there was a very short number on offer, which met a firm inquiry, all on offer being quickly disposed, rates favouring the sellers to the extent of 2d. per 8 lb.

On Thursday trade was again firm, an early clearance being effected at late currencies. The total number penned consisted of 7,090, as against 11,338 during the previous week. Best pens made per 8 lb. as follows:—7½ to 8 stone Downs, 5s. 10d.; 7 to 8 stone Scotch, 5s. 10d. to 6s.; 9 stone Downs, 5s. 8d.; 10 stone ditto, 5s. 6d.; 10 stone halfbreds, 5s.–4d.; 10 stone Down ewes, 4s. 4d. to 4s. 6d; 10 stone Irish, 5s. 4d.; 5 stone fat Down lambs, 6s. 8d.; 6 stone halfbreds ditto, 6s. 2d. to 6s. 4d.; 6 stone Irish, 6s. 2d.

Calves numbered 45, the best on offer to dress from 144 to 166 lb., and were quoted at from 5s. 4d. to 5s. 6d. (sinking the offal), an early clearance being effected. No pigs on the market for sale to day

Trade in Ireland.

There was a smaller supply of cattle in Dublin market last Thursday, being 41 less than the previous market, but the supply of sheep was again larger by 545 head. There was a good attendance of buyers for home and shipping requirements, and a firmer and more buoyant tone for both beef and mutton was noticeable. For cattle there was a stronger demand, and any depression of the past week was wiped off, and an early clearance effected. The number of cattle offered for sale was 2,570, and of sheep 8,899. Best heifer and ox beef sold at from 59s. to 54s., and extra lots up to 57s. 6d. per cwt.; good second class beef from 46s. to 50s.; and inferior from 44s. to 46s. per cwt.

In the sheep department business was of a healthier tone, in spite of the much larger supply. Medium and light weight wethers were most sought for by butchers for home consumption, at the full prices of last day. Heavy wethers were rather neglected, and were found difficult to clear. There was an improved demand for shipping hoggets for the English markets, but there was no improvement to note in rates. Coarse sheep were slow and irregular, as such descriptions were not wanted. The lamb trade is on the wane, and the supply smaller. Lambs of choice finish sold readily at previous full rates. Best wether mutton, 7d. to 7½d. per lb.; ewe, 6d. to 7d.; and inferior, from 5d. per lb. Large heavy hoggets were worth from 44s. to 56s. each; small to medium hoggets from 32s. to 42s. Large fat lambs made from 35s. to 38s.; other sorts from 20s. each upwards.

There was a fuller supply of veal, and a slow trade, except for prime calves, which made from 7d. to 8d. per lb.; coarse calves sold at from 6d. per lb. upwards. Milch cows were in fair supply, but demand was slow and prices lower than at the previous day's market. Good springers were quoted at from £15 to £20, and other sorts at from £8 upwards.

Store cattle continue a moderate trade. Graziers are holding back stock now that there is a better prospect of pasturage from the recent rains. Some sales of store cattle were held after the market was over, and a fairly good business was done. In the market itself yearlings were the only stores offered for sale. Large sales of rams and ewes are advertised to take place shortly. The country fairs for the last few weeks have been dull and spiritless.

At the Dublin pig market on Thursday large arrivals of hogs and the absence of a number of buyers made trade disappointing, and sales were effected at a reduction of fully 4s. per cwt. on the week, and a clearance could not be made. A bad day like this is the thing of which sellers complain, as by the Swine Fever Order they are practically compelled to sell for anything buyers like to offer, or are obliged to hold their pigs for at least four weeks before again putting them on the market. Nice light weight pigs made from 48s. to 50s. per cwt.; coarse pigs from 34s. per cwt.

Trade in the West.

There has been a trifling recovery in values, but hardly to the extent to justify a quotation, though now that the land has in most places had a good soaking, we may expect a more pronounced rise in values, unless the rain should now unfortunately prove excessive, to the detriment of what, up to this week, promised to be one of the most satisfactory harvests for several years past. Stock heifers continue to find a very fair sale at from £8 to £13 or £14 a-piece for forward grades; and there is likewise a demand for yearling heifers at from about £9 10s. to £12 per pair for ordinary runs, animals showing promise going beyond the prices quoted. The poor outlook for keep up to the advent of the rain, of course, had an adverse influence on the sheep trade, and although prices on the whole have been difficult to maintain, except in the matter of Down lambs, which are more in demand than almost anything else, still there has been no very material "drop" in prices, except at the great fair at Ilsley, where competent judges quote a decline of 1s. to 2s. a head. Store pigs are keeping up in price, and with the extra demand there will now be for "stubbling" purposes, we shall possibly see them still dearer yet. The weather up to the closing part of the week continued rather "catchy" though not to the extent to seriously delay harvesting as a rule.

There are moderate supplies of beef coming out, including a few really well finished steers and heifers, but the trade continues quiet, except for the very choicest grades, for which there are plenty of buyers at from £17 up to £22 a-piece (or from 11s. to 12s. per score) for these qualities only, fat cows making only 54s. to about 56s. per cwt. Though sheep keep within moderate bounds, the trade is inactive for everything but the best, the best class of Downs making 8d. to 8¼d.; other good qualities, 7d. to 7¾d.; and heavy sheep and ewes, 6d. to 7d. The best qualities of lamb make up to 10½d. per lb., several lots coming under our notice making 49s. up to 52s. a-piece; more ordinary grades selling from 9d. to 9½d. Fat calves, though again meeting a pretty general inquiry, are ½d. to 1d. per lb. cheaper than they were a little while since, the very choicest seldom making 8¼d. now, a more average range being 7¾d. to 8d. Pigs, from what we can glean, are none too plentiful anywhere, and nice well-finished porkers command a quick sale up to 10s. per score and over; and baconers 8s. 6d. to 9s. 3d.; heavier pigs according to their value.

LONDON.

Islington. Thursday.—Beast supply, as usual on a Thursday, consisted almost entirely of fat butchering cows and bulls from the Midland counties, mostly of good quality. Trade was fairly steady, last Monday's currencies governing all sales, an early clearance being made. Top value: Fat cows, 3s. 6d.; fat bulls, 4s. 10d. to 5s. 2d. per 8lb. Decrease of 310 in number penned in sheep market. The supply included 200 Scotch Cheviots, which sold at slightly advanced rates. Trade for both wethers and ewes was brisk at an advance of fully 2d. per 8lb. on last Monday's quotations. Lambs were in short supply and made 2d. per 8lb. more money. Best pens made per 8lb. as follows:—7 stone Scotch, 6s; 7 to 8 stone Downs, 5s 10d to 6s; 9 stone ditto, 5s 8d; 10 stone ditto, 5s 6d; 10 stone half breds, 5s 4d; 10 stone Down ewes, 4s 4d to 4s 6d; 5 stone fat Down lambs, 6s 8d; 6 stone half bred ditto, 6s 2d to 6s 4d. Calves met fairly good inquiry at late rates. Quotations per 8lb, sinking the offal:—Beasts, 2s 10d to 3s 6d; sheep, 4s 8d to 5s; calves, 3s 10d to 5s 6d; lambs, 5s 4d to 6s 8d. Total supply: Beasts 50, sheep and lambs 2,090, calves 40, and milch cows 5.

London (Central). Friday.—Fair supplies and trade slow, but prices fairly firm: English beef, 3s 6d to 3s 8d; Scotch sides, 3s 10d to 4s; shorts, 4s 2d to 4s 6d; Deptford and Liverpool killed, 3s to 3s 8d; refrigerated hindquarters, best, 3s 6d to 4s; ditto seconds, 2s 8d to 3s 2d; ditto forequarters, 1s 8d to 2s 2d; inferior beef, 2s 4d to 2s 8d. Mutton: Scotch wethers, 4s 4d to 4s 10d; ditto tegs, 4s 10d to 5s; ditto ewes, 3s 2d to 3s 6d; English wethers, 4s 4d to 4s 8d; ditto ewes, 3s 4d to 3s 6d; foreign sheep, 3s 8d to 4s 4d; English lamb, 4s 8d to 5s 4d. Veal, 3s 4d to 4s 8d. English pork, 3s 6d to 4s; Dutch ditto, 3s 4d to 3s 8d per 8lb.

COUNTRY.

Ashford. Tuesday.—The first of the store lamb fairs was held. Kent lambs fetched 21s to 27s, and half-breds to 28s per head. Good trade for beef at 4s 6d to 4s 10d. Mutton 2d dearer on the week, making up to 5s 10d for Downs and 5s for Kents. Veal dearer, 5s to 5s 6d. Pork also advanced, roasters making up to 4s 2d per stone.

Basingstoke. Wednesday.—At Raynbird and Sons' sale-yard there was a good attendance of buyers to meet a supply of 22 fat beasts, 67 calves, 794 fat sheep and lambs, 53 pigs, and 86 head of dairy and store cattle, for which the following prices were realised:—Fat Devon steers made up to £20 5s. Shorthorn steers £19 10s, good Welsh runts £18 10s to £19, polled steers £18 15s, fat calves 60s to £5 5s, small 20s to 55s, fat porkers 38s to 55s, store pigs 8s to 14s 6d, dairy cows £11 to £19 16s, prime Down wethers and young ewes made from 50s to 68s, small 45s to 48s, six months' old Down lambs 42s to 50s, small 32s to 38s, cross-breds up to 32s, old ewes 34s to 38s, choice three months' old sucking lambs 32s to 38s, Southdowns 30s 6d, rams and ram lambs 40s to 52s, store four-tooth Down ewes up to 51s, two tooths 52s. There was not much demand for the short supply of fat beasts, sales being difficult to make, with prices in favour of the buyer. A good show of fat sheep and lambs met a satisfactory trade, big sheep and big lambs making an advance in price; choice sucking lambs selling well, and high prices made of them. The milk trade was lower all round to-day, the best milch cows realising less money than quoted at recent markets. Store cattle met with little inquiry, and what few were on offer met with slight attention. Fat calves met a firmer trade at an advance upon late quotations. Fat porkers, with a short entry, met a brisk trade. Store pigs are also selling well. Ruling values:—Best beasts, 6¾d to 7d; second ditto, 6d to 6¼d; bulls, cows, and inferior, 5d to 5½d per lb; best quality fat sheep, 8¾d to 9d; second ditto, 7½d to 8d; old ewes, rams, and inferior, 6d to 7¼d; choice fat sucking lambs, 9¾d to 10¼d per lb; fat calves, 7d to 8¼d per lb; fat porkers, 9s 6d to 11s per score.

Berwick. Saturday.—Small show, over 40 short of the previous week, 61 cattle being penned. The attendance was poor, and little or no business was transacted.

Birmingham. Thursday.—Small supply of beasts, sheep, and pigs. Trade fair for pigs, but slow for beasts and sheep. Prices:—Beef, 5½d to 6¾d per lb; a few Herefords, 7d per lb; mutton, 6½d to 8¼d per lb; lamb, 8d to 9d per lb; veal, 6d to 7¼d per lb; bacon pigs, 10s per score; cutting pigs, 9s 9d to £10 per score; sows, 7s 10d per score.

Bristol. Thursday.—There was a moderate supply of beef but limited enquiry, and business was slow at late rates. Full average quantity of mutton and lamb on offer, but demand by no means brisk and trade quiet, values being unchanged. Pigs were again not numerous, and quotations were unaltered.

Calne. Friday.—Present prices for prime pigs, in lots of not less than ten, on rail within 100 miles of Calne.

Prime Stores.	Thickness of fat in any part of Back.	Price per Sc. s.	d.
6sc. 10 lb. to 9 sc. 10 lb.	2½ in. and under	10	0
Under 10 sc.	Not exceeding 2½ in.	10	0
Under 11 sc. 10 lb.	2¾ in.	9	6
Under 12 sc.	3 in.	9	0

C. AND T. HARRIS AND CO., LTD.

Canterbury. Saturday. — A large number of lambs were offered. Average quality working lambs were worth from 20s to 21s, but the best went up to 27s, and small specimens as low as 11s 6d per head. Good wether tegs, 51s to 44s; rough old sheep, 18s 6d to 38s per head.

Carlisle. Saturday.—The supplies on the Sands were rather small, but generally the consignments were good of Irish heifers. Buyers were sparsely represented, and business was slow. Wintering heifers, £8 10s to £10 10s; heifers for finishing off, £12 10s to £14 10s each.

Chester. Thursday.—The large and excellent supplies of cattle had little attraction for the small attendance of buyers, and business was disappointing. In some cases there was a drop in prices, but on the whole they were unchanged. Milch cows £16 to £20, calvers £15 to £18, heifers £8 to £15, barrens £9 to £12, and stirks £6 to £10.

Colchester. Saturday. There continues to be a poor supply. Grass beef sold at 4s 4d to 4s 6d a stone; mutton, 5s 6d to 6s; lamb, 6s to 6s 8d; and pork, 8s 6d to 9s a score.

Doncaster. Saturday.—Small supply of cattle, but a large number of sheep, chiefly lambs. Yearling stores made £5 to £16 for strong bullocks; dairy cows, £11 to £22; lambs, 28s to 34s each.

Dorchester. Wednesday. — A brisk business, and prices advancing with the cooler weather. Calves ruled firm, and made up to 8¾d per lb. for the best; seconds, 7d to 8d. Lambs a brisk trade, and made 10d per lb. for choice lots, and inferior kinds 7¾d to 8¼d. Ewe mutton, 6¾d to 7d per lb. The pig trade was buoyant. Porkers made up to 60s, and baconers 90s (or 9s to 10s per score); fat sows, £5 to £5 12s 6d.

Dorchester. Saturday. At the fortnightly sale at the Dorchester Repository to-day there were fair average supplies on offer, for which there was a steady, not to say fast, trade; but Messrs. Ensor were able to clear their stocks, fat and store alike. Milch beasts showed an improvement in values, sellers hardly making the money they expected in some cases, to-day's range being from £11 15s up to £19 for cows and heifers with calves. Barreners, too, were quiet, in spite of the good keep promises, from £5 to £9 4 per pair being the range for the best. Fat beasts sold from £15 15s to £1 9each (or 10s to 11s per score). Mutton quiet trade at unchanged rates, 7d to 8d for best qualities, and 9d to 9¼d for lamb (or 32s to 35s per head).

Dublin. Thursday.—There was a better attendance of buyers, and more animation was shown in the bidding for choice cattle, which realised somewhat higher prices. Rough and unfinished sorts still hard to move. A very

choice lot of Angus cross bullocks, fed by Mr. Persse, were much admired, and brought about top price for their class. Sheep easier sold, choicest lots favouring sellers. Lambs unaltered in value. Cattle, live weight (best), 30s to 32s per cwt. Exceptional for Angus crosses up to 34s per cwt. Secondary and inferior sorts, 26s to 28s 6d per cwt. Mutton, dead weight, 5½d to 7½d per lb. GANLY, SONS AND Co.

Edinburgh. Wednesday. Lighter supplies and slower trade. Polled bullocks, £14 14s to £15 15s; others, £9 9s to £12 12s; halfbred lambs, 25s to 28s; halfbred sheep, 30s to 36s; best shorthorn cows to £25; Ayrshires, £20; and crosses, £23 5s.

Exeter. Friday.—Usual number of fat beasts on offer, and very quiet trade, prices tending lower; 11s top price for heifers and steers; some unsold. Large supply of sheep of all kinds; wethers, 8d; ewes, 6d. The supply of breeding ewes much too large for the demand, and a great number unsold. Prices lower (from 36s to 42s). Lambs scarce and dear, at 10d to 11d. Calves, 7d.

Glasgow. Wednesday.—Sheep and lambs less plentiful and prices firm. Cattle in fair supply and prices steady. Scotch cattle scarce, and fetched up to 64s; secondary, 58s to 60s; best Irish, 56s; States and Canadians, 54s to 55s per cwt.; best home sheep, 8¼d to 8¾d per lb; secondary, 1d less; top lambs, 9d; secondary 8¼d.

Gloucester, Saturday.—Messrs. Bruton, Knowles, and Co. report their sales as follows:—60 cows and calves and in-calvers, most of which were sold, with trade hardly so good. A short supply of store cattle, with very little demand.

Hereford. Wednesday.—Owing to the weather and the harvest there were small supplies and a dull market. The beef trade was middling at late rates, best quality at 6d to 6½d; cow beef, 5½d to 6d. Mutton also a quiet trade; wethers, at 7½d to 8d; ewes, 6d to 6¾d per lb. Fat lambs, a fair supply, were in good demand at 8d to 8½d per lb; store lambs a quiet trade. Fat calves, by no means a brisk trade, 6½d per lb; store calves down. Pigs a small supply. Porks went better than expected, at 5½d per lb. Store cattle met with a bad trade, very few changing hands.

Leicester, Saturday.—Moderate attendance of buyers and dealers, with a restricted supply of home-bred stock. Trade ruled sluggish, at a further decline of 10s per head. Choice milch cows, £18 to £20; good useful lots, £16 to £17; inferior, £13 to £15; Irish bullocks, £13 to £14; Welsh cattle, £9 to £10; young stock, £7 to £8; calves, 15s to 30s each.

Lincoln. Friday.—Poor show of horned stock, and a slow trade at last week's prices. Fair supply of sheep, with a medium sale. Ewes, 36s to 42s; lambs, 26s to 36s each.

Lynn. Tuesday.—Average show of fat beasts, trade slow. 7s to 7s 3d per stone. Scarcely any store beasts. £6 to £11 each. Fat sheep average show, trade slow. 8s 9d to 9s per stone. Few store sheep, 36s to 44s. Store lambs, 25s to 32s. Fat lambs, 25s to 40s each.

Manchester. Friday.—Beef: First-class, 5¾d; second-class, 4¾d to 5d; third-class, 3¾d to 4d per lb. Mutton: First-class, 7¼d; second-class, 6¾d to 7d; third-class, 5½d to 6d. Veal: First-class, 6½d; second-class, 5½d to 5¾d; third-class, 4½d to 4¾d. Lamb: First-class, 7½; second-class, 7d.

Norwich, Saturday.—Fairly brisk trade for fat beasts at 7s 6d to 8s per 14lb. Store cattle offered in small numbers, but the quality was quite sufficient to meet a slow demand; values ranged from £6 to £14 per head. Smaller number of store sheep on offer; trade quiet, lambs making 25s to 35s per head. Breeding ewes, for which there was a better demand, made 36s to 57s per head. Trade for fat sheep was firm at 9s to 10s per stone, but the supply was not up to the average. Hardening of prices for fat pigs, which were quoted at 6s 3d to 6s 6d per stone; a few store pigs sold readily.

Nottingham, Saturday.—There was a very short supply, owing to the harvest. Prices ruled about at last week. Best milch cows, £17 to £20; incalf heifers, £14 to £18; strong heifers and steers, £10 to £13; younger beasts, £6 to £9; calves, 25s to 50s.

Retford, Saturday.—At this store stock market only the pick of the milch beasts were looked at, and were worth £18 to £20; secondary sorts were difficult to sell at £14 to £16; two-year-old steers and heifers, £10 to £12; yearlings, £6 to £8; calves, 35s to 45s each.

Romford. Wednesday. Large supply of fat beasts; average trade. Best animals, 4s 4d to 4s 6d; middlings, 5s to 4s 2d per stone. Calves scarce and trade better, at 4s 10d to 5s per stone. Average supply of sheep; trade better. Best sheep, 5s 6d to 5s 8d; middlings, 6s 2d to 5s 4d; ewes, 4s to 4s 2d per stone. Lambs scarce; better trade, at 6s 4d to 6s 8d per stone. Pig trade slow.

Thame. Tuesday.—Quite an average attendance of buyers, but farmers, being busy with the harvest, supplies of stock, did not meet the demand. Beef met a ready sale at better prices than on previous weeks. Mutton in great request, realising top figures for everything, not one pen remaining unsold. Bacon and pork continue scarce and dear. Fat calves in demand, but weaning calves slightly lower. All store stock selling well. Messrs. Bond and Burrows' sale comprised 78 fat beasts, 192 fat and store sheep, 54 fat and weaning calves, and 58 fat and store pigs. Fat oxen made from £18 to £21 12s 6d; fat heifers, £15 15s to £20 7s 6d; fat wether sheep, 48s to 58s; fat lambs, 35s to 39s 6d; fat ewes, 40s to 55s; fat calves, £3 5s to £5 14s; weaning cow calves, 40s to 59s; bull calves, 12s to 45s; bacon hogs, £3 10s to £4 15s; porkers, 28s to 42s.

Truro. Wednesday. Business fairly brisk; attendance fair. Fat bullocks, 56s to 60s; barreners and store bullocks, 40s to 45s per cwt.; cows and calves, £12 to £15; rearing calves, 25s to 30s; wethers, 7d to 7¼ per lb; ewes, 5d to 5¾d per lb; lambs, 7½d to 8d; large pigs, smaller pigs, and suckers, 7s 9d to 5ls each; beef, 6d to 8d per lb; mutton, 6d to 8d; lamb, 8d to 9d; veal, 6d to 8d; pork, 6d to 8d; bacon (uncured), 6d to 7½d; ditto (cured), 7d to 9d; pork (carcases), 4½d to 5¾d. Number in cattle market: Bullocks, 260; calves, 25; sheep, 320; pigs, 143; horses, 2.

Wolverhampton. Wednesday.—Beasts slow trade; moderate supply. Sheep and lambs moderate trade; fair demand. Calves small supply. Beef, 5d to 6¾d per lb.; mutton, 6¾ to 8¾d per lb.; lamb, 8¼ to 8¾d per lb.; veal, 6d to 7d per lb.

Worksop. Wednesday.—Small supply of stock, with a fair trade for beef and mutton. Beef made 7s to 7s 6d per stone for best; secondary qualities, 6s 3d to 7s; best Southdown and crossbred sheep, 8d to 8¾d; ewes, 6d to 7d; lamb, 8½d to 9½d per lb.

FOREIGN.

Yorkhill. Monday.—Small supplies of American and Canadian cattle were on offer at the usual weekly sales held to-day, only 269 head being penned in the lairages. There was an average attendance of buyers, but business was somewhat slow throughout the day, although clearances were effected early at all the stances at rates on lines similar to those prevailing during last week. Bullocks of useful weight and sizes sold from 56s to 57s per cwt., deadweight, with a number of really choice beasts up to 58s per cwt., and rough and coarse sorts from 54s to 55s per cwt. deadweight. Bulls were easy at late rates, prime animals realising up to 46s per cwt., and rough and heavy sorts down to 44s per cwt.

Yorkhill. Tuesday. To-day a supplementary sale was held, at which 729 Canadian and American cattle were offered in the presence of a large company of buyers. Business at the outset was somewhat slow, but latterly more animation was displayed, and though prices were generally lower than those current on the previous day, transactions were of a heavier character, the consequence being that clearances were early effected at all the stances. Useful bullocks sold at from 56s. per cwt. deadweight, while the better qualities changed hands up to 57s per cwt. Secondary and rough, coarse qualities realised from 52s to 54s per cwt. deadweight. Bulls were a really choice lot of prime animals, the best of which realised from 46s to 48s per cwt. deadweight, and a few heavy sorts were sold down to 44s per cwt.

MILK.

London, Saturday.—For the week ending August 11 there was not a great demand for milk, but 7d to 7½d per imperial gallon was obtainable.—THE CENTRAL ASSOCIATION OF DAIRY FARMERS.

BUTTER

(Prices at per lb., except where otherwise stated.)

Wednesday.—Barnsley: 1s 2d to 1s 3d. Boston: 1s 1d and 1s 2d. Colne: 1s 0½d to 1s 1d. Dorchester: 11d to 1s 2d. Goole: 1s 1d to 1s 2d. Hereford: 1s 1d to 1s 3d. Holsworthy: 1s 2d. Keighley: 1s 2d to 1s 3d. Kirbymoorside: 1s to 1s 2d. Knaresborough: 1s 9d to 1s 1d per 24 oz. roll. Louth: 1s 1d. Market Drayton: 1s 2d. Market Weighton: 1s to 1s 1d. Newton Abbot: 1s 5d to 1s 7d. Northallerton: 1s 6d to 1s 9d per roll of 24 oz. Stockton: 1s to 1s 3d. Truro: 1s 1d to 1s 2d. Worksop: 1s 1d to 1s 2d.

Thursday.—Axminster: 10d to 1s. Birmingham: 1s 3d to 1s 4d. Brigg: 1s 2d to 1s 3d. Driffield: 11d to 1s. Devizes: 1s 3d to 1s 4d. Kidderminster: 1s 1d. North Tawton: 1s 2d. Penisone: 1s 1d. Penzance: 11d to 1s 2d. Plymouth: 1s 3d to 1s 4d. Ripon: 1s 8d to 1s 10d per 24 oz roll. Scarborough: 1s 3d. Wetherby: 1s 2d to 1s 3d.

Friday.—Altrincham: 1s 2d to 1s 3d. Ashburton: 1s 3d to 1s 4d. Barnstaple: 1s 2d. Chester: 1s 2d. Congleton: 1s 2d. Crewe: 1s 1d to 1s 2d. Camelford: 1s 2d Derby: 1s 4d. Helmsley: 1s 1d to 1s 2d. Knutsford: 1s 2d. Leyburn: 1s 10d to 2s per 24 ounce roll. Lincoln: 1s 3d to 1s 4d. Lostwithiel: 1s 1d. Macclesfield: 1s 1d to 1s 2d. Nantwich: 1s 2d. Northwich: 1s 2d. Otley: 1s 11d to 2s per 24 ounce roll. Redruth: 1s 2d. Runcorn: 1s 2d to 1s 3d. Stamford: 1s 2d to 1s 3d. St. Austell: 1s 3d. Stockport: 1s 2d to 1s 3d. Tavistock: 1s 3d to 1s 5d. Totnes: 1s 3d to 1s 4d.

Saturday.—Appleby: 1s to 1s 3d. Berwick: 1s to 1s 2d. Bridgnorth: 1s 1d to 1s 2d. Carlisle: 1s to 1s 2d. Doncaster: 1s 1d to 1s 2d. Grantham: 1s 2d to 1s 3d. Howden: 1s 1d to 1s 3d. Ipswich: 1s to 1s 2d. Malton: 1s 1d to 1s 2d. Pontefract: 1s 2d. Retford: 1s 3d to 1s 4d. Richmond (Yorks): 1s 2d to 1s 3d. Shrewsbury: 1s to 1s 2d. Stokesley: 1s 1d to 1s 2d. Whitby: 1s 3d to 1s 4d. EGGS.

(Number is 1s., except where otherwise stated.)

Wednesday.—Barnsley: 10 and 11. Boston: 13 and 14. Colne: 1s 9d to 1s 11d per score. Dorchester: 1s 0½d to 1s 3d per dozen. Goole: 13 and 14. Hereford: 12 and 13. Holsworthy: 13. Keighley: 10 and 11. Kirbymoorside: 12 and 13. Knaresborough: 11. Louth: 14 to 16. Market Drayton: 12 and 13. Market Weighton: 15. Newton Abbot: 1s 5d to 1s 6d per dozen. Northallerton: 12. Stockton: 10 and 11. Truro: 10d to 11d per dozen. Worksop: 2s per score.

Thursday.—Axminster: 9d to 10d per dozen. Birmingham: 10 and 11. Brigg: 12 and 13. Driffield: 15 and 16. Devizes: 14 and 16. Kidderminster: 12. North Tawton 12. Penistone: 12. Penzance: 10d to 1s 2d per dozen. Plymouth: 12. Ripon: 11. Scarborough: 10. Wetherby: 11 and 12.

Friday.—Altrincham: 9. Ashburton: 1s to 1s 1d per dozen. Barnstaple: 12 to 14. Camelford: 14. Chester: 10 and 11. Crewe: 10. Congleton: 10 and 11. Derby: 11 and 12. Helmsley: 12 and 13. Knutsford: 10 to 12. Leyburn: 11 to 12. Lincoln: 11 and 12. Lostwithiel: 16. Macclesfield: 10. Nantwich: 12. Northwich: 10 and 11. Otley: 11. Redruth: 11d per dozen. Runcorn: 9. Stamford: 13 and 14. St. Austell: 13. Stockport: 9. Tavistock: 10 and 11. Totnes: 1s 3d to 1s 4d per dozen.

Saturday.—Appleby: 11 and 12. Berwick: 1s to 1s 1d per dozen. Bridgnorth: 12. Carlisle: 9 and 10. Doncaster: 12 and 13. Grantham: 12 to 14. Howden: 13 and 14. Ipswich: 11 to 13. Malton: 11. Pontefract: 11 and 12. Retford: 1s 8d to 1s 10d per score. Richmond (Yorks): 12. Shrewsbury: 10 and 11. Stokesley: 12 and 13. Whitby: 9 and 10. Worcester: 10. York: 12.

CHEESE.

Glasgow, Wednesday.—Supplies of Cheddars and Dunlops large, and demand fair. Sellers held for firm prices. Cheddars and Dunlops fetched 50s to 56s per cwt. Little doing in New Zealands.

Newport. Wednesday.—A good supply pitched. An average attendance and a fair demand. Quotations:—Caerphillies, 50s to 56s per cwt.; fancy dairies, 57s to 59s; truckles, 54s to 58s.

WOOL.

Canterbury. Saturday. Trade slow, but prices well maintained: Kent fleeces, 11½d to 1s, and lamb wool 8d per lb. Half-bred fleeces are quoted from 1s to 1s 0½d; Downs, 1s 1d per lb.

London. Saturday.—English—per pkge. of 240lb.—Fleeces, South Down hoggs, £12 10s to £14; halfbred hoggs, £12 10s to £13 10s; ditto wethers, £12 10s to £15; Kent fleeces, £12 to £12 10s; South Down ewes and wethers, £12 to £13 10s; Leicester ditto, £12 to £12 10s. Colonial—per lb.—Vic.: Fleece super., 1s 11 to 2s 1d; scoured good, 2s 1d to 2s 2d; scoured average, 1s 11d to 2s; greasy average to fair, 1s 1½d to 1s 2½d. N.S.W.: Second average, 1s 8d to 1s 9d; greasy average, 11d to 11½d. S. Aust.: Greasy average, 9d to 9½d. N.Z.: scoured average, 1s 9d to 1s 9½d; greasy average, 10½d to 11¼d. Cape: Scoured super., 1s 9d to 1s 10d; fleece average, 9½d to 10d; greasy average, 7½d to 8½d. Natal: Scoured, 1s 5d to 1s 6d; greasy average, 8½d to 9½d. Crossbreds—Grs.—Vic.: Good to super., 1s 2d to 1s 3d. New Zealand: Fine, 1s 2d to 1s 3d; medium, 1s to 1s 1d; coarse, 10d to 11d.

FEEDING STUFFS.

Hull. Tuesday.—Linseed: During the early part of last week the market was very flat and 6d to 9d accepted for Plate on all positions to September-October. Sellers have again withdrawn their offering prices and do not seem to mind [illegible]. Russian Plate for spot, 29s 9d August-September, 29s 6d September-October, and 29s 3d seed. The market has been quiet and easier at £5 12s 6d spot and afloat, and closes nominal from £5 13s 9d for August-September [illegible] buyers do not respond, and there are no sellers [illegible]. Bombay sold at £5 13s 9d and £5 14s August-September, £5 14s 6d September-October, and [illegible] December-January and January-February. Egyptian easier at £5 11s 3d passage and August, £5 [illegible] December-January. Offered rather freely [illegible] but not much demand. Cotton cakes [illegible] better demand. KEIGHLEY MAXTED AND Co.

London. Thursday. Linseed: The market is flat and in spite of their being little pressure to sell, continue to droop on account of the absence of demand. Calcutta London, spot 30s 9d, and July-August 30s August-September 29s 3d, September-October 29s 6d. La Plata, July-August 30s. Hull: Little enquiry, except at lower prices. La Plata, spot 30s 6d, passage 30s, August-September 30s, September-October 30s. Rapeseed has continued very inactive, and prices are nominal. Brown Cawnpore, August-September 35s. Brown Calcutta, August-September about 33s 9d. Cottonseed: Market is quiet, and values have again declined for old crop, but new is [illegible] offered. London: Passage £5 12s 6d, August £5 12s 6d sellers, September-Fayoumi £5 12s 6d sellers, September-Fayoumi 50s, November-January 50s. Hull: Spot and passage and August £5 11s 3d, September Fayoumi buyers £5 17s 6d, November-January £5 18s 9d. Linseed oil has again declined in value, and quotations are lower in all positions. We quote spot and month in pipes £18, barrels £18 2s 6d, September-December £18 2s 6d, January-April £18 5s. Hull, naked spot £17, September-December £17 7s 6d, January-April £18 5s. Oil cakes.—Linseed cakes: Firm. London made £7 12s 6d to £7 15s. Cotton cakes firmer. London made £14 12s 6d.—THE PRODUCE BROKERS CO., LTD.

Mark Lane. Monday. Linseed cakes: There is no improvement to note in the demand, which is particularly small and which, to a great extent, may be attributed to the present ruling high values, causing a restricted consumption, at the same time the market is in no way affected and, in consequence of light shipments, is well supported. Russian and American remain unchanged. East India seed parcels have been sold at £7 10s to arrive. London-made maintain their value at an advance of 2s 6d per ton, but fail to attract much attention. Cotton cakes: Egyptians are in small supply and, with limited stocks, prices are firmly held up at last week's prices, with sellers in November-April position at the same figure. English remain unchanged. Decorticated London-made are in good request, considering the time of the year, both for cake and meal, but prices as well as American are practically unchanged. Rape cakes: Neglected. East India 2s 6d less money. Maize germ meal: Some business is reported in white American at £5 10s, c.i.f. terms, and English make are slightly easier. Maize gluten meal has been sold at £5 10s for autumn delivery. Rice meal is scarce on spot, but for arrival £4 10s ex ship terms would still be accepted for a limited quantity. Broken Rangoon rice in bags is relatively good value at £4 15s per ton. Molascuit cattle food goes steadily into consumption at £4 10s per ton. Locust beans find rather more inquiry at £5 5s for whole and £5 10s per ton for kibbled. Nitrate of soda is unaltered at £10 17s 6d per ton ex quay.

MOLASSINE FEEDING MEAL, packed in bags of 1 cwt. each. Price per ton, £6 15s., in ton lots and upwards. £7 10s. per ton in less than ton lots. Free on rail, Liverpool or London. Uniform delivered price for small quantities, 10s. per bag of 1 cwt.

POTATOES.

Borough. Saturday.—Moderate supplies were brought forward this morning, but the demand proved slow. English, 50s to 55s per ton.

Goole. Wednesday.—Practically nothing being on the wholesale market, most of the regular dealers being in attendance at the Yorkshire Show. In consequence prices ranged from 5d to 9d per stone.

Spitalfields. Saturday. Supplies were fair in extent, but experienced a slow trade. Per ton: Yorks, 90s to 95s; Puritans, 65s to 75s; Scots, 75s to 85s; Dons, 65s to 70s; Beauty of Hebrons, 65s per ton.

HOPS.

Worcester, Saturday.—The recent rains have done good to the plantations, which are now being freely into hop. The winds last week are stated to have of the laterals in exposed places, but no damage was done generally. Trade has continued quiet since the holidays, and little will be done before the new crop comes to market except for present requirements.—CHARLES FARAM AND Co.

SHOWS IN BRIEF.

Berkeley Hunt.

The fourteenth annual show of the Berkeley Hunt Agricultural Society, held under the shadow of the historic Berkeley Castle on Bank Holiday, was one of the best of the series, and was certainly an attractive one, there being a good attendance of visitors all day long. The entries on the whole showed an advance upon those received last year, although in some of the classes a diminution was noticeable. Horses and cattle both maintained the high average of this show, and the dairy tent was very well filled, there being a considerable increase in the butter and cheese classes, while poultry and eggs were also in excess of last year. As usual, the big crowd were kept continually interested in the jumping, driving, and racing during the afternoon. Some of the animals performed capitally, taking the difficult obstacles in a manner which greatly pleased the onlookers.

Brentor and Lydford.

The seventeenth annual show of the Brentor and Lydford Pony Society was held at Brentor on Monday, and was one of the best on record, the entries being more than on any previous occasion, whilst the quality was, if anything, above the average. The entries, as compared with last year, showed an increase of 14, and totalled 315, a record. The total in 1903 was 311, and in 1904 301. The show of Dartmoor ponies was an excellent one, and showed a great a great improvement in the breeding. Mares and foals made some very strong classes; and among them were real stamps of the Dartmoor breed. Hacks and hunters were well represented. The colts sired by Turgot were undoubtedly a wonderfully good lot, and the strongest class of the day. The prize-winners have every promise of being exceptionally valuable hunters. The jumping classes contained a number of well-known animals. The horses took the obstacles well, but would have done better but for the heavy showers, which made the ground slippery. There were three strong driving classes, and some very clever and well-mannered horses were exhibited. Polo-bending competitions attracted considerable attention, and the animals, as a whole, did their work well. Lydford show is noted for the excellence of the Dartmoor sheep sent to it, and this year's exhibition proved no exception to the rule.

Central Banffshire.

No fewer than 2,025 entries were received by the Central Banffshire Farmers' Club for their show at Keith on Tuesday, the number being considerably in advance of last year, whilst as to the general quality this was perhaps the best ever seen at Keith. Shorthorns were a splendid lot, and we should think made one of the finest displays ever seen here. Aberdeen-Angus were fairly good, and included some well-known winners; whilst there was a really capital display of tenant farmers' cattle. As to the horses, it was generally conceded that they showed a great improvement on previous shows at Keith. The weather was fortunately most favourable and the attendance of visitors good, so that the show may be written down a complete success.

Chatteris.

The nineteenth annual show of the Chatteris Shire Horse and Hackney Society took place on Monday at Manor Park, and proved a good holiday attraction, and the visitors were well catered for, there being a good entry in all sections. Mr. Wm. Richardson was the most successful exhibitor in Shires. In open colt foals he was first with a colt foal of Normoor Statesman, which was third at March, and looks like a stallion maker, another animal by the same sire, a filly out of Boro' Starlight, being in second place. In the tenant farmers' class Mr. Richardson was to the front again with a nice bay by Normoor Statesman Boro' Starlight; and third with another Normoor Statesman bay, whilst he was first and second, too, in brood mares, his first performer, Boro' Starlight, also securing the Shire Horse Society's medal. Sir Walter Gilbey's champion cup for hackneys went to the Halloo Garton Dane filly. Hackney mares were headed by Sir Walter Gilbey's Bold Princess; Mr. John Rowell's well-known Bury Duchess and Mr. W. Simpson's Linasol following in order. Mr. Wm. Morton's Afterthought won in harness, and in the filly or gelding class Messrs. A and L. Beldam had an easy win with a brown filly by Rocellan. Bold Princess was awarded the Hackney Society's medal.

Keele.

For their show at Keele Park, near Newcastle-under-Lyme, on Thursday, the Keele Agricultural and Horticultural Society offered a prize schedule of £600, and though it attracted a goodly entry (631 in the agricultural section), it was not so large as on some previous occasions. Still it was a most creditable show. A feature of the show was the excellent lot of horses exhibited. Both heavy and light animals showed improvement in quality, and the numbers were also more than maintained. Lady Mary, a mare which has only been once or twice beaten, won in an open class of hunter brood mares that produced a really high-class lot, and took the Hunters' Improvement Society's medal. The Wigginton stud were first with an animal that has been doing well in the show ring throughout the season. Cattle were a poor section, there being only seventeen entries compared with forty-two last year. There was a small show of sheep, but the quality was good, and a series of excellent pens of Shropshires, shown by the executors of W. Ball, Norton, Stone, almost swept the board. There were three classes of pigs, and breeding sows were a splendid lot. Other sections included creditable shows of cheese, butter, poultry, pigeons, rabbits, cats, and dogs. The horticultural section was notable for the excellence of the cottagers' exhibits, which were far above those of amateurs, especially as regards vegetables.

Ludlow.

The fifty-sixth show of the Ludlow Agricultural Society was held in Ludford Park on Bank Holiday, and at the outset the weather was unfavourable but afterwards turned pleasantly fine, and the horse leaping, turnouts, etc., took place under the most favourable conditions. Probably the doubtful weather of the morning affected the attendance, and accounted for a slight falling off as compared with last year. The entries this year showed an advance in some sections, and in the aggregate they compared well with those at previous meetings. Cart horses were represented by some animals of the best type and all round the quality was very good and in advance of that seen at previous shows. Some particularly nice hunters were shown in the hunter classes, and the judges were at some trouble in apportioning the awards. The cattle classes at Ludlow are always well and worthily filled, and this year there was no falling off noticeable. Herefords, of course, predominated. The weakest point in the sheep section was the wether lambs, there being only one entry, and that not of any great merit. In the other classes the competition was very good.

Newcastle Tenants.

Thanks to the great interest taken in all things agricultural and in the welfare of the show itself by the Duke of Newcastle and his popular wife, the Newcastle Tenants' Agricultural Society's annual display at Chamber Park has won a high place among agricultural exhibitions that are entirely suported by the tenantry of some of the larger estates. Occuring as it does on the August Bank Holiday, the show is usually patronised by a considerable gathering of visitors, who are given the opportunity of admiring the beauties of the famous park, and it, moreover, forms a fitting prelude to the somewhat larger show held by the Duke of Portland's tenants at Welbeck. The number of entries was in excess of those of former years, with the single exception of those in the poultry section. Agricultural horses were numerously represented, and many of them showed exceptional quality; whilst hackneys and harness horses made a very creditable display, as did also the cattle and sheep; whilst pigs, poultry, butter, and eggs were all well represented, some of the classes devoted to cottagers' produce being particularly encouraging.

South Brent.

At the tenth annual show of the South Brent Dartmoor Pony Society, held at South Brent on Wednesday, there were one hundred and eighty-two entries, a new record for the exhibition, and most of the classes were well filled. Brood mares were for the most part of good quality. Two silver medals were given by the Polo Pony Society, that for the best stallion going to Mr. John R. T. Kingwell, of Brent, and the other for the best mare to Mr. E. W. Mead, also of Brent, who exhibited a fine two-year-old. A set of very capable hunters were entered, the chief award going to Mr. S. Cockrem, who entered a beautiful gelding, Sweet Briar. Some smart turnouts were entered for the driving competition, whilst the jumping contest produced plenty of excitement. Most of the hunters negotiated the hurdles and banks with ease, but some of the ponies refused the bank..

United Counties.

The annual exhibition of the United Counties Agricultural Society, which embraces Carmarthenshire, Pembrokeshire, and Cardiganshire, was held in Carmarthen Park on Thursday, when the entries were considerably fewer than last year, being 560, as against 617, but the latter is the largest number which the association has placed on record. The show is entirely confined to the three counties, except an open £10 prize for Shorthorn bulls and an open £10 prize for Shire mares. The entries at the first show totalled 408. The winners of that year would undoubtedly be left entirely in the cold now, the type of animals seen at Carmarthen on Thursday being altogether different, and more valuable in every way. A point of interest is that there were this year 237 tenant farmers against 26 exhibitors who are not so classed. The show of stock was, all round, good; the Welsh cattle were excellent, and the best show seen here, whilst Shorthorns also did credit to the society and exhibitors. The agricultural horses, although not a large collection, were full of quality, especially the brood mares and geldings, whilst the ponies were very good indeed. The experiment which the society made in offering a prize for mountain sheep seems to have proved a failure, as there were only two entries, and they were by the same exhibitor.

Waltham Cross.

Although the weather was not of the best by any means, the annual show of the Waltham Cross and Three Counties' Horse and Foal Society, held at Waltham Cross on Bank Holiday, proved successful, both as regards the attendance of visitors and the show of stock, though the former was hardly so good as last year. The society, which really was started to improve the breed of cart horses in the neighbourhood, has thoroughly fulfilled its object, as the tenant farmers' classes were deserving of very great praise, and the farmers took the principal prizes. A better display of Shire horses is not often seen at country shows, those sent by tenant farmers being especially good. The hunters, both for light and heavy weights, were capital, and the young hunter stock showed a marked improvement. The Hackneys in the riding and driving classes were good.

Worthing.

Unfortunately for the success of the show of the Worthing and West Sussex Horse Show Society at Worthing on Wednesday, rain fell heavily at intervals throughout the day, whilst the fixture clashed with the Brighton races, and these two circumstances had a most prejudicial effect on the attendance, the result being that the "gate" was a very poor one. This was all the more regrettable in that the show itself was a particularly good one, the entries showing an advance on last year, whilst the quality was very good. Altogether the entries numbered 120, many of the best known owners of horses in Sussex competing. There were fourteen entries for hacks not under 14 hands, and 10 for the best horse 15 hands and over. The strongest section was that comprising the riding, driving, and jumping competitions. There were no fewer than eighteen entries in the jumping competition for the £30 prize. The weather improved a little when this class was in progress and the jumping was witnessed by a fashionable assembly, the stands being well filled. The winner was Mr. A. Nixey Smith's bay gelding Monarch, the same exhibitor's Grasshopper being second.

It is announced that the price of the London and North Western Railway pictorial postcards to the trade, showing the Royal saloons in colours, Royal trains, locomotives, places of interest, etc., on the system, has been reduced from 1½d. to 1¼d. per packet of six cards, or 15s. per gross packets, for all orders received after August 7th. The cards are of first-class quality and up to the end of June last over two and a half millions have been sold. New sets, in colours, showing views in North Wales, The Lake District, Scotland and Ireland, have just been published, and as the cards are nicely printed there is bound to be a big demand for them.

ADVERTISEMENTS RECEIVED TOO LATE FOR CLASSIFICATION.

SEAHAM HARBOUR STUD, LTD.

THE ANNUAL SALE OF PEDIGREE CLYDESDALE MARES, FILLIES and FOALS, also HACKNEY PONIES, CATTLE and SHEEP, will be held at Seaham Harbour, on THURSDAY, OCTOBER 5th, 1905.

Catalogues in preparation. Apply R. BRYDON, Seaham Harbour.

MERIONETHSHIRE AGRICULTURAL SOCIETY, At BALA,

SEPTEMBER 13th, 1905.

Entries close August 12th. Jumping and Trotting, September 9th.

E. M. ROBERTS, Secretary, Tremeirion, Talsarnau, Merioneth.

SOUTH TYNE AGRICULTURAL SOCIETY,

At BELLISTER PARK,

SEPTEMBER 9th, 1905.

Entries close August 31st.

W. S. CROUDACE, Secretary, Rosevean, Haltwhistle.

In writing to advertisers readers will confer a favour by mentioning "Mark Lane Express" as the source of their information.

RABBIT NETTING.—Best twine, tanned, not proof; 100 yards, 1s. 6d.; 75, 1s.; 50, 9s.; corded complete. Purse Nets, 5d., 6d., 7d.; 3s. 6d., 4s. 6d., 5s. 6d. dozen; large, well made. New catalogue, Nets, Traps all appliances. Id.—SAMUEL YOUNG, Net Trap Manufacturer, Crewkerne, Somerset. Mention paper.

Live Stock Record.

HEREFORDS AS MILKERS.

A subject of importance to breeders of Hereford cattle has recently received public attention. Mr. Preece, the well-known Shrewsbury auctioneer, a few years since executed a commission to select a few Hereford heifers from English herds for an Irish agriculturist, who desired to breed grazing steers from them. The order was duly executed, and the heifers, at three years old, bore calves; but the enterprise came to grief, according to the Irish breeder's statement, owing to the heifers yielding insufficient milk to rear their calves. The latter would have been starved, he said, if other milk had not been given them, and in the issue he was compelled to abandon the enterprise. Mr. Preece has made known these facts in the interest of the breed and of the grazing stock trade, he having always understood that Hereford cows and heifers in England rear their calves admirably. He believes this experience to be exceptional; and, if so, this should be made fully known, as "Irish Hereford crosses always command top prices at Shrewsbury store-stock sales."

In reply to this a letter from Mr. W. J. S. White has appeared in print pointing out that when Hereford heifers fail to yield milk the fault must be in their training. "This is proved," he writes, "by the fact that a large herd of pure-bred Herefords has been in existence at Zeals since 1819, kept for dairy purposes, and that in competition with other breeds this herd obtained a third prize in the class for dairy herds at the recent Royal Counties Show." This dairy herds' competition was a highly important one, inasmuch as there were seventeen in the class, all having over forty cows, and the radius of thirty miles for eligibility included the far-famed Vale of Blackmoor. Mr. A. Hiscock's Shorthorns were first, and Mr. Kilminster, who keeps deep milkers on the borders of Bournemouth to supply the teeming population of that place with the lacteal fluid, won second prize. That a herd of pure-bred Herefords should have been third is indeed clear proof that it is only by bad education that Herefords lose dairy property, especially as two of the other herds in competition were so good that extra prizes, on the recommendation of the judges, were awarded.

The fact may not be generally known that the cross of the Hereford on the Shorthorn often produces a better dairy cow than can be obtained from either pure breed. This was the discovery of the late Mr. E. C. Tisdall, of Holland Park Dairy, Kensington, who about a quarter of a century ago, compiled a milk record of sixty of his best milkers for the British Dairy Farmers' Association. The cow that gave most was "Old Hereford," so called from having the form, colour, and type of a Hereford, although possessed of a cross of Shorthorn. During her first month in profit her yield was twenty-three quarts per day; in the second and third months, twenty-two quarts; and for eleven months, an average of fifteen quarts per day. Two other Shorthorn-Herefords also had notable records, one of 14.61 quarts per day for nine months, and the other 10.68 quarts per day for eleven months. On the First Prize Royal Warwickshire Farm of 1902 a leading feature was the large herd of Hereford-Shorthorn dairy cows, which were found to be of even type as well as great merit. It had been customary for many years to give a three-years' term of service by a pure-bred Shorthorn bull, followed by a similar length of service by a pure-bred Hereford, which was perfectly successful in preserving uniformity of type.

Prominent British Breeders.

MR. W. A. TREWEEKE,
Ryne Hill, Kingham, Chipping Norton.
BREEDER OF OXFORD DOWN SHEEP.

Mr. Alfred Apperly, J.P., of Rodborough Court, Stroud, has recently shipped ten of his prize rams from his celebrated registered flock of Hampshire Down sheep from Hyde Farm to Mr. James Cullen per s.s. "Highland Hope," to Buenos Ayres.

Volume XVI. of the English Herd Book and Register of Pure-bred Jersey Cattle has just been issued, and it gives the pedigrees of 1,188 cows and 354 bulls; also lists of births in the herds of members of the Society, prize winners at the principal shows and butter test awards of 1904, results of Jersey sales, and other information of interest to Jersey cattle breeders.

STOCK AND SHOW NOTES.

By Herdsman.

The agricultural shows of this country have of late received a good deal of attention and consideration on the part of agriculturists, but if the *Agricola Journal* should happen to meet the eye of a very enthusiastic temperance reformer, the said shows will doubtless be shortly receiving the careful thought of the temperance societies for in the journal named a writer on "The Shropshire Farm Labourer" declares that "the Agricultural Show is a frequent cause of intemperance"; and, after all, perhaps he is right. As he says: "When an animal wins, the success must be celebrated; if the animal loses, there is sorrow to be drowned. In either case, it not uncommonly occurs that the stockman is led back to the farm in the early hours of the morning by the very animal which is the indirect cause of his deplorable condition." This, by the way, does not, I am afraid, apply to Shropshire only!

I have recently received a copy of the prize schedule for the British Dairy Farmers' Association's thirtieth annual Dairy Show at the Royal Agricultural Hall, Islington, on October 3, 4, 5, and 6, and on comparing it with last year's schedule, notice quite a number of alterations, and find that the classes number ninety-seven, as against 107 in 1904, these figures not including the poultry, pigeon, and rabbit departments. The falling off is not in the chief sections, and where it occurs will be seen later on, for I purpose dealing with the changes I have noticed in the order in which they come in the prize schedule. First of all I see that the standard up to which an animal must come before a milking trial prize will be awarded has been lowered in three classes, viz., the standard for non-pedigree Shorthorns has been reduced from 120 to 110 points, Guernseys from 90 to 85, and Ayrshires from 100 to 90 points. The other breeds remain as last year, namely, Shorthorns 85, Jerseys 95, Red Polls 90, and Kerries and Dexters 75. There is also another change to be noted in the milking trials, and that is that this year the Shorthorn and Red Polled heifers will be allowed to compete, the prizes for the former breed being £7, £4, and £2 respectively, and for Red Polls, £5, £3, and £2. This innovation will doubtless be much appreciated, as will also that which provides for a first prize of ten guineas, a second of five guineas, and a third of three guineas for competition only by bonâ-fide tenant farmers exhibiting in the two classes for Shorthorn cows. A bonâ-fide tenant farmer is understood to be one whose principal occupation is farming, and whose income is mainly derived from the land which he rents, and regular cattle dealers are not eligible to compete. The prizes will be awarded on the joint points for inspection and making trial. The inspection prizes in the two Shorthorn heifer classes have been reduced somewhat, they now being £5, £3, and £2, instead of £7, £4, and £2. The usual and well-known challenge and champion prizes in the cattle classes are again offered.

In the goat section the classes are as last year, and the British Goat Society's 60-guinea

challenge cup is again offered, but instead of the British Dairy Farmers' Association's silver medal for the goat winning the highest number of points in the milking and inspection classes, we have a handsome challenge cup offered by the Baroness Burdett-Coutts. Coming to the cheese department, I first notice that the champion cup offered by the Lord Mayor and Corporation of London is this year for the best Stilton, and not Cheddar, so that each make is getting its turn. Then I notice that soft cheese is this year divided into two classes, one for unripened and the other for ripened, and in both cases prizes of £1 and 10s. are offered—the amount given in the one class at the last show. The cheese fair is as usual, and the class for collections of British and Colonial dairy produce is retained, though it only attracted one entry last year. The bacon and ham classes are as in 1904, whilst in the butter section there is only one change, so far as I see, and that is that the class for fresh butter, open only to students of the British Dairy Institute has been withdrawn.

The cream, skim milk bread, and scones classes are the same as at the 1904 show, but the honey section has undergone a couple of changes. The class for twelve sections of honey, other than 4¼ by 4¼, and that for twelve sections of heather honey, being deleted, whilst in the class for wax, not less than 3 lb., the third prize has been increased from 5s. to 7s. 6d., and the exhibits are to be shown in shape, quality, and package suitable for the retail trade. The root classes show no alteration, but when we come to the "invention" section there are considerable changes to be noted, and these will be found dealt with in our Implement Supplement. Finally I come to the butter-making contests, and here, too, I notice considerable change. Last year two of the classes were divided into three sections—A, B, and C—and one into two sections, and in each three prizes (value £3, £2, and £1) were offered; but this year there is only one section to each class, and the prizes remain the same in value, so that should the same number of competitors enter, the judges will have a by no means enviable task in making their awards. A separate schedule is published for poultry, pigeons, etc., and this has not come to hand, hence my remarks do not include these sections. Entries for cattle, goats, provisions, etc., close on Sept. 4 with the Secretary, Mr. W. C. Young, 12, Hanover Square, London, W., and from him can be obtained the necessary entry forms, prize schedules, etc.

Mr. R. J. Moss, Agricultural Registrar of the Royal Dublin Society, has asked me to contradict the absurd rumour that the horse show held annually by the Royal Dublin Society, and commonly known as the Great Irish Horse Show, is to be abandoned this year owing to an outbreak of disease. There is not the slightest truth in the rumour, and the show will open on the date originally announced, August 22, and will be even larger than that of last year, for there are 1,222 entries, representing 1,156 horses, whilst in 1904 there were 1,219 entries, representing 1,150 horses. A most attractive programme has been arranged, and the show promises to be as successful as, even if not more so than, its immediate predecessors.

The Abergavenny Horse Show and Agricultural Association have prepared a goodly prize schedule for their annual exhibition of horses and agricultural stock at Bailey Park, Abergavenny, on September 7. In addition to the class prizes and specials, they offer special jumping and trotting prizes of £40, and special timbering prizes of £24, whilst as a special attraction the celebrated Ferndale Prize Band has been engaged for the day. Entries close August 22 (double fees September 1) with the secretaries, Messrs. Straker and Son, auctioneers, valuers, and estate agents, Abergavenny.

At the Chiltern Hills and Southern Bucks Agricultural Association's show at High Wycombe on Wednesday, September 13, there will be open classes, with liberal prizes, for Shire horses, hacks, hunters jumpers, harness horses, polo ponies, Jerseys, butter, and honey. Schedules and entry forms can be obtained from the secretary, Mr. Joseph Bliss, 26, High Street, High Wycombe.

Welbeck Tenants Show.

We should be pleased to see a few more such exhibitions as that of the Welbeck Tenants' Agricultural Show, for it is an exceedingly pleasing event, not only for the excellent show, but for the good feeling that prevails there, particularly between the owner of the estate (the Duke of Portland) and his tenants. For the success of the show chief credit is due to his lordship, who, with his popular wife, has most liberally contributed towards the prize schedule every year, and in other ways promoted the welfare of the show. The result is that the exhibition is now one of which any society can be proud of, and that held last week gave excellent testimony to the good influence it has had on the live stock of the district. A sum of nearly £1,000 was offered in prizes, and this drew a goodly entry, as the following table of the chief sections will show. The figures for the four preceding shows are given for comparison:—

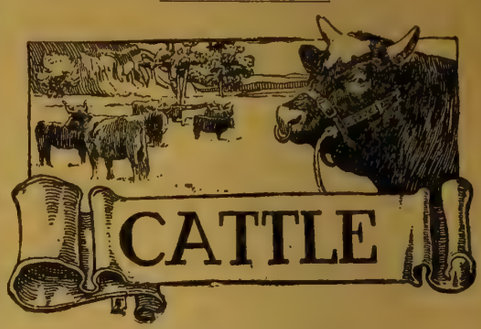
	1905.	1904.	1903.	1902.	1901
Horses	281	338	342	341	459
Cattle	79	95	92	75	109
Sheep	155	153	181	109	143
Pigs	22	33	37	32	33
Wool	20	25	25	12	21
Dairy Produce	62	74	74	77	52
Poultry	164	163	160	—	153

The agricultural horses were, as usual, the feature of the show, and a fine lot they were. The Shire Horse Society's silver medal was awarded to a two-year-old bay filly owned by Mr. Cox, of Chesterfield, who was first in her class; whilst reserved for the honour was the seven-year-old brown mare, Weston Pink, the property of Mr. Stretton, of Newark. A gratifying feature of the agricultural horse section was the satisfactory manner in which the classes for youngsters were filled. Nor was there any fault to be found on the score of quality. Amongst the half-bred horses a goodly share of the prizes was carried off by Mr. Wilkinson, of Edwinstowe. His aged brown mare, Miss Melbourne, who easily headed her class, subsequently took the leading special prize offered by the society for the best mare. The same exhibitor secured the first of the special prizes offered by the Duke, and the second went to Mr. Crossley, of Newark. A championship cup was carried off by Mr. Bingley's three-year-old, White Star, a brown gelding that has already taken several honours.

Of the cattle, the best bull was found in Cotham Sunshine, belonging to Mr. Waddington, of Newark, and the reserve card for the champion cup was handed to Mr. Arthur, of Whitwell, for a fine three-year-old bull bred by Mr. Foljambe, while the female champion cup was secured by Mr. Stretton, of Newark. Sheep made a good show—long wools, short wools, and cross-breeds being all well represented. The special prizes went to Mr. Robson, of Horncastle, and to Mr. Rhodes, Waterhouse.

A luncheon was served in the famous riding school, at which a large and distinguished company was present. The Duke of Portland presided, and, in replying to the toast of his health, made an interesting speech concerning the horse-breeding industry and motor cars, and in the course of his remarks said:—I, for one, as an owner of these malodorous, but certainly most useful conveyances (motor cars) heartily welcome the Royal Commission which it is proposed to appoint to inquire into the subject. If the result should be to make more stringent the powers of the law to deal with the many abuses which no doubt exist, I am sure we shall all most heartily rejoice, and I most devoutly hope that means may be found to check the superfluous energy of those drivers who are most aptly and fittingly called road hogs. With regard to the connection between motors and horse-breeding, he could not, his Grace proceeded, help feeling more strongly that they were very closely connected, and that the coming of the motor car, and it had certainly come to stay, could not help having a very weakening effect on the horse supply and the horse breeding industry of our country. It behoved every one interested in the matter, the Government included, to do what they could to foster this industry, not only for the sake of the farmer, but also for national purposes. One way of doing so would be for the Government to buy their young stock at three years old, that was, off their three year old grass, instead of at four years old, as was now the practice. His reason for saying this was because the difficulty of farmers keeping their growing horses until they had turned four years old, and then selling them to the Government for remounts, was well known to be very great. The farmer in many instances, or in most cases, could not afford to do this, as the price he got for his horse rising five years old was one which did not usually pay him a due return for all his time and trouble, and after three years the young horse became troublesome, and it was necessary to break him, which nowadays he was very often unable to do himself.

His idea was that the Government should pay about the same price for an animal rising four as they did for one rising five. It might cost a little more money, but the great advantage that the Government would gain was that they would obtain an unbroken animal, which could be broken according to scientific principles, and the requirements of the present day, instead of a half-broken brute, which most probably had acquired every kind of bad habit most difficult to cure, and which sometimes rendered it totally useless for all practical purpose.



Notes and Jottings.

During the past ten days or so observations have been taken of our cattle in several districts of the country somewhat wide apart, and in a good number of instances the animals do not present anything like the bloom that they did a few weeks earlier. A good deal of this is due naturally to the season of the year, still it is to be feared that the bare and brown pastures that meet one's eye everywhere, except in a few low-lying meadows, have a good deal to do with the matter, and it is to be feared that great numbers of young cattle have received a check that will be difficult to make up for afterwards. The prospect of roots for winter, however, has very much improved over the country generally, and if these are carefully used they will be a great help at a time when it is much needed.

The new Council and Committee that have been appointed to look into the circumstances of "The Royal," and advise thereon, have a difficult task before them. The troubles that beset the Society, however, it must be admitted, and is admitted by one and all, are mainly deficiency of funds. The showyard was visited by a great many people this year who are prone to complain, but even these could scarcely find cause for a single adverse word or sentence as to the arrangements and general efficiency of Park Royal, and its buildings for accommodating the show; and on the question of display, not a dissentient voice could be heard when it was said that the display of live stock at the 1905 show was one of the best ever held in the annals of the Society.

Further, all stock exhibitors go to the expense of getting up and exhibiting their wares for the purpose of advertising them, so that when the time arrives that they wish to dispose of certain cattle they are much assisted in doing so by their animals having been seen at the Royal. As a place for selling cattle and for obtaining future orders practically every exhibitor agrees that the London show has never had an equal, whilst for the accommodation of visitors it is quite certain no other city or town in the United Kingdom can compare with the Metropolis, so that it is to be hoped that any idea of taking the Royal back to the country will not for a moment be entertained.

There is one other point, too, that should receive consideration at the hands of the committee, should any of them lean to the desire of a few breeders and members who are in favour of a site somewhat northward, and that is, the preponderance of breeds from the south, as compared with the north, and also the fact that when the show has been held very far northwards, the Scottish breeds were scarcely more in evidence or not so much so as they have been at Park Royal. All roads in Great Britain, it may practically be said, lead to London, and all lines of rail give travellers to London their fastest and most comfortable trains to travel by. There are therefore many reasons why the committee should favour a continuance at Park Royal.

Whilst upon the subject of railway comforts, which by the bye are as important to cattle as to their owners, I notice considerable agitation is now taking place in America with regard to the transit of cattle by rail, favouring the

bringing into effect what is called the "twenty-eight hour law," by which companies are compelled to detrain, feed, water, and rest all cattle at intervals of not more than twenty-eight hours. Where long distances have to be traversed as is the case in the Western Continent, this course may be necessary, but there are many drawbacks to such a law; first there is the delay that such a course would incur in the animals getting to their destination; then there is the abuse (necessary) that the animals must be subjected to in reloading, and further, the fact that under such conditions there are always a number of timid cattle that would not be benefited in the least.

There was a time the writer well remembers when such agitation was very prominent in England; that the various railway companies should be compelled to provide water and feed for the stock at certain times; nothing, however, resulted from such agitation in the way proposed, but the alternative of running quicker trains and conveying the animals to their destination in a shorter time was taken into consideration by most of our companies and far greater good to all interested in cattle has resulted. Accelerated train service and more careful attention to delays in shunting have pretty well supplied all that is needed in England to-day for the welfare of our dumb animals and their owners.

As an instance of what is now accomplished in this respect, I may mention that very recently a special lot of cattle were purchased on a Friday morning in the West of Ireland (County Galway), arrangements were at once made for their transit to Mid-England (Leicester), and so well and efficiently were the arrangements carried out that these cattle reached their destination before midday on the Saturday, the actual time occupied being as nearly as possible twenty-six hours. The cattle were conveyed by the London and North-Western system via Dublin (North Wall), Holyhead, Crewe, and Stafford, so that the time mentioned included detraining and shipping at North Wall and unshipping and retraining at Holyhead. The animals, it may be added, arrived in the best possible condition.

Contagious Diseases of Animals.

Summary of Returns issued by the Board of Agriculture for the week ending Aug. 5, 1905:—

NOTE.—The figures for the current year are approximate only.

Agricultural Imports in July.—According to the Board of Trade Returns for July, issued last week, there was an increase of £1,404,000 in the imports of wheat in that month, when compared with the same month last year. The largest quantity came from India, whence we have imported 15,153,000 cwt. since January 1, compared with 15,035,000 cwt. from Argentina, and 14,211,000 cwt. from Russia. We also paid £391,000 more for oats, but £290,000 less for barley, and there was a decline of £263,000 for fresh mutton. Imports of butter in July were £135,000 above those of 1904; whilst cheese showed an increase of £138,000. Receipts from Denmark are still far in excess of those from any other source, but they tend to diminish, while those from Canada are rapidly increasing.

Horse Notes.

"He doth nothing but talk of his horse."
—Merchant of Venice.

At the luncheon at the Welbeck Tenants' Show the Duke of Portland had a good deal to say about motor cars and the effect they were likely to have on horse-breeding. He pointed out that in a few years we might expect to see nothing but motor omnibuses and motor cabs in our big cities, and that consequently there will be no use for the 'bus horse or van horse, and that fewer horses will be bred. He pointed out also that these omnibus horses had been of the greatest use during the South African war, and if they disappear from our economy altogether, as there is some likelihood of them doing, we should be in a difficulty in case of war.

The question is a very serious one. When, however, we come to consider it carefully we find that for many years the demand for horses in our cities and large towns has been steadily decreasing. Birmingham, Newcastle-on-Tyne, Edinburgh, Glasgow—nearly every city or town of importance has its electric trams. And had it not been for this it is difficult to say where the horses would have come from to carry on the modern traffic of cities. I should say offhand, and without any statistics to refer to that London is practically the only place in which horses are still largely used in omnibuses. Should this be the case, the introduction of motor omnibuses will scarcely have the effect which the Duke of Portland seems to think. Electric trams have already done much to decrease the supply of horses in the metropolis, and as the introduction of motor traffic is likely to be gradual a panic in prices is improbable. There can, however, not be the least doubt that the price of second and third class horses has been considerably affected by motor cars, and what may be classified as motor traffic generally.

Coming as a curious commentary on the Duke of Portland's prophecy respecting motor cars is a statement I heard made at Hull. I give the statement for exactly what it is worth, but I may say that the gentleman who made it is always well informed, and has peculiar facilities for obtaining knowledge. The statement was to the effect that fashionable carriage horse dealers are finding their business increasing by leaps and bounds. Many people are beginning to put down their motor cars, or only to use them "as a means of getting from one place to another when no other way is convenient." What the reason for this change may be it is not for me to say, but my informant was very insistent that the change is not only imminent, but is actually taking place. He hinted that the certainty of more stringent regulations for the benefit of the scorcher was one reason, but it is difficult to think that that has anything to do with the change. The scorcher is far more likely to defy the law than give up his amusement; and besides, one would like to think that the scorcher is, after all, in a minority, if we do hear so much about him.

In early railway days an impression prevailed that once railways were established there would be no longer any necessity for Cleveland Bays and Yorkshire Coach horses. What is now called a "slump" in horse-breeding set in, and our astute neighbours were not slow to avail themselves of this. Good judges were either appointed as agents to buy up the mares, or a few clever men speculated in them for the foreign market. Only a week or two ago I had a letter in which the writer told me that hundreds of valuable mares were sent out of the country at that time at from £30 to £35 each—mares such as we should be only too glad to have back now, and over the loss of which countless jeremiads have been uttered. It is worth while remembering for a moment that many a much greater proportion than most people imagine of the fashionable harness horses that are seen in the park are descended from those mares.

If we profit by past experience, which is perhaps too much to be expected of us, we shall not give up horse breeding all at once because motor traffic is likely to supplant horse traffic in the metropolis. We shall remember before we do so that somehow horses have always been wanted, and that, after all, the railway movement was a much greater revolution of traffic methods than was the motor car. It is quite possible, therefore, that though the prices of second and third-rate horses may decline to a certain extent, the prices of high-class horses will increase, and it must be borne in mind that it is the object of the breeder, or should be, to breed high-class horses, and not misfits.

The Duke of Portland suggested that it would be a good thing if the Government would take their remounts at three years old instead of at four years old. In this I quite agree with his Grace. To an ordinary farmer by which I mean a small farmer who is not much of a horseman, and whose time is fully occupied in tilling his acres, keeping a horse from three to four years old is a serious expense and trouble; and the breaking him in is not altogether a labour of love; the remount, moreover, if broken in a military riding school would have nothing to unlearn—a very important consideration.

But the present regulation price—£40—is not sufficient to tempt men to breed horses for remounts. The margin of profit is infinitesimal, and is easily absorbed with a very little bad luck—that very little bad luck which always is expected by the horse breeder, and which is never expected in vain. Let the man who thinks differently about the profit of a three-year-old—which for army purposes would mean three and a half years old—at the regulation price just count the cost, and I think he will come to the same conclusion as I have done.

The question where we are to get our remounts from when they are wanted, in case the Duke of Portland's forecast about horse breeding is correct, is one which will take some answering. "Get them from Canada," says A. "Fall back on the farmers and horse breeders; leave the horse supply to them," says B. Excellent plans both of them from the standpoint of A and B sitting in their club smoking-room, discussing the affairs of the nation over long drinks and cigars the size and thickness of an ordinary hedge stake.

But there are two sides to every question. It is quite possible to imagine a state of things in which, in case we were at war with one or more great Powers, we might not have the undisputed command of the sea. So that even if the horses in Canada were everything we required, and there was no chance of immense fortunes being realised by the purchase of them in a few weeks, it is just possible that they might not be available when they were wanted. As for the other suggestion, that of falling back on the farmers and horse breeders and horse owners, that means in plain English, commandeering horses when they are wanted. That is all very well in a way; but it is just as well to point out that there is a limit to one part of the community bearing their own burthens and a considerable portion of their neighbours' burthens as well. There is not much sense of fair play—not even of common honesty—in the man who, for his own selfish ends, neglects a duty and then fines his neighbour for his own negligence. For practically that is what requisitioning horses amounts to. For commandeering means taking a horse, no matter what his value, without a "by your leave," and paying the regulation price for them—£40, or at most £45.

Of course, if this were to be the plan of any government, it would soon defeat itself, for farmers would, in a great measure, give up horse breeding, and when the remounts were wanted they would not be there at all to requisition. So, if the Duke of Portland is correct in his conclusions, we are likely to find ourselves in an awkward situation. One would like to think that he is taking a gloomy look of things, and that the opinion I heard expressed at Hull is more likely to be correct. But it is just possible that he may be right, and that, as in the early railway days, there was a period when horse breeding was neglected to the serious loss of the nation, so may we have a similar neglect of horse breeding owing to the increase

THE TENS OF THOUSANDS of users of MOLASSINE MEAL should see that their stock have a portion in every feed all the year round, not simply as a condiment when an animal is out of condition, or occasionally as a fillip. MOLASSINE MEAL is the most valuable and economical food, displacing all condiments, and should be given in place of the same weight of oats, beans, grain, cake, or other feeding stuffs. Sold by all corn merchants and the MOLASSINE CO., Ltd., 36, Mark Lane, London, E.C. —[ADVT.]

of motor traffic in towns. It is of the greatest importance that important decrease of our horse stock should be carefully watched, and means taken to stop it.

The question naturally arises, what means? It would almost point to the forming of government studs. This is a plan to which I have the greatest objection. We have had so much experience of government management (?) that we may well wish to avoid government studs. But it is within the range of possibility that we may have to depend on them to keep us out of a worse evil, and it will be just as well to accustom ourselves to the idea. For my own part, if the Duke of Portland's forecast should prove to be correct, I can see no alternative.

THE LOOKER-ON.

Report of the Royal Commission on Horse Breeding.

The Royal Commission on Horse Breeding have just issued their tenth annual report to his Majesty the King, and, following custom, it is written in the quaint legal style that characterises such documents. The report states that since the Commission issued its last report in July, 1903, two shows have been held in London during the years 1904 and 1905, and twenty-eight King's premiums of £150 were awarded at each show. The report continues:—

The number of stallions competing in the district classes, and also the quality of the exhibits remains good, and in this connection we quote the reports of the judges at the last two shows, as follows:

"1904 Show.—As judges of the thoroughbred stallions we consider that, taking the show all over, the horses shown are suitable for the purpose for which they were exhibited; but the various classes, were by no means equal in quality. In some cases, notably E (comprising the districts of Yorkshire) and F (comprising the districts of Gloucestershire, Herefordshire, Monmouthshire, Shropshire, Staffordshire, Warwickshire, Worcestershire, and South Wales), which stood prominently forward, most of the stallions shown were good, but in other classes the exhibits were decidedly poor. We found the information given by the Commission as to the length of time the stallions had been in training, and their performances on the turf, to be of much assistance in enabling us to form an estimate of their natural soundness and constitution."

"1905 Show.—The judges have the honour to report to the Royal Commission on Horse Breeding that, compared with previous exhibitions, they have every reason to be satisfied with the general merit of the competing stallions. Some districts were represented by better horses than others, as it is manifestly impossible that a level degree of merit can be maintained, and whereas Yorkshire had a very good entry of horses of substance and quality, Class G (comprising the districts of Cheshire, Lancashire, and North Wales) suffered in comparison, but to counterbalance, the judges thought the Scotch entries were individually better than they have been on many occasions. It was very gratifying to the judges to find that the efforts of the Royal Commissioners to ensure that none but sound stallions should be exhibited, has been so entirely successful, very few indeed of the horses sent to be examined failed to satisfy the veterinary surgeons. Finally, the judges desire particularly to express their gratification that the Royal Commissioners have allowed the turf careers of the competing stallions to be somewhat taken into account when awarding the premiums. By this means, horses that probably from some natural defect of limb, or temper, which effectually prevented their appearance on a racecourse, have been in some instances passed over in favour of others which have been able to bear the test of training. The judges did not consider it necessary that the horses competing should have actually won a race, but considered it much in their favour if they have been able to run respectably for a certain period."

As stated in our last report, your Commissioners have considered the desirability of giving the judges an account of the racing careers of the horses exhibited, and it is gratifying to note that the judges have found these particulars useful in making their awards.

From the animals exhibited, suitable horses have been selected and located in the various districts in England, Wales, and Scotland.

Your Commissioners have much pleasure in reporting that out of a total of ninety-four stallions entered for exhibition at their last show (ninety being present), forty-eight had been exhibited before, and forty-two were new entries. Of these fifty-six were sent for veterinary examination, and fifty-one were passed sound. Of the new exhibits, eleven received premiums, and of the old, seventeen.

We consider it a satisfactory sign that the percentage of horses rejected for unsoundness, shows a great diminution compared with the early years of our work. When the first show was held at Islington in 1889, of ninety exhibits, seventeen were rejected as unsound, whilst in the present year out of ninety exhibits only five failed to pass the veterinary examination. From a total of seventy-five horses exhibited in the English classes, only one horse was rejected.

Since our last report one stallion has been debarred from further competing for King's premiums, having failed for two seasons to get the average percentage of foals required.

The question of purchasing horses for remounts between three and four years old is one which has been recommended by us from time to time in our reports, and we cannot state too strongly, that in our opinion, great benefit would accrue to the public service, and much encouragement would be given to breeders to use only sound stallions producing horses fit for use in the British Army, if the breeders knew that the Remount Department were purchasers of their young stock.

Your Commissioners have urged in their report to your Majesty from time to time the necessity for having their grant increased, and, as stated in our last report, the small sum at our disposal is totally inadequate to our needs. We believe the time has come when something more should be done to improve the quality of the mares. There is no doubt that much good could be done in this direction by your Commissioners, but with the small sum available for our use, we find ourselves unable to deal further with this matter.

As appendices to the report are given a table showing the number of prizes awarded in the years 1902, 1903, and 1904 to the stock of the premium stallions at the different summer meetings at which medals are awarded by the Hunters' Improvement Society; a table showing the number of mares and average number served in each district class for the five years from 1900 to 1904, together with a summary of these tables; and some information referring to the work of the Commission since the publication of their last report.

Sale of Mr. Minton's Shropshires.

Mr. T. S. Minton held his twenty-fifth annual sale of Shropshire rams and ewes at Montford on the 4th inst. The flock is one of the oldest extant, and its successes in all the principal breeding and fat stock shows for a long time past was again demonstrated this year at the Royal Show by a pen from Montford taking the first prize for ewe lambs. As usual, the sale was conducted by Messrs. Alfred Mansell and Company, of Shrewsbury, and the following were the prices:—Shearling rams: 26 guineas, Sir Walter Corbet, Bart.; 50 guineas, Mr. F. Bibby; 8 guineas, Mr. Nuttall; 8 guineas, Mr. M. Williams; 13 guineas, Mr. Caessares. Pasture rangers: 10 guineas, Mr. Garner (to let); 8½ guineas, Mr. Rooth; 7½ guineas, Mr. Humphreys; 7 guineas, Mr. Roberts; 7 guineas, Mr. Goodall; 5½ guineas, Mr. Eddowes; 6 guineas, Mr. Richards; 5½ guineas, Mr. Bircham; 6 guineas and 6 guineas, Major Allford; 17 guineas, Mr. Everall (to let); 17 guineas, Mr. Witchdale; 17 guineas, Mr. Henderson; 6 guineas, Mr. W. B. Nevett; 5½ guineas, Mr. Rogers; 6½ guineas, Mr. Webster; 10 guineas, Mr. T. Frank; 9 guineas, Mr. Lewis. Pens of five shearling ewes made the following prices: 180s., Mr. Richards; 105s., Mr. Caessares; 75s., Mr. Owen; 60s. and 55s., Mr. Roberts; 55s., Mr. Tudor.

Mr. J. H. Dibden's Hampshires.

The letting and sale of ram lambs from the well-known Bishopstone flock of Hampshire Downs belonging to Mr. J. H. Dibden, took place at the Market Place, Salisbury, on Tuesday, Messrs. Waters and Rawlence being the auctioneers. There was a large and representative company of buyers present, but as, at so many other sales, an entire clearance was not effected. The catalogue comprised 100 ram lambs and one shearling, and were generally considered to be as good a lot as Mr. Dibden has brought out for several years past. Six lambs were first let at an average of £24 17s.; Mr. Edwards' hiring, No. 1, at 19 guineas; Mr. H. Marner, No. 2, at 9 guineas; Mr. T. Coles, No. 3, at 18 guineas; Mr. Kerr (for Mr. H. C. Stephens), No. 4, at 54 guineas; Mr. J. Dean, No. 5, at 16 guineas; and Mr. Allen, No. 6, at 26 guineas. The selling lambs made from 5 guineas to 30 guineas; Mr. G. Judd buying at 30 guineas, 24 guineas, and 15 guineas; Mr. J. B. Harding (for Sir W. G. Pearce) at 20 guineas; Mr. W. Green at 16 guineas and 10 guineas; Mr. H. Warner at 15 guineas, 10 guineas, etc.; Mr. Maslen (for Sir Richard Ryecroft) at 15 guineas, 10 guineas, 9 guineas, etc; and others at prices from 13 guineas downwards. The average of the eighty ram lambs let and sold was £10 10s.

Notes and Jottings.

The work commenced, according to the general acceptance of the historians of the improvement of sheep, by Bakewell in the Longwools and Ellman in the Southdowns, was by no means completed by them. Other equally keen and industrious successors followed, most of these are unknown to fame, and even record, at the present day. However, as one visits different flocks, more particularly those old-established ones, it is surprising how much interesting and, to the breeder, valuable information is gained in those ever-delightful chats around the cheery fire, with pipe and grog in the winter, or under the shade of the well-grown garden tree in the cool of the summer evening. It is a matter of regret that such chats of old times and doings of sire and grandsire cannot be recorded. Interesting and most instructive are many of these tit-bits of information—how in the year —— my father or my grandfather went and secured such and such a ram; a ram, for instance, that was the sire of or the pet of some notable name: a name to which all who can do so are happy to trace back their pedigree. "What's in a name" many of our present-day youngsters at the business have often said to the writer? Why that ram and its breeder have been dead and forgotten years ago. Perhaps this may be so if viewed in a general way, but not so to the true breeder. These are but few, but wherever found are owners of flocks of high merit. It is within this small but select circle that the true appreciation of the work of those great breeders of former years, and their life work is given its true acknowledgment. There are many of the present-day breeds which most of the owners are ever ready to say are pure-bred, etc., but yet how few—very few, indeed—are the flocks, no matter what may be the breed, but that have had at some time or other just a dash, it may be, but still a stain of some alien blood or other. 'Tis well it was so, for without it most of the leading strains of blood in practically all our so-called pure-bred flocks would not be in existence.

In pre-registration days this method of breeding was far more common than is generally supposed, but the evidence of this is only come-at-able when the evening's chats are on. A breed that at the present day holds a foremost place in the world—the Lincoln—unquestionably owes a large part of the merit that at the present day makes it so largely popular to the judicious infusion of the choicest strains of Leicester blood by the fathers and grandfathers of the present-day breeders. History records the fact that for 1,000 gs. hire for a season a Bakewell ram was hired for service in flocks, the descendants of which at the present day are recognised as being the leading Lincoln flocks of the present time.

This is, of course, but one of many instances in which the combination of the Bakewell or Dishley blood with the Lincoln sheep was effected. This fact in no way affects the merit, etc., of the Lincoln sheep of the present day, for they have been bred sufficiently long as pure-bred sheep; and mention is made of this fact, by the way, to illustrate the continuation of the work of improvement commenced by those great men named at the commencement of our notes.

Amongst the matters of historical interest in connection with sheep-breeding seen recently at Mr. T. C. B. Dixon's home at Brandesburton, now owner of a first-class Lincoln flock, was a painting of the head of that 1,000 gs. Leicester ram. Over a century has passed since this figure was paid for its season's hire, and yet the record then made remains a record still. Unquestionably the blood of this ram still runs in the veins of the Lincoln sheep, and, what is likewise a fact, that amongst these are flocks of the highest repute. Mention of that grand old ancestral home of Mr. Dixon reminds me that he is, like many of our leading flock-owners, the third in direct succession. A visit was made to the older homestead, near Keeling, where his grandsire commenced business in the early part of last century. Many bits of information concerning the history of that time were given during the enjoyable drive to

and from the old homestead. This all tended to show then, as now, the flock was well and carefully tended. Mr. Dixon enjoys the results of the care and labour of those long since gone years, and all who go to his forthcoming annual sale on August 18 will find the present owner is a worthy successor of the grandsire who founded the flock.

Another instance of this continuity of ram-breeding was afforded the other day at Totnes ram sale. The father of the Brothers Cornish, Messrs. E. and J. H., met the writer there, and said how pleasant it was for him to find his sons were taking up the work that he and his father before him had done, namely, selling South Devon rams; for, said he, we, the three generations, have missed but one year at this sale since 1820. Again, in another district, we have a record of almost as much length, namely, that made by Mr. H. Rigden, who sold for sixty consecutive years rams in his Ashford sale; an occupation only ended by his death two years since, and now, we are pleased to note, being continued with equal success by his son and successor.

Other examples might be given of the continuity of the work of ram breeders in the breeds mentioned, as well as in those not mentioned, but sufficient has been said to show that the work of improvement commenced by Bakewell and Ellman is still being continued. Perfection cannot be secured, and well it is not so, because, if it were, then an inducement to improve, etc., would be ended. Fashion changes, and so do the requirements of the market. In former years a large quantity of fat was desired, and large joints with good fleeces; nowadays, smaller joints, with earlier maturity and more rapid developments, are the essential points. What may be the requirements of the future time alone will decide, but be these what they may, the evidence of the past all points clearly to the fact that no matter what may be required, the present and future flock-masters will be fully able and competent to provide.

An interesting chapter could be written of the doings that used to take place at the old lettings of sheep in the North Country. "Our old letting used to commence," said a breeder still alive, "on the Thursday, and it was well if all the intending purchasers, or hirers, as they were in those days, were got rid of by the Saturday night." What a contrast to the present day, when under the procedure now generally adopted, these annual sales open after one o'clock lunch, and all are over in from two to three hours. At the recent Riby sale thirty-one yearling rams were disposed of in little more than an hour at £90 0s. 7d. per head. Fifty years ago this would have taken at least two days, if not more. Such is the difference of the present-day method of business. Whether it be better than the old one we do not know, for those who have experienced the older method will give no definite opinion. It may, however, be taken as a fact that each successive age or period so arranges its methods and work as are the best fitted for it, and thus, despite the unquestionably pleasant and enjoyable meetings the older method brought about, it is certain, with the present-day facilities, etc., for travel and movement, that system would not in any sense be either convenient or desirable.

Sheep Fairs and Sales.

Blandford.

At the August sheep fair held at Blandford on the 3rd inst., the lamb trade was not quite so fast. Ewes sold very well, the best making from 35s. to 50s.; grazing ewes, 25s. to 35s.; lambs, 35s. to 42s.; secondary, 26s. to 32s.; best wether lambs up to 52s. Messrs. Ensor and Son offered 2,500 Down sheep and lambs in the presence of a large company of buyers. The lamb trade was not quite so good, but there was a fair trade for ewes. Lambs showing good condition sold best and were most in request. For working lambs there was not so fast a trade. Best ewes made from 35s. to 46s., and fat ewes made up to 52s. This same firm also brought under the hammer about 300 grand registered Hampshire Down ram lambs from the best breeding flocks of the district, this number beating all previous records, and the quality of the entries was good throughout. The trade was brisk from start to finish, and almost every lot was cleared at satisfactory prices ranging from 20 gs. down to 4 gs.

Carlisle.

The opening special sale of lambs at Carlisle took place on the 5th inst., when buyers were numerous, and trade ruled brisk at prices similar to those obtained last year. At Harrisons' Mart half and three quarter bred made up to 27s. 3d., cross Devons to 32s. 6d., Leicester crosses to 22s., and Cheviots to 12s. 6d. Feeding sheep: Half-bred hoggs to 31s. 9d., crosses to 35s. 6d., and Cheviots to 29s. 6d. Hetherington's best prices were:—Feeding sheep: Half-bred shearlings 35s. 9d., black-faced 19s. Lambs: Half-bred 25s. 9d., and crosses 20s. 6d.

Castle Douglas.

Mr. William Wallet held his annual sale of top lambs at Castle Douglas on Monday, when about 10,000 were forward, and the ring was crowded with customers, including several English buyers. Owing to the cold spring some of the flocks were scarcely shown in such fine condition and bloom as last season. For top half-bred lambs the high rates obtained at this market last year were well maintained, while secondary lots were down about 1s. 6d. a piece. Prices ranged from 25s. to 32s. per head.

Chichester.

The annual show and sale of Southdown sheep held at Chichester by Messrs. Stride and Son took place on Wednesday, the catalogue consisting of about 6,000 ewes and 410 shearling rams and ram lambs. Challenge cups were offered for the best five shearling rams, the best five ram lambs, and the best fifty regular draft ewes from registered flocks. The entries in each class were very large, and the judging was very satisfactorily carried out by Mr. J. H. Jennings, of Bury St. Edmunds, and Mr. W. Massie, of Shillinglee Park, Petworth.

The champion cup for shearling rams went to Mr. Edwin Ellis, of Summersbury Hall, with a pen of beautiful quality, the Duke of Devonshire's pen being highly commended, and the Duke of Richmond's commended. For five ram lambs the challenge cup went to the Duke of Richmond, who showed a pen of well-grown, deep flesh lambs, while Colonel Hammond, of St. Alban's Court, Dover, was highly commended, and Mr. John Tompkins, of Angmering, commended. The winner of the challenge cup for fifty regular draft ewes was also the Duke of Richmond, whose pen of typical Southdown ewes was closely followed by a pen from Sir Henry Aubrey-Fletcher, of Ham Park, Angmering,

There was a large attendance of buyers from all parts of England and also from Wales at the sale, and a steady selling trade prevailed throughout for both ewes and rams. The top price for shearling ewes was 84s., which was secured by the Duke of Richmond, while the highest price given for a shearling ram was 32½ gs., given for one entered by Mr. Edwin Ellis. A great number of rams sold from 15 to 25 gs.

The Chitterne Hampshire Downs.

The sale of a choice portion of this well-known flock, the property of Mr. J. Dean, at Chitterne, attracted a goodly company of buyers, but trade was not very keen, and a number of animals remained unsold. Prices for the lambs ranged from 13 gs., 9½ gs., 8½ gs., 8 gs., 7½ gs., to 4½ gs., and for the shearlings 5 gs. to 6 gs. Three hundred two-tooth ewes were next sold at 67s. 66s., 65s., 64s. 63s., 62s., 61s., 60s., 59s., 58s., and 57s, the average being 61s.; 270 four-tooth ewes made 102s., 72s., 71s., 70s., 69s., 68s., 67s., 66s., 65s., 64s., to 56s., average 66s.; 250 six-tooth ewes made 74s., 70s., 69s., 68s., 67s., 66s., 65s., 64s., to 57s., the average of those sold being 64s.; the ewe lambs made 90s., 70s., 62s., 50s., 49s., and 48s, the average of those sold being 55s. 6d.

Mr. C. Coles' Hampshire Downs.

The annual letting and sale of ram lambs and rams from the celebrated flock of Hampshire Downs belonging to Mr. Cary Coles was held at Winterbourne Stock, on the 11th inst., in the presence of a large attendance of breeders. Ninety three ram lambs and two rams were submitted, and these were generally allowed to be about the best lot Mr. Coles has ever presented to the public, and the result fully justified that opinion, for a record price was established for the lot of a ram lamb, 2[illegible] gs., Mr. Mason of Winchester paying this sum.

Ten lambs were first sold, Mr. W. T. Harding hiring No. 1 at 20 gs., Mr. C. Bugg No. 2 at 28 gs., Lord Rothschild No. 3 at 70 gs., Mr. J. Flower No. 5 at 90 gs., and No. 8 at [illegible] gs., Mr. Kerr (for Mr. H. C. Stephens) No. 6 at 22 gs., Mr. Drake No. 7 at 80 gs., Mr. Holman No. 9 at 22 gs., and Mr. Hurford (for Mr. T. F. Buxton) No. 10 at 50 gs. The grand average for the ten lambs was £69. Of the selling [illegible] Mr. Harding (for Sir W. G. Pearce) secured No. 15 at 46 gs., Mr. H. Lambert No. 37 at 38 gs., Mr. Richards No. 18 at 30 gs., and No. 21 at 24 gs, Mr. Falconer No. 20 at 30 gs., the Marquis of Winchester No. 27 at 23 gs., Mr. Lunn (for Lord Ashburton) four lambs at 22 gs. each, Mr. Bugg bought at 24 gs. and 23 gs., and others from 21 gs. downward. Several of the younger lambs were not sold, but the average for seventy-eight let and sold was the excellent one of £20 10s.

Mr. G. L. Dean's Hampshire Downs.

Fifty ram lambs from the Homington flock of Mr. G. L. Dean were offered at the Market House Yard, Salisbury, but the attendance of buyers was not large, and the larger portion of the lambs were not sold. Those disposed of made from 4½ gs. to 18 gs.

Dorchester.

The annual sales of Dorset, Down, and Horn sheep at Dorchester took place on the 5th inst., when a number of important consignments were sold by auction by various firms. For ewes trade was good at prices ruling at the July fair; but for the Dorset Down lambs a decline of 1s. 6d. per head was generally admitted. Quotations: Dorset Horn ewes, 41s. to 46s.; registered Dorset Horn ewe lambs, 30s. to 44s.; Dorset Horn and cross-bred wether lambs, 28s. to 38s. 6d.; Dorset Horn wethers, 41s. to 48s.; Dorset Down ewes, 38s. 6d. to 48s.; Dorset Down flock ewes, 48s. to 62s.; Dorset Down wethers, working lambs, 29s. to 36s. 6d.; Dorset Down mutton lambs, 38s. 6d. to 44s.; Dorset Down ewe lambs, 28s. to 34s.; Dorset Down wethers, 39s. to 45s. Messrs. Duke and Son offered upwards of 130 Dorset Down ram lambs from the old-established registered flocks of Messrs. T. N. Bartlett, West Knighton; G. W. Homer, Athelhampton; H. Duke, Martinstown; and Mrs. Hooper, Winfrith. Mr. Bartlett sold thirty-five lambs at an average of £4 15s. 7d., the prices ranging from 3½ gs. to 7½ gs.; Mrs. Hooper sold thirty-two at an average of £5, the prices being from 3½ gs. to 9 gs. Twenty-two of Mr. G. Wood Homer's draft of thirty-eight were sold at an average of £7 1s. 9d., prices being from 3½ gs. to 11 gs. Mr. H. Duke's draft of twenty lambs were all sold at an average of £6 16s. 6d. per head, the prices ranging from 4 gs. to 14 gs. Messrs. Roberts, Son, and Tory submitted twenty-five grand two-teeth rams from the flock of Mr. J. E. Tory, Turnworth. The wealth of flesh, quality of wool, size, and the kindly character of the sheep caused favourable comment, and resulted in keen competition and a satisfactory sale. Mr. Wolland was a large purchaser, paying 14, 9½, 6½, 6, and 5½ gs. for some typical West Country Downs; and Mr. Candy, for the Earl of Eldon, secured capital sheep at 10½ gs. Other prices ranged from 4½ to 9½ gs., and the sale resulted in the satisfactory average of 8 gs.

Forthcoming Live Stock Sales.

DATE.	STOCK.	OWNER.	PLACE OF SALE.
August			
15	Southdown Sheep... ..	Various	Lewes, Sussex.
16	Kent and Half-Bred Sheep and Lambs	Various	Ashford, Kent.
17	Shropshire Sheep	Mr. T. A. Buttar	Corston, Coupar Angus, N.B.
17 & 18	Horses	Various	Crewe.
18	Southdown Sheep	Sir N. W. G. Throckmorton	Buckland, Faringdon, Berks.
18	Lincoln Long-Wool Rams	Mr. T. C. B. Dixon ..	Brandesburton, Bard, near Beverley, Yorkshire.
18	Kent and Half Bred Sheep and Lambs	Various	Westenhanger, Kent.
18	Cobs, Ponies, and Young Stock	Mr. G. Lauder and Mr. C. Y. Kinloch	Dunblane, N.B.
22	Shropshire Sheep	Sir P. A. Muntz	Dunsmore, near Rugby.
22	Cart Horses	Mr. P. H. Case	Salisbury.

Eggesford.

The annual ram sale at Eggesford was conducted on Wednesday by Messrs. Hannaford and Son, who had for disposal about forty rams, sent in by Messrs. J. Cowle, Winkleigh; S. Stevens, Eggesford; J. Harris, Coleridge; R. W. Vicary, Burrington; Tucker, Monkokehampton; and Heaman, Dolton. Mr. Cowle's fourteen rams averaged £6 8s. 3d. each, the prices ranging from 5 gs. to 9½ gs.; Mr. Tucker's averaged £6 5s. 6d. each; and the others made from 4 to 6 gs.

Ilsley.

The annual sheep fair at Ilsley was well supplied, and some important transactions took place, well-known breeders of Hampshire Downs sending goodly supplies for sale by auction. Trade, however, was very slow, and on most lots sold there was generally a reduction of 1s. to 2s. per head on the prices made at the late fairs. Two-tooth ewes made the highest prices, and may be quoted up to 54s., and stock ewes from 30s. to 46s.; and lambs from 25s. to 36s. The principal feature of the fair was the sale of ram lambs from celebrated Hampshire Down flocks, details of which are appended.

Messrs. Waters and Rawlence offered a very useful consignment of forty ram lambs from Mr. R. L. Ovey's Badgemore flock, but unfortunately sufficient buyers were not present to effect a clearance, and those disposed of made from 5 gs. to 7 gs. each. Mr. A. C. Hall, of the Manor, Great Rollright, Chipping Norton, sent ten well-bred lambs, but buyers were not forthcoming for them. Messrs. Waters and Rawlence had less difficulty in disposing of the grand ram lambs from Sir W. G. Pearce's Chilton Lodge flock, their excellence and the exceptional prize-winning record of the flock during the present season attracting considerable attention and competition. Eight lambs were first let, No. 1 being hired by Lord Rothschild, at 48 gs.; No. 2 and No. 7 by Mr. Hanbury, at 18 gs. and 10 gs.; No. 3 by Mr. Judd, at 44 gs.; No. 4 and No. 5 by Mr. Nichol, at 17 gs. and 36 gs.; No. 6 by Mr. Notley, at 20 gs.; ; and No. 8 by Mr. Cripps, at 20 gs.; the average being £28. Of the selling lambs Mr. Hanbury secured No. 13 at 23 gs., and Mr. W. T. Hall No. 22 at 21 gs., others making 12 gs., 11 gs. (twice), 10½ gs., 9 gs., 8½ gs., 8 gs., 7½ gs., 7 gs., etc., the result of the whole being that forty-five lambs were let and sold at an average of £11 11s.

Messrs. Franklin, Gale, and Newton offered twenty-five Hampshire Down ram lambs from Mr. H. L. Cripps, Shifford, thirty Hampshire Down ram lambs and three rams and 140 two-tooth ewes from Mr. H. N. Carlisle's Moulsford flock, and also tried an experiment by selling by auction 140 stock ewes and 165 store lambs from C. Morrison, Esq., Basildon Park. In spite of the drought and consequent short supply of keep, which doubtless had an ill-effect on all trade at the fair, the results may certainly be considered satisfactory. Mr. Cripps' ram lambs were nearly all sold, and made from 4½ gs. to 21 gs. (the purchaser of the latter being Sir W. Pearce, Chilton Lodge, Hungerford). Mr. Carlisle's thirty-three were all sold, and made from 3 to 5 gs., averaging 3½ gs. Two-tooth ewes from the same flock made from 51s. 6d. to 55s. The store ewes and lambs consigned by Mr. Morrison met a brisk trade, and were all disposed of at satisfactory prices, wether lambs making from 33s. to 34s. 6d., and stock ewes 40s. to 42s. 6d.

Inverness.

Macdonald, Fraser, and Co., Ltd., held their first annual lamb sale for the season at Inverness on Tuesday, when the numbers on sale were 2,026 lambs and sheep, and also some cattle. The show of lambs was somewhat similar to the corresponding sale of last year, and were shown in very good bloom. The attendance of buyers was certainly the largest that has been forward here at an opening sale, and the lambs, which were mostly crosses and half-breds, met an animated demand at a rise of 1s. 6d. to 2s. 9d. per head over last year. The following are the principal lots of lambs and the prices realised:—Gask, 27s.; Tomich, Oxford crosses, 32s. 3d.; Dochfour, crosses, 25s. 9d.; Redcastle, half-breds, 25s. 9d.; Faille, crosses, 23s. 6d.; Bindal, half-breds, 30s. 9d.; St. Vincent, 26s. 3d.; Bunloit, crosses, 22s.; Culcadock, half-breds, 24s.; Essich, half-breds, 23s. 9d.

Mr. Judd's Hampshire Downs.

The annual sale and letting of rams and ram lambs from Mr. G. Judd's Hampshire Down flock attracted a goodly company to Cocum, but trade was far from good. Of the six rams to be let for one month, five were withdrawn, only one being let for 18 gs. The auctioneer next proceeded to sell 94 ram lambs, of which three were withdrawn. One sold for 12 gs., two for 10½ gs. each, one for 9½ gs., four at 9 gs. each, eight at 8½ gs., seven at 8 gs., sixteen at 7½ gs., eleven at 7 gs., eight at 6½ gs., ten at 6 gs., ten at 5½ gs., four at 5 gs., and nine at 4½ gs. Six shearling Hampshire Down rams next went through the ring, and five of them sold—at 9½ gs., 6½ gs., two at 5½ gs., and one at 4 gs. Some of the regular draft ewes were put through the ring, but ultimately were all withdrawn.

Lindfield.

This well-known Sussex sheep fair was held on Tuesday in dull weather, but was largely attended. Over two thousand sheep and rams were forward, and at the outset met a slow trade, flockmasters holding on for best prices, but as the morning advanced there was an easiness in price rather than an inclination to take the lambs home again, and a number of transactions took place. The top price given for lambs was 39s., at which price Mr. A. Wadman, of Firle, sold a pen of 103. Other prices were 37s., 36s., 33s. 31s. 6d., 29s., 28s. 6d., and 25s., the demand being greater for the moderate-priced lamb rather than the best. Tegs sold at 48s. to 39s., and ewes 48s. to 30s.

Oxford.

The annual ram fair at Oxford was held on Wednesday, when the number of rams consigned to the various firms of autioneers was about equal to that of recent years, but in the stock sheep there was a considerable falling off. There was, however, a very numerous attendance of purchasers—breeders, farmers, and dealers—and with a keen demand for sheep the trade was brisk throughout, with consequently improved prices as compared with those realised at the fairs of the last few years. The highest price of the day was secured by Messrs. Paxton and Holiday for an Oxford Down shearling ram bred by Mr. John Worley, of Brizenorton, which was purchased for 70 gs. by Mr. Horlick, of Cheltenham. One of the noted flock of Mr. A. Brassey, M.P., Heythrop, was knocked down by the same auctioneers at 45 gs. to Mr. J. T. Hobbs, Maiseyhampton, and they also obtained 46 gs. for an animal bred by Mr. J. Bryan, Southleigh, the purchaser being Sir Michael Hicks Beach, M.P.

For Oxford Down ram lambs Messrs. Franklin and Jones were credited with the highest figures, two of Mr. A. H. Wilsdon's, of Dornford Park Farm, Woodstock, being bought at 31 gs. and 30 gs. respectively by Messrs. J. and S. Treadwell, Winchendon, and Mr. Robert Hobbs, Maiseyhampton.

Messrs. Franklin, Gale, and Newton, of Wallingford and Reading, also had large consignments of Hampshire Down rams and ram lambs, numbering about 250, as well as a number of stock ewes and store lambs, which they offered by auction, and for most of which very satisfactory prices were realised. The best of the ram lambs from the principal flocks created brisk competition, a remarkably fine ram lamb from Mr. H. L. Cripps's Shifford flock being purchased by Mr. John Thomson at 20 gs., and the same price being paid by Mr. A. C. Hall, Great Rollright, for another ram lamb from Mr. Basil Hanbury's Kineton flock.

Space does not permit of details of the various lots sold, but it may be mentioned that practically all the well-known breeders of Oxford Downs sent consignments, and that some good prices were realised, quite a large number of animals selling at 20 gs. and over. The result was that some satisfactory averages were recorded, among the best being those of Mr. Worley, £12 13s., and Mr. Brassey, M.P., £12 5s.

Mr. A. Tanner's Shropshires.

Shrawardine is one of the centres where the Shropshire sheep as at present known was developed and perfected, and from thence many sires famous in the show yard have emanated, while representatives purchased for exportation have made the flock equally celebrated abroad. It is not surprising therefore that the sales held here always attract a large number of buyers, as did that which took place on Thursday. Messrs. A. Mansell and Co., Shrewsbury, were the auctioneers, and they brought under the hammer a splendid lot of sheep, for which some good prices were realised, as follows:—Shearling rams, 40 guineas (to let), withdrawn; 20 guineas, Mr. Whitmore; 6½ guineas, Mr. Bayley; 30 guineas, Mr. C. Blatherwick; 19 guineas, Messrs. Jones and Moore, Hinwood, Dilwyn, Herefordshire. Pasture rangers: Two-shear ram, 7½ guineas, Mr. C. Lewis. Shearling rams, 11 guineas, Mr. Hamar, The Bach; 23 guineas, Mr. Jos. Everall; 6½ guineas, Mr. Roberts, Well House, Saltney; 10 guineas, Mr. F. Bach; 8 guineas, Mr. R. P. Cooper; 11 guineas, Mr. Jos. Everall; 7½ guineas, Mr. Duddleston, 14 guineas (to let), Mr. Bell; 15 guineas, Mr. Reynolds; 6 guineas, Mr. Hiles, Shawardine; 10 guineas, Mr. R. P. Cooper; 16 guineas, Mr. Bach; 8 guineas, Mr. R. P. Cooper; 11 guineas, Mr. Morris; 12 guineas, Mr. Lewis; 7 guineas, Mr. W. Richards; 6½ gs., Mr. Davies, Broad Oak, Brompton, Chester; 7½ guineas, Mr. Maxwell; 7½ guineas, Mr. R. P. Cooper; 7½ guineas, Mr. E. Powell; 8 guineas, Mr. E. Instone; 7 guineas, Mr. Webster; 6½ guineas, Mr. Jesse Haynes; 7½ guineas, Mr. D. Morgan. Shearling ewes, in pens of five, made 125s., 115s., 110s., 95s., 60s., 59s. 6d., 57s. 6d., and 55s.

The Townshend Manor Hampshires.

On Wednesday Messrs. Waters and Rawlence brought under the hammer at Townshend Manor, Over Walton, Hants, over 600 Hampshire Down ewes and lambs, belonging to the Dowager Countess of Portsmouth, all being brought out in the best of condition, and they sold well, the average working out at 62s. per head. The sale commenced with 180 two-teeth ewes, which made an average of 64s. 3d. per head, chief prices being 125s., 106s., 100s., 84s., 70s., 66s., 64s. One hundred and fifty four-teeth ewes sold at an average of 71s. 3d.; 140s., 120s., 104s., 102s., 74s., etc., being top prices; whilst 130 six-teeth ewes realised an average of 62s. 3d., values ranging from 102s. to 52s. For the 200 ewe lambs an average of 52s. was got, the price per head ranging from 100s. to 42s.

Messrs. Treadwell's Oxford Downs.

Following their annual custom, Messrs. J. and S. Treadwell, Upper Winchendon, held a sale of rams from the famous flock of Oxford Downs, and, as on former occasions, there was a large attendance of breeders. Messrs. Paxton and Holiday, of Bicester, were the auctioneers, and they brought under the hammer fifty splendid rams, typical representatives of the breed. Only one of the fifty failed to find a purchaser, the others selling at prices ranging from 8 to 80 gs. Mr. J. M. Eady, Thorpe Mastor, Kettering, paid the latter figure, Mr. Horrocks, for the Right Hon. A. J. Balfour, M.P., gave 40 gs., and Mr. J. P. Case, Bertram Abbey, Norfolk, 50 gs., and Mr. Bambridge, Northumberland, 30 gs., other chief prices being 28 gs. (twice) 26 gs., 20 gs. (twice), and 16 gs. The average for the forty-nine rams sold was £16 3s. 9d., against £14 19s. 7d. last year, £11 12s. 2d. in 1903, and £10 17s. 7d. in 1902. The result may therefore be considered very satisfactory, as this year's was the highest price paid for some years past.

Col. F. A. Walter's Southdowns.

A portion of the well-known prize flock of Southdown sheep bred by Col. A. F. Walter, of Bearwood, Wokingham, Berks, was sold by Messrs. Thornton and Co. on the 4th inst. There was a very small company, but no very high prices were realised, though some of the best sheep were purchased to go into several of the leading flocks. Sir James Blyth, Bart., was an extensive buyer, securing eight pens of yearling ewes at 45s. to 51s., and three pens of ewe lambs at an average of 36s. each. Mr. R. Burra, of Stratford-on-Avon, got one excellent pen of shearlings at 70s., and three others at 63s., 60s., and 55s. Lord Calthorpe took two show-pens of a similar age at 57s. and 60s. Mr. G. Perry and Mr. E. Hobbs were the chief buyers of the remainder at from 45s. to 50s. The seventy-five flock ewes all went to Mr. E. Hobbs at an average of 35s. each. Among the rams, which averaged about 10 gs., was the first prize and champion sheep at the Gloucestershire Show this season, which went to the Right Hon. W. F. D. Smith at 24 gs. Mr. L. E. Swindell paid 14 gs. for a good shearling ram, and Mr. E. B. Crisp 15 gs. and Lord Calthorpe 14 gs. for others. The total realised by the sale was £717.

The Whiston Shropshires.

Shropshire sheep breeders assembled in large numbers at Whiston Hall, Albrighton, on Tuesday, on the occasion of Mr. Matthew Williams's annual sale. The catalogue included about 30 rams of splendid type and 44 shearling ewes, and, judging from the briskness of the bidding, there is still an eager demand for such animals as were put before the visitors. The sale was conducted by Mr. Alfred Mansell, and the prices and purchasers were as follows: Shearling rams, 150 guineas, Sir P. A. Muntz, M.P.; 12 guineas, Mr. Caessares (South America); 40 guineas, Mrs. Inge; 17 guineas, Mr. F. Bibby; 70 guineas, Mr. Oliver; 16 guineas Mr. Caessares; 16 guineas, Mr. Barnett; 13 guineas, Mr. Caessares; 8 guineas, Mr. Corden; 11 guineas, Mr. Smedley. Pasture rangers: 9 guineas, Mr. R. P. Cooper; 8 guineas, Mr. R. P. Cooper; 6 guineas, Mr. Dyas; 7½ guineas, Mr. Lloyd; 32 guineas, Mr. W. L. Naper; 30 guineas, Mr. Dean; 11 guineas, Mr. Caessares; 13 guineas, Mr. W. H. Hill; 10 guineas, Mr. J. Ikin; 9 guineas, Mr. Clarke; 10 guineas, Mr. T. Scott; 7 guineas, Mr. Banton; 10 guineas, Mr. Scott; 8½ guineas, Mr. Jodrell; 8 guineas, Mr. Murray; 5 guineas, Mr. Jones. Shearling ewes made 80s., 57s. 6d., 55s., and 52s. 6d. each.

Great Yorkshire Show at Hull.

The annual show of the Yorkshire Agricultural Society opened inauspiciously at Hull on Wednesday. Heavy rain fell all the morning of the opening day, and although the ground was well-drained, many visitors were kept away by the inclement weather. The two following days were much brighter, however, and a good attendance was secured, as the following figures show:—

	1905 Hull	1904 Hudd'rsfi'ld	1899 Hull.	Av'r'ge f'r 5 years
First day... ...	4 145	5,998	6,546	5,662
Second day ...	33,087	30,800	41,948	29,722
Third day.. ...	12,719	16,549	11,065	10,847
Total ...	49,951	53,407	59,559	46,321

The Council held a meeting on Wednesday. A deputation from Middlesbrough was introduced to the Council by Mr. Whitwell, with the object of inviting the Council to hold next year's show at Middlesbrough. The Mayor of Middlesbrough said that, on behalf of the Borough of Middlesbrough he desired to extend a hearty invitation to the Council to visit that place next year. They were good enough to visit Middlesbrough thirteen years ago. Since then their population had increased by 20,000, and the population of the Parliamentary borough was about 120,000, in addition to which they had the surrounding populations of Stockton, Thornaby, Redcar, and Darlington to draw upon, and these would easily make another 100,000, so that there should be an excellent attendance. A splendid field would be at their disposal. A railway ran by the site, and a siding would be placed into the field so as to enable them to land the stock and the implements. They had prevailed upon the Middlesbrough Town Council to give £250 to the funds, and he had no doubt they would be able to raise a considerable local fund. The Earl of Feversham proposed that the invitation be accepted. He was very glad that there was a prospect of the show once more going into the North Riding. Mr. Whitwell seconded, and the motion was then carried.

The entry of stock, as will be seen from the figures below, was a satisfactory one:—

	1905. Hull.	1904. Hudders-field.	Average for last 5 yrs.
Cattle	203	249	221
Sheep	122	103	120
Pigs	99	112	two yrs. 93
Horses	443	377	463
Total ...	867	841	

Cattle.

The show of Shorthorns was not remarkable, the feature of the section being the family classes, Lord Calthorp winning in a strong class of ten. Only a couple of old bulls were forward, and His Majesty the King won, while there were nine two-year-old bulls, Mr. F. Miller's Limepark Champion, first at the Royal Lancashire Show, where he took the male championship, was relegated to the fifth position. Mr. R. P. Cooper's Meteor, which was behind Limepark Champion at Liverpool, being the leader, followed by Mr. Mills's King Christian of Denmark, and Messrs. Dean and Sons' Imperial Favourite, the reserve ticket going to Mr. George Harrison's Pioneer, bred by the King at Windsor. The yearling and calf classes were well filled, but do not call for special notice. The best class among the female section was the yearling heifers, Mr. Haley winning with Bright Jewel 6th, while Mr. Harrison's heifer calf, Waterloo Princess, is full of promise.

The Jersey classes showed a falling off in numbers, but there were some animals of excellent type in the ring. Lord Cadogan was a first prize winner with a bull of two and a half years, and Lord Rothschild won three other first prizes, together with the Blythwood Challenge Bowl, which was awarded last year also to an exhibit from Tring Park.

There was an excellent entry of Aberdeen-Angus. Mr. C. Calder, of Ponteland, Northumberland, sent down a fine young bull, Perfection of Sands, which won a first prize and the Polled Cattle Society's gold medal for the best breeding animal. The English Aberdeen-Angus Cattle Association medal was awarded to a Darlington exhibitor, Mr. C. E. Hunter, who secured three first prizes with four exhibits.

HORSES.

The horse section has ever been an all-important one at the shows of the Great Yorkshire Society, and, judging from the enthusiasm displayed at the ring-sides on Wednesday last, there is no fear of the tastes of the Yorkshire people being alienated from their favourites, either by time or any other substitute that invention may bring out to try to displace these faithful servants and pleasurable companions. This is as it should be, and it was quite a treat to be present to witness the judging at Hull in spite of the drenching showers of rain that now and again somewhat interfered with business. The interest taken in this department, too, was very equally bestowed upon each of the different breeds represented.

Hunters.

There is no denying the fact that the foreigner has for years been lessening our supply of these useful horses by purchasing freely of the mares that breed them, and also that they have taken many of our best. A reaction, however, now seems imminent in favour of a vastly increased stud business being done in breeding horses of the hunter type: the prices obtainable for good horses are an incentive to this, as well as the awakening that has seized many of our friends in high positions as to our necessity for a much larger and better supply of military horses which must ever come from this source. The classes of this section at Hull were stronger numerically than they have sometimes been, and the quality could not be complained of: many of the best animals of the class that the country possesses were taking part in the competitions.

The first class was for thoroughbred stallions restricted practically to local exhibitors. The winners in these were Lord Middleton's premium stallion Wales, who is well known, both personally and as a sire, The Dempster, from the same stables, placed third, and Messrs. Wickham Boynton's and H. Cholmondely's Pax, who divided the two Birdsall horses. For heavy-weight brood mares the competition was pretty keen, Mr. Cholmondely's Irish-bred mare Cigarette, who possesses all the qualifications for breeding weight-carriers, headed the list; Mr. Sylvester Leaf's Edna May and Mr. Watson's Kilfinora (Irish bred) were also capital mares. Mr. Wilkinson's well-known and beautiful-quality mare Glassport headed the light-weight class, in which some of the entries were rather weighty. Yearling colts were strong, and a number of h.c.s were distributed as well as the prizes, the first of which went to Mr. Swallow's Vigo, by Congo, a very promising yearling, that had a hard nut to crack in Mr. Wilkinson's The Colonel, a stylish yearling, and with bone. Fillies were more numerous than the males, Mr. Robinson, Messrs. Bradley, Mr. Hodgson and Lord Middleton has such capital representatives in the class. Two-year-old geldings and fillies were also a good lot, though the latter were only four in number. Mr. Wilkinson's Havre colt Destruction, which has been very successful this summer, was best in the males, and Mr. Mullen's Paleface in the females. Three-year-old fillies, like the two-year-olds, were numerically very weak, but their style and quality were such as to leave a wish that they may be retained for the stud; Mr. Wilkinson's, Lord Middleton's, and Mr. Brown's names, who were the owners of these, are a guarantee for the right kind. Three and four-year-old geldings were very strong in numbers, and some rattling good horses were included in the ranks. Mr. Stokes, it may be said, never shows a bad one, and he headed both these classes with Artist and Dervische. Messrs. Brown, Cheny, Snowden and Sons, and Rickaby were also in the winning line. Several of the same exhibitors were also prominent in the four-year-old mare classes, and the heavy-weight class of five or six-year-olds of either sex was extra good, so fine a horse as Mr. Stokes's well-known and several times champion Gold Reef only being able to rise to the reserve place. The light-weight class contained twenty entries; Mr. Stokes's Whisky, whose quality and hunter-like build have already secured for him several championships this year, was first, and also received the championship later. The Countess of Ravensworth had a capital gelding second in Schism.

Hackneys.

These were quite up to the general quality of the Yorkshire exhibits; indeed, we thought them better than we have many times seen them. There were ten entries of stallions, four years old and upwards, in which Mr. Haley's Moncrieffe Vengeance by Rosador, who made a very good show, came to the front. Sir Walter Gilbey's Brave Member and Mr. Asery's Buckthorpe Victor followed for the other prizes. The contest was very keen in the two or three-year-old section, in which Mr. Arthur Fewson's two-year-old Hedon Comedian by St. Thomas managed to take the lead over Mr. Evans' Evanthius three-year-old, who has been a great favourite, and justly so, as he carries himself well and goes evenly and quick. Several well known members of the Hackney tribe were present in the brood mare and foal class. Mr. R. Tubbs' Rosadora, however, was not to be beaten, a grand type of harness mare. Mr. Astley's Panic, Mr. Watson's Queen of Newton, and Messrs. Cockayne's Paddock Queen were next in order as named. There was a very promising class of yearling colts, the best of which were sired by Garton Duke of Connaught, Royal Danegelt, and His Majesty, shown by Mr. Evans, Sir Walter Gilbey, and Mr. Lysaght. Mr. Evans' Cricklow by Polonius, a smart filly, headed a good class of yearlings of this sex, both Mr Hall and Mr. Whitworth also being in the running, the latter exhibitor being first for two-year-old geldings, the class a small one. Two-year-old fillies were a good section, Mr. Buttle's Boquhan Sunrise getting ahead of Mr. Evans' smart goer, Pollinara; most of the eleven entries in this class were noticed. Three-year-olds were developing well, several very strong geldings competing in this class, and in females of that age Sir Walter Gilbey's Mitre, Mr. Cliff's Crayke Czarina, and Mr. Hall's Copmanthorpe Princess were the winners, all well known for their breeding and performances. Four-year-old geldings or mares up to 15 stone were not plentiful. Mr. Fewson, however, sent a gelding, Prince Edward by Cornfactor, who was so good as to take the lead against Mr. T. B. Sykes' Fylde Zazara, who is a harness mare of the best style and nature. The light-weight class was a small one, but with two or three very strong representatives, Mr. S. R. Tennant's Authority and Mr. Oates' Ryburn Rosebud, carried off first and second honours.

The cob and pony section was not as well filled, but with such fine goers as Mr. Franklin's Grand Duchess Gobang, and others of similar style, they were a very attractive feature.

Cleveland Bays.

These beautiful horses formed a great attraction, their style and quality, as well as their size, are all in their favour, yet for some reason or other they failed to make a display numerically. There were six entries of two or three-year-old stallions, Mr. Scoby's Beadlam Fred, Mr. Knaggs' Saltburn Favourite, and Mr. Scoby's Far Away carrying off the money. Of the three brood mares shown, Mr. Wilson Horsfall's Lady Salton, bred by Mr. Stevens in the south, was the best, and carried off the special prize also. Mr. Bateman's Queen of Beadlam and Mr. G. Gradage's Lady Toft followed in the order named. Two or three-year-old fillies were also entered by the rule of three, Mr. Grandage's Woodland Briar being the best of a beautiful trio. Mr. Butter's Cholderton Farndale and Mr. Welford's Grange Lucy were the other representatives.

These horses carry a good deal of substance, and for high-class harness work so far as appearances are concerned, look difficult to beat. On the whole they made a better show than the fine Clevelands. Mr. George Burton's Willoughby Emperor was the best of the aged stallions, which totalled seven entries. Mr. Reader's Beacon Prince, another fine looking horse, with style and substance followed. In a strong class of three-year-olds, Mr. Letts' Special Delight, who has retained his splendid form wonderfully, added one more first to his many victories, and also carried off the special. Mr. Stericker's Aneroid was another capital colt in this section, he came second. There were only two entries of yearling colts, but Mr. Sylvester Leaf's Star of Escrick and Mr. Elder's Aislaby Champion placed as sound and bonny colts. All the brood mares secured honours. Mr. Wilson Horsfall's Perseverance, so well known and a very grand type of mare, was given the first position; Mr. Elder's Aislaby Beauty second, and Mr. Butter's Chorlderton Princess third; reserve going to Mr. Thompson's Lavender. Mr. Lett's Special Flower came to the front in a small class of yearling fillies, and her stable companion, Madeline (half-sister), was first of three two-year-olds. Three-year-old fillies had also but three representatives, Mr. Sylvester Leaf's Floradora, Mr. Grandage's Woodland Beauty, and Mr. Varley's Lady May. Three-year-old-geldings gave a very good display, ten were entered, most of them being first-class representatives of the high-class and valuable harness horse. Mr. Kitching's Wonderland, by Barnaby was awarded first prize.

Shires.

This section of the show, though fully up to or above the average at the meetings of this society, was still comparatively weak in so large a county. The quality generally was very good, but with only four entries in several classes it gives but a limited display. The first class was for stallions four years old and upwards. Messrs. Forshaw and Sons had a famous stallion herd that easily took the lead with Ring o' Bells, very weighty and clean in bone, also active. Lord Middleton's Normoor Victor and Earl Egerton's Tatton Chief took the other prizes. These two were weighty, good horses. Two or three-year-old stallions were also a good class. Sir W. Cooke's Doncaster Menestrel, a son of Lord Middleton's Menestrel, and a very shapely horse with rare limbs and feet was first. Mr. R. N. Sutton Nelthorpe's Souldern Sylax, who was second at the Royal, and a colt of very good quality and also full of substance stood second; and a very smart two-year-old of Mr. Grandage's, that promises well for another year, came third. Brood mares were a

weak class of but four entries, and though good in quality, were not especially outstanding. Merit appeared to be very even in these, so far as the judges were concerned, for they were a long time settling and eventually required an umpire. Mr. E. Cartwright's Croft Lily, Mr. W. Jackson's Enfield Poppy, and Mr. H. W. Kearns' Tatton Magpie were placed as named, the last mare being the most roomy and weighty Shire. The reserve mare, Mr. Atkinson Jowett's Summer Queen, a very smart mare, was reserved. Sir W. Cooke was also at the front in the yearling colt class with Redlynch Forest King, a famous stamp of Shire in every respect. Lord Middleton and Mr. Grandage followed with very promising colts. Yearling fillies were only four in number. Mr. Jackson's Knottingley May Queen, a straight, good-quality filly, by Wharton Drayman, was awarded first position; Mr. T. F. Foster taking second, and Mr. E. W. Stantforth third with very lively and useful stamp of fillies. Two-year-olds were one of the best classes of females. Lord Egerton's Dunsmore Nougat made a very fitting best, having style and weight; Lord Middleton had a well-grown shapely one second; and Mr. Walter Johnson was third with a filly that has every appearance of making an excellent brood mare. There were but three out of the four catalogued entries of three-year-olds present. These, however, were an undeniably good trio. Lord Middleton's Birdsall Coralline, by the stud horse Menestrel, made an excellent first, and also carried off the Shire Horse Society's gold medal. She is moulded upon the best possible lines, and with real Shire character and good quality, as well as correct limbs, is a hard nut to crack. Messrs. Forshaw and Sons, with Willow Holt Pansy, another fine type and valuable filly, and Mr. Grandage's Bramhope Lily, also a beautiful mare and close up to her companion, was second and third.

Sheep and Pigs.

Sheep and pigs formed a very considerable section of the show. The best Leicester ram was Mr. G. Harrison's, of Darlington. The championship for Lincoln Longwools goes to Mr. Henry Dudding, of Grimsby, with Messrs. R. and W. Wright as reserve, and the Wensleydale championship was won by the Exors. of the late Mr. T. Willis, Aysgarth.

Two exhibitors were notably successful in the pig classes—the Duchess of Devonshire and Sir Gilbert Greenall. The Duchess of Devonshire's Berkshires have carried all before them, except in one class, where Lord Calthorpe has taken a first prize. Sir Gilbert Greenall has secured with his large white pigs five first and five second prizes.

Miscellaneous.

Classes were provided and were generally well filled for cheese, honey, buttermaking, and horse shoeing competitions.

Cheap Cottages.

A novel feature of the showyard was an exhibition of cheap cottages. Prizes of £40 each were offered, and two typical structures have been erected. The single cottage was built by Mr. J. Wilcock, of Pontefract, and is of red wood on brick foundations, with a roof of galvanised iron sheets. The cost of its erection is estimated at £116, exclusive of bricklayers' work, which is put down at £38, and it is claimed by the exhibitor that the building could be erected in brick and tile for £15 extra. There are three bed-rooms, two 10 ft. square, and one 10 ft. by 12 ft., and kitchen, 12 ft. by 12 ft. 6 in. There is a good entrance and pantry 6 ft. 6 in. by 3 ft. 6 in., and the outbuildings include a wash-house 8 ft. by 7 ft. The double cottage, estimated to cost £160, or two for £300, was erected by Messrs. P. T. Kettlewell and J. Taylor and Son, of Hull. There is a living room and kitchen combined on the ground floor, as well as scullery, washhouse, and pantry, and on the upper floor three good-sized bed-rooms. Both of the structures are on the same lines as those at Letchworth which have already been described in these columns.

JUDGES.

CATTLE: Shorthorns, Robert Bruce, Leinster House, Dunbar, William Wright, Scrambleby House, Hermeastle, Lincolnshire; Dairy, William Foster, Linton, Skipton; Thomas E. Lodge Wood Hall, Aysgarth, R.S.O. Jerseys: The Hon. A. E. Parker, The Cottage, Deveridge, Derby. Aberdeen Angus: C. Stephenson, Newcastle-on-Tyne.

SHEEP: Leicester, H. Humphreys, Woodhouse, Loughborough, Leicestershire; David Linton, Low Street, Barwell, Hinckley, Leicestershire; Thomas B. Fredbury, South Somercotes, Louth, Lincolnshire; Henry Goodacre, Wensleydale Farms, Lincolnshire; Wensleydale, Richard Cowton, Low Moor Farm, Ripon; Scotch Mountain: John Wood, Nether Kennetmuir, R.S.O.

PIGS: Peter Greenall, The Chimes, West Tanfield, Ripon; George White, Rowcliffe, Skelton Road, York. Hackneys, Light Harness and hunters (chosen by the Hon. H. D. Addeley, Charlthorpe Manor, Alford, Lincolnshire; C. H. Scott Plummer, Sunderland Hall, Selkirk, Hunters (chosen by), George Dove, Whitehouse, Bewerley, Bowes, Yorkshire; C. Kendall, Stratford-on-Avon. Jumping competitions: Richard Beith, Wardaby, Scampton, Lincoln; George B. Pearson, Baldersby, R.S.O.

Hackneys, cobs and ponies, and harness horses: A. W. Hickling, Adbolton, Nottingham; W. Campbell Wood, Wooton Dale, Ulceby, Lincolnshire. Cleveland Bays, Yorkshire coach horses, and class 78 (three-year-old harness geldings): F. E. C. Dobson, Dromonby House, Stokesley, R.S.O.; Edward Hall, Barton, R.S.O. Shire: Bentham King, Ashdale House, Helmsley, R.S.O.; F. W. Griffin, Peterborough.

PRIZE LIST.

SHORTHORN CATTLE.

Class 1.—Family of Shorthorns to consist of cow of any age, and two or more of her produce in direct line of descent on the female side: 1, Lord Calthorpe (Sweetheart—Elevetham Monarch and bull calf); 2, Philo L. Mills, Ruddington Hall, Nottingham (Countess Farewell 5th—King Christian of Denmark, Ruddington Prince Christian, and Denmark's Heir Presumptive); 3, His Majesty the King, Sandringham, Norfolk (Cecily Waterloo—Royal Carlisle, Lord Cecil, and Baron Cecil); r., Henry Williams, Moor Park Harrogate (Augusta 110th—Augusta Mary, General Bruce, Captain Bruce, and Augusta Olive).

Class 2.—Shorthorn bull of any age above three years old: 1, His Majesty (Royal Carlisle); 2, Henry Williams (General Bruce).

Class 3.—Shorthorn bull, above two and not exceeding three years old: 1, R. P. Cooper, Shenston Court, Lichfield (Meteor); 2, Philo L. Mills (King Christian of Denmark); 3, S. E. Dean and Sons, Dowsby Hall, Bourne, Lincolnshire (Imperial Favourite); r., George Harrison, Gainford Hall, Darlington (Pioneer); h.c., F. Miller (Limepark Champion).

Class 4.—Shorthorn bull, above one and not exceeding two years old: 1, Lord Calthorpe (Elvetham Monarch); 2, Lord Polwarth, Mertoun House, St. Boswells (British Renown); 3, George Harrison, Gainford Hall, Darlington (Royal Ensign); r., Philo L. Mills (Ruddington Prince Christian); h.c., F. Miller, Clifton Road, Birkenhead (Moonrise).

Class 5.—Shorthorn bull calf, above five and not exceeding twelve months old: 1, Charles O. Hall, Settrington House, Malton (Fairplay's Star); 2, George Harrison (Gainford Land Agent); 3, Alfred A. Haley (Whitewall Ringleader); r., George Harrison (Gainford Silver King); h.c., Frederick Platt, Barnby Manor, Newark (Royal Waterloo).

Class 6.—Shorthorn bull, calved in 1904.—Shorthorn Society's County Prize: 1, Charles A. Hirst, Crake Hall, Allerston Marshes, Pickering (Golden Spur); r. Alfred A. Haley (Whitehall Archer).

Class 7.—Shorthorn cow of any age above three years old, in calf, or having produced a fully-matured calf since August 1, 1904: 1, George Harrison (Ursula Raglan); 2, Lord Calthorpe (Sweetheart); 3, Captain William B. Harrison, Aldershaw, Lichfield (Elderberry 4th); r., William Snowball, Knapton Carr, York (Cambridge Waterloo 3rd); h.c., Lord Middleton (Twinkle); c., Lord Middleton (Pierrepont Hazeltop).

Class 8.—Pedigree Shorthorn dairy cow, in milk, of any age: 1, George Harrison (Barbara); 2, William Bell, Ratcheugh, Alnwick (Pierrepont Lady Barrington 4th); 3, Captain William B. Harrison (Daisy Mintcroft); r., Lord Henry Bentinck, M.P., Underlay Hall, Kirkby Lonsdale (Heroine 5th); h.c., The Earl Manvers (Lady Dorothy 39th); c., William Snowball (Derwent Waterloo 3rd).

Class 9.—Shorthorn heifer, above two and not exceeding three years old, in calf or milk: 1, William Bell (Ratcheugh Witch); 2, The Rt. Hon. F. J. S. Foljambe, Osberton, Worksop (Rosa Ragusa); 3,, Isaiah Eurdass, Lowthorpe, Driffield (Lady Annie 5th); r., George Harrison (Dalmeny Veronica 3rd); h.c., Mrs. Cass, St. Helens, Ribston, Wetherby (Margery Moore).

Class 10.—Shorthorn heifer, above one and not exceeding two years old: 1, Alfred A. Haley (Bright Jewel 6th); 2, T. Atkinson, Redvales, Bury (Towy Princess); 3, William Bell (Belle of Alne); r., F. Miller (Lady Hermoine); h.c., Charles A. Hirst, Allerston Marshes (Marigold 47th); c., Alfred A. Haley (Queen of Ankness).

Class 11.—Shorthorn heifer calf, above five and not exceeding twelve months old: 1, George Harrison (Waterloo Princess); 2, Alfred A. Haley (Whitewall Anna 2nd); 3, Mrs. Cass (Duchess of Lorn); r., Captain William B. Harrison (Aldershaw Primrose 2nd); h.c., Lord Brougham and Vaux, Brougham, Penrith (Braik's Duchess 4th).

JERSEYS.

The "Blythwood" Silver Challenge Bowl for the best cow or heifer, in milk, bred in Great Britain or Ireland: Lord Rothschild (Oxford Snowdrop); r., Captain L. G. Gisborne (Curly).

Class 112.—Three-year-old Shire filly: 1 and Shire Horse Society's Medal, Lord Middleton (Birdsall Coralline); 2, J. Forshaw and Sons (Willow Holt Pansy); 3, A. Grandage (Bramhope Lily).

ROYAL LANCASHIRE.

The Concluding Days.

On account of the necessity of going to press earlier than usual in view of the Bank Holiday, our last week's report of the Royal Lancashire Agricultural Society's Show at Liverpool only dealt with the first day's proceedings, and we now make good the deficiency. The show itself was, as we have previously stated, a very good one, and the society was extremely unfortunate in experiencing such wet weather, for there is little doubt but that the attendance of visitors would have been a record one had the weather only been fine each day. As an example of how they patronise a really good show the people of the district on Monday last turned up in their thousands, and the society, who seem extremely fond of making new records, added another to their list, the Bank Holiday gate being the best recorded, for no fewer than 42,339 people paid for admission, as against the previous best of 33,375 in 1899, and had it not been for a heavy storm about six o'clock, the total would undoubtedly have been considerably greater. The attendance on the other days was not so large as in some previous years, but considering the inclement weather the totals were very good, and it is estimated that the financial result of the show will be a most satisfactory one. With a view of spreading the interest over the whole of the show the society so arranged it that some classes were judged on each day, whilst for the final day they provided a dog show, and for this they received no fewer than 11,000 odd entries, the largest number on record, and certainly one of the best canine displays ever seen in the North.

Second Day.

Among the classes judged on the second day were those for polo and riding ponies, and though the entries were rather on the small side, the quality was all round exceptionally good. Liverpool has long been a centre for the breeding of these animals, and the neighbouring polo clubs rank highly in the world of sport. However, the premier awards fell to a southerner in the person of Mr. John Barker, of Bishop's Stortford, who swept the board, he taking practically no less than two special and three first prizes, the specialists being Sapphire (the best polo pony brood mare) and Antree (the best polo pony stallion). Both these animals presented the acme of fitness, and their points were eulogised by critics and common folk alike. Some little consolation for the isolation of Liverpool in the way of fortune's favours was afforded by the carrying off by Mr. R. R. Heap—a well-known member of the Liverpool Polo Club—of the society's silver medal with his handsome chestnut Goldfinch. Another medallist was the Rev. D. B. Montefiore, of Oxford, with a beautiful-looking filly, Delightful,

Dairy cattle were also judged on the second day, and it was the general opinion that they made one of the best shows ever seen at this society's exhibition. They were certainly a remarkably good lot. In the open class for cow of any weight, Mr. Raingill, of Altrincham, carried off chief honours and the Peck Challenge Cup with his peerless roan Dot. This animal has never been beaten in her class, and has obtained first distinction at the Royal, the Royal Lancashire, the Yorkshire, and many minor exhibitions up and down the country. Dot has won the Peck Cup two years in succession, and as Mr. Raingill won it in 1903 with his cow Pet, the trophy now becomes his property in accordance with the conditions. Among the heavy weights were a number of good animals, quite a dozen of them worthy to be in the honours list. Messrs. J. and R. Atkinson, of Wavertree, beat Mr. Raingill in the class for cow in calf, which was a creditable achievement, considering that the animal they won with was a town dairy cow. Liverpool dairymen did well in the dairy classes of this show, which is the more praiseworthy because the class of animal they necessarily possessed must first and foremost be serviceable.

Other classes judged on the second day included another butter-making contest, which, as always, attracted a large and interested crowd; a jumping competition, of which the same remark might be made; some poultry and bee classes, and finally a new class in the shape of a poultry trussing competition. It was open to the United Kingdom, and the society offered three prizes. Of the fourteen entrants thirteen put in an appearance, and all but one were students at the County Council Farm at Hutton, whilst the birds trussed came from the same place. The winner was Miss Edith A. Ayres, Fair Mount, Cadley, Preston, whose manipulation and finish was excellent, and commanded the highest points given by the judge.

Third Day.

On the third day (Saturday) the weather was still boisterous at the outset, but improved later on, and the attendance of visitors in the after-

noon and evening was on a large scale, though not quite up to that at Liverpool in 1899. There was again much to interest all classes, but the feature of the day was a parade of Liverpool carthorses, for which the town has long held a high reputation, and certainly to the "strangers within the gates" the magnificent horses which came under their inspection must have considerably surprised them. One hundred and thirty-six animals were paraded, and the show was one which it would be hard, if possible, to beat in any part of the kingdom. The average height of the horses was about 16.3, and what was most noticeable was the wonderful cleanness of limb, great scale, and exceptionally good, hard-wearing feet. The Royal Lancashire Agricultural Society's silver medal was awarded to the representative of each contingent of the parade, and the Shire Horse Society's medals, for the three best groups, were won by the Liverpool Corporation, the Lancashire and Yorkshire Railway Company, and the London and North-Western Railway Company. The Lancashire and Yorkshire Railway Company's group won Alderman Grant's Challenge Cup, valued at 50 gs., at the last May-day show.

After the parade the judging in the pair of carthorse classes took place. For the best pair, the property of team-owners, the whole of the prizes, first, second, third, and reserve, went to Mr. Thomas Edwards, of Litherland. His first prize winners were a pair of Shire geldings, standing 16.3, and eight years and eleven years respectively, firmly set, active movers, with excellent feet, while the second prize winner was his grey gelding Redlynch Duke, 17 hands, a famous prize winner, which had as his companion a blue roan standing 16.3. In the class for a pair of carthorses owned by others than team-owners, the Liverpool Corporation were awarded first honours for a pair of six-year-old bays standing 17 hands, both of remarkably good texture, and winners at the London Shire Horse Show. The second prize went to the London and North-Western Railway Company for a couple of finely-built horses, which, like the rest of the horses in the competition, are worked daily on the streets.

The judging in the riding and harness classes was watched by a large concourse of spectators, who witnessed an exceedingly fine collection of riding horses. For hack mare or gelding, rising five, Mr. W. S. Cunard's Wild Lucy carried off chief honours. She is an elegantly-built hack, very level, beautiful shoulders, and a free, forward action, and has won distinction elsewhere. Marie Tempest, with which Mr. Charles Radcliffe took second prize in this class, has also obtained a fair number of prizes at various exhibitions. First for the hack pony went to Messrs. John Jones and Sons' Welsh Princess, a beautiful type of Welsh pony, which has won a large number of honours, and was sold at the Dynarth sale for a large figure. In the local class for hack ponies (nine miles radius of Liverpool), Mr. T. B. Sykes's Fylde Forester, a handsome grey pony, of beautiful quality and a fine mover, was the judges' selection for first place. Messrs. J. H. Ainsworth and Sons' Our Gert, which was second, was third at the Royal Show. Mr. Charles Radcliffe's Phœbe Walton was a comfortable winner in the harness class between 14 and 15 hands. This charming chestnut mare has won over 700 first prizes and many specials. Wild Lucy was second and Mr. J. Sadler Sykes's Fylde Sabrinette third—a Lancashire bred mare, and winner of a championship at the Spring Show at Islington and at The Hague. In the tandem class, Wild Lucy and Jenny Lind were beaten by Mr. Charles Radcliffe's Phœbe Walton and Marie Tempest. The winners went more evenly and harmoniously together.

The President of the Board of Agriculture (the Hon. Ailwyn Fellowes) was expected at the show on Saturday, but found that his departmental duties necessitated his remaining in London, and therefore sent to represent him Sir Thomas Elliott, Chief Permanent Secretary to the Board, who arrived at the showyard at noon, having driven from Knowsley, where he had been the guest of the Derby family. He was received by Mr. Windham E. Hale (Deputy Vice-chairman of the Council of the Society) and Mr. W. Fitzherbert-Brockholes (president of the Lancashire Farmers' Association), and after a look round the exhibition proceeded to the grand stand, and appeared to take a keen interest in the judging of the riding classes. Subsequently he held a private and informal conference in the council pavilion with local correspondents of the Board of Agriculture and other prominent agriculturists, and took his departure at four o'clock.

Final Day.

The final day's weather and attendance have been already described, and all we need say here is that the vast concourse had much to keep them amused all day. The display of dogs was an exhibition in itself, but in addition there was a champion leaping competition, the chief prize in which was a handsome 50-guinea challenge cup (won by Mr. G. Ledson, Swallowbeck, Lincoln); a championship butter-making contest, won by Mrs. Comer, Farnshaw Farm, Hertford, who gained 94 points out of a possible 100; and the judging of half-a-dozen classes for tenant farmers' cattle, seven classes of tenant farmers' draught horses, and a number of local trade turnouts. Both the cattle and horses did credit to their exhibitors, as also did the majority of the turnouts. Great interest was evinced in the special harness competition for the Manchester Champion Harness Cup for the best turn-out in the show. Mrs. Bratt, of London, was the winner with her celebrated Heathfield Squire, which gave one of the finest displays of pace and action seen in any showyard in the kingdom. The Acting Lady Mayoress (Miss Morgan) presented the cup in the presence of the Lord Mayor, and heartily congratulated Mrs. Bratt, who came off the grand stand to receive the trophy.

This brings us to the end of our description of a show upon which the Royal Lancashire Society has every reason to look back with pride, and particularly on the way in which it was managed, for despite its bigness, not a single hitch occurred. Before giving the additional awards to complete the prize list of our last issue, we would mention that at a meeting of the Council of the Society, held on the second day, the Mayor of Lancaster (Mr. J. Heald) extended a cordial invitation to the Society to hold its show in 1906 in Lancaster, on land midway between Lancaster and Morecambe—a position which would be convenient for the inhabitants of both boroughs and for the visitors at Morecambe. He mentioned that it was seventeen or eighteen years since the show was held in Lancaster. On that occasion bad weather interfered with its success, but in the year 1878 the show in Lancaster was a great success. Lancaster was the centre of a prosperous agricultural district, and the Society would not regret paying the borough another visit. The invitation was supported by the Mayor of Morecambe (Mr Birkett), the ex-Mayor of Morecambe (Mr. Barnsbee), Messrs. George Jackson (President Lancaster Agricultural Society), and others, and was unanimously accepted by the Council, whilst a hearty vote of thanks to the Lord Mayor of Liverpool and the Local Committee for their work in connection with the show was passed with acclamation.

Additional Prize Awards.

The following is a list of the awards made after we went to press with our last issue:—

POLO AND RIDING PONIES.

Best polo pony brood mare or filly.—J. Barker.
Best polo pony stallion.—J. Barker.
Best polo pony brood mare.—R. R. Heap.

AUCTION SALES.

AMBERSTONE GRANGE, HAILSHAM, SUSSEX.

1½ miles from Hailsham Station, L.B. & S.C. Railway.

HIGHLY IMPORTANT UNRESERVED SALE OF A PURE-BRED REGISTERED SOUTHDOWN FLOCK (Registered No. 163), comprising about

630
HEAD,
as follows:—
80 SHEARLING EWES,
85 FOUR-TEETH EWES,
117 SIX-TEETH EWES,
120 FULL-MOUTHED EWES,
120 EWE LAMBS,
80 WETHER LAMBS,
and
13 RAMS AND RAM LAMBS,
Also
FIVE CAPITAL CARRIAGE HORSES (four being six years old),
TWO THOROUGHBRED MARES,
and TWO DAIRY COWS, due to calve, which

MESSRS. STRIDE & SON are favoured with instructions from H. M. SIMMONS, Esq., to SELL by AUCTION, without reserve, owing to his having given up his flock farms of Amberstone Grange, Hailsham, on THURSDAY, AUGUST 31st, 1905.

This flock was established by the purchase of ewes from Mr. W. Toop, Mr. J. N. Tompkins, and Messrs. Emery, while the rams used have been selected from the flocks of His Majesty the King, Mr. J. J. Coleman, Mr. W. Toop, Mr. A. Heasman, Mr. H. Padwick, Mr. W. P. Hampton, Sir James Duke, Bart, &c.

They are a genuine, hardy, constructive lot of sheep, sure to thrive well in any district to which they may be sent, and possess the quality, type and characteristics which have distinguished the famous flocks from which they are descended.

Luncheon by ticket only at one o'clock.

Sale to commence punctually at two o'clock.

Conveyances will meet trains at Hailsham.

The flock is open to inspection at any time, by appointment with the Owner.

Catalogues of the Auctioneers, 68, East Street, Chichester.

(Auction Sales continued at page 240.)

AUCTION SALES.

(continued from front page).

IMPORTANT SALES OF PURE-BRED STOCK.

JOHN THORNTON & CO. will SELL by AUCTION as follows:—

FRIDAY, SEPTEMBER 1.—About 60 head of first-class SHORTHORNS, from the extensive herd bred by the Rt. Hon. Lord Brougham and Vaux, at Brougham, Penrith.

TUESDAY, SEPTEMBER 5.—About 50 head from the first-class herd belonging to Henry Williams, Esq., at Moor Park, Harrogate, Yorkshire.

THURSDAY, SEPTEMBER 7.—Third and final portion (about 120 head) of the Whitlingham RED POLLED herd, at Crown Point Park, Trowse, Norwich.

TUESDAY, SEPTEMBER 12.—The late Mr. W. J. Buckley's SHORTHORNS, at Penyfai, Llanelly, Carmarthenshire.

WEDNESDAY, SEPTEMBER 13.—Mr. Evan Jones's SHORTHORNS, at Manoravon, Llandilo, Carmarthenshire.

FRIDAY, SEPTEMBER 15.—The late Sir Jacob Wilson's SHORTHORNS, at Chillingham Barns, Belford, Northumberland.

FRIDAY, SEPTEMBER 15.—The late Mr. F. Bachard's herd of JERSEYS, at Horsted Place, Uckfield, Sussex.

TUESDAY, SEPTEMBER 19.—The Rt. Hon. Lord Rothschild's SHORTHORNS, at Tring Park.

WEDNESDAY, SEPTEMBER 20.—Mr. Rowland Wood's Shorthorns, at Clapton, Thrapston.

WEDNESDAY, SEPTEMBER 27.—Sir Alexander Henderson's, Bart., SHORTHORNS, at Buscot Park, Faringdon.

FRIDAY, SEPTEMBER 29.—About 60 SHORTHORNS from Mr. W. Bateman's prize dairy herd at Beaumont Grange, Halton, Lancaster.

Catalogues may be had of JOHN THORNTON AND CO., 7, Princes Street, Hanover Square, London, W., who will execute commissions.

CHICHESTER, SUSSEX.
(The principal centre in England for the sale of Southdown Sheep).

GREAT ANNUAL SECOND SALE of PURE-BRED SOUTHDOWN RAM LAMBS, RAMS, EWES AND LAMBS.

For prime quality of both mutton and wool, hardiness of constitution and early maturity, Southdowns are unsurpassed. Best results obtained when crossed with other Breeds.

WEDNESDAY, AUGUST 30th, 1905.

MESSRS. STRIDE & SON beg to announce that the entries for their Great Annual Second Sale, which will take place in the Market, Chichester, on the above date, comprises :—

150 SOUTHDOWN RAM LAMBS and SHEARLING RAMS, forming a grand selection, including consignments from his Grace the Duke of Richmond and Gordon; the Rt. Hon. Earl Cadogan, Culford; Sir. Thomas Gooch, Benacre Hall; Mr. Edwin Ellis, Summersbury; Mr. Edwin Henty, Ferring; Mr. Thomas Miles, Buckwell; Col A. F. Walter, Bearwood; Mr. Cottrell Dormer, Cockthrope; Mr. F. Stanford, etc.

2,000 SOUTHDOWN EWES AND LAMBS, comprising entries from a large number of the principal flocks in the district.

Further early entries solicited.

First edition catalogue will be ready about the 21st inst., and may be had on application to the Auctioneers.

Buyers attending Chichester night prior to sale will find the "Dolphin" a comfortable and convinient Hotel to stay at.

Commissions carefully executed.

STRIDE & SON, Auction Offices, 63, East Street, Chichester, Sussex.

These Three Tests:

APPEARANCE
ANALYSIS——
PRICE——

Are they Conclusive Guides for Valuing and Buying Compound Cakes and Meals.

?

CAKES

WE ANSWER—MOST DECIDEDLY, NO!

For here the old proverb—that "Appearances are deceptive," is often true.

Analysis by itself cannot be relied upon, for damaged and inferior material analyses the same as sound fresh stuff, although the feeding value is very much poorer. Also it is often difficult to detect damaged ingredients when spiced and mixed with other stuff.

SILCOCK'S

Is the lowest priced article the cheapest? We are continually in competition with compound foods having as high, or nearly as high, an analysis as our brands, sold in some cases at 10/- or 15/- per ton less, and claimed to be "just as good as Silcock's." **This is not possible**, considering our exceptional facilities for manufacturing cheaply on a large scale, our extensive experience, and the many valuable patents we own for labour-saving machinery.

There will invariably be found a greater deficiency in feeding value than the difference in price implies.

We have no difficulty in retaining customers who have used our Cakes and Meals regularly, as the more our brands are known the better they are liked, but we have the difficulty of price to contend with in those feeders who do not know our goods. We specially invite such to make a comparative feeding test, feeling sure that it will bring us new customers and also benefit the buyer.

NOTE THIS.

Our first principle has always been to supply the best possible quality, and sell large quantities at a small margin of profit. In feeding stuffs the lowest priced article is certainly not the cheapest. SILCOCK'S brands are the highest standard of Compound Foods. Linseed Cake and Maize are at present priced above their feeding value, and by using Silcock's Cakes and Meals you will obtain really first-class articles and save money.

FOR CATTLE AND SHEEP.

For particulars apply to Local Agents, or to

Sole Agents for United Kingdom:
Thos. Christy & Co., 4, Old Swan Lane, London.

HOW TO FILL THE KIT
.. WITH ..
WHOLESOME MILK.

1—Be quiet and gentle with the Cow, and very patient.
2—Be clean about the milking—scrupulously clean.
3—Feed on the best—
"DAIRY" CAKETTES
. or .
"BIBBY" CAKETTES.

NOTE.

If Dairy Cows are allowed to go off their milk at this time of the year, nothing will bring them on again; hence the importance of keeping up the supply by timely attention to Rule 3.

YOUNG STEERS and HEIFERS.

NOW is the time for the farmer to give a little Cake to the young Steers, if he wants them to come into the auction-ring in the autumn in fresh, thriving condition, with good bright coats on them, and looking big and well. It pays to do them well.

The Heifers, also, which are intended for the dairy, should have a little . . .

BIBBY'S "FEEDING" CAKE or the "BIBBY" CAKE,

to make them thrive and get some size and stamina before the strain of milking comes on them.

Sole Manufacturers: J. BIBBY & SONS,
Exchange Chambers, LIVERPOOL.

Subscription rates (including postage).—In the United Kingdom: one year, 15s.; Six months 7s. 6d.; three months, 3s. 9d. The Colonies and Abroad: one year, 17s. 6d.; six months, 8s. 9d Cheques and postal orders to be made payable to the Publisher.

Advertisements, Subscriptions, and business communications should be addressed to THE PUBLISHER "Mark Lane Express" 1 Essex Street. Strand, London, W.C.

VALUE OF CORN-SHEDS AND RICK COVERS.

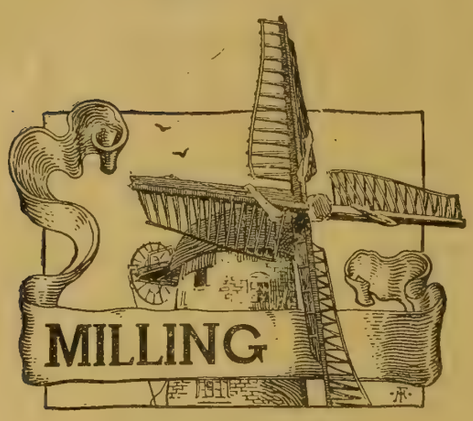
Modern appliances for saving manual labour in harvesting, however grandly effective in self-binding reaping machines, are incomplete without a lofty corn-shed at the homestead to receive the sheaves after being conditioned in the fielder in the absence of any such permanent structure, galvanised roofing, or still cheaper canvas-sheet covering, fitted to poles with a pulley, all of which provisions save the tedious and costly labour of making straw-thatch and thatching. The wonder-working efficacy of the self-binding reaper would be a threadbare, oft-told story were we to enlarge upon it, and we can only express regret that so many small and medium-class occupiers of cornfields are still destitute of the invaluable aid of the machine. A still smaller number have corn-sheds at their homesteads, for those constructed wholly of iron are costly, and even if poles be substituted for the iron pillars, unless landlords erect them and charge their tenants interest on the outlay as additional rent, few farmers could afford to erect them at their own cost.

Still, every succeeding year makes it more apparent that the old system of making straw-thatch, and sparring it down over the roofs of corn-ricks, is a non-economical and most objectionable one, which ought, if possible, to be done away with. No doubt it is much more so to some farmers than others. But even those who grow most straw of the kind available for thatch, and can best afford to make use of it for the purpose, too often find that they have to take their labourers away from performing important duties to prepare the material. Further, the ricks, after being made, remain often uncovered for several days, and sometimes a week, before the professional thatcher can attend to the technical work of laying on and sparring-down the thatch. There is some art in laying on the covering evenly, and in so inserting the spars that the rain shall not run into the rick through the holes they make. Owing to this, the ordinary labourers shun having anything to do with the operation, and a great deal of spoilation is sometimes suffered by storms happening to cause rain to percolate into the ricks before they can be thatched.

On many farms very little wheat is now grown, rendering straw fit for thatch to be a scarce article. In other cases it can be marketed at a high price, or is too valuable for stock-feeding to be used either for thatch or litter. Farmers in these times find it wise to send to market whatever will sell best; and there are numerous cases of the old course of things being reversed by the straw being marketed and the grain having consumption at home. Fortunately, there are resources to fall back upon where straw is a scarce article, besides erecting a permanent corn-shed, although, if the tenant-farmer can get his landlord to build one, he could well afford to pay 5 per cent. on the outlay, and be deeply grateful for the boon conferred as well. But there are also corrugated iron sheets turned out by some of our agricultural engineers which fit into one another so as to be readily strung by any labourer over the roof of a rick. A set for an ordinary-sized one might cost seven or eight pounds, but when once possessed it would last, with care, a considerable number of years. When taken off the rick for the latter to be thrashed the sheets have only to be stored carefully in any odd place, and they would be available for the following year.

Still cheaper, but very durable, waterproof

rick-coverings are manufactured by some eight or ten well-known exhibitors at the Royal and other leading shows, which are fitted with eyelet holes and ropes for fixing to poles and ground studs. A rick underneath one of these tarpaulins is said to be as safe for weeks or months together as one built beneath galvanised iron. But no doubt great care has to be taken of the cover when out of use to render it available for a lengthy series of years. Some term their canvas covers "rot-proof," others provide a composition wherewith they are to be painted when age-worn to preserve durability. Most likely the saving in the cost of making thatch and thatching would in about a couple of years prove an equivalent for the purchase of any of them.



New English Wheat.

The demand for flour during the past few weeks, that is to say, round about the Bank Holiday, has been very quiet, and at the present time prices have a downward tendency. The price of baker's grade flour varies in different parts of the country from 23s. 6d. to 25s. Offals of all kinds may be quoted unchanged in most districts; in others they have slightly appreciated in value. Some of the port millers are doing a good trade with the Continent in bran.

Small parcels of English wheat have been on offer; but, as might be expected at present, the condition varies a great deal. Some lots, however, which have been ground turned out as well as could be expected. Up to the present the grindings have been more experimental than anything else. In cases where the wheat has been threshed too soon, it is decidedly soft. By the end of September it will have had more time to dry and mature, and there is every probability that country millers will have a finer grist than they have had for some years. This may, to some extent, help them to contend with the competition to which they are subjected by the large millers. Given a good harvest season, those members of the trade who are situated in the midst of the wheat fields should do well.

Foreign Wheats Available.

The chief foreign sorts available now are Manitoba, Australian, Indian, Plate, and Russian. The first-named is not the highest grade, but No. 2 has been making up to 33s. 6d. per 480 lb., compared with 30s. to 32s. for good samples of English. The old wheat which is left is worth a good deal more than the new this year. The Indian wheats available are white Bombay of very good quality, and white and red Karachi. Some of the latter can be obtained for about 28s. 3d. per 480 lb., but such wheats are of no use to country millers; they require too much treatment before grinding. The South Russian wheats which are now arriving at British ports vary as to quality in a remarkable degree; in some cases there is a difference of as much as 3s. 6d. per quarter. Some of the poorest samples can be bought for 30s. 6d. per quarter of 480 lb.; others are of really good quality and approximate with Manitoba wheats in price. Plate is always a useful wheat for mixing; but, like Russian, it varies a great deal this season.

MILLER FARMER.

An interesting article on "Methods of Cleaning English Wheat" will be found in our Implement Supplement.

Horncastle Horse Fair. The show of animals at the Fair on Tuesday was the smallest on record, and all the [illegible] animals were quickly disposed of. [illegible] Buchanan and Russell, Gosberton, sold a brown colt, six years, for 38 gs., and a black mare for 45 gs.; while Mr. J. E. Walker, Horncastle, sold a chestnut filly for 41 gs.; Wycliffe, by Wolfe's Crag, Naiade, for 25 gs.; and a bay colt for 25 gs.

SEASONABLE TOPICS.

We are so used to hearing people abuse the clerk of the weather that it is strange to think of the community in general as being on good terms with the above imaginary individual. Yet such is the case, for both farmers and holiday-makers are glorying in the delightful August weather which we are enjoying at the moment of writing. It is refreshing in the early morning, when the dewdrops stand on the grass in the fields, and though the days are growing perceptibly shorter, there is an invigorating coolness in the evening air which was wanting during those hot, sweltering days in July. The weather is responsible for the early harvest, and bare stubble prevails where a week or two ago standing corn rippled in the breeze. Still more gratifying is the fact that corn is good. We have not had better wheat for some years, taking the country through, and we are having grand harvest weather for getting it in. For once in a way farmers have little room for grumbling, and perhaps the only man who is not quite satisfied is the sportsman who has the first of September in view, and thinks of wild partridges, bare stubbles, and scanty cover.

Harvest Weather.

A few days ago we were at lunch at a somewhat important agricultural show in the very heart of a famous dairying district, and, tell it not in Gath, the only cheese which appeared on the table was made on the other side of the Atlantic. One farmer tried a bit, turned up his nose, and then expressed himself in strong terms on the comparative merits of foreign and home grown produce. He thought that in the circumstances the caterer might have put a bit of home-made cheese on the table, to which view we all agreed, and then fell to discussing the well-worn topic of foreign competition. "It's no good, with land at 30s. an acre, trying to compete with land at half a crown" was the view of one man who had evidently made up his mind that this disparity was at the bottom of the whole business. "It's my opinion," observed another, who evidently knew a thing or two about cheese, "that uniformity has more to do with the foreigner getting such a foothold in British markets than anything. American cheese isn't very good, neither is it very bad, but it's uniform, and you can always depend on a certain standard of quality." We could not help thinking that there was a good deal in this remark, and our opinion was strengthened when we tasted cheese of vastly varying quality in the exhibition tent close by. Not only is the stamp of uniformity unmistakably fixed on foreign cheese, but it is the same with foreign butter, bacon, lard, fruit, and other commodities received from abroad. Compared with the best of our own produce, the quality is not high, but neither is it very low, and, above all things, it is even, and the purchaser can rely on what he is buying. Co-operation on the part of producers is doubtless responsible for this uniformity and so long as British farmers act as units, each one working independently of the other, it is unreasonable to expect that we shall ever acquire that same uniformity in home productions.

Uniformity.

Bearing on the above subject, what individual who is in the habit of buying butter from a local dairy has not heard from time to time from the maker that the butter is not quite up to the mark this week, with expressed hopes that it will be better next? Reasons are given for the falling off, for which the maker does not appear directly responsible, so the consumer overlooks it as a trifling matter, but when it comes to be a frequent occurrence for the butter not to be up to the mark (as it does in some cases), one cannot be surprised if the purchaser decides to have done with English produce entirely in favour of Danish butter, which, above all things, is reliable. There are still many small farms in the country where from one to a dozen cows are kept, and where butter making is the chief industry. We have every reason to encourage this industry, and would like to see it developed; but the butter must be good and uniform, or the small maker will go under. In the old days our grandmothers had often to guess at the cause when the butter was not up to the mark, and adopt primitive methods to improve it. Those methods will not do in these days. Science has done a good deal for the butter-maker, and though the principles of manufacture remain the same, we have modern appliances of untold value in the dairy. If the butter-maker of the future is to produce an article which can be relied on week after week, and if that common excuse about the butter not being quite up to the mark is to be heard no more, it is obvious that our dairy folks must be eager to acquire and make use of knowledge, and the apparatus used must be of an up-to-date character. It is true that the wives of hundreds of farmers and small holders can make butter equally as good as any which comes from abroad, but what they want to acquire is the secret of uniformity.

The Uncertainty of Home-Made Butter.

In many respects the farmer is a victim of circumstances, and perhaps this has helped to make him something of a fatalist. Whether he carries this characteristic to an unreasonable extent is an open question, but the fact remains that instead of fighting to prevent or defeat the forces which oppose him, he is more inclined to hope that the evil will pass him by; but if this does not happen he exclaims "Kismet!" and bears the burden in a philosophical way that is peculiarly his own. How often does one hear farmers complaining about the burdens of high rents, excessive rates, and foreign competition, but heaven and earth could not move many of them to take combined action in removing the evils. Everyone knows how much agriculturists suffer at the hands of insect and other pests, and how puny, when one comes to look at it, are the efforts made to cope with them. This year a crop escapes from some living evil which the farmer comprehensively terms "blight," and the man is thankful. Next year the same crop suffers severely or is destroyed, and the farmer accepts the loss as part of his fate instead of being up and doing to prevent or check the trouble. Towards the end of last May we had a killing frost which played havoc with the fruit blossom, and on its account many growers have nothing to pick. The fatalism of the home grower tells him that there is no means of coping with these spring frosts, but the fruit-farmer in Florida and California knows better. He has established a systematic communication with the Meteorological Department, which informs him when he may expect frost. During the trying season of blossom he has "smudge" fires prepared underneath the trees, and, when necessity demands it, these are lighted, and the smoke and vapour rising through the branches protect the tender blossoms from frost. The same spirit of self-protection has prompted foreign farmers to study the habits of insect pests, and learn what other creatures feed on them. The latter are then encouraged for the sake of destroying the former.

Farmers as Fatalists.

At all agricultural shows in the West of England there are, of course, classes provided for the common beverages of the district—cider and perry. Expert judges are engaged to select the best liquor, but, after they have made their awards and the prize-cards are fixed, a second judgment is made, and the cider-tent is the gathering-place for an interested number of tasters. Considering how palates vary, and how opinions differ as to what good cider or perry should really taste like, the judges are wise if they absent themselves when the public tasting is on, that is to say, if they do not wish to hear their decisions publicly criticised, for if there is one judge above another at agricultural shows who can never hope to please everybody it is he who makes the awards in the cider class. We do not mean to say that all the people who stroll into the cider-tent and sample the cider are in a position to question the decision of the judges, and the sole idea of many of the tasters is to get a drink of the refreshing beverage, but in the circumstances they feel it to be expected of them that they shall smack their lips, shake their heads, look wise, and pass opinion on the contents of the various casks and bottles.

Sampling the Cider.

A difference of opinion has arisen between the Board of Agriculture and potato growers in a discovery recently made of a preventive of potatoes turning black after boiling. The Board has declined to take the matter up on the ground that the discovery does not pertain to agriculture. Growers, on the other hand, attach much importance to it, and a petition to the President embodying their views has been influentially signed at Peterborough Market.

Agricultural Politics.

By a LOBBYIST.

Have any new reputations been established in the last session among the band of politicians representing rural interests? Well, undeniably the most distinctive personality who has emerged from that band is the Minister for Agriculture. Mr. Ailwyn Fellowes' courtesy has had a most fragrant expression; but in alliance with this courtesy has been a receptiveness of intelligence, a practical grasp of responsibilities and an optimistic hopefulness that have shown him to possess the qualifications of real statesmanship. Baulked in his legislative ambitions —I am alluding in particular to his common-sense Butter Bill—he has not permitted himself to relapse into a morose temper of petulant disappointment. It may be that he will himself not have the opportunity of carrying the Bill into effect; but he has already equipped himself—I am anticipating, in fact, that a General Election will take place before the next session of Parliament, and that the Liberals will be returned to power—for the rôle of critic of a laggard Government.

• • •

The other Parliamentarians directly associated with the rural movement have been quiescent rather than active. Mr. Channing has been engrossed chiefly in the evolution of his Bills dealing beneficially with the small holder and providing for a desirable reform in the tenure-law. This absorption will be profitable. I believe it has meant the foundation of a scheme of Liberal reform. Whether it will mean an immediate Liberal Act is another matter. Liberalism has too many interests to conciliate ere it can pay attention to the necessities of the somnolent and meek tenant-farmers. Mr. Jesse Collings has been enraptured with his new Quixotry (is it Quixotry, after all?)—the voluntary buying-out by the aid of the State and with the assent of landlordism of the present owners of our farmsteads and recalling the race of yeoman-owners. Mr. Spear, the tenant-farmer who represents the Tavistock division, has done good useful work in representing the moderate agrarian view to Ministers. Modest and practical, he has helped to convince the Government that rural areas and farmers have grievances despite their refusal to proclaim them aloud from the house-tops. Mr. George Lambert has revealed a development of Parliamentary aptitude, but he has still shown that characteristic unwillingness of his to crib and cabin himself to mere agrarian problems. He has still shown that predilection to roam the Parliamentary world from China to Peru. Still, I think, he is more definitely marked out than ever for the Liberal portfolio of agriculture. True, Lord Burghclere has shown a marked propagandist activity, but I doubt that Liberalism would dare select a peer for the control of so distinctly administrative a department.

• • •

Mr. Fletcher Moulton, representative though he be of the Callington platform in the House of Commons, has directed his activities into other channels. Sir Edward Strachey has been more reticent than of yore, but he has been a force in bringing us a step nearer a solution of the railway rates' problem—nay, to him may be attributed the wisely-revised scale which certain railway companies have adopted. Mr. Jedburgh has admirably pursued his ideal of a co-operative system of rural distribution; and, if his scheme of agricultural banks has had less significance in his beneficient efforts, he has let us see that he has not relinquished it. Sir Carne Rasch has been, perhaps, too absorbed in the task of dealing with buffets under his opponent's fifth rib, but he has none the less let it be perceived that he will be an active reinforcement of the agrarian advocates when on the Opposition benches. Sir Cuthbert Quilter and his Pure Beer Bill have subsided into innocuousness and their agitation has not even now the poor quality of tepidity.

No new men have passed the agrarian-cum-political horizon. No man has presented himself to our gaze of whose qualities we have not been aware before. Mr. Chaplin, indeed, has returned to first-class political eminence; but this is because he has, in a more or less degree, forsaken pastoral meads in order to walk the more lurid fields of imperial economics. (When, by the way, is he going to answer the question as to how the British farmer is to benefit by an encouraged Canadian competition which may, by reason of its no-rent-to-pay advantage, be able to undersell the British farmer?) The last session was, indeed, characterised chiefly by that indifference towards the needs and necessities of agriculture which the complacent acquiescence of the farmers and of the farmers' societies justified. The vehement expostulation which came from Professor Long disturbed a ripple on the placid surface of our emotions—a very evanescent ripple; but that was all. Does the next session promise a brighter prospect? Frankly, I fear me not. When the passive resister has been rejoiced and the brewer been punished, the voice of the professional Labour agitator will be heard in the land. His bold, resonant, aggressive tones will drown the piping appeals made on behalf of the British farmer.

• • •

I am not going to deal in any critical mood with assertions made before the Earl of Jersey's Committee, which is inquiring into the incidence of railway rates. Such criticism would be unfair until the full report is before the public. Are, however, the railway authorities quite generous in insisting that the Board of Trade is a preferable authority to the Board of Agriculture in determining matters in dispute between agriculturists and the companies? Many of these matters must concern points entirely outside the purview of an ordinary commercial and industrial organisation. It must concern points for whose adequate solution a direct scientific and professional knowledge is necessary. With the Board of Trade as the court of reference, the inquiry must inevitably in some cases be prejudiced to the disadvantage of the farmer. I do not mean, in making this assertion, to accuse the Board of Trade of any native unfriendliness. The Board of Trade, must however, in the absence of direct experience, rely to a considerable degree upon the experience and representations of the railway authorities. Whether it is wise to have a duplication of authorities is another matter—whether it may not confuse the general machinery is a debatable suggestion. That, however, the Board of Trade is a preferable body to the Board of Agriculture in the interest of the farmer, which, after all, is the first thing to be considered, is assuredly not a debatable matter. That the Board of Trade is absolutely impartial in dealing with matters arising between railway companies and the general traders I readily assent. It has not, however, the necessary knowledge to be equally impartial in regard to farmers. It must trust to information and assertions which may not always be quite dispassionate.

• • •

Can it be that the Radicals have shed their old-time and traditional view of the country-squire, of the old-fashioned landlord, and have brought themselves to believe that he may be quite a desirable personality in our economy and civilisation? I am induced to this inquiry by an article in one of the magazines by a writer of ardent Radical sympathies—an article endorsed by the anti-landlord *Daily News* one of whose themes is the difference between the old landlord and the modern landlord. By the "modern landlord" I mean the plutocrat from the big town, the money-bagged gentleman having no inherited association with the estate, who is heedless of the traditions connected with it, who does not recognise that as a landowner he has any responsibility but to minister to his own enjoyment, and who from the first is absolutely indifferent to the ties which helped in other days to weld the labourers, the farmer, and the squire, into one community. "All the new landlord wants as a rule," quoths the *Daily News*, "is such a setting for his prosperous career as a park, a well-ordered estate, good shooting, and a footing in 'the county' will secure him. He is there for pleasure every bit as much as the holiday crowd, and not least for the pleasure of self-importance, which he cultivates by enlarging his game preserves and turning out the villagers to make room for his retinue of keepers, gardeners, and stable hands. Agriculture is of no account to the new landlord." What a change this from the high-toned pictures in which the old landlord was depicted as a remorseless tyrant, whose method was black coercion, relieved only by an arrogant charity! It was the ancestors of the new landlords—the manufacturers and well-to-do middle-class men of the Manchester school who were often the authors of these grotesquely over-done oratorical frescoes. Time brings strange revenges, but few so piquant as this.

• • •

The trend of a certain section of Radicalism is evidently against the small freeholder. This is another evidence of a revolutionary change in the attitude of Radicalism. The author of this magazine-article to which I have alluded suggests the establishment of a central department of Government which should be charged with the purchase of estates and their division among the small cultivators. 'Tis a pleasing prospect this of a London executive body making intermittent excursions through the country, buying up an estate whenever they came upon one which satisfied their vision, and then dividing it up at a price among clamorous applicants. This section of Radicals is afraid, however, of what the ultimate fate of that small freeholder would be—they are afraid that, victimised by his own want of money, he would simply provide food for the grasping moneylender. That this has been largely the experience in Ireland is undeniably the case. The gombeen-man in the EmeraldIsle is often the embodiment of the most ruthless tyranny that extortionate avarice could produce. Hence it is that these Radicals would prefer infinitely to establish small holders cultivating under economic conditions, which should permit him freedom of sale and absolute fixity of tenure. It will be well to remember the anxiety of these men when we formally discuss the legislative proposals evolved from the somewhat incohate suggestions now being proclaimed from Liberal platforms. Give the tenant absolute security, give him freedom of sale, protect him from the caprice of landlords, give him a rent which shall be revisable at stated periods by a proper authority influenced by current prices—this would be infinitely better than giving him a false importance as an owner in which he would be the victim of an English edition of the gombeen-man. This epitomises the view of these reformers.

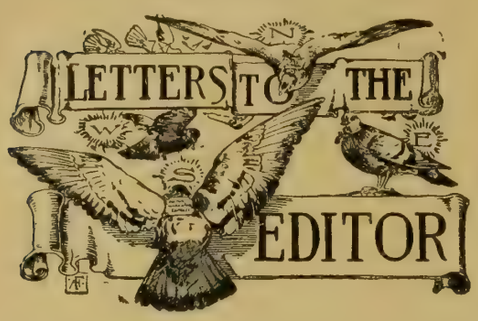
• • •

I find that there is to be a revival of the agitation against the rating of machinery. I ask those rural politicians who have objected to the exemption of machinery from rating to consider whether the policy of opportunism rather than one of determined antagonism might not be the wiser? The promoters of this agitation rely, as do the rural advocates of a readjustment of the incidence of taxation, upon suggestions of the Royal Commission on Local Taxation. These suggestions practically advise that only that machinery should be rated which is let with the premises, which is inherent to the hereditament. In other words, the claim is sustained by means of the Royal Commission that it is no more right to tax other machinery than it is to tax household furniture introduced into a house for the purpose of equipping it for the object for which it was originally designed. We live in a political age in which it is very difficult to exercise what I may describe as the recalcatory spirit, and in which it is very easy to raise it. If rural Parliamentarians refuse to accept the position adopted by the Royal Commission in connection with machinery, the industrial Parliamentarians of the north, and more particularly of Lancashire and Yorkshire, will no doubt ask that the same antagonism should be extended to the proposals affecting rural rating. They will contend—I do not, of course, say that complete logic will be on their side—that if the suggestions of the Royal Commission are in-

admissible in one instance, they should be inadmissible in all. We may be exclusively benefiting the textile and industrial districts by the exempting of machinery. What, however, we must be careful of is that by a policy of antagonism we do not establish a precedent fatal to ourselves.

• • •

The quidnuncs now give November as the month for the appeal to the constituencies. Well, I give up prophesying. The portents upon which we can only base our prophecies are tantalisingly and mischievously difficult to read. They are as bad as Esperanto or Yiddish.



Early Harvest in Yorkshire (East Riding).

SIR,—An early cutting of corn has been the result of hot, dry weather earlier on, and harvest is general. Wheat is the crop of the year, and barley also is good, but oats, owing to the drought, are short in the straw, and in some places thin. Turnips vary much, the early ones being the best; on late sown land they are backward, and probably will take very little eating.

August 11, 1905. J. B.

Wilts.

Harvest Prospects.

SIR,—The harvest is just at present occupying all our thoughts, and they are very anxious ones. For many of us have a bulky crop of wheat to deal with, much laid, and requiring many hands to cut it. Some have to give 20s. per acre for this operation, and, in consequence of delay in getting it cut, caused by rain and shortness of labourers, the waste and expense will in some instances mount up to about 40s. per acre before it is secured. Binders are doing Yeoman service, but there are limits to their capacity. In this district about half of this crop is cut, none in stack. Winter oats were also generally much laid; these are all cut, and many secured. Oats generally are a small crop, and about a fourth-part cut; many of them are over-ripe. Barley will be left until last, as this crop is improved by extreme ripeness. Harvest is probably ten days earlier than average. Never was fine weather more longed for. Roots are promising, but far from clean. Sheep trade is good, probably about 4s. a head above last year's prices for ewes, and 2s. for lambs.

August 12, 1905. J. S.

The Corn Outlook.

SIR,—The great bulk of corn in this immediate neighbourhood will be carried by the end of this week. The work has been somewhat interrupted at times, but I should say the greater part is got together in fair condition. There is, as a rule, an abundance of wheat straw, but the yield of corn will not be so good as was at one time anticipated.

Barley very variable as to crop, and first-rate quality an exception. Oats, maize, and peas very thin, the latter sown having been attacked by wire worm.

Swedes and turnips not by any means universally good, being in many instances greatly thinned by grub, which is still continuing its depredations, and in others choked by weeds of all descriptions. Mangel very good as a rule.

The price of sheep at the late fairs does not say very much from last year. In some cases ewes have made a little less, and lambs a trifle more, money for same quality.

J. C.

August 16, 1905.

Hants: Wheat 64 lbs. to the bushel.

SIR,—The farm prospects of this district have much improved since the last week in July, when we had a fine day's rain. After two months of drought. A few showers since have much improved the prospects of the root crop, though the grub were doing their work. There is now a prospect for an average crop. Wheat and barley will prove a good crop, the wheat I thrashed last Monday weighing 64 lb. per bushel, this from light, gravelly soil. This week will see the crops well secured in this neighbourhood.

Sheep have done well, as they always do in dry seasons, though the bite is short on these downs, with mutton and wool looking up, arable land may pay a small rent, which is more than it has done in many past years.

T. S. R.

August 17, 1905.

East Yorks: Wool the best for years past.

SIR,—We are having splendid weather for the harvest, the cutting is about done, and we are busy with the stacking, and if the present fine weather continues, by the 26th or the end of the month the harvest will be over. The wheat crop is a good one, I think above the average; barley fairly good, and oats under average, very short in the straw, but may yield fairly. The turnip crop has improved in last fortnight. White turnips will be, I think, now an average crop, but swedes will only be half a crop. What with the dry weather, rooks, wireworm, caterpillar of the diamond-backed moth, they have had numerous enemies to contend with. Wurzels are far above an average with some, and very poor with others.

Grass and seed pastures are very bare now, and lamb meat will be very scarce until turnips are ready. The young clovers amongst the corn are very weak, but may improve when the corn is got off them.

Both mutton and wool have sold well this season, especially the latter. The mild, dry winter was most favourable for sheep. They fed well, and sheared more wool in weight and better quality than I have ever known them.

We must hope that corn will make last season's prices or more, and then it will be a satisfactory season on the whole.

August 17, 1905.

The Barley Crop in Hunts.

SIR,—With a continuance of the wonderfully fine weather we have lately experienced, most of the corn will be stacked on the high lands before the end of next week. Threshing machines appear to be fully employed, with the certain result—a glut of wheat at market, and the forcing down of prices. The yield is variously described. On the whole, it may be written as quite an average on the high lands. The wheat crop was rather disappointing in appearance as to bulk when stacked up, but the dry May, subsequent drought, and the self-binder had much to do with it.

There are some wonderful pieces of barley on the well-farmed lands which were not drilled too early. This appears to be a season when the earliest seeders were not the most successful. Much of the barley will be light in colour, a portion of it steely from having been cut before it was thoroughly ripe; mayhap the maltsters will seek for yellow barley or declare that they require it. The increase should be great, as there can be little moisture in the barley already carted. Drought is still holding sway.

August 16.

P.S.—We have to-day been blessed with that rain for which the roots and grass have been sore in need for some time. The fall has not been heavy, so that no harm but good will have been sustained by the corn, which is still uncarted; this may amount to about a third of the acreage. We shall now have some yellow barley, and thus be able to supply both white and yellow, as

August 18, 1905. S. S.

The Outlook in Aberdeenshire.

SIR,—In the earlier portions of the country cereal crops are making rapid progress towards harvest, while in exceptional cases the machines are already busy at work in barley fields. If the weather should be bright and sunny there will be a large extent of barley in the stook in the course of ten days. Generally, barley may be considered the crop of the season, but, on the whole, it is to be feared that it will be under an average. Oats are very variable, depending greatly on whether the district was fortunate or not in getting the showers of rain which were somewhat scarce all over the county, and particularly scarce in certain portions which usually do not suffer severely from drought. Fodder will be remarkably scarce during winter; and this season is not like last year, which, although unfortunate in having a short crop, was fortunate in having a pretty liberal store of old straw to commence the season with.

Turnips, generally, of late have been doing well. There are many fields to be seen with a very promising appearance, where there is every reason to look for a bumper crop; but, on the other hand, there are to be seen numerous fields where the prospect is anything but promising, and it is to be feared that difficulty will be experienced in pulling the stock through the winter season.

Meantime, farmers are busy securing the hay by stacking. The crop has grown into a greater bulk than could have been anticipated in the early portion of the season. It may be noted, however, that this remark applies with greater cogency in the later districts where the rains fell in time to do the crops good. Pasture grass is becoming scarce, and, although the fields will freshen a bit, much growth cannot be looked for after this season of the year.

Potatoes everywhere look well and promise to be a heavy crop of good quality, which they never fail to be in a dry and warm season with plenty of sunshine.

August 18, 1905. J. B.

Crops and Live Stock in Wilts

SIR,—Wheat good, above the average, has been harvested in good condition. Barley under average; some of the early-sown barley has been taken well and should be a fair sample, the later sown barley being an indifferent crop and likely to be a poor sample. Oats, early-sown average crop, but late-sown rather poor. Beans an average crop. Hay, sainfoin, and clover an average crop secured in good condition, but dry pastures very light, the rain not coming in time for them. Roots: Mangolds, early-sown good, late-sown poor. Other roots a good plant, and growing well since the rain, a fair prospect of an average crop. Sheep: A good breed of lambs, healthy, and doing well, selling at about 1s. to 2s. more than last year, and ewes at about the same as last year. Wool 2d. per lb. rise. Cattle healthy, have milked well; heifers and calves sold well. Labour more plentiful than it was. Taking all together, it certainly looks a little more promising than last year, though the price of corn does not go up, and rates and taxes keep increasing.

August 19, 1905. E. R.

Sale of the Buckland Southdowns.

On Friday the entire flock of Southdown sheep, with the exception of the ewe lambs, the property of Sir N. W. G. Throckmorton, Bart., was dispersed at Buckland, Faringdon, Berkshire. Mr. Jonas Webb, of the firm of Messrs. Thornton and Co., acting as auctioneer. There was a fairly good company, and although no extreme prices were realised, the sale appeared on the whole to be satisfactory. The highest priced pen of shearling ewes was bought by Mr. W. M. Cazalet at 77s.; the same buyer giving 90s. for a level pen of four-tooth ewes, and 56s. twice for a pen of six-tooth ewes. Mr. Miller Hallett paid 64s., 60s., and 53s. for shearlings, 46s. for four-tooth, and 42s. for a pen one year older. Some of the other shearlings made 50s. (A. Carter), 66s. (J. Joicey), 50s. (W. T. Drake), 57s. (G. S. Harris), and 63s. (Colonel Bates van de Weyer). The four-tooths went at 50s. (J. Joicey), 51s. (Colonel Brymer), 50s. (R. N. Byass); the remainder making from 40s. to 48s. per pen. The pick of the three-year-old sheep went to Mr. C. Adeane at 52s., who also gave 90s. for a very good pen of full-mouth ewes. The full-mouth ewes, besides those already mentioned, realised from 41s. to 50s., the latter figure being paid by Mr. F. H. Jennings.

The best prices of the rams were as follows:—Full-mouth ram, O. J. Williams, 18 gs.; four-tooth ram, Hon. Mrs. Howard, 8½ gs.; shearling ram, J. Cottrell Dormer, 12½ gs.; shearling ram, E. Carter, 25 gs.; shearling ram, H. C. Wentworth, 14 gs.; shearling ram, Colonel Goldsworthy, 13 gs.; shearling ram, Mr. Hall, 20 gs.; shearling ram, Right Hon. W. F. D. Smith, 21 gs. Ram lambs sold as follows:—H. F. Plumptre, 5½ gs.; C. H. Berners, 15½ gs.; F. H. Jennings, 5 gs.; Colonel Brymer, 8 gs.; and H. F. Plumptre, 7 gs.; the remaining eight making from 2½ gs. to 3½ gs. each. The total of the sale was just under £1,100.

State of the Crops and Live Stock.

A GENERAL SURVEY.

The season has now sufficiently advanced for us to take a brief review of matters agricultural from observations taken whilst travelling in various directions over a considerable extent of the country, the chief items not yet sufficiently matured being the various root crops.

Wheat, the Crop of the Season.

To begin with, the great crop of the season appears to be wheat, which is universally one of the best crops for many years past; indeed, in most districts it is questioned if better crops of this cereal have been grown all round since the memorable harvest of 1868. Would that prices were as good now as then! The weather of the past twelve months has been very nearly perfect for the sowing, growing, and harvesting of this crop. Owing to the favourable seed time a much larger breadth (from appearances) must have been planted. The comparatively dry winter caused but little loss from the plant perishing, whilst the amount of sunshine during the blossoming and ripening period must have ensured thorough development of the grain and the beautiful colour of the ripened crops bespeaks a fine sample as regards quality. In a few districts storms caused the heavy crops to lodge a little early, and in such cases it is not unlikely that there may be a rather larger percentage of light corn than is desirable. Straw in most instances is abundant, and this product, now that compressing is so cheaply carried out, is of considerable help in rent paying, baled straw being carried by rail at a very small cost.

The next best crop generally appears to be

Barley, Next Best,

barley. This, however, is rather more variable. The earliest sown went into an even and suitable seed bed and did capitally. Later a rather wet period intervened, and some of the later sown was planted in less favourable condition, and with less successful results. In many instances, however, the crops are very heavy, and the grain matured evenly, which gives a better malting sample. Oats generally are the most indifferent of the white straw cereals, and these are very variable, some crops and districts being all that could be desired, many others being deficient in straw, and also thin on the ground. Some very good crops of winter beans are seen in places, and also peas and spring beans, the latter not all round quite of the best. Coming to the root crops, the season has in most of the midland and northern districts been quite dry enough for swedes, and a number of fields are very gappy; recent showers, and, in many places, second sowings over the gaps have assisted in giving a general cover; but a favourable autumn will be required if these are to be heavy yielders. Mangolds started rather badly in a number of districts, but the great heat in which this plant delights, has worked wonders, and there will be many very heavy crops of this most valuable root to be camped for winter, spring, and summer use. Kohl rabi is doing well, too, and becoming more generally cultivated.

Potatoes are now very extensively grown in several districts, and either from a more delicate constitution in some of the varieties grown, or from other causes, are very variable, fields adjoining each other being in one case a deficient and weakly crop, in the next strong in the haulm and of a rich and healthy colour.

Grass Land.

The season in most places cannot be called a good one for the grass farmer. The deficiency of rainfall at the time when growth was needed to make heavy hay crops caused a great deficiency here, and in many upland meadows little more that half a crop was harvested, though in the best possible condition. Water meadows gave a good return, and some splendid stacks of hay were secured from these. Pastures for grazing have been, on the whole, much too dry in the great feeding districts. A good start was made and the pastures remained sweet and the stock thriving until the end of June. July followed with intense heat and too little moisture, the fields in most cases becoming very brown, and have continued so until the present time, the cattle upon them, except where assisted with extraneous food, having rather an unthrifty look on their coats, and lacking the depth of body and sap that bespeaks great gain of weight. For the above reasons milk and other dairy produce became short in supply much earlier than usual, and are likely to continue scarce for the autumn. In striking contrast to this rather drab-coloured picture are the meadowlands near some of our rivers, and in the rich valleys where throughout the grass has retained a rich verdant hue, the cattle and other live stock on them looking in the finest bloom, and with ample bulk of food to go on with.

Live Stock.

Whatever information the Board of Trade returns may give us, the general aspect as presented to railway travellers is one of shortage rather than any surplus, or even necessary numbers. At the commencement of the season the great summer feeding districts appeared to be well stocked with bullocks, but a great number of these would seem to have been cleared off earlier than usual, and, it is to be feared, leaving little new money behind them. Recent journeys taken through some districts give quite an impression of a deficiency for the autumn. Indeed, it is practically a certainty that the English supply of prime beef between this and Christmas will be very limited; whether the foreigner will come to the rescue sufficiently to cause a low level of prices to continue remains to be seen, but there is little probability of very low prices prevailing for the best-finished cattle. Sheep were at the commencement of the summer season a treat to see, good crops of lambs were general, and the fine weather that suited the wheat crops so well, was equally favourable to our flocks, which could not be healthier or sounder, and with the increased price of wool and good paying prices for mutton and lamb, a good year in this department is quite probable.

Horses, too, appear recently to have taken a fresh lease of life so to speak. Increased attention is being paid to their breeding on all hands, and of all sorts and conditions, the motor scare apparently having had its day, and the highest class of harness horses, hunters, and dray horses seasoned and ready for work are, perhaps, it is safe to say, dearer and more difficult to find than they have ever been. A very dry season, however, is not altogether conducive to the welfare of our equine friends. The hard ground causes many badly broken hoofs, especially where little attention is given to their feet (a too frequent occurrence amongst farmers), and with the young stock the iron-bound surface often causes a straightness and want of elasticity in the joints that is anything but beneficial, and, at such times, growth and general development are considerably checked.

The following notes were made of the various districts traversed, and the date of travelling through them:—

Birmingham to Gloucester and Bristol.

During the latter part of May this district had suffered considerably from late frosts, which had cut fruit and early potatoes badly, as well as vegetation generally, and part of the district being very early, and a good amount of fruit-growing practised, heavy losses in this direction must and have resulted. Wheat in most parts was a good plant, and, on the whole, looking well, though some fields of both wheat and other corn, as well as grass, had quite received a yellowish tinge from the effects of the frost. Many breadths of potatoes were badly cut down, beans looking generally well, and the sowing of swedes was progressing rapidly, pastures and promise of hay very moderate, all live stock looking well, especially upon nearing Bristol, where some of the richest pastures and meadows gave an exception to the look-out of these earlier on the journey.

Northampton to London.

Travelling this route during the first week of June, some very refreshing rains had fallen, and greatly benefited both corn crops and grass. The latter was looking rich, and the quantity good, with the bullocks for which Northamptonshire is famous making rapid progress. Wheat and most corn crops, too, were looking exceptionally healthy and thick of plant, every promise of a good season throughout the length of this journey being apparent. Nearer London the land is of a lighter and less substantial character, but the crops had not then begun to feel any ill effects from drought, and some capital crops of hay on the low-lying meadows were ready for cutting.

London to Bournemouth.

A journey from London to Bournemouth, June 8, via South-Western Railway, traverses a district widely different in its soil, crops, and farming from districts to the north of the Metropolis. Upon first leaving London, for a considerable distance most land that is not occupied by buildings of one kind or other is given over to gardening purposes for the markets of Covent Garden and elsewhere, and very forward and well cared for were the bulk of such lands. Such things as lettuces, French beans, flowers of various kinds, cabbages, and many other of the thousand and one kinds of vegetation cared for here were quite worth looking at. Further down the line one comes to the West Hire hill, and large tillage and sheep farms, upon which many very extensive flocks of sheep were folded in hurdles over tares, rootons, and other green crops, the numbers of sheep appearing larger than usual. Sainfoin is an important crop in this district, both in hay and feeding green, and some very heavy yields were being cut with the mowing machine in the well farmed land. Corn crops were mostly forward and looking healthy, rather backward. Nearing Bournemouth some fields of wheat, very long in the straw and thin, were badly affected with rust, otherwise the crops promised to be very heavy. A good deal of rain had fallen, and was still falling here, and grass, both in pastures and meadows, was quite abundant. This route does not expose many herds of cattle. What were seen were enjoying themselves as they should be.

[Notes on several other districts will appear in our next issue.—TRAVELLER.]

Foreign Crop Prospects.

FRANCE.—Last week's rains whilst doing some good have interfered with the harvest work in the north. Reports concerning the threshings are contradictory. Some report good results, but the *Petit Journal* says that its special reports show that the yield is not good. Our contemporary says that the worst disappointment is in the north. The accounts are not definite, but it is asserted that the yield per acre and the natural weight are considerably below the average. The conclusion is come to that: "The harvest this year will probably be inferior to our requirements, while stocks carried forward from 1904 are insignificant."

HOLLAND.—Good weather prevails and satisfactory results are being secured with the harvest, although there are some complaints of the quality of the new grain.

AUSTRIA-HUNGARY.—In spite of the rains reported last week, there still are complaints of too dry weather, and further precipitation is much needed for the relief of the maize crop, while beet, potatoes, and feedingstuffs are also suffering.

SPAIN.—Reports concerning the conditions vary considerably, according to the districts from which they come. There is, however, no doubt as to the failure of the wheat crop in the southern provinces, and of the extreme distress entailing upon the poorer inhabitants. Serious rioting has again been in progress this week, the authorities apparently being unable to alleviate the prevailing distress.

RUSSIA.—The latest official return on the grain crops prevents more favourable features generally than private advices. An approximate average grain yield is expected, with winter wheat above, and spring wheat somewhat below an average. The rye crop, which was recently reported as a serious failure, is said to be probably under an average. Oats and barley are both returned as better than average crops. In Poland wheat and rye are reported as promising very good results, and oats and barley are, on the whole, satisfactory.

ROUMANIA.—The fears entertained of a complete failure of the maize crop have been, in part at least, dissipated by rainfall this week, quite general in extent. It is said to have effected an improvement of fully 15 per cent. in the prospects, bringing the probable yield up to a quantity sufficient for the needs of the country. Wheat threshing is well advanced, and the outturn varies considerably in quality.

UNITED STATES.—The weekly crop report issued by the Government is of a favourable character. The drought recently prevailing in some States has been broken by abundant rains. Spring wheat is reported doing well with only slight injury from rust. The crop has ripened rapidly under the high temperature, and some early sown wheat has been harvested in North Dakota. The Iowa State Board of Agriculture in its monthly report of average conditions gives maize 94, spring wheat 93, and oats 97. The Government report for same date gave the Iowa conditions considerably lower than the foregoing, the figures being maize 89, spring wheat 88, and oats 94.

CANADA.—Reports of damage by rust are still made, but in no direction is any serious result apprehended. The condition in the Dominion generally continues very flattering, and the official bulletin says the July wheat crop in the North-Western Territories is the greatest ever known there. The product of 1,108,272 acres is estimated at 21,725,500 bushels, or 5,000,000 bushels more than last year.

AUSTRALIA.—In some parts an excess of moisture is reported, which is not favourable for the growing wheat crop, but so far there is nothing in the conditions to cause alarm. The situation taken as a whole continues to be favourable, and, in the absence of a serious setback, very satisfactory results are counted upon.—*Dornbusch* (August 18).

Home Notes.

The Coming Crop.

According to the present general appearances of our plantations, there is hardly any place for doubt that "the bounteous housewife, Nature, on each bush lays her full mess before us." The actual measure of the yield cannot yet be ascertained, and very diverse estimates of the ultimate results are actively circulated in the Borough, these ranging from an average of 10 cwt., to the certainly extravagant figure of 20 cwt. per acre. Before me at the present moment, are very many reports from all districts, and, in addition, I have had the advantage of conversation with several experts, whose observations have been candidly communicated. From these I gather, that a certain proportion of the luxuriant bine is "blind"; that the laterals are, in most gardens, disappointing; and that the crop, as a whole, will consequently be picked from the top. It is, however, admitted that this top crop looks well, there having been a full supply of burr, which, under the influence of exceptionally favourable weather, has developed, or is developing into an abundant fruitage. But there are drawbacks to be set against the brilliant picture thus presented to every planter who surveys the scene from high positions. Internal examination reveals the presence in places of a sufficiently serious run of mould, and the active onslaught of red spider is also evident in many gardens. These facts must be taken into account, even if growers are at present inclined to think of them without apprehension. Their importance depends upon the uncontrollable weather, and none of us can calculate what changes may be wrought, during the passage from summer to autumn, that appears to be now commencing. Before the conclusion of picking, which will begin in a few days, there is the possibility of many a contingency, the outcome of which it is foolish to attempt to forecast. In forming our estimate, we must not omit the consideration of the circumstances surrounding the growth during the past two months, and the influences still in evidence. The exceptional spell of dry weather, favourable as it has been for the production of bine, and as it may still be for the finish of the growth, must, we think, affect the solidity and, consequently, the actual weight of the cones. I am, therefore prepared to hear that while the cribs are being rapidly filled, the yield from the hills is not proportionately heavy, and that the number of completed pockets are disappointing. It appears as if these results are not unlikely. Taking all these points into consideration, it seems to be very probable that the average of the 1905 crop will not be heavier than about 12½ cwt. per acre.

The Borough.

is prepared for the total represented by such an average, and therefore the market is, in the meantime, in a state of comparative suspense, and tending towards slight weakness. But sales of small lots continue to be made at fair rates, and when holders are offered much lower figures, such offers are declined, proving that some confidence in the future still exists, and that there is still a healthy anticipation that a stronger tone may soon be restored.

All official reports and notices of the National Association of English Hop Growers are printed in the MARK LANE EXPRESS, *and current information from all parts of the world, likely to be of interest and benefit to the members of the society, and Hop Growers generally.*

Foreign Notes.

America.

Recent information concerning crop prospects continues to be contradictory and difficult of comprehension. Cable messages received this week are as follows:—"Our outlook for crop is very favourable, growers are more willing to sell, the market is weak, and prices favour buyers." Our opinion is that the season is too far advanced for any serious diminution of quantity." On the other hand, the President of the Oregon Hop Holders' Protective Association writes me, under date July 31:—"The Oregon crop is in a bad condition. Five days' hot weather has diminished the vermin greatly, but it has injured the blossoms in all yards, more or less, and has especially damaged the honeydewed yards, the blossoms and buds dropping off. Many yards will produce no hops at all. At present it is impracticable to estimate the probable yield of Oregon. Buyers now estimate from 75,000 to 100,000 bales. But, taking it for granted that none of the hops are lost at picking time, which is very improbable, we think 80,000 to 85,000 bales a full conservative estimate. Many yards which show an enormous growth of vine and foliage will yield lightly, because only a top crop is indicated, as there are no hops on the inside or undergrowth. We have a yard which should make, judging from the growth, 3,000 pounds per acre, but which will in reality only yield 1,500 to 2,000 pounds. All our reports from California estimate crops at less than 1904, which totalled 62,000 bales. Some estimates for this year are as low as 45,000 bales. The estimates for New York State are from one-fourth to one-third short of last year. The Washington crop is generally set at 40,000 bales, but our information from this State places the yield at same as 1904, or not exceeding 36,000 bales. It is a certainty that the United States will not produce as many hops as last year. The market with us shows improvement, this being possibly due to the shortness of brewers' supplies and the bad crop prospects."

Such antagonism of opinion is very hard to reconcile or to adjust. I can only suppose that my correspondents are equally honest in their views, but that they are influenced by the standpoint from which their survey is taken. After comparing these reports with others, and reading between the lines of them all, I am inclined to conclude that the United States will produce a crop slightly in excess of last year, but not superabundant.

Current values of 1904's at New York may be approximately quoted at 23 to 25 cents for choice, 20 to 22 cents for prime, and 19 to 20 cents for medium qualities.

Nuremberg.

New hops are beginning to arrive in sufficient quantities to indicate the probable tendency of this season's trade. Some decent lots of early hops have been readily sold at 100s. to 110s., but the pressure by holders of 1904's to realise before the bulk of the present growth is put on the market somewhat interferes with the strength, which would otherwise be manifest. There are not many yearlings left, and they are now offered at nominal rates, ranging, perhaps, from 75s. to 135s., according to quality. These must soon be cleared, but until such business is finished it can hardly be expected that the market will settle down to the serious work of the present season. The outlook is generally sufficiently satisfactory to traders. Brewery stocks being reduced to a very low point, probably lower than has come within the retrospect of any moderate experience, it is anticipated that a strong demand will set in immediately the market can offer sufficient supplies for important transactions. And, although it appears possible that a full crop will be harvested, it is not expected that prices will be abnormally low. Of course, the figures of last season can hardly be reached, but it is hoped that they will be remunerative to growers, and not oppressive to consumers. Dealers are naturally anxious to persuade growers to contract their hops at comparatively low rates, but the farmers, advised by their Association, are fairly wide-awake, and do not show any present inclination to commit themselves.

Belgium.

The near approach of the harvest is inducing holders of 1904 hops to press them for sale, consequently values have fallen considerably, the most recent quotations for Alosts being about 85 to 90 francs, and for Pops 60 to 65 francs. The development of the new growth progresses favourably and rapidly. Early sorts are fully in hop, and the later ones have put forth abundant burr. A fairly abundant, but not excessive, crop appears to be certain, and, as general health is manifest, it is expected that the quality will be satisfactory. For October-November delivery of new hops, from 50 to 55 francs are being quoted on the Brussels Bourse.

National Poultry Organisation Society.

The annual report of the National Poultry Organisation Society has now been issued, embodying the report of the Central Executive Committee on the past year's operations and a concise record of the various branches and depots affiliated with the parent society, together with a statement showing at a glance the capital, profit or loss, average prices realised, and other interesting items in connection with the operations of the various local societies.

The report records that, notwithstanding the many difficulties necessarily arising from the introduction of a new system among a rural population for the more satisfactory marketing of produce, steady and encouraging progress continues to be made. Perhaps the most interesting part of the report, speaking generally, is that embracing the summaries of the records of the more successful depots. From this statement one gathers that the majority of the local societies have made satisfactory profits, in addition to enhancing local prices. On the other hand, even where a depot has made a loss, the local producers have in every instance benefited by the increase in prices paid, as a result of the competitive factor introduced.

Instances in support of this are indicated in the records of the Street Depot, in Somerset. Established in 1901, it has each year made a substantial profit, and this notwithstanding the increased prices paid to members. The sales at this depot amounted to £1,245, as against £763 last year, whilst a net profit was made of £79. Again, at the Framlingham Depot, in Suffolk, nearly half a million eggs were sold, the members being paid considerably above local prices for their produce. The profit made at this depot was £137, mainly accruing on the egg section. Also, in the report of the Melksham Depot it is shown that, whilst a profit of nearly £10 was made, over and above this no less than £58 more was paid to members than they would have realised had their produce been sold in the local markets, as previously.

The operations and results of the depots here mentioned are but typical instances of what can be accomplished where local management and initiative is efficient, and upon a commercial basis. Perhaps the greatest difficulty against which the society has to contend, in addition to the supply of winter eggs—to encourage which the society is offering a cup and a medal for competition—is the want of local experience in work of that kind.

The society, of which the Marchioness of Salisbury is president, is, without doubt, accomplishing a most valuable work, and it appeals to all who have the welfare of our local communities at heart. The report and other particulars of the society can be obtained on application to the Secretary, 12, Hanover Square, London, W.

PUBLICATIONS RECEIVED.

Mr. Henry Warren, who has given us so much striking sidelights into the methods of bankers, now gives us a view of brokers, his latest volume being "How to Deal with your Broker," and to those who have anything to do with these sort of persons the information given will certainly be useful, whilst it is also of general interest. It is published at 3s. 6d. by Messrs. Swan, Sonnenschein, and Co., Limited, 25, High Street, Bloomsbury, W.C.

Professor E. Klein, M.D., F.R.S., has been carrying out, on behalf of the Worshipful Company of Fishmongers, some experiments and observations on the vitality of the bacillus of typhoid fever and of sewage microbes in oysters and other shellfish, and the results of some of his labours are set forth in a work recently issued by the Company mentioned. Although on a subject outside the scope of this journal, the work is one that will interest many of our readers who doubtless participated in the scare raised some time back as to the dangers of eating shellfish.

Harvest Weather.

The "Mark Lane Express" Special Three-Day Forecast.

1. Essex Street, Strand, Monday, August 21st, 1905.

GENERAL PREDICTION.

The general distribution of pressure comprising an anti-cyclonic belt over Continental Europe, and a region of repeated cyclone activity along our North-West borders, is favouring a continuance of the existing S.W. type of winds and weather. The general sequence will be as follows:—At first fresh to strong S.W. winds, fair to cloudy and some occasional showers in the South, centre, and East. Some rain at times in the West and North; chiefly Scotland and N. Ireland. Later S.W. toW. winds moderating, some showers, chiefly in the Northern half of the area. Finally W. to S. winds freshening, fair to cloudy, and some rain, chiefly in the West. Temperature on the whole about normal; mild or normal in the South and East; normal or cool in the North and West; considerable spells of sunshine. The amount of rain falling locally will fairly accord with the annual average law of distribution.

LOCAL PREDICTIONS.

No 1.—Scotland:—At first fresh, or strong S. to S.W. winds; some rain, chiefly in the West and North; later, S.W. to W. or N.W. moderating winds; some passing showers to fairer. Finally, fair to cloudy, with W. to S. freshening winds, some rain in the West.

,, 2.—England (N.E.) and part of Scotland:—Peebles, Selkirk, Durham, Lincoln, Northumberland, Roxburgh, Yorkshire, (N. & E. Ridings). — **At first fresh S.W. winds; fair to cloudy. Later, S.W. to W. winds, fresh to moderate, some passing showers. Finally, W. to S. winds freshening, fair to cloudy.**

,, 3—England (East):—Bedford, Cambridge, Essex, Hertfordshire, Huntingdonshire, Norfolk.—**The same as No. 2.**

,, 4—Midland Counties:—Buckingham, Derby, Gloucester (part), Hereford, Leicester, Northampton, Nottinghamshire, Oxford, Rutland, Shropshire, Stafford, Warwick, Worcestershire, Yorkshire (West — Riding). **At first fresh S.W. winds, fair to cloudy; with some passing showers. Later, S.W. to W. winds, fresh to moderate, some temporary rain to fairer. Finally, W. to S. winds, fair to cloudy and some showers.**

No. 5.—England (South): — Middlesex, Berkshire, Kent, Surrey, Sussex, Wiltshire, Channel Islands, Hampshire.—**The same as No. 4.**

,, 6.—Ireland.—At first S.W. to W. strong to moderate winds; some showers, chiefly in the North; later W. to S. winds, fair to cloudy and some rain chiefly in the West; finally S.W. to W. winds, showery to fairer. The East and South East of Ireland will have least rain.

,, 7.—England (North-West) and North Wales. Cheshire, Lancashire, Westmoreland, Anglesey, Carnarvon, Denbigh, Flint, Merioneth, Montgomery.—**At first fresh or strong, S.W. winds and some rain; later S.W. to W. winds, moderating, some showers to fairer; finally W. to S. winds, freshening, fair to cloudy.**

,, 8.—England (South-West) and South Wales:—Brecon, Cardigan, Carmarthen, Glamorgan, Pembroke, Radnor, Cornwall, Devon, Gloucester (part), Monmouth, Somerset.—**Similar to No. 4 only with strong winds on the exposed coasts. The local temperatures can be inferred from what has been said under this head in the General Prediction.**

Age of Moon—Twenty days.

One-Day Forecast prepared by the Meteorological Office at 11 a.m. on Monday, August 21st.

GENERAL INFERENCE. The depression beyond Ireland appears to be travelling on a North-Easterly course but in the course of the day its influence will probably extend to all parts of our Islands, so that freshening South-Westerly breezes and changeable weather are likely to prevail generally.

SCOTLAND, N.—Increasing South-Westerly winds, a gale in the West; changeable, squally, some rain; moderate temperature.

SCOT. E. & ENG. N.E.—Freshening Southerly and South-Westerly winds becoming unsettled, rain at times; moderate temperature.

ENGLAND, E., MIDLAND COUNTIES, and ENGLAND, S. (London and Channel).—Light to fresh South-Westerly breezes, fine at first less settled later, dull and showery; moderate temperature.

SCOTLAND, W. and ENGLAND, N.W. (and N. Wales).—Southerly to Westerly winds, increasing decidedly, a gale in places; changeable, rain at times; moderate temperature.

ENGLAND, S.W. (and S. Wales).—South-W. to W. winds, freshening considerably; changeable, rain at times; moderate temperature.

IRELAND, N. and S.—Southerly to Westerly strong winds, a gale at times, moderating later; unsettled, rain at times; moderate temperature,

CORN MARKETS.

LONDON.

Mark Lane, Wednesday. — Wheat, English, freely offered, and to do business less money would have to be taken. Foreign sellers ask Monday's prices, but demand limited. South Russians quoted at 31s 6d to 35s; No. 2 Club Calcutta at 31s; choice white Kurrachee at 30s 3d. Maize dull, with an easier tendency. Mixed American quoted at 24s 3d to 24s 6d; La Plata, 24s to 24s 3d. Barley steady, quiet, unchanged prices. Odessa-Nico. Kherson, ex quay, quoted at 20s 3d; ex ship, 19s 3d to 19s 6d. Oats dull, unchanged, in small demand; common sorts quoted at 13s 3d to 14s 9d. Flour dull, limited request. Hungarians quoted at 30s 6d; Iron Dukes at 21s.

COUNTRY.

Ashford, Tuesday.—New wheats came to hand in poor condition, and the demand being dull low prices were accepted. New peas and oats unchanged. Prices:—New wheat, 28s to 30s 6d; new oats, 17s to 18s; new peas, 29s to 30s; new maize, 27s to 28s. Old corn: Feeding barley, 25s to 28s; foreign ditto, 22s; Mazagan beans, 32s to 34s; tick beans, 34s to 36s; oats, 20s to 24s per quarter; flour unchanged.

Banbury, Thursday.—Wheat, red (new), 27s to 28s 6d; barley, 24s to 30s; beans (new), 30s to 31s; ditto (old), 31s to 32s; oats, 18s to 19s 6d; ditto (old), 21s to 23s; peas (old), 29s to 33s per quarter.

Berwick, Saturday. — Average attendance. A few samples of new grain were shown, but prices were fixed.

Birmingham, Thursday.—There is an improvement in the attendance at the market, but trade remains rather quiet. Foreign wheats move slowly, and are occasionally 3d lower. There is a more liberal supply of new English grain offering, wheats making from 11s to 11s 3d per bag (186lb), oats 17s to 17s 6d per quarter (312lb), and beans 12s 3d per bag (196lb), delivered Birmingham. Grinding barley has declined 9d on the week, to-day's value being 18s 9d per 400lb at Sharpness. Plate maize is 3d lower at 23s 9d per 480lb at Sharpness. Flat maize is unchanged at 24s 3d per quarter at Bristol.

Brighton, Thursday.—Quiet trade and small attendance. Wheat in good supply, 2s per quarter cheaper. Grinding barley, 22s to 24s; old oats, English, 19s to 22s; new ditto, 17s to 19s; rye, 23s to 29s; peas, 30s; beans, 31s to 32s.

Bristol, Thursday.—With bright and dry weather since our last, harvesting of English wheat has progressed rapidly, and on our market to-day several lots were offered and found purchasers, condition being exceptionally good. Foreign wheat unaltered in value. Maize 3d to 6d lower. Barley 3d lower. Oats unchanged. Flour rather slow to sell, prices being about unaltered.—GRACE BROTHERS.

Canterbury, Saturday.—Prices of wheat are lower, and at the close only 30s could be obtained for 65lb. lots. Oats, too, are cheaper, owing to Irish competition, 19s being the top figure for 45lb. samples. New peas, 29s to 30s per qr. New barleys are not of first-class quality.

Chester, Saturday.—No old wheat obtainable, and the quality and condition of the new crop being variable makes prices irregular. Old oats scarce and unchanged, and new crop mostly inferior in quality and condition to previous year's. Indian corn, 3d per sack lower on the week. Quotations: Wheat, white, 4s 4d to 4s 6d; red, 4s 3d to 4s 6d per 75lb.; grinding barley, 3s to 3s 2d per 64lb.; beans, 5s 9d to 6s per 80lb.; oats, new, 2s 3d to 2s 4d; ditto, old, 3s 2d to 3s 4d per 46lb.; Indian corn, new, 12s 9d to 13s per 240lb.

Chichester, Wednesday.—Large suply of wheat and oats, which was cleared at the following prices. Average attendance. New white wheat, 29s to 30s; new red wheat, 29s to 30s; old white wheat, 33s to 34s; grinding barley, 20s; oats (English), 16s 6d to 21s; rye, 21s to 23s; peas, 29s to 30s; beans, 31s to 33s; maize, 25s to 26s.

Colchester, Saturday.—There was less wheat offering to-day than was expected, and although millers tried hard to buy at 1s. per quarter less than last week the most they could establish was a reduction of 6d. per quarter, and this with difficulty. Barley was very little offered, and prices are not settled. Beans and peas met a steady sale at quotations. Oats moderate supply, and sold quietly at last week's rates.—JOSEPH WILES AND SON.

Coventry, Friday.—Attendance moderate and trade quiet. Quotations:—Old wheat, 11s 6d to 12s per 186lb; new wheat, 10s 6d to 11s 3d per 186lb; barley, 29s to 33s per 448lb; old oats, 23s to 25s per 352lb; new oats, 18s 6d to 20s per 352lb; beans, 12s 6d to 13s per 196lb; peas, 11s 6d to 14s per 196lb. Prices of wheat were lower, from 1s to 1s 6d per quarter on the week. New wheat shown of fairly good quality generally. Oats firm for prime old qualities, but the new not first-class.

Derby, Friday.—There was no old wheat on offer, and only a few samples of new wheat were shown, these fetching fair prices. Spring corn nominal. New white wheat, 29s to 30s; new red wheat, 28s to 29s; malting barley, 27s to 28s; beans, 32s to 33s; oats, 20s to 21s; new oats, 18s to 19s.

Devizes, Thursday. There was a considerable quantity of new corn at the market to-day, and the quality of the new crop promises to be good. New wheat has declined 1s per sack, but other corn shows no alteration in value. The following were the quotations:—Best old wheat, 16s to 17s 6d; secondary ditto, 13s 6d to 14s 6d; new wheat, 15s to 16s; secondary, 15s to 16s 6d; best barley, 26s to 32s; secondary, 20s to 24s; rye, 22s to 24s; old black oats, 24s to 27s; white ditto, 20s to 23s; malting barley, 26s to 32s; beans, 16s to 18s; fine flour, 24s to 26s; extra fine, 27s to 30s.

Doncaster, Saturday.—Very few samples of old wheat on offer, an donly moderate attendance, both English and foreign wheat being very firm. Several samples of new wheat were offered, an made 28s to 29s per quarter. The new samples were in fair condition. Some new oats were shown, but prices were not fixed, and not quotable. No new barley shown. All feeding stuff firm.

Dorchester, Saturday.—Not a very large attendance, but grain of all kind was plentifully offered, especially wheat, of which some rare samples, as regards quality, was shown, but there was more on the market than was readily wanted and this rendered sales somewhat difficult to effect, the general run of prices asked being from 27s to 28s, and some even more. Foreign favoured buyers some very choice samples of malting barley were on offer, the quality of which was all that could be desired, and a great contrast to last year's; but sales have hardly yet begun, and no reliable price can be quoted. Oats are a quiet and somewhat disappointing trade.

Dublin, Friday.—Wheat, 17s to 20s; malting barley, 17s to 17s; grinding ditto, 15s to 15s; oats, 14s to 14s 6d; oatmeal, extra produced, 11s 6d to 14s; flour, 14s to 15s; pollard and bran, 6s to 6s 6d.

Exeter, Friday.—Trade rather slow; English wheat unchanged; new made from 3s 9d to 4s; foreign firm. Very little doing with English barley, and the samples offered were very variable in quality, the average price quoted being 3s 6d; grinding barley, 3d cheaper. Maize firm. Old oats somewhat dearer; not many new oats on offer. Flour steady. Old English wheat, 4s to 4s 3d; superfine flour, from 26s to 28s; fine, 23s to 25s 6d.

Glasgow, Wednesday.—The trade during the week has been quiet, with limited business passing. Breadstuffs have been in limited demand, and prices the turn in buyers' favour. Feeding stuffs have been the turn lower. There was the usual attendance at our Corn Exchange to-day. Wheat 3d per boll and flour 6d per sack lower on the week. Maize unchanged. Beans 3d dearer. Spot barley firm owing to scarcity. Oats 3d lower on the week. New oatmeal: Very little offering, but no great demand.—GIBSON AND CLARK.

Glasgow, Friday.—Market firmer. Beans the turn dearer owing to scarcity, but oats easier. More new oats are now reaching the market. Wheat the turn dearer, but little business passing. Flour slow. Mixed American maize lower at 13s 10½d to 14s per 280lb. Others dull.

Gloucester, Saturday.—There is a fair supply of new English wheat which sells readily at 3s 8d for reds, and 3s 9d for whites. Foreign quiet, and Russians 3d lower on the week. Barley 9d cheaper, but firmer at the decline. Maize unaltered. Oats favour buyers.—MESSRS. WAIT, JAMES AND CO.

Grantham, Saturday.—Farmers being busy with the harvest, the attendance was moderate. Small supply of wheat, and quotations 2s lower on the week, best samples making 27s to 28s 6; oats, 15s 6d to 17s; beans, 30s; blue peas, 35s to 45s per quarter. No barley yet offering.

Hereford, Wednesday.—Small attendance, but good supply of samples of new grain on offer. English wheats, 3s 7d to 3s 9d per 62lb; new oats, 17s to 18s per quarter. Old beans scarce. Old oats firm at recent rates. Wholesale quotations:—Wheat, 3s 7d to 3s 9d per 62lb; barley, 2s 9d to 4s per 50lb; oats, 2s 3d to 2s 9d per 40lb; beans, 3s 9d to 4s per 65 1-3lb; vetches, 4s 6d to 6s 6d per 65 1-3lb.

Ipswich, Tuesday.—There was a considerable quantity of new wheat on the market, mostly in nice, useful condition, having been threshed out from the field in excellent weather. A good quantity changed hands at about 1s per quarter below last week's prices. Good samples 28s 6d to 29s 6d per 504lb, delivered at Ipswich. Oats quiet and unchanged; not much new offering. Old beans very firm, at 34s per quarter. New grey peas 28s to 28s 6d per quarter. Maize unchanged, at 25s per quarter. Grinding barley quiet. Oil cakes and milling offals all very firm at last week's prices.

Leeds, Tuesday.—Favoured by magnificent weather, harvest is making rapid progress; both quality and yield of wheat prove satisfactory. Indian meals are 3d to 6d dearer on the week; but all other descriptions have met with a very slow sale at rather less money, new English, in fact, being fully 2s lower on the week. Spot maize 3d dearer; forward unchanged. Beans and oats slow.—DUNNS AND CO.

Leicester, Saturday. — Good attendance, with larger supplies of new season's wheat, which came to hand in good condition. Trade opened fairly active at 2s to 3s per quarter decline; but the supplies, being in excess of the demand, a further decline of 1s was registered at the close. Fine dry wheats, 29s to 29s 6d; secondary, 28s to 28s 6d per 36 stones; new oats, 18s to 19s; old oats, 23s to 24s per 26 stones.

Lincoln, Friday.—Good supply of English wheat, which met with a steady saleat areduction of 2s 6d per quarter on the week, the samples generally being in excellent condition. A few samples of barley came to hand, but insufficient to test values. Oats in moderate supply, and poor demand at unaltered rates. No new beans on offer.

Liverpool, Friday.—Wheat: The market has had a larger attendance, and wheat is very steadily held, with an improved inquiry for Plate and Russian sorts, which are generally ½d dearer; Indian firm at full prices. Flour steady for foreign sorts, but quiet for home-made brands; demand inactive for both. Maize, mixed, meets an improved inquiry, and values are ½d over last Tuesday. Plate is very steady, at ½d advance, with more trade passing. European sorts are quiet, unchanged. Barley, malting, is firm, with a better inquiry. Feeding quiet and favouring buyers. Beans are strong, owing to scarcity, and quotations are 3d to 6d up from last Tuesday. Peas steady at about recent rates, but quiet. Oats, a very quiet trade in foreign, but no actual change is noted in values; English in slow demand, and the turn easier for new crop. Oatmeal steady at recent currencies, but slow to move. Oilcake, a very quiet market, at nominally unchanged prices.—SEGAR AND TUNNICLIFFE.

Maidstone, Thursday.—New wheat was in good supply, and millers would only buy at about 28s to 30s per quarter. Barley does not come to hand freely, and value of it hardly yet settled. Oats are about as before. Of quite as dear; new, irregular in cost. Beans and peas no change. Maize a trifle cheaper than recently. No alteration in other grain.

Manchester, Thursday.—Fine samples of English wheat, and a fair sale at 30s per quarter here; foreign, under the influence of firmer cables, steadier, but millers hold off. Flour quiet. Indian corn fair demand at about 2d reduction on the week. Foreign barley lower, but beans and peas in seller's favour. Oats: New quoted 2s 5d to 2s 5½d. English bran and thirds held for full rates.

Newark, Wednesday.—Wheat: A fair supply of new samples on offer, which sold at a reduction of 2s per quarter on the week. New oats, 6d to 1s per quarter less new white oats, 17s to 19s; old black oats, 19s to 21s; new to 37s per quarter.

Newcastle-on-Tyne, Saturday. — A quiet demand prevailed at our to-day's market, for wheats and new English was offering at 28s per 504lbs. under last Saturday's prices. Other qualities slightly in buyers' favour. Maize steady at last week's prices. Peas and beans firm, with a quiet demand. Oats of all descriptions favouring buyers. No material change in barley.—JOSEPH POLLARD AND CO.

Northampton, Saturday. Better attendance, and a fair show of wheat, which made 1s 6d to 2s per qr. lower on the week. Oats abundant at a reduction of 6d per qr. Old wheat, 35s; new, 27s to 27s 6d; barley, 24s to 32s; old oats, 20s to 24s; new, 16s to 17s 6d; old beans, 31s to 34s; old peas, 28s to 33s; flour, 24s to 29s.

Norwich, Saturday. There was a moderate supply of new wheat on offer at our market to-day, which was in better condition, and made from 27s 6d to 28s per quarter. There were a few samples of new barley offering, but no demand for same at present. The weather has been mostly fine during the week, but rain fell yesterday. Wheat, 66lb. 30s.—J. ARTHUR MILLS.

Nottingham, Saturday. — A fair quantity of new wheat offering of excellent quality and perfect condition; prices ruled at 28s to 29s 504lbs. Grinding barley steady. A few samples of new oats showing quality disappointing, 18s to 19s 336lbs. Oats and beans scarce, and 6d higher.—ROBERT HEMILL.

Oxford, Saturday. There was only a small attendance at this market, and trade ruled slow in all departments. A fair quantity of English wheat was offered, but met with a limited demand at 27s 6d to 28s 6d for reds, and 28s to 30s for whites.

Peterborough, Saturday. — Good progress has been made with harvest this week, and there was again a fair quantity of wheat at market, prices being about 1s. lower than last Saturday. Oats still in poor demand, without quotable change in value.—THOMAS HILL AND SON.

Plymouth, Thursday.—There was a small attendance on our market to-day. Wheat quiet. Barley and maize 6o lower. Oats down.—ORLANDO DAVIS AND CO.

Reading, Saturday.—Trade was again slow, at, in some cases, reduced prices. English wheat made from 29s to 32s; barley, 23s to 26s; old oats, 19s to 22s; new oats, 17s to 19s; peas and beans sold at last week's rates, but flour fell to 22s to 25s.

Retford, Saturday.—Owing to rain harvest operations were interfered with. Some new samples of corn were shown in good condition, and prices for wheat averaged about 27s 9d per quarter. Very little new barley was shown. Grinding barley remained firm at 23s to 24s; beans, 32s; oats, 15s to 17s per quarter. There was an upward tendency in the value of maize, which made 26s to 27s per quarter.

Ripon, Thursday.—New samples of wheat now on offer, but little business is being done. Both round and flat maize show a downward tendency. New wheat 28s to 30s, wheat (foreign) 32s to 36s, barley (grinding) 23s to 24s, new oats 17s, maize (round) 25s 6d to 26s 6d, maize (flat) 25s 6d to 26s 6d per quarter.

Shrewsbury, Saturday.—The following were the quotations: Wheat (old), 14s to 14s 6d; wheat (new), 12s 6d to 13s per 225lb.; white oats (old), 16s to 17s; ditto (new), 11s 6d to 12s 6d per 228lb.; peas, 11s 6d to 12s 6d; beans, 17s to 17s 6d per 240lb.

Stamford, Friday.—Attendance rather small, and trade quiet, prices showing a downward tendency. Several samples of new wheat were shown, but offers did not come up to expectations, and many farmers took their stock home. Wheat was down 2s on the week, the best making 27s, and inferior 25s 6d to 26s 6d; new oats, 15s to 16s; old oats, to 22s; peas, 32s to 32s 6d. No beans were placed on the market, but large supplies are expected at an early date.

Sunderland, Saturday.—A few samples of old wheat offering, which made late rates. Nothing doing in spring corn. Arrivals coastwise: Oats, 250 quarters; beans, 42 quarters. Feoreign: Wheat, 5,540 quarters.—E. AND F. RICHARDSON.

Warwick, Saturday.—There was a fair supply of new wheat on offer at this market, which sold at 6d per bag below last week. The few samples of new oats made 16s to 20s per quarter. Feeding stuffs in fair demand; prices unchanged.

Winchester, Saturday. — A larger supply of new English wheat, and about a shilling lower on the week. Foreign unaltered. Barley 3d easier. Maize and oats unchanged. Flour fair consumptive trade at late rates. —FEAR, COLEBROOK AND CO.

Wisbech, Saturday.—Only a moderate supply of grain at market. New wheat and oats generally of good quality and condition. Wheat sold at 28s to 29s; oats at 16s to 17s 6d.—JAMES FLETCHER.

Wolverhampton, Wednesday.—Small attendance. Quotations:—Wheat, 14s to 14s 6d per 216lb; River Plate corn, 27s 6d per 480lb; English beans, 13s 6d per 196lb; oats, new 11s to 11s 6d, old 13s to 14s per 196lb.

Worksop, Wednesday.—Small attendance, farmers being busy in the harvest field. A few samples of new grain on offer in very good condition. Old white wheat, 32s to 33s; new white ditto, 30s to 31s; old red wheat, 30s to 31s; new red wheat, 28s to 30s; barley, 26s to 28s; grinding barley, 24s to 26s; old white oats, 21s to 23s; new white oats, 17s to 18s; old black oats, 19s to 21s; new black oats, 16s to 18s; maize, 26s to 28s; beans, 36s to 38s per quarter.

Yeovil, Friday.—New crop was freely offered, but the majority of the samples lacked condition. Wheat and barley both fell away 6d, and oats 3d per quarter. Best samples of new wheat made from 30s to 33s; secondary, 28s to 30s 6d; foreign wheat, 32s 6d to 33s 6d; best barley, 26s 6d to 32s; secondary, 20s to 24s; foreign grinding, 19s 3d to 19s 6d; oats, Irish black, 17s to 17s 6d; old black, 20s to 22s 6d; new ditto, 20s to 21s 9d; old white, 18s to 21s 9d; new ditto, 18s to 20s; beans, 32s to 36s; tares, spring, 40s to 42s; tares, winter, 47s to 50s; rye, 22s to 23s 6d; vetches, 6s to 7s per bushel. Flour a quiet trade, fine making 22bs to 23s per sack; extra fine, 28s to 31s. Milling offals continue a good trade, and meals also sell freely.

York, Saturday.—The attendance was fair. A few samples of new wheat on offer at moderate prices, and, generaly speaking, in excellent condition. Fine white made 28s to 29s; red and mixed, 27s to 28s; feeding barley, 24s to 26s per quarter. New oats met with a very slow trade at 16s to 17s; and old oats, 20s to 21s per quarter; rye made 7d to 7½d; old beans, 11d to 1s per stone.

FOREIGN

Hamburg, Saturday.—Although the weather has improved it is not quite settled yet. Harvest of barley is completed now, but quality has hardly turned out satisfactory, as a good many samples grown in North Germany looked stained, and also the Bohemians look more or less weathered. Some choice Austrian are offering, but the prices asked are very extreme. Fair sales have been made of Hungarian barleys, as they seem to be the best value; the quality is generally very good, and prices pretty moderate.—FRANCIS TH. DUHNE.

Hamburg, Saturday.—There is a better feeling for wheat, and, with decreasing offers, we quote: American hard winter No. 2, August-September shipment, 30s 3d to 30s 9d; 80 ko. River Plate, September, 30s 3d per 48lb f.o.b.; 61-62lb fine new red Holstein wheat is selling at 30s 6d to 31s; new Saale is held at 31s 6d to 32s per 504lb f.o.b. South Russian rye, 9 10-15, on the spot, is offering at 24s 3d; 9 15-20 August-September, at 24s per 480lb c.i.f. Hamburg. Good Bohemian malting barley is taken by our brewers at 31s 6d to 34s 6d, but there is as yet no export demand, prices being considered too high for the quality, much of the barley being rather coarse and discoloured. The best Bohemian, Moravian, and Slovakian is held at 30s to 33s; good Bohemian at 31s 6d to 34s. East Russian at 28s 6d to 29s per 448lb f.o.b. Common Saale is selling at 28s 6d to 31s, fine not offering. Feeding barley firmer; 60-61 kg. South Russian near at hand is selling at 17s 6d. September-October at 16s 9d per 400lb c.i.f. Hamburg. Mixed maize and River Plate on the spot is selling at 25s to 25s 3d, September-October at 22s 3d to 23s 9d per 480lb c.i.f. Hamburg.—JOHN TAYLOCK.

Paris, Wednesday. Although business has been small in all the provincial markets this is due, not so much to lack of offers as to the holidays. As a matter of fact, farmers are disposed to sell and willing to make concessions. Prices show a decline of 25c. on the average. At the Bourse de Commerce the market still feels the effect of the holidays, and lack of decision remains the keynote of the situation. The market opened heavy and closed

steady. Current wheat remains as of late, while forward parcels have advanced from 5c. to 15c. Current flour is firm, but has advanced from 10c. to 25c. for forward positions, though near positions have lost 10c. Rye is still lacking in interest. Oats: Business restricted, but the tendency is steady at late prices.—*Dornbusch.*

THE BALTIC.

After dull days, from the 14th to the 17th, the cargo market on the 18th and 19th was fairly good for wheat. The American new crop is held so stiffly that the situation is more favourable to holders of cargoes on passage than to buyers, who want delivery this side of Michaelmas. Business put through has included: Fine Russian azima at 33s 6d per 492 lb., Odessa Ghuka at 31s 6d per 492 lb., hard Taganrog at 30s 6d per 492 lb., Australian at 32s. per 480 lb., Argentine at 29s 9d per 480 lb., No. 1 Northern Manitoba at 31s. 3d. per 480 lb., and No. 3 at 31s. per 480 lb. Barley is 3d. dearer for Russian new crop September shipment. The price has picked up from 17s. 6d. to 17s. 9d. per 400 lb. Oats are steady at 14s. 3d. per 304 lb. for Vologda, 13s. 9d. per 304 lb. for American new crop, prompt shipment, and 13s 6d for White Sea cargoes (304 lb.) on passage.

Maize is well held. A cargo of Argentine made 23s. per 480 lb. on Saturday, and 23s. 1½d. is asked for American. Other cargo sales include white Calcutta peas at 28s. 6d. per 504 lb., and a cargo of beans on passage from Smyrna at 32s. per 480 lb. The London Corn Trade Association c.i.f. quotations for the settlement of rejections and difference in weights on wheat under Rule No. 4 of the Association East Indian Wheat Contract, are as follows:—Calcutta—Club, 31s. 3d.; soft red, 29s. 9d.; Bombay soft white Delhi, 31s. 6d., Kurrachee Soft white Delhi, 31s6d, Kurrachee — Choice white, 30s. 6d.; soft white, 30s.; soft red, 30s., all per 492 lb. The arrivals of grain and seed-laden vessels at ports-of-call for the week were 3 wheat (1 Port Wakefield, 1 Rosario, 1 Wallaroo)—total 3. The sailings of grain and seed-laden vessels from ports-of-call for the week were 4 wheat (1 Birkenhead, 1 Cork, 1 Leith, 1 Limerick), 3 linseed (Harburg)—total 7. Since January 1, 1905, the total arrivals have been 256 wheat, 2 flour, 2 wheat and oats, 1 wheat and linseed, 1 flour and wheat, 13 barley and wheat, 8 barley, 5 maize, 1 beans, 4 locust beans, and 43 linseed—total 336. Last year during the same time arrivals were 176 wheat, 1 wheat and maize, 31 barley and wheat, 15 barley 4 maize, 4 beans, 4 locust beans, 1 rye, 25 linseed, and 1 canaryseed—total 262.

POTATOES.

Borough. Saturday.—Good supplies were available this morning, but met a very quiet sale. English, 55s to 65s per ton.

Goole. Wednesday.—The attendance was only moderate, and the prospects for the new crop was the chief topic of interest. The accounts for the district are that there is a general freedom from disease, although it has made its appearance in one or two places. There seems to be every likelihood of a good crop from the Marsh and district. Quotations were about 55s per ton. In the retail market prices were 6d to 8d per stone. Carrots in this district are not quite ready.

Manchester. Saturday. Cheshire new reds, 4s to 5s; kidneys, 4s 6d to 5s 6d; Bedfords, 3s to 5s per cwt; turnips, washed, 90s; carrots, washed, 7s 6d per ton.

York. Saturday.—Steady trade at 2s 6d to 3s per bag, retail, 1s 9d to 2s per hamper or bag respectively.

Spitalfields. Saturday.—Large supplies were on the market this morning, but trade was slow. New Canary, 7s per cwt; Duke of Yorks, 5s 6d to 6s; Percents 5s to 5s 3d; Royal Kidneys, 5s to 5s 6d; Beauty of Hebron, 2s 9d to 3s 3d per cwt.

WOOL.

Canterbury. Saturday.—The market remains firm. Kent wool selling at from 11½d to 1s per lb. with lambs wool at 8d.

Halifax. Saturday.—Though business is much interrupted at present by local holidays there is an encouraging amount of inquiry, and prices have a firm or improving tendency.

Review of the British Corn Trade

DURING THE PAST WEEK

Written exclusively for the Mark Lane Express.

Satisfaction continues to be expressed by farmers, and with labour more abundant than it has been for years, the harvest is being secured with unprecedented celerity, yet without undue haste. The farmers within about forty miles of London are exceptions to the rule of good luck over labour, but this is seemingly inevitable; the great magnetic influence of the metropolis must be accepted as a fact. The wheat is mostly up to 62lb. in weight, and 64lb. samples are not rare. Quality is fine, and the heat was never excessive, so that there are no parched or shrunken grains to complain of. The average number of matured grains to the ear is large, and there seems scarcely any doubt as to the wheat yield being decidedly over the average. Barley is ripe, and a better crop by far than was expected. Malting samples will be met with, too, from farms and districts which usually are content with good distilling, or at most with brewing, quality. The oat crop has improved a little, but is not quite an average. Hops may be a record yield, and roots have come on well. They are now nearly an average promise, and sufficient rainfall between now and Michaelmas may bring them up to a full standard.

America is busy securing spring wheat from the banks of the Missouri to the Canadian frontier. In Canada and Manitoba a yield of about 600,000 quarters more than in any previous year is anticipated.

The Russian rye crop, being decidedly under an average, will reduce the export surplus of wheat, but the wheat crop itself is satisfactory. Barley is admittedly above an average yield, and oats, which are now being harvested, should be at least up to last year's standard. Maize in all South-East Europe is of poor promise, so that for the second year in succession round corn, the peculiar product of this region, is likely to be scarce and very dear. The Roumanian prohibition of maize exports was expected to be raised on October 1—after being in force for a clear twelvemonth—but our advices lead us to warn those who need small round corn not to rely on this taking place. In Austria-Hungary and Dalmatia the large yield of wheat has not prevented prices rising in sympathy with maize, potatoes, beet, and oilseeds, short crops of these four branches of culture being anticipated. Italy has good cereal crops well secured, but is not looking for much of a maize crop.

The Board of Trade returns published on 17th inst. show that bread is cheaper now than it was a year ago at Birmingham, but is dearer at Bristol, Manchester, Wolverhampton, Dundee, and Dublin. Why bread should be a halfpenny per quartern loaf dearer at Nottingham than at Norwich, in London than at Manchester, at Edinburgh than at Glasgow, at Dublin than at Belfast, is a trade mystery which the Government might do worse than investigate. The next General Election is likely to be fought on a Tariff issue involving only half this difference.

Flour is thus returned by the Board of Trade :—

	Now.	A Year Ago.
Imported (aver.)	9s 8½d per cwt.	9s 2d per cwt.
Town Households (aver.)	10s 0d per cwt.	10s 0d per cwt.

The average price of English wheat for July, according to the above authority, was 7s. 6½d. per cwt., that of imported wheat being 7s. 1½d. per cwt. These Board of Trade figures are interesting, but a little more light on the reasons for supposing that the average value of the foreign wheat really was 7s. 1½d. per cwt. would be very welcome.

The price of 7s. 1½d. per cwt. equals 32s. per 504 lb., or 30s. 6d. per 480 lb. The fine Argentine wheat weighing 504 lb. has made at least 33s. for weeks past, and we really cannot name the foreign wheat obtainable at 30s. 6d. per 480 lb., except cheap Indian, worth 31s. 6d. per 492 lb., be meant.

Country markets appear of late to have been cheaper for wheat than London, the average at some places, such as Doncaster, being as much as 2s. below metropolitan values. Norwich has ranged 1s., Peterborough 1s. 5d., Lincoln 1s. 6d., and Salisbury 8d. below the London average. Barley in the country has averaged 22s. 9d. both at Norwich and Lincoln. For over a month no English barley has been on sale at Peterborough, Doncaster, or Salisbury. Oats, as usual, have made a good price in London, but at Salisbury the good average of 19s. 11d. has been maintained for a month past, and at Peterborough 19s. 5d. per qr. As usual, oats have been comparatively cheap in East Anglia and in the North, where 18s. 7d. and 17s. 3d. have been the averages.

In France wheat during the past few weeks has receded a trifle in value, the country average showing 2d and the Parisian 1d. decline. Belgium shows the much more material fall of 2s. 8d. per qr. In Germany, however, as in France, the changes are not great; Berlin is 3d. cheaper on the month and Breslau a penny. Barley on the Continent ranges from 24s., averaged in Belgium, to 26s. 2d., averaged in Paris. Ordinary French and German exchanges report mean values intermediate between these extremes. Oats are averaging 22s. 10d. in Paris and 21s. 8d. for rural France, but are below a sovereign per qr. in Germany, possibly owing to imports from Russia. The Paris market for oats reached its highest price about midsummer, and the Paris average for oats for June was as high as 23s. 1d. per 312 lb.

The sales of British wheat at the statute markets have been smaller this season than for a good many years. The returns for fifty completed weeks are now available, and are as follows :—

This season, 1,626,000 quarters at 30s 9d per quarter.
Last season, 2,078,500 quarters at 27s 2d per quarter.

Of barley increased sales at a slight rise in price are to be recorded.

This season, 3,133,000 quarters at 24s 7d per quarter.
Last season, 2,776,000 quarters at 21s 11d per quarter.

Oats have been a good local trade, but the prices made in the shires have not been what the good London quotations might have led one to expect. With London's immense weekly consumption of oats (80,000 qr. is the usual reckoning of actual wants) and the willingness of horse owners to pay a very fair price, 18s. to 21s. per 336 lb., it is a great pity that railway freights prevent the West and South-West from sending oats to town. Thus the trade is mostly in imported oats from Russia.

For the whole kingdom the statutory returns are :—

This season, 1,144,000 quarters at 17s 2d per quarter.
Last season, 1,087,000 quarters at 16s 5d per quarter.

The sales of British beans, peas, and tares this season have seen fairly good prices realised, and there has been a decided rise in British buckwheat.

Imports of the United Kingdom last week were :—

Wheat, 511,000 quarters; a very large supply.
Flour, 56,760 sacks; a third of a full supply.
Barley, 43,000 quarters; a third of an average.
Oats, 151,000 quarters; over an average.
Maize, 193,000 quarters; nearly an average.

Since the 1st September the imports of breadstuffs have been as follows :—

	Quarters.
Wheat	23,537,000
Flour, equal to	3,525,000
Breadstuffs	27,062,000

In the same period of last season 26,852,000qr. were imported.

Of maize the figures are as follows :—

	Quarters.
This season	9,346,000
Last season	11,518,000

The receipts this season have been slightly below, those of last season were slightly above, the average.

Of barley, our arrivals this campaign have seemed to be small, for those of the previous year were colossal. Return of oats and of barley for the fifty completed weeks of the cereal year are as follows :—

	Quarters. This Season.	Last Season.
Barley	5,686,000	8,513,000
Oats	6,142,000	5,374,000

The supply of wheat on passage to the United Kingdom on 19th inst. was rather below the average :—

	Quarters.
American	45,000
Argentine	755,000
Indian	767,000
Russian	235,000
Australasian	420,000
Various	60,000
Total	2,282,000

It is now seven weeks since the opening of the Californian shipping season, and not a cargo has been exported. This is a condition of things for which there is no recent precedent. As little a time back as 19th August, 1902, we find there were 880,000 qr. of Californian wheat on passage to this country.

Of oats a large quantity, 450,000 qr., is on passage, chiefly from Russia.

The following are the quantities of barley now on passage to the United Kingdom :—

	Quarters.
Russian	98,000
Californian	70,000
American	30,000
Smyrna	25,000
Persian	10,000
Roumanian	15,000
Total	198,000

Of maize, expectations are a good deal above the average; 1,326,000 qr. Of this total over a million quarters are yellow corn.

TO-DAY'S MARKETS.

MARK LANE, MONDAY, August 21

[FIRST REPORT.]

There was a good supply of new English wheat on offer, and we are very sorry to say that, despite all counsels to the contrary, it was pressed on sale at 2s. per qr. decline. New White was not quite so depressed as new Red. Foreign wheat was the turn lower, in sympathy with English but holders were far from willing sellers at a concession. Barley was very quiet for malting and brewing. In feeding sorts, a steady business passed at about 20s. for Russian. Oats were quoted 18s. per 336 lb. for new White Gartons, 17s. for new winter of the same good weight. There were offerings of new English light oats as low as 16s. per 304 lb. New English Red Trifolium seed made 32s. per cwt. New English Rapeseed made 56s. per qr. for fine black; 49s. for ordinary. Foreign oats were quiet at 14s. to 14s. 6d. for 304 lb.

CLOSE OF THE MARKET.

SOME WINTER BARLEY OF THE NEW CROP WAS ON OFFER AT 24s. PER QUARTER. THE MARKET IN GENERAL WAS IN BUYERS' FAVOUR, BUT MAIZE FOR PROMPT DELIVERY WAS QUITE AS FIRM AS BEFORE.

THE FLOUR TRADE.

MARK LANE, MONDAY, August 21.

New country flour from the 1905 wheat crop was the feature of the day; 21s. was accepted for straights and 20s. 6d. for ordinary. Of course, the great bulk of offerings is still of grindings from the 1904 crop. London makes were nominally as dear as on the 14th inst., but the market was decidedly against the sellers. Whole meal was obtainable at a reduction of 3d. per sack. First quality Minnesota patents were said to have been offered to-day for October shipment at 28s. c.f.i., or 2s. 6d. below spot prices. Kansas flour made from new red winter wheat was offered for September shipment at 24s. c.f.i. Iron Duke was sold on spot for 21s. 6d. cash, but 20s. 9d. c.f.i. for prompt shipment was accepted. Milwaukee patents were offered for October shipment at 27s. 9d. c.f.i. Ohio patents were obtainable for September shipment at 25s. c.f.i. Australia is still offering to ship flour and 23s c.i.f. for prompt shipment is a very reasonable price. No changes in Manitoba, Hungarian, or French flour prices were made, but these three sorts were comparatively neglected.

LONDON TERM MARKET.

This market is open to elected members only, and is held at the Baltic Club St. Mary Axe. No business except for future delivery is done, and the smallest quantity that can be purchased is 1,000 quarters, or 4,800 cental.

Prices quoted on Saturday at the close of the week's trade were:—

WHEAT (per cental).

No. 2 American Red	6s.	8d.	Sept. delivery.
,, ,,	6s.	7d.	Nov. ,,
,, ,,	6s.	6d.	Jan. ,,

MAIZE (per cental).

American	4s.	9d.	Sept. delivery.
,,	4s.	8d.	Nov. ,,
,,	4s.	3d.	Jan. ,,

"Near dates" between 14th and 19th inst. hardened a little, but prices receded for January delivery.

Buyers and sellers of American red winter wheat are fighting to-day over 1d. per cental difference, but 6s. 8d. per cental or 32s. per quarter of 480 lb. is about the real level for autumn and early winter delivery. American maize commands 4s. 8d. per cental, or 22s. 6d. per quarter of 480 lb. for delivery this side of Christmas.

GRAIN AND FLOUR FACTORS REPORT.

Flour.—Owing to lower wheat prices, buyers are holding off so that very little business is passing. Prices are 6d. lower. Grain.—Indian corn is more plentiful, with price slightly in buyers' favour—viz., 13s. 10½d. per 280 lb. Oats dull, with Scotch and Irish selling at 15s. to 15s. 6d. per 264 lb. Barley again 3d. easier. Pease unchanged. Beans strong, both on spot and for shipment. Oilcake quiet. Mill Stuffs.—Bran and Common Thirds unchanged at 82s. 6d. and 85s. per ton. Fine Thirds in active demand, so that millers are behind with orders, value 107s. 6d. to 110s.—McKINNON AND McDONALD (Glasgow).

Flour.—Trade quiet, and with the weak cables from America prices continue in favour of buyers. Offals.—The demand for bran continues active, and prices generally are 2s. 6d. to 5s. per ton advanced.—GREENHILL BROTHERS (Belfast).

Flour on the spot has met a quiet demand at last Monday's prices, for shipment. Hard spring wheat patents are offered on easier terms, and are now reaching a workable basis.—MEDILL AND Co.

Milling Offals.—Prices remain unchanged from last week, with a fair demand.—JOHN BAWCOMB AND Co.

FEEDING STUFFS.

London, Monday.—Linseed cake: The spot demand has much improved, and the strong tendency continues on the part of buyers to secure future requirements of American made. Undecorticated cotton cake: Steady at last week's quotations. Decorticated cotton cake and meal: These are in faid demand, and prices unchanged. Linseed: Market firm and dearer.

ROBERT AND JOHN HEWETSON.

THE BALTIC, 1 p.m.

STATE OF TRADE.

Wheat cargoes are steady; nothing doing in American either seaboard, but Russian, Indian, and Argentine all a very fair business. No changes in the demand for cargoes of spring corn; maize is the strongest. Oats are the least strong, as regards the tone of market.

BUSINESS DONE.

WHEAT.—Rosario, 29s 6d. per 480lb., on passage; Bahia Blanca, 30s 6d per 504lb., on passage; Odessa Ghirka, 31s 6d per 492lb., October shipment; Roumanian, 30s per 492lb., September shipment; Australian, 32s per 480lb., on passage; White Calcutta, 31s per 492lb., on passage; Red Kurrachee, 30s per 492.b., on passage; Turkish, 29s per 492lb., prompt shipment.

BARLEY.—Azoff, 18s per 400lb., prompt shipment; Kustendje, 19s per 416lb., prompt shipment.

OATS.—Archangel, 13s 6d per 304lb., prompt shipment; Petersburg, 13s 6d per 304lb., prompt shipment.

MAIZE.—American, 22s 9d per 480lb., September shipment; Argentine, 22s 9d per 480lb., September shipment.

LINSEED.—Calcutta, 40s per 410lb., September shipment; Bombay, 41s 6d per 416lb., prompt shipment; Argentine, 39s 6d per 416lb., prompt shipment.

COTTONSEED.—Egyptian, £5 8s 9d per 2,240lb., on passage; Egyptian, £5 10s per 2,240lb., prompt shipment; Fayoumi; £6 per 2,240lb., September shipment; Fayoumi, £5 18s 9d per 2,240lb., October shipment; Bombay, £4 15s per 2,240lb., September shipment.

PROVISIONS.

London, Monday.—Bacon: The arrivals of bacon last week were from Ireland 1,761 bales, and from foreign ports 11,224 bales. The bacon market was very disappointing last week, the higher prices having given trade a severe check, resulting in Danish bacon being sold at several shillings less money. Prices ranging: Irish, 66s to 71s up to 74s; Danish, 56s to 68s up to 74s; Canadian, 60s to 64s up to 68. Butter: The butter market was quiet, prices favouring buyers for practically all selections:—French, 90s to 110s; Danish, 119s to 122s; Russian and Siberian, 94s to 102s; Irish, 88s to 114s; Canadian, 106s to 112s; Australian, 100s to 108s; American, 88s to 104s. Lard: The lard market was steady but quiet: Irish, 45s to 57s; American, 40s to 41s 9d.

HAY AND STRAW.

Lancaster, Saturday.—Meadow hay, 5½d; clover hay, 6d; wheat straw, 4½d; oat straw, 4d per stone.

Manchester, Friday.—Hay, new, 4½d to 5d; clover, new, 4½d to 5½d; straw, wheat, 4½d; oat, 3½d to 4d per stone.

Whitechapel, Saturday. Supplies this morning were on a fair scale, and met a fair demand at steady rates. Best clover, 75s to 82s 6d; inferior ditto, 60s to 70s; specially picked hay, 77s; good ditto, 63s to 72s; inferior ditto, 45s to 60s; mixture and sainfoin, 67s to 75s; straw, 30s to 40s per load.

CATTLE.

Sheep	3s 8d to	4s 10d to	5s 8d
Lambs	4s 10d to	5s 4d to	6s 2d

Milch cows, per head, £16 to £24.

British arrivals include as follows: Scotland, nil; Eastern Counties, 26; Midland, Home, and Western Counties, 972; Devon, 10; Ireland, 102.

In the beast market to-day there was an increase of 80 head compared with Monday last, those of prime quality being in greater proportion, chiefly arrivals from the Midlands, Ireland and Devon; for these trade ruled quiet with a downward tendency in regard to value, though not sufficient to enable us to quote it so. Fat butchering cows and bulls were in slightly larger supply, and met a better enquiry, rates favouring the sellers in some cases to the extent of 2d. per 8 lbs. The arrivals from Ireland to-day consisted of 68 Dublins, 22 Waterfords, and 12 stores, for the latter there was no enquiry, rates in consequence remaining unquotable, the former on the other hand met a steady enquiry at late values. A clearance is considered doubtful.

The following are top quotations per 8 lbs. (sinking the offal):—

	To-day.	Monday, Aug 22, 1904.
Devons	4s 6d ex 4s 8d	4s 8d
Herefords	4s 6d ex 4s 8d	4s 8d
Runts	4s 0d ex 4s 6d	4s 4d to 4s 6d
Lincolns	3s 10d ex 4s 0d	4s 0d to 4s 2d
Irish	4s 0d ex 4s 5d	
Fat Cows	3s 4d ex 3s 6d	3s 6d ex 3s 8d

In the sheep market there was a decrease of 220 compared with the corresponding day last week. Trade taken all round was of a disappointing nature, salesmen having to accept 2d. per 8 lbs. less money to effect sales; this remark applies equally to Scotch sheep. Irish on the other hand sold fairly well, last Monday's quotations being well maintained. Lambs were in fair average numbers, but met with little or no demand (the season for these being now about over, and big lambs selling for small mutton), a decline of 2d. per 8 lbs. had to be made. The supply included 500 Scotch, 2,100 Irish, and 505 from the Eastern Counties. A clearance in this part of the market is extremely doubtful.

Undermentioned quotations are at per 8 lbs. (sinking the offal), and are for the best of each class penned:—

	To-day.	Monday, August 22, 1904
7½ to 8 st Downs	5s 6d to 5s 8d	5s 8d
9 st Downs	5s 4d to 5s 6d	5s 6d
10 st Half-breds	5s 2d to 5s 4d	5s 2d to 5s 4d
10 st Irish	5s 2d to 5s 4d	5s 2d to 5s 4d
10 st Down Ewes	3s 10d to 4s 0d	4s 4d to 4s 6d
11 st Half-bred ditto	3s 8d to 3s 10d	4s 2d to 4s 4d
5 st Down Lambs	6s 0d to 6s 2d	6s 4d
6 st Half-bred ditto	5s 8d to 6s 10d	6s 0d

Calf trade not worth noting or quoting.

London (Central), Monday.—Fair supplies, trade quiet. Beef: Scotch, 3s 10d to 4s 4d; English, 3s 6d to 3s 8d; American, 3s 1d to 3s 6d. Mutton: Scotch wethers, 4s 4d to 5s; ewes, 3s 6d to 3s 8d; English wethers, 4s 2d to 4s 10d; ewes, 3s 4d to 3s 8d. Lamb: Scotch, 5s to 5s 4d; English, 4s 8d to 5s 2d; New Zealand, 3s 6d to 3s 10d. Veal, 3s to 4s 6d. Pork, 3s 10d to 4s 2d per 8lb.

St. Ives (Hunts), Monday. — Beasts 113, sheep and lambs 1,348, pigs 345. Beef, 7s 3d to 8s, mutton, 7s 7d to 10s 6d; lamb, 9s and 10s; pork, 6s to 6s 6d. Fat cattle, sheep and pigs, and store sheep and pigs, good demand; store cattle, fair demand; milch cows, short supply, middling trade, prices £14 to £22.

FOREIGN.

Deptford, Monday.—Beasts, 1,091. To-day's supply of beasts, compared with Monday last, showed a decrease of 870 head, and consisted entirely of shipments from the United States. Trade was of a much firmer nature at an advance of 1d per 8lb. Best States beasts on offer to dress about 720lb made from 3s 9d to 4s; seconds, 3s 8d per 8lb (sinking the offal). Besides the above, about 350 more were withheld. On Saturday 1,616 beasts from the United States and 545 from Canada were offered for sale, and, with a firm, steady trade, were quoted at from 3s 9d to 4s for the former and from 3s 6d to 3s 9d for the latter. There were also 384 Canadian ewes offered for sale, which met a slow but steady trade, best being quoted at 4s 4d per 8lb.

Liverpool, Monday.—Larger supply of cattle, demand good, especially for well-finished quality. Prices, however, unchanged. Sheep and lambs supply considerably smaller; trade very slow; only finished sorts maintained last week's top prices. Strong sheep and middling lambs much lower in price. Beef, 5½d to 5d; mutton, 8d to 6d; lambs, 8½d to 6d per lb. At market: 942 cattle and 10,384 sheep.

HOPS.

London, Monday.—W. H. and H. Le May, 67, Borough, London, report:—The market must again be passed in buyers' favour; the anxiety of holders to clear out before the new crop is here causes prices to give way further, and consumers are availing themselves of this most favourable opportunity to secure the cheap lots as they are offered.

Worcester, Saturday.—The hops have made steady progress this week. The first picked in the new year was received on the 15th, and a few more were brought in today. No transactions have taken place however. Picking will become general about the 29th. There has been more business done in good parcels of last year's hops at the present tempting figures. Seconds and pockets 1904 hops have passed the scales this week.—CHARLES FARAM AND Co.

SEEDS.

London, Monday.—There is a steady demand for trifoliums, early and late, a large quantity of the early English having been exported abroad. Spot stocks are very light. Late seed is now lower than early, and consequently better value. Winter tares are finding buyers at cheaper prices. Rye moving freely. Fine samples, reasonable prices. Rape and mustard firm and unchanged.—JOHN PICARD AND Co.

LIVE STOCK AND MEAT TRADE REVIEW

(Written Specially for the "Mark Lane Express.")

Trade in London.

Trade for fat beasts of both prime and second quality at Islington, with a larger supply, was of an extremely slow and dragging nature, with a downward tendency in regard to value, although not sufficiently so to warrant our quoting any lower rates. The consignments consisted chiefly of animals from the Midland counties and Ireland; the poor trade is partly attributed to the holiday season, so many families being out of town. The Irish arrivals consisted of 60 Dublins (five of which were choice Black Polled beasts, and seven Waterfords), no store cattle being offered for sale. Trade for this class of beast was also bad, late currencies being barely maintained.

On Thursday, the second market day of the week, trade was practically confined to fat bulls and rough cattle. At the Foreign Cattle Market, Deptford, there was a good supply; trade, however, was of a slow nature throughout the week; nevertheless, on Wednesday, an advance of 1d. per 8 lb. was asked and obtained for States beasts. The total number on offer at both markets was 5,695, as against 4,730 during the preceding week, consisting of 1,010 British (increase 180) and 4,685 foreign (increase 785). These latter comprised 3,216 from the United States and 1,469 from Canada. The following were the top rates obtained per 8 lb. (sinking the offal):—80 to 90 stone Devons 4s. 4d. to 4s. 6d.; 90 to 95 stone Herefords 4s. 6d., ex. 4s. 8d.; 95 stone Runts 4s. to 4s. 6d.; 100 stone Shorthorns 3s. 10d. to 4s.; 95 stone Irish 4s. 2d.; 90 stone States 3s. 8d. to 3s. 11d.; 90 stone Canadians 3s. 5d. to 3s. 9d.; 90 stone fat cows 3s. 4d. to 3s. 6d.

The sheep trade at Islington on Monday and Thursday was of a very slow nature; on the former day last week's rates were barely maintained, and on the latter we notice a decline of 2d. per 8 lb. on wethers, and from 2d. to 4d. on ewes. Lambs were greatly in excess of the demand, sales being difficult to effect, even at a decline of 2d. per 8 lb. Scotch sheep met a fairly good enquiry at late rates. At Deptford a few Canadian sheep were quoted at from 4s. 2d. to 4s. 4d. The total number penned was 10,688, as against 7,090 during the previous week, the supply consisting of 10,030 British (increase 2,940) and 658 foreign. Best pens made, per 8 lb., as follows (offal given in):—7½ to 8 stone Downs 5s. 8d. to 5s. 10d.; 7 to 8 stone Scotch 5s. 10d. to 6s.; 9 stone Downs 5s. 6d. to 5s. 8d.; 10 stone Irish 5s. to 5s. 2d.; 10 stone Downs 5s. 4d. to 5s. 6d.; 10 stone Halfbreds 5s. 2d. to 5s. 4d.; 10 stone ewes 4s. 2d. to 4s. 4d.; 8 stone Canadians 4s. 2d. to 4s. 4d.; 5 stone fat Down lambs 6s. 4d. to 6s. 6d.; 6 stone Halfbred ditto 5s. 10d. to 6s.

Calves numbered 40, and met with a very slow trade at from 5s. 2d. to 5s. 4d. per 8 lb. (offal given in). No pigs on offer.

Trade in Scotland.

The number of fat cattle on offer this week has been nearly equal to last week. For the best descriptions previous prices were maintained, but secondary cattle suffered a fall of from 10s. to 15s. a head. Sheep have been shown in average numbers. These met a good inquiry at previous prices. Lambs a very large supply, and these met a decidedly worse market at from 2s. to 2s. 6d. a head reduction. A very small supply of fat calves, which made extreme price. Pigs scarce and dear.

Few store cattle on offer, for which there was very little demand; and to effect sales, moderate prices have to be taken. Rather more sheep than lambs, but owing to the high prices asked, sales were slow, and part left unsold at the finish. Milk cows in smaller numbers, and except for the very best class, these met a dull market.

Quotations.—Top price of cattle per live cwt., 37s. 6d.; current from 35s. to 36s. 6d.; mutton to 8½d. per lb.—John Swanstons, Limited.

Trade in Ireland.

The dry weather, having continued up to this, is causing much anxiety to graziers, as in many parts of the country the supply of water for stock is running very short and owners have, in places, to drive cattle long distances to give them a satisfying drink. The long spell of dry weather has, of course, made grass scarce also, and beasts are being sent into market before they are fit. There was an increase in the supply of cattle in Dublin Market on Thursday of 6/7 as compared with the previous week, but still the total number—nearly 3,000—is only about normal for this season of the year. For cattle of good finish trade opened with a brisk demand, and all suitable animals met with an early clearance at harder rates than the previous market. For good middling bullocks and heifers there was a quiet sale at about last day's rates, but coarse and inferior classes met with a worse sale at irregular prices. Prime beef sold as high as from 55s. to 57s. 6d. per cwt., but the average was from 52s. to 54s.; good second-class beef from 46s. to 50s.; and inferior from 44s. upwards. There were 243 more sheep offered for sale than on the previous Thursday, and, as both exporters and home buyers seemed very indifferent as to making purchases, trade was of a slow, dragging nature. For choice wethers of the best quality there was a steady sale at the extreme figures of last day, but for all other sorts prices were weaker, though there could not be said to be any quotable change. A large number of ewes and coarse sheep remained over unsold. The inquiry for lambs of good quality was brisk. Prime wether mutton sold at from 7d. to 7½d. per lb.; ewe, 6d. to 7d.; and coarse sheep, from 5d. per lb. Heavy hoggets made from 44s. to 56s. each, and small to medium ditto from 32s. to 42s. Lambs ranged from 20s. for small to 38s. each for large fat. Veal made a slow trade, the offerings being in excess of requirements. Some choice calves made from 7d. to 8d. per lb., others selling from 5d. per lb. upwards. Dairy cows were in better supply, and, with a good attendance of buyers, trade was more satisfactory than for some weeks past. The best springers went at from £18 up to £21 each, and other sorts at from £8 upwards. The store cattle trade was really only a nominal feature in the market, and little business was done. Ganly, Son, and Co. held a sale of about 300 store cattle in their auction paddocks, but no sales worth noting were made. The pig market was well supplied, and buyers attended in good force, but business opened very cautiously till later in the day, when things became brisk and the drop in prices of last week was recovered. Store pigs, however, were hard to sell. Best lightweight bacon pigs made from 52s. to 54s. per cwt., coarse from 32s. per cwt. upwards.

Trade in the West.

Trade keeps very quiet, as a rule, for most things, and this, too, in the face of only very moderate supplies of stores coming to hand. Perhaps nothing is more disappointing than the milch beast trade, prices having dropped considerably within the last few days, so much so that it requires an exceptionally good heifer or cow to bring £20; whilst plenty of really good milchers, both heifers and cows, are selling from £16 to £18 each, and not a very fast trade for either at the price, several promising young heifers with their first calves having, to our knowledge, been sold at between £15 and £16, to the no small disappointment of the sellers. Barreners are meeting an equally disappointing sale, from £12 to £13 each being almost the top price, even for really good serviceable grazers—animals, too, a fair way on to beef; whilst anything plain can be bought from £9 to £11 almost in any quantity, and even then without attracting the attention such favourable prices seem to justify.

Sheep, on the other hand, are gradually hardening in value; the late rains and the improved root crop prospects, coupled with the scarcity of sheep, which is being accentuated by so many some cases 1s. a head, sending up prices in some cases 1s. a head compared with Weyhill, Dorchester, and Blandford rates; at least, this is the opinion held by many competent judges, who, at the same time, incline to the belief that, with a favourable time for completing the harvest, sheep will yet be even dearer at the autumn sales.

Good class fat things continue to meet a fairly healthy demand, but trade is by no means fast, even for the best grades of either heifers or steers, which are bringing from about £16 up to £22 apiece (or from 10s. 6d. to 11s. per score, only anything of special quality making 11s. 6d., which is quite an outside figure); and, as for cows, we may quote 9s. 6d. to 10s. 3d. as the ruling price for the best. Calves are selling a trifle better than when the hot weather interfered so with sales; but prices have not regained their old level, the current rates now for best vealers are from 7½d. to 8½d., and 6½d. to 7d. for rough qualities. The demand for mutton keeps slow. The best wethers find buyers up to 55s. apiece, or 8d. to 8½d. per lb., if very choice; other wethers also finding a fair sale at from 7d. to 7½d.; ewes, which are mostly old sheep, 6d. to 6¾d.

Best lambs—small weights—make up to 10½d. in some few cases; but a more average rate is 9d. to 9½d. The markets are not overstocked; therefore, sellers content with a moderate price can depend upon getting purchasers. Pigs, too, are none too plentifully offered, and this gives a very firm tone to the trade, which is duly reflected in the advanced rates now being asked, small neat-handling porkers selling freely from 10s. to 10s. 6d.; and baconers from 9s. to 9s. 6d. even to 12 score weights, it being a long time since a better feeling pervaded the pig trade as a whole.

LONDON.

Islington, Thursday.—The number of beasts marketed consisted entirely of fat butchering cows and bulls from the Midland counties, which had an inactive session at last Monday's quotations. Fat cows, 3s 4d; fat bulls, 2s 10d to 3s 2d. Arrivals of sheep and lambs made an increase of 550, the supply including 200 Scotch. Trade for the latter was slow but firm, while English sheep of all descriptions prove difficult to vend, even at 2d to 4d per 8lb. reduction. Inferior, 4s 6d; seconds, 5s 4d; firsts, 6s. Lambs were fairly plentiful and in excess of requirements, business ruling exceedingly quiet at 4d to 6d decline. Inferior, 4s 8d; seconds, 5s 4d; firsts, 6s. Quotations: 7½st to 8st. Downs, 5s 8d to 5s 10d; 7st. to 8st. Scotch, 5s 10d to 6s; 9st. Downs, 5s 6d; 10st., 5s 4d; 10st. halfbreds, 5s 2d to 5s 4d; 10st. Down ewes, 4s.; 5st. fat Down lambs, 6s.; 6st. halfbreds, 5s 8d. Calves slow of sale, with prices 2d per 8lb. lower. Inferior, 2s 10d; seconds, 3s 8d; firsts, 5s 4d. Total marketed: Beasts, 20; sheep and lambs, 2,640; calves, 30.

COUNTRY.

Ashford, Tuesday.—Beef unchanged, but much present was not choice in quality. Top price, 4s 8d; inferior and cow beef, 4s per stone. Mutton sold well at 5s 2d to 5s 10d for Down wethers, and 4s 8d to 5s for Kents. Lambs made 6s 4d to 6s 7d, and veal 5s to 5s 6d. Roasting pigs made up to 4s 2d, and large hogs 4s.

Basingstoke, Wednesday. At Raynbird and Sons' sale-yard there was a fair attendance of buyers to meet a supply of 41 fat beasts, 60 calves, 381 fat sheep and lambs, 122 pigs, and 103 head of dairy and store cattle, for which the following prices were realised:—Devon steers made from £19 10s to £22 15s, shorthorns £18 15s, heifers £16 10s, cows £12 to £15 10s, polled cows £14, fat calves 70s to £5, small 20s to 50s, fat porkers 29s to 52s 6d, store pigs 12s to 20s, dairy cows £9 10s to £18 5s, fat Down wethers and ewes 50s to 58s, smaller 46s to 48s, old Down ewes 38s to 40s, small 34s to 38s, three months' old sucking lambs up to 35s, ditto South Downs 25s to 31s, cross-breds 28s to 34s. The show of fat beasts included some excellent Devon steers, also some good shorthorn steers and cows and a few useful Galloway steers and cows. The prime quality beasts were wanted, but for anything below the best there was a slow trade. Fat sheep and lambs were short in numbers but excellent as regards quality, for which a good trade ruled, with a clearance, and an advance most perceptible on prime heavy Down wethers and big lambs. Trade all round, both for dairy cows and store cattle, was slow, there being little demand. Fat calves met a clearance, last week's prices not being maintained. Fat porkers met a brisk trade at late prices. Ruling values:—Prime Devon beasts, 6¾d to 7d; ditto shorthorns, 6d to 6½d; bulls, cows, and inferior, 6d to 5½d per lb; best fat sheep, 8½d to 9d; secondary ditto, 7½d to 8d; old ewes and inferior, 6d to 6½d; three months old sucking lambs, 9d to 10d per lb; fat calves, 6½d to 8d per lb; fat porkers, 9s 6d to 11s per score.

Berwick, Saturday.—The cattle market was practically empty, only 10 bullocks being penned. No prices were quoted.

Birmingham, Thursday. — Small supply of beasts, sheep, and pigs; trade good for bacon pigs; trade slow for beast and sheep. Beef, 5½d to 6¾d per lb.; Herefords, 7d per lb.; mutton, 6½d to 8½d per lb.; lamb, 8d to 8¾d per lb.; bacon pigs, 10s per score; cutting pigs, 9s 9d to 9s 10d per score; sows, 7s 10d per score.

Bristol, Thursday.—Market quiet, and business done barely normal. Beef in moderate quantity, and values were unchanged. Trade in mutton and lamb, which were in good supply, was quiet at last week's prices. Pigs were in limited number and quotations advanced, baconers making 10s per score, and porkers 10s 6d.

Calne, Friday.—Present prices for prime pigs, in lots of not less than ten, on rail within 100 miles of Calne.

Prime Stores.	Thickness of fat in any part of Back.	Price per Sc. s.	d.
6sc. 10 lb. to 9 sc. 10 lb.	2½ in. and under	10	0
Under 10 sc.	Not exceeding 2½ in. ...	10	0
Under 11 sc. 10 lb.	2¾ in. ...	9	6
Under 12 sc.	3 in. ...	9	0

C. AND T. HARRIS AND CO., LTD.

Canterbury, Saturday. — Considerable offering of lambs; superior ewe lambs were worth 30s to 31s 6d.

Carlisle, Saturday.—The supply on the Sands was small, chiefly mediocre Irish heifers. Buyers were exceedingly scarce, and trade was practically at a standstill. small heifers, £6 10s to £8 10s; best sorts, £10 to £12 10s.

Chelmsford, Saturday.—Supplies were short. Fat pigs sold better. Store sheep and lambs met with a good trade, and milch cows and bullocks sold badly.

Chester, Thursday.—Good supplies of store and dairy cattle, but a slow trade, there being apparently more sellers than buyers. Prices were somewhat irregular, but on the whole remained much the same as last week. Milch cows made £16 to £20; calvers, £15 to £18; heifers, £8 to £15; barrens, £9 to £22; stirks, £6 to £10. Most of the sheep on offer were Irish whitefaced and horned, and price ranged from 17s to 35s each.

Doncaster, Saturday.—Very little supply of cattle, and thin attendance, farmers being busy harvesting. Trade ruled slow at late rates. Milch beasts, £16 to £22; bullocks, £12 to £17; heifers and drapes, £11 to £16; stirks, £6 to £8; young stores, £4 to £6 each. Plenty of sheep, but trade showed no improvement, and prices were unchanged. Lincolnshire ewes, 42s to 50s; lambs, 28s to 34s each.

Dorchester, Wednesday.—A very full market to-day and a good attendance. A good business, but little improvement in prices. Wether mutton made 7d to 8d per lb., and ewes 7d. Lambs made 32s to about 43s for these Show. Fat calves ruled firm, and made £4 to £5 10s, and smaller 50s to 76s; rearers, 19s to 36s. The pig trade was good for both baconers and porkers, at 9s 6d to 10s 5d per score; sows, £4 5s to £5 17s.

Dorchester, Saturday.—Very good deliveries came to hand at the cattle market to-day, at which sales were held by Messrs. Duke and Son and by Messrs. Symonds and Sampson. Milch beasts met an improved demand, though prices still keep low, as they do for barreners, which are making a very poor price, seeing the good keep prospects there are. A general run for milch beasts is from £15 to £17 5s, and others from £10 10s to £14, barreners ranging £16 to £21 per pair. Stock bulls made £9 5s to £11 10s. The fat was of a uniformly good character, both steers and heifers, the former selling fairly well from £15 5s

to £21, and steers £19 5s to £20 5s (or 11s per score); fat cows, £11 to £14 (or 9s 6d to 10s 6d). In mutton the range for ewes was from 41s to 52s each (or 7d to 7½d); wethers, 47s 6d to 50s (or 8d to 8¼d). Cross-bred lambs made 28s to 36s, and horns 34s 6d to 36s (or 9½d to 10¼d

Chichester, Wednesday. — Fat cattle, in sympathy with other markets, met a dragging trade, except for the very best quality. Best dairy cows and heifers continued in good demand, and the advance in prices was well maintained. Stock at the market: Cattle, 417; sheep, 5,328; pigs, 491; calves, 131; horses, 12; total stock, 6,449.

Dublin, Thursday.- Numbers in market: Beasts, 2,966, increase 537; sheep, 9,142, increase 243; calves, 61, increase 2. Slow, heavy trade for all descriptions of cattle, with prices for best qualities moving in favour of buyers, and rough sorts still more difficult to sell. Quieter trade for sheep and lambs at barely late rates, some rough and inferior lots remaining unsold. Cattle, live weight (best), 29s to 32s per cwt; secondary and inferior sorts, 26s to 28s per cwt. Mutton, dead weight, 5¾d to 7¼d per lb.—GANLY SONS AND CO.
for the best).

Edinburgh, Wednesday.—There were larger supplies of sheep, but few cattle, and trade was slow. Polled bullocks, to £13; halfbred sheep, 35s; halfbred wedder lambs, 24s to 28s; Cheviot wedder lambs, to £22; best shorthorn cows, to £23; secondary, £16 to £21 per head.

Glasgow, Wednesday. — Trade fair and supplies an average. Cattle fetched rather more money for top quality. Top Scotch, 62s to 66s; secondary, 58s to 60s; best Irish, 58s to 60s per cwt. Canadians were generally dearer, and sold up to 58s per cwt.; secondary, 54s to 56s. Home sheep steady; best, 8¼d to 8¾d; best lambs, 8¼d to 9d per lb.

Exeter, Friday.—Not so many fat beasts on offer, and rather better inquiry for best mutton. Heifers and steers, 11s to 11s 3d; cows, 10s. Quite as large a market for sheep as last week, and late prices maintained; wethers, 8d; ewes, 6d. Breeding ewes were much lower in price, and a good many were unsold; top prices, 35s to 40s; fat lambs, 10d. Calves, 7½d to 8d.

Gloucester, Saturday.—Messrs. Bruton, Knowles, and Co. report their sale as follows:—Eighty head of cows and calves and in-calvers, which met a steady market, all being disposed of, cows making up to £22 10s. A short supply of store cattle, with very little demand for yearlings, stronger cattle making fair prices.

Ipswich, Tuesday.—Messrs. Robert Bond and Sons report a good supply of fat cattle for the time of year of superior quality. Trade was firm, with a slight improvement in values. A few lots of grazing cattle were penned, but were not much wanted. There was a good entry of cows and heifers; trade was slow, except for a few of the best animals. Calves in better demand at rather more money; weaners 56s to 36s, fat to £5 12s 6d. Fat sheep were penned in excellent numbers, and met a good trade, prices having an upward tendency. Fat lambs also were in good supply, and met a firm trade. A short supply of fat swine, which met a sharp trade. Stores in good demand. Numbers at sales and market: 440 cattle, 1,861 sheep, and 807 swine.

Hereford, Wednesday.—This was the August fair for store ewes. Sheep, being short in the country, trade was firm. Shropshire ewes ranged from 42s to 46s apiece, and crossbreds from 30s to 40s. A small drove of Shropshire rams sold at 5 guineas a piece all round. Of other stock, both fat and store, there was a smaller supply even than last week, and the demand being fairly good, trade was, on the whole, rather firmer. Bullocks and maiden heifers made 6½d to 7d per lb.; fat cows dragging at 5d to 5½d per lb. Fat sheep were especially short in supply. Wethers and yearlings consequently sold dearer at 7½d to 8d, fat ewes about 6d. Fat lambs were in demand, and a fair supply were speedily cleared at 8d to 8¾d per lb., store lambs also selling well. Fat calves, a moderate supply, were not so keenly sought, and did not make more than 7d. A few store calves went fairly well. Pigs were a larger supply. Trade was firm for porks at 5d to 6d for small ones. Little stores met with a firm trade, although at low prices. Store cattle very little trade. There was practically no business in the horse fair, the harvest requiring all useful animals.

Leicester, Saturday.—Larger consignments of home-bred stock. Buyers and dealers were moderately represented, and in spite of the improvement in the pastures trade ruled very flat at fully 10s per head lower. Good milch cows, £17 and £19; secondary, £14 to £16; heifers, £10 to £12; Irish bullocks, £14 to £15; Welsh cattle, £10 to £12 10s; young stock, £5 to £8; and calves, 15s to 35s each.

Lincoln, Friday.—Fair display of horned stock, which met with a moderate trade. Milch cows sold at late rate. Sheep met a slow trade, lambs making 30s to 34s each.

Lynn, Tuesday.—Average show of fat beasts, 7s to 7s 3d per stone. Scarcely any stores, £6 to £10 each. Fat sheep average show, 8s 9d to 9s per stone; stores 38s to 44s each. Store lambs, 25s to 30s; fat lambs, 25s to 40s each.

Manchester, Friday.—Beef: Firsts, 5½d; seconds, 4¾d; to 6d; thirds, 3¾d to 4d. Mutton: Firsts, 7¼d; second class, 6¼d to 6¾d; thirds, 5¼d to 5¾d. Veal: Firsts, 6d; seconds, 5d to 5½d; thirds, 4d to 4¼d per lb. Lamb: Firsts, 7¼d; seconds, 6¾d per lb.

Norwich, Saturday.—Holiday tone prevailed throughout the market. Fat beasts were in sufficient supply to meet home demands, and trade was quiet at 7s 6d to 8s per stone. The few lots of store animals offered were chiefly Irish, and trade was dull at prices ranging from £5 to £17 per head. Short supply of lambs, at 28s to 35s per head; but very few lots were disposed of. Fair demand for black-faced ewes, which were in good supply, prices being 55s to 64s per head. Fat sheep met with good trade at 9s 6d to 10s per stone, and fat pigs made 6s 3d to 6s 9d per stone. Store pigs and calves met with a good trade.

Nottingham, Saturday.—Short supply of stock owing to harvest operations. A better trade was met with. In-calf cows, £15 to £23 each; in-calf heifers, £14 to £17 10s; calves, £1 to 50s per head.

Preston, Wednesday. An excellent show of sheep, and trade was fairly brisk. In consequence of the local holidays the supply of beef was smaller than usual, and trade was rather slow. Calves were difficult to sell. Cows and bulls made 5d to 5½d, with a few at 5¾d; heifers and bullocks, 6d to 6½d, and in odd cases 6¾d; lambs, 8¼d to 8¾d; hoggs, 8d to 8½d; ewes, 5½d to 6¼d; tups, 5d to 5¾d; calves, 5½d to 7d per lb. Numbers at market: Cattle, 189; sheep, 2,498; calves, 120.

Retford, Saturday.—There was not much stock shown. Milch cows, £18 to £20; steers, £10 to £11; and calves, 30s to 50s each.

Romford, Wednesday. — Short supply of fat beasts; trade bad. Best animals, 4s 2d to 4s 4d; middlings, 3s 10d to 4s per stone. Calves in average supply; trade about the same at 4s 10d to 5s per stone. Sheep in short supply; trade slower. Best sheep, 5s 4d to 5s 6d; middlings, 5s to 5s 2d per stone. Ewes in average supply; trade about the same, at 4s 2d to 4s 4d per stone. Short supply of lambs, trade unaltered, at 6s 4d to 6s 6d per stone. A few store beasts on offer; very slow demand. Short supply of pigs; trade slow.

Thame, Wednesday. It is evident that the popularity of Thame market is steadily on the increase. It is remarkable where all the stock is distributed week after week. There was by far the best attendance of buyers for this season. Purchasers attended from Aylesbury, Oxford, Wycombe, Maidenhead, Marlow, Henley, Risborough, Haddenham, Newbury, Didcot, Headington, Wheatley, and surrounding villages. There was a grand show of cattle and an excellent selling trade for the best quality. Fat cows were slow and difficult to dispose of. The sheep pens were well filled; a swift trade ruled throughout, and a clearance effected. Veal, bacon, and pork moved off quickly. Messrs. Bond and Burrows' sale comprised 141 fat beasts, 382 fat and store sheep, 71 fat and weaning calves, and 39 fat pigs. Fat oxen made from £17 to £20 12s 6d, fat heifers £15 to £20 17s 6d, fat wethers 48s to 65s, fat ewes 40s to 67s, fat lambs 30s to 46s 6d, fat cattle £3 to £5, weaning cow calves 30s to 56s, bull calves 10s to 50s, bacon hogs £3 15s to £5 10s, porkets 28s to 45s.

Truro, Wednesday.—Fat bullocks, 54s to 58s per cwt.; barreners and store bullocks, 40s to 45s; cows and calves, £11 to £15; rearing calves, 26s to 40s each; wethers, 7d to 7¾d per lb.; ewes, 5d to 5¼d; lambs, 7¼d to 8d; large and small pigs and suckers, 10s to 35s each. Beef, 6d to 8d per lb.; mutton, 6d to 8d; lamb, 8d to 9d; veal, 6d to 8d; pork, 6d to 8d; bacon (uncured), 6d to 7¼d; ditto (cure), 7d to 9d; pork (carcases), 4½d to 5½d. Number in cattle market: Bullocks, 262; calves, 63; sheep, 568; pigs, 113; one dog; live ducks, 18.

Wolverhampton, Wednesday.—Moderate supply; fair trade. Quotations: Best Herefords, 6½d to 6¾d; shorthorn, 6d to 6½d; cows, 5d to 6d; calves, 6d to 7d per lb.; sheep, 6d to 8¼d; lambs, 8d to 8½d; bacon pigs, 9s 6d to 10s; porkers, 9s 6d to 10s; sows, 7s to 7s 6d per score.

Worksop, Wednesday.—Small show of beef, and very slow trade. Best qualities, 6s 9d to 7s 3d; secondary, 6s to 7s per stone. Small show of sheep, but more than last week, and trade much better. Best Southdown wethers and cross-breds, 8d to 9d; ewes, 6d to 7d; lamb, 9½d per lb.

Yeovil, Friday.—Milkers and in-calvers in good demand, best quality heifers and cows and calves selling at from £18 10s to £22 10s; second quality ditto, £16 to £17 10s; in-calvers, £16 10s to £18; barreners, £13 10s to £15 10s; two-year-old heifers, £10 to £11 10s; yearling ditto, £7 10s to £9 15s; yearling steers, £7 10s to £9 15s; two-year-olds, £9 15s to £12 5s; ewe sheep, 42s 6d to 48s; wethers, 45s to 58s; lambs, 27s 6d to 35s; Hampshire Down rams, 3½ guineas to 5½ guineas.

York, Thursday.—The market was of a holiday character. The attendance of buyers was small, and farmers were too busy harvesting to be present. There were very few English bullocks, and just a fair show of cows. Trade was described as poor. Best cows made £17 to £19; secondary, £14 to £16 10s; Irish yearlings, £5 to £6 10s; two-year-olds, £8 to £10. For the season of the year there was a very good display of shearlings and lambs. Best twice-crossed shearlings realised 50s, secondary sorts were in demand at 42s to 46s; Masham shearlings, 38s to 44s; North Country lambs, 25s to 32s 6d; twice-crossed lambs, 25s to 30s; South Country lamb made up to 34s each.

FOREIGN.

Yorkhill, Monday. — At the usual weekly sales of Canadian cattle held to-day at the Foreign Cattle Wharf small supplies were on offer, only 383 head being penned in the lairages. They were all from Montreal, and were delivered in good order and condition. There was a large attendance of buyers, and business, owing to the scarcity of cattle, was decidedly firmer than of late, and advances ranging from 2s to 3s per cwt. deadweight were noted on the day's transactions as against last week's rates. Bullocks of handy sizes and weights from 56s to 58s per cwt. deadweight, and old rough plain sorts realising from 54s to 56s per cwt. Prime bulls made up to 48s per cwt. deadweight, and heavier qualities sold down to 44s per cwt.

BUTTER

(Prices at per lb., except where otherwise stated.)

Wednesday.—Barnsley: 1s 2d to 1s 3d. Boston: 1s 1d to 1s 2d. Colne: 1s 3½d. Dorchester: 11d to 1s 2d. Goole: 1s 1d to 1s 2d. Hereford: 1s 1d to 1s 3d. Holsworthy: 1s 2d. Keighley: 1s 2d to 1s 3d. Kirbymoorside: 1s to 1s 1d. Knaresborough: 1s 8d to 1s 10d per 24 oz roll. Louth: 1s 1d. Market Drayton: 1s 2d. Market Weighton: 11d to 1s. Newton Abbot: 1s 5d to 1s 6d. Northallerton: 1s 7d to 1s 8d per roll of 24 oz. Stockton: 1s 1d to 1s 3d. Truro: 1s 1d to 1s 2d. Uttoxeter: 1s 1d to 1s 3d. Worksop: 1s 2d to 1s 3d.

Thursday.—Axminster: 10d to 1s. Birmingham: 1s 3d to 1s 4d. Brigg: 1s 2d to 1s 3d. Driffield: 11d to 1s. Devizes: 1s 3d to 1s 4d. Kidderminster: 1s 2d. Northtawton: 1s 2d. Penistone: 1s 2d. Plymouth: 1s 4d to 1s 5d. Ripon: 1s 8d to 1s 10d per 24 oz roll. Scarborough: 1s 3d. Wellington: 1s 1d to 1s 3d. Wetherby: 1s 3d to 1s 4d.

Friday.—Altrincham, 1s 2d to 1s 3d. Barnstaple: 1s 2d to 1s 3d. Chester: 1s 1d to 1s 2d. Congleton: 1s 2d. Crewe: 1s 2d. Camelford: 1s 1d to 1s 2d. Derby: 1s 3d to 1s 4d. Helmsley: 1s to 1s 1d. Knutsford: 1s 2d to 1s 3d. Leyburn: 1s 10d to 2s per 24 ounce roll. Lincoln: 1s 2d to 1s 3d. Lostwithiel: 1s 2d. Macclesfield: 1s 1d to 1s 2d. Nantwich: 1s 2d. Northwich: 1s 2d. Otley: 1s 10d per 24 ounce roll. Redruth: 1s. Runcorn: 1s 2d. St. Austell: 1s 4d to 1s 5d. Stockport: 1s to 1s 2d. Tavistock: 1s 3d to 1s 5d. Totnes: 1s 4d to 1s 5d.

Saturday.—Appleby: 1s to 1s 3d. Berwick: 1s to 1s 2d. Bridgnorth: 1s 1d to 1s 2d. Carlisle: 1s to 1s 2d. Doncaster: 1s 1d to 1s 2d. Grantham: 1s 2d to 1s 3d. Howden: 1s 1d to 1s 3d. Lancaster: 1s 2d to 1s 2½d. Malton: 1s 2d. Pontefract: 1s 2d. Retford: 1s 2d to 1s 3d. Richmond (Yorks): 1s 3d. Shrewsbury: 1s 1d to 1s 2d. Skipton: 1s 1d to 1s 2d. Stokesley: 1s 1d to 1s 2d. Whitby: 1s 4d. Worcester: 10d to 1s 3d. York: 1s 2d to 1s 3d.

EGGS.

(Number is 1s., except where otherwise stated.)

Thursday.—Axminster: 11d to 1s per dozen. Birmingham: 9 to 11. Brigg: 12 and 13. Driffield: 14 and 15. Devizes: 14 to 16. Evesham: 11d to 1s per dozen. Kidderminster: 10. Northtawton: 12. Penistone: 12. Plymouth: 12. Ripon: 9 and 10. Scarborough: 10. Wellington: 11 and 12. Wetherby: 1 0and 11.

Friday. — Altrincham: 9. Barnstaple: 12 to 14. Camelford: 14. Chester: 10 and 11. Crewe: 10 and 11. Congleton: 10 and 11. Derby: 11. Helmsley: 12. Knutsford: 10 and 11. Leyburn: 11 and 12. Lincoln: 12 and 13. Lostwithiel: 16. Macclesfield: 12. Nantwich: 12. Northwich: 10. Otley: 11 and 12. Redruth: 11d per dozen. Runcorn: 9. St. Austell: 12. Stockport: 9. Tavistock: 10 and 11. Totnes: 12 to 14 per dozen.

Saturday. — Appleby: 12 and 13. Berwick: 12 to 14. Bridgnorth: 12. Carlisle: 12 to 14 per dozen. Doncaster: 12. Grantham: 12 and 13. Howden: 12. Lancaster: 9 and 10. Malton: 12 and 13. Pontefract: 11. Retford: 12 and 13. Richmond: 12 to 14 per dozen. Shrewsbury: 9 and 10. Skipton: 12. Stokesley: 12 to 14 per dozen. Whitby: 9. Worcester: 10. York: 12.

CHEESE.

Glasgow, Wednesday. The edge of the market has gone off, and sellers are more disposed to [illegible]. The trend is still in the direction of [illegible] and old dessert prices are not asked for [illegible] from 50s to 56s per cwt., and Cheddars from 62s to 57s.

Newport, Wednesday. About eight [illegible] average attendance, and a good demand for Caerphillies, 48s to 64s per cwt; fancy dities, 56s; truckles, 52s to 58s; doubles, 54s to 56s.

FEEDING STUFFS.

Hull, Tuesday. Linseed has ruled dull, and [illegible] throughout the week. Rosario Plate spot [illegible], afloat and August-September 38s to 37s 9d, September-October 38s 3d. Cottonseed: With a slow demand and large quantity of Egyptian seed on the way there has been a decline in this article to £5 5s 9d spot, prompt and August, £15 11s 3d accepted September-October [illegible] sellers new at £5 16s 3d to January. A few sales Bombay transpired at £4 13s 9d passage, £4 14s 6d to £4 14s August-September, and £4 15s September-October, at which latter a little new crop January-February was sold. Linseed oil: 16s 9d spot, 16s 10½d August, 17s 3 September-December. Cottonseed oil: 16s 1½d spot, 16s 1½d November-April. Linseed cakes: A quiet trade at 2s 6d per ton advance. Cotton cakes: firm, unchanged.—KEIGHLEY MAXSTED AND CO.

London, Thursday.—Linseed: The market opened very quiet this week, but subsequently firmed up owing to scarcity of sellers and a better consumptive demand. Closing values are:—Calcutta-London, spot 39s 6d, and July-August 39s 6d, August-September 39s 9d, September-October 40s. La Plata, July-August 30s 6d. Hull: Better demand and higher prices. La Plata spot 38s 9d, passage 38s 9d, August-September 38s 9d, September-October 39s. To the Continent: Bombay, July-August 41s 9d, August-September 42s. Calcutta, July-August 40s 3d, September-October 40s 6d. La Plata, on passage 38s 6d, July-August 38s 6d. Rapeseed very dull, scarcely any business possible in Indian seeds owing to Danubian competition. Brown Cawnpore, August-September 35s, brown Calcutta, August-September, afloat 33s 9d. To the Continent, yellow Guzerat 40s. Yellow Cawnpore 39s, brown Cawnpore 35s, brown Calcutta 34s. Feruzepore 35s. Ravison to Hull Azoff Black Sea September-October 26s. Cottonseed: The market is quiet and little business passing. New crop sellers reserved. Linseed oil has fluctuated somewhat during the week, values at the close being higher in all positions. We quote spot and month in pipes £18, barrels £18 5s, September-December £18-12s 6d, January-April £18 17s 6d. Hull naked spot, £17 2s 6d, September-December £17 10s, January-April £17 15s.—THE PRODUCE BROKERS' CO., LTD.

Mark Lane, Monday. Linseed cakes: The present ruling high prices continue to check both consumptive and speculative demand, but with dearer seed and the absence of lower quotations, both from America and Russia, values are fully as dear. Russian remain best value at £7 6s 3d to £7 7s 6d in mats, and £7 8s 9d to £7 10s in bags. American may still be bought at £7 cost, freight, and insurance. East India seed pures are quoted at £7 10s ex ship to arrive. London made, although not in active demand, are held for rather more money, Crushers asking £7 17s 6d to £8. Cotton cakes: Stocks of Egyptian are not large, but with scarcely any demand prices are with difficulty maintained at £4 12s 6d to £4 13s 9d. English move off quietly at £4 13s 9d to £4 15s, and Bombays at £4. Decorticated London made is in fair request at £6 15s for cake and meal, and £5 5s for special digestive meal, with American "Open Head" brand selling at £6 17s 6d, "Ley" brand at £6 12s 6d, and meal at £6 12s 6d. Rape cakes: Quiet: East India £4 15s; Ravison, £4 10s. Maize germ meal: White American for [illegible] shipment is still quoted at £5 10s c.i.f., without attracting much attention, but English makes meet a steady sale at £5 7s 6d to £5 8s 9d. Maize gluten meal offers for autumn delivery at £5 15s per ton. Rice meal: Landed lots of Rangoon make £4 11s 3d to £4 12s 6d, but there second-hand sellers of steamer parcels [illegible] at £4 10s ex ship terms. Broken Rangoon rice is cheaply offered at £4 15s per ton. Locust beans are relatively good value at £5 5s per ton for old, and £5 10s per ton for kibbled. Nitrate of soda is dull and without change at £10 17s 6d per ton ex quay.

Agricultural Returns.

The Board of Agriculture have recently published a Yellow Book dealing with the agricultural statistics of 1904. It contains returns relating to the acreage and produce of crops and number of live stock in Great Britain. A great deal of this information has already been published in various forms from time to time, but in this volume the various fragmentary documents have been collected. It is often asked how the figures upon which our agricultural returns are based are obtained, so that it may be well to say the statistics of the acreage of crops and number of live stock in Great Britain in 1904 were compiled from 512,639 separate schedules, representing the holdings of occupiers of more than one acre of land. The individual returns thus collected numbered in England 372,450, in Wales 60,615, and in Scotland 79,574, while supplementary returns as regards live stock only were received from 9,676 owners of stock who either occupied no land at all, or whose holdings did not exceed one acre. Only in the case of 3 per cent. was the information refused and estimates resorted to.

The most interesting portion of the present volume deals with agriculture in other countries. As in previous reports, an endeavour has been made to bring under convenient review with the statistical position of British agriculture the more or less parallel conditions of agriculture abroad. The latest available official information has been utilised for this purpose, even at the risk of some delay in the issue of the final volume, but still in some cases statistics were only obtainable down to 1903, and in others 1902 to 1900.

Imperfect as the official data nevertheless are, it is not without interest to note that the tables now supplied suggest that, without taking account of the cultivation pursued in countries whence no official records have been furnished, some forty separate national units of wheat-growing report, at the most recent available date, a total acreage of about 219,000,000 acres under this cereal. Grouping some of the units thus separately accounted for, as it is permissible to do, under three national flags, the Russian Empire, with its Asiatic possessions, the British Empire, with its Indian territories and colonial possessions, and the broad areas of the United States of America, furnish quite two-thirds of the aggregate wheat area just quoted. Their relative magnitude in this respect, and the estimated produce roughly credited to each for the latest year, may be not unfairly shown as under:—

States.	Area under Wheat. Acres.	Estimated Production. Quarters.	Yield per Acre. Bushels.
Russian Empire ...	57,000,000	77,000,000	10 8
United States ...	44,000,000	67,000,000	12 1
British Empire ...	40,000,000	69,000,090	13:8

It is right to remember than in constructing such a table at this moment the American quota is put relatively somewhat low owing to the unfavourable character of the latest harvest, and the British Empire's yield, owing to the large Indian crop of 1904, is probably unduly high. But, whatever allowance might have to be made were average areas and average crops to be measured, there is no State that comes near contesting the position of the three above enumerated as large wheat producers. The low average yield per acre of territories so vast and varied is an incident to be expected, for the means above given include in each group results realised under very different conditions. Nowhere for an area of equal size is so high a yield obtained as in Great Britain herself, with a return of 31 bushels per acre over the last ten years. But in an Imperial average we have to count with the meagre yield of our Australian colonies and some parts of India where the wheat production may fall to 7 bushels to the acre, while similar low estimates for Russian Siberia and for the Southern States of the American Union leave their mark on the average in each case. With narrower areas higher average yields are obtainable, and the next largest group of wheat-growing States may be said to be formed as under, crediting to France—as in the case of Russia and of the British Empire—her non-European wheatfields in Algeria.

States.	Area under Wheat. Acres.	Estimated production. Quarters.	Yield per acre. Bushels.
France, with Algeria.....	19,000,000	39,000,000	16
Italy.....	12,700,000	18,000,000	11
Austria-Hungary.....	11,800,000	28,000,000	19
Argentina	10,700,000	16,000,000	12
Spain	9 0 0,000	17,000,000	15
Germany.....	4,700,000	17,000,000	30
Roumania	4,300,000	6,500,000	12

Practically these seven countries among them grow 72,000,000 acres, which is just half as large a surface as the 141,000,000 acres of the three great States quoted above, but they supply about two-thirds of the crop furnished by Russia, the United States, and our own Empire jointly. The collective wheat area of other minor European States is under 4,000,000 acres, of which Bulgaria and Servia probably account for three-fourths, while to include in this analysis the officially recorded wheat-acreage of Uruguay in the West, and of Japan in the East, would not quite add another 2,000,000 acres to the record given above.

If a like survey were extended to the areas occupied by the rye crop, which supplies the bread-corn of so large a share of Eastern Europe, it may be observed that the Russian Empire accounts for 75,000,000 acres, and Germany for over 15,000,000 acres, or together nearly 82 per cent. of the aggregate of 110,000,000 acres shown in the comparative table appended. With such a crop as maize, if a similar table were constructed from the official records, a still more striking predominance in a single country would appear, for out of a total, in these returns, of something like 128,000,000 acres, the United States now grow more than 92,000,000 acres, no other country coming anywhere within range of the American aggregate. Hungary, with maize.,

The World's Livestock.

The Board of Agriculture has just issued its volume of statistics for 1904, and at the conclusion of the interesting report of the secretary thereon, attention is drawn to the present condition of foreign live stock. After giving statistics of the number of cattle and sheep per 1,000 persons and 1,000 acres of surface in Russia, in Europe, Germany, the United Kingdom, France, and Austria, the Secretary says:—

"Thus stated, the numbers of the live stock show that the United Kingdom owns fewer cattle, but very many more sheep in proportion to population, than its larger European neighbours. Moreover, notwithstanding the rare use of cattle here for agricultural labour when compared with the customary practice of other European States, the herds we maintain by our agricultural system show a greater density per acre of surface than is displayed even in Germany, where cattle have so lately been largely augmented as the stocks of sheep have declined.

The character of the surface is no doubt a governing factor in determining what stock can be profitably kept, and, if the comparisons were extended to some countries of minor area, a considerably larger head of cattle would be found to be maintained per 1,000 acres of surface than we can show here. In Denmark, Holland, and Belgium, where the keeping of sheep is a very insignificant feature of the farming practice, the number of cattle per 1,000 acres thus ranges from 194 to 236. If a comparison be made with population, the numbers seem small in the latter two States, whereas in Denmark they rise to a proportion not elsewhere to be found in Europe, giving a ratio of 733 head of cattle to every 1,000 persons. So far as the herds of the five leading European countries are concerned, there would appear to have been a general advance in numbers. The combined herds of Russia, Germany, France, Austria, and the United Kingdom are greater by nearly 22 per cent. than they were some thirty years ago. If the older figures may be trusted, the percentage rise in Austria was the greatest, or something like 28 per cent., as against 20 per cent. in France and Germany, and 13 per cent. in our own country. But except in our own case, the gain in cattle has been attended by a large shrinkage in the flocks of sheep maintained.

The changes in the position of the flocks of Continental Europe are indeed the most remarkable of the agricultural movements of recent years. At about 1873, from which date fairly continuous annual statistics are available, France had nearly 26,000,000 sheep, and Germany 25,000,000; the latest statistics credit these countries with but 18,000,000 in the first case, and fewer than 10,000,000 head in the second. In Germany the reduction of sheep appears to have been continuous, judging from the five isolated years of enumeration in 1873, 1883, 1892, 1897, and 1900. In France nearly 4,500,000 of the loss of sheep occurred between 1873 and 1882. The level of the French flocks was then maintained up to 1899, from which date a further fall in numbers, amounting to another 3,500,000, has been recorded, while the experience of these two great countries is repeated elsewhere in many States of the Old World.

The Austrian flocks are thus only half what they were, and those of Hungary, when last enumerated—some ten years ago—had up to that time dropped from 15,000,000 to 8,000,000 head. No such decline in the flocks in the United Kingdom has to be set against the development in our stock of cattle, and the fall that has to be noted here is in no way comparable to the losses elsewhere in Europe. In 1873 we had 34,000,000 sheep enumerated, as against 29,000,000 in 1904, or a percentage decline of more than 15, while the flocks of Germany are fewer by 60 per cent., and those of France by more than 30 per cent.

Fire at Balls Bridge, Dublin.

An alarming fire occurred on Saturday on the grounds of the Royal Dublin Society, at Balls Bridge, and resulted in the destruction of an important portion of the permanent buildings. About eleven o'clock a labourer saw a large volume of smoke rising from the stalls in the paddock, and the full strength of the brigade at the Pembroke Fire Station, which stands in the north corner of the show ground, quickly turned out; but, under the circumstances, all they could hope to accomplish was to confine the fire to the Paddock Hall and the connected buildings. The spot where the outbreak occurred is at the angle of the paddock and Paddock Hall, an "L" shaped range of buildings, about 600 feet in length, and containing boxes and stalls for nearly one hundred and twenty horses.

A strong south-west gale was blowing, and the wind swept the flames through the wooden stalls with irresistible force. In an incredibly short time the ornamental iron girders began to buckle and fall, dragging with them the iron pillars on which they rested. The handsome glass roofs, with their decorated louvre ventilators, crashed among the débris of the stalls, and finally the two buildings were a mass of twisted girders, broken glass, and slates, and bulged and blistered brick walls. The firemen bent all their efforts to the task of preventing the spread of the flames, and in this they were happily successful.

No Interference with the Show.

The Royal Dublin Society's officials, with characteristic energy, have adopted every measure in their power to make good the damage, and yesterday and to-day upwards of 200 men have been working on the temporary sheds and stalls to get them ready in time for to-morrow's show.

We are officially informed that the fire was fortunately localised, and the damage done is inconsiderable. Arrangements have been made whereby every horse entered will be suitably accommodated, and the show will go on as usual.

ADVERTISEMENTS RECEIVED TOO LATE FOR CLASSIFICATION.

WALTON HALL, WARRINGTON.

ON FRIDAY, 8th SEPTEMBER, 1905, there will be one of the most IMPORTANT SALES of PEDIGREE HACKNEYS and PONIES from the extensive Studs owned by Sir Gilbert Greenall, Bart., that has ever been offered to the public by auction, comprising
20 BROOD MARES AND FOALS,
11 THREE YEAR OLD GELDINGS,
8 YEARLING COLTS,
7 YEARLING FILLIES,
5 TWO YEAR OLD FILLIES.

The Hackney Brood Mares are covered by Goldfinder A.I. (1,291) and Copper King (7,764). The Pony Mares mostly by Sir Horace (1,017).
On View, 3rd and 4th September.
Luncheon at 1 for Sale at One o'clock.

Catalogues of W. BAINBRIDGE, Walton House, Warrington.

YEOVIL AGRICULTURAL SOCIETY.
At HENDFORD,
SEPTEMBER 14th, 1905.
Entries close August 31st; post entries September 6th.
E. H. OAKLEY, Secretary,
Kingston, Yeovil.

NORTH TYNE & REDESDALE AGRICULTURAL SOCIETY.
At BELLINGHAM,
SEPTEMBER 14th, 1905.
Entries close September 2nd.
E. DIXON, Secretary,
Bellingham, Northumberland.

WAVENEY VALLEY AGRICULTURAL ASSOCIATION,
At HARLESTON,
SEPTEMBER 14th, 1905.
Entries close August 23rd.
CHARLES DEVEREAUX, Secretary,
Weybread, Harleston.

KINGTON HORSE SHOW,
At KINGTON,
SEPTEMBER 19th, 1905.
Entries close September 8th.
G. W. S. HART, Secretary,
Kington.

HERIOT-WATT COLLEGE, EDINBURGH.
FERMENTATION AND INDUSTRIAL BACTERIOLOGY.
A Laboratory has been opened under the superintendence of Dr. Emil Westergaard (formerly assistant to Professor Alfred Jorgensen, Copenhagen) for instruction in the Bacteriology and Mycology of Agriculture, Dairying, Fermentation, Tanning, Preserving, Starch, and Sugar Making.
For details of Classes, Fees, &c., please apply to the Principal at the College.
PETER MACNAUGHTON, S.S.C., Clerk.
20, York Place, Edinburgh.
28th July, 1905.

POWELL BROS. & WHITAKER,
WREXHAM.
ROYAL SOCIETY OF ENGLAND'S
FIRST PRIZE
POTATO DIGGER.

Live Stock Record.

DEVON BULLS FOR CROSSING.

Although the Rubies of the Western Hills have never been utilised much in their native country for crossing purposes, they have rendered invaluable service in that way both on the ranch herds of the United States and on a large number of cattle in the Australian colonies. This fact has recently become important owing to the confident opinion expressed by Dr. French, who recently paid a visit to this kingdom from South America, that Devon bulls ought to be in great demand throughout that extensive cattle-improving region of the habitable globe for infusing improve quality into the teeming native herds so badly requiring it. Of course, every good judge of cattle, at all well acquainted with this time-honoured, old-established breed, has always been perfectly well aware that prime quality is one of the chiefest claims that breed has for appreciation anywhere.

In England, the smallness of the animals, ever since the times of the Quartleys, has been the sole cause why they have not had greater extension. Mr. Coke, afterwards Earl of Leicester, introduced Devons into Norfolk, and for forty-two years, according to the Rev. H. Berry, endeavoured in vain to induce his tenantry to keep dairy cows and graziers that were little and good instead of coarser stock. Fortunately, in more modern times, the Red-Polled, another small breed of good quality has met with a better fate in Norfolk. British-renting farmers have always, however, preferred larger animals to small ones, unless for short-herbage pastures, the true reason for the Shorthorn's wide-spread popularity.

The same regard for size and substance has caused Shorthorn and Hereford bulls to be so extensively used both on the prairie herds of the American northern hemisphere and the native ones of the Argentine Republic. But Dr. French regards the Devon cross as of "unsurpassed excellence"; and it is to be presumed that he has considerable personal experience or facts gathered from personal observation to justify so superlative a term. And, indeed, there are facts to be gathered from the cattle literature of the United States calculated to prove that Dr. French's high appreciation of Devon crossing has been quite as strongly held in Texas and elsewhere. Devons were imported into the United States early in the nineteenth century. In 1817, Mr. Patterson, of Maryland, and in 1819, the Hon. Rufus King, had selections sent out to them from Mr. Coke's Holkham herd. Bulls from Mr. Patterson's herd were very extensively used in Massachusetts, and, according to "Allen's American Cattle," a great improvement in the herds of the New England States was the result.

Important testimony as to the high value of Devon bulls in crossing Texan prairie cattle has been afforded by Messrs. Walton and Co., who founded a large pure-bred herd in Texas in 1886. During the next half-dozen years they had sometimes a hundred orders from ranchmen for bulls more than they could supply, and at the end of that period wrote that "the cattle-owners that have tried Devons are well pleased with them to a man. Devons cross beautifully on native Texas or on grade Shorthorn cows. They give form, colour, and fattening qualities to the former, and quickness and hardihood to the latter. The largest price ever got in Texas for steers was paid for beeves out of grade Shorthorn cows by pure-blood Devon bulls."

But it was not solely for their high quality that Dr. French gave such high praise to Devons for crossing purposes. Their hardihood and ability to withstand both drought summers and low diet of severe winters far better than most other pure-bred cattle partly led to his confident prediction that they will soon be found to be the cattle best suited for South America. They have already been declared the best of our cattle for Queensland because of this. Mr. Gordon, a large breeder of that colony, wrote some years since:—"Devons are found to be the hardiest of any pure breed here. They have to travel and work hard for their living, as on our indigenous pastures it takes from eight to forty acres to keep one bullock. But it is as crosses on the Shorthorns that Devons are so highly appreciated here. These crosses have an abundance of flesh as contra-distinguished from fat."

Contagious Diseases of Animals.

Summary of Returns issued by the Board of Agriculture for the week ending Aug. 12, 1905:

Swine Fever.	Swine Slaughtered as Diseased or Exposed to Infection.	No.	100	83	144	116	2,572	4,421	5,194	6,178
	Outbreaks.	No.	24	26	41	21	560	941	1,055	1,198
Sheep-Scab.	Outbreaks Reported.	No.	1	3	3	...	651	1,064	1,168	1,109
Rabies. Cases Confirmed.	Oth'r Anim'ls.	No.	...	...	...	...	...	...	...	11
	Dogs.	No.	...	...	...	...	...	...	...	12
Glanders (including Farcy).	Animals Attacked.	No.	56	46	72	24	1,313	1,714	1,496	1,256

Anthrax.	Animals Attacked.	No.	22	17	26	14	883	959	776	720
	Outbreaks.	No.	20	13	16	10	637	623	502	444
Period.				Week ended Aug. 12, 1905	Corresponding week in 1904 / 1903 / 1902		Total for 32 weeks in 1905	Corresponding period in 1904 / 1903 / 1902		

NOTE.—The figures for the current year are approximate only.

We would draw the attention of breeders of Clydesdale horses to the fact that entries for Volume XXVIII. of the Clydesdale Horse Stud Book close, at ordinary fees, on the 31st inst. Forms and any information desired can be obtained of the secretary, Mr. A. Macuerlaye, 93, Hope Street, Glasgow.

Historic Cattle Market Revived.—After over fifty years desuetude the ancient cattle market at Morpeth, Northumberland, has been revived. Originally established by Royal charter from King John to Roger de Lesley, Baron of Morpeth, in 1199, the market continued until after the introduction of the railway. It was for many years the greatest provincial fat cattle market in England, but was abolished in 1847.

STOCK AND SHOW NOTES.

By Herdsman.

I have received an interesting letter from the secretary of the New South Wales Sheep-breeders' Association anent the Society's show at Moore Park, Sydney, on June 28 to July 1 inclusive, and, judging from his remarks, which are borne out by other exchanges, the show was a record one and probably the biggest and finest exhibition of Merino sheep ever seen. The British breeds, he states, were fairly represented, especially the Shropshires, for there is a bit of a boom in these, as they are bound to be largely used by our small farmers, i.e., men holding up to 1,000 sheep, of which there are nearly 15,000, and the number is increasing.

Close on four hundred pens of the various breeds were exhibited at the above show, but, of course, the feature was the display of Merinos, which, as previously remarked, were an excellent lot. A leading feature was the all-round superiority of the ewes over the rams, and next to this the phenomenal and unprecedented success of Mr. J. S. Horsfall, who swept the board with his sheep, which are the results of using the pure Spanish Merino, imported some years back from America. Mr. Horsfall's record at the show was as follows, and it is one on which he can be justly proud; I should think it has scarcely ever been equalled:—The special prize of 25 gs. for the best ten Merino rams under two years; a similar special for the best ten Merino ewes of the same age; six other champion awards, twenty-three first prizes, nineteen seconds, one third, and four fourth prizes, all with Merino sheep. He, however, did not secure either of the grand champion prizes, that for ewes going to the Hon. S. McCaughey, Coonong, Narrandera, and that for rams to the Hon. J. Gibson, Belle Vue, Epping, Tasmania. The grand champion ewe, of which we give an illustration on the front page of this issue, was sold privately after the show for 150 gs.

Mr. W. A. Brown, secretary of the Leicester Sheep-breeders' Association, writes that Mr. Harrison, of Gainford Hall (flock No. 42), has sold fifteen Leicester shearling ewes for New Zealand, and seven Leicester shearling rams for South America. All the sheep were typical specimens and descendants of prize-winners.

The committee of the Waveney Valley Agricultural Association have decided to alter the date of show to Tuesday, September 12, instead of September 14 as announced, owing to the Mutford and Lothingland Show being fixed for the latter date. An additional class has been added to the catalogue, viz., an open class for hunters four years and upwards, the special prizes being one of £5, offered by Mr. J. E. Cooke, and £2 offered by the Association.

For their show at Bala on Wednesday, September 13, the Merionethshire Agricultural Society has prepared an attractive prize schedule, over £300 being offered, whilst a large number of open and extra prizes form a feature which should attract a goodly number of entries from outside the Society's area. Classes for horses, cattle, dogs, and vegetables are provided, whilst in the way of further entertainment for visitors there will be jumping, trotting, and driving trials, and a slate splitting competition. The latter is certainly an uncommon feature at an agricultural show, but at Bala it will appeal to a large number of visitors, particularly quarrymen and their friends. Mr. E. M. Roberts, Trem-Eivion, Talsarnau, R.S.O., is

the hon. secretary of the Society, and from him prize schedules, entry forms, etc., can be obtained.

On the 5th of next month Messrs. J. Thornton and Co., will dispose of a number of pure-bred Shorthorns belonging to Mr. H. Williams, at Wind Mill, Beckwithshaw, near Harrogate, Yorks. The herd was founded over twenty years ago from the stock of the most distinguished breeders in Yorkshire and the North of England, to which have been added, at considerable cost, some of the best specimens of Scotch blood from breeders of great repute in Scotland. The strains are principally the old Booth, and the Bruce, Duthie and Marr, and Gordon and Wilson blood, the herd containing many favourite and well-known tribes of each variety.

Thursday, September 7, has been chosen as the date for the third, and final, sale of animals from the extensive and celebrated herd of Red Polled cattle which has been kept at Whitlingham as a large dairy herd about thirty years, and is now dispersed in consequence of the expiration of the lease at Michaelmas. The herd, which consisted of nearly 400 head was divided into three portions, two of which were sold last autumn and this spring, and the final portion will be offered without reserve on the date mentioned above. The history of the herd is well known, and all I would say here is that the forthcoming sale offers a final opportunity to breeders to obtain some of those animals that have been so carefully and judiciously bred for so many years for their milking properties, and reared from the best strains of blood that laid the foundation of a herd which in its day was one of, if not the, largest and best herds of Red Polled dairy cattle in the Eastern Counties.

A very fine Large White gilt from the Colston-Bassett herd was shipped on board the "Rubens" at Birkenhead this week, to the order of Marcos B. Pilde, Esq., of Quillato, Chile, South America.

The Altrincham Agricultural Society's Show will be held at the Devisdale, Altrincham, on Wednesday, September 27, and if the liberal prize list draws the good entry it deserves, a splendid show should be witnessed. No less a sum than £1,750 is offered in prizes for competition, and, in addition, numerous silver cups and medals, whilst the classes provide for all kinds of agricultural products, including, in addition to the usual live stock, classes for goats, grain, butter, cheese, dogs, poultry, pigeons, rabbits, conies, cats, etc. Entries close in all classes, except implements and space, on September 9, and at double fees up to September 13, those for implements and space close August 31. The secretary is Mr. J. H. Hall, 2, Dunham Road, Altrincham.

The prize schedules for the fifty-seventh annual exhibition of fat cattle, sheep, pigs, roots, corn, implements, poultry, and pigeons, promoted by the Birmingham Agricultural Exhibition Society have now made their appearance. The show will be held at Bingley Hall during the last week in November, and entries of implements close on October 20, and those in respect of stock, poultry, etc., on November 1. The schedule shows that the classification is similar to that of last year. In the cattle department, the three 100-guinea challenge cups will again be offered for competition, and they will be awarded—the Elkington trophy to the exhibitor of the best animal, the Thorley Cup to the breeder of the best animal, and the Webb Cup to the best animal bred by the exhibitor. The *Birmingham Daily Post* Challenge Cup, value £50, is offered to the exhibitor of the best animal not exceeding two years old; and the Breeders' Champion Prize, a silver cup or £25, is for the best animal bred by the exhibitor. There are also, in addition to the class prizes, extra prizes of £50 for the best Hereford, £20 for the best Devon, the Maisemore Park Challenge Cup, value £50, for the best Aberdeen Angus, £50 for the best Scot, £10 for the best Welsh animal, and £50 for the best cross-bred. The Cooper Challenge Cup, value 25 guineas, is offered for the best pen of sheep. The butchers of Birmingham and other donors offer their usual prizes, and the hotel and innkeepers give a challenge cup, value 20 guineas, for the best pen of pigs. A large number of cups and other trophies are again offered for roots, poultry, and pigeons, in addition to the class awards.

The Council of the Doncaster Agricultural Society have fixed on Wednesday and Thursday, July 4 and 5, 1906, as the date of the Society's next show, and request that secretaries will make note of this when arranging their show. The request is not out of place, for this year quite four agricultural shows not a great way from each other clashed with that of the Doncaster Society, with the result that some suffered.

Messrs. Macdonald, Fraser, and Co., Ltd., of Perth, give notice of some important sales of Aberdeen-Angus cattle to be held in September. On the 14th day of that month they will dispose of sixty-four head belonging to the Countess-Dowager of Seafield, Mr. G. Bruce, Tochineal; Mr. W. Wilson, Coynachie; and Mr. R. Forbes, Kinloss, at Tochineal, Cullen. On the 16th they will offer at Aldbar, Brechin, sixty-two head from the herds of Mr. P. Chalmers, Aldbar; the Earl of Airlie, Cortachy Castle; Colonel M'Inroy, C.B., The Burn; Mr. J. Kennedy, Doonholm; and Mr. G. Willsher, Pitpointie. On the 19th, forty head from Mr. Clement Stephenson's famous herd will be disposed of at Balliol College Farm, Long Benton, owing to the herd having out-grown its accommodation, and on September 27, just over forty animals from the renowned Maisemore Park herd, the property of Mr. J. J. Cridlan, will come under the hammer at Maisemore, Gloucester. Most of the herds have supplied numerous winners at our showyards, and the above sales will naturally attract much attention. Catalogues can now be had of the auctioneers.

Transactions in Store Stock.

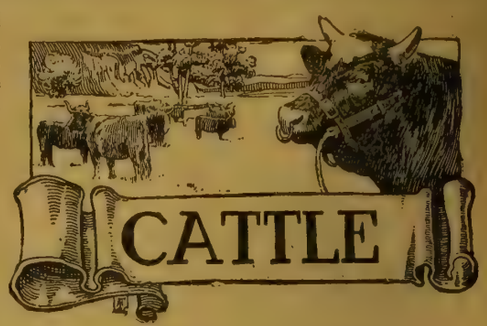
(Reported to the Department of Agriculture and Technical Instruction for Ireland.)

The fair at Midleton (County Cork) on Monday was a small one, at which demand was slow, and a good many cattle remained unsold. There was, however, a large supply of sheep and they met a brisk trade. Prices: Calves, first class, £5 5s.; second class, £4 to £4 10s.; third class, £3 to £3 10s.; yearlings, first class, £8 to £8 15s.; second class, £6 5s. to £7 7s. 6d.; third class, £4 15s. to £6; two-year-olds, first class, £10 to £11 10s.; second class, £8 to £9 10s.; third class, £7 to £7 10s.; three-year-olds. first-class, £15 5s.; second class, £13 17s. 6d.; springers, first class, £14 10s. to £16; second class, £12 2s. 6d. to £13 10s.; third class, £10 10s. to £11 10s.; lambs, first class, £1 7s. 6d. to £1 15s.; second class, £1 4s. to £1 6s. 6d.; over 12 and under 24 months old, first class £2 2s. to £2 10s.; second class, £1 17s. 6d. to £2; two-year-old and upwards, second class, £2 2s.; young pigs, eight to ten weeks old, 24s. to 28s. each.

At Naas fair (County Kildare) on Wednesday there was a very small supply of cattle, for which trade was poor, and the majority failed to find purchasers. An average supply of sheep met a fair demand. Prices:—Calves, second class, £3; yearlings, second class, £7 7s. 6d.; two-year-olds, first class, £10 5s. to £13 15s.; second class £10 5s. to £11. Lambs, first class, £1 7s. to £1 9s.; two-year-olds and upwards, second class, £1 13s. to £1 17s.

The King of Portugal has conferred upon Sir James Blyth a Knight Commandership of the Civil Order of "Merito Agricola," and also the special honour of the Grand Cross of the same Order for his services to agriculture and viticulture in Portugal.

The Sheep Scab Order.—The Bedale Farmers' Protection Society, through Mr. John Hutton, M.P., recently presented to the President of the Board of Agriculture a memorial on the question of the suspension of the Sheep Scab Order in the district. Mr. Ailwyn Fellowes, in reply to the petition, says that is the intention of the Board of Agriculture to suspend the operation of the Sheep Scab (Compulsory Dipping Areas) Order as soon as dipping in the areas has been completed. The dipping period is from August 5 to 31, and if the Board of Agriculture find that the dipping has been satisfactorily completed by the 31st inst., they will give effect to the request of the Bedale Farmers' Protection Association.



Notes and Jottings

The article in last issue re Herefords as milkers goes a long way to prove what has so many times been set forth in these notes—that milk may either be won or lost much more by the management of the animals than by their breeding, or perhaps it will be more in accordance with facts to say that breeding is not by any means a guarantee that a certain animal or certain animals will be great milkers because their parents were of great milking strains, and the dams of them great milkers. Such breeding must be followed up by milking management if good results are to follow, and even then there are failures occasionally. In addition to the herd of Herefords mentioned as having won third prize as best dairy herd at the late Royal Counties Show, there are other herds of the same breed that are paying well as milk sellers' cattle.

Precisely the same thing obtains with the beautiful North Devon breed. The specimens of that breed that are seen and admired by all our leading shows, particularly at Smithfield, when the butchers are most eager to purchase them, show very little signs of milk—indeed, they from all points appear to be given over exclusively to beef. Yet in Devonshire, and over its borders, there are many herds, purely bred, that yield a profitable return in milk, and it was through the richness of the milk of these cattle when feeding upon the clovery pastures of their district that caused Devonshire cream to become such a household word with all who relish a natural delicacy. Cream may be raised and treated in the same manner from other cattle without being at all equal to that made from Devon cattle.

Then soil and climate have a very great effect upon cattle as regards their having a tendency to milk or go to beef. Wiltshire, Gloucestershore, and down into the South-west a very large area appears to be exactly adapted to the production of milk. Practically any breed of cattle become milkers there, some reasons for which are no doubt the circumstances mentioned—soil and climate; and further, there is little doubt that management in that district is also accountable for a great deal. Farmers and their herdsmen, who have been all their lives accustomed to breeding and bringing up their heifers for dairy purposes, have by experience learned exactly the most profitable way of rearing up the young stock and bringing them into the dairy.

Just as the management and feed in these dairying districts all tends to milk production, so in the North-east of Scotland, where the choice Scots are bred and fattened, everything is directed to the production of beef. It would be very interesting to note the results if such a thing could be arranged as to take a herd of dairy-bred heifer calves into Aberdeenshire and subject them to the high-pressure treatment in force in that county, and in exchange to take a like number of Aberdeenshire heifer calves and subject them to the feeding and management of dairy young stock in Wiltshire or Gloucestershire. Depend upon it, it would be but a very short time before the characteristics of both breeds would be entirely changed.

It was mentioned in these notes recently that the export demand for Herefords continues wonderfully brisk. There is room in this state of things for congratulation to Hereford breeders on two points: first, that it proves their cattle to be very profitable in the country whence they are shipped to (America being chief), and in the second place it proves that breeders of Herefords in that country find that it pays them to be continually importing blood from the native home of the breed. Great stress is laid upon this second reason from the fact that Vol. 27 of the American Hereford Record and Herdbook just out contains the registration of 20,000 animals, and the list of shareholders (presumably breeders) takes up no less than twenty pages, two columns to a page. In spite of these numbers over there, English blood is in the great demand mentioned.

The rapid breaking up of cattle ranches in

America and their development as homes for settlers was referred to a short time ago. I notice that in Texas no less an area than 6,000,000 acres of ranch land will be placed upon the market in September. The land is to be sold in small sections, of which any individual purchaser may acquire from one to eight sections not more; so that this means making innumerable homes for families, and will, there is no doubt, cause a considerable difference in the farming of that part. Whether more or fewer cattle will be kept is uncertain at first, some may purchase and break up a good deal of their sections in corn growing; but, ultimately, it is pretty certain to mean an increased number of cattle and sheep, as enclosed land, well cultivated, will keep much more stock than an open ranch.

It is pretty certain, too, that at least for many years to come the beef breeds of cattle will be most in demand on all new holdings, a thinly populated district not requiring milk and its attendant products in sufficient quantity to pay for dairy farming unless it be the production of cheese. American markets and prices for finished food products such as beef, bacon, etc., have for a long time influenced prices considerably in our own country, it is therefore worth noting that reports from the other side anticipate better prices for well-finished beeves; inferior class and badly brought-out animals, on the other hand, are likely to be in excess of the demand. Even with higher prices for the best, it is stated feeders will make but very meagre profits, the high price of stores preventing.

The roast beef of old England has long been the standing dish for the majority of our countrymen, and there seems little likelihood of Sir Loin ever losing his title or becoming in any degree less popular. The variations or fluctuations, however, in the price of beef have been great during the last half-century, though perhaps not more so than those of corn or other commodities; perhaps wool being the most noticeable, having varied from as much as 2s. 6d. per lb. down to about 10d. Notwithstanding the fluctuations in the price of beef, however, since the middle of last century there has scarcely ever been a time, even brief, that has found the selling price so low as to entail actual loss upon the producer, when the producer has been the breeder as well as the feeder.

Whatever may be the price of beef, it invariably pays all the year round to send them to market well-finished—"ripe" is the butcher's word for it—and it also pays well to see that at least for a couple of weeks (a month is better) the cattle have some sound dry corn feed of almost any kind, it may be corn meal or cakes, at this time of year the latter are most convenient to use. To send fat cattle direct from grass only, especially if they have to be on the road for two or three days, is bad policy. Grass is at best a very washy food, and we have many times seen animals so sent out shrink to such an extent in two days as to be almost beyond recognition; whilst others that have been made hard by a little dry food stand the market looking but little the worse.

It always pays to sell animals so that the buyer will have satisfaction, and unripe bullocks give but little. The effect of this is best seen at some provincial auction in a neighbourhood where there are one or two expert feeders. The cattle from these stalls, when they come into the ring draw bids from all sides in rapid succession, and as you are wondering why there is such keen demand for them, you will be certain to hear some of the butchers present saying, "You can't buy them too dear; they weigh like lead, and your customers are always pleased with the beef." Following such cattle you will also see a lot of washy looking grass-finished and badly finished ones, and you will notice at once how slow bids come. These latter are the kind that butchers do not want a second time.

In Chicago market the other day I notice the highest quotation for beef cattle was for Aberdeen-Angus weighing 1,269 lb. per head live weight. These were making some 30 cents per cwt. beyond the general average top price. From 1,200 to 1,350 lb. appears to be the weight most in demand just now there. This means a pretty good steer. Quotations generally are just a little below those of the same week last year.

During the month of September there seems to be a larger number of sales of Angus cattle than usual. Some of these are from the most noted herds of English breeders of that fashionable variety, and some from Scotch herds. One thing in favour of September as a sale month this year is the early harvest, so that it is to be hoped that Angus breeders will benefit.

Of late years it has become very largely the fashion with all our agricultural and live stock papers to give photographs week after week of any notable animals, and the custom is a very pleasing one, to say the least of it. It is also not without considerable interest to stockbreeders by bringing before them the points and general character of these animals, but great care is necessary that these photographs should be taken by thoroughly skilled artists, or the breeders' interests are considerably damaged. The artist, as well as being skilled in his own profession, ought also to understand a good deal about the animal he is photographing, so as to take the impression at exactly the right moment. I am led to make this note from having recently seen the photograph of a beautiful animal presented in such a form as to make it appear perfectly hideous.

Sale of the Brightling Park Sussex Cattle.

The entire herd of pure bred Sussex cattle belonging to Mr. W. A. Haviland, Brightling Place, Brightling, was brought under the hammer on the 11th inst. in the presence of a goodly company of buyers, the auctioneers being Messrs. T. Bannister and Co., in conjunction with Messrs. Woodhams, Son, and Parks. The herd is a very well known one, and was founded by the purchase of a number of animals at Mr. W. E. Long's sale at Sandwich in 1896, and choice heifers have since been acquired from the late Mr. Robert Avery and Mr. Finlay Campbell, and bulls used from the herds of the late Mr. Alfred Agate, the late Mr. Louis Huth, Mr. W. S. Forster, Count Munster, and Mr. Finlay Campbell. All the cattle have been kept under natural conditions. The herd was offered in sixty-two lots, all of which were sold, some satisfactory prices were realised, the best being 31 gs., which sum was given by Mr. G. Warde, West Farleigh, for Stonestown, a very fine cow. Colonel Robinson gave 30 gs. for Rose 2nd, and numerous other lots made well over 20 gs.

Agricultural Imports.

The following is an account showing the quantities of certain kinds of agricultural produce imported into the United Kingdom in the week ended August 12, 1905, together with the quantities imported in the corresponding week of the previous year:—

Agricultural Labour in July.—According to reports received from various parts of England by the Labour Department of the Board of Trade, agricultural labourers generally had regular employment in July. Haymaking and turnip-hoeing provided work for day labourers, and corn harvest was commenced before the end of the month. The supply of extra men was, on the whole, equal to the demand.

THE TENS OF THOUSANDS of users of MOLASSINE MEAL should see that their stock have a portion in every feed all the year round, not simply as a condiment when an animal is out of condition, or occasionally as a fillip. MOLASSINE MEAL is the most valuable and economical food, displacing all condiments, and should be given in place of the same weight of oats, beans, grain, cake, or other feeding stuffs. Sold by all corn merchants and the MOLASSINE CO., Ltd., 36, Mark Lane, London, E.C. —[ADVT.]

Horse Notes.

"He doth nothing but talk of his horse."
—Merchant of Venice.

One of the most successful Hackneys in the north is Mr. Henry Watson's grey mare 16,122 Queen of Newton. She is by Royal Danegelt 5,785, 6074 Queen of the Nith, by Freeman 2,072, her dam a grey by Comet 151, granddam by Charley 926. Freeman 2,072 was by the great Fireaway 249, from whom no doubt comes the style and action, dam by Sir Charles 708, granddam by Pretender 601, great granddam by Phenomenon 52.288, granddam by the thoroughbred Scriventon. The latter was a famous sire in his day, and I well remember several good hunters descended from him which were remarkable for their fine quality and the beautiful class of their bone.

Well descended as she is, it is not surprising to find that Queen of Newton is a stylish well-balanced mare with the best of action. She is six years old, stands 15 hands 3 inches, and she has had a wonderful run of victories in the show-yard during the last three seasons. During the year 1903 she was first in the saddle classes at the Cleveland, Driffield, Sherburn, Tadcaster (twice), Wilton, and Crossgate, and first in harness at Sherburn, Wilton, and Northallerton. In 1904 she won in the saddle at Ayton, Darlington, Driffield, Easingwold, Howden, Market Weighton, Monk Fryston, Northallerton, Pocklington, Scalby, Selby, Sherburn, Tadcaster (twice), Thorner, and Wetherby; in harness at Darlington, Harrogate, and Pocklington; and as a brood mare at Northallerton and Stokesley. This year she has won as a brood mare at Market Weighton, Pocklington, Brough, Driffield, Tadcaster, Harrogate, and Sutton-on-Hull; and in the saddle at Harrogate. She was third at the Royal Lancashire and third at the Yorkshire; but she has, I believe, beaten every mare that has beaten her with the exception of Rosadora, and at Sutton-on-Hull she had behind her Ophelia, Miss Terry, Londesborough Magic, Bright Dorothy, Paddock Queen, Lady Connaught, and Londesborough May Queen—all of them mares with a high reputation. I have not given all the second and third prizes, but she was second half a dozen times, and third once in 1903, and second fourteen times last year. Mr. Watson, at any rate, has no reason to think that there are too many shows.

Neither has Mr. John Henry Stokes, whose success this season has been phenomenal, even when compared with those of previous years. At many shows Mr. Stokes has made almost a clean sweep of the principal prizes. For instance, the bulk of the money at the Glasgow meeting of the Highland and Agricultural Society went to him, but he has lowered all previous records at the Yorkshire show at Hull. There, he showed in five classes, and won five first prizes and a champion prize. It was, indeed, a big thing to do, for it is needless for me to insist upon the fact that at the Yorkshire show the best hunters in Great Britain come together. And to win at the Yorkshire means something indeed. The horses Mr. Stokes won with were Dervische in the three-year-old class, Artist in the class for four-year-old geldings, Lady Belle in the class for four-year-old mares, Baronet in the weight carrying class, and Whiskey amongst the light weights; and to the latter went the championship. During the last few years Mr. Stokes has kept going "one better" than his previous record; but, I think, he has set himself a task here which it will take him all his time to equal. The value of the prizes won was £115.

One of the most satisfactory classes I have seen during the present show season was that for hunter brood mares at Helmsley, where the Ryedale and Pickering-in Agricultural Society's show was recently held. There were ten of them, and most of them were young ones. Indeed, there was not a very old mare in the class, and as they come

out of a very small district, it is pretty evident that no encouragement in the way of bounties is needed in this part of Yorkshire, to induce farmers to breed light horses. For every one of the ten men who exhibited their brood mares at Helmsley are tenant farmers. But they are also horsemen, and descended from long lines of horsemen. And in this lies the real difficulty in inducing men to breed light horses. If a man's traditions are horsey—if he delights in a horse, in riding him and seeing him ridden, he will breed them of his own initiative. For there is no such pleasure—provided a man is capable—as riding and making a young horse.

The great thing that is needed to get men to breed more light horses is to encourage the love of horses and horsemanship. The question is a very big one, and it is one which can scarcely be discussed in this column, but I may perhaps be pardoned for referring to it. There seems a tendency in Hunt Committees to restrict the sport to the wealthy. All over the country a prohibitive—that is, prohibitive to a poor man—minimum subscription is insisted upon. This keeps many a man from riding who would otherwise ride, restricts the market for the second and third rate horse, and in a measure will, in course of time, affect the market for the better class of hunter. For it must not be forgotten that the man who can only afford an occasional day may eventually become rich enough to own a big stud of valuable horses; but that he is not likely to do so if his tastes are directed to another channel when he is young.

There is another thing which has rather affected the breeding of light horses, and that is the prevailing fashion of looking upon Hackneys as harness horses, and breeding them for harness purposes only, and breeding them, moreover, of an increased size. I can remember the time—it is not so very long ago—when the class of horse that now takes prizes at the shows as Gentlemen's Hacks would not have been looked at. And in those days one came across young farmers who did not hunt—who either had not the time or the taste for it—who were accomplished horseman and who were proud of their skill. Such men you would meet on a summer evening, when work was over, riding a young horse out. And they were riding him—not merely sitting on his back and letting him put his head where he liked and his legs anywhere, like the man I met only a day or two ago, who was spoiling a good looking horse through sheer ignorance. If something could be done to encourage horsemanship throughout the country, more horses would be bred, and we should be in a better position when war broke out than we are likely to be with our present "laissez faire" way of doing things. Given a renewed taste for horsemanship, there would be no necessity for any other encouragement for horse breeders. A better market would do all that is needed.

It is worth while for a moment to refer to the winner in the hunter brood mare class at Helmsley. This was Mr. Marcus Kendall's Red Mint, by Red Eagle Wild Mint, by Peppermint. Her dam was by False Alarm, granddam by Pine Apple, great granddam by Lanercost. About the Pine Apple cross, or who or what Pine Apple was, there is no authentic information forthcoming, but the rest of the pedigree is good enough without this cross. Wild Mint was a very stylish mare—one that could hold her own when hounds ran hard over the big Sunnington country. She was also a good winner in the show ring, taking several prizes in the best of company, including the Ryedale and Pickering, Malton, Yorkshire, Bishop Auckland, Leicestershire, Lincolnshire, Northamptonshire, Peterborough, and the Royal. But she was a famous breeder as well as a good prize-winner, and her son Goldbeater, by Knockabout, has also had a very successful career as a show horse, and was sold at Mr. Stokes's sale for 600 gs. Red Mint comes of a good line, and she certainly looks like maintaining its excellent record.

THE LOOKER-ON.

Harvest in the Midlands. With a continuation of present conditions it is believed that the harvest will be practically completed before the end of next week. Reports still coming to hand show that wheat and beans are maintaining their position as the best grain crops of the year, that barley is about an average, and oats slightly below. There is little, if any, complaint as to any deficiency in straw for wheat, but many in the case of both barley and oats. The rains have greatly improved the root crops and the grass lands, and stockowners are expressing less anxiety as to the prospect for the winter keep.—*Weekly Guardian* (August 19).

Notes and Jottings.

From the large number of reports that have appeared in the press of sales of stud sheep for export, it was generally anticipated that the Trade and Navigation Returns for the past month would be interesting to sheep owners. This supposition has been fully realised. The returns now to hand show that 774 head of stud sheep were exported during the month of July. Compared with the same period in the previous year the number exported shows an increase of 18.18 per cent. It will also be interesting to note that the number exported is the largest recorded for this month since July, 1897, when 776 head were exported.

Turning to the declared value of these exports we find that according to the Board of Trade officials it was £13,481, which gives an average of declared value of £17 8s. 4d. per head. Those fully conversant with the actual prices realised by many of these sheep will question the correctness of the official valuation. Taking this as being an approximate one only, the result is fully satisfactory, for the receipts from this source of income are practically 34 per cent. more than they were twelve months previously, the average of declared value being the highest recorded for the sheep exports during this month since previously to the year 1895. The previous highest average for July was that recorded in 1904, when 651 head were assessed at an average of £15 9s. 1d.

Unfortunately for the flockmaster, there is another phase of the sheep trade, namely, the importations. These come to us in two ways—as live sheep, and as mutton. The former unquestionably most seriously affect the flockmaster, because, arriving here alive, they are all sold, when slaughtered, to the consumers as home-killed, and nothing is said of the source of origin. The supply of live sheep last month was, however, one of the smallest on record for many years. The number imported was 4,756 head, 73.90 per cent. less than during the same period of 1904, and the smallest month's supply received from abroad for many years past. The United States sent 3,812 head, and Canada 944.

It is singular that in the same month in which the supply of imported sheep should have been the lowest on record for very many years a similar result should have also been recorded in respect to the importation of mutton. The quantity of this commodity imported during the past month was 212,808 cwt., 40.81 per cent. less than in July, 1904, and by more than 15,000 cwt. the smallest quantity imported during this month in either of the years from 1895 to the present date.

The decreased supply was, it is also worthy of note, applicable to every source of supply save one, the exception being Australia, which sent us 3,642 cwt., as against none during the same period of 1904. The New Zealand supplies were 32.62 per cent. less, the Argentine supplies 48.16 per cent. less, the Dutch supplies 14.63 per cent. less, other countries' supplies 20.14 per cent. less, and the supplies of preserved mutton 72.01 per cent. less than during the same period of the year 1904.

One of the most striking features in connection with this year's ram sales has been the notably high prices realised by the best rams of more than one breed. Full reference has been made to the high prices and averages realised by the Lincoln rams, and now it would appear that equally notable prices are being made for the Hampshire Down ram lambs. The first to realise a century this season was one of Mr. H. C. Stephens's, sold through the agency of Mr. W. W. Chapman at the Bournemouth Show; this was followed by 120 gs. being made for another from the same flock at the annual sale and letting of Mr. H. C. Stephens's ram lambs at Weyhill, the lamb in question being "let" at this excellent price. Last week's lettings, however, eclipsed this, for one of Mr. Carey Coles's first-class lambs was "let" for the season to the Marquis of Winchester at the record price of £205, and then came Mr. James Flower's notable sale and letting, in which ten were "let" for that exceptional average of £80 each, three at least making over the century for six weeks' service, one at 170 gs., one at 150 gs., and one at 100 gs., Mr. A. F. P. Drake also had one that make 150 gs. These notable prices are indicative of the keen demand that exists for the best ram lambs of this breed, and they also prove how largely the breed has increased in popularity during recent years. Were this not the case, such high prices merely for the service of a lamb for six weeks would certainly not be realised.

Another feature well worthy of note is that these high prices are being paid by the home breeders, without any export demand to assist in making the higher range of prices, but there will be, we fully believe, in the near future; because the breed so popular at home is increasing its reputation by leaps and bounds both in Canada, the United States, and elsewhere and such prices as have been recorded above must unquestionably go far to help its future demand in the countries mentioned. These prices show how keenly the best of the breed are in request at home; a certain sign that ram breeders are finding it well worth their while to breed from the best. This they would certainly not do to meet a decreasing demand, hence the importance of such transactions being made most widely known, and in no other paper can this be so thoroughly accomplished than in this one that circulates all over the world.

Advices from the Argentine inform us that during the first five months of the current year the stud sheep imported by that country numbered 1,008. Of these no less than 882, or 87.5 per cent. were of the Lincoln breed, the remainder being classed as various breeds.

The two-shear ram that was first in its class at the Royal Show, and also the same honour at the Royal Counties Show, and winner of the silver medal of the Southdown Sheep Society as the best male of its breed at that show, has been sold to Mr. Dean for export to New Zealand.

Several notable sales of Kent or Romney Marsh rams have recently been carried into effect. The demand for rams of this breed being very much larger at the present time than it has ever been known before at this period of the year.

The Earl of Londes, through the agency of Mr. W. W. Chapman, has sold to Messrs. Polls and Brewster thirty very excellent yearling rams from his carefully bred flock at Lees Court, Faversham. Fifteen of these have already been despatched to the Argentine, and the remainder will be sent out at a later date.

The same buyers as mentioned above have also taken a very excellent lot of well-grown rams, having plenty of size, bone, and substance, coupled with very fine fleeces, from the well-known flock owned by Messrs. L. H. and G. W. Finn, of Westwood, Faversham. This selection numbers fifteen, and are being sent out to the Argentine.

Mr. A. Amos, of Spring Grove, Wye, Ashford, Kent, who has already sold one lot to the Argentine and another to Australia, reports the sale of eight other yearling rams to another client for the Falkland Islands. The foregoing sales must be gratifying to those who are engaged in breeding rams of this breed, because the reduction in the number of rams for sale at home, together with the increasing demand for export, must tend to make their valuable breed better known. In fact, from information obtained from those who have imported these sheep to the Argentine, it is evident that the breed is making a name for itself in that country. The present shipments are all well bred and typical rams, and will add, we have no doubt, still further to the excellent reputation already secured for the breed in the Argentine, to which country, we may remark, there has been for many years a steady but sure increase in the numbers imported each year.

"MARK LANE EXPRESS" Office,

1, ESSEX STREET, STRAND, W.C.

Sheep Fairs and Sales.

Ashford.

A successful sale of Kentish sheep was held in Ashford Market on the 11th inst., Messrs. Swaffer Brothers disposing of some 2,600 heads at very satisfactory prices. One important consignment was that of 250 Kent wether lambs from the flock of Mr. G. C. Swindells, of Horton Park. Of these one pen realised 24s. 6d. and the remainder changed hands at 26s. 6d. and 28s. 6d. A pen of about sixty Kent ewe lambs from the same flock also made 28s. 6d. The top price for Kent wether lambs was 30s. 6d., which figure was made for a pen of forty of Mr. W. Homewood's. The general range of values was as follows:—Kent ewe lambs, 24s. to 28s. 6d.; Kent wether lambs, 22s. 6d. to 30s. 6d.; cross-bred lambs, 20s. to 29s. 6d. A few three-lamb ewes were disposed of at 37s. 6d.—On Wednesday Messrs. W. and B. Hobbs offered over 4,000 lambs, and they met with a ready sale. The greater number of the lambs, both Kents and cross-breds, realised 23s. to 26s. per head, but others realised up to 30s. 6d.

The Brandesburton Barff Longwools.

The highest figure yet realised at the sales of the Brandesburton Barff Lincoln Longwool sheep, belonging to Mr. T. C. B. Dixon, was made on Friday last, when eighty Lincoln Longwool shearlings were submitted, and all found ready purchasers, as in spite of the adverse weather there was a large attendance of sheep breeders. The amount realised by the sale was £1,957 4s., an average of £24 9s. 3d., a record price for the Barff rams. The buyers included Mr. Sagege and Mr. Hughes, who purchased largely for the Argentine. Some of the best rams were disposed of to Mr. Dudding (Riby Grove), Mr. J. E. Caswell (Laughton), Mr. Marris (Kirmington), Mr. Webb (Melton Ross), Mr. Kirkham (Biscathorpe), and Mr. Anderson (Barton).

Britford.

Britford sheep fair was held on the 12th inst. in favourable weather, and there was a large attendance of buyers and breeders from all parts of the country. Over twenty-seven thousand sheep were penned, the largest number for several years, and an increase of over two thousand compared with 1904. The large entry of sheep was, no doubt, to some extent, due to the improved prospects of keep, which was calculated to create a strong demand. However, when the market settled down it was found that the rates were about the same as at the Salisbury July fair, and almost exactly the same as at the corresponding fair las year. There was an excellent demand and an almost striking inquiry for grazing lambs. The general quotations were:—Fat wether lambs, 40s. to 54s.; chilver lambs, 40s. to 44s.; store lambs, 30s. to 36s.; regular draft ewes, 44s. to 52s.; draft ewes, 38s. to 44s.; grazing ewes, 34s. to 38s.; two-tooth ewes, to 52s.

Messrs. Waters and Rawlence held their accustomed great sale of Hampshire Down store sheep, the catalogue comprising 14,750 head, and although the trade and prices were doubtless quite up to the recent fairs, they were hardly so good as at Salisbury on July 15. Prices realised as follows:—Two-teeth ewes, 48s. to 57s. 6d.; regular draft ewes, 42s. to 52s. 6d.; draft ewes, one year older but fit for breeding, 38s. to 44s. 6d.; grazing ewes, 30s. to 38s.; best ewe lambs, 35s. 6d. to 44s.; best fat wether lambs, 44s. to 55s.; second quality ditto, 38s. to 43s. 6d.; working ewe and wether lambs, 32s. to 37s. 6d.; mixed lambs, 28s. to 36s. 6d. The same auctioneers also brought under the hammer at this fair some choice consignments of Hampshire Down rams as follows:—From Mr. J. Flower's famous Chilmark flock 98 let and sold at the grand average per head of £21 15s. Nine lambs first let at an average of £81 6s. 6d., Mr. C. Coles hiring at 170 gs., the Marquis of Winchester at 155 gs. and 16 gs., Messrs. J. H. Dibben, Notley (for Mr. Holman), and Lord Rothschild each at 100 gs., the other three falling to Mr. Hurford at 26 gs., Mr. J. Pain at 14 gs., and Mr. Inkpen at 16 gs. Of the 89 selling lambs one was bought for exportation at 80 gs., Mr. Joyce bought at 44 gs., Mr. Bouverie at 40 gs., Mr. Hambro at 42 gs. and 40 gs., Mr. Kerr at 34 gs., the Hon. L. Greville at 28 gs. and 15 gs., Mr. C. Stanford (for Mr. Hulse) at 22 gs. and 17 gs., Mr. Lythal at 25 gs. and 24 gs., and others at from 20 gs. downwards. The full-mouthed ewes, 68s. (twice), 66s., 56s., 51s., and 50s. per head.

Mr. A. F. T. Drake, President of the Hampshire Down Sheep Breeders' Association, sent a splendid lot of animals from his Dogdean flock, and these also met a good demand, 91 being let and sold at an average of £16 2s. Seven lambs were let at an average of £52 1s., Mr. Hurford hiring at 150 gs., Mr. Flower at 90 gs., Mr. C. Coles at 36 gs., Mr. Kerr at 28 gs., Mr. T. Lavington at 17 gs. and 16 gs., and Mr. Street at 10 gs. Of the sale lambs Mr. G. Brown bought at 32 gs. and 20 gs., Mr. Terrill (for Lord Ashburton) at 26 gs., 18 gs., 14 gs., and 13 gs., Mr. H. H. Green at 25 gs. and 23 gs., Mr. H. Lambert at 32 gs., Mr. Mathews at 22 gs., 21 gs., and 12 gs., Mr. Good at 22 gs., Mr. Harding (for Sir W. G. Pearce) at 22 gs., Mr. Lunn (for Lord Ashburton) at 21 gs., 18 gs., 16 gs., and 12½ gs., Mr. Kerr at 28 gs., and others at from 10 to 12 gs.

Mr. W. C. Young, who is relinquishing ram breeding, sent a goodly lot from the Stratford sub cattle flock, and 64 were sold at an average per head of £8 19s., Mr. Goldsmith buying at 36 gs., Mr. Kerr at 19 gs. and 14 gs., Mr. Edney 11 gs. and 9 gs., the Marquis of Winchester at 16 gs., and others at from 13½ gs. downwards. Several shearling rams made from 5 gs. to 10 gs.

As usual a selection of ram lambs from the Breamore House flock, the property of Mr. H. J. Hulse, were submitted, but although a nice lot of lambs were presented buyers were not forthcoming to effect a clearance. Top price was 11 gs., and the average of 37 sold was £6 9s.

Castle Douglas.

Mr. W. Wallet's second special sale of top cross and half-bred lambs at Castle Douglas took place on Monday, when over 12,000 were penned, and the attendance of buyers was large. Five hundred store sheep were first put through at 32s. 3d. to 39s. for hoggs and up to 39s. 3d. for half-bred gimmers. For cross lambs the demand was brisk, and last season's rates were fairly well maintained. Chief prices were 27s. for a fine lot from Butterhole, Dalbeattie; Edgarton, 28s. 9d.; Cogarth, 24s. 9d.; Newtonairds, 18s. 9d.; Barlay, 17s. 3d. to 20s. 9d.; Slougaber, 19s. 3d.; Earlston, 27s.; Sundaywell, 19s.; Screet Farm, 23s. 9d.; Glevcrosh, 21s.; Dalquhat, 18s. 6d.; and Barcheskie, 31s. and 40s. 6d.

Chichester.

At Chichester Cattle Market on Wednesday Messrs. Stride and Son held their fourth special sale of the season of about 3,000 Southdown and other lambs, ewes, and sheep. There was a good company of buyers, and lambs forward in condition sold well at very satisfactory prices, but, owing to the continued dry weather, keeping lambs were slower to sell, and 1s. 6d. to 3s. per head less money had to be accepted in order to effect sales. However, with the exception of one or two small lots, every lamb changed hands.

The Corston Shropshires.

Mr. Thomas A. Buttar's annual sale of his celebrated Corston Shropshire sheep always draws a large attendance of buyers, and last Thursday's sale proved no exception to the rule. Mr. Mansell conducted the sale for the first time, and in introducing the rams for sale said that he could speak without fear of contradiction to the special merits of the sheep offered. The rams, he said, were big, strong in bone, possessing exceptional hardiness and vigour of constitution, with first-class fleeces and skins. The selected animals brought into the ring maintained the reputation of the Corston breed, which has gained 172 prizes since 1884. Competition for the various lots was fairly keen, and though no outstanding price was realised, the average result was much better than in late years. The forty-nine catalogued rams sold realised £537 1s. 6d., being an average of £10 19s. 6d.—about £3 better than last year. Ten extra rams were put through the ring, and brought an average of £5 17s. 7d., whilst thirteen pens of ewes were sold at an average of 37s. The top price for a shearling ram was 28 gs., given by Mr. M'Ilwraith for exportation to New Zealand; whilst next came 20 gs., which was obtained four times. Other prices ranged from 7½ to 13 gs.

The Hon. H. Cubitt's Southdowns.

Messrs. Stride and Son sold by auction the whole of the Hon. Henry Cubitt's pure-bred registered Southdown flock, comprising about 1,000 head in all ages, at the Home Farm, Bathley, near Guildford, on the 10th inst. The flock was established in 1825 by the purchase of ewes from the best East Sussex flocks, and rams have been used from the well-known flocks of Mr. Edgar Ellis, Mr. W. Toop, Messrs. Murietta, Mr. Geo Peel, Mr. A. Heasman, etc. The ewes were a particularly fine lot, being very uniform in type and character, and possessing great size and scale combined with beautiful quality.

The sale commenced at two o'clock, luncheon having been served at one, and there was a good company when the sale opened, many distant buyers who had attended Messrs. Stride's great annual sale at Chichester on the previous day being present. Very animated bidding prevailed throughout, and exceedingly satisfactory prices were obtained, as the following table will show:—

Description.	No. Sold.	Highest Price.	Lowest.	Average per Head
		s.	s.	s. d
Shearling Ewes	100	73	56	63 3
Four-teeth Ewes	110	66	62	62 8
Six-teeth Ewes	95	63	53	56 3
Full-M'thed Ewes	130	55	44	48 3

The 204 ewe lambs averaged 34s. per head, and the 231 wether lambs 32s. 3d. per head. The rams made up to £10 10s.

Hailsham.

At the annual lamb fair at Hailsham on the 12th inst., over 4,000 sheep and lambs were penned, a slightly larger number than last year. Fewer buyers were, however, present, and trade was dull all round. On an average lambs fetched 27s. 6d. or 28s., tegs 46s. to 48s., and ewes 35s. to 38s.

Horncastle.

The show of ewes and lambs at the Horncastle annual fair on Thursday was hardly so large as usual. About 1,500 sheep and lambs were penned. Half-bred lambs made up to 34s., long-wool lambs to 31s., and ewes 40s. to 50s.

Lewes.

Mr. J. R. Thornton, of Lewes, conducted a sale of pure-bred Southdown rams and ram lambs, at Lewes, on Tuesday afternoon. The catalogue comprised animals from many well-known flocks, and a fairly good trade was experienced, all prices ranging up to 10 guineas.

Liskeard.

The second annual sale of registered yearling rams from some of the leading flocks in Cornwall took place at Liskeard on Monday under the auspices of the South Devon Flock-book Association. Breeders were present from all parts of Cornwall and South Devon, and for the best sheep there was a good demand, and bidding was brisk, but for secondary sorts there was little or no demand, and several remained

Forthcoming Live Stock Sales.

31	Southdown Sheep	Mr. H. M. Simmons	Amberstone Grange, Hailsham, Sussex.
31	Sheep	Various	Craven Arms, Shropshire.

unsold. The auctioneers were W. J. May and Son, Olver and Son, and Mr. F. M. Sobey.

The highest price for the day was obtained by Mr. H. Sobey, of Pensipple, Liskeard, 18½ gs being paid for a grand animal from his noted flock. His five rams averaged altogether 13 gs. each, four being bought in. Mr. P. G. Brown, of Duloe, however, had actually the best sale, the whole of his draft of thirteen fine rams being disposed of at an average of £11 apiece. Mr. W. F. Sobey, of Menheniot sold eleven at an average of 10 gs. each; Mr. E. H. Hoskin, Cartuther Barton, Liskeard, six at £10; and J. P. Matthews and Sons, Antony, three at £9 16s. each. These were the principal prices, other drafts being sold from the Earl of Mount Edgcumbe; Messrs. J. A. Spry, Grampound Road; G. Roseveare and R. E. Paige, St. Germans; R. B. Trant, Menheniot; and R. G. and T. M. Pearce, Pelynt.

In the new cattle market, during the morning, May and Sobey also disposed of nearly 1,000 breeding ewes, fat lambs, and wethers. Ewes made from 37s. to 47s. each; wethers sold well at 42s. to 48s.; and lambs also sold readily at 25s. to 35s. 6d. each.

Mr. A. T. Miles's Southdowns.

The sale of Mr. A. T. Miles's Southdowns at Buckwell, Wye, on the 11th inst., only attracted a small company, and, owing to some of the field sheep being lame, there was little demand. Yearling ewes made up to 60s., Mr. F. J. Maitland taking several lots into Sussex, and Mr. Morgan was also a purchaser of some good sheep. The stud rams sold up to 20 gs., Lord Northbourne taking the third prize winner at Tunbridge Wells in 1903 at that price, and at 10½ gs. the second prize ram at the same show in 1904. Yearling rams made up to 6 gs., but only a few were sold.

Newmarket.

The annual August sale of Suffolk sheep held at Newmarket by Mr. G. Blencowe took place on the 11th inst., when between 5,000 and 6,000 head from various well-known flocks came under the hammer, that number including about 250 choice Suffolk rams, and over 2,000 high-class Suffolk shearling ewes, while included in the sale were about 250 pure Southdown shearling and flock ewes, forming a portion of the famous Cheveley flock, and of the choice flock of Mr. W. B. Cloete, of Hare Park. Owing to the large number of lots Mr. Blencowe again secured the services of Mr. Ernest Prentice, Secretary of the Suffolk Sheep Society, it being necessary, in order to get through the catalogue in good time, to dispose of the rams and ewes simultaneously. The prices realised for the ewes were on the whole most encouraging. While there were no sensational figures, there was a good average throughout, the higher prices realised in the earlier part of the year being well maintained. Included in the sale was the entire registered flock of Mr. C. E. Webb, Nosterfield End. Six Suffolk shearling ewes, prepared for show but not exhibited, made 68s.; two lots of ten shearling ewes 63s. and 64s.; and two lots of ten two-shear 64s. and 65s. Full-mouthed ewes sold at 56s. and 57s. Mr. G. H. Long, Great Wilbraham, sent a nice lot of forty, and in lots of twenty they realised the high price of 86s. and 79s. respectively, the average being 82s. 6d. The Cheveley Southdowns sold as follows: twenty shearling ewes, 52s., 49s., 48s. 6d., and 47s. Other consignments sold at prices ranging up to 67s. 6d. The rams sold well, the highest price of the day being 25 gs., obtained for one of ten sent by Lieut.-Colonel E. W. Baird, Mr. Wood, of Hengrave, being the purchaser. Mr. Herbert E. Smith sent eight which made the highest average of the day, viz., £9 11s. 7d. The general range of prices was from 10 gs. to 17 gs.

Mr. D. E. White's Hampshires.

The Hampshire Down flock belonging to Mr. Arthur E. White, Anvilles Farm, near Hungerford, Berks, was dispersed on the 11th inst. by Messrs. Ferris and Puckridge, of Milton Pewsey and London. In introducing the flock to the notice of the company, Mr. P. M. Puckridge drew attention to the size and character of the sheep, saying that the ewes had been purchased by Mr. White from the flocks of Mr. Flower, Mr. Baxendale, and others, and pointing out the many excellent points they had attained in such a short time. Commencing with the two-teeth ewes, the third pen made 10½, the purchaser being Mr. Darling, of Beckhampton, this age averaging as nearly as possible 9½. The four teeth ewes from 7½s. downwards average 5½s. The older ewes sold after the same rate, and the ram lambs, all of which found purchasers, averaged £4 8s., two of them realising £10 10s. each. Ewe lambs sold from 5½s. to 6½s., and wethers 5½s. to 7½s.

Shropshire Farmers and the Sheep Scab Order.

A largely-attended meeting of farmers of Shropshire was held in the Corn Exchange, Shrewsbury, on the 12th inst., to protest against the compulsory sheep scab order which the Shropshire County Council recently issued. A large number of those present gave expression to indignation at the action of the County Council, inasmuch as Shropshire was practically free from sheep scab. It was stated that the order was entirely unnecessary, and would prove not only inconvenient to farmers, but would, being put into force at this particular period of the year, prevent them using their flocks to the best monetary advantage.

Ultimately most of those present signed a petition to the County Council asking them to rescind or modify the compulsory sheep scab order. In the event of dipping being considered necessary at all, they asked the County Council to petition the Board of Agriculture to make an order that every flock in the kingdom be dipped once a year about clipping time.

SHOWS IN BRIEF.

Banwell and Weston-super-Mare.

The programme of the annual show of this combined agricultural association is always comprehensive, and this, to a great extent, explains the strong hold which the fixture has obtained, not only upon the immediate district, but further afield. For the show at Weston on Thursday the usual classes were provided, and were well filled. In these days, when there are so many local shows, it is only to be expected that there will be a little elasticity about the classes. Slightly fewer entries in one department were counter-balanced by additional support in others, and so the eighth of the amalgamated exhibitions in numbers was an average one, and in quality well up to the highly satisfactory standard of previous years. The hunting classes were good, and made a representation creditable to the neighbourhood; whilst cart horses were good. The cattle, sheep, and pig classes were also well filled with animals of a useful farm type.

Beamish.

The thirty-sixth annual show of the Beamish, Pontop, and Consett Agricultural Society at Axwell Park on Wednesday was an undoubted success from every point of view. The weather was beautifully fine, the attendance was large—amounting to about 4,000, and constituting somewhat of a record—and the exhibits, 800 in all, were fifty more than last year. The society, however, needed this encouraging result of their efforts, for last year, at Blackhill, an excessively wet day spoiled the attendance and, consequently, the result. Of agricultural horses there was a most creditable display, whilst, though not quite so good, the light horse display was not to be despised. Cattle were not a numerous section of the show, but they included animals of excellent quality. Other interesting items included a good display of dogs and poultry, horse-shoeing competitions, block tests, a good exhibition of implements, and a fair display of dairy produce.

Belper Horse.

For once in a while the Belper Horse Show Society had, on Wednesday, fine weather for their show, which each year shows a marked improvement, and last week's show was, perhaps, the best of the fifteen held, the entries showing an increase of 48. The total was 359, which is believed to be the highest on record; hunters, Hackneys, and harness horses numbered 140, Shire horses 167, cattle 18, sheep seven, butter and eggs 14, and shoeing smiths 13. The latter formed a new feature in the show, and created considerable interest. The principal section of the show was, as usual, that for agricultural horses, and here many animals of the highest merit were to be seen. The other horse classes, however, contained some excellent animals. Cattle made a creditable display, whilst of sheep there was only one class.

Bognor Horse.

The horse show which took place at Bognor on Thursday was the most successful yet held there, for the entries were larger than ever—140, as against 103 last year. The weather was splendid, and the attendance of visitors a record one. All the seventeen classes were well filled, many well-known exhibitors who have not hitherto competed at Bognor being in the catalogue. Competition in the driving and jumping section was particularly keen, the entries in the open jumping class for the £20 prize numbering sixteen, and being far in advance of all previous years. As usual, these competitions proved the most attractive feature of the afternoon, and were witnessed by a fashionable gathering in a crowded enclosure.

Crewkerne Horse.

The annual horse show at Crewkerne took place on Thursday and was most successful, being well attended. Over £130, together with several silver cups, was offered for competition, and there was a large entry. In the class for hunters, both local and open, there were some exceedingly fine horses, the weight carriers in particular coming in for admiration; whilst the Shires were a useful lot, just suited to the peculiar needs of the district. The jumping competitions were, as usual, the chief objects of interest to the average individual. There was also an exhibition of dairy produce.

Heanor.

A record number of visitors attended the thirty-third annual show of the Heanor Agricultural Society, held on Tuesday, the weather throughout the day being beautifully fine. The catalogue was framed on lines similar to those adopted last year, and the total numbers of entries was 490, this showing an increase of 85 as compared with 1904. Horses numbered 155, cattle 10, sheep 5, pigs 5, poultry 114, pigeons 77, rabbits 112, song birds 12. A new feature was a trotting match, in saddle, for ponies not exceeding 14.2 hands, distance 1½ miles, and five entries were obtained for this event; whilst there was an attractive horticultural display. The Shire horses were of fair quality, the best section being the foals. Mr. S. A. Jowett, of Oldcotes Manor, Rotherham, secured the Shire Horse Society's silver medal for his Summer Queen, Mr. T. Kay, Carter Lodge, Ridgeway, Chesterfield, being reserved. The Hackney Society's silver medal was gained by Mr. G. E. Franklin, The Field, Derby, with his cob Grand Gobang. In the sections for cattle, sheep, and pigs, the entries were very small, although quality was well represented.

Penistone.

The 47th annual show of the Penistone Agricultural Society took place on Thursday in most favourable weather, and was attended by a large number of visitors. The entries in one or two sections showed a decrease, but the total compared well with recent shows, and the number of horses established a record, though the quality was somewhat uneven. The Hackney Society's medal went to Messrs. Cockayne Brothers, of Sheffield, for their six-year-old Paddock Princess; and the Shire Horse Society's medal was awarded to a foal belonging to Mr. Thomas Kay, of Ridgway. The cattle, though not numerous, were of fair average quality, and included some of high merit. In the horticultural section some extraordinary records were set up, one exhibitor taking the whole of the first and second prizes in the cottagers' classes for cut blooms, whilst in another section one man got as many as nineteen first prizes and thirteen seconds!

Scalby and Newby.

The Scalby and Newby Agricultural Society have had a very different experience to most other similar societies, for their show during the past sixteen years, so we learn, has only been spoiled at all by rain once, and that, unfortunately, was on Friday last. Nevertheless the attendance was surprisingly good, and there was a large holiday crowd round the ring fence when the riding and driving classes were being judged, so that the new experience is not likely to be attended with bad financial results. Scalby has a high reputation among local shows for its display of hunters and hackneys ridden and driven in the ring, and there was no falling off last week, there being an entry of 242 horses, which exceeds the average of the last five years, and is an increase of 45 compared with the last show. There was a decrease, however, in all the other classes of stock, owing no doubt to harvest work being in full swing. The Society's Cup and President's £10 for the best hunter ridden in the ring attracted thirteen entries, and although Yorkshire Show winners were barred, the display was a

"RATIONAL PIG-KEEPING."

If you wish to learn all about Pig-Keeping, and have the subject analysed and placed before you in simple language, read this book. You can readily obtain all the information you require. *Beautifully Illustrated.*

Arranged in ten sections, each with many sub-sections.

capital one. Mr. Hinchcliffe's chestnut gelding, a son of Cambrion, was placed first, and the second place was only decided after a third judge had been called in.

Uttoxeter.

The annual show in connection with the Uttoxeter Agricultural Society was held on Thursday in brilliant weather, and a record attendance was registered. From a horse show pure and simple the show has developed into an all-round agricultural show, and a horticultural section was also provided, and commanded a good number of entries; whilst this year the executive added to the catalogue a class for implements, which was well patronised. The Shire horse classes, especially the open ones, brought out some meritorious animals, as did also the light horse classes.

Warrington.

The sixteenth annual show of the Warrington Agricultural Society, held at Walton Park, the seat of the president, Sir Gilbert Greenall, Bart., on Thursday, was in every respect a most successful one, and exceeded in quality and quantity its predecessors. There were 458 exhibits—a record number—and the majority were horses, in fact, these were the feature of the show, numbering as they did over 420. Unfortunately, however, there was a falling off in Shires, which was a disappointment. Mr. James Gould, of Lymm, carried all before him with his noted Arley Mettle, a brood mare who carries her ten years well. Her activity, weight, and quality are her chief characteristics. Lymm Lass, who has previously won the championship, was second. Another winner of note was Durdham Lady, a seven-year-old mare belonging to Mr. J. Knowles, of Agden. She is a chestnut of great weight, and beat Mr. J. Gould's Stanny Luck, a black, of considerable quality. One of the best Shires in the country, Oldfield Duke, owned by Mr. Sparkes, Altrincham, had no difficulty in carrying off the highest honours in the gelding class. He stands 17.3 full, has the best of feet, and walks like a cart horse. He has never been beaten this year, having been first and champion at London, first at Stretford, Wirral, and Birkenhead, the Royal Agricultural, Rawtenstall, and the Royal Lancashire shows.

Hunters numbered 88, and were a fine lot. Hackneys showed an increase of 23, the entries numbering 67. A notable reappearance in the show ring was Primrose Dame, a 13-year-old chestnut mare, from the stable of Mr. John Makeague, of Newton-le-Willows. For the past four or five years she has been used for stud purposes, but before she left Lord Londesborough's stable and carried everything before her in the ring. Some capital young colts were shown, and the classes were all well filled. This year several classes were added for novices, both in hunters and Hackneys, and the wisdom of this was seen by the number of entries received. The cattle section, though not very large, included some fine cows and several good heifers and bulls. The show of cheese was said by one of the judges to be the best there has been during the society's history.

Whitby Horse.

For a really excellent display of horses in the north of England, that usually seen at the Whitby show would be hard to beat, and last Thursday's display being quite up to the average, the numerous visitors had much to interest them. The light horses were a fine lot, perhaps above the average, and not a few of the prizes went to local breeders, which is not always the case with a show of this character, where many of the classes are open to all comers. Unfortunately, though the quality was excellent, the entries in the hunting classes were the smallest seen for many years. The coaching classes and Cleveland Bays were mixed, a practice which is to be regretted is now becoming too common, for it is unfair to the Cleveland to expect the breed to have the same action as the Yorkshire coach horse, though it is noticeable even when shown together that the Cleveland Bay often succeeds in taking the first ticket.

Remarkable Longevity.—A remarkable instance of longevity in a whole family has come under notice in the little village of Ufford, near Woodbridge, in Suffolk. Amongst the 500 inhabitants of that rural locality are numbered a family of six brothers and one sister whose united ages yield the amazing aggregate of 516 years, or an average of 73½ years per person. The eldest of the septetto was born so long ago as 1824, and the youngest in 1842, and during the two-thirds of a century which has elapsed since the lastcomer was ushered into the world the family chain has been unbroken by death. The two octogenarian sons who head the list are 81 and 80, respectively; the septuagenarians include a daughter of 78 and two sons of 77 and 74; while the remainder are 64 and 62 years old.

East Berks Horse Show.

The ninth annual exhibition of the East Berks Horse Show Society, held at Hawthorn Hill Racecourse on Thursday, was one of the best of the series, and was attended by a large company, despite counter attractions. Although the entries were slightly less than last year, the chief falling off being in the Shire horse classes, the quality of the animals shown was magnificent, and the show thoroughly deserved the praise of the spectators, the annual visitors describing it as the best the society has held. The society's radius extends fifteen miles from Bracknell Station, so that the whole of the farmers and others in East Berks and South Oxon, South Bucks, and part of Surrey are eligible to compete. The competition in the majority of the classes was very keen, and there was not a poor animal in the show.

The hunters were a magnificent lot, the three-year-old hunters being a very strong class. Both the first and second prize-winners were exceptionally good horses. In the class for heavy weight hunters, Mr. H. M. Mackusick took the first and second prizes with Tennis Ball and Red Ruby, horses that are frequently beating each other at shows, and it is a matter of opinion with judges as to which is the better animal. Both were purchased from Mr. J. H. Stokes, who took third prize in the same class, a decidedly strong one. In the class for hunters (open) calculated to carry less than 14 stone, Mr. Stokes' Whisky was—as on many occasions this season—first, and Mr. Robinson's Lady Shaldrake second. The latter is a very nice mare. The judges were of the opinion that, with the exception of Whisky, Lady Shaldrake was the best horse in the show. The class for hackney mares with foal at foot or in foal was one of the strongest classes in the show, and the awards of the judges gave great satisfaction. All the horses were very good. The prize winners had no foals, and consequently the mares that had foals had very little chance with the others. In the riding classes especially noticeable was Mr. F. V. Gooch's White Heather, an exceptionally fine "goer," and good enough to win in a better class.

The classes for Shires, although small, contained some very fine animals. In the mare class Mr. Hudson's Tatton Tapestry beat Sir Edward Stern's Lady Smith II., thus reversing the verdict of the Tring Show, whilst in the class for Shires (local) a very nice grey filly belonging to the Hon. W. F. D. Smith, M.P., easily took first honours. For yearlings Mr. R. W. Hudson's black colt, Danesfield Stonewall well merited the first prize, but the Hon. W. F. D. Smith followed him very closely with an uncommonly good bay filly, Rememham Darling. In the local class for mares or geldings Colonel Walter, of Bear Wood, took first prize with quite a god mare, Bear Wood Pansy, but she lacked a little in length, otherwise she is good all round. The other classes not individualised were strong, and contained some well bred and useful animals.

The special prizes were awarded as follows:—The Hunters' Improvement Society gold medal, for the best hunter brood mare, by a thoroughbred or registered hunter sire (in foal or with foal at foot by a similarly qualified sire), and also the same society's silver medal, for the best hunter mare or gelding of any age, Mr. J. Millens. The Hackney Horse Society's silver medal, for the best mare or gelding exhibited in single harness, Mr. John Kerr, M.P.; r, Dr. Alex. Bowie. The Hackney Horse Society's silver medal, for the best Hackney or pony mare, filly, or filly foal that is registered or eligible for registration in the Hackney Stud Book, 1, Dr. Alex. Bowie; r, Mr. W. S. Cunard. The Shire Horse Society's silver medal, for the best Shire stallion, entire colt, or colt foal that is registered or eligible for registration in the Stud Book, 1, Mr. R. W. Hudson; r, Sir E. Stern. The same Society's silver medal, for the best Shire mare, filly, or filly foal that is registered or eligible for registration in the Stud Book, 1, Mr. R. W. Hudson; whilst the silver challenge cup, value 20 guineas, for harness horses, presented by Mr. W. S. Cunard, to be won by the same animal twice in succession or three times, was this year won outright by Mrs. Hartley Batt, of Westbourne Street, Hyde Park, W.

The following were the judges:—Hunters and Hacks, Mr. George Gordon, Wincombe Park, Shaftesbury, and Mr. Owen C. Wallis, West Haddon Hall, Rugby. Hackneys and Harness Classes, Mr. Alfred Rowell, West Rudham Hall, King's Lynn. Shire and Agricultural Horses, Mr. William Thompson, junr., Barrons Park Shire Stud, Desford, near Leicester. Jumping, Mr. W. Henry Barber, M.F.H., Culham Court, Henley-on-Thames, and Colonel Allan Maclean, Brook House, Bracknell.

Whilst harvesting fourteen acres of corn in the Bourne district of Lincolnshire, a farmer secured no fewer than sixty-one rabbits.

SOCIETIES.

Shorthorn.

Meetings of the Committees and Council of the Shorthorn Society were held at the Society's rooms, 12, Hanover Square, W., on the 14 inst. Col. Sir Nigel Kingscote, G.C.V.O., K.C.B., was in the chair, and before proceeding with the business of the meeting said it was his painful duty to report the death of Sir Jacob Wilson, K.C.V.O., a valued colleague on that Council. As they all knew, Sir Jacob took a very active part in the formation of the Society, in which he had ever since taken the greatest possible interest, and of which he was elected president in 1892. They would greatly miss him on that Council.

On the motion of the chairman, a vote of condolence and sympathy with Lady Wilson and family was unanimously passed.

Eleven new members were then elected.

Editing Committee.

Lord Moreton reported that the Committee had examined and passed the list of pedigree exportation certificates issued by the secretary since the last meeting of the Council, viz.:—For Australia 7, South Africa 3, Canada 21, South America 432—total 463.

The Committee recommended the registration of the following names:—

Name.	Owner
Tongswood	C. E. Gunther.
Timberley	John Ridd e.

Applications for exportation certificates and inquiries relating thereto had been considered by the Committee, and the Secretary instructed thereon. A number of new and other pedigrees had also been submitted to the Committee, some of which they had accepted, and referred others back for further inquiry. The Committee also recommended that for the ensuing year the Committee consist of the following members:—Lord Moreton (Chairman), Lord Brougham and Vaux, Mr. James T. Hobbs, Colonel Sir Nigel Kingscote, G.C.V.O., K.C.B., the Earl of Northbrook, Mr. Edmund Potter, and Lord Rathdonnell.

General Purposes Committee.

Lord Moreton reported that the accounts for the months of June and July had been examined by the Auditors and the Committee, and were found to be correct; that the receipts for the same period had been £237 15s. 9d.; and that the Committee recommended that cheques be drawn for various accounts, salaries, and prizes amounting to £973 18s.

The Committee also considered various applications with reference to the Society's prizes, and on other matters, and instructed the Secretary thereon. The Committee recommended that for the ensuing year the General Purposes Committee consist of: Colonel Sir Nigel Kingscote (Chairman), Lord Brougham and Vaux, Mr. J. P. Cross, Mr. James T. Hobbs, Lord Moreton, and Mr. E. Potter.

This report was adopted.

On the motion of Colonel Sir Nigel Kingscote, seconded by Lord Moreton, Mr. E. W. Stanyforth was elected a member of the Council in the place of Sir Oswald Mosley, Bart., who becomes a past President.

In compliance with the terms of the Articles of Association, Mr. E. W. Stanyforth was, on the motion of Lord Moreton, seconded by Mr. Joseph Harris, elected President of the Society for the ensuing year; and on the motion of Sir Nigel Kingscote, seconded by Mr. J. Harris, Lord Moreton was elected Vice-President of the Society for the same period.

A communication was read from the Sociedad Rural Argentina inviting the Shorthorn Society to send a member of the Society to be present at the Twelfth National Exhibition of Live Stock, which will be held in the Rural Society's showyards, Palermo, Buenos Ayres, in September next, and to act as judge in the classes of pedigree Shorthorns, such member to be the guest of that Society during his stay in Buenos Ayres.

It was unanimously resolved to ask Mr. A. S. Gibson to go out under this invitation as the Society's representative.

The Council then adjourned over the autumn recess until October 31.

At the recent Yorkshire Show we noticed on the Waterloo Cake Company's stand samples of their well-known round feeding cakes, and were informed that a large number of the prize-winning stock in the yard had been fed on these cakes. They also showed samples of their noted 97 per cent. pure linseed cakes, which they guarantee to contain 12 per cent. of pure linseed-oil, a very much higher standard than the usual make of linseed cakes. Their cotton cake, made from pure Egyptian cotton seed only, they also guarantee to be 97 per cent. pure.

Railway Rates for Agricultural Produce: Railway Managers' Views.

The Earl of Jersey's Committee, which is considering the question of alleged preferential railway rates given to foreign and colonial produce, continue to take evidence, and among the latest witnesses was the general manager of the Great Northern Railway Company, Mr. Bury, who, in the course of his evidence, stated that the Great Northern, the Midland, and the North-Western Railway Companies, in consequence of the difficulties which were found by the traders in understanding the authorised scale of the grain rates, had made 3s. 3d. per ton the basis figure, and 1d. per ton per mile for each distance from eighteen miles up to 141 miles, and beyond that distance 1d. for every two miles. This was less than the authorised rates. It was a general rule among the railway companies that the shortest route governed the rate. Between Hull and Newark there was very keen water competition, and with the very low rate of 6s. 8d. per ton for barley the Great Northern got a very small proportion of the total traffic. From Hull to Newark via Lincoln was sixty-eight miles, and only fifty-three miles from Goole, which port, together with the water competition by the Trent Navigation, governed the rate. There were various ways of getting to Newark from Hull, the distances being respectively 93, 112, and 117 miles. If they were to fix the rate according to a mileage rate, the Hull rate would be very high, and there would not be any Newark traffic going from Hull, as it would all go to Goole. That was supposing there was no water competition via the Trent, but the water competition had to be borne in mind in fixing the Goole rate. The Great Northern grain rates were a good deal lower than the maximum rates. If equal mileage rates were put in force, only one railway would be available to the Newark maltsters for Hull, and that would apply to everywhere else placed like it. That would absolutely kill competition.

Colonel Kenyon-Slaney: It still pays the long-distance railway to send their traffic, although it is, perhaps, 30, 40, or 50 miles longer, and, therefore, there must be a considerable margin of profit for the short line?—It is making rather more than the other.

Sir James Mackay: Could you take mileage rates in the case of competing traffic?—You could not have competition if you took mileage rates; they would kill it.

The Witness went on to say that there was no preference whatever given to foreign potatoes over home-grown, put down in Boston Dock. It was the policy of the Great Northern Board to do everything they could to encourage the home produce, because the money realised by it was spent in the district, whereas the money that the foreign 5 producer gained was spent abroad.

Mr. Gooday: What do you think of the proposal that there should be a special department of the Board of Agriculture to settle disputes between the farmers and the railway companies?—The substitution of the Board of Agriculture for the Board of Trade would be disastrous both to the trade and to the railway companies, and would most certainly lead to the confusion which invariably results from divided authority. The Board of Trade have a staff with great technical knowledge, and if any great difficulty arose with regard to agriculture they could call in the assistance of the Board of Agriculture; whereas, if it were in the hands of the Board of Agriculture, they could hardly fail to be partial to the agriculturist.

Mr. Lambert: There is no conciliating authority to which the agriculturist can now appeal with regard to preferential rates on foreign produce? The conciliation clause in the Act gives the Board of Trade power, "if there is reasonable ground for complaint, to call upon the railway company for an explanation, and endeavour to settle amicably the differences between the complainant and the railway company."

Mr. Haygarth Brown: Would the railway companies object to the conciliatory jurisdiction of the Board of Trade being extended to questions of preference which have hitherto been considered questions of how not to be dealt with by them?—I do not see any objection to its being extended.

Sir James Mackay: But you would object to the Board of Agriculture taking up agriculturists' grievances against railway companies, and bringing railway companies before the Railway Commissioners, and paying the expenses of the action out of the consolidated fund? Yes.

Mr. William Forbes, of the London, Brighton, and South Coast Railway Company, said that water competition played a very important part in settling a great many of the rates on the Brighton Railway. The company desired in every way to develop their local industry, and gave no preference to foreign produce at the expense of home produce. The Brighton Railway was not earning dividends on the goods business. Its average earnings per ton of goods traffic did not exceed 6s. 6d., and out of that at least 50 per cent. went in terminal expenses, and therefore they were left with a little over 3s. per ton for hauling the traffic, paying all the expenses of the permanent way, and so on. The company carried over 55,000,000 passengers a year and did everything they could to promote the growth of the population on the railway, and for that reason did their utmost to encourage the conveyance of goods.

The principal witness for the North-Eastern Railway was Sir George Gibb, the general manager, who said they made no difference between the rates of home and foreign produce, and he believed that applied to all railway companies. All questions about railway rates were essentially questions of detail, and it was necessary to consider rates for important staple traffics not only in classes but also individually and separately. Railway rates had grown up by constant consultation between railways and traders, and were governed by considerations of cost and by principles of commerce which exercised a compelling force from which neither railways nor traders could escape.

There was one feature of import traffic which necessarily determined the nature of the provision made for its carriage. An immense traffic passed over the main routes from the comparatively few ports to the comparatively few districts in England which were densely populated. These dense areas of population were centred in London, Yorkshire, and Lancashire, and a small area around Newcastle; but outside these there was little else than country districts. There were 8,900 railway stations in the country. Out of the total value of the imports in one year of £487,000,000, £460,000,000, or 94 per cent. of the total value was imported through thirteen out of seventy ports. Between every port there was keen competition for the imports, and there was also sea carriage from port to port competing effectively with railway carriage. The ports, in addition to being available for the entrance of foreign merchandise, were also used for the distribution throughout England of local merchandise, and this added to the density of the traffic on the main routes leading to and from the ports.

Asked as to the effect of inland navigations on railway rates, witness said that in many places where they existed they were most effective competitors with the railways, and carried a large portion of the traffic. As to the Board of Agriculture taking the place of the Board of Trade and becoming a sort of prosecuting attorney, he strongly deprecated such a step. Why should the largest industry of the whole country, agriculture, get a sort of cheap law provided at Government expense? As regarded the farmers' grievances, they arose from lack of co-operation and from their entire lack of proper packing, grading, and concentration of their produce. The farmers could do a good deal to help themselves as well as improve the railway companies' traffic if they were left alone and got rid of agitators.

The Trials of the National Potato Society.

Potato trials of considerable interest are being conducted in various parts of the country, under the auspices of the National Potato Society, and may be inspected by members and others interested. The following are the counties, and intending visitors are advised in each case to communicate with the gentlemen supervising the trials, whose names and addresses are appended:

Berkshire: Prof. Percival and Mr. C. Foster, University College, Reading.

Surrey: Mr. A. Dean, 62, Richmond Road, Kingston on Thames.

Warwickshire: Mr. H. Dunkin, Coventry Road, Warwick.

Somersetshire: Mr. J. Ettle, Stanley Grove Road, Weston-super-Mare.

Oxfordshire: Mr. S. Heaton, Hill View Road, Oxford.

Northumberland: Prof. Gilchrist, College of Science, Newcastle on Tyne.

Shropshire: Mr. G. T. Malthouse, Harper Adam's College, Newport, Salop.

Cheshire: Mr. W. Neild, The College, Holmes Chapel.

Yorkshire: Mr. T. Redington, Agricultural College, Leeds.

Staffordshire: Mr. J. C. Rushton, County Education Offices, Stafford.

Worcestershire: Mr. J. Udale, Ombersley Road, Droitwich.

Valuable trials are also being conducted at Burgoyne's Farm, Impington, near Cambridge (Histon Station) by the agricultural department of Cambridge University, and may be inspected by members. The farm superintendent is Mr. H. Henshaw.

Messrs. Poad and Sons, York, and Wm. Deal, Kelvedon, Essex, are conducting trials of planting at different distances apart.

Potato Seed Tests.

Mr. Scarlett, the well-known Scottish potato seed-grower, who has over 400 acres of potatoes in Midlothian and elsewhere, has a testing ground at Chancelot, Leith, where he has some sixty different varieties under test, his stocks including practically all the best known of the older varieties, together with most of the newer varieties. By way of making his seed tests as useful as possible, he has his test plots triplicated in a double sense. Of each variety one section of sixteen roots is grown from and "seconds," one from full-sized uncut seed, one from full-sized cut tubers. Of each variety, also, one row is left without being earthed up, while another has been slightly earthed up.

It may be remembered that in the paper on "Potato Culture," which he read before the Horticultural Society last autumn, Mr. Scarlett intimated that, from facts which had come under his notice, he had come to greatly doubt whether it was desirable to earth up the crop at all, seing that the potato was a sun plant, and that he would have this question fully tested by another year. He has now had abundant proof of the fact that in the case of the early varieties of potatoes it is a great mistake to have them "furred up" too deep, and that they should either be left without earthing up, or otherwise the earthing up should be of the lightest possible character.

Among all his early varieties he found only one exception to this rule, and that was in the case of the Dalmeny early, which showed a marked upward habit of growth, so that the plots of this variety which were not earthed up showed a large proportion of "greened" tubers. But all the other early varieties showed the best results when they were either left without earthing up or otherwise had only a mere scratch of a furrow between the rows. In the case of the late varieties, Mr. Scarlett is unable to speak with the same decisiveness as yet, but judging from present appearances he is disposed to believe that the late varieties which have been earthed up will show better results than those which have been grown on the flat.

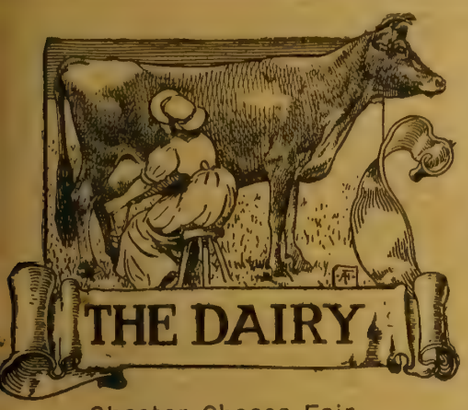
Still another important point has been dealt with in the potato test grounds at Chancelot this year. Many growers know to their cost the loss caused by the wire-worm and other such pests among their potato crops, the seed planted in the spring time being often in large measure destroyed by such pests. As the potato seed tests proper at Chancelot this year are on soil that has for over five years been cropped with rhubarb, and was consequently largely infested with the worms which follow in the trail of a rhubarb crop, Mr. Scarlett readily availed himself of the chance of testing the merits of the new anti-pest cure, "Vaporite," invented and patented by Mr. Strawson.

Amongst turnips an extremely interesting series of crosses was seen in the first year, including swede crossed with swede, swede with yellow turnip, swede with white, white with yellow, etc. The series included reciprocal crosses, and numbered nearly one hundred distinct kinds. Former crosses between swedes and yellow turnips were shown in seed, and it was instructive to find in some that constitutional inability to produce the usual quantity of seed had resulted in the plants forming a mass of fine twiggy shoots.

A variety of manurial, feeding, and other experiments are conducted at the farm and elsewhere in the county.

This substance is so composed that when sown on the soil, and then ploughed down, it gradually liberates a gas which asphyxiates the soil pests in their burrows, and that without any harmful effect whatever on the plant. The Vaporite had proved an unqualified success at Chancelot, as not a single tuber was found to be injured by worm holes, whereas, if it had not been for the Vaporite the crop on that low-lying moss-loam, after rhubarb, would have certainly been greatly injured by the worms.

Early on Wednesday morning a thunderstorm of exceptional severity broke over the town of Bridgwater and neighbourhood. Several horses and horned beasts were killed by the lightning, and some ricks of hay were ignited and destroyed.



Chester Cheese Fair.

Concerning this fair held last week, Mr. Challinor, secretary of the Cheshire Dairy Farmers' Association, reports as follows:—Pitch about 50 tons at the opening; there was a good representative attendance of buyers. The tone was good and prices for best lots were 56s. to 63s.; medium 48s. to 54s.; lower qualities down to 45s.

A Pure Milk Society.

The Wensleydale Pure Milk Society has been formed to provide a supply of clean milk and also to secure clean conditions of conveyance. Arrangements have been made with farmers in Wensleydale to provide the society with all the milk they produce, under certain strict rules as to sanitation and clean milking. A bottling depot has been constructed at Northallerton by the North-Eastern Railway Company, who have given every encouragement to the project. To this centre the farmers are required to despatch their milk for bottling, after being cooled. In addition to bottling the milk, it is re-filtered and cooled down to 40 deg. Fahrenheit or thereabouts at the Northallerton depot, and is kept at that temperature in a refrigerated atmosphere until its despatch by train to its destination. The Milk Society has at its head ladies and gentlemen of influence belonging to York and Newcastle, and, says the "Yorkshire Post," whilst it is believed that the enterprise is likely to be a commercial success, the main object of the promoters is to be the improvement in the cleanliness and the purity of the milk, and in the methods of agricultural production. It will be to improvements in the direction indicated that any profit which may accrue from the undertaking over 5 per cent. on the share capital, will be devoted.

Examinations in Dairying.

The next examination for the diplomas and certificates offered by the British Dairy Farmers' Association will be held at the British Dairy Institute, Reading, on September 7, 8, and 9, entries to be made by August 29, to the secretary, Mr. Young, at 12, Hanover Square, London, W.

The association grants to any candidate, male or female, who satisfactorily passes the necessary examinations:—

(a) A diploma and silver medal for proficiency in the science and practice of dairy farming and dairying.
(b) A teacher's certificate for proficiency in the science and practice of dairying.
(c) A certificate of merit for proficiency in the theory and practice of butter-making.
(d) A certificate of merit for proficiency in the theory and practice of cheese-making.

Sunday Harvesting: Interesting Point.—Two farm labourers appeared before the Collumpton (Devon) magistrates on Tuesday to ask them to order Mr. F. W. Cuming, a well-known agriculturist of the district, to pay them a week's wages in lieu of notice. The complainants had both refused to take part in Sunday harvesting, whereupon they were dismissed. Mr. Cuming said it was a big labour question. He should not have asked the applicants to do any harvesting if he did not think it was necessary. The Bench held that the work the complainants were asked to do was not ordinary Sunday labour, and they ordered defendant to pay the men a week's wages and costs.

Agricultural Resources of West Africa.—It is officially announced that the Colonial Secretary has decided that it is desirable to appoint an officer to examine and report upon questions relating to the development of the agricultural resources (including cotton) of West Africa. He has selected Mr. Gerald Dudgeon for the new appointment with the title of Superintendent of Agriculture for the British West African Colonies and Protectorates.

PRACTICE WITH SCIENCE.

Agricultural Education in Lancashire.

The Lancashire Education Committee have recently issued a pamphlet in which is set forth the scheme of agricultural education to be carried out at the County Council Farm, Hutton, the County Council School at the Harris Institute, Preston, and in the various parts of the county, during the season of 1905-6. The subjects cover a wide area, and certainly the scheme provides for such a sound tuition in the various branches of our greatest industry that the agriculturists of Lancashire cannot complain of want of education for their sons in farming.

It may be mentioned that the County Farm, consisting of 157½ acres, is situated at Hutton, a little more than three miles from Preston, and within ten minutes' walk from Hutton and Howick Station, which lies on the direct line from Preston to Southport. The permanent dairy and poultry schools are located on this farm, and for these suitable classrooms and a chemical and bacterial laboratory have been provided. Provision is also made, both in the school-house and in a neighbouring hostel, for the residence of the pupils during their course of study.

Some idea of the extent of the dairy work carried on at the farm may be gained from the fact that 6,786 lb. of butter and 23,256 lb. of cheese (including Lancashire, Cheddar, Stilton, Wensleydale, Port du Salut, Pont l'Evêque, and Cream Cheese) made at the farm were sold last year. Most of the farm is laid down in grass; but a portion is reserved for educational plots, on which are cultivated typical roots, forage plants, and grasses.

The live stock, in addition to the horses kept for ordinary farm work, consist of about 100 head of Shorthorn dairy cattle, 10 Jerseys, and from 120 to 150 pigs (Tamworths, Berkshires, and Large White Yorkshires), which are used for pure breeding and crossing purposes.

About 1,000 head of poultry are also kept. These comprise the following breeds:—Andalusians, Barred Rock, Brown Leghorn, Buff Orpington, Dark Dorking, Faverolle, Houdan, Indian Game, Silver Wyandotte and White Wyandotte. Some of these are used for pure breeding, some for cross breeding, and others for laying and fattening purposes.

It will thus be seen that every facility is offered to those who will subsequently engage in agricultural careers not only to obtain a thorough practical acquaintance with all the ordinary operations connected with a dairy and poultry farm, but also to receive instruction in the scientific principles underlying the same, and to make educational experiments as to the best methods of culture both of plant and animal life.

Downton College of Agriculture.

The fifty-first session of the College of Agriculture, Downton, Salisbury, terminated on the 10th inst., when the following awards were made:—

The certificate of membership or diploma of the college to Mr. B. S. Egerton, Elmhurst Court, Chislehurst; Mr. A. M. Taylor, Norway House, Bishopston, Glamorgan; Mr. J. I. H. Friend, North Down, near Margate; Mr. C. Vardon, Langton Vicarage, Tunbridge Wells; Mr. G. M. Winder, Fairmile, Ottery St. Mary, Cornwall; Mr. C. W. Hughes, Bryn Hawddgar, Llanarthing, Carmarthen; and Mr. A. Anderson, 4, Greenhill Gardens, Edinburgh. The college scholarship, valued £15, Mr. B. S. Egerton; the "Bles" prize, valued £10, Mr. G. V. Wellesley, Uphill Rectory, Weston-super-Mare; the "Wrightson" prize, valued £10, Mr. H. S. M. Fellowes, Glencairn, Winchester.

Prizes in various subjects were given as follows:—Mr. A. M. Taylor, for knowledge of live stock, agriculture, and agricultural chemistry; Mr. G. V. Wellesley, agriculture, veterinary science, forestry, organic chemistry, bookkeeping, and ploughing; Mr. J. I. H. Friend, veterinary science; Mr. A. Anderson, forestry and surveying; Mr. B. S. Egerton, building construction and best collection of forest foliage; Mr. G. M. Winder, practical chemistry, bookkeeping, waggon driving, and best collection of grasses; Mr. H. S. M. Fellowes, practical chemistry, bookkeeping, and surveying; Mr. F. Sutton, Hamstead House, Bosham, Chichester, milking and veterinary science; Mr. F. J. Barnard-Hankey, agricultural and practical chemistry; Mr. W. Hopkins, Exe View, Exeter, forestry and bookkeeping.

Armstrong College.

From the agricultural department of the Armstrong College, Newcastle, come two pamphlets, viz., one dealing with "Summer Frosts and their Effects on Swedes and Mangolds in the North of England," and "Guide to Experiments for 1905" at the Northumberland County Farm, Cockle Park, both being the work of Professor D. A. Gilchrist, M.S.C., director of the college. They form interesting reading and should prove very serviceable to farmers in the north.

From the same college has also come a prospectus of the courses of study in agriculture, forestry, estate management, and dairy farming, carried out at the agricultural department, and these include the following:—A three years' degree course, qualifying for the B.Sc. (Agriculture) Degree of Durham University; college diploma course in agriculture, extending over three winters, leaving the summers free for farm work; selected agricultural classes for one winter; courses in forestry and allied subjects, which are now considerably developed owing to the appointment of a lecturer in forestry; courses in estate management for land agency students; and a six weeks' course in agriculture and in dairying. Scholarships and exhibitions in connection with the above are awarded by the County Councils of Cumberland, Durham, Northumberland, and Westmorland.

A prospectus with full particulars of classes, fees, scholarships, etc., may be obtained from the secretary, Armstrong College, Newcastle-upon-Tyne, from whom also the college reports on field and other experiments may be obtained.

Agricultural Experiments at St. Andrew's University.

The members of the East of Fife Farmers' Club recently paid their annual visit to the experiments carried out by Dr. John Wilson, lecturer on Agriculture in the University of St. Andrew's. The experiments had reference mainly to the improvement of farm plants by crossing and selecting, and they were now in the fifth year. The number of the new varieties of crossed oats raised by Dr. Wilson had now been reduced to about fifty, and he found that after growing a sufficient quantity for testing, a very considerable proportion of them was now showing evidence of remaining true to type.

The examples inspected showed great vigour of constitution, and marked variety of form. The new wheat hybrids between bearded and beardless varieties had further demonstrated the fact that the bearded forms were the most readily fixed. Bearded varieties were seen to have arisen from seed of beardless ones. Several of the hybrids presented quite novel types.

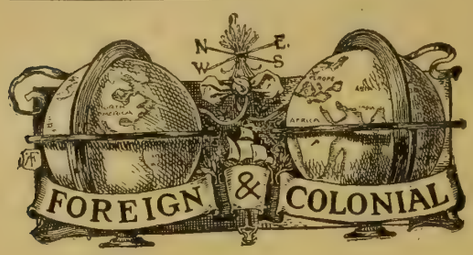
The new crossed barleys were of much interest, Dr. Wilson two years ago crossed a two-rowed variety with such varieties as Egyptian and six-rowed, as well as with bere. Last year the plants all showed intermediate characters, but the seed from these had produced plants, now in ear, which had split up into a variety of forms. Obviously a certain proportion had reproduced the characters of the originals, for heads indistinguishable from Egyptian barley and bere were to be seen. No doubt the proportion would be found at harvest to conform to Mendel's hypothesis, which last year was substantiated for wheats and the previous year for oats.

Over five hundred seedling potatoes were seen in the plots, almost all being derivatives of a former series raised by Dr. Wilson. The present series was sown five months ago, and the great majority of the plants were so far advanced as to yield a good crop of fully developed tubers at lifting-time. Much variety was seen to occur in seedlings from the same fruit. A species of tuber-bearing potato, Solanum Commersoni, quite distinct from the ordinary potato, was an object of special interest. It was said to like damp soils. The habit of growth was relatively weak. It was flowering freely, and Dr. Wilson had reason to hope that he would secure crosses between it and the kinds ordinarily grown. Experiments with peas were also in progress, the crosses effected including garden, field, and sugar peas.

Ashbourne Fair.—The show of horned stock at this old chartered August fair for cattle, sheep, and horses, held on Wednesday, was very small and of a moderate quality. Trade, generally speaking, was not good, except for the best classes of young dairy cows at hand, these making from £19 to £22, secondary £16 to £19, calving heifers £14 to £16. Barren stock a bad trade, £10 to £12 for best young cows. Bulls were a very poor show, and trade quiet. Beef trade quiet, without much inquiry; best heifers would make 6½d. per lb., cow beef 5½d. to 6d. The show of sheep was good, principally lambs being shown, making from 25s. to 32s. for the best, smaller lambs 23s. to 26s. Store wethers 42s. to 44s., fat wethers 8d. to 8½d. per lb. In the horse fair the show of animals of the heavy type was not large. Good, sound, useful horses were scarce, for which there were fair inquiries; about an average price given.

British Possessions
beyond the Seas
AND THEIR
London Representatives.
NOVA SCOTIA.

Offers advantages to British Agriculturists with moderate capital. Improved Farms at Low Rates. Fertile Lands. Famous Fruits. Enormous mineral deposits of Coal, Gold, Silver, Iron, Copper, Lead and Tin. Climate temperate and healthy. Easily accessible to all the principal markets.—Full information supplied by the Agent-General for Nova Scotia, MR. JOHN HOWARD, 57a, Pall Mall, London, S.W.



New South Wales Produce in London.

There is now being held at the famous Guildhall an exhibition of the products of New South Wales, and it is one well worth a visit, showing as it does the capabilities of one of our most promising colonies. The objects of this exhibition are to help the people of Great Britain to gain a better knowledge of Australia, the most distant part of the Empire; to let them realise more fully the present great and prospective wealth of this vast island continent, lying far away below the Southern Cross; to become acquainted with the immense scope for prosperous settlement there; to enable them to realise the stores of wealth lying buried in the soil awaiting the touch of labour and capital to make them spring into life; also to enable the merchants and manufacturers of Great Britain to realise more fully the vastness of the trade and commerce of Australia, and to induce them to do all in their power to keep within the Empire the great trade which is now being so eagerly sought after by foreign nations.

How great has been the progress of the trade of New South Wales may be imagined when it is stated that eighty years ago the amount was about £400,000 annually, whereas now it exceeds 94½ millions. Practically all the products of the colony may be seen at the exhibition, and a notable feature is the arch of wool made from 350 fleeces, representing wool from nearly every district in New South Wales. This, we understand, is the first time an arch composed of wool has been erected in London, and its novelty is therefore increased.

Wool has been even a kinder friend to Australia than gold; for in just over fifty years the value of wool production has amounted to £760,000,000, as against 514 millions of gold, and the annual output of wool is now £20,000,000 New South Wales, the Mother Colony, claiming nearly half of this production. This season the prospects are better than ever before, the wool promising to be the most even and finest clip ever recorded, and the increase on last season's output very great

All the other great industries are represented wheat, sugar, dairying, fruit, wine, fibre, plants, timbers, and many other products. The sugar from the extensive cane fields in the North Coast, and the wheat from the more temperate climate of the South, make one realise that there is no crop that cannot be produced in some part of the Australian continent. What Australia wants, however, is more population, and this exhibition should do much to induce many to emigrate to our island colony.

Denmark's Dairy Industry.

His Majesty's Consul at Copenhagen, Captain J. Boyle, in his report for the year 1904, states that the trade of Denmark during the year was generally dull. Agriculture suffered on account of the long drought, which burned up the grass and damaged the beet crop, without in any way causing butter prices to rise. The export of home produced goods was £19,600,000, of which agricultural products accounted for £18,200,000. The value of Danish eggs exported in 1905 was £1,511,000, in 1904 only £1,378,000, and this decrease is due to a corresponding decrease in the quantity exported, viz., from 25,250,000 to 21,200,000 cases. This falling off is principally due to the hot weather, which ruined a large number of eggs for export. The competition in the branch of trade is very strong from Russia, and it appears that the shells of Danish eggs are rather thin, and that in consequence there is a large percentage of breakage. The attention, however, of the Danish producer has been called to this fact, and for the future care will be taken, so it is said, to provide more chalk and pulverised shells (oyster and mussel) for hens. As usual, almost all the eggs were sent to the United Kingdom.

The total export of Danish butter during 1904 was 1,630,600 cwt., against 1,602,600 cwt. in 1903, showing an increase of 28,000 cwt.; but as the butter prices during the whole year were 2s. to 3s. per cwt. lower than in 1903, there was a decrease in value amounting to about £22,000. The total export of all butter from Denmark was 1,957,500 cwt. The bulk of the butter exported went to the United Kingdom, viz., 1,780,000 cwt., which was about 100,000 cwt. less than in 1903, but this was exported to Germany, and it is looked upon with much satisfaction that there is now another market, which in years when production is great can take the surplus and prevent the British market being overstocked. The butter in transit viâ Denmark is mostly Finnish and Siberian butter.

The quantity of bacon exported was 1,853,800 cwt., which shows a considerable increase when compared with 1903, when exports amounted to 1,614,200 cwt. Almost the whole was shipped to the British market, viz., 1,840,000 cwt. The value of the quantity exported in 1904 was £4,460,000 (in 1903 £4,154,000). The small increase in the value compared with the quantity is accounted for in the low prices which were paid for bacon in the United Kingdom during the whole of the year. The total number of animals killed for export in Denmark was, during 1904, about 1,700,000, and during some weeks 40,000 were slaughtered. If the development in the production increases in the future in the same proportion, there is hardly any doubt but that the prices paid for Danish bacon must go down, as there is no other market than the British, where it has to compete with the Irish and Canadian. In spite of the low prices there is no doubt that the production is a profitable one as long as the feeding is carried on in an economical and rational way.

Canadian Experimental Farms.

In an appendix to the eighteenth annual report of the Canadian Minister of Agriculture for 1904 recently issued, it is stated that the general results of farm work throughout the Dominion, although not so uniformly favourable as in some other years, were, on the whole, fairly satisfactory. The lengthened drought which prevailed in the Maritime Provinces during June and the greater part of July reduced the hay crop considerably, leaving it from 20 per cent. to 50 per cent. below the average. The grain, also, in most districts for the same reason gave lighter crops than usual, while pastures were seriously injured.

In Quebec and Ontario the general conditions were more favourable. The season, however, was cooler than usual, and although the rainfall in most places was sufficient, the crops did not make rapid growth. Owing to the severe winter the fall wheat in Western Ontario was much injured, and nearly one-fourth of the crop was ploughed up. The average yield of that harvested was considerably below the average of past years. Spring wheat gave a yield about equal to the average, while barley and oats gave excellent crops, considerably above the average returns. In hay, also, the crop was well above the average.

In carrying on the work of the experimental farms from year to year (the report proceeds), persistent efforts are made to assist farmers with information in regard to the maintenance of the fertility of their land, its proper treatment, and in the selection of highly productive seed of best quality; also to aid them generally in their endeavours to overcome difficulties which present themselves from time to time in the carrying on of farm work. These efforts have been much appreciated. The mass of new facts bearing on agriculture contained in this eighteenth annual report gives evidence of the skill and assiduity of the officers composing the staff of the experimental farms, and of their untiring efforts to benefit the cause of agriculture.

At all these institutions visiting farmers are always welcome, and those who have an opportunity of personally inspecting the work in progress, after seeing its extent and its practical character, usually leave with a higher regard for the farms than they had before. Those who are unable to visit any of the farms can obtain, for the asking, the annual reports, in which the experiences gained at all the experimental farms are given, the perusal of which will give the reader, wherever he may be located, much information of practical value. Bulletins also are issued from time to times on special subjects, and are supplied free in the same manner at the reports.

EAST ANGLIAN NOTES.

From dawn to sunset work in the harvest fields has been pushed forward, and in the northern part of East Anglia, where all the white-straw crops have come to maturity together, the cry is for more labourers, in order that the fruits of the fields may be gathered in without waste, but, notwithstanding this sudden demand, especially in Norfolk, sufficient labourers for this year's short period of harvest are not at hand. Machinery is being employed this season more extensively than ever before, and in the county of Essex few fields now remain to be cleared. So that throughout the Eastern Counties we see on each farm every day yet another corn-stack rising to the grating noise of the elevator that hoists its long, wooden neck like a fire-escape higher and higher with the growth of the great rick which it is feeding—in fact, a more gratifying sight could not meet the eye of an Englishman than a drive through rural Essex at the moment, for on every hand one sees men busy either building corn-stacks or the thatcher busy at work securing them against the coming rain and damp weather.

Rain at the moment would do more good than harm to the barleys in Suffolk and Norfolk if it were followed by a nice drying period, for it would then take away some of the steely appearance so many of them now possess, and give a more even colour to the sample. In this connection it may be said that the farmer is always grumbling about something, whatever the weather may be, but it really it not his fault. For if you congratulate him now upon the splendid weather which he has had for harvest work, especially now the majority of his grain is secured, he may take you from the golden stubble, where his last new cornstack is rising rapidly, to the next field, where for days his promising mangold crop has flopped and turned yellow for want of rain. On the other hand, should the rolling clouds that are now traversing the sky bring heavy rain, he would take you in a day or so from the field that contains his refreshed roots back to the stable where the half-finished corn-stack stands drenched, and the scattered barley lies soaking on the ground. Anyhow, a little rain is wanted for the grass and roots, while the barleys, during their three days' and three nights' recognised lay in the field, would benefit with a slight shower.

On Saturday last, it being market-day, some sheep were driven through some streets in Norwich, when one of them entered a furniture shop by the doorway, and, being struck with its elaborate surroundings, turned when seeing its companions outside, jumped through a 10-ft. plate-glass window, landing in the street unhurt. The question being discussed now between the drover and the furniture dealer is, Who is to pay the damage?

Several times in these columns attention has been called to experiments that are being made in the growing of beet sugar in various parts of Essex by the Essex Education Committee of the Essex County Council. In regard to this suggested industry, the Minister of Agriculture's reply to Mr. Morrell says:—"So far as I am aware, no factories in Great Britain have as yet been established for the extraction of sugar from English-grown beet; but I am informed that the subject is under consideration in more than one quarter, from which the capital required for the purpose may possibly be forthcoming. I do not think that we can carry our enquiries any further until the feasibility of the proposal has been tested on a commercial basis."

Subjects have been selected by the London County Council for vacation and recreation schools, but our great industry is put in the background. We would suggest that at the next vacation the study of gardening and the tilling of the soil should be included. For this purpose the children could be taken somewhere out into the country, where they might have each their own plots of land to look after. Just this very thing is now being tried in Germany. Experimental forest schools have been instituted by Berlin and Charlottenburg, in which young children go out by tram to the woods every morning and spend their entire day there. A barrack or shed of some kind forms their headquarters, but their indoor lessons are of comparatively short duration, and the soil and its products provide at least the moiety of their studies. The experiment so far is being restricted to the more weakly children, but there is no reason why it should not be extended to include the more robust. Such an example in this country would do much to make town bred children appreciate a rural life.

IMPLIED WARRANTIES.

To few pigs is it given to achieve the fame which posthumously crowned the memory of the central figure in the old case of Burnby v. Bollett. In the case in question, a farmer named Bollett had bought the carcase of a pig at the stall of one Penrose, in the public shambles at Lincoln; but having other business to transact in the city, he left it temporarily hanging up on Penrose's stall. Meanwhile a Mr. Burnby came along, and took a fancy to the pork. He tried to buy it from Penrose, but the letter told him it was already sold to Bollett, who would probably be open to take a profit on his bargain. Accordingly, Burnby sought out Bollett, and bought the pig from him and took it home. But buying in haste may lead to repentance at leisure. It was so in this case, and Mr. Burnby looked rather foolish when he discovered the next day that the carcase which he had bought so eagerly and without solicitation was measly, rotten, and wholly unfit for human food.

Retaliation loomed large in Mr. Burnby's mind, and he straightway commenced proceedings against the otherwise lucky Bollett to compel him to refund the price. But Bollett worked on free trade principles, as we know them to-day. That is to say, he was free to deal with Burnby on his own ground and without restriction; but when Burnby attempted to carry the war into Bollett's country, the latter sheltered himself behind a barrier of protection, known as *Caveat emptor*, which effectually kept Burnby out. In other words, Burnby sought to recover back his purchase money on the ground that the transaction implied a warranty that the carcase was in a sound and wholesome condition, and fit for human consumption; whilst Bollett repudiated liability because he contended that the maxim *Caveat emptor*—"Let the purchaser beware"—applied, and that the purchaser bought at his own risk.

At the Assizes, the judge and jury leaned towards Burnby, and held that he was entitled to a verdict, thinking that when a man bought a carcase of meat he ought at least to get a sound one. But Bollett appealed, and three Barons of the Exchequer sat in solemn conclave on the issues raised by that putrid pork. Now, it was admitted that if a butcher or dealer in meat exposed meat for sale for the purpose of human consumption, he may impliedly warrant that the meat is reasonably fit for the purpose for which it is sold. The seller in such a case not only knows the purpose for which his goods are required, but the buyer is justified in relying on the seller's skill and judgment as to the condition of the meat. But this does not apply in the case of an ordinary individual, not clothed with the character of a general dealer in the commodity to be sold, who bonâ-fide sells meat for human consumption. A naked sale of an article to be eaten is not necessarily actionable if the article proves to be unfit for consumption.

Bollett did not hold himself out as a dealer in meat, and had not, in fact, exposed the carcase for sale. He was sought out by Burnby, who was quite as well able as Bollett to judge of the condition of the meat. Bollett had throughout acted fairly and squarely, and had not been guilty of any fraud or misrepresentation, nor had he given a warranty in any shape or form. The loss had to fall on one of two innocent parties, and as there were no circumstances to prevent the application of the maxim, the purchaser became the victim. Thus, at the end of the litigation, poor Mr. Burnby looked more foolish than ever.

But he has had one consolation. The story of Burnby and Bollett, and their pig, although told more than fifty years ago, is still the leading case on the application of the rule of *Caveat emptor*, and is the foundation of Section 14 of the "Sale of Goods Act," 1893, which reads:—

"Subject to the provisions of this Act and of any statute in that behalf, there is no implied warranty or condition as to the quality or fitness for any particular purpose of goods supplied under a contract of sale, except as follows:—

(1) Where the buyer, expressly or by implication, makes known to the seller the particular purpose for which the goods are required, so as to show that the buyer relies on the seller's skill or judgment, and the goods are of a description which it is in the course of the seller's business to supply (whether he be the manufacturer or not), there is an implied condition that the goods shall be reasonably fit for such purpose, provided that in the case of a contract for the sale of a specified article under its patent or other trade name, there is no implied condition as to its fitness for any particular purpose.

(2) Where goods are bought by description from a seller who deals in goods of that description (whether he be the manufacturer or not), there is an implied condition that the goods shall be of a merchantable quality; provided that if the buyer has examined the goods, there shall be no implied condition as regards defects which such examination ought to have revealed.

(3) An implied warranty or condition as to quality or fitness for a particular purpose may be annexed by usage of trade.

(4) An express warranty or condition does not negative a warranty or condition implied by this Act, unless inconsistent therewith."

An Accommodating Barn.—After perusal of following it will at once be recognised where the story comes from, viz., America:—A few years ago a farmer in Indiana built a small barn, and in its construction used green willow posts at the corners and sides. For some time nothing unusual was noticed, but after a year he noticed that whereas he had the floor near the ground it was three feet above the soil. He discovered that the willow posts instead of being dead were alive, had taken root and were growing. In their upward movement they had carried the barn along. Last spring the barn was on stilts nine feet high, and he put in a new floor and surrounded the posts with siding, thereby making a two-story affair. There is now a space of six inches between the floor and the ground, and the owner expects to have a three-story barn in the course of time!

STATE OF THE CROPS AND LIVE STOCK.

A General Survey.

Concluded from p. 217.

Rugby to King's Lynn.

This route traverses one of the most important and richest farming districts of the Midland, and at the date of travelling, June 20, it would be practically impossible to imagine anything more promising than were the crops and live stock of all kinds throughout the entire length of the journey. Upon leaving Rugby and as far as Peterborough, the line (L. and N. W.) passes through much of the richest bullock feeding land in England. These pastures were up to that time fairly green and fresh, white clover being prominent, and the whole of such pastures were thickly peopled with a wealth of Welsh Runts, Herefords, and Shorthorns, many of them grand cattle that had cost in from £18 to £24 per head, and were having trough food as well as their pasture. In the morning these cattle were lying on their sides, enjoying the breeze, and rapidly putting on beef of a quality to suit the most fastidious West End gourmand. Occasionally herds of younger and leaner cattle intervened as followers for the earlier-matured ones. Sheep were also very plentiful along this district, a great deal of fat-lamb production taking place, and with every promise of success from a pecuniary point of view. Since Shire horses became so much of a mainstay to the farmer, a good number of these are purchased and brought up for town purposes on these rich pastures, where they develop immense substance, grow into tall figures, and are a great help in preventing the pastures from becoming rough and uneven. Colts being so treated looked wonderfully prosperous.

Peterborough to Lynn.

By Great Eastern the traveller passes through a good distance of rich fen country where tillage and corn and roots are the staple business. It is seldom that the crops throughout this journey look more promising than was the case at the above date (June 20). Wheat long in the straw, level thick of plant and well headed, barley a magnificent crop and up to this time standing well, many fields of oats, beans, and peas, too, were all that could be desired. Potatoes were looking much better than in the south, and mangolds were the best seen anywhere up to that date. During recent years fruit-growing has increased very much in this district, and immense crops of strawberries were being picked and forwarded per special trains and vans to Covent Garden, Manchester, and elsewhere, the fruit the very perfection of its kind. The late frosts that had been so disastrous in many other districts had not visited this locality with the same severity. Live stock on the pasture land were all looking well. At the above date, from Peterborough to London, crops were looking very well, a few early crops of winter oats near the southern part of the journey quite strong, a change of colour, and a few fields badly lodged.

Derby, Nottingham, and Grantham.

At the middle of July a visit through this mostly well-farmed and substantial tract of land showed that pastures had become in most cases rather short, and a good deal of hay was just being cut, crops being heavy in the water meadows, but generally light on uplands. Wheat thick and long in the straw, barley crops in many cases very heavy, oats also level and good, though generally a little short in the straw, turnips and mangolds also a good plant, but rather backward; potatoes fair. Live stock between Nottingham and Grantham consisted mostly of Lincoln Red cattle, Shire horses, and long-woolled sheep, and all of these were looking remarkably well. Several fields of oats were turning colour rapidly, ready for an early harvest.

Birmingham to Shrewsbury.

This journey, taken at the end of July, found the pastures in many instances looking much greener and fresher than in many other parts. Some good plants of roots were seen, and also good crops of wheat, oats, and barley, some fields quite ready for cutting; indeed, in several the self-binders were already busy. Cattle were of various breeds, a good number of Herefords appearing as one neared the town of cakes, at which point pastures and roots did not improve, less rain apparently having fallen.

Shrewsbury to Aberystwith.

August 1 was the date of this journey, which is a very interesting one via L. and N. W. and the Cambrian Railways. The scenery in many places is very wild and beautiful, and mountainous wilds are interspersed with a fair amount of very rich pastures and excellent tillage lands in the vales, which appear to be well farmed. The crops of wheat at the commencement of this

journey were in several instances remarkably good and ready for the cutter and the binder; some fields of barley and oats, as well as roots, looked especially full and in every way well perfected. There are a number of herds of wonderfully well bred and symmetrical Herefords along this route, and these are looking in fine condition. The Clun Forest sheep with their long tails and well rounded bodies which furnish such delicious mutton, were both plentiful and looking well, as were also their near of kin the Kerry Hill sheep. At the earlier part of the journey Black Welsh cattle and mountain sheep strike one as being conspicuous by their absence. Further down, or across the Principality, some of these were to be seen, but extensive farming had given place to some of the crofters' kind of cultivation—three acres and a cow.

About Derby and to Crewe and Around.

This somewhat roundabout district brings one into contact with many large dairies of cows for milk-selling purposes, which were looking uncommonly well (date first week in August), rain having been more plentiful; in some instances meadows by the river-sides were giving their occupants a better bite of green grass than was obtainable in most parts of the midlands. Some excessively heavy crops of oats and a few good crops of wheat are seen in those neighbourhoods; but potatoes and mangolds, swedes and cabbages, of which large breadths are grown, were wonderfully luxuriant, the best seen anywhere, and their healthy hue on the foliage bespeaks a first-rate finish. Some of the crops here were badly laid.

Hull to London.

This long journey traverses a very varied district as regards farming, taking you in parts through some of the best land and best farmed land, and in others some of the weakest and roughest in the midland district. From Hull via Doncaster one travels through a flat country, evidently very good for the growth of corn and roots for many miles. The wheat crops in this section were very heavy, and unfortunately many of then badly lodged, cutting proceeding as rapidly as circumstances would admit; oats and a few plots of barley also gave promise of heavy yields, both of corn and straw. Potatoes and swedes are also a great thing in this length, and mixed herds of cattle, mostly Shorthorns or their near crosses, many of them not of the best quality, were looking well at that date—August 10. Between Doncaster and Nottingham and Leicester one passes through a great deal of country where mines and manufactures have taken the beauty out of farming, and nothing in the agricultural line is seen worthy of comment, except, perhaps, as one nears Leicester, where some good herds of dairy cattle and a few heavy crops of wheat and oats as well as a field or two of good roots are to be seen. From Leicester onwards via Great Central past Rugby, Aylesbury, etc., the main feature of the country is pasture, and this was looking very brown and bare. More cattle and sheep are seen during this portion of the journey than in most of the other routes mentioned, several very practically good lots of Herefords, Shorthorns, and Angus, and their crosses being noticed along the route, and most of these were being fattened or living on for fattening another year. Taking things altogether, throughout the great extent of country noticed, the general prospects for harvest must be considered above the average, the prospects from cattle grazing below the average, and other branches satisfactory.

TRAVELLER.

A disastrous fire occurred at Hagg Bush Farm, some three miles to the south of Selby, on the 19th inst. Nearly £1,000 damage was done, and the wheat produce (consisting of 14 stacks) of the whole of the Hagg Bush Farm was destroyed, with the slight exception of nine acres still in the fields. The fire is said to have been caused by a spark from a railway engine which set one stack alight, and there being a gale the others soon became involved.

The Motor-car Dust Nuisance.—At a meeting of the Lancashire Farmers' Association a resolution was unanimously passed, "That the whole question of the use of the highway by motor vehicles requires the early and serious attention of Parliament." One speaker remarked that it was questionable whether it was advisable to put cattle to graze in road-side fields or to use hay therefrom, for the grass was impregnated with dust and sand; whilst another member complained of the damage from the continuous traffic of the motor cars carrying passengers between Pilling and Knot End. The farmers by whose fields the cars passed found it impossible to grow anything properly on land within 100 yards of the road. The hedges were white with dust, the grass full of it, and the grain crops covered with it.

SEASONABLE TOPICS.

Spasmodic is the word which best describes the hardy fruit crops in 1905. There is no general famine like there was in 1903, neither is there anything like the abundance there was last year. We have recently passed through districts where there was hardly an apple, plum, or damson to be seen, while in other parts of the country the trees are fairly well laden. It is the same with individual trees, and in the same orchard there are specimens carrying heavy crops and others quite destitute of fruit. At first sight this patchiness seems peculiar, but it may be accounted for without much trouble. The show of bloom was general, and the severe May frosts ruined the fruit that came within its deadly grip, but the orchards that were above the frost line escaped. Cold easterly winds in the spring also did great damage; but certain trees, orchards, and plantations were protected from the searching blast, and in these instances fruit may be found. There is no doubt, also, that insect pests are, to some extent, responsible for the shortage of fruit, and apples in particular, have suffered, as great damage was done early in the summer by the apple-sucker (Psylla mali). It has been observed that the low average of crops will make it good for those who are fortunate in having fruit, in the way of prices; but there are no signs of this at present. Stone fruit is selling fairly well in places, but apples are very cheap. Prices may improve later on, but it would seem as if foreign produce has got such a foothold in British markets that the price of home-grown fruit, be it scarce or plentiful, cannot be other than low.

Comments on the Fruit Crops.

* * *

At the little village of Graveney, in Kent, there recently passed away an old man, James Hodgman by name, at the mature age of 92. For over half a century he was the village sexton, for more than sixty years he was a Sunday-school teacher, and last March he celebrated the 70th anniversary of his wedding. The old man was the son of a soldier who fought at Waterloo, and though not a native of the village, he resided there eighty-five years, and with the exception of one brief change at the outset, had been on the same farm the whole of his life. A wonderful record without a doubt, and we think the fact of a man being four score years on the same farm is well worthy of comment. We read of similar instances occasionally, but fear that the days of such records will soon be over. Restless change is the disturbing spirit of this age, and we see little of that sturdy, plodding character which marked the old "stick-in-the-muds" as some people liked to call them. No matter what they are called, however, the old stayers have done more than they are given credit for in the building up of the nation, and they may be justly called the backbone of Britain. The very fact of a man serving fifty years in one capacity is proof of his worth, even if he be only a farm labourer; and we question whether the rush and excitement of this age will tend to produce a race of men who will possess the endurance, to say nothing of the patience and plodding contentment necessary to complete such a record of service. All honour, then, to such veterans as James Hodgman.

British Backbone.

* * *

Since the milk trade reached its present dimensions, the question of giving cows pure water to drink has come forcibly to the front, and it is not too much to say that it is a matter which will receive still greater attention in the future. In the old days little heed was paid to what cows drunk so long as it was liquid of some kind, and many of the pools and drinking places contained nothing better than sewage. We have purposely written the above sentence in the past tense because we are aware that certain improvement has been made in the way of providing pure water for milking cows, but we have not reached perfection yet by a long way. On many farms where milk is sold, the water available for the cows is of a very doubtful character, and one can easily connect stagnant slimy pools containing discoloured water with tainted milk. In some cases the farmer is to blame for not keeping his waterings clean and in order, and in others the landlord is responsible for bad drainage and faulty water supply. Both parties should be brought to realise their responsibilities if there is the slightest risk of the innocent milk purchaser being the victim.

Pure Water for Milking Cows.

Up to now there has been little need for anxiety about the welfare of the lamb flock, as pastures have been mostly bare, and the sun-dried herbage has been suitable for their digestive organs. A more anxious time, however, is in front, for the rains have set the grass growing, and though this is pleasing to the cowkeeper, it adds to the responsibilities of the shepherd. Lambs are subject to various ills when they have nothing but soft juicy herbage to feed on, and it is questionable whether the autumn is not a more anxious time for the shepherd than the lambing season in the early spring. A close watch has to be kept on the flock for any sign of failing health, and there must be no delay about change of pasture if anything unsatisfactory is observed in the condition of the lambs. Weaklings usually fall first, but when this happens it is only an indication of what may occur amongst the stronger members of the flock.

Lambs in the Autumn.

* * *

At the moment, when harvest time generally is drawing to a close and farmers in most counties are looking forward to a little respite, the most important harvest of the year is about to commence in Kent. One has to live actually in the southern county to realise what a business hop-picking really is, both to the growers and those who actually take part in the proceedings. From reports to hand it would seem that the crop does not promise to be so heavy as was at one time anticipated, though the outlook is by no means discouraging, as the return will probably run over the average. Over-luxuriance of bine appears to be the general complaint, and in places where a superabundance of growth has been made there is a shortage of hops. There will be few idle hands in Kent during the next few weeks, because men, women, and children all find employment in the hop gardens. Indeed, perhaps the latter are the most indispensable, and during the season it is useless to call at a Kentish cottage in the daytime with the idea of finding anyone at home. And during the season the county is over-run with a nondescript community from the metropolis, who make annual excusions for the "'oppin." Doubtless the few weeks in the fresh country air does these people good, but to what extent is largely a question of weather. It is true the accommodation made for the London hoppers in Kent has been improved of late years, but if the weather happens to be wet and cold their plight is truly miserable. Worst of all are the sufferings of the nomads who have no pre-arranged engagement, but simply tramp the roads in the hope of picking up employment. The growers naturally engage their pickers weeks beforehand, and it is only where the state of the hops necessitate a rush of picking that the outsiders stand much chance. In the meantime they wander along the roads, or sleep on the banks, veritable objects of misery. You see a slatternly woman pushing a dilapidated mail-cart, containing the worldly belongings and the youngest baby, and two or three older children dragging on to her skirts, while the father of the family whines a dismal story to every passer-by in the hope of getting a few coppers. If the weather is bad the sufferings of such people is more easily imagined than described.

Hopping.

* * *

From time immemorial farmers have been sportsmen, and being possessed of the characteristic spirit of delight when they can kill something they never reckon to miss any opportunity that may come along. Corn-cutting, above all other farming operations, gives an opportunity for a little indulgence in sport, and during the past few weeks some exciting scenes have been witnessed. Rarely is a field of corn cut without finding a few rabbits, and if there happens to be a wood in the near vicinity the brighter are the chances of sport. We are inclined to think that some farmers tolerate rabbits in the corn for the sake of the pleasure of killing them at reaping time, and we confess to spending a pleasant half day quite recently in this occupation. The scene was a big wheat field, and at the corners the guns were placed, while the reaper and binder rattled its way up and down and the patch of standing corn gradually grew less. At first it was only an odd rabbit that bolted, but the excitement grew intense as the cutting continued, and the frightened creatures bolted out with the object of reaching the security of the adjoining hedgerows. It was amusing to see the farm hands lose their heads and dash into the open striking wildly at bolting

Sport in the Harvest Field.

rabbits with anything they could lay hold of. These rushes hampered the shooters, but fortunately we had a couple of swift dogs which picked up the rabbits before they could reach the boundary, and by the time operations were completed, guns, harvesters, and dogs between them had accounted for nearly half a hundred rabbits. The poor creatures had a bewildering time of it, and as long as possible they hugged the cover of the standing corn. Then they made the rush which in most cases ended in death, and it is amusing what excitement prevails when the life of a poor frightened rabbit is at stake. Legs which are usually stiff with rheumatics seem to grow loose in a second, and old men who have never run for years break into a sprint if an escaping rabbit is the stake. In this case the harvesters went home enriched to the extent of a couple of rabbits each, and it was quite easy to see that the labours of the day were forgotten in the recollection of the exciting sport.

* * *

Agricultural Profit-Sharing.

Before us we have a report of a system of profit-sharing with agricultural labourers which has been adopted by a Kentish landowner with the oject of stimulating Hodge to take a greater interest in his employment, and also with the view to placing a check on the depopulation of rural districts. We are not acquainted with the details of the scheme, but every year the hands are called together, and each receives a share of the profits made on the year's working of the farms. On the last occasion of the profit-sharing each man received £2 14s., and the youths' share amounted to £1 16s. each. It is stated that the system has had such good results that numerous inquiries have been received asking for details as to the working of the scheme, with the consequence that other employers have expressed their intention of working on similar lines. No doubt the idea is excellent, and for our own part we may say that possibly farming landowners may be able to put it into effect. We fear, however, that agriculture will have to grow more prosperous before tenant farmers who have rent to pay are able to share profits with their employees.

Agricultural Imports.

The following is an account showing the quantities of certain kinds of agricultural produce imported into the United Kingdom in the week ended August 19, 1905, together with the quantities imported in the corresponding week of the previous year:—

Metropolitan Dairymen's Benevolent Institution. According to the thirtieth annual report of the Committee of Governors of this institution, which has, with other information, recently been published in pamphlet form, the subscriptions for the year ending April 30, 1905, amounted to £371 3s. 6d., and the donations £722 5s., the balance to be carried forward on current account being £479 1s. 7d. Since the foundation of the institution the sum of £12,933 14s. 8d. has been expended in relieving deserving members of the trade and their widows in old age. At the present time there are on the register thirty-three male and female annuitants and nine recipients of temporary relief, the total yearly payments to whom amount to about £800.

Agricultural Politics.

By a LOBBYIST.

There will inevitably be divergent opinions as to the influence which Mr. Clare Sewell Read had upon the political opinion of his party and as to whether his Quixotic remuneration of office was not really an act of unwisdom. My own view is that, instead of being, as he was, for nearly two decades but a lay influence in Conservatism—in fact, little more than a memory—he might have, had he so willed, diverted the party into a more sympathetic attitude towards agriculture. It may be replied that Mr. Clare Sewell Read did not possess the texture of the agitator. Most assuredly he did not, and a political agitator was not needed. The fiery cross of demagogic appeal would repel the agrarian mind. What was needed was a solid, forceful, well-restrained persistent presentation of facts. Of course, in the days of Mr. Sewell Read's mental and physical virility he would have been assured of but little support had any movement he initiated adopted the unwonted and the unconventional. In later years, of course, we have seen farmers at least willing to evolve demands, though they may not have been ready to sacrifice their partisan-fidelity to securing their realisation. All the same, Mr. Sewell Read could by his influence have persuaded his party into the cautious path of moderate encouraging reform. In the absence of this exertion, we have seen Conservatism, traditionally the agricultural faith, relapse into a sedulous cultivation of urban purposes, and actually, by preference, drawing its support from the great town areas of population.

* * *

There is no question that the appointment of Mr. Clare Sewell Read to a Ministerial portfolio was intended by Mr. Disraeli to be a definite propitiation of the agrarian areas and an explicit assurance that Conservative legislation would not neglect the farmer. We have had no subsequent example of similar friendship on the part of Conservatism to record. We have had no specific reflection of the party anxiety which existed in the Disraelian days, not merely to have the farmer directly represented in the House of Commons, but represented in the Ministry. I could name half-a-dozen men who are possessed of as statesmanlike grasp, as prescient an anxiety, as diplomatic a caution, and as generous an economy as Mr. Clare Sewell Read. The names of these men will inevitably recur to the minds of those acquainted with the doings of the Central Chambers, and to those who have followed the inquiries of the agricultural section of the Tariff Reform Commission. When has official Conservatism sought to induce these men or some of their number to enter the lists as party candidates? Mr. Spear, the Unionist Member for the Tavistock division, may be said to belong to this class; but Mr. Spear's appearance in the electoral lists as the Conservative champion was due to an astute comprehension of the fact that his personality would appeal sympathetically to a large body of Nonconformists. Had Mr. Clare Sewell Read remained in Mr. Disraeli's Ministry, or had he held his national resentment in a less chivalrous leash, he might have been not the sole Farmer-Minister who had played a part in the councils of official Conservatism, but a harbinger of a class and the herald of a policy. Every man is the fashioner of his own destiny; and Mr. Sewell Read acted at this momentous juncture in his fortunes in obedience to an honourable impulse and a sensitive conscience.

* * *

Mr. Clare Sewell Read's fidelity to his class was unquestioned. However, the columns of the "Times" is a much less valuable platform than the imperial forum. His epistolary disquisitions were always interesting reading. They were a reflection of one of the most sagacious, calmly-sane minds British agriculture ever enlisted in its service. They embodied the very spirit of agriculture—never pretended to vivid vivacity or pulsating emotion, but were sincere, cautious, and practically inspired. They were read, I fear me, only to be forgotten. What if his alert sympathies and active intelligence had in all these years had expression in the Senate! Would it then have been possible for a prominent agricultural authority to have accused even the Conservative party of a sedulous neglect of the farmer? I really doubt it, for Mr. Sewell Read's presence in the Chamber and on the Front Bench would in itself have meant the realisation of his own desire to see a compact body of practical farmers engaged in the work of legislation. I have seen it stated that Mr. Sewell Read was a prejudiced buttress of all the claimed privileges of landlordism. Never was a more ungenerous comment penned. Mr. Sewell Read was certainly not anti-landlordistic in his principles; he was, however, intensely a pro-farmerist. His horizon had its limitations; his vision had its boundaries. That vision was, however, always clear, always sympathetic, and, within its restrictions, always wise. A prince in Bœotia has fallen, a prince who might have been more potent had his ambition been more stimulating and his anxiety for political influence more keen.

* * *

Can it be, after all, that the instinct which prompted Mr. Clare Sewell Read to renounce the Ministerial distinction which Mr. Disraeli had bestowed upon him was really an honourable anxiety for independence, and an honourable chafing against the restraint which officialism imposed upon him? I remember, now, that this was the view entertained at the time by no less distinguished a Parliamentary observer than Mr. H. W. Lucy. In his "Diary of Two Parliaments," Mr. Lucy wrote thus of the year 1877: "The Treasury Bench is the grave of many Parliamentary reputations. Men who, speaking below the gangway, are accustomed to feel themselves somebodies, soon learn that they are mere nothingness when salaried and docketed as units among Her Majesty's Ministers. There is a double influence at work in this direction. There is something in the air they breathe, and there is something in the atmosphere through which they are regarded in the House. Mr. Clare Sewell Read felt this, and took early steps towards delivering himself from his gilded bondage." Was Mr. Sewell Read, in a word, disillusionised? Did he feel that his promotion to the ranks of statesmen really meant shackling him in his rôle as Farmers' Friend? Did he feel that it meant a subordination of his real anxieties to the personal conveniences of the cabinet? Did he perceive that he was expected to merge his own identity into a compact and not necessarily sympathetic body? Well, if so, his sacrifice was all the more heroic. Still, had he consented to remain a force working persistently in the inner counsels of Conservatism, the tablets of the House of Commons since 1886 might have been different reading.

* * *

"Because he has no prospects on the land!" Well, Mr. Rider Haggard has undeniably hit the bull's-eye in giving this as a reason why the agricultural labourer is leaving the soil. His ambition, so far as his wages are concerned, is realised at twenty-two or twenty-three. The wages he earns at that age are his last realisable ambition. His responsibilities may increase, for the quiver-full-fellow is not to be denied the luxury of a family, but his wages seldom. But does Mr. Rider Haggard meditate a complete system conducted on mathematical lines of peasant freeholdership? Unless he does this, unless he meditates a system conducted under the direct espionage and with the grievous sympathy of the State, unless he is willing even to some extent to burden the Exchequer, how can he anticipate that the worker will be retained to the soil? There must be no scheme which would deal only sectionally with the question. If the possibility of freeholdership were restricted to a few, the problem would still exist in all its unmitigated

evil. Under the circumstances, may not a solution be rather found in a generous housing scheme? Would it not be wiser to, in future building, see to association with the cottage of land sufficient to pay the rent, but yet of an area so restricted as to permit the labourer being employed on the larger holdings? You cannot, and Mr. Rider Haggard would not, dispossess the present race of farmers. You could, however, provide such opportunities for the labourers that it would be to their advantage to remain on the soil. This is a platitudinarian profession, but a platitude may sometimes reflect forethought and retain truth. Of course, we cannot ever have again a State regulation of wages. It is pitiable that the wage-horizon contains no hope for a man after he has reached twenty-two years. It is thus all the more desirable to supplement those wages by offering the experienced man some reward for his knowledge and extended labour. But, I fear me, we should only affect a few by creating opportunities to become a freeholder. Still, whatever increases the attractiveness of the land, however few it may affect, should be encouraged and pursued.

• • •

Of course, my readers will anticipate that I am whole-heartedly gratified at the action of the Farmers' Protection Association in seeking to secure a common platform for farmers from which should be banished, if this be possible, the jealousies and rivalries of partisan politics. It is an ambition which has had persistent expression in these columns. Hence it is that I give a hearty benison to the resolve to hold what I will describe as a reconciling conference at Darlington. I hope, however, that that conference will not be too moderate in its lines. Moderation is an excellent thing, but when moderation is still further diluted it becomes tepid and ineffective. It will not be enough, for instance, to simply ask for the appointment of an authoritative Standing Committee or the continuance of the Rating Act until the general scheme of rating is dealt with. Both proposals are excellent, and should be accepted. Something more definite and immediate must, however, be associated with them. Why should not the Callington platform be made a basis of policy? It is not, of course, necessary to echo all the anxieties and purposes of Mr. Channing, or Mr. George Lambert, or Sir E. Strachey. It is not, on the other hand, necessary to reflect the critical spirit of their antagonists. We live in an era friendly to reform, and reform which may actually have Conservative affinities. There has actually been a recrudescence of sympathy with the country squire—even the Radical, as I showed last week, has a good word to say for him and his practices. We see even Conservatives of the oldest-fashioned type fascinated with the idea of dispossessing landlordism, or rather, of re-establishing the yeomen class, by voluntary, though not by coercive, means. The moment is apposite to a definite programme—not an intransigeant programme, but a programme of practical utility. This fact should be, and must be, appreciated by the Darlington conferencemen.

Harvest in Sussex.

The reports on the harvest of 1905 from all parts of Sussex show that the season has been one of the best known in the county for a long time past. The continued fine weather has almost everywhere enabled the crops to be harvested by the self-binders with the minimum of trouble and expense, and in splendid condition, and the reports indicate the wheat crop to have been generally well above the average in quality and quantity, both as regards the grain and the straw. The barley crop has also been very satisfactory; but oats for the most part have been rather poor.—*Sussex Daily News.*

At a meeting of the Ixworth Farmers' Club, held at Bury St Edmunds on Wednesday, it was reported that Mr Riley Smith had offered a cup for competition for acreages of roots, and as a result of the meeting it was resolved that this cup, together with the prizes offered by the club and by firms of seed growers should be awarded amongst competitors of West Suffolk, not necessary members of the club, for five acres of swedes and five acres of mangolds, in lieu of the prizes hitherto awarded at the annual show for the most exhibited of these roots.

OBITUARY.

It is with deep regret we have to record the passing away within a very few hours of each other of three very prominent figures in the agricultural world, namely, Mr. Clare Sewell Read, than whose name perhaps none is better known in connection with matters agricultural; Mr. Philo L. Mills, of Ruddington Hall, who had earned a wide-spread fame for himself with his Shire horses, Shorthorn cattle, Shropshire sheep, and Large White and Berkshire pigs; and finally, Mr. H. H. Ayre, of feeding cake fame. All three did their best to forward the interests of our greatest industry, and their loss, which came so unexpectedly, will be keenly felt in all parts of the country, whilst their services will long be held in remembrance.

Mr. Clare Sewell Read.

came of a very old family of Norfolk farmers, his ancestors having tilled the soil in the county for close on 300 years. He received his school education in the county, but went early to farming, commencing when but fifteen years of age, under his father's eye, and from thence right up to the time of his death, he was ever to the front in matters agricultural. Mr. Clare Sewell Read was a typical agriculturist of the advanced school—an outcome of the high farming of which Lord Townshend and "Coke of Holkham" were among the pioneers. The system established by them reached its greatest development in Norfolk, and consequently it was only in the fitness of things that Mr. Clare Read should have been a Norfolk man. When wheat-growing paid in England the number of large enterprising capitalist farmers was very considerable. They were an able and admirable body of men, of good position and education, and, in the special line of farming adopted by them, their equals would be hard to find. They produced the largest crops, fed the best stock, used improved machinery, nourished the land with the best manures, and altogether kept their farms up to the highest producing pitch.

Of such an influential class Mr Read was a natural leader. Well versed in the details of arable farm management and the feeding of stock, he was a welcome visitor at all agricultural meetings. The questions in which he took an interest were thoroughly understood by him, and his impromptu speeches were always pithy and informing, the spice of wit and sarcasm, which he sometimes infused into them, making them none the less acceptable and appreciated.

Through the revolutionary changes in agriculture, brought about by the unlimited importation of foreign and Colonial produce, the stamp of farmer of whom Mr. Read was one of the best representatives, was very hard hit, and in later years he took a sombre view of the situation and prospects, though his brilliant raillery never departed. But his thoughts were oppressed by the dark outlook, especially for that branch of the industry that possessed the greatest interest for him. He had a wide and deep sympathy with the wheat-growing farmers, and it was only to be expected that he should lament the changes that had so seriously injured the class.

To return to Mr. Read's earlier career, it may be mentioned that after his training at home he, for some time, managed the large farm of Kilpaison, in Pembrokeshire, before he was of age, and was afterwards resident agent on the Earl of Macclesfield's Oxfordshire estates. Returning to Norfolk in 1854, he took his father's farm at Plumstead, which he occupied until 1865, when he succeeded a relative at Honingham Thorpe, where he resided for many years, farming extensively.

Photo by] **The Late Mr. Clare Sewell Read** *[Russell & Sons.*

He was elected Member of Parliament for North Norfolk in 1865, and continued to represent the constituency until 1867, when the county was divided into three electoral districts. Mr. Read sat for South Norfolk until 1880, when he was defeated at the general election by one vote. He was shortly afterwards returned unopposed for West Norfolk, which division he represented until 1885, when he retired from Parliament.

His first speech in the House was made in 1866, when he supported a motion for the repeal of the malt tax. He, however, then suggested as an alternative measure a beer tax of one penny per gallon upon all beer that was sold, that a licence should be paid by private brewers, and, further, that all cottagers should be free to brew their own beer. He gave his warm support to the Acts of Parliament intended to suppress cattle plague and all other imported diseases amongst stock. The other measures in which he took an active interest in Parliament may be indicated. He advocated the inalienable right of the occupier of the land to destroy the hares and rabbits that

preyed upon his crops. He contended for the compulsory payment for the tenant farmer's improvements in the soil. He held that all property, and not land and buildings alone, should contribute to local, as well as Imperial burdens; and in 1879 he carried a unanimous resolution in the House of Commons in favour of representative county boards. In 1874 he was appointed Parliamentary Secretary to the Local Government Board, but he resigned in the following year in consequence of the Government refusing to extend to Ireland the Cattle Diseases Act, which had been passed for Great Britain. This extension of the Act, however, soon afterwards became law.

Mr. Read's resignation of his appointment in the Government aroused much enthusiasm among agriculturists throughout the country, and a banquet was given in his honour at the Cannon Street Hotel, when he was presented with a service of plate and a cheque for £5,500, subscribed by farmers in every part of the country. Mr. C. Howard, who presided, justly spoke of him on that occasion as "the mouthpiece of the farmers of England," and that was a function which he continued to discharge, until excluded by the fortunes of war from a seat in Parliament, and until, overtaken by the weight of years and in part by the misfortunes of his calling, he was driven into retirement.

In 1879 he went to the United States, in conjunction with Mr. Albert Pell, to inquire into the agriculture of the Far West, on behalf of the Duke of Richmond's Commission on Agricultural Depression. The report of Messrs. Read and Pell on their American investigations became a historic document, and their conclusions were widely discussed. Attention chiefly centred on one point—the estimate that wheat could not be profitably produced and imported into this country from America at less than 40s. per quarter. No doubt the estimate was based upon the most careful inquiry, but subsequent events showed that due allowance had not been made for one element in the calculation, which, however, did not escape their attention, viz., at what price it was possible to dispose of surplus crops. The lessening of the cost of production and transport also went much further than had been anticipated.

During the last few years Mr Read resided chiefly in London, but continued his active interest in agriculture right up to the end, which took place on Monday. Mr. Read was a magistrate for the county of Norfolk, a member of the Council of the Central and Associated Chambers of Agriculture, as well as of the Smithfield and Farmers' Clubs, and the author of several essays on agricultural subjects. With his black banded grey hat, which he wore at all seasons of the year, he was a familiar figure in agriculturist circles, and though not so frequently seen of late, he will, nevertheless, be greatly missed, and his death regretted by all agriculturists. Mr. Read was in his seventy-ninth year.

Mr. H. H. Ayre.

By the death of Mr. H. H. Ayre, J.P., of Withernsea, Yorks, the Royal Agricultural and other of our leading shows have lost a worthy supporter and well-known visitor. For close on forty years Mr. Ayre has figured prominently at the Royal and other shows, during which time his genial manner won him innumerable friends, who will greatly miss him, whilst the town of Withernsea has lost one of its most prominent and best respected public men. Mr. Ayre was one of the partners in the well-known firm of Ayre Brothers, Hull, and was managing director of the Waterloo Cake Company, of the same city, famed the world over for the Waterloo 97 per cent. pure linseed and cotton cake. Mr. Ayre had been a member of the firm of Ayre Brothers since 1864, when they were very large merchants dealing in general produce, and also the manufacturers of the Waterloo Round Feeding Cakes; but it was not until 1879 that they formed a separate company for the manufacture of the cakes, and of this the deceased gentleman had been co-managing director with his brother ever since the formation of the company.

The Late Mr. H. H. Ayre, J.P.

For some time Mr. Ayre had been in ill-health, and three months ago he underwent an operation for an affection of the throat, but even then it was feared that the relief which would accrue would only be of a temporary nature. This unhappy surmise proved correct, and Mr. Ayre passed away on Monday afternoon, at the age of sixty-nine.

Mr. Philo L. Mills.

The death of Mr. P. L. Mills took place with almost tragic suddenness at his residence, Ruddington Hall, Nottingham, on Tuesday evening. Mr. Mills had, with characteristic activity, given strenuous attention to the claims of business up to a recent date on the previous day, Monday,

The Late Mr. Philo L. Mills.

on the evening of which he was taken ill at home, and, in spite of skilled medical attention, he gradually became worse. A fatal termination of the illness was not, however, entertained until Tuesday evening, when the doctors gave up all hope of his recovery. The end came at midnight, the immediate cause of death being apoplexy. Though he had reached the age of seventy-three years, the late Mr. Mills was a man of wonderful spirit and vitality, and his decease was entirely unexpected. Death came to him as a peaceful ending to a busy and strenuous life.

The late Mr. Mills was an American by birth, but had been associated with the commercial life of Nottingham for nearly fifty years, and was a resident in the district for thirty-five years, and in the county was a prominent figure in all matters affecting its interest, but it was as an agriculturist that Mr. Mills was best known. It was one of his strong points, indeed, that he insisted upon breeding nothing but the best, and as a result of his own efforts and of his practical advice a great advance has unquestionably been made locally. His influence, too, was felt over a wide area, for he had for many years controlled a growing business in the importation of stock to the Argentine Republic and other parts of the world. Shire horses, sheep, and pigs were to be found of excellent quality on his farm at Ruddington, but his favourite animal was the Shorthorn, and he probably did more than any other man to popularise and improve the breed locally.

The stock sold by Mr. Mills to go abroad invariably realised large prices, and only recently he refused the huge sum of 2,000 guineas, offered for the grand bull King Christian of Denmark, which he bred himself at Ruddington, and which achieved several successes in the show ring, including the Bath and West exhibition at Nottingham and the Royal Show in London this year. But Mr. Mills's most famous bull was probably Marengo, the King's medal winner, which was among the animals which actually did leave Ruddington to cross the sea at a big figure, and great was the disappointment among Shorthorn breeders in the Argentine when this magnificent young bull died after a comparatively brief stud career. During recent years Mr. Mills's best known shire stallion was Intake Albert, a notable honours winner in first-class company, and the breeds of pigs to which he specially devoted himself were the Large Whites and the Berkshires, his pedigree sheep being Shropshires.

Mr. Mills was a member of the Royal Agricultural Society, and his death will create a vacancy in the Councils of the Notts Agricultural Society, which it will be difficult, and, indeed, will be impossible, to fill. The society was formed in 1878, and practically from its birth Mr. Mills manifested an enthusiastic and generous interest in its operations. He was a patron from 1881 to the time of his death, was elected president in 1893, and chairman of the Council in the same year. The latter position he continued to hold to the last, and both his advice and his financial assistance were of [illegible] to the society. Last year, out of compliment to his untiring exertions, the annual [illegible] was held on his estate at Ruddington, and proved an unqualified success, a result to which Mr. Mills's genial and neither personal effort nor pecuniary expenditure, while a [illegible] testimony of the appreciation in which his services were held was afforded by the presentation from the members of the society of his portrait in oils.

"BE WISE IN TIME."

FARMERS should take care (especially in view of the comparatively low rates of premium) to insure against loss through **STORMS** and **FIRE.**

The **HOMESTEAD, FURNITURE, OUT-BUILDINGS, LIVE STOCK, IMPLEMENTS, STACKS, AND GROWING CROPS** all represent property which can, by the present modern system of **INSURANCE**, be covered at a trifling annual outlay.

INSURANCE against death or injury through accidents should not be neglected.

ROYAL INSURANCE COMPANY.

FIRE, LIFE, HAILSTORM.

Invested Funds . . £13,062,125.

HAILSTORM INSURANCE.

The Royal, besides being the largest Fire Insurance Company in the world, is one of the few offices that undertakes risk from Hailstorm. The important feature for Agriculturalists when effecting protection on their property is the opportunity afforded them of combining insurance against Hailstorm and that of Fire Insurance in one office.

Gentlemen able to influence introductions with this object are invited to make application for Agencies.

Offices, 28, Lombard Street, London, E.C.

Agricultural Destitution.

SIR, The Royal Agricultural Benevolent Institution has, since 1860, by a system of pensions, been nobly endeavouring to lighten the burden of the unfortunate farmers of this country, who, through no fault of their own, have been left destitute in their old age. Annually, since 1887, my appeal to a generous public, through the clergy and ministers of all denominations, becomes more urgent. The charity now maintains 1,131 pensioners at an annual cost of £24,326, and at the meeting in June last to award the pensions, there remained 231 candidates, who were left out in the cold for want of adequate funds.

Time was when these farmers and their wives, many of them having now passed three score years and ten, were in affluent circumstances, but their present condition has been brought about by the cycle of wet seasons, which commenced in 1879 and continued on for many years, coupled with other calamities which have afflicted agriculture.

The promise of this year's harvest is brighter, but the wants of the aged agriculturists, ruined in the past, remain as urgent as they have ever been.

To the honour of our clergy and ministers my appeals, which began in 1887, have not been made in vain. The Bishops of Chichester, Gloucester, and St. Albans write in approval of the work of the Institution, and express the hope that their clergy may be able to devote their harvest offertories to the objects of the charity.

In 1882 the church offertories received amounted to only £1,028; while between 1887 and 1904 the sum total amounted to £127,000, or an average yearly collection of £7,066, a most gratifying recognition of the appropriateness of applying these harvest thanksgiving offertories for the relief of those who have succumbed in the struggle and are now destitute.

I am once more asking the hospitality of your columns, which have so greatly aided the Institution in the past, for the purpose of thanking the clergy and ministers who have so kindly devoted their harvest thanksgiving collections to this most noble work, and at the same time appealing with all the earnestness I can command, to those of them who have not joined our ranks, to do so this year. I wish also to urge this upon a great number of those ministering in London and our large provincial manufacturing towns, who by reason of the wealth of their congregations have it in their power to materially augment the funds of this deserving charity.

Another gratifying result of these appeals is the benefit derived by the Institution from legacies. For the five years 1882 to 1886 only £2,500 was left to the Institution, but in the eighteen years from 1887 to 1904, £58,195 was received.

I hope by again drawing attention to this excellent charity, that the benevolent public and the wealthy when making their wills may not forget the needs of the the many penniless aged cultivators.

Any enquiries will be freely replied to, and contributions received by the Secretary, Mr. C. B. Sims, 26, Charles Street, St. James's, London, S.W.—Yours truly, WALTER GILBEY.

Elveden Hall, Essex, August 22, 1905.

West Somerset: Unfavourable Weather.

SIR,—The weather since the 3rd of the month has been of a somewhat unsettled character, and as time goes on shows no tendency to improve. On some of the earlier farms harvest was all in by the middle of the month in good condition, although hindrances had taken place. On the night of the 16th a thunderstorm of unprecedented violence fell, killing many animals, firing six houses, and damaging others, whilst considerably over three inches of rain were measured, with 2.57 in. in this parish. Since then the weather has been more unsettled, although no fresh quantity has fallen, but enough to interfere with anything like good progress being made with the remaining corn crops, which on the whole are good; wheat being well filled, and barley, although varying, is generally a good and bulky crop.

In the early part of the month grass was becoming short, and roots wanted rain. These latter now have a very luxuriant appearance, and the grass lands are green and full of growth. Work, both team and manual, on the farm (except as regards those who have not got in the harvest) is well in hand, it being an exceptional time to kill the weeds in the roots, as those newly started have little chance, whilst the rain has made the stubbles go as easy as we could wish.

August 23, 1905. S. K.

Montgomeryshire (East) and Shropshire (West).

Crops Generally Satisfactory.

SIR,—The crops in this district, generally speaking, are satisfactory, with one or two exceptions. Wheat is an excellent crop, and I do not remember such a crop for several years. There is also a good length of straw, as well. The oat crop is light and the straw short in most places, but there are a few good crops. There is a good crop of barley, but again, as with oats, the straw is short. Beans, I think, are a very good crop, but few are grown in this district. Roots are fair in some parts, but mostly a light crop, although the rain will help them on. Mangolds look well where put in early; but turnips generally are exceedingly light in most places, and have been sown two and even three times. A great deal of grain is still out, and the rain interferes with getting it in. Pasture keep is short, and aftermath nothing to boast of. R.

August 22, 1905.

Wilts—A Good all-round Season.

SIR, The prospects of the spring with regard to the wheat crop has been realised, and in this neighbourhood has been a record harvest and well carried. Oats are below the average. Barley about an average crop. Roots are not quite a good plant and are backward; but, with a bare hay crop should prove feed enough for the flocks. Taking a broad view I should call 1905 a fairly good all-round season.

It is very striking as one goes about the country to notice the absence of gleaners in the wheat stubble. Surely this practice cannot be a disgrace to the labouring class, or any other class for the matter of that. Even Ruth, in history, found her Boaz in that way. Speaking personally, I have 150 acres wheat stubble, and I counted to day 20 people there; 30 years ago there would have been 100.

This I call a direct loss to the agricultural community. Much [illegible] the houses of the poor, it is left for the fowls of the air, and the should be leasers are whiling away their time in the village streets, while the mothers are gossiping with next door neighbours. There can be only one opinion; that their circumstances are prosperous and bread too cheap, while our townsmen are out of work and having legislation wasted in their favour. Passive resistance would not be out of place against such increases of local burdens.

J. B. S.

August 24, 1905.

Early Harvest in Essex.

SIR,—Seldom can one write at this date (eight days still being left in the month of August) and report that harvest in this neighbourhood is practically finished. Thanks to weather, standing corn, and binders, many have made a record as to the rapidity with which the corn has been ingathered, the whole of the cutting and carting in many instances being completed in three weeks. Yet, on the whole, there is a fair crop, and certainly the wheat is of very good quality, harvested in first rate condition, and if not hurried on to the market, should, considering the state of the foreign wheat markets, realise 30s. or over per quarter. After the two disastrous years of 1903 and 1904, it is a real pleasure to hear farmers speak a bit cheerful as to the present crop.

I think I can claim to have sold the first sample of new wheat in East Anglia. This was at Braintree, July 26, and I delivered it next day. Since then the millers and merchants have managed to bear the market down to the extent of 4s. to 5s. per quarter, which I trust is only temporary. Heard the millers say to-day that there was not nearly as much wheat on offer this week as last. Wheat is probably the best crop of the season; after that peas and beans. Some early barleys are a fair crop, but mostly very small in grain.

Now that harvest is over rain is very much needed to help on autumn feed, also to enable the ploughs to get to work, for apart from fallows, there is very little land that can be broken with horses. The continued drought has had the effect of steadying the trade for store sheep; good mutton and stall-fed beef are a fair trade, the latter has much improved the last few weeks. In spite of rather improved outlook, two farms of 200 and 250 acres in this neighbourhood offered for sale to-day found no purchasers, although the reserve was considerably under £10 per acre, and in both cases there were good residences and premises.

A. B

August 23, 1905.

Disappointing Crops in East Suffolk.

SIR,—The early part of the summer was very cold, and the pastures got very bare. Seeds a bad plant. Ewes and lambs not sufficient to eat, although the stock generally did very well. Lambs made a good price on account of the short quantity. This was a good help for those that had any to sell. The small farmers generally have not any sheep, consequently they are badly off.

The harvest has been got in quickly, thanks to the sheaf-binder, but still very expensive, as the men have more than £8 for a month. This amounts to about two acres of average crop of corn per man this harvest.

The crops are very disappointing. Wheat is thin and not healthy quality not good. Barley good—kernel small, colour fair, and short yield. Oats very light—good in quality. Peas bad. Beans fair. All crops dried too quickly. The root crops are various. Mangolds are fair. Turnips a few sown early have planted, but are not healthy. The fly took all cabbages and late sown turnips and rape. The prospects for keeping the sheep during winter are not promising. On the whole, the outlook for farmers, with two wretched harvests and bad prices previous, is not encouraging.

August 24

(*Other Letters will be found on p. 254.*)

Harvest Weather.

1, Essex Street, Strand, Monday, August 28th, 1905.

SPECIAL THREE-DAY FORECAST. GENERAL PREDICTION.

The general conditions are favouring the formation of complete rainy cyclonic system over the entire British area, checked in their progress eastwards by high pressure over Scandinavia, and therefore likely to expend much of their energy in rain at times over these islands. The general sequence will be (1) Showery or rainy at times in most parts, most in the South, centre, and East, least in the North and North-West, with short bright intervals. Winds freshening, West, in the South and East, North in the West, and East in the North. (2) Temporarily fairer in the Eastern half with passing showers: fair to cloudy, and some rain setting in over the Western and Southern districts. (3) Finally Southerly to South-Easterly and South-Westerly winds, freshening, cloudy, and some rain spreading over most districts from the West. Temperature about normal for the date, on the whole.

LOCAL PREDICTIONS.

No 1. — **Scotland**:—**Cloudy and some showers at times, with Easterly to variable winds. Later, temporarily fairer. Finally, some rain, chiefly in the West, with Southerly winds.**

„ 2.—England (N.E.) **and part of Scotland**:—Peebles, Selkirk, Durham, Lincoln, Northumberland, Roxburgh, Yorkshire, (N. & E. Ridings).—**At first South-Easterly to Easterly freshening winds, cloudy, some rain at times, and bright intervals. Later, showery to fairer, wind more Westerly and fresh. Finally, fair to cloudy and some further showers, wind more Southerly.**

„ 3—England (East):—Bedford, Cambridge, Essex, Hertfordshire, Huntingdonshire, Norfolk.—**The same as No. 2.**

„ 4—Midland Counties:—Buckingham, Derby, Gloucester (part), Hereford, Leicester, Northampton, Nottinghamshire, Oxford, Rutland, Shropshire, Stafford, Warwick, Worcestershire, Yorkshire (West Riding).—**At first showery at times, with bright, fair intervals. Later, fairer, with some passing showers. Finally, fair to cloudy, and some rain, chiefly in the Western districts; wind varying from West to North-West and South, fresh to moderate.**

No. 5.—England (South): — Middlesex, Berkshire, Kent, Surrey, Sussex, Wiltshire, Channel Islands, Hampshire.—**The same as No. 4.**

„ 6.—Ireland.—Fairer at first, with some showers, chiefly in the East and South; wind North-West to West. Later, fair to cloudy and some rain, wind shifting again to South. Finally, some showers over most of the area; to fairer.

„ 7.—England (North-West) and North Wales. Cheshire, Lancashire, Westmoreland, Anglesey, Carnarvon, Denbigh, Flint, Merioneth, Montgomery.—**At first Easterly to Northerly and variable winds, cloudy, some showers to fairer. Later, fair to cloudy, and some rain; wind backing to South, Finally, showery at times; wind South-West to West.**

„ 8.—England (South-West) and South Wales:—Brecon, Cardigan, Carmarthen, Glamorgan, Pembroke, Radnor, Cornwall, Devon, Gloucester (part), Monmouth, Somerset.—**At first freshening South-West to West winds, some showers to fairer. Later, fair to cloudy and some rain, with Westerly to Southerly winds. Finally, South-Westerly winds, some showers at times, to fairer.**

„ Sets	...	5.46 a.m.

Age of Moon—Twenty-seven days.

One-Day Forecast prepared by the Meteorological Office at 11 a.m. on Monday, August 28th.

GENERAL INFERENCE. The latest depression will pass away to the Eastward in the course of the day, but as the barometer in the West of Ireland has steadied again, and the wind there is inclined to back South-Westerly, it is probable that another disturbance is approaching from the Atlantic. A continuation of the unsettled conditions is consequently expected to prevail very generally.

SCOTLAND N. & E.—Light and moderate Easterly to South-Easterly breezes, changeable, rain at times; cool.

ENGLAND N.E., E., & MIDLAND COUNTIES.—Light variable breezes, later South-Westerly, freshening; unsettled some rain, thunder locally; cool.

ENGLAND, S. (London and Channel).—Southerly to Westerly winds, varying greatly in force; unsettled, occasional rain, thunder locally; cool.

SCOTLAND, W.—Same as Scotland N. & E.

ENGLAND, N.W. (and N. Wales).—Same as England N.E. & E.

ENGLAND, S.W. (and S. Wales).—North-Westerly to South Westerly winds, fresh to a gale; unsettled, some rain, thunder locally; cool.

IRELAND, N. & S.—Westerly to Southerly winds, increasing; unsettled, some rain cool.

CORN MARKETS.

LONDON.

Mark Lane, Wednesday. Wheat, English, slow sale, at rates under Monday's prices. Foreign held at late rates, but demand limited. South Russian quoted at 31s 6d to 35s; No. 2 Club Calcutta, at 31s; No. 3 Northern Manitoba, at 33s 6d; Plate, 31s, 34s. Flour dull, unchanged; Hungarians quoted at 30s 6d; Pillsbury's Gilt Edge, at 20s 3d; Iron Dukes, at 21s. Maize slow, unchanged. Mixed American, ex ship, quoted at 23s 6d; La Plata, landed at 24s 3d. Barley firm, inactive. Odessa Nico-Kherson, ex ship, to arrive, quoted at 18s 6d. Oats slow. Common sorts quoted at 14s 3d.

Mark Lane, Friday. Wheat: English and foreign held at late rates, but demand very slow. South Russians quoted at 31s 6d to 35s; No. 2 Club Calcutta at 31s; No. 3 Northern Manitoba at 33s 6d. Flour dull, unchanged prices. Hungarians quoted at 30s 6d. Morrisson's Bakers at 20s 3d, Iron Dukes at 21s. Maize, slow sale at about late rates. Mixed American, ex ship, quoted at 23s 6d. River Plate landed at 24s 3d. Barley steady, quiet. Odessa Nico Kherson, ex ship, quoted at 18s 6d to 18s 9d. Old crop, landed, at 20s 3d. Oats, common sorts held for 3d. advance, which checks business. White Libaus and Rigas quoted at 14s 3d to 14s 6d ex quay.

COUNTRY.

Ashford, Tuesday.—Wheat was again cheaper on the week; best samples quoted up to 30s 6d, but few sales over 29s. New barley was offered at 29s to 30s, but no sales were reported. New oats rather cheaper, making 14s to 18s; new peas fetched 29s to 30s; foreign grinding barley, 22s; mazagan beans, 32s to 34s; tick beans, 34s to 36s; maize, 26s to 27s per quarter. Flour unchanged.

Banbury, Thursday.—Wheat, red (new), 27s to 28s; barley, 24s to 29s; beans (new), 29s to 30s; ditto (old), 32s to 33s; oats, 17s to 19s; peas, 28s to 31s per quarter.

Berwick, Saturday.—Average attendance. Only a few samples of new barley, which met with a quiet trade. New barley 25s 6d to 28s; new oats, 19s to 20s; old oats, 21s to 23s per qr.

Birmingham, Thursday.—There was a much better attendance at the market, but trade showed but little signs of improvement. Prices of foreign wheats about unchanged on the week, and sellers reported a disappointing trade for same. There was a good supply of new English wheats, and prices were firmer inclined, values being from 11s to 11s 6d per bag (186lb). Oats, 17s to 17s 6d per quarter (312lb); beans, 12s 3d per bag (196lb). Plate maize 3d cheaper and flat 9d. Grinding barley 3d dearer at 19s per 400lb at Sharpness.

Brighton, Thursday.—Quiet trade at last week's prices. Small attendance. Wheat (English), good quality, prices same as last week. Grinding barley, 21s to 22s; old oats (English), 19s to 21s; new ditto, 15s to 18s; rye, 22s to 23s; peas, 28s to 29s; beans, 31s to 32s.

Cambridge, Saturday. — During the week the wheat trade has shown more animation, and a large business has been done, at improving prices, with a falling off of supplies. Spring corn has been quiet, with small supplies. At this merke tthere was less wheat on offer, and buyers were quite ready to pay 6d more money. Red wheat, 27s to 29s, and white up to 30s per 504lb. Rather more barley showing, but prices are not settled. Oats quiet. Few beans on offer, and prices quite firm.

Canterbury, Saturday.—New wheat less plentiful, and a better trade, prices advancing 6d to 1s per quarter. One extra good lot, scaling 66lb. to the bushel made 32s 6d delivered. No inquiry for new barley yet. Oats from 17s 6d to 19s; new peas, 29s to 31s per quarter.

Carlisle, Saturday.—Only one bag of new oats shown in our market, but several hand samples shown, at 18s 6d to 18s 9d per 336lbs. No old oats shown. — THOMAS ROBINSON.

Chester, Saturday.—English grain offered more freely at late rates. Old English oats and foreign beans firm. Indian corn, 3d per sack dearer. Quotations: Wheat, white, 4s 4d to 4s 6d; red, 4s 3d to 4s 6d per 75lb.; barley, grinding, 3s to 3s 2d per 64lb.; beans, 5s 9d to 6s per 80lb.; Egyptian ditto, 35s 6d to 36s per 480lb.; oats, new, 2s 3d to 2s 4d; ditto, old, 3s 2d to 3s 4d per 46lb.; Indian corn, 13s to 13s 3d per 240lb.

Chichester, Wednesday.—Small attendance and firm trade, but no advance in prices. New white wheat, 28s to 29s; new red ditto, 28s to 29s; old white ditto, 34s to 34s; 6d; old red ditto, 34s to 34s 6d; grinding ditto, 19s 3d; oats, English, 15s 6d to 22s; rye, 21s to 23s; peas, 28s to 31s; beans, 31s to 33s; maize, 24s to 25s.

Colchester, Saturday.—Farmers have been busy this week clearing up harvest, but there was not so much wheat offering to-day. The demand was good, and an advance of fully 6d per quarter was easily obtainable. Beans, peas, and oats sold at quotations, with fair demands. JOSEPH WILDE AND SON, LTD.

Coventry, Friday.—Moderate attendance. Wheat in fairly good supply, making barely last week's rates. Samples shown were principally new. New beans in prime condition made 12s. Quotations: Old wheat, 11s 6d to 12s per 120lb.; new wheat, 10s 6d to 11s 3d per 186lb.; barley, 28s to 34s per 448lb.; old oats, 23s to 25s per 312lb.; new oats, 18s 6d to 20s per 392lb.; beans, 12s 6d to 14s per 196lb.; peas, 14s 6d to 14s per 196lb.

Derby, Friday.—At this market new wheat sold at about is lower. Spring corn showed no alteration from the prices of last week. Wheat, white, 31s to 34s; red, 32s to 33s; malting barley, 33s to 34s; beans, 32s to 33s; oats, 20s to 21s.

Devizes, Thursday. There was a small quantity of new corn at market to-day, and the prices show no alteration in value. The following were the quotations: Best old wheat, 10s to 11s 6d; secondary ditto, 13s 6d to 14s 6d; new wheat, 12s to 10s; secondary, 13s to 16s 6d; best barley 29s to 32s, secondary, 26s to 28s; rye, 22s to 24s; old black oats, 15s to 17s; white ditto, 16s to 18s; malting barley, 32s to 34s; beans, 10s to 12s; fine flour, 24s to 26s extra fine, 27s to 29s.

Doncaster, Saturday. Moderate supply of English wheat and a good sale for the best quality, condition carrying, and prices from 1s to 1s per load of three bushels. Foreign wheat firm at last week's prices. A few samples of new barley made up to 2s per qr., and new oats 1s to 1s per qr. Beans scarce and dearer. Maize about the same as last week.

Dublin, Friday. Oats 1s 9d to 1s 9d; flour, 1s to 1s 6d; pollard, 6s to 6s 6d; bran, 6s to 6s 6d; malting barley, 1s 3d to 2s.

Exeter, Friday. Good attendance, trade not brisk. Prices of wheat pointed malting 5s 9d to 5s 6d. Red weather prevented the threshing of English barley, and the sales have consequently been very few, prices were from 5s to 5s 6d. Maize weak; oats and flour firm. Superfine flour 1s to 1s 3d.

Glasgow, Wednesday. The trade during the week has been quiet, and prices of breadstuffs have been the turn in buyers' favour, but with a restricted business doing on spot, and more inquiry for shipment. Maize and other feeding stuffs have been steady, while grinding beans, owing to scarcity, have been 3d dearer. There was the usual attendance at our Corn Exchange to-day. Wheat and flour quiet and nominally unchanged on the week. Indian corn 3d per boll, and maize 4½d, cheaper since last Wednesday. Beans 3d cheaper. Pease, barley, and oats quiet at unchanged prices. Oatmeal quiet.—GIBSON AND CLARK.

Glasgow, Friday.—Market very quiet. Few inquiries made for wheat. Flour slow at late rates. Mixed American maize steady at 13s 9d to 13s 10½d and round 14s 6d per 280lb. Foreign oats the turn dearer, with little business passing. Feeding stuffs unchanged.

Gloucester, Saturday. English wheat not offered so freely, as farmers are reluctant to accept 3s 7d for reds, which is to-day's value. Foreign quiet, but firmly held, and values are unchanged on the week. Grinding barley and maize unaltered. Oats steady.—WAIT, JAMES AND CO.

Grantham, Saturday.—There was a small supply of wheat, and prices were from 6d to 1s per qr. dearer on the week at 27s 6d to 28s 6d. A few samples of new barley in good condition were on sale, but prices unsettled. Beans made up to 31s, and oats made 16s to 18s per qr.

Ipswich, Tuesday.—A fair supply of new wheat, for which there was a little firmer trade at from 28s to 28s 6d per 504lb for reds. No white wheat offered. There was a fair supply of new oats, which realised from 17s to 18s per 336lb. Grinding barley unaltered. Maize fully as dear. Beans and peas firm.

Leeds, Tuesday.—Storms of rain and wind have practically stopped harvest work since Friday, and injuriously affected quality and condition of all outstanding crops. Wheat shows little or no change on the week. Millers have been free buyers of new English at present low prices, but Indians are fully as dear, and other descriptions have met a steady sale at about late rates, shippers showing no disposition to press sales. Feeding stuffs unchanged on the week.—DUNNS AND CO.

Leeds, Friday.—There was little demand for either English or foreign wheats, without material change from Tuesday's prices. Top price of new English reached 29s, while foreign was firmly held at 34s. No change in beans, peas, oats, barley, maize, or flour.

Leicester, Saturday. Good attendance of buyers and dealers, with very fair supplies of new home-grown wheats, which came to hand in fine condition. Trade fairly active at 27s to 29s per 36 stones for red wheats, ans 28s to 30s per 36 stones for whites. Barley very good in quality, but few samples offering, and prices not yet fixed. Oats were of poor quality, and sold slowly at 16s to 19s per 26 stones.

Lincoln, Friday.—Fair show and wheat generally in excellent condition, which meets a ready sale at an advance of 6d to 1s per qr. on the week. Barley trade not yet begun for the season. Oats and beans firm at last week's rates.

Liverpool, Friday.—Wheat: There has been only a small attendance at the market, and wheat is steady with a small trade at former currencies. Flour.—A small trade passing in both foreign and home-made brands, but no change is made in prices. Maize.—Mixed is strong, with an active demand, and owing to small supplies values are 1d over last Tuesday. Plate is also firm with a fair trade at former prices. European and Indian sorts are quiet, without change. Barley.—Malting is steady, with a moderate trade. Feeding is in fair request, but occasionally ½d. lower. Beans strong at a further advance of 3d. to 6d. for Saidis owing to scarcity. Peas steady, with a rather better demand at fully late rates. Oats in very slow request, and the tendency rather against sellers. Oatmeal firmly held, but inactive. Oilcake.—Quiet for foreign, but steady at late rates for English manufacture.—SEGAR AND TUNNICLIFFE.

Manchester, Thursday.—Better attendance, and market steady. English wheat 6d per quarter dearer; foreign rather slow, but most sorts dearer compared with last week. Indian corn scarce on spot; mixed to arrive 5s 3d to 5s 3½d; Plate ditto, 5s 1½d to 5s 2d. Oats: English new easier; foreign unchanged. Foreign barley 1d lower. Foreign beans 3d dearer. Beans rather easier.

Newark, Wednesday.—Wheat a small show owing to the showery weather. Prices 6d per quarter dearer than last week. Feeding corn in small supply at unchanged values. Quotations:—Wheat, 27s to 28s; barley, 23s to 27s; oats, 16s to 18s; old beans, 34s to 36s; new beans, 30s to 32s per quarter.

Newcastle-on-Tyne, Saturday. — New English wheat advanced 9d to 1s per 504lbs. over last Saturday's quotations; foreign firm at late rates. Maize slightly in favour of buyers. Scotch oats slow sale, and lower prices had to be taken to make sales. Foreign unaltered. No barley on offer. Beans and peas made fully last Saturday's prices.—JOSEPH TOLLARD AND CO.

Northampton, Saturday. Fair attendance. Good show of excellent wheats, in which a fair trade was done at last week's prices. A few samples of barley on offer, but prices were very irregular. New wheat, 27s to 27s 6d; barley, 24s to 32s; old oats, 20s to 23s; new oats, 16s to 17s 6d; old beans, 31s to 34s; old peas, 28s to 33s; flour, 24s to 29s.

Nottingham Saturday. A moderate supply of wheat commands 6d more money. As regards barley, maltsters are playing a waiting game. Oats are slightly in sellers' favour. New beans appear to have passed the meridian.—ROBERT HUBBLE.

Norwich, Saturday.—There was only a small supply of wheat at our market to-day, at an advance of 6d per quarter. Harvest is now practically finished in this district. Fine and warm weather prevails. Red wheat 27s 6d to 28s 6d per quarter, weight 63lbs. per bushel imperial. Corn inspector's return for the week ending 21st August, 1905:—Wheat, 4,513 - 27s 8½d.—J. ARTHUR MILLS.

Oxford, Saturday.—The supplies at the market were rather short, and higher prices were obtainable for new wheat. Trade, however, ruled dull, with wheats quoted at 27s 6d to 28s 6d.

Peterborough, Saturday. — There has been a good demand for wheat to-day, prices being 6d to 9d better than the depressed value of last Saturday's. Not much doing in barley at present, and prices are unsettled. Oats firmer and fully as dear. THOMAS HILL AND SON.

Plymouth, Thursday. Wheat dull. Barley, oats, and maize 6d lower.—ORLANDO DAVIS AND CO.

Preston, Saturday. There has been no change in the wheat market during the week, only a moderate business having passed, the tendency being towards easiness. Maize has become rather scarce, sellers demanding 1d per cental more than a week ago. Beans unusually firm; peas and feeding barley unchanged. The attendance was limited. New grain is making its appearance very slowly, and prices depend entirely upon condition. Quotations show no change from last week. Flour unchanged. Quotations: Wheat, white, new, 15s to 15s 6d per wrindle of 20lb.; ditto red, 14s 6d to 15s; oats, 6d. to 9d per bushel, ditto new, 5s 6d to 6s 3d.; beans, 16s 6d to 17s per wrindle of 20lb.

Reading, Saturday. A very much improved attendance. Prices: Wheat, 28s to 30s; oats, 18s to 21s; flour, 23s to 25s; beans, peas, hay, and straw firm at current prices.

Retford, Saturday.—A large attendance, and new English wheat was in better demand at an advance of 6d per qr. on the week, viz., 27s to 27s 6d per qr. Several samples of new barleys were shown, but no prices were quoted. A fair demand for new oats at 16s to 17s per qr.; old oats made 20s to 22s; and Indian corn 25s to 27s per qr.

Ripon, Thursday.—New samples of wheat now on offer, but little business was done. Both round and flat maize show a downward tendency. Prices:—New wheat, 27s to 28s 6d; foreign wheat, 32s to 36s; grinding barley, 23s to 24s; new oats, 17s; maize, round, 25s 6d to 26s 6d; ditto flat, 25s 6d to 26s 6d per quarter.

Shrewsbury, Saturday. — Wheat, 14s to 14s 6d per 225lb.; new wheat, 12s 6d to 13s per 225lb.; old white oats, 16s to 17s; new oats, 11s 6d to 12s 6d; peas, 11s 6d to 12s 6d per 240lb; beans, 17s to 17s 6d per 240 lb.

Stamford, Friday.—The wheat trade has improved, and several transactions were negociated at 6d to 1s per qr. advance on the week. New wheat 27s to 27s 6d, oats 15s to 17s per qr. Several samples of barley were shown, but there was a disposition to hold back, and no quotations were given. Beans and peas firm at current rates.

Sunderland, Saturday.—Farmers in this district have scarcely commenced threshing yet, and grain quotations remain nominally unaltered. Arrivals coastwise: Wheat, 635 quarters.—E. AND F. RICHARDSON.

Tunbridge Wells, Friday.—New white wheat, 30s to 31s; new red ditto, 29s to 30s; barley, 27s to 32s; grinding ditto, 19s to 23s; oats (English), 16s to 19s; rye, 23s to 24s; peas, 31s to 36s; beans, 32s to 36s; tares, 48s to 56s; maize, 24s to 28s.

Warwick, Saturday.—Very small supply of corn of all descriptions. Farmers are very reluctant to thresh their wheat at present prices, which, however, are better than the prices ruling last week. Feeding stuffs in good demand and prices rather higher.

Winchester, Saturday.—English wheat in better demand, and a shade dearer on the week. Foreign unaltered. Barley, oats, and maize quiet, unchanged. Flour, fair consumptive trade at late rates.—FEAR, COLEBROOK, AND CO., LTD.

Wisbech, Saturday.—A limited supply of grain at market. Wheat in demand at fully late rates. Reds, 28s. Oats, quality various, 16s to 17s 6d.—JAMES FLETCHER.

Wolverhampton, Wednesday.—Small attendance and little business passing. Quotations:—Wheat, 14s to 14s 6d per 216lb; English beans, 13s 6d per 196lb; new oats, 11s to 11s 6d; old oats, 13s to 14s per 196lb.

Worksop, Wednesday.—Very small attendance, and trade slow. A few samples of new wheat showing, which made 28s to 29s per quarter; old white wheat, 32s to 33s; old red wheat, 30s to 31s; barley, 26s to 28s; grinding barley, 24s to 26s; old white oats, 21s to 23s; new ditto, 17s to 19s; old black oats, 19s to 21s; new ditto, 16s to 18s; maize, 26s to 28s; beans, 36s to 38s per quarter.

Yeovil, Friday.—Fair offer of the new season's corn, but not much business passing. Wheat about 2s below last week's prices. Barley without change. Oats steady. New English wheat, best samples, 28s to 31s 6d; secondary, 26s to 27s 6d; foreign wheat, 32s to 33s; best barley, 25s to 32s; secondary, 20s to 24s; foreign grinding, 18s 3d to 18s 9d; old black oats, 21s to 23s; new ditto, 20s to 21s; old white oats, 20s to 23s; new ditto, 18s 6d to 20s 6d; Irish black, 16s 9d to 17s 3d; rye, 22s to 24s; beans, 32s to 35s 6d; tares, winter, 47s 6d to 49s 6d; ditto spring, 40s to 42s; vetches, 6s to 7s per bushel. Flour trade continues quiet, fine making from 24s to 26s; extra fine, 27s to 30s. Meals and offals continue in good demand at firmer rates.

York, Saturday.—The wet weather has prevented the farmers from thrashing, and there were no new samples offering to-day. Wheat was firm; white, 28s to 29s; red and mixed, 27s to 28s per qr.; fine samples of barley, 27s to 29s; feeding barley, 24s to 25s per qr. New oats were in poor demand from 16s to 17s 6d per qr.; whilst old oats fetched 10d to 11d per stone. Beans made 1s, and rye 6½d to 7d per stone. The attendance was good.

FOREIGN

Hamburg, Saturday.—Harvest is finished now, but market rules quiet, and, so far, our local maltsters and brewers have bought very little. The quality of Saale and other North German barleys are rather poor, and Bohemians, although somewhat better, are pretty dear; choice Slovakian is still held at extreme figures but finds some attention; in Hungarians for shipment from Fiume a fair trade is doing.—FRANCIS M. TH. DUHNE.

Hamburg, Saturday. Fine weather continues. There is a firm tone in our market for most articles and a considerable amount of business has been done. It is now evident that the new cereal crops in many districts do not turn out satisfactorily, neither in quality nor quantity. Fine new Holstein and Mecklenburg wheat is selling at 30s 6d to 3s 3d per 504lb. f.o.b.; new Saale wheat is held at the same price, but quality is not so fine as last season; hard winter No. 2 is offering at 30s 6d; 80 Ko River Plate at 30s 3d per 480lb. c.i.f. Hamburg. Rye in demand and dearer; 72-73 Ko Danubian afloat is held at 24s 6d; 9 20-25 South Russian afloat 25s; 9 15-20 September shipment 24s 9d to 25s per 480lb. c.i.f. Hamburg. Finest Slovakian barley begins to attract attention for export and it seems as if holders will get the high prices they demand. We quote best Slovakian 36s 6d to 37s; good middling quality, 32s to 35s; good Bohemian, 32s 6d to 34s 6d; common Bohemian and Saale, 30s to 32s 6d per 448lb. f.o.b. Feeding barley was depressed by some forced sales. 60-61 Ko South Russian afloat having been sold at 16s 7½d, while October shipments are held at 17s per 400lb. c.i.f. Hamburg. Mixed maize afloat is offering at 23s, December-January 20s 9d. River Plate afloat 22s 6d, September-October 22s 3d per 480lb. c.i.f. —JOHN TATLOCK.

Paris, Wednesday.—Although arrivals are daily becoming larger at the provincial markets, wheat prices are still maintained, farmers refusing to make the slightest concession until they know exactly what the yield of the harvest will be; buyers are also reserved for the same reason. At the Bourse de Commerce business continues to lack animation, buyers being reserved, due to the weakness displayed by extraneous markets. On the other hand, offers are regular, and contribute to make the tone heavier, and to depress prices, which are fallen from 5c. to 10c. for flour, and from 25c. to 10s. for wheat, according to position. Rye, nothing doing, prices nominal. Oats heavy, with a fall in prices of from 35c. to 10c. according to month. At the weekly market business has been a little better all round, without much alteration in prices from last week. Very little old wheat is now being offered, but new crop is beginning to come along rather freely. In foreign wheat there is not much doing. Offals quotably unchanged, spot parcels still remain scarce.—*Dornbusch.*

THE BALTIC.

Indian wheat cargoes are selling fairly well and are a good choice on the whole, though no Bombay, either White or Red, appears to be obtainable. Other wheat cargoes are a little out of favour, nevertheless sales have included Australian at 33s. per 480 lb., Rosario at 29s. 9d. per 480 lb., Bahia Blanca at 30s. 9d. per 504 lb., Entre Rios at 29s. per 472 lb., Russian Azima at 33s. 6d. per 492 lb., and Odessa Ghuka at 31s. 6d. per 492 lb.

Maize is held for 22s. 9d. per 480 lb., both for yellow and flat corn. Parcels are not appreciably cheaper than cargoes. No round corn is offered.

Barley cargoes are firm at 25s. per 448 lb. for Californian and 18s. per 400 lb. for Black Sea. Cargoes of oats are 3d. dearer: 14s. 6d. paid for 304 lb. Mogda, 13s. 9d. for 304 lb. Archangel, and 14s. 9d. per 320. lb for American.

Other cargo sales of the week comprise new crop Smyrna beans at 32s. per 480 lb., Argentine linseed at 38s. 6d. per 416 lb., Egyptian cottonseed at 110s. per ton, and Portuguese locust beans at 97s. per ton.

Latest East Indian wheat rejections, or prices to be paid in default of grain being taken on its arrival, as published by the London Corn Trade Association:—No. 2 Club Calcutta 31s., Soft Red Calcutta 29s. 6d., Soft White Delhi 31s. 3d., Karachi Soft White Delhi 31s. 3d., Soft White Karachi 30s., Choice White Karachi 30s. 6d., Soft Red Karachi 29s. 9d.; all per quarter of 492 lb.

The arrivals of grain and seed-laden vessels at Ports-of-Call for the week ending noon to-day were 11 wheat (2 Bahia Blanca, 1 Fremantle, 2 Geelong, 2 Melbourne, 1 Port Broughton, 1 Port Germain, 2 Wallaroo), 3 linseed (2 Buenos Ayres, 1 Rosario) —Total 14.

The sailings of grain and seed-laden vessels from Ports-of-Call for the week ending noon to-day were 11 wheat (1 Barry, 2 Belfast, 1 Birkenhead, 1 Bristol, 2 Cardiff, 1 Dublin, 1 Limerick, 1 London, 1 Waterford)—Total 11.

Since January 1, 1905, the total arrivals have been 267 wheat, 2 flour, 2 wheat and oats, 1 wheat and linseed, 1 flour and wheat, 13 barley and wheat, 8 barley, 5 maize, 1 beans, 4 locust beans, and 46 linseed—Total 350.

Last year during the same time the arrivals were 180 wheat, 1 wheat and maize, 31 barley and wheat, 16 barley, 4 maize, 4 beans, 4 locust beans 1 rye, 27 linseed, and 1 canaryseed—Total 269.

WOOL.

Canterbury. Saturday.—The market continues firm but without much animation. Best fleeces are worth 1s. lamb wool, 8¾ per lb., halfbred 1s to 1s 1d, and Downs, 1s 1d per lb.

Halifax. Saturday.—Business has been rather quiet, but with a firm and in some cases an improved tendency in prices for the raw material. Home grown wools still tend somewhat against the buyer. The yarn trade has not much changed, but the outlook continues to be regarded favourably, and in the export trade it is generally realised that values are on a safe basis, which is causing a little increase in demand.

London. Saturday.—English per lb.: [illegible]—Fleeces, S. Down Hogs, £1 1s to £1 4; hoggets [illegible] £12 10s to £15 15s; wethers, £1 1s to £15; Kent [illegible] £12 to £12 10s; South Down ewes and wethers, £12 [illegible] £13 10s; Leicester dates, £11 [illegible] £12 5s. Cross-bred Vic—Fleece super. 1s 11d to 2s 1d; [illegible] to 2s 2d; scoured average, 1s 2d to 1s [illegible] to 1s 3d; [illegible] to 1s 1d to 1s 2d; N. S. W., super. 1s 2d to 1s 3d; scoured average, 11d to 1s [illegible] S. Australian super. 1s 2d to 2s 1d; N.Z.—Scoured super. 1s 3d to 1s 4d; average, 1s 1d to 1s 2d; Cotswolds, 10d to 1s; fleece average, 8d to 10d; greasy average, 1s 1d to 1s 2d; Natal Scoured, 1s 5d to 1s 8d; greasy average, 9½d. Crossbreds—Grs—Vic. super. 1s 2d to 1s 3d; average, 1s 3d; New Zealand [illegible] 1s 2d to 1s 3d; [illegible] to 1s 1d; Cotswolds, 10d to 12d.

POTATOES.

Goole. Wednesday.—Supplies [illegible] The present season for the new crop is just opening. A few lots changed hands at £2 per ton, 4s 6d per cwt. Retail 6d to 8d per stone.

Spitalfields. Saturday.—The supplies were fairly coming, and with no improvement in the demand trade remained quiet at very slow prices. Dover Yorks, 50s to 55s; Puddocks, 50s to 55s; Round Whites, 50s to 55s; Beauty of Hebron, 50s to 55s; Bedfords, Queens, 50s to 60s; Blacklands, 50s; Up to Dates, 55s to 60s per ton. Dates, 55s to 60s per ton.

Review of the British Corn Trade

DURING THE PAST WEEK

Written exclusively for the Mark Lane Express.

The wheat harvest is nearly over in the majority of leading counties, and if the weather keeps fairly fine will be concluded in a fortnight, even in Ulster and the West of Scotland. The later grain of the north and west is plumper than the earlier of the south and east, but it is also weaker and less fit for immediate milling. The record of Twentieth Century wheat harvests on a Kentish farm, thus stands:—

	1901.	1902.	1903.	1904.	1905.
Began Cutting	6 Aug.	11 Aug.	17 Aug.	3 Aug.	27 July
Finished ,,	7 Sep.	20 Sept.	17 Sept.	27 Aug.	24 Aug.
H'vest Weather	Broken	Broken	Wet	Fine	Fine
H'vest Labour	Scarce	Scarce	Scarce	Fair	Sufficient
Estimated Yield	32·6	33·6	28·6	30·6	35·6

It must, of course, be remembered that Kentish wheat production is decidedly above the average of the United Kingdom; on the other hand, Kent this year has not been quite so favoured in respect to wheat as the north-eastern counties, from Lincolnshire to Haddington. Improved harvest weather and a better supply of labour are good features, especially the latter. Many farmers think that the townward drain of the usual population has been arrested, or, at all events, that there is a pause in the movement.

Our estimate of the wheat area for the United Kingdom, viz., 1,800,000 acres, has probably been slightly exceeded, the returns issued on the 26th for Great Britain showing 1,796,985 acres. Ireland is, we fear, an increasingly unsuccessful wheat grower, but the area under wheat is still a good deal over the very small total required to carry the Great British return to the better side of 1,800,000 acres.

The area under barley and oats shows practically the decrease which we anticipated, and rye that increase which we had forecast, but we are agreeably disappointed in the returns for beans and peas. These crops, we had surmised, would show a diminished cultivation, but they have as a matter of fact gained 1,610 acres. That 102,438 acres in Great Britain have been won back to regular farming, that hops have gained 1,169 acres, that small fruit has gained 875 acres, and that orchards have been extended by 1,315 acres, are further gratifying evidences of agricultural progress.

The foreign harvests are the subject of an interesting survey in *Beerbohm's List*, and we gather that the shipping trade anticipate some of the leading wheat crops as follows, in quarters of 480 lb.:—

	This Year. Qrs.		Last Year. Qrs.
Austria-Hungary	26,250,000	..	22,300,000
France	39,000,000	..	37,500,000
Germany	18,000,000	..	17,500,000
Italy	18,000,000	..	17,000,000
Spain	11,000,000	..	10,000,000
Russia	63,000,000	..	82,000,000
Roumania	12,000,000	..	6,750,000

The time has not yet come for discussing these crops in detail, but the Spanish estimate is not confirmed by the ordinary press of the Continent, and is, we fear, at least two million quarters above the truth. Roumania must not be credited with so enormous an increase as the above figures indicate without further investigation, and we believe Russia to have a good deal bigger yield than is now mentioned. The experience of most recent years has been that the Russian harvest is underestimated from August to October, and that the prosperous provinces are the silent ones.

The American wheat crop is very slow in getting into motion, and the Term market reveals a firm holding for all futures within 1905. The fact that the American agriculturist is doing what he can to keep up prices should encourage his English cousin to resist the present home rush to sell at a low price.

We notice in the flour trade that the fancy quotations for fine American flour which ruled from January to July inclusive are not now to be obtained, and that for October and later delivery 28s. to 28s. 6d. is accepted. The price is likely to revert to a 1903 level before the autumn has been with us for many weeks. Ordinary Household flour is not more than 6d. down on the week, but flour made in East Anglia from new English wheat is offered freely at prices fully 2s. per sack below the level of flour made from the old crop. Some attention is being attracted by the Apostoloff Process, whereby it is claimed that all English flour can be made to produce a loaf which meets the town customer's taste. Hitherto this has been a difficulty, for the home-made bread of the country house and the all English loaf of the country bakery have failed to satisfy the taste of the town man. It is to be hoped, therefore, that the claims made for the process in question will prove to have some substance in them.

Barley is not cheaper on the week, and the English new crop is slow in coming forward, farmers giving their wheat the precedence. The price of Russian is now 2s. 6d. to 3s. higher than in either 1904 or 1903, and, with the shipments of Russian at a rate of over 400,000 weekly, it is difficult to see how this price is to be maintained into the winter. Feeding barley buyers may do well to wait a bit.

Oats are coming into increased local supply, and prices are moderate. Foreign oats have rallied a little since the 21st, but there is an unusually large supply on passage, and with September it is not impossible that buyers of light oats may have the best of the market.

Maize is selling well for the time of year, and the large supply on passage excites no apprehensions, the stocks being low and enquiries stretching forward into the autumn months already. America on the 26th called a visible supply of 516,000 qr., against 543,000 qr. one year and 753,000 qr. two years ago.

Supplies of wheat on passage show a decided decline upon the week.

	Qrs.
American	50,000
Argentine	705,000
Russian	240,000
Indian	638,000
Australasian	415,000
Various	50,000
Total	2,098,000
A week ago	2,282,000

The week's arrivals included 129,000 qrs. of Indian and 50,000 qrs. of Argentine wheat.

Of flour, only 144,000 sacks are on passage.

Of maize, expectations are as follows:—

	Qrs.
American	200,000
Argentine	1,035,000
Russian	50,000
Total	1,285,000

Other quantities on passage are, oats 500,000 qrs., barley 395,000 qrs., rice 28,000 tons, cottonseed 22,000 tons, and linseed 189,000 qrs.

The sales of British wheat for 51 completed weeks of the cereal year have been as follows, at the 187 statute markets:—

	Per Qr.
This Season, 1,659,000 quarters, at	30s. 8d.
Last Season, 2,088,000 quarters, at	27s. 2d.

The rise of 3s. 6d. on the year's price is gratifying, but last week the average price made was threepence lower on the twelvemonth, so that the gain of eleven months looks like being given up in the twelfth.

The sales of British barley have been:—

	Per Qr.
This Season, 3,135,000 quarters, at	24s. 7d.
Last Season, 2,776,000 quarters, at	21s. 11d.

The rise of 2s. 8d. is not wholly maintained, but last week's average was elevenpence up on the twelvemonth.

Oats have been in slightly increased supply, and the price has not been lowered in consequence.

	Per Qr.
This Season, 1,158,000 quarters, at	17s. 1d.
Last Season, 1,107,000 quarters, at	16s. 5d.

The imports of 51 completed weeks have been:—

Breadstuffs, 27,596,267 quarters; a good supply.
Maize, 9,573,000 quarters; a fair supply.
Barley, 5,761,000 quarters; an average.
Oats, 6,206,000 quarters; a full supply.

Last week's imports were as follows:—

Wheat, 463,000 quarters; a full supply.
Flour, 85,307 sacks; a small arrival.
Barley, 75,000 quarters; a small arrival.
Oats, 64,000 quarters; half an average.
Maize, 228,000 quarters; a liberal supply.

American shipments last week were very small for the time of year, which should witness the exports of new winter crops on a somewhat free scale. Actual exports were:—44,000 qrs. of wheat, 25,000 qrs. of barley, 10,000 qrs. of oats, 161,000 qrs. of maize, and 64,000 sacks of flour. Argentine shipments were far more liberal, the items being:—Wheat 221,000 qrs., maize 349,000 qrs., and linseed 19,000 qrs.

The Old World's leading shipper continues to be Russia, from whose shores were exported last week, 271,000 qrs. of wheat, 415,000 qrs. of barley, 324,000 qrs. of oats, and 24,000 qrs. of maize. Roumania supplemented these totals with 183,000 qrs. of wheat and 29,000 qrs. of barley, but shipped no oats or maize. India sent off 100,000 qrs. of wheat and 33,000 qrs. of linseed, while Australasia exported 27,000 qrs. of wheat.

PROVISIONS.

London, Monday.—Bacon: The arrivals of bacon last week were from Ireland 1,565 bales, and from foreign ports 10,474. The bacon market was very quiet last week, in consequence of the late high prices; however, with considerable reductions there was a better demand, the market closing steadier with: Irish, 64s to 67s up to 71s; Danish, 56s to 64s up to 70s; Canadian, 58s to 61s up to 64s. Butter: The butter market was steady but quiet, with prices ranging: French, 98s to 110s; Danish, 112s to 118s; Russian, 90s to 108s; Irish, 98s to 110s; Canadian, 92s to 112s; Australian, 100s to 110s; American, 95s to 103s. Lard: The lard market was steady: Irish, 46s to 57s; American, 42s to 42s 6d.

TO-DAY'S MARKETS.

MARK LANE, MONDAY, August 28.

[FIRST REPORT.]

There was a good attendance of millers to-day, and new English wheat was inquired after at 29s. for Red, 30s. White, each per 504 lb. There were offerings of 480 lb. Red at 28s. Foreign wheat was rather steadier from last week. Californian and Walla Walla are now off the market for the first time for many years. On the other hand, New Zealand, which for the greater part of this season has been unrepresented, is now offering long-berried (very fine) wheat at 33s. and short-berried at 32s. per qr. Barley, for prompt delivery for feeding, was decidedly firm, but lower prices are the general expectation before Michaelmas. Oats made 16s. per 320 lb. for fine Vologdas, 14s. 3d. for good 304 lb. White Sea lots, and 14s. for ordinary South Russian. New English was a moderate supply at 17s. to 18s. per 336 lb.

CLOSE OF THE MARKET.

A FEW LOTS OF NEW ENGLISH MALTING BARLEY WERE SHOWN. THE WEIGHT WAS GOOD, 448 TO 452 LB., BUT THE SKIN WAS DECIDEDLY COARSER THAN USUAL, AND 29s. WAS NOT EXCEEDED. THE MARKET CLOSED WITHOUT CHANGE FROM THE EARLIER REPORT FOR WHEAT, MAIZE, AND OATS.

THE FLOUR TRADE.

MARK LANE, MONDAY, August 28.

London makes were a slow sale at 5d. per sack decline. New All-English country flour attracted attention. Prices were as low as a guinea for straights, 22s. for Thirty per Cent. Patent, and 24s. for choice roller white. Threepence under these prices would be accepted where delivery was not required for a fortnight. American flour declined 1s. per sack for Minnesota, Duluth, and Milwaukee fine qualities, and also for Kansas and other makes from winter wheat. Prices for October shipment are 2s. lower from the early offers of August. Argentine flour was scarce, and there seems to be few offers for September or October shipment. Australian declined 6d. per sack and was offered for prompt shipment at 23s. c.f.i. Hungarian Five Stars made 30s. 9d. to 31s. per sack. Cascadia made 25s. 9d. to 26s. per sack. Granardia made 25s. 6d. to 25s. 9d. per sack. Belgian finest made 27s. 6d. to 27s. 9d. per sack. Finest rice flour made 20s. 3d. per sack. Brazilian middlings made 115s. per ton. Aberdeen oatmeal realised £11 5s. per ton. In the course of the market telegrams from Minneapolis offered October shipment of fine patents at 26s. c.f.i.

LONDON TERM MARKET.

This market is open to elected members only, and is held at the Baltic Club St. Mary Axe. No business except for future delivery is done, and the smallest quantity that can be purchased is 1,000 quarters, or 4,800 cental.

Prices quoted on Saturday at the close of the week's trade were :—

WHEAT (per cental).

No. 2 American Red	6s. 8d.	Sept. delivery.
,, ,, ...	6s. 7d.	Nov. ,,
,, ,, ...	6s. 6d.	Jan. ,,

MAIZE (per cental).

American	4s. 9d.	Sept. delivery.
,, ...	4s. 8d.	Nov. ,,
,, ...	4s. 3d.	Jan. ,,

These six quotations are the same as those of the 19th instant. The speculative market is seldom so stable.

American winter wheat for September and October shipment was steady this morning, 6s. 8d. was paid for October delivery. Maize made 4s. 10d. for September delivery, while 4s. 3d. was accepted for January.

GRAIN AND FLOUR FACTORS REPORT.

Offals. Bran is still in good demand; no further advance to report in prices. GREENHILL BROS. (Belfast).

Flour.—There is a moderate demand. On the whole, however, trade is quiet; no further change to report in prices. GREENHILL BROS. (Belfast).

Flour. The tendency of prices is rather lower, although American millers make no change in offers. Grain. Indian corn is now plentiful at 13s. 9d. per 280 lb. Some Plate maize has arrived, and is held for 14s. 6d. Oats very dull, with lower prices for 38-40 lb. qualities. Barley being dear on spot, is only in small demand. Peas quiet. Beans strong, both on spot and for shipment. Oilcake unchanged. Mill Stuffs. There is no change in bran, but Thirds, especially Fine Thirds, are in active demand. MCKINNON AND MCDONALD (Glasgow).

The only change to record in milling offals is an advance of 2s. 6d. per ton for pollard.—JOHN BAWCOMBE AND CO.

Flour on spot quiet and unchanged. For shipment a fair business has been done at about 3d. decline on the week.—T. S. MEDILL AND SONS.

FEEDING STUFFS.

London, Monday.—Linseed cake firm and dearer. Cotton cake: Slow demand at last week's prices. Linseed dearer. Decorticated cotton cake and meal: Stocks nearly exhausted.

ROBERT AND JOHN HEWETSON.

THE BALTIC, 1 p.m.

STATE OF TRADE.

Wheat and maize cargoes are a little weaker from Saturday, but barley and oats temporarily favour holders. Cottonseed cargoes are steadier, while cargoes of linseed, rapeseed, beans, peas, and rice are all decidedly firm.

BUSINESS DONE.

WHEAT.—White Walla, 32s per 500lb., November shipment; Red Walla, 31s 6d per 500lb., November shipment; No. 1 Northern Manitoba, 31s 3d per 480lb., November shipment; No. 2 Northern Manitoba, 30s 6d per 480lb., November shipment; Hard Taganrog, 30s per 492lb., October shipment; White Kurrachee, 30s 6d per 492lb., September shipment; Red Kurrachee, 30s per 492lb., September shipment; Roumanian, 30s 3d per 504lb., September shipment; Roumanian, 29s per 492lb., September shipment; No. 2 Red Winter, 29s 3d per 480lb., September shipment.

MAIZE.—Argentine, 22s 6d per 480lb., on passage; American, 22s 6d per 480lb., on passage.

BARLEY.—Kustendje, 19s per 416lb., September shipment; Californian, 25s 3d per 448lb., September shipment; Azoff, 18s 3d per 400lb., on passage; Azoff, 18s per 400lb., October shipment.

OATS.—Petersburg, 13s 6d per 304lb., on passage; Petersburg, 13s 3d per 304lb., September shipment.

LINSEED.—Calcutta, 39s 9d per 410lb., arrived; Argentine, 38s 9d per 416lb., arrived; American, 39s 9d per 424lb., September shipment; Bombay, 40s 6d per 416lb., September shipment.

RAPESEED.—Roumanian, 35s per 424lb., September shipment; Ferozepore, 34s. per 416lb., September shipment

HOPS.

London, Monday.—W. H. and H. Le May, 67, Borough, London, report: The new crop is now arriving on the market, and is being taken at prices that must be very satisfactory to consumers, but most disappointing to the producer. Yearlings are selling, but at a further reduction on prices ruling last week.

COLONIAL DAIRY PRODUCE

London, Friday. — Butter: The demand for Canadian butter is good, and values remain unchanged for salted, but there is a firmer tone for unsalted, and prices are expected to improve next week. The c.i.f. quotations from Canada shows a steady advance, but buyers here do not feel inclined to follow the rise further at present. The first arrival of grass made Australian butter is due next week, but it consists of only a very small parcel from an especially early district, and, of course, will not possess the full grass flavour for a few weeks. The weather in Queensland and New South Wales is dry and hot, and butter is quoted at 102's f.o.b. The Continental markets remain firm, and supplies are falling off in Central Europe. As showing that the effects of the drought which prevailed on the Continent last year are not over, the imports of butter from Europe since July 1 to date are only 25,180 tons, against 28,220 tons for the same period last year, and 31,858 tons for the year 1903. Imports into this country from all foreign sources last week were 55,862 cwts., against 69,500 for the same week in 1904, and 79,076 cwts. in 1903.

CATTLE.

Metropolitan Market, Islington.

	Monday, Aug. 21, 1905. British.	Total, Aug. 20, 1904.	Monday.
Beasts	1,400	1,400	1,113
Sheep and Lambs.....	5,000	5,000	7,707
Calves	10	10	...
Milch Cows	40	40	40

Quotations per 8 lbs. (sinking the offal).

ENGLISH

	Inferior.	Second	First
Beasts	3s 0d	3s 6d	4s 0d
Sheep	3s 8d	4s 4d	5s 0d
Lambs	4s 10d	5s 4d	6s 0d

Milch cows, per head, £16 to £21.

British arrivals include as follows: Scotland, nil; Eastern Counties, 17; Midland, Home, and Western Counties, 1,176; Devon, 15; Ireland, 83.

In the beast market to-day the supply compared with the corresponding day last week showed an increase of 200 head, the majority, as usual, consisting of Midland Counties cattle. Trade taken all round was of a very sluggish nature, rates favouring the buyer to the extent of 2d. per 8 lb. on last Monday's money. The Irish consignments to-day consisted of 61 Dublins (10 of which were choice Black-polled cattle) and 22 Waterfords, no stores being offered for sale. Trade for this class of beasts was also very slow, nevertheless, late currencies governed all sales. Fat butchering cows and bulls were in average supply, and met a slightly better demand from town buyers at an advance of 2d. A clearance is, however, extremely doubtful.

The following are top quotations per 8 lb. (sinking the offal): —

	To-day.	Monday, Aug. 29, 1904.
Devons	4s 4d to 4s 6d ...	4s 6d to 4s 8d
Herefords	4s 4d to 4s 6d ...	4s 6d to 4s 8d
Runts.....	4s 0d ex 4s 6d ...	4s 2d to 4s 6d
Lincolns	3s 8d to 3s 10d ...	4s 0d to 4s 2d
Irish	4s 0d to 4s 5d ...	
Fat Cows	3s 4d to 3s 6d ...	3s 6d to 3s 8d

In this part of the market trade was of a decidedly firmer nature, an advance of 2d. per 8 lb. being made on wether sheep, and from 2d. to 4d. on ewes. Scotch sheep also shared in the generally better tone of the trade, rates favouring the sellers to the extent of 2d. On the other hand, Irish met a very limited demand at less money, notwithstanding the much shorter number on offer. Lambs, which were greatly in excess of the demand, were difficult to cash at late rates. A clearance in this part of the market is confidently expected.

Undermentioned quotations are at per 8 lb. (sinking the offal), and are for the best of each class penned:—

	To-day.	Monday, August 29, 1904.

London (Central), Monday. Moderate supply. Quiet demand. Beef: Scotch, 3s 10d to 4s 6d; English, 3s 6d to 5s 8d; American, 3s 3d to 3s 7d. Mutton: Scotch wethers, 4s 4d to 5s 2d; ewes, 3s 6d to 3s 10d; English wethers, 4s 4d to 4s 10d; ewes, 3s 3d to 3s 8d. Lamb: English, 4s 8d to 5s 2d; New Zealand, 3s 4d to 3s 10d. Veal, 3s to 4s 6d. Pork, 3s 10d to 4s 4d per 8lb.

St. Ives (Hunts), Monday.—Beasts, 232; sheep and lambs, 1,414; pigs, 370. Beef, 7s 3d to 8s; mutton, 7s 7d to 10s 6d; lamb, 9s to 10s; pork, 6s to 6s 6d. Fat cattle, sheep, and pigs, and store sheep and pigs good demand. Store cattle fair demand. Milch cows short supply. Prices £14 to £22.

FOREIGN.

Deptford, Monday.—Beasts, 648. To-day's supply of beasts compared with the corresponding day last week showed a decrease of 443 head, and consisted entirely of shipments from the United States. Trade taken as a whole was of a very slow nature, with a downward tendency in regard to value, though not sufficient to enable us to quote it so. Best States beasts on offer, to dress about 720 lb., made from 3s 9d to 4s; seconds, 3s 8d per 8 lb. (offal given in.) Besides the official number given, about 250 Canadian cattle were withheld to await next Wednesday's market. On Saturday, 1,450 beasts from the United States and 700 from Canada were offered for sale. Trade, however, was not so good, difficulty being experienced in obtaining late rates. The best were priced at from 3s 10d to 4s 1d for the former, and from 3s 8d to 3s 11d for Canadians. There were also 625 Canadian sheep offered for sale which met a firm trade, late currencies governing all sales, best being quoted at from 4s at to 4s 4d per 8lb.((offal given in.)

Liverpool, Monday.—Supply of cattle larger than Monday last; demand slow, except for good qualities. Large decrease in supply of sheep and lambs, trade consequently materially improved, small sorts of finished quality commanding ready sale at prices in sellers' favour. Beef, 5d to 5½; mutton, 8½d to 9d; lamb, 9½d to 10d per lb. At market: 1,113 cattle and 7,707 sheep.

FRUIT AND VEGETABLES.

Covent Garden, Saturday.—Plentiful supplies of fruit and vegetables met with a steady demand at moderate rates. Quotations for English produce: Apples, 3s to 8s 0d per bushel; pears, 1s 0d to 3s per half sieve; peaches, 1s 6d to 12s 6d per dozen; nectarines, 2s to 12s; grapes, figs, 1s to 3s 0d per dozen; grapes, 2d to 3s 2d; greengages, 2s 6d to 6s; plums (Victoria), 3s to 5s; ditto (Orleans), 3s to 4s 0d; damsons, 1s 9d to 2s 6d per sieve; tomatoes, 1s 6d to 4s; melons, 1s to 3s; cobnuts, 4s to 5s; filberts, 4s to 5s per 100; walnuts, 4s to 5s per 100; mushrooms, 2s to 3s per dozen bunches; ditto (cultivated), 4s to 5s per bag; horseradish, 3s to 10s 0d per bundle; cucumbers, 9d to 1s 0d; cauliflowers, 1s to 2s 0d; cabbages, 2s to 3s per dozen; cos lettuce, 6d to 1s per score; cabbage lettuce, 3s to 8s; vegetable marrows, 2s 0d to 5s per dozen; kidney beans, 2s 6d to 3s; spinach, 2s to 2s 6d; sweet peppers, 1s to 2s 6d; parsley, 1s 6d to 2s; mint, 1s 6d to 2s; radishes, 3d to 1s; carrots, 1s 3d to 3s; turnips, 2s 6d to 3s per dozen bunches; mushrooms, 2s to 3s per lb.; seakale, 1s to 2s per dozen; leeks, 3s to 7s per bundle; potatoes, 55s to 75s per ton.

SEEDS.

London, Monday. The demand for turnips late and early still continues at firm prices. Swedes light. Rye continues selling freely at unchanged prices. Rape and mustard moving off; prices firm. Winter tares offering freely. Prices raised.—JOHN PEARD AND CO.

LIVE STOCK AND MEAT TRADE REVIEW

(Written Specially for the "Mark Lane Express.")

Trade in London.

At the Islington cattle market on Monday last, there was a slight increase in the supply. For all descriptions of both prime and second quality English fat beasts, trade was of a very slow nature. For choice Herefords and Devons, last week's quotations were well maintained, but other descriptions showed a slight decline in regard to value. The Irish arrivals to-day were considerably larger and consisted of 68 Dublins (5 of which were prime black polled beasts), 22 Waterfords, and 12 store cattle (two and three-year-olds). For this class of cattle trade ruled fairly steady, late currencies governing all sales; on the other hand, the stores were greatly in excess of the demand, rates in consequence remaining unquotable. Fat butchering cows and bulls were in rather larger supply, the majority of the sales being made by town buyers, nevertheless an advance of fully 2d. per 8 lb. was made on last week's quotations.

On Thursday, the supply was a short one, the majority as usual consisting of fat shed cows and bulls, for which trade ruled firmer, a slight advance in value being made for the beast. A few prime quality beasts were also offered for sale, but found no buyers. At the foreign cattle market (Deptford), trade on Monday was firmer at an advance of from 1d. to 2d. per 8 lbs., and on Wednesday and Saturday still firmer in regard to tone and value, rates ruling from 1d. to 2d. per 8 lbs. higher than on Monday. The total number offered for sale at both markets was 5,340, as against 5,695 during the previous week, consisting of 1,125 British (increase 115) and 4,215 foreign (decrease 470). These latter comprised 3,515 from the United States, and 700 from Canada. The following were the top rates obtained per 8lbs. (sinking the offal):—80 to 90-stone Devons, 4s. 6d.; 90 to 95-stone Herefords, 4s. 6d., exception 4s. 8d.; 95-stone runts, 4s. 2d. to 4s. 6d.; 100-stone Lincoln Shorthorns, 4s.; 110-stone ditto, 3s. 8d. to 3s. 10d.; 80 to 90-stone black polled Dublins, 4s. 5d.; 95-stone ditto, 4s. to 4s. 2d.; 85-stone States, 3s. 10d. to 4s. 1d.; 90-stone Canadians, 3s. 8d. to 3s. 11d.; 90-stone fat cows, 3s. 6d.

At Islington the supply in the sheep market was considerably shorter. Trade for all grades of both Downs and half-breds was of a dull and dragging nature, with a downward tendency in regard to value to the extent of fully 2d. per 8 lb.; on the other hand, notwithstanding the large number of Irish on offer, trade for this class of sheep ruled fairly steady, late currencies governing all sales. Scotch sheep also shared in the general depression, meeting a decline of 2d., and even at this concession were difficult to cash. Lambs were in average numbers, but the season being now about over, trade ruled quite even at a decline of 2d. On Thursday trade ruled firmer, an early clearance being made at an advance of 2d. per 8 lb. on late rates. At Deptford a short number of Canadian sheep were offered for sale on Saturday, these, meeting a firm trade, were soon disposed of at about last week's currencies. The total number penned was 9,630, as against 10,688 during the previous week, the supply consisting of 9,005 British (decrease 1,025) and 625 foreign (decrease 33). Best pens made per 8 lb. as follows (offal given in): 7½ to 8 stone Downs, 5s. 10d; 8 stone Scotch, 5s 10d.; 9 stone Downs, 5s. 8d.; 10 stone Irish, 5s. 4d.; 10 stone Downs, 5s. 6d.; 10 stone half-breds, 5s. 4d. to 5s. 6d.; 10 stone ewes, 4s. 2d. to 4s. 4d.; 5 stone fat Down lambs, 6s. 2d.; 6 stone half-bred ditto, 5s. 10d. to 6s.; 8 stone Canadians, 4s. 2d.

Calves numbered 45, and met a slow but steady inquiry at from 5s. 4d. to 5s. 6d. per 8 lb. (offal given in).

No pigs on offer.

Trade in the West.

We have to report an exceedingly quiet business all round, both for stores as well as for fat stock. Milch beasts, for one thing, still meet an unsatisfactory sale, though there are signs of the trade slowly improving, however imperceptible it may be just at present. A few of the very best and very few of these are offering are occasionally selling from £18 up to £21 apiece, but this is by no means a general thing, a more average range from the ordinary range of milchers forming the great bulk of the present supply, being from £15 to £17 apiece, whilst poor class lots sell at any price between £11 and £14 or £15. Barreners are making an equally disappointing price, which is all the more discouraging seeing how greatly the keep prospects have improved since the drought terminated. In proof of this, we may state that most of the barreners now offering—no matter how near beef they may be—are only making from about £20 up to £26 or £27 per pair for the best, anything at all plain meeting a much neglected sale at from £16 to £19 or so. Store sheep continue to meet a steady sale at about the same prices as have ruled of late, the variation being only of a trifling character, with an absence of any very marked improvement, such as many anticipated would have resulted, seeing that a decent root crop is now assured, though there is undoubtedly a good healthy demand for sheep.

As regards fat stock, prime bullocks, which are none too plentiful anywhere, are meeting a good firm trade at rather better prices, 11s. to 11s. 6d. per score; middling shows but very little difference in values, which may be given as from 10s. to 10s. 6d.; but rough grades—old cows, coarse bulls, etc.—are meeting a most indifferent sale at prices ranging from 8s. to 9s. per score, with little immediate prospect at present of much better prices ruling. Veal is also selling a little less freely than it was, at a trifling decline in value, the best grades now ranging from 7d. to 8d., which is about the top price; seconds, 6½d. to 6¾d. The choicer grades of mutton continue to keep fairly steady at 7½d. to 8d. per lb., and the demand just now is confined very largely to wethers; and the younger grades of ewes are also in some little request at 7d. to 7½d.; but inferior sheep—coarse animals and old ewes—tend to lower rates, at 6d. to 6½d., with scarce any inquiry at the price.

Pigs continue one of the best selling things on the market, particularly all the lighter weights, either in baconers or porkers, which in some few cases, for anything very choice, are now making up to 11s. per score, though a more average range from ordinary runs of small weights is from 9s. 6d. to 10s. 6d., at which price a good trade is being done.

Trade in Scotland.

The number of fat cattle on offer has been rather under an average. For everything of a good description the demand has been fairly active and prices would be about 10s. per head higher. Secondary cattle were also just the turn dearer. A fair supply of fat sheep on offer, but the best class shown in moderate numbers. These met a good inquiry at satisfactory prices, but secondary sheep were the turn cheaper. Fat lambs in fair demand, and previous prices maintained. Ewes were slightly cheaper. Fat calves rather under the extreme prices of last week. Pigs made previous prices. Rather more store sheep on offer, and these met a quieter trade, prices favouring buyers to the extent of about 1s. per head, with a part of the secondary descriptions left unsold. There were very few store cattle, for which there was little inquiry, and to effect sales moderate prices had to be taken. Milch cows of a good class dearer. Quotations:—Top price of best cattle, per live cwt., 39s.; current, from 35s. 6d. to 37s. Mutton to 9d. per lb.—John Swan and Sons, Limited.

Trade in Ireland.

There was a large attendance of strangers at Dublin market on Thursday, and there was an increase in the supply of cattle of 266, but a decrease of 184 sheep. The display of really first-class beef was very meagre, and the demand for such was brisk for well-finished bullocks, but dull for heifers. Coarse beef was lower, and a large number of beasts had to be driven out unsold. Beef ranged from 45s. to 57s. 6d. per cwt. (dead weight) or from 29s. 6d. to 33s. 3d. (live weight). Trade was, on the whole, quieter than the previous market. In the mutton department, fat wethers and ewes, for home trade, met with a satisfactory sale, at about former rates, but for rough sheep prices were dull and irregular. There was more inquiry for shipping hoggets of good quality, but lambs met with a disappointing sale. Best wether mutton sold at from 7d. to 7½d. per lb.; ewe, 6d. to 6¾d.; and inferior sheep from 5½d. upwards. Hoggets rated at from 34s. for small, up to 60s. for large heavy. Only the best class of lambs brought former rates, and sold at from 20s. to 39s. each. Veal was in good supply, best selling at from 7½d. to 8½d. per lb; coarse calves at from 5d. per lb. upwards. For milch cows there was a very slow and disappointing sale, at a distinct depression in prices.

The Dublin pig market was a moderate one as regarded supplies, and a good attendance of home and shipping buyers made trade of a quick and decided character. Prime pigs made up to 56s. per cwt., and in a few cases this price was exceeded. The improvement in rates was noticeable in other classes as well, inferior sorts selling at from 35s. to 48s. per cwt. After the recent rains there was a better inquiry for store cattle. The chief business in this line was transacted at the large sales held by some of the cattle salesmen.

LONDON.

Islington. Thursday.—A fair number of beasts were offered on Thursday, but met a slow demand at about late rates. Fat bulls, 2s 10d to 3s 3d. Sheep entries were on a small scale, but trade for both wethers and ewes ruled slow. Salesmen, however, were reserved, and demanded 2d per 8 lb. advance. 7½ to 8 st. Down wethers 5s 10d, 9 st. 5s 6d to 5s 8d, 10 st. half-breds 5s 4d to 5s 6d, 10 st Down ewes 4s 2d, 11 st. half-breds 3s 10d to 4s. Lamb trade quiet at late rates: 5 st. Downs 6s to 5s 2d. 6 st. half-breds 5s 10d to 6s. Calves in fair supply, sold quietly, the best making 5s 4d, extreme 5s 6d per 8 lb., offal given in. Total supplies:—55 beasts, 1,835 sheep and lambs, 40 calves, and 5 milch cows.

London (Central). Friday.—Fair supplies, and very slow trade, though prices continue firm. English beef, 3s 6d to 3s 8d; Scotch sides, 3s 10d to 4s; shorts, 4s 2d to 4s 6d; Deptford and Liverpool killed, 3s 2d to 3s 7d; refrigerated hindquarters, best, 3s 8d to 4s; ditto, seconds, 2s 6d to 3s 4d; ditto, forequarters, 2s to 2s 6d; inferior beef, 2s 8d to 3s. Mutton: Scotch wethers, 4s 8d to 5s; ditto, tegs, 5s to 5s 4d; ditto ewes, 3s 4d to 3s 8d; English wethers, 4s 4d to 4s 10d; ditto ewes, 3s 4d to 3s 8d; foreign sheep, 4s to 4s 4d; English lamb, 4s 10d to 5s 4d; veal, 3s 4d to 4s 8d; English pork, 3s 8d to 4s 4d; Dutch ditto, 3s 6d to 4s per 8lb.

COUNTRY.

Ashford. Tuesday. Beef trade satisfactory at late rates, best being quoted up to 4s 10d, but not many really prime animals offered. Mutton opened well, but declined later, and 2d less had to be accepted for inferior animals; halfbred wethers made up to 5s 10d, and Kents to 5s Lamb and veal unchanged, making up to 7s and 5s 6d respectively. Pork dearer, roasters up to 4s 5d.

Basingstoke. Wednesday.—At Raynbird and Sons' Sale Yard there was a good attendance of buyers to meet a supply of 35 fat beasts, 46 calves, 449 fat sheep and lambs, 102 pigs, and 128 head of dairy and store cattle, for which the following prices were realised:—Shornhorn beasts made up to £20 15s; big fat cows reached £19 10s; prime West Highland steers made from £19 10s to £21 10s; Welsh Runts, £17 5s; Devon steers made up to £19 5s; fat calves, 70s to £5; small, 20s to 55s; fat porkers, 30s to 52s; store pigs, 13s 6d to 24s; dairy cows, £9 to £20 15s; Down wethers and ewes made from 50s to 61s 6d; smaller, 46s to 48s; old Down ewes, 30s to 38s; Welsh ewes, 20s; seven-months-old Down lambs, 40s to 49s 6d; small, 34s to 38s; choice three-months-old sucking lambs, 34s to 40s; small, 26s to 32s. Fat beasts were short in numbers, but sufficient for the demand. The show of fat sheep and fat lambs consisted chiefly of Down wether ewes and lambs of choice quality, for which there was a good inquiry for local and distant buyers, and a clearance very nearly made, good ewes making an advance, and prices well maintained for wethers and lambs. With a full entry of dairy cows trade ruled slow, except just for the very best class milch cows. Store cattle met with slightly more inquiry. Fat calves sold readily at late quotations. The pig trade remains firm, higher prices being obtainable. Ruling values: Prime Devon and Scotch beasts, 6¾d to 7d; ditto shorthorn, 6d to 6½d; bulls, cows, and inferior, 5d to 5½d; best fat sheep, 8¾d to 9d; second ditto, 7¼d to 8d; old ewes, rams, and inferior, 6d to 6½d; choice fat lambs, 9d to 10d per lb.; fat calves, 6½d to 8d per lb.; fat porkers, 9s to 10s per score.

Berwick. Saturday.—There were not many cattle on offer, and these met with no demand.

Birmingham. Thursday. — Small supply of beasts, sheep, and pigs; trade fair. Quotations: Beef, 5½d to 6¾d per lb.; Herefords, 7d per lb.; mutton, 5½d to 8¼d per lb.; lamb, 6d to 9d per lb; bacon pigs, 10s per score; cutting pigs, 9s 10d per score; sows, 7s 10d to 8s per score.

Bristol. Thursday.—The market was of a quiet character. Beef, of which there was a moderate quantity, declined slightly in values, 58s per cwt. being the highest price for best qualities, and 55s for secondary. Good supply of mutton and lamb, and fair trade done at late rates, though light Down wethers showed a slight turn in buyers' favour. Pigs were again few in number, and baconers fell 6d per score.

Calne, Friday.—Present prices for prime pigs, in lots of not less than ten, on rail within 100 miles of Calne.

Prime Stores.	Thickness of fat in any part of Back.	Price per Sc. s.	d.
6sc. 10 lb. to 9 sc. 10 lb.	2½ in. and under	9	0
Under 10 sc.	Not exceeding 2½ in. ..	9	0
Under 11 sc. 10 lb. ...	,, 2¾ in. ...	8	6
Under 12 sc.	,, 3 in. ...	8	0

C. and T. Harris and Co., Ltd.

Canterbury. Saturday.—Good lamb trade, but not quite so fast as of late. Wethers lambs ranged from 21s 6d to 26s 6d, and ewe lambs up to 30s; ewes, 41s to 43s; and useful wether tegs up to44s.

Chester. Thursday.—The market was well supplied with stock, but trade was quiet. A good show of sheep, and some improvement in the demand. Quotations: Milch cows, £17 to £21; calvers, £14 to £18; barren cattle, £10 to £12; heifers, £9 to £14; and stirks, £6 to £10. Sheep sold at prices ranging from 18s to 34s each.

Chelmsford. Friday.—Better supply of fat sheep and lambs; good trade; short supply of fat and store pigs, trade better; good supply of store sheep and lambs, which sold well. A better supply of beef and store cattle, for which there was an improved trade; and a better supply of milch cows, which met with a dull sale.

Colchester. Saturday.—There was again a very poor supply, there being practically no market. The little offering sold at the following prices:—Grass beef, 4s 4d to 4s 6d per stone; mutton, 5s 6d to 5s 8d; lamb, 6s to 6s 4d; and pork, 8s 6d to 9s 6d per score.

Dorchester. Wednesday. A large attendance to-day, and the supplies of good quality. Fat calves met a keen demand, and made 8d to 8¼d per lb., and others 7d to 7¾d. Wether mutton ruled firm, and made 7¾d to 8¼d per lb., and ewes 7¼d to 7¾d. Choice lambs sold up to 10d per lb. though the average quotation was 9d to 9¼d. The pig trade was still firm, particularly for small porkers and neater weights in baconers, at 9s 6d to 10s 6d per score; heavier grades, 8s to 9s; heavy sows were neglected.

Doncaster. Saturday.—Small show of cattle, but a good supply of sheep. The heavy fall of rain caused a thin attendance, and trade was slow. Milch beasts, £17 to £25; bullocks, £11 to £17; heifers and drapes, £11 to £16; stirks, £7 to £9; young stores, £4 to £6. Lambs 2s per head dearer, and making 30s to 36s. Lincolnshire ewes, 42s to 50s; South Country ewes, 36s to 45s each.

Dublin. Thursday. Numbers in market: Beasts, 3,235; increase, 269. Sheep, 8,288; decrease, 184. Calves, 35; decrease, 3. Choice bullocks maintained last week's rates, but heifers and secondary class of bullocks were rather weaker, and rough sorts still more difficult to exchange. Sheep shade better trade. Best fat lambs only in request, other sorts not so easily placed. Cattle, live weight (best), 30s to 33s 6d per cwt; secondary and inferior classes, 27s to 29s 6d per cwt. Mutton, dead weight, 5½d to 7½d per lb. Gandy, Sons and Co.

Edinburgh. Wednesday. — Sheep and lambs met a slow trade for all sorts; halfbred lambs, 30s to 37s; Blackfaced to 12s, Cheviots to 16s, and Cheviot Dinmonts to

36s. A small show of cattle and a dull market; polled bullocks to £14, shorthorn cows to £25, Ayrshires to £20, and crosses to £22.

Exeter. Friday.—Good demand for prime steers and maiden heifers, at 11s 3d per score; cows, 10s to 10s 6d; all the best cleared. There was a large supply of sheep of various kinds, but a smaller number of prime wethers or good hoggs, for which there was a good demand at 8d per lb; ewes, 6d. Very slow trade for breeding ewes at lower rates, from 36s to 40s, some unsold; fat lambs, 10d; calves, 7½d.

Glasgow. Wednesday.—Large supplies, owing to big lots of small Blackfaced lambs being offered for storing purposes. Best lambs scarce, and fetched 8½d to 9d; secondary, 7½d to 8d; and best sheep, 8½d to 8¾d per lb. Cattle firm; top Scotch, 6½s to 6¾s; secondary 5¾s to 6¼s; top Irish, 5¾s to 5¾s; Canadian, 5¼s per cwt.

Gloucester. Saturday. Messrs. Bruton, Knowles and Co. report their sales as follows: Eighty cows and calves and incalvers, with trade quite equal to last week. A fair supply of store cattle with a good increase in prices.

Leicester. Saturday. Moderate supplies of home bred stock. Trade was not quite so depressed, but although prices were low, buyers declined to speculate. Choice milch cows were scarce, and sold freely at £20 to £22; good lots, £17 to £19; inferior, £14 to £16; second grade Irish bullocks, £12 to £13; Welsh cattle, £9 to £13 10s; calves, 15s to 35s per head.

Lincoln. Friday. Poor display of horned stock, and a slow trade. Milch cows made up to £18. Sheep were in small supply, and met with a poor sale. Lambs, 32s each.

Lynn. Tuesday. Average show of fat beasts, 7s to 7s 6d per stone; very few stores, scarcely any trade, £6 to £12 each. Fat sheep average show, firm trade, 8s 9d to 9s 6d per stone; stores, 38s to 44s; store lambs, 20s to 28s; fat lambs, up to 35s. each.

Manchester. Friday. Beef: Firsts, 5¾d; seconds, 4¾d to 5d; thirds, 3¾d to 4d. Mutton: Firsts, 7¼d; seconds, 6¾d to 7d; thirds, 5¾d to 6d. Veal: Firsts, 6¾d; seconds, 5¾d to 6d; thirds, 4¾d to 5d. Lamb: Firsts, 7¾d; seconds, 6¾d to 7d per lb.

Norwich. Saturday.—Store beasts in average supply, but the demand was not brisk, and there was practically no alteration in prices, which were quoted at £5 to £17 per head. Fat beef met with a firm trade at 7s 9d to 8s per stone. Quiet demand for store sheep and lambs at late rates. Fat sheep made 9s 6d to 10s per stone, and fat pigs met with a good trade at 6s 3d to 6s 9d per stone. Good trade for store pigs and calves.

Nottingham. Saturday.—A larger supply in all departments. Best in-calf cows, £18 to £25 each; in-calf heifers, £14 to £14 10s; strong bullocks, two or three years old, up to £16. There was a slower trade for calves, and prices ruled from 35s to 50s each. No sheep or pigs shown.

Preston. Wednesday.—In all departments there was a good show. 347 cattle, 2,671 sheep, and 130 calves. The demand for cattle was only slow, and the trade in calves was bad, while sheep were in moderate demand. Cows and bulls, 5d to 5¾d, with a few at 5¾d; heifers and bullocks, 6d to 6¾d; hoggs, 8d to 8½d; lambs, 8d to 9½d; ewes, 6d to 6¾d; tups, 5d to 5¾d; and calves, 5¾d to 6¾d per lb.

Retford. Saturday.—Plenty of store stock. Demand inactive, and prices were lower. A few calving beasts made £14 to £18; milch cows, £17 to £18; heifers, £10 to £14; and calves, 30s to 40s per head.

Romford. Wednesday.—Average supply of fat beasts; trade slow. Best animals, 4s 2d to 4s 4d; middlings, 3s 10d to 4s per stone. Calves scarce; trade better at 4s 10d to 5s per stone. Average supply of sheep; trade about the same. Best sheep, 5s 4d to 5s 6d; middlings, 5s to 5s 2d; ewes, 4s 2d to 4s 4d per stone. Short supply of lambs fair trade at 5s 8d to 6s per stone. Very slow demand for store beasts. Fair supply of pigs; trade about the same.

Thame. Wednesday.—Good attendance of buyers met large supplies of all descriptions of fat stock. Both beef and mutton showed a slight decline on previous week's prices with very fair demand. Veal, bacon, and pork all disposed of at late rates. Store stock and weaning calves all in request. Messrs. Bond and Burrows' sale comprised 107 fat beasts, 336 fat and store sheep, 93 fat and weaning calves, and 64 bacon hogs, porkers, and store pigs. Fat oxen made from £16 to £21 7s. 6d.; fat heifers, £15 to £22; fat wether sheep, 42s to 58s; fat ewes, 40s to 56s; fat lambs, 30s to 41s; fat calves, £3 10s to £5; weaning cow calves, 28s to 55s; bull calves, 10s to 48s; bacon hogs, £3 15s to £4 17s 6d; porkers, 28s to 42s; store pigs, 12s to 20s.

Truro. Wednesday.—Fat bullocks, 54s to 58s per cwt.; barrenets, 40s to 45s; store bullocks, 40s to 45s; cows and calves, £9 to £15; rearing calves, 25s to 40s; wethers, 7¾d to 8d; ewes, 5¾d to 6d; lambs, 7¾d to 8¼ per lb.; pigs, huge, small and suckers, 10s 9d to 28s each. Beef, 6d to 6¾d per lb.; mutton, 6d to 8d; lamb, 8d to 9d; veal, 6d to 8d; pork, 6d to 8d; bacon, uncured, 6d to 7¾d; cured, 7d to 9d; pork carcases, 4¾d to 5¼d. Number in cattle market: Bullocks, 301; calves, 78; sheep, 750; pigs, 182; horses, 2; live fowls, 18; live geese, 3.

Wolverhampton. Wednesday.—Moderate supply all round; fair trade for best quality. Beef, 5¾ to 6¾d per lb.; mutton, 6d to 8¼d per lb.; veal, 6d to 7d per lb.; lamb, 8d to 8¾d per lb.

Worksop. Wednesday. Better show of stock than last week, with trade slow in all departments. Best beef, 6s 9d to 7s 3d; secondary, 6s to 7s per stone. Mutton was down quite 1d per lb.; best Southdown wethers and crossbreds, 7d to 8d; choice hogges, to 8¼d per lb.; ewes, 5¾d to 6¾d; lamb, to 9d per lb.

FOREIGN.

Yorkhill. Monday.—Good average supplies of Canadian cattle were on offer at the usual weekly sales held to-day, 841 head being penned in the lairages. All were from Montreal, and were delivered in fair shape and condition. Buyers were present in large numbers, and business was generally steady from the opening till the close of the proceedings. Prices, as compared with last week, developed a downward tendency, but this was principally owing to the larger supply and an easier feeling in other departments of the trade, and the close found market values at about late average rates. Bullocks sold from 54s to 57s per cwt. dead weight, while ranchers of the better class were cashed from 42s to 50s per cwt., and lower qualities down to 40s per cwt. Prime bulls sold at about 47s per cwt., and scarce heavy animals down to 45s per cwt. dead weight.

HOPS.

Canterbury. Saturday. — There is promise of an abundant yield, but red rust is spreading. It is doubtful whether all the acreage will be picked.

Worcester. Saturday.—The weather this week has been rather too wet for the hops and there is some increase of mould; warm, dry days and nights are necessary for the proper development of the fruit. Several growers at market to-day offered samples of the new growth. Some sales were effected for early requirements at 70s to 80s.—CHARLES FARAM AND CO.

FEEDING STUFFS.

Hull, Tuesday. Linseed: Linseed ruled firm for some days during the past week, but with more pressing sellers of Plate seed and offers from North America the market has turned flat, and values have dropped about 1s per qr. from the top. River Plate: Spot, through scarcity of sellers, made 39s 6d; August-September is down to 38s 6d, and September-October 38s 7½d. America is offering October-November shipment, but, so far, the price is beyond reach of buyers. Cottonseed: There has been rather a firmer market during the week for Egyptian but not much business reported. Spot and afloat sold at £5 1s, and same bid present shipment. September-old crop done at £5 11s 3d, and new at £5 16s 3d to £5 17s 6d, sellers to-day requiring 1s 3d over these prices. No sales November-January, which offers at £5 1s 9d. A moderate business done in Bombay at £4 13s 9d near, £4 14s to £4 14s 6d August-September and September-October, asks in new crop, December-January, at £4 15s. Oils: The market is flat. Linseed: 17s spot, 17s August, 17s 3d September-December. Cottonseed: 16s 3d spot, 16s 3d November-April. Linseed cakes are 2s 6d per ton dearer, with a quiet demand, pending harvest operations. Cotton cakes: Steady, without change in prices. KEIGHLEY, MAXSTED AND CO.

London. Thursday. Linseed: Market very depressed on account of continued offers of American seed, and buyers most difficult to find; closing values are: Calcutta London Spot 38s 3d, and July August 38s 6d, August Sept mber 38s 6d, September October 38s. La Plata, July-August 38s. Hull—Dull, scarcely any business possible. La Plata spot 38s, passage 38s, August-September 38s, September October 38s 3d. To the Continent Bombay, July-August 40s 9d, August-September 40s 9d. Calcutta, July-August 39s, September October 39s 3d. La Plata on passage 38s, July August 38s. Rapeseed continues in the same depressed state, scarcely any business passing, except in Danubian descriptions, prices for which are relatively considerably cheaper than those for East Indian. Brown Cawnpore, August-September, 35s, Brown Calcutta, August-September, 34s. To the Continent, Yellow Guzerat 40s. Yellow Cawnpore 39s, Brown Cawnpore 35s, Brown Calcutta 34s. Ferozepore 34s 3d. Danubian August-September 34s, September-October 34s 3d. Ravison to Hull Azoff-Black Sea September October 26s. Cottonseed: Egypt has continued steady, but the demand here has been extremely moderate. London—Passage and August £5 10s, September £5 12s 6d sellers, September Fayoumi £5 1s 9d, November-January £5 1s 9d. Hull Spot, passage and August £5 8s 9d, September £5 11s 3d; September-Fayoumi sellers £5 18s 9d, November-January £5 17s 6d. Cargoes—September shipment, old, £5 18s 9d, October, new, £6. Bombay steady, August-September Hull £4 14s 6d, December-January £4 15s, business doing. Linseed oil has experienced a smart decline. We quote spot and month in pipes £17 10s, barrels £17 15s, September-December £18, January-April £18 5s. Hull packed spot, £16 10s, September-December £16 17s 6d, January-April £17 5s. — THE PRODUCE BROKERS COMPANY, LIMITED.

Mark Lane, Monday.—Linseed cake: There is no improvement in the demand, which continues extremely small, at the same time prices are not quotably lower, as the present low value of oil renders seed-crushing particularly unremunerative. Russian remain best value and unchanged. American and East India also offer at last week's quotations. London-made sell quietly at 2s 6d per ton less money. Cotton cakes: Egyptian are fairly plentiful on spot, which, however, meet a poor inquiry, with the result that the tone of the market is barely as strong, although quotations are unchanged. English move off slowly without alteration, as do Bombays. Decorticated, London-made, being cheaply offered, attract rather more attention at £6 17s 6d for cake and meal, and £5 5s for special digestive meal, while American "Open Hand" brand makes £6 17s 6d, "Ley" brand £6 12s 6d, and meal £6 12s 6d. Rape cakes: Dull; East India and Ravison unchanged. Maize germ meal: Some business is reported in white American at £5 5s c.i.f. terms for December-January despatch, while English makes for present delivery maintain their value; maize gluten meal is nominally quoted at £5 15s. Rice meal: Very little offers in any position, with the exception of one or two small lots of Rangoon in second hands, for which £4 10s to £4 11s 3d is asked. Broken Rangoon rice is cheaply offered at £4 15s per ton. Molascuit cattle food is in good request at £4 10s per ton. Locust beans command rather more money at £5 5s per ton for winde and £5 10s for kibbied. Nitrate of soda is without alteration at £10 17s 6d per ton ex quay.

Worcester: 10. York: 12.
useful wether tegs up to 44s.

CHEESE.

Glasgow, Wednesday.—Arrivals fair, with quality generally good. Prices ruled steady to firm. Cheddars fetched 54s to 58s, and Dunlops 53s to 57s per cwt. Canadians firm but slow of sale, as the price is too near that for home. Dealers hold the price has been advanced too quickly. Easier prices would be accepted rather than miss business.

Newport. Wednesday.—About eight tons pitched. A good attendance and a fair demand. Cheshires, 46s to 54s per cwt.; fancy dairies, 55s to 56s; truckles, 58s to 60s; doubles, 48s; Derbys, 58s to 60s.

GAME AND POULTRY.

Smithfield. Saturday. Very large supplies met with rather quieter support. Quotations: Fowls, Yorkshire 2s to 2s 6d; Surrey, 3s to 4s; Welsh, 1s 9d to 2s 3d, Boston, 1s 10d to 2s 4d; Sussex, 2s 9d to 3s 3d; Dorking, 1s 8d to 2s; geese, 4s to 5s; Aylesbury ducks, 2s 3d to 3s; country, 1s 9d to 2s 3d; guinea fowls, 1s to 1s 2d; wild rabbits, 6d to 9d each; venison (haunches), 12s to 15s each; forequarters, 2d per lb.; young grouse, 4s to 4s 6d; old, 2s 9d to 3s 9d per brace; English horses, 2s 9d to 3s 9d; leverets, 1s 6d to 2s; Scotch hares, 1s 3d to 1s 6d; wild ducks, 1s 3d; pintail, 1s; teal, 6d; snipe, 4d to 9d; woodcock, 1s 9d to 2s 3d each.

MANURES.

Liverpool. Friday. There is some inquiry at this early date for basic slag for autumn delivery, and subscribed are the quotations at the depots indicated. Feeding stuffs are a very firm market, and are in fair demand for the time of the year. Prices quoted are attracting the attention of dealers, and it is anticipated that an increased consumptive demand will be experienced this coming autumn. Prices as detailed below. Fattening cake, prime, English, in bags, £9 5s; feeding cake, prime, English, in bags, £9 2s 6d; linseed cake, prime, English, in bags, £9 2s 6d; soda, best quality, i.e., guaranteed 35 per cent pure, in bags, £10 5s to £10 10s. Egg meal, prime, in bags, £5 7s 6d to £5 10s; kainit prime, 25 per cent sulphate of potash, in bags, £2 2s 6d to £2 5s; palm nut meal, prime, in bags, £6 15s to £6 —. linseed cake, Anglo-Plate, prime, in bags, £7 10s to £7 12s 6d; linseed cake, English, prime, in bulk, £8 7s 6d to £8 12s 6d; linseed cake, foreign, prime, in bulk, £8 2s 6d to £8 5s; cotton seed cake, N.A., decorticated, prime, in bags, £6 17s 6d to £7 1s 3d; cotton seed cake, N.A., undecorticated, prime, in bags, £6 5s to £6 7s 6d; cotton seed cake, undecorticated, prime, in bulk, £4 10s to £4 17s 6d; ditto, ditto, crushed, prime, in bags, £5 2s 6d per ton; rape cake, prime, in bags, £5 15s to £6 —; earth nuts, prime, in bags, £8 10s per ton; maize germ meal, prime, in bags, £6 10s to £6 15s; maize meal, prime, in bags, £5 15s per ton; locust beans, prime, in bags, £5 5s per ton; linseed, Baltic, prime, in bags, £5 5s per quarter; linseed, Calcutta, prime, in bags, £5 5s per quarter; linseed, Black Sea, prime, in bags, £5 5s per quarter; linseed, Egyptian, prime, in bags, £5 5s per quarter; linseed, Bombay, prime, in bags, £5 5s per quarter; linseed, Persian, prime, in bags, £5 5s per quarter; linseed, Indian, prime, in bags, £5 5s per quarter; linseed, Australian, prime, in bags, £5 5s per quarter; linseed, Chilian, prime, in bags, £5 5s per quarter; linseed, Californian, prime, in bags, £5 5s per quarter; linseed, Canadian, prime, in bags, £5 5s per quarter; linseed, Egyptian, prime, in bags, £5 5s per quarter; linseed, Russian, prime, in bags, £5 5s per quarter; linseed, Spanish, prime, in bags, £5 5s per quarter; linseed, Turkish, prime, in bags, £5 5s per quarter; linseed, Roumanian

The Utility Poultry Club's Twelve-Month Laying Competition.

SIR,—I regret to report that the committee of the club have decided to abandon the proposal to hold a twelve month laying competition in October next.

In response to the appeal for donations of £50 to meet the estimated deficit on the competition, and for a guarantee fund of £50 as a safeguard should the deficit be exceeded, only £6 17s. 6d. has been received in donations, and less than £21 guaranteed. The offers of prizes and specials to supplement those given by the club have also been most disappointing.

With so little support from the general public there was no guarantee that the entries would have filled, so that there was the possibility of having to abandon the competition when the houses had been made and a considerable expense incurred.

Under these circumstances I think the committee have taken the only course open to them, and they must wait until the public interest takes a more practical form.

At the annual meeting of the club in October a proposal for holding a competition next year will be discussed, and an opinion may then be obtained as to extent of financial assistance the club should give. For my part I was extremely adverse to incurring a liability that might have depleted the club funds by perhaps £100, without obtaining some expression of opinion from the members of the club. The committee would, I think, have voted a considerable sum towards the expenses had the donations and promises to the guarantee been greater, but they were not justified, in view of the very limited funds at the club's disposal, in dispensing with the full amount of the guarantee.

Some comment has been made with reference to the excess of estimated expenditure over receipts even with so large an entry fee as £2; but it should be observed that all the houses would have to be made for the competition; a man would have to be specially engaged to manage and feed the birds; prizes, printing, and advertising would absorb about £60; and clerical expenses and postages another £30. The competition could not, therefore, be any criterion as to the amount of profit, or otherwise, that might be derived from utility poultry-keeping. It was, however, intended to keep an exact record of the cost of the food, as also of the amount received for the eggs, and these figures would have been of great interest.

Nobody regrets more than myself that the hard work so ungrudgingly undertaken by Mr. Dunkley should have so far resulted in nothing tangible. I think though that his work has not been wasted, as the information, etc., he has obtained will be of great assistance should the necessary financial support be forthcoming to hold a competition on another occasion.—I am, Sir, your obedient servant,

B. W. HORNE, hon. treasurer.

August 24, 1905.

Hants: Light Crops.

SIR,—Wheat crops very good, better than last year, but barley and oats are both light crops; whilst the hay crop is not so good as last year, and roots not very good. H. H.

August 25, 1905.

Devonshire: Not an Average Season.

SIR,—The season of 1905 has not been an average one, owing, no doubt, to the dry spring and early summer. The hay is not more than half a crop. Corn crop is very light in burden, but I should think the yield will be fairly good, especially wheat. Oats average. Barley not up to the average. Roots very uneven.

Beef selling at a fair price, but store cattle very low indeed, owing, no doubt, to the dryness of the season, grass being very scarce. Mutton sells very well indeed, and wool dearer than we have had it for some years. Prospects for the winter not over bright owing to the scarcity of keep. J. Y.

August 25, 1905.

NORTHERN NOTES.

In the north the gathering in of the grain crops is the great business of the hour. South of the Humber the harvest is practically completed, but north of that river the great bulk of the sheaves is still in the fields. The wheat and barley crops have cut up well quite up to expectations—but oats are even worse than was expected. The weather has been all against the samples of barley, some of which are badly "rated."

It is part of the "irony of fate" that the heaviest rainfall is now experienced in those particular districts of the north, where the drought was most severe and prolonged. There, no rain fell from the end of May until the corn harvest was just about to begin, the root crops being irretrievably injured; but now, while the carting of grain should be in full swing—the rain, it raineth every day.

The Lincoln ram sales are now fast drawing to a close, and the season has been most successful. Of course, this is primarily due to the South American demand, which came into active operation just before the Royal Show, and still continues. Not only have the foreigners purchased strongly at the auction sales, but they have gone to the farms of the breeders and bought very extensively by private treaty. The number of rams purchased this season for South America is extremely large, and Lincoln ram breeders have good reason to be satisfied with the results attained, and especially those who sold their wool just before the demand for it closed.

That demand ceased most abruptly, indeed, as some termed it, the trade closed up like a book, and has remained sealed up ever since. The grower can only sell at a reduction of over 1s. a stone, but the few growers who still hold their wool are not needy sellers, and they are certain to hold. The manufacturers will not buy of the growers, and they are trying hard to buy on reduced terms of the factors; but the bulk of this season's northern clip is in the hands of a very few factors, who will not concede any reduction at present, and there is little doubt that the trade will revive during the autumn. The final issue of the peace negotiations—perhaps made known by the time these lines are in print—will have a direct effect on the wool trade.

In the Journal of the Board of Agriculture for August there is a short article on "Soil Inoculation," which is well worth studying, for it sets out in terms a report issued by the United States Department of Agriculture briefly summarising the circumstances under which (1) Inoculation is necessary; (2) When inoculation may prove advantageous; (3) When inoculation is unnecessary; (4) When failure may be expected. This report puts a very different complexion on the the use of these bacteria-cultures, and might be advantageously studied by those who boomed soil inoculation so strongly last winter. It is stated in the Journal that experiments are being made at the agricultural experimental stations in this country, and that the preliminary reports thus far received are not encouraging. Similar reports are to hand concerning several private experiments, but in these particular instances, the character of the season was so untoward that a favourable result could scarcely be hoped for, and therefore neither success nor failure can be really indicated. The article in the Journal of the Board of Agriculture is, however, to be commended to the notice of all interested in the matter. There is reason to believe that numerous official experiments in soil inoculation have been carried out in Ireland, and as the climatic differences are well marked, it may be that the results attained in the Sister Isle may be more hopeful than here.

The opening prices obtainable for grain are not encouraging—a week ago samples of good dry new oats did not fetch more than 16s. 6d. in East Yorkshire, and samples at all thin, or on the soft side, were difficult to move at 16s. In the north there is as yet little or no demand for barley, and the few samples exhibited afford no test of cihter prices or of quality.

Irish Crops and Live Stock.

The Secretary of the Department of Agriculture and Technical Instruction for Ireland has issued its annual general abstract of agricultural statistics, which give, by counties and provinces, the acreage under crops and the number and description of live stock in Ireland in 1905. The materials necessary for the compilation of these statistics were obtained by members of the Royal Irish Constabulary and Metropolitan Police, who, it is stated, discharged this important duty with zeal and efficiency. It is pointed out that abstracts have been carefully compiled from summaries made by the enumerators, but may in some slight degree differ from the revised figures which will be subsequently published.

The total area under crops in 1905 is 2,361,696 acres being, as compared with the area in 1904, a decrease of 12,269 acres, or 0.5 per cent. There was an increase in the area under crops in Ulster of 3,878 acres, or 0.4 per cent.; a decrease in Leinster of 8,192 acres, or 1.3 per cent.; in Connaught of 4,149 acres, or 1.4 per cent.; and in Munster of 3,806 acres, or 0.7 per cent.

In 1904 the area returned under hay was was 2,260,160 acres; in 1905 the amount returned is 2,294,574 acres, being an increase of 34,414 acres, or 1.5 per cent.

In 1904 the area returned under grass was 10,586,639 acres; in 1905 the amount returned is 10,597,848 acres, being an increase of 11,209 acres; the area returned as fallow in 1904 was 9,360 acres, and in 1905, 8,903 acres; the area under woods and plantations was 303,118 acres in 1904, and 301,430 acres in 1905; and the area returned under "Turf Bog, Marsh, Barren Mountain Land, etc.," was 4,817,483 acres in 1904, and 4,786,274 acres in 1905, being a decrease of 31,209 acres; of the area thus returned in 1905, 1,081,421 acres have been entered by the enumerators as turf bog, 392,651 acres as marsh, and 2,274,238 acres as barren mountain land.

TOTAL AREA UNDER CROPS.

Compared with 1904 there appears an increase of 7,214 acres in the area under wheat; of 139 acres under bere; of 738 acres under rye; and of 68 acres under pease; while there was a decrease of 12,180 acres under oats; of 3,600 acres under barley; and of 418 under beans; showing a net decrease of 8,039 acres in the area under cereal crops.

The area under potatoes has decreased by 1,917 acres; that under turnips by 3,614 acres; mangel wurzel by 3,129 acres; carrots by 360 acres; vetches by 174 acres; and rape by 482 acres; beet root increased by 48 acres; parsnips by 11 acres; cabbage by 3,014 acres, and other green crops by 513 acres, leaving a net decrease of 6,090 acres in the area under green crops.

The area under flax in 1904 was 44,293 acres; the area returned under this crop in 1905 is 46,153 acres, being an increase of 1,860 acres, or 4.2 per cent.

In the returns the area under meadow and clover is shown as the area "For Hay only," subdivided under the headings "Clover, sainfoin, and grasses under rotation" and "Permanent pasture, or grass not broken up in rotation." The area for hay under "Clover, etc.," in 1904, was 631,748 acres: this year it is 628,618 acres, being a decrease of 3,130 acres. The area for hay on permanent pasture in 1904 was 1,628,412 acres, and in 1905 it is 1,665,956 acres, showing an increase of 37,544 acres. There is, therefore, a net increase of 34,414 acres in the total area under meadow and clover.

RETURNS OF LIVE STOCK.

It appears from the following table that between 1904 and 1905 there has been an increase of 4,062 in the number of horses, and in asses of 451. Cattle exhibit a decrease of 31,496, sheep of 78,606, and pigs of 150,804. Of the 18,548,877 poultry enumerated in 1905, 1,018,599 were turkeys, 1,714,365 were geese, 2,939.105 were ducks, and 12,876,808 were ordinary fowl. The table shows the number of live stock in each year from 1900 to 1905, inclusive:—

Yrs	Horses.	Mules.	Asses.	Cattle.	Sheep	Pigs.
1900	566,978	30,678	242,247	4,608,550	4,386,876	1,268,521
1901	564,916	28,882	238,980	4,673,323	4,378,750	1,219,135
1902	579,765	29,397	242,862	4,782,221	4,215,8 5	1,377,510
1903	595,746	29,795	243,241	4,664,112	3,941,604	1,383,516
1904	604,930	29,931	244,115	4,676,718	3,827,919	1,315,126
1905	608,992	29,984	244,596	4,645,222	3,749,313	1,164,322
Difference in Numbers between 1904 and 1905.						
	Increase	Decrease	Increase		Decrease	
	4,062	247	451	31,496	78,606	150,804

ADVERTISEMENTS RECEIVED TOO LATE FOR CLASSIFICATION.

MORETON-IN-MARSH SHIRE HORSE SHOW.
OCTOBER 3rd, 1905.
Entries close September 21st.
A. N. DRURY, Secretary,
High Street, Moreton-in-Marsh.

MARKET RASEN FOAL SHOW.
OCTOBER 9th, 1905.
T. E. SMITH, M.R.C.V.S., Secretary,
Market Rasen, Lincs.

GRANSDEN AND DISTRICT.
AT GREAT GRANSDEN.
SEPTEMBER 26th, 1905.
Entries close September 12th.
R. J. KISBY, Secretary,
Great Gransden, Sandy, Bedfordshire.

200,000 FIDLER'S ECLIPSE Cabbage Plants, 3s. 1,000.
W. HORNE & SONS, Cliffe, nr. Rochester, Kent.

OXFORD DOWNS.
The Kelmscott Flock, the property of Robert W. Hobbs, Kelmscott, Lechlade.
SHEARLING RAMS or RAM LAMBS from this Flock will be SOLD by AUCTION at the under-mentioned Fairs:
CIRENCESTER Sept. 30th.
BURY ST. EDMUNDS ,, 6th.
EDINBURGH ... ,, 7th.
KELSO ... ,, 8th.
NORTHAMPTON ... ,, 19th.
Ram Lambs from this flock obtained 1st and 4th Prizes at Park Royal this season.

MESSRS. BELCHER, ADKIN & BELCHER will SELL by AUCTION at the Manor Farm, Wantage, on FRIDAY, SEPTEMBER 8th, 1905, 13 Pedigree Shire Mares and Colts and the Stallion Rampton Conqueror 19041. The Mares were purchased by Mr. Croker at the Lockinge Sale, 1903, and the Colts are their produce. Rampton Conqueror 19041 was purchased at the S.H.S., London, the same year, and has been a most successful Sire.
Catalogues may be had of the Auctioneers, Wantage, Berks.

Live Stock Record.

SHELTER FOR STOCK.

The great heat and scorching suns of July were very harassing to cattle in low-lying pastures, and although August days have proved more changeable, many of them were of a character to make sheep, as well as dairy cows, and grazing beasts, run wildly to any shade rendered by trees or fences. The persecution of bovine stock by flies is a terrific torment in such weather, and it is to be feared the recommendations of the late Miss Ormerod to lessen the nuisance have not been sufficiently followed by the bulk of farmers to have had the good practical results anticipated at one time. The remarks of old Arthur Young on this evil are only too truthful. He wrote in his Calendar:—"Everyone knows how tormenting flies are to cattle when abroad. Ride into a field in summer, to look at stock, and where do you find them? Not feeding, but standing or resting under trees, in ponds, in rivers, and, if there is no better shelter, in ditches, under brambles; in a word, anywhere but feeding in the open. When they graze is in the morning and evening, and in many cases they lose in the heat of the day all they gain at those moments of their comfort." Certainly owners of dairy cows are grievously disappointed in the milk-yieldings of these animals, after suffering such vicissitudes. Nor can graziers expect fattening beasts to put on flesh rapidly when such privations are endured.

Arthur Young was a great advocate of the soiling system, and thoroughly believed that it was destined in time to become the general one. But two circumstances have prevented many modern farmers from adopting it. Labour scarcity and heavy costs have operated in causing all courses of management requiring an excess of it to be abandoned. Soiling is certainly one of them; hence, except for working horses and show animals, there is very little of it. But apart from this, so much arable has been laid down to grass, that a large number of stock farms have not enough left even to grow sufficient roots for their animals in winter. But if the homestead, or any yards or cattle-steading should be at all near, it would be worth while removing the animals to them towards noontide for two or three hours in hot weather, even if there was nothing to give them to eat except hay or straw fodder.

Many owners, even of pedigree herds, prefer that their young cattle should not only run in the open, but have as much exposure to the elements as possible, under the belief that this makes them hardy and that their hair grows more profusely in consequence. Some regard must, however, be had to climate and situation in enforcing such a severe ordeal; and the teachings of animal physiology would seem to indicate that it would be always better if there were some refuge in the cattle-run to which the animals might resort at will, when terrific storms come, or the elements are very trying. In the Highlands, the lairds and farmers raise pine plantations in exposed situations for stock shelter, and even in the comparatively mild West of England, it was customary a century ago to provide open thatched hovels, termed "linheys," in the pasture fields, that their young cattle inhabiting them in winter might have a refuge from fierce blasts or heavy rain. Thus it appears evident practical experience has been very far from being universally in favour of thorough winter exposure of young cattle, and carried to extreme the practice would be injurious, if not barbarous.

STOCK AND SHOW NOTES.

By Herdsman.

The catalogue of the Birmingham Autumnal Shorthorn Show and Sale to be held Sept. 7, comprises 124 cows and heifers, many having calves at foot or shortly due to calve; and 153 bulls, principally twelve to eighteen months old. A number of prize-winners at the principal county and other important shows are entered, and the following noted herds are represented: The Earl of Camperdown, the Earl of Harrowby, Earl Manvers, the Earl of Northbrook, Earl Powis, the Earl of Sefton, Lord Calthorpe, Lord Penrhyn, Lord Wrottesley, Mrs. Holland, Messrs. Arkell, J. W. Barnes, J. Colman, R. P. Cooper, S. Dennis, Denny, Dyke, G. Freeman, W. T. Garne, G. Gerrard, Green, C. E. Morris, D. H. Mytton, W. Parkin-Moore, J. A. Preece, Leopold de Rothschild, and W. H. Tremaine. The pedigree of every animal is guaranteed correct by the exhibitor. Many of the cattle are for unreserved sale, and in no case is a higher reserve than 20 gs. allowed, so that the sale affords an excellent opportunity of securing at reasonable prices valuable pedigree stock. Catalogues (7d. each by post) may now be obtained from the secretary, Mr. W. H. Lythall, Bingley Hall, Birmingham.

A large consignment of pigs from the well-known Colston Bassett and Borrowfield herds, consisting of thirty gelts, representing the various strains, and three boars, specially selected, was shipped last week from the London Docks by Mr. Oswald Pick for the Government of Hungary-Austria. Also two fine boars and one gelt to the order of Mr. T. O. Bennett, Gateley Hall, East Dereham, for shipment to Germany; this being the second consignment during the current year.

Messrs. Macdonald, Fraser, and Co., Ltd., announce yet another Aberdeen-Angus sale in September, in addition to those given in last week's notes, namely, on September 20, when they will bring under the hammer, at Selaby, Gainford, Darlington, the herd of pure-bred animals belonging to Mr. C. E. Hunter, and also a few from Mr. F. Fenwick's Aberdeen-Angus herd. Mr. Hunter's small but select herd—which has now to be dispersed owing to a change of tenancy—was established about ten years ago, the foundation being a few well-bred animals purchased from the Ballindalloch herd, of which Evidence (included in this sale) was one, and few opportunities arise for acquiring at once so many highly-bred Trojan-Ericas as will be offered at this sale. The successes of the herd in the show ring—including several prizes at this year's shows of the Royal and Highland Societies—are evidence of the high quality of the stock.

After an interval of five years, the Warwickshire Agricultural Society's show will this week once more be held at Coventry, opening on Wednesday and extending over Thursday. The city, which will be specially decorated by the Corporation and local committee for the occasion, will give a cordial welcome to the Society, and has provided a handsome contribution to the prize list. The site of about 23 acres is at Stoke Green, where the show was held on the last visit to Coventry, and is admirably suited for the purpose, being convenient of access for visitors, a frequent service of electric tram cars running from the Coventry railway station to show ground.

The entries for the above show are good, those of live stock being 564, against 540 at the last Coventry show and 603 at Leamington in 1904, whilst the entries in the implement department (which will, occupy a frontage of 2,430 ft.) are in excess of all previous shows. For the interesting field competitions, which take place at Stoke, near the show ground, on the second day of show, there are more competitors than last year, and the other sections of the show are well filled. There will be special jumping contests each afternoon, with driving classes also on Thursday, and in addition poultry and bee-driving demonstrations by the Warwickshire County Council's experts. The railway companies are giving facilities for conveyance of visitors at cheap fares with excursions on second day, and if the weather be propitious a successful meeting may be anticipated.

In the second week of September Messrs. J. Thornton and Co. will conduct a couple of Shorthorn sales in Wales, viz., on Tuesday, the 12th, at Penyfai, Llanelly, they will dispose of the entire herd of Shorthorns and flock of Shropshire sheep belonging to the late Mr. W. J. Buckley, and selections from the Shorthorn herds of Sir A. Stepney, Bart., Tynywern, Llanelly, and Mr. H. C. Lewis, Hean Castle, Saundersfoot, Pembrokeshire; whilst on the following day, at Manoravon, Llandilo (in Carmarthenshire), they will bring under the hammer a choice selection of Mr. E. Jones's Shorthorns.

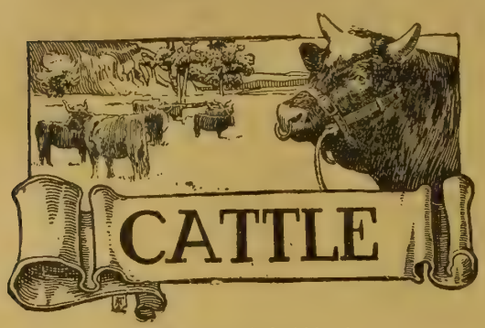
Messrs. Alfred Mansell and Co., of Shrewsbury, recently shipped per ss. "Lakonia," of the Donaldson Line, from Glasgow to Quebec, three Shorthorn heifers, each with bull calves, and an extra grand Shorthorn bull, the whole being of the very best Scotch blood and type. The heifers were also in calf to well-known sires. Accompanying the cattle were five Shropshire show ewes, specially selected from the flock of Mr. J. H. N. Walford, and a fine Southdown ram lamb bred by Mr. C. W. Adeane, of Babraham. These animals were all shipped on account of Mr. Robert Miller, to whom Messrs. Mansell had previously sent a good consignment earlier in the season.

An important sale of pedigree Hackneys and ponies has been fixed for Friday, September 8, for on this day Mr. W. Bainbridge will bring under the hammer some of Sir Gilbert Greenall's well-known animals, at Walton Hall, near Warrington. Special interest attaches to the sale from the fact that, with two exceptions, the whole of the Hackney and pony yearling colts are to be sold. The extraordinary prices which in past sales have been realised for the geldings by Goldfinder VI., Lord Drewton II., Sir Horace, and other sires of this stud, should ensure keen competition for these young horses, amongst which will be found many excellent young sires and show horses of great merit. The mares, foals, and young fillies will be found an exceedingly good lot, of the best breeding, with size, quality, and action; and the eleven three-year-old geldings are perhaps one of the best lots of unbroken horses of the age seen together.

The annual report of the Royal Richmond Horse Show, Limited, shows that the profit arising from this year's show amounts to £144 1s. 7d.

Mr. Ranucci, Rome, last week visited the Seaham Harbour Stud and purchased seventeen stallions and colts for exportation to Italy. The animals chosen are by such well-

known sires as Silvercup, Airies Prince, Lord Stewart, Marcellus, Marmion, Montrave, Ronald, and Carthusian. All are big-sized sound horses, well adapted for mating with the native Italian mares with the view of improving the breed. Thirteen of them are two-year-olds, the others between three and five years, and include the well-known prize horses, Crathorne and Chamberlain. Altogether the selection is one which does Mr. Ranucci much credit, and it is to be hoped they will reach their destination in safety.



Notes and Jottings.

The generally showery weather that has prevailed since the second week of the month has had the effect of refreshing pastures very much, though it is scarcely likely, except on the very best land, and where lightly stocked, that grass will become at all abundant over the greater part of England. From reports, too, Ireland appears to be somewhat in the same condition. Root crops of all kinds, however, are improving amazingly, and with a mild autumn may yet make bulky crops; straw, too, is bulky enough, especially wheat straw, so that we may hope, with these prospects and a fair stock of old hay in the hands of many farmers, the winter will not be so severely hard to face, though it may be bad enough. A little help early is a grand thing for all classes of cattle except those that are intended to remain in the fields all winter as scavengers.

At the Tring show which was held during Bank Holiday week, the milk and butter tests were a very important feature of the proceedings, and the results reveal some most extraordinary yields and quality. The records in many cases at Park Royal were somewhat, to say the least of it, unsatisfactory, so great a number of the competitors not qualifying for the prizes either from lack of butter fats or from lack in quantity; but more generally the former. This was in a great measure attributed to the weather, milk generally not being so rich during the excessively dry, hot weather. If this is the case, it is rather against some other theories, as, for instance, in the winter it is generally supposed that the warmer cows are kept the greater the yield of milk and butter obtained.

The cows that have been competing in these recent milking trials and butter tests, it is needless to say, have not been allowed to suffer in the least either on account of want of the greatest milk and butter producing foods that can be brought to bear upon the subject, or from any discomforts on account of the heat; everything has been done in these respects that could possibly be suggested as conducive to milk and butter. There must be, therefore, other circumstances affecting the trials that have caused such incomprehensible results as the Tring records give. For instance, a Kerry cow is recorded as having given milk so poor as to require 58.33 pounds of it to yield one pound of butter. Such a record is altogether incredible with that breed, and cannot be looked upon as being normal.

Then, coming to the cows over 900 lb. live weight, a cross-bred cow requires over 45 lb. of milk to a pound of butter, another 32 lb., and yet another 45 lb.; others 44, 45, 45, 58 lb. (the two latter Shorthorns). Other Shorthorns take 35.74, 37.12, and 47.48 lb. respectively. All these quantities are so poor that they would scarcely keep a calf alive, and unless there was some error, it is very hard to understand how these poverty stricken milks could exist. It is well known that a few degrees difference in the temperature of churning this perfectly fresh cream makes all the difference to the yield of butter, and it is to be hoped that some such error was the cause of these low records. We can only trust that the poverty is not due to the cattle or their feeding.

One of the most remarkable cases in these tests was that of Captain Smith Neil's cow Doctor, a cross-bred of unknown breeding, that is now 24 years old, and produced 64.12 lb. of milk which yielded 2 lb. 3½ oz. butter, giving a ratio of 29.18 lb. of milk to a pound of butter. This is much poorer than the general average of cross-breds, and may be accounted for on the score of age. Doctor gives the impression of having either Ayrshire or Guernsey blood included in her cross-breeding. When we look at the fact that Shorthorns under ordinary conditions do not require more than 27 lb. of milk to make a pound of butter on the average, Red Polls not more than 22 or 23 lb., and Jerseys usually about 16 lb., Ayrshires also 22 lb., it is the more difficult to surmise how such wretched results came about.

The tuberculin test is still a very unsatisfactory quantity. Far too many animals fail to pass it, and others that have passed upon one occasion fail to do so upon a second trial within a very short time of the sound result. It is to be feared that in too many instances when animals fail to pass, the cause lies with the disease having commenced, and is not due to any want of care in the way the test is conducted. There is one thing which always ought to be observed in taking these tests, namely, that the animal shall be tested when it is quite in a normal state in its own pen or shed, and not during times when unduly excited from being driven about, or worried and upset by the presence of other cattle.

Where several animals in the same herd fail to pass the matter is a very serious one for their owner, and it well behoves him to take every care that the test is carried out as above stated, while, and only while, the animals are in perfectly normal condition. Far better not test at all than test under excitable conditions. In the latter case, where an animal or animals fail to pass, very great loss might ensue; but, in the case of an animal or animals not passing when the test is carefully carried out under normal conditions, it is much better not to go on breeding from them. A tuberculous animal is most likely, experience has proved, to leave the same disease in its offspring or progeny.

North Devon breeders, in discussion the other day, were very loud in praise of these juicy red plums. One speaker urged upon his brother breeders the importance of pushing the breed more in South America. The size, symmetry, and quality of the North Devon we have before now pointed out is very much in its favour as a beast for the dead meat shipping trade, whilst for a country like South America the utter indifference this breed displays to the torment of flies is very much in its favour. The ease with which they fatten, too, upon any fair pasture, and their activity when long distances have to be travelled for food or water, are all much in their favour. It is a beautiful, useful, and profitable breed.

It was satisfactory to read the other day the report of a sale of Sussex cattle. Prices were not high, though 30 gs. and over were reached in two or three instances. Still, demand appeared to be good, and this is a great matter. Prices are often affected by circumstances outside the breed altogether, such as age, condition, etc. Some first-rate animals may be doubtful breeders, or there may be a surplus of bull calves, or the animals may hit upon a evil day as regards keeping. Many things tend to a bad average or lower average than might have been anticipated, but so long as the demand is good, a fair number of buyers ready, and the animals in a suitable state for their requirements, then matters may be called quite satisfactory.

A very important article appears in the "Breeders' Gazette" (Chicago), commenting upon the price of so-called "baby-beef," as compared with older cattle, two and three year olds. The quotation appears to give an impression that this baby beef is being sold at 50c. under prices paid for two and three year olds of no better finish. Some reasons assigned for this are that the baby beef (yearlings) are not brought to market in a sufficiently ripe condition—not properly finished; in this case it is highly probable that the dead weight and live weight would stand in very different relations to each other. Experience has proved to the writer that a very young beast, unless thoroughly finished, dresses very much lighter than could be anticipated. There is also no doubt that butchers' perquisites are more substantial from older cattle.

Possibly there may be other reasons that are not spoken of in the markets as yet. The other day my own butcher, who slaughters the best cattle he can obtain, informed me that one of his best customers had written wishing him to call; upon his doing so, he received great complaints as to the eating or quality of both beef and mutton supplied. This client, who had been accustomed to aged Scotch wethers and choice aged bullocks, slaughtered in the establishment, said, "We think the beef and mutton you kill is too young; it has not the flavour of our own fed wethers and bullocks." There may be something in this. Indeed, I believe it is generally acknowledged by all gourmands that two-year-old wether sheep are the ripest and richest mutton. May not the same obtain in cattle?

THE TENS OF THOUSANDS of users of MOLASSINE MEAL should see that their stock have a portion in every feed all the year round, not simply as a condiment when an animal is out of condition, or occasionally as a fillip. MOLASSINE MEAL is the most valuable and economical food, displacing all condiments, and should be given in place of the same weight of oats, beans, grain, cake, or other feeding stuffs. Sold by all corn merchants and the MOLASSINE CO., Ltd., 36, Mark Lane, London, E.C. —[ADVT.]

Transactions in Store Stock.

(Reported to the Department of Agriculture and Technical Instruction for Ireland.)

At the fair at Loughrea, Co. Galway, on Monday there was an average supply of cattle, chiefly second class, but a poor attendance of buyers, and demands slow, fully three-fourths of the cattle offered failing to find purchasers. Sheep were in larger supply than usual, and for lambs there was a moderate demand, but good for ewes suitable for breeding purposes, and almost all were sold. Prices:—Yearlings, second class, £5 15s.; two-year-olds, second class, £8 2s. 6d. to £9; three-year-olds, second class, £10 2s. 6d. to £12 10s.; springers, second class, £12 5s. to £14 10s.; third class, £9 10s. Lambs, first class, £1 7s. 6d. to £1 10s. 6d.; second class, £1 2s. to £1 6s.; third class 17s. to £1; two-year-olds and upwards, first class, £2 3s. 3d. to £2 6s. 6d.; second class, £1 18s. 6d. to £2 2s. 6d.; third class, £1 11s.

Carndonagh fair (Co. Donegal), held on Monday, was a small one, at which demand was slow for cattle but good for sheep. Prices:—Yearlings, second class, £5 5s. to £6 7s. 6d.; third class £2 12s. 6d. to £3; two-year-olds, second class, £7 15s. to £8 16s. 3d.; third class, £5 to £6; three-year-olds, third class, £7 10s., springers, second class, £11 15s. to £13 5s.; third class class, £8 15s.; lambs, second class, £1 2s. to £1 3s.; third class, 8s. to 12s.; over twelve and under twenty-four months old, second class, £1 10s.; third class, 15s. to £1 3s.; two-year-olds and upwards, third class, 18s. to £1 4s.

Contagious Diseases of Animals.

Summary of Returns issued by the Board of Agriculture for the week ending Aug. 19, 1905:

Swine Fever.	Swine Slaughtered as Diseased or Exposed to Infection	No.	42	21 163 161	2,014	4,445 5,300 5,339

Period.			Week ended Aug. 19, 1905	Corresponding week in { 1904 1903 1902	Total for 33 weeks in 1905	Corresponding period in { 1904 1903 1902

NOTE.—The figures for the current year are approximate only.

Recent statistics show that nearly half the population of France, or, to be exact, 47 per cent., get their living from agriculture.

Horse Notes.

"He doth nothing but talk of his horse."
—Merchant of Venice.

Mr. George Burton, in his speech at the luncheon at Whitby Show, suggested that the Cleveland Bay and Yorkshire Coach Horse Societies should be amalgamated, his argument being that as the Cleveland Bay has grown more like the Coach Horse in type it is useless to have two Stud Books. I think that Mr. Burton's position is scarcely tenable, and that he has for the moment not recognised what a Stud Book is for. Nor is Mr. Burton alone in this particular. I have heard people say that two "books" injured trade. But are Stud Books merely used for the purposes of trade advertisement? That some people so regard them may be true enough, but as a matter of fact, Stud Books are something more than this, and if they are not they are of little value. A record of how horses have been bred which is so clear as to accentuate the leading families should be the standard aimed at by everyone who edits a Stud Book. And to mix up two breeds that have been kept separate for upwards of twenty years in one Stud Book would be injudicious, to say the least.

This by no means implies that the machinery of one society should not be employed for the purpose of looking after the interests of two breeds. Such a course might under certain circumstances be desirable. But under any conditions it is undesirable that the Cleveland Bay should become merged in the Coach Horse. The latter is the result of a cross between the thoroughbred and the Cleveland Bay, and as in most cases of breeds raised in this way, there comes a time when the parent breed has to be resorted to for that substance and size which is essential.

I am afraid that there are many owners of Cleveland Bays who fail to recognise the importance of Stud Book registration, for there are many very good mares which ought certainly to be registered and which are not. Some few years ago a rule was passed to the effect that no foal should be registered in the Stud Book whose sire and dam were not also registered. This is a sound enough rule when a society has been established a few years and its objects have become known. But in the peculiar circumstances in which the Cleveland Bay breed was situated it is open to question whether it would not have been wiser to have deferred such a rule for a few years. For this is what has occurred. Many men—small breeders—only registered their foals. They looked upon registration as giving a little more value to the foal, and in many cases the dam was not entered in the Stud Book, even though granddam and great-granddam were. When the new rule was passed the fee for registering mares was thought by owners to be too high, and they declined to pay it. As a matter of fact, the fee is reasonable enough, but it is difficult to persuade some men to invest a few shillings, unless they can see their way to immediate profit. The result is that there are numerous unregistered Cleveland Bays in the country, many of which, it is to be feared, will not be put to their best use, which, of course, is the breeding of Cleveland Bays.

What has happened before may, of course, happen again, though it is scarcely likely that there will ever be such a big boom in Cleveland Bays as there was in the early eighties. But it is quite possible that there may be a greatly increased demand for horses of the breed. There is no getting away from the fact that a powerful, clean-legged animal of the Cleveland Bay type is invaluable on a farm, and the time may come when this will be more universally recognised than it is at present. I am afraid if that time does come it will find many Cleveland Bay breeders as little prepared to meet it as they were to meet the boom of the early eighties, and that the same thing will take place as took place then—viz., that many horses will be sold as Cleveland Bays which have but little Cleveland Bay blood in them, and that the trade will consequently be damaged, and the breed get a name that it does not deserve, as was the case twenty years ago.

It is interesting to look back a couple of centuries and see the kind of horse that our ancestors used, and the standard of perfection they set up for themselves; and from the old books on the live stock of the farm and on agriculture, there are lessons to be learnt even now, in spite of many of the curious superstitions which they contain. Here is what Gervase Markham has to say about cart horses:—"If you will chuse a Horse for the Cart or Plough, which is the slow draught, chuse him that is of most ordinary height, for horses in the Cart unequally sorted, never draw at ease, but the tall hang up the low horse. Let them be of good strong portion, big breasted, large bodies, and strong limb'd, by nature rather inclined to crave the whip, than to draw more than is needfull. And for this purpose Mares are most profitable; for besides the effecting of your work, they yearly bring you fresh increase: therefore if you furnish your draught with Mares to breed, observe in any wise to have them fair forehanded, that is good head, neck, breast and shoulders; for the rest it is not so regardfull, onely let her body be large; for the bigger room the Foal hath in the dam's Belly, the fairer are his members. And above all things, observe never to put your draught beasts to the saddle, for that alters their pace, and hurts them in their Labour."

Here is some sound advice, and it may be remarked, by the way, that it is one thing in favour of the Cleveland Bay mare that she can do much of the work of the farm, and breed a light horse of the type which will be wanted some day—perhaps when there will be some difficulty in finding him. The description of the draught horse given by Gervase Markham would almost make one think that the draught horses used in the time of Charles I. and the Commonwealth were something of the Cleveland type. His insistence on the good forehand, head, neck, and shoulders, at any rate, would seem to justify the opinion. The advice given never to put draught horses to saddle would also seem to point out that the horses used in the plough in those days were very different to the Shire or Clydesdale.

The Northumberland Vardy Horse—a breed of which but little is known, but about whose activity many traditions remain—would probably be the type of agricultural horse in some parts of the country as the Cleveland type might prevail in others. We know that some hundred years after Markham's book was published there was, in the East Riding of Yorkshire, a breed of small, active, clean-legged cart horses which Marshall described as "Holderness blacks," and the introduction of which into the North Riding he strongly opposed as tending to spoil the breed of horses which existed there, and which, whilst doing the work of the farm, was also able to do the work of a harness horse or on occasion of a hunter. It seems, therefore, probable that all our original breeds were what are now known as light-legged horses, and that the feather and big bone was an importation from Belgium.

THE LOOKER ON.

Notes and Jottings.

We have before us a circular that has been sent out from the Board of Agriculture to flockmasters, the object in view being, as stated in the circular, "to obtain trustworthy data for the construction of an approximate estimate of the total quantity of wool produced in Great Britain." The object is one that deserves every encouragement. Probably to the official or non-practical mind the queries asked in the circular are considered all that are needful. Practical business men will, however, strongly dissent from this.

The flockmaster is, first of all, asked to give an estimate of the clip for his county. Why should this be chosen as the district? Surely, if each flockmaster had been asked to give the average weight of his own fleeces for (a) breeding ewes, and for (b) from other sheep one year and above, a very much more reliable data upon which to work would have been obtained. The Board of Agriculture have already at their command the number of sheep each flockmaster has, in the annual return they make to the Board, and all that would have been necessary for the well-paid official at the Board to have done would be to multiply the average weight of the fleece by the number of sheep returned.

This, however, is not the most serious blunder noticeable to the practical flockmaster. For no information is asked for in respect to the weight of wool clipped from lambs. Presumably the officials at the Board of Agriculture have no knowledge of this source of wool supply, and hence they do not mention it, or it may be that the official reply is that the quantity is so inconsiderable that it is not worth mentioning.

Forthcoming Live Stock Sales.

DATE.	STOCK.	OWNER.	PLACE OF SALE.
August			
29	Shorthorn Cattle	Col. Munro and Messrs. Lumsden and Mackenzie	Aberfeldy.
29	Horses and Ponies... ...	Mr. J. Jones	Whitegate Stud, Wrexham.

2	Horses	Mr. A. O. Haslewood ..	Fairfield Stud Farm, near Buxton.
4	Shropshire Sheep and Shorthorn Dairy Cows	Mr. J. R. Adderley ...	Manstey Farm, Penkridge.

We have no means at hand to estimate it, but from our own knowledge there are many thousands of lambs shorn every year, and consequently any estimate of the growth of wool that does not include this source of supply would be unreliable. To secure reliable statistics of each and all our agricultural products is an object all would support, but unless these are collected thoroughly and fully, the result, instead of being a benefit, would be otherwise. It is for this reason mainly that attention has been drawn to the subject, because, as the present circular letter is worded, experience shows that the estimates for so large an area as a whole county are practically certain to be very wide of the correct total.

Had the principle of each separate flock been taken, and the number of sheep and lambs clipped, together with the average weight of the fleeces of the three ages been asked for, it is more than probable that an estimate practically identical to the real weight of the clip would have been able to have been arrived at.

The Argentine demand for stud sheep is, indeed, a notable one. It is generally supposed that the Lincolns are the only breed being taken in any numbers to that country. This, however, is not quite the fact at the present time. Last week we reported several important sales of Kent or Romney Marsh sheep for that country. As we go to press information is given of another very good sale of these sheep for the Argentine.

This selection, which numbers twenty-two head, has been made by Mr. Savage from Mr. Charles File's well-known flock at Eltham, Canterbury. These rams are a particularly well-bred lot, and are all of them descended from prize winning strains of blood.

Another important purchase of rams for the Argentine has been made during the past week by Mr. R. Taylor, of Pitlivie, who secured at Mr. T. A. Buttar's sale at Corston, Cupar Angus, no less than seventeen very choice yearling rams.

Another of the typical Shropshire rams was secured for export, namely, one selected from that specially even and well matched pen exhibited by Mr. Buttar at the Royal show. This ram was purchased at the top price of the sale for Mr. M'Ilwraith for export to New Zealand.

The Leicester breed, which is not much heard of in the South of England, has many admirers in both Australia and New Zealand. To the latter Colony Mr. G. Harrison has recently despatched an excellent consignment of thoroughly typical sheep.

The part that the Leicester has played in the breeding up and perfecting the fashionable Lincoln of the present day, and many of the other longwool breeds, was a large one. Many of the fine qualities these breeds have at the present time are unquestionably inherited from the Leicester strain of blood used with so much care in years gone by.

In the Australasian Colonies the value of the Leicester breed is fully recognised, and to those who have given the matter careful thought, it is more than probable in the future that the Argentine will also become a good customer for these sheep.

One reason why the breed is not so widely known at the present time is owing to the want of enterprise on the part of its supporters. If the names of Messrs. Jordan and G. Harrison, and Mrs. Perry-Herrick be omitted, there are practically none others who take any opportunity to bring its merit and quality prominently before the public either in this or in any other country.

Lambs need special care at this season of the year. They ought to be given plenty of change. It is bad management to let them remain any considerable length of time in any particular field or enclosure. If the occupation is such that they have to be grazed on pasture land or orchards, then, by all means, divide it into either three or four pieces, letting the lambs have the run of one for, say, a couple of days, and then go to the next, and so on, round and round as long as the food holds out. The adoption of this simple and easy plan will thus enable the lambs to a large extent always have fresh food.

Another matter that has much to do with keeping lambs healthy and thriving is to always let them have a supply of clean fresh water to run to when they require it, and a lump or so of rock salt. If these are both provided, and always accessible, there is no fear of either being partaken of too freely. It is only when water is not always at hand that bad effects follow its use. Allow free access always, and no animal will then take more than is necessary.

Of course, it will be urged by some, why take the trouble to cart water when lambs do equally well without it? If this were so no one would suggest it should be done; but an experience of many years, coupled with close attention to the results of the management of very many flocks, convinces the writer that in fully ninety cases out of a hundred the best results, and the fewest losses, are found in those flocks whose owners give a regular supply of clean and fresh water and rock salt.

Sheep Fairs and Sales.

Birmingham.

The annual sale of Shropshire sheep at Birmingham took place in Bingley Hall on Thursday, Messrs. Lythall and Walters being the auctioneers. There was a large attendance of buyers, and the sale generally was the most successful for many years, all the sheep being cleared at satisfactory prices. The best prices for rams were 47 gs., 30 gs., 25 gs., 24 gs., 22 gs., 20 gs., 18 gs., etc., and for ewes there was a good demand up to 70s. The principal buyers were the Duke of Sutherland, Earl Cawdor, Lord Lilford, Lord Penrhyn, Lord Willoughby de Broke, Sir T. Boughey, Colonel Sir H. F. Vernon, Colonel Stopford, Captain Levett, Captain Mytton, Hon. E. A. Fitzroy, Miss Rose, Mrs. Macpherson, Messrs. J. R. Adderley, J. P. Arkwright, W. T. Chamberlayne, J. W. Dee, F. J. S. Griffin, A. Hewlett, A. N. Henderson, J. Hollick, T. Jones, C. E. Morris, W. McCreery, S. F. M. Nevett, H. S. O'Brien, S. C. Pilgrim, E. Turnor, J. A. Watson, J. C. Williams. Large numbers were purchased for exportation to South America.

Castle Douglas.

Mr. W. Wallet's third special sale of lambs for the season at Castle Douglas took place on Monday, when about 11,000 were forward, 1,000 less than at the corresponding sale last year. Black-faced wether lambs had precedence in the catalogue. Prices opened at 11s. 9d. for the Miefield (Twynholm) lot; Kinharvie (Lord Herries), 12s. 6d.; Airdrie, Kirkbean, 14s. 3d.; Carnavel, 15s. 3d.; Jarbruck, 14s. 9d.; Glenarm (Earl of Antrim), 14s. 9d.; Sanquhar, 13s. 9d.; Warbrack, 15s. 9d.; Craigengillan, 16s.; Barloe Dalry (tops), 23s.; Barneywater, 11s. 6d.; Glencrosh 13s. 6d.; Glengapp, 13s.; Hensel, 15s. 6d.; black-faced ewe lambs, Glengapp, 11s. 3d.; Holm of Dalquhairn, 14s.; Airdrie, 10s. 9d.; Crae, 9s. 3d.; Castlehill, 14s. 9d.; and Glenarm, 13s.

Colchester.

Messrs. Sexton and Grimwade's 16th annual ram sale at Colchester Cattle Market took place on the 19th inst., the consignments totalling 60 Suffolk ram lambs and shearlings, coming from the registered flocks of Earl Onslow, Mr. J. W. Eagle, Mr. D. Abbott Green, Mr. E. Giles, Mr. Charles Cousins, and Mr. John Fenn. Earl Onslow's consignment of ram lambs realised from 3 to 3½ guineas. The consignment of 25 ram lambs sent by Mr. J. W. Eagle realised from 8¾ guineas downwards; shearlings made 7 to 4¾ guineas. Mr. Abbott's ram lambs made from 6 guineas downwards, and that from Mr. Cousins from 7 guineas downwards; ram lambs consigned by Mr. E. Giles going at lower prices. Black-faced shearling ewes from Mr. Charles Chisnall sold at 51s. per head, and similar ewes from Mr. Charles Clarke at 55s. per head.

Diss.

Messrs. T. W. Gaze and Son held a special sale of sheep at Diss on the 18th inst., the entries comprising 2,000 ewes, lambs, and rams, consisting of 900 black-faced and Suffolk ewes, 660 first-cross and half-bred ewes, 330 black-faced and half-bred lambs, 52 Cotswold rams, 11 black-faced rams, 14 Oxford down rams, and 27 first-cross and Lincoln rams. A large company, including several from a distance, attended the sale, and there was a brisk trade throughout at good prices. The Cotswold rams included 20 from Mr. W. T. Brasnett, Fersfield Hall, and the best price was 10½ gns., others selling from 9½ down to 4½ gns. Ten from Mrs. Dixon, Ridding Norton Hall, made from 7 gns. to 4½ gns.; five from Major Montgomerie, Hall Farm, Garboldisham, ranged from 2 gns. to 40s.; and other consignments from 50s. to 37s. 6d. There was a very keen demand for Oxford down rams, a grand lot of shearlings consigned by Mr. J. P. Case, Binham Abbey, being greatly admired; one sold at 10 gns., another at 9½ gns., two at 9 gns., and four at 8 gns. Four sent by Mr. F. W. Hammond, Thorndon, made from 35s. to 20s., and two from Mr. W. Bowles, Carleton Forehoe, 42s. 6d. and 35s. Black-faced rams included nine shearling rams from the Earl of Albemarle, which sold from 47s. 6d. to 30s.; whilst 20 first-cross rams from Mr. W. T. Brasnett ranged from 8 gns. to 4 gns. Several lots of lambs were offered, the most important being 100 pure-bred Suffolks from the executors of the late Mr. T. W. Gaze, Frenze Hall, 20 earmarked (from Registered Flock 325) made 38s. 6d.; another 20, 38s.; a score more, 34s. 6d.; and 40 eligible for registration, 37s. 6d. The ewes sold at prices ranging up to 64s. 6d.

Glynde.

The fifteenth annual sale of Southdown rams and ram lambs, at Glynde, Sussex, took place yesterday, in a field lent for the occasion by Admiral the Hon. T. S. Brand. The auctioneers were Messrs. Herbert Morris and Son, of Lewes, and Messrs. Drawbridge and Ansell, of Lewes and Haywards Heath. The catalogue comprised 121 rams and ram lambs from the following flockmasters:—The Duke of Devonshire, Mrs. Stephenson Clarke, Messrs. Thomas Bushby, Alan Cooper, Charles Goring, W. P. Hampton, G. S. Harris, A. Heasman, J. Lucas, A. G. Paul, J. Tompkins, and R. A. Warren; while ten shearling ewes, the property of Viscount Gage, were also entered.

The shearling ewes belonging to Lord Gage, and which were bred by Mr. Wm. Scrase, Broad Farm, Hellingly, were first sold, fetching 50s. per head. As to the rams, yearlings from the Duke of Devonshire's Motcombe Farm realised 12 gs., 7½ gs, 7 gs., 5½ gs., 5 gs., and 4 gs., whilst rams of various ages from other flocks realised from 30s. to 11 gs.

Ipswich.

About 6,500 lambs, a number slightly in excess of last year, were penned at the annual lamb fair, held at Ipswich on Tuesday. There was not such a large attendance of buyers as usual, and trade did not appear to be very fast, although a fair amount of business was transacted at late rates. Tups evidently sold somewhat better than they did last year, and at higher prices. Messrs. Robert Bond and Sons had a catalogue of about 1,200 ewes, lambs, and rams, and they experienced a good demand throughout, and considering the prospects for feed, prices were well maintained. Suffolk wether lambs fetched up to 40s. 6d., and ewes 34s. 6d., shearling ewes making up to 57s., two shears to 47s. 6d., and full-mouthed ewes up to 50s. 6d. A good number of Suffolk rams, belonging to Mr. Arthur H. Stanford, Beaumont Hall, went up to 7 gs., while Oxford Down ram lambs, consigned by Mr. John White, Brampton, Oxford, sold up to 8 gs., and pedigree Lincoln shearling rams, bred by Mr. George Hoyles, Skedley Manor, up to 9 gs. Messrs. Spurling and Sons had about their usual number, and for all the best lots of sheep there was a demand quite equal to that which has ruled, but the more ordinary descriptions were somewhat cheaper. On the whole, however, a very good clearance was made at prices similar to those ruling at Messrs. Bond's sale, although for rams the top price here was 10 gs., given for a shearling Southdown.

Lockerbie.

Messrs. Harrison and Sons, Carlisle, held a sale of sheep and lambs at Lockerbie last week. On Wednesday they offered upwards of 14,000 cross and half-bred lambs and 2,000 feeding sheep in the presence of a large company of Scotch, English, and Irish buyers. All classes of lambs made fully last sale's price. Feeding sheep met a very good trade, maintaining the prices of the last sale. The best lambs sold at 27s. to 35s., Mr. Milligan, Merkland, being the purchaser of a top lot from the Rue at the latter figure. Secondary sorts made 15s. to 26s.; feeding sheep, half-breds, 36s. to 48s.; crosses, to 37s.; Cheviots, to 30s.; half-bred gimmers, to 38s.; and black-faced, to 18s. 6d.

On Thursday the consignment numbered 13,500, made up of Cheviot and black-faced wedder lambs. There was a large attendance of buyers from England and the South of Scotland, and trade opened brisk, prices showing a slight advance on those of the first sale a fortnight ago. The top price for Cheviots was 19s. 6d., obtained for a large lot off Wapple Gill, the purchaser being Mr. Hope, Rigg Cottage, Gretna.

FOR exhaustive and helpful information on the growth, cultivation, and uses of fodder crops, read

FODDER CROPS

ONE SHILLING. By Post, 1s. 1½d.

From the Publishers:
"MARK LANE EXPRESS" Office,
1, ESSEX STREET, STRAND, W.C.

The highest figure for black-faced was 15s. 9d., obtained for a lot consigned by Mr. Dalgleish, Ettrick. The best Cheviot wedder lambs sold from 15s. to 19s. 6d., smaller lambs making 11s. to 14s., black-faced ditto 8s. to 15s. 9d.

On the third and concluding day upwards of 7,250 Cheviot and 750 blackfaced ewe lambs were exposed. The attendance of English and South of Scotland buyers was again large, and a satisfactory trade prevailed, a total clearance of Cheviots being made, the top price for which was 23s. 6d., given by Mr. Gordon, Berwickshire, for Mr. Annandale's consignment off Hopsrigg. Another strong lot from Westwater sold at 23s. to Mr. Hamilton, Roxburgh. Mr. Borthwick, Billholm, also received that price for a small lot, while a superior lot from Rennalburn made 22s. 6d. Other prices were from 9s. upwards. A fine lot of Suffolk ewe lambs, from Sir Robert Jardine's farm at Castlemilk, sold at 33s. a-piece. The top price for blackfaced ewe lambs was 15s., obtained for nine score from the Dryfehead and Finniegill Pastures. Other lots sold at from 8s. 3d.

Newingreen.

Messrs. W. and B. Holbs held their annual lamb sale at Newingreen, Kent, on the 18th inst., when they disposed of about 7,000 sheep and lambs. Bids came fairly fast, and, the quality being good, prices for the day were fairly high. Mr. Walter Long had a fine run of Kent and half-bred lambs entered, and of these the half-breds made from 25s. to 33s. 6d., and the Kents from 20s. to 33s. The whole 542 sold for £763 7s., or an average of just over 28s. 2d. a head. The Exors. of William Long entered 220 half-breds, which made from 18s. 6d. to 37s. and averaged out at 30s. 2d. a head. Mr. J. Kingsmill's lambs made the best average, these being 400 half-breds, which sold from 26s. to 36s. 6d., and averaged 30s. 11d. a head. There were very few Kents or half-breds either that sold much under 22s. 6d. or 23s., and the usual run of half-breds made from about 26s. 6d. to 33s., the pick going up to 36s. 6d. to 37s. a head. Kents ran from about 24s. to 28s., and the best from 29s. 6d. to 33s. 6d., Mr. T. Denne buying a pen of fifty ewe lambs of Mr. Rolfe's at the latter figure.

Saxmundham.

At Saxmundham Repository on Wednesday Messrs. Flick and Son offered 1,600 flock ewes and lambs—Suffolk, first-cross and half-breds—and a number of well-bred rams, consigned by well-known breeders and graziers in the locality. Captain F. C. W. Wentworth, R.N., sent some first-cross ram lambs, which made 35s. and 32s. 6d. Amongst Mr. H. G. Fairs' consignments was a two-shear Lincoln ram, which fetched 47s. 6d. Sir Thomas V. S. Gooch, of Benacre Hall, sent a number of Southdown rams, which made 57s. 6d., and ram lambs from 40s. Mr. J. E. Cooper, Knodishall Hall, consigned half a dozen Suffolk ram lambs, two making 55s. and 50s. Mr. W. H. Borrett, Leiston Hall, had the same number, which sold freely, two going at £4 apiece. A Suffolk ram lamb belonging to Mr. Alfred Chambers, Middleton, fetched the highest price amongst this class of animal—viz., £5 10s. Two two-shear Oxford Down rams, consigned by Mr. George Rope, Langham Grove, Blaxhall, went at 57s. 6d. and 52s. 6d., and two Oxford Down ram lambs at 70s. and 60s. Registered Suffolk shearling ewes, belonging to Mr. George Mann, Snows Hall, Sibton, made from 60s. A score of nice shearling ewes, entered by Mr. J. R. Grimsey, St. Helena, Dunwich, realised 60s., and twenty black-faced shearling ewes, from Mr. Kenneth M. Clarke's Ferry Farm, Sudbourne, 63s.

Settle.

At Settle Lammas Fair for store sheep and lambs bred during the current year, held on the 19th inst., there was a large show of lambs, despite unfavourable weather. Trade, however, ruled slow and dull, prices being from 1s. to 2s. per head less than at last year's corresponding fair. The white-faced variety were sold at 24s. to 27s. per head for the best, and the inferior lots made 18s. to 23s. a piece. The best class of grey-faced lambs made 19s. to 23s. per animal, the smaller ones fetching 15s. to 18s. each. Scotch lambs commanded 10s. to 14s. per head.

Sir A. Muntz's Shropshires.

On Tuesday, Mr. Alfred Mansell, of Shrewsbury, conducted a sale of pedigree Shropshire sheep from the famous flock belonging to Sir Albert Muntz, Bart., M.P., at Dunsmore, and as was to be expected, there was a large attendance of buyers. Forty-four rams, mainly shearlings, were submitted, and of these all but two changed hands. The highest price was made for the first lot, a ram that has done well in the show-ring. He was bought for Mr. R. P. Cooper, Shenstone Court, Lichfield, at 55 gs. For another, by the same sire (Stronghold), 36 gs. was paid by Mr. R. P. Hughes, from South America, who was a fairly large buyer at the sale, more than a dozen rams being knocked down to him, including a fine specimen, for which he paid 23 gs. Mr. Henderson, of Street Ashton House, bought a pasture ranger for 19 gs., and others sold for 18 gs. (Captain Townshend, Nuneaton, Lord Howe, and Mr. Ivens, Frangton), 17 gs. (Mr. J. H. Stokes, Great Bowden), 15 gs. (Mr. Eaton, Stamford), 13 gs. (Mr. Crawley and Mr. Pearman, Ryton-on-Dunsmore), and 12 gs. (Mr. C. F. Priestley, Anglesey). The rams realised in all £523, the average working out at £12 9s. 5d. each. Shearling ewes were in great demand. Eleven pens were sold, and the prices ranged up to 77s. 6d. each, given by Mr. F. F. Bibby, of Hardwick, Shrewsbury. The average made by the shearling ewes was £3 15s., and by stock ewes £2 16s. The total amount realised by the sale was £736.

Perth Ram Sales and the Sheep Dipping Order.

The following, which has been issued by the Board of Agriculture and Fisheries in connection with the forthcoming ram shows at Perth, will be read with interest by those frequenting these sales:—The Board order that "rams entered for exhibition or sale at either of the shows specified in the schedule to this order shall be exempt from the provisions of the Sheep-Dipping (Scotland) Order of 1905, but such rams shall not be moved out of the dipping area to which such order relates unless accompanied by a license granted by an Inspector of the Local Authority of the district from which they are so moved, which license shall only be granted upon production of a veterinary certificate showing freedom from disease, or a declaration signed by the owner of the sheep or his agent authorised in writing for this purpose, to the effect that the rams have been dipped since the 18th day of June, 1905."

Dublin Wool Sales.

The quantity of wools submitted for competition by Messrs. Ganly and Sons on Thursday showed a considerable reduction in weight when compared with the July catalogue. There was a very good attendance of local and cross-channel buyers (many probably attracted by the horse show), and a more cheerful tone was apparent in the biddings. The better lots of deep wool were sharply competed for, as were also seaside and mountain qualities, which realised rather higher prices than were obtainable last month. Shropshires showed no advance, and for Scotch, both washed and unwashed, the demand was somewhat limited at late rates. The following were the prices realised:—Shropshires, 12¾d. to 13¼d.; fine hoggs, 12⅝d. to 12⅞d.; fine wethers, 12¼d. to 12⅝d.; deep hogs, 12d. to 12½d.; deep wethers, 11¾d. to 12¼d.; seaside, 11d. to 11¾d.; mountain, 9½d. to 10½d.; greasy and cast, 10d. to 11d.; black-faced and Scotch, 6½d. to 8½d.

A Strike at the Central Meat Market.—A strike occurred early on Thursday morning among the carrying porters at the Central Meat Market, Smithfield. About fifty men who serve one of the largest firms in the market were affected. These men have been engaged in "pitching" carcases of frozen and chilled meat, pitching being the trade term for carrying the carcases from the vans to the different stalls. For this work they have been receiving pay at the rate of 11d. per ton of meat carried. Recently the firm decided to split up the work, giving to another gang the job of carrying chilled Argentine meat, and reducing the price to 10d. per ton. As a protest, the original gang struck work. When the day's operations should have begun at one o'clock on Thursday all the men arrived, but declined to carry a single side of meat unless they were compensated for the loss of the chilled meat work by the addition of 1d. a ton to the rate for carrying the frozen meat. The firm on Thursday declined to grant the advance, and work was at a standstill for four hours, till it was agreed to give the extra 1d., and carrying was resumed.

"RATIONAL PIG-KEEPING."

If you wish to learn all about Pig-Keeping, and have the subject analysed and placed before you in simple language, read this book. You can readily obtain all the information you require. *Beautifully Illustrated.*

Arranged in ten sections, each with many sub-sections.

EAST ANGLIAN NOTES.

Changes in the landscape of the country pass quickly now, for the green corn that became so slowly yellow has been removed from its allotted position in the picture, and for a few days only did the golden fields present an untidy appearance by reason of their being littered with barley or dotted all over with stooks of wheat and oats. Throughout East Anglia we notice places have been built in the corner of almost every field, and in many districts where gleaners still follow their calling may have been seen, when the last load of sheaves had been removed, in many cases as long ago as twelve days, the busy scene of industry spoken of in the Book (Lev. xxiii. 22). What does the poet say of this interesting sight?—

> The gleaners spread around, and here and there,
> Spike after spike, their scanty harvest pick
> Be not too narrow, husbandman! but fling
> From the full sheaf, with charitable stealth
> The liberal handful. Think, oh grateful, think.

Such a sight the writer saw in the pretty little Essex village of Ashdon, on the borders of Cambridgeshire, on the 15th inst., when the gleaners started their operations, but a few days later each bare expanse was dotted with small thorn bushes, which are withering where they stand. These had been placed there by the gamekeepers, as in other parts of the Eastern counties, for these gentlemen follow close on the heels of the farmers' men, and plant these thorny branches at intervals over each field in order to prevent poachers from obtaining the first and best of the game by means of nets that they would employ at night to envelop the sleeping coveys.

East Anglia is noted for being the granary of England, and its capital (Norwich) is the largest market for English grain, it is therefore of interest to note the variations in the average prices of home-grown corn that are brought into view in a comparison of the figures furnished by six selected markets out of 190 scheduled corn markets of England and Wales. The average prices are for the month of July, 1905, and are per imperial quarter—that is, per 480 lb. of oats. For per 400 lb. of barley, and per 312 lb. of oats. For wheat the averages are:—London, 32s. 10d.; Salisbury, 32s. 2d.; Norwich, 31s. 10d.; Peterborough, 31s. 5d.; Lincoln, 31s. 4d.; Doncaster, 30s. 10d. The difference between the highest and the lowest of these is 2s. per qr. Only two of the six markets (Lincoln and Norwich) returned July averages for barley, which is 22s. 9d. in each case. All except Lincoln returned average prices for oats—namely, London, 20s. 1d.; Salisbury, 19s. 11d.; Peterborough, 19s. 5d.; Doncaster, 18s. 8d.; Norwich, 18s. 7d. The difference between the highest and lowest in this case is 1s. 6d. per quarter. The average price of wheat for the whole of England and Wales in July was 32s. 1d. per quarter; for the same months in France it was 40s. 10d., or 8s. 9d. more.

So far the early attempts at selling barley have met with poor success, as was only likely, considering the position of the brewing trade and the want of character early threshed barley samples often show, especially when cut by the self-binder. This mistake has been often made this season, whereas with the fine weather that has prevailed the old-fashioned untidy method would have been best, for when cut with a self-binder it is tied as it is cut, so that the outside of the sheaves bleach in the sun, with the result that "two-colours" are obtained in the sample, and this is a condition of sample that maltsters dislike. However, a good sweating on the stack will mellow the corn and give a more even colour to the grain, so that this season especially good sound barleys should not be rushed on the market, although, as a rule, in latter years first threshings have made the most money, as quality later on will materially assist the prices.

A conference took place on Saturday in the Agricultural Hall, Norwich, between a committee of the Norfolk Chamber of Agriculture and a delegation from the Norfolk Valuers' Association on the subject of the valuation of dilapidations and covenants on farmers, and while each speaker in the lively discussion that took place acknowledged that under existing circumstances the matter was surrounded with difficulties, it was decided to study and examine the practical and business-like ideas that had been expressed, and at a future conference take such steps that after mature consideration would put the matter of farm valuations on a sounder and a more just basis.

It was decided at a meeting of the Dunmow Agricultural Association, held on Wednesday last, under the presidency of Mr. J. M. Welch, of Dunmow, to hold the annual Root Show and Ploughing Competitions on Tuesday, October 3.

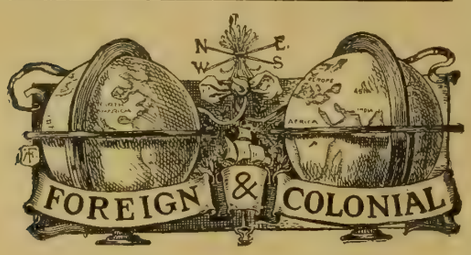
AND THEIR
London Representatives.

NOVA SCOTIA.

Offers advantages to British Agriculturists with moderate capital. Improved Farms at Low Rates. Fertile Lands. Famous Fruits. Enormous mineral deposits of Coal, Gold, Silver, Iron, Copper, Lead and Tin. Climate temperate and healthy. Easily accessible to all the principal markets.—Full information supplied by the Agent-General for Nova Scotia, MR. JOHN HOWARD, 57a, Pall Mall, London, S.W.



The Crops in Germany.

The subjoined report concerning the standing crops of the principal cereals throughout the empire was issued by the Imperial Bureau of Statistics in the middle of July. No. 1 represents very good; 2, good; 3, an average; 4, below an average; 5 very small.

The drought which prevailed in June continued until the middle of July, and had an injurious effect upon vegetation. Thunder showers and storms were insufficient to moisten the ground, and the tropical heat in the end of June and beginning of July scorched the clover fields and meadows of South Germany, and summer fruits, especially oats, had to be ploughed over. In many cases they became prematurely ripe, and harvest was hurried on.

Rain fell in the first half of July in North and Middle Germany, and in a few districts of South Germany, where thunder and hail storms occurred, which were most beneficial to fodder plants. The rainfalls came almost too late for the haulm crops, and did some damage in beating them down. The harm done to the grain cannot yet be estimated; the entire crop has been destroyed by hail in a few districts of Treves, Mecklenburg-Schwerin, Wurtemberg, Bavaria, and Alsace-Lorraine. Complaints are heard of the ravages of caterpillars, wire-worm, mice, and sparrows in a few places; weeds and rust are more rare.

The condition of the winter-sown crops is reported as generally satisfactory, in spite of the drought which prevailed. It was much improved in many districts of North Germany by the rainfalls. Winter rye remains the same as in June, but winter wheat has gone back to 2.4. The harvest was earlier in many parts owing to the crops becoming prematurely ripe. Rye harvest was begun throughout the Empire by the middle of July; in parts of Bavaria and Baden it was already ended.

Heat and drought proved unfavourable to the development of summer-sown crops, which were not quite satisfactory in our last report. Only in a few districts where rain fell do they show any signs of improvement; they are generally short in the straw, thin, and suffering from weeds and rust. They became prematurely ripe in many places, and rye and oat fields are burnt up. The condition of summer crops is described as an average. The average note for the Empire for summer wheat and summer barley is the same as in June (2.5); summer rye is 2.6, or one point behind last month, and oats two points behind (2.8).

Potatoes are attacked by disease in several districts where drought prevailed, and in others the growth is undeveloped. They have, however, generally improved since rain fell, and with the exception of Bavaria the condition is described as fine and sound. Complaints of insect pests are rare. The note for all districts except Bavaria is better than that of last month, and everywhere better than that of last year. The average note for the Empire is 2.5, against 2.5 in June and 2.7 in July, 1904.

The first crop of clover and lucerne is, with few exceptions, plentiful and good, and was carried in good condition. Prospects for the second crop are very poor in South Germany, unless the weather becomes warm and moist. The condition of fodder plants cannot improve much, as the long continued drought has dried the soil too much. The second crop promises well in Middle and North Germany. The average note for the Empire is 2.9 and 2.6 against 2.9 and 2.4 in the preceding month.

SHOWS IN BRIEF.

Barnsley.

In striking contrast to their show of 1904, which was a financial failure owing to unfavourable weather, the Barnsley Agricultural and Horticultural Society's twenty-fifth exhibition on Tuesday had delightful weather, and was very largely attended. The takings should help to recoup the society for last year's loss. As to the character of the show, it sufficiently justified that interest simply by reason of its diversity, there being numerous side shows in addition to the usual features of an agricultural exhibition. In a general way, it may be said, the live stock lacked uniformity of merit. Moreover, in a few cases the competition was very meagre; especially was this so in the Shorthorn section. Perhaps it was due, in part, to the lateness of the date of the show. Whatever the cause, there were but four exhibitors of Shorthorns, with but one exhibit each in the younger male and female classes. The local dairy classes were better filled, and made a creditable display, size and quality being a special feature of the winning cow, in calf or milk, the property of a tenant farmer. Several excellent specimens came to the front in the sheep section. Heavy horses were somewhat disappointing, but roadsters made a good display.

Barrow-in-Furness.

The Barrow-in-Furness Agricultural Society is to be commiserated with on the ill-fortune experienced at their show on the 19th inst. A record entry was received, and everything possible done to make the show a success, but it was ruined by the weather. During the night a heavy gale blew down two large marquees, and these were re-erected, but one of them, containing a fine show of fruit, flowers, seeds, etc., again collapsed, and this exhibition had to be transferred to the Queen's Hall. Owing to the wind and the heavy showers, which fell with persistency throughout the morning and afternoon, the attendance was meagre, and a regrettable loss was doubtless incurred. The show itself was a capital one, both as regards quality and quantity, and it is therefore doubly unfortunate that such miserable weather should have prevailed. Of a total of about ninety head of cattle the majority were Shorthorns, some of the best having been bred with the well-known herds of the district. Leicesters were the strongest of the sheep classes, but the pens also contained some good quality Shropshires and half-breds. Heavy horses, which are always a feature of the Barrow show, were this year better than ever, and numbered 105—a substantial increase; whilst eighty-nine light horses were catalogued, and competition was strong in most sections.

Chorley.

Although a busy manufacturing town, Chorley is situated in the centre of a good farming district, and to the Chorley Agricultural Society's Show has always extended hearty support, and did so again at the show held there on the 19th inst. In the aggregate the entries were less numerous than those of last year. The horse and cattle classes practically showed no falling off, but there was a substantial decline in the number of dogs, pigeons, and other less important exhibits. The quality of the horses and cattle was said by the judges to be quite up to that of any local show, and to the horned stock in particular special praise was given.

Lancaster.

The show of the Lancaster Agricultural Society, held in the Grant Axe Field at the foot of the Castle on Wednesday was without doubt one of the best the society has yet held, and fortunately the weather kept fine (though rain threatened), and there was a very large attendance of visitors. The entries were numerous in every section, and the quality as a whole very good. As usual many of the principal competitors at the North Lonsdale Show on the previous day journeyed on to Lancaster—a circumstance that gives zest to the judging, as it not unfrequently happens—and such was the case on Wednesday—that the verdict of one set of judges is reversed by another. Such difference is easily accounted for, however, and the general standard of merit is pretty evenly maintained. Cattle made one of the best displays of the show, some very fine Shorthorns being forward. Of the agricultural horses the more notable was Lord Henry Bentinck's two-year-old filly Underley Daisy, by Patrick II. Besides scoring in every competition for which she was entered, she was awarded the Shire Horse Society's medal. Cark Eclipse, another filly foal with which Messrs. Dickinson took a large share of the honours at Ulverston, was quite as successful yesterday. Hackneys made a good local show. There were but few exhibits with a county reputation, but many representatives that did credit to the immediate neighbourhood. Hunters, too, were commendable, whilst other interesting displays included sheep and dogs.

Newbury Horse.

As a social function, the annual exhibition of the Newbury Horse Show Society continues to hold pride of place as the chief gathering in that part of the county, but as an institution for encouraging horse-breeding in the district it does not attain the results which the efforts of the promoters merit. This is difficult to understand when one bears in mind the large number of horses that are maintained in the locality for agricultural, racing, and driving purposes, but various reasons are assigned. The entries, for instance, this year were forty-eight less than in 1904, which were considerably below those of the previous year, but the deficiency on this occasion is attributed in some degree to the fact that this Show clashed with Dublin, while harvest operations have not yet been completed in many quarters. Wednesday's show was the fifteenth of the series, and as far as quality was concerned it was a very good one, but, as already stated, the number of entries left a lot to be desired.

North Lonsdale.

The show of the North Lonsdale Agricultural Society, held at Ulverston on Tuesday, was a marked improvement on that of last year, and the weather for once being favourable a large company put in an appearance. The show certainly deserves success, for, besides being well managed, it encourages well-nigh every branch of agriculture, as well as live stock. Heavy horses were the feature of the show, and, considering the encouragement given to Shire breeding by the president (Mr. Victor Cavendish), this was only natural. The most exciting event was the competition for the Cavendish Challenge Cup for the best Shire mare, filly, or filly foal. As the trophy has been already twice won by Mr. J. Teasdale, of Ulverston, and Mr. William Huddleston, of Barrow, and as each had entered the list for a third time the result was awaited with more than ordinary interest. After a keen struggle the judges gave their preference to the exhibit belonging to Mr. Teasdale, who has thus won the cup three times, and becomes its possessor. Another championship that was keenly contested was that for the best Shire foal belonging to a tenant farmer in the Hundred of Lonsdale, north of the Sands. Here the principal rivals were Messrs. Dickinson's Cark Eclipse, which was eventually victorious, and a promising brown in foal belonging to Mr. George Robinson, of Wainey. Hunters were not numerous, but there was a fairly good show of hackneys. The cattle classes were well filled, and the sheep took a lot of judging.

Ayrshire Cattle Herd Book.

The annual meeting of the Ayrshire Cattle Herd-Book Society was held at Ayr, the Hon. G. R. Vernon, of Auchans, President of the Society, in the chair. The financial statement showed that the income for the year had been £200 16s., as against £210 4s. last year; and the expenditure, £275 2s., against £234 1s. 4d. last year. The debit balance on the year's intromissions was £83 18s. The balance in favour of the Society was shown to be £764 4s., as compared with £754 12s. last year. The report of the directors showed that twelve new members and one life governor had joined the Society. During the year 234 certificates had been granted—a decrease of 49 on last year. The exports were:—To Finland, 125; South Africa, 29; Sweden, 22; United States, 18; Canada, 20; Australia, 14; China, 3; and Brazil, 3.

Some discussion took place as to donations to societies, and while it was agreed to continue the contributions of £20 to the Ayrshire Agricultural Association and to the Glasgow Society, it was agreed to withhold the grant of £20 to the Highland and Agricultural Society, and in the meantime not to grant £20 to the Royal Society of England. It was also, after a good deal of discussion for and against, decided to continue the show and sale of pedigree Ayrshires at Ayr next year, and, on the motion of Mr. T. Howie, to continue the grant of £40 therefor.

The Marquis of Ailsa was re-appointed patron; the Hon. G. R. Vernon, president; Mr. Alex. Cross, of Knockdon, vice-president; and Colonel Fergusson-Buchanan and Dr. Douglas, M.P., were added to the directorate. Mr. John Howie, solicitor, Ayr, was unanimously re-elected secretary and treasurer.

Some discussion took place as to a remit from the Ayrshire Agricultural Society as to present standards for judging Ayrshire cattle, more particularly as to their milk-giving qualities and their udders and teats. After several speeches, in the course of which it was pointed out that it would be invidious to give directions to judges as to the standards they were to judge by, and that such directions would probably be disregarded, it was unanimously agreed to take no definite steps in the matter.

Royal Dublin Society's Horse and Sheep Show at Ball's Bridge, Dublin.

The great annual hunter show, as it is known by the world over, under the auspices of the Royal Dublin Society, took place on Tuesday, Wednesday, Thursday, and Friday last in the beautifully and conveniently arranged premises of the society at Ball's Bridge. The weather on the whole proved very favourable. On the opening day there were occasional showers, but nothing serious enough to affect either the attendance or the judging. The second day was altogether a delightful one, neither heat or wet interfering, and the crowd of fashionably dressed ladies and gay society has never been greater since the popular function was instituted. On this day the Lord Lieutenant and a numerous Viceregal party visited the show in the afternoon to witness the jumping competition, and the spectacle was quite a brilliant one. At this time practically every yard of the extensive jumping enclosure and grand stands was packed. The jumping that afternoon was very satisfactory, though there were quite as many spills as we are accustomed to see, but so far as the abilities of the horses were concerned little fault could be found. The whole of the obstacles, except the stone wall, were negotiated almost in faultless style by the majority of the horses. On the other hand, the stone wall was quite enough for the best of them, very few clearing that without a slight scratch of perhaps just an odd stone or so. The jumping of these horses is a very important matter, as all, or most of them, were hunters catalogued in the ordinary manner in the show hunter classes, and not animals kept solely for a jumping performance in the yard, and when we look at the fact that the same breeding that produces these horses is also practised in the production of a good proportion of our military horses it will be seen how important it is, as horses used in war are often required to face such obstables as water, walls, and timber of one kind or another in the performance of war.

Coming to the hunters, which are the great feature of the show, it was generally thought that the majority of the classes were not quite up to the average of these shows, and that there were rather more than the ordinary number of indifferent and second or third-rate animals. There are, however, very satisfactory reasons accounting for this. Hunters, especially the best class of Irish horses, have been in great demand for a long time past and at prices that few breeders would be wise to refuse. This has caused the country to be scoured over by purchasers, both home and foreign, who invariably select the best, and therefore a larger proportion than usual of inferior specimens have remained over for the show as a possible place of sale. As an instance of the demand that has been experienced for good horses lately, it may be mentioned that only a few weeks ago one consignment of horses for the Continent of Europe alone numbered 400, most purchased in the best hunter breeding districts. That the circumstances mentioned have had much to do with any deficiency of quality too is also supported by the fact that the three and four-year-olds as well as younger stock were quite up to any previous years, and it is not often that foreign buyers care for the younger ones, their selections invariably being made from the matured and made horses.

Thoroughbreds.

The catalogue commenced with the thoroughbred stallions suitable for getting hunters of the weight-carrying, which is the most valuable class. The number of entries of these has not been so great for the past two or three years as it was at some of the earlier shows. The limitations as to fees, however, restricts the entry of the best stallions somewhat, and the season is now over for having them in condition. The class for horses over eight years old contained ten entries, of which seven came before the judges. These gentlemen were a very long time deliberating on them, eventually placing the favourite Irish sire, Red Prince 2nd, shown by Mr. W. Pallin, at the head of them, a decision that met with quite universal approval at the ring side, for not only is this horse's breeding good, but he is proving a first-rate sire, and at sixteen years old came into the ring remarkably fresh, and his substance, both bone and muscle, as well as his conformation, size and quality, are what is wanted for the business, he is of Ben d'Or blood, and therefore well backed in this aspect. The other prize winners in this class were Mr. John J. Gilmour's Spook, a big bay horse with good back and loin as well as bone and quality, sired by Oberon by Galopin, and Major M. J. Balfe's Bona Rosa, another horse with great bone and muscle and a good mannor. The reserve, Mr. T. M'Mahon's Castleshira looks like getting good stock too. Under eight years old there were seven entries, all in their places, and there were some very promising sires in these. Mr. D. Owens's Knightly, bred by the Earl of Bradford and sired by Sir Hugo, a stallion with quality and famous top and loin, was placed first; Mr. James Walsh's Ray's Cross, by St. Florian, bred by Mr. Gubbins, another big good stallion, was second; and Mr. Fitzmaurice's Belvoir, by Ravensbury, also with plenty of size and bone, was third.

Thoroughbred mares were a very uniformly even class of seventeen, and these were particularly good in their quality, short-legged mares with deep bodies, plenty of breeding about them, and the majority had also enough bone for brood mares. The winners were Mr. F. Callaghan's Lady Glenwood, by Hackler, Mr. Clarke's Springbed, by Springtime, Mr. Hugh Murray's Lavinia, by Laveno, and Mr. T. M'Mahon's St. Magdalen, by St. Florian. The winning foals out of these being sired by General Peace and Senanus. Mr. R. G. Nash had the only entry in the class for mares three years old and under, stinted to a thoroughbred sire. This was a brown four-year-old by Fortuno, and a mare of the highest possible style and breeding for a hunter class, awarded first prize. Mares over six years old, calculated to produce weight-carrying hunters, were a mixed lot rather, twenty-three in number, the majority, however, were wide deep mares with a good deal of substance, as well as breeding, and, therefore, were calculated to fulfil the conditions of the class. Mr. S. Rait Kerr was first with a rattling good mare by Sailor King, Mr. R. G. Nash second with a daughter of Duke of Portland, Mr. J. S. Kincaid third with a very nice quality mare by Scene Shifter, and Mr. Kiernan fourth with the get of Gay Reveller. The best foals out of these were by Red Prince 2nd (1st prize stallion and winner of the Croker Challenge Cup) and Bushy Park. Six-year-old mares and under, for breeding weight-carriers, were a famous lot, though only six in number, the best of these were Mr. R. G. Carden's Romany Queen, a splendid-shaped mare and full of quality, got by Roman Emperor, Mr. Patrick Turley's Nora by Nasar-ed-Din, Mr. J. O'Sullivan's Game Chick by Cherrystone, and Mrs. Panton's Rosebury by Bunbury. The last class of brood mares for producing weight-carriers, and studded to a thorough-bred sire, had but four entries, but these were amongst the very best of the sections. Mr. J. O'Sullivan was first with Fairy Queen by Ferdinand, Mr. M Tyrrell second with White Star by Delamont, and Mrs. Panton third with Cheery of Chad.

Yearling thoroughbred colts were a very pretty class, with 45 entries, the majority of them being well-grown animals, showing a big lot of bone and for the most part quality, too. Mr. M. Smith was first with a colt by Winkfield by Barcaldine, a good backed one and with plenty of substance; from appearances, however, he cannot travel level in landing at the top; Mr. T. M'Mahon's colt by Castleblarney, who stood second, has beautiful shoulders and quality, and shows breeding, too, likely to do better later in life; Mr. Joseph Rooney was third with a son of St. Gris by Galopin, a grand colt, with a lot of substance and growth about him as well as good shapes and quality; and Mr. Slattery came in fourth with a wonderfully nice bay by Toussaint by St. Simon; he, too, has a good deal of substance and the right kind of back and shoulders, altogether a very promising colt.

Yearling fillies numbered 34 entries; the majority of these, like the colts, were well-grown big yearlings, good in their limbs, with quality and breeding about them, too, the winners being especially nice fillies. Mr. Peter FitzGerald was first with a very sweet and well-grown filly by Scene Shifter; Dr. M. R. Cleary second with another very good quality and nicely-shaped lady by Desmond by St. Simon; Mr. Robert Downes third, with a well-grown and improving looking one, with quality, sired by Hackler; and Mr. J. W. A. Harris fourth with a dark brown, with beautiful shoulders and style, by Scene Shifter. This concluded the breeding classes.

Hunters.

Weight-carrying hunters, five years old and over, up to 15 stone and over, mustered 68 entries, which, when weeded, left several first-class horses in the ring. The winner was bred in Limerick, sired by Traverser, and shows a good deal of blood, exhibited by Mr. F. C. Weldon. Geldings, five years old and upwards, up to 14 to 15 stones, had also 67 entries, the best of which was a very beautiful quality horse and well shaped, shown by Mr. Abel Buckley, and sired by Bruree; Mr. James Walsh had also a horse with very good shoulders and quality placed second, sired by Aconite, who was by the famous getter Ascetic. The class for horses up to from 13 to 14 stones is always a very full one; this year it totalled up 133 entries, and there was a great deal of quality in these, though some appeared being the weedy class. Mr. T. J. Studdert was first with a breedy-looking bay by Atratus, and Mr. H. B. Warren second with Skitties, a very pretty light-weight carrier, by Nine Pins from an Ascetic mare.

Hunter mares, five years old and over, up to from 13 to 15 stones, had 53 entries. This is an important class, as such as these are the mares that the country needs to retain for the future of our home breeding, and they were, on the whole, a very useful lot, particularly as regards their

HUNTER MARE, LADY TACITUS.

Winner of the Coote Challenge Cup, value 50 guineas and Silver Medal for the best Hunter Brood Mare owned by an exhibitor resident in Ireland, at the Royal Dublin Horse Show last week.

Bred and exhibited by Mr. R. G. Carden, Fishmoyne, Templemore; her sire was Tacitus by Hermit, and Her dam Lady Clare by Walter.

breeding. Mr. H. B. Warren occupied first place with Gwendoline, by Mont Cenis, dam by Ireland, a very clean bred mare, and with beautiful shape and limbs; Mr. W. L. Naper's second was also a mare of very smart character for breeding from, and had a lot of beautiful bone as well as being of good build and quality. Hunters up to 12 to 13 stones, five years old and over, counted up no less than 155 entries, and in this class were a good number of moderate to inferior animals, a circumstance that it is only natural to expect. The first prize winner was Mr. C. Ballaney's Baronet, bred in county Cork, and sired by Sir Hugh, who appeared to well deserve his position; Mr. N. Morton's second, Signature, was sired by Penman, and showed a good deal of quality.

Class 15, for young horses suitable for hunters, open to mares or geldings, from 15 stones and upwards, had 40 entries. There were a number of beautiful young animals in this class of both sexes. Messrs. M'Morran Brothers carried off first honour with Performer, a very promising gelding, bred in Tipperary; and Mr. W. H. Rice was placed second with a dun gelding, also bred in Ireland, and like getting up to weight.

Four-year-old geldings, up to 14 to 15 stones, had also a good entry of 51 animals; and the same age of geldings, up to 13 to 14 stone, had also 77 entries; whilst four-year-old mares, up to 13 to 15 stone, were represented by 44 lots; and the class for mixed sexes, up to 12 to 13 stone, had 92 entries. All these classes contained several first-rate young hunters, though there was quite a number of the moderate class.

Three-year-olds were not in strong force. Geldings counted up 19 entries, of which Mr. John J. Adams's Extra Stamp, by Royal Mask, was first; and Mr. J. Barron's Star of Antrim, by Barrington, second; both showing a good deal of blood. And fillies of this age had but ten entries, of which Mr. Owen Ryan's Sal, by Kentford, was placed first; and Mr. Arthur Maxwell's Jollity, by Aughrim, second; these, too, were very full of quality and breeding.

Riding cobs and ponies, to be shown under saddle, were mostly of the harness type and high steppers, at least, a great many of them were of this class. Those over 15 and under 15.2 hands numbered 36 entries; Mr. John Johnston, of Dundalk, was first prize winner in these, with one of very much blood type. Over 14 and under 15 hands there were 40 entries, in which Mr. T. J. Roark came to the front with a six-year-old, by Red Prince 2nd. Over 13.2 and under 14 hands class was a smaller one, counting up but eleven entries. Messrs. Moran Brothers won this class with a four-year-old mare bred in Cheshire and sired by Hurlingham, and a Welsh pony of Mr. H. E. B. Nuttall's was accounted best in the under 13.2 hands class.

Harness Horses.

These classes made a very good display and attracted considerable attention from ringsiders, but the absence of several of the best English animals that took part in last year's competition deprived the classes of perhaps the elite of these fine steppers. Nevertheless there were several pairs and tandems, as well as single horses that were hard to beat and moved evenly, and were as well as first. In double harness, not less than 15.3 hands, out of four entries Mr. M'Bride brought out a pair of very well matched ones and showy style, as well as the best of action and quality. To these the first prize was awarded. Over 15 hands and under 15.3 Mr. Le Marchant carried off first with a pair of chestnuts, bred by Messrs. Cockayne Brothers and Mr. Burdett-Coutts. Colonel Moore was the winner for pairs between 14.2 and 15 hands with a very nice pair of hackneys. In tandems over 14.2, Mr. John Kerr's Advertisement and Paddock Wildfire headed the list. The chief winners in single harness were Mr. N. Morton's Crown Prince first in the class not less than 15.3; Mrs. John M'Watters, with Starlight, first in the class between 15 and 15.3 hands; Mr. A. Gemmell's Leader of Fashion first in the 14.2 to 15 hands class. Several of these classes were not judged until the Friday. The fast trotting horses were a great attraction, indeed these came next to the jumping for creating excitement, especially when the one mile against time was being done. Mr. Thomas M'Veagh's Lady Rose did the mile in good form in 2 min. 37½ sec.; Mr. Michael Horan's Tommy doing the second best at a mile in 2 min. 42½ sec.

The Champion Hunter Cup, value 50 gs., was awarded to Mr. A. Buckley's Rock. The Pembroke Cup was won by the Earl of Kenmare with Emeralda, a purely bred one by Matador by Tara. The Coote Challenge Cup went to Mr. Carden for the mare Lady Lucille, which was exhibited in the thoroughbred section in the class for mares six years old and under calculated to produce weight carrying hunters. She would undoubtedly have also received a first prize had she not been barred from doing so on account of having won a first prize at the previous Dublin Show; and the Samuel Usher Roberts Cup accompanies the Hunter Champion Cup to Mr. A. Buckley's Rock.

SHEEP.

The sheep show was not much, if any, larger numerically than for several years past, still there was quite an average entry, and in most of the breeds the quality was of a superior order to what we have been accustomed to see at Ball's Bridge lately. The catalogue commenced with Border Leicesters.

There was a larger entry than usual of these, and though the general quality must be well spoken of, the increased numbers brought out several animals that rather detracted, and the Scotch-bred specimens in most instances stood ahead of their Irish-bred opponents. Miss K. Carleton, Mr. R. W. Bell, Major W. G. Forde, Sir Algernon Coote, Mr. Albert King, and Mr. C. M. Doyne, with Miss Staples and Earl Fitzwilliam shared the prizes, and it is needless to say the quality of their exhibits was very satisfactory. The Champion Cup for this breed was given to Miss Staples, and Mr. R. W. Bell won the Breed Society's prize for best pen of the breed.

Roscommons.

This breed was in remarkably strong force, and some really grand sheep were exhibited, displaying very marked improvement upon most previous years. Mr. Matthew Flanagan had some magnificent rams, as had also Mr. G. R. Acheson and Mr Edward Scott. Mr. John Keane, too, had some famous representatives from his flock. The Champion Cup for this breed and the Long-woolled Champion Prize fell to Mr. Acheson's exhibits.

Lincoins.

This breed did not excel, the majority were true in character and shown in pretty natural condition, which is very commendable, but they were not quite up to several previous years as regards their general show qualities. Most of them were in the hands of Mr. R. G. Carden, Mr. Richard Reynell having a few entries. The first share of the spoil, however, fell to Mr. Carden, who had some very useful shearling tups, as well as ewes and lambs.

Black-Faced Sheep.

This breed of mountain sheep have taken root in Ireland, and appear to suit a good deal of the mountainous part of the country. The general display was good, but not some. Lieutenant-Colonel Long and Mr. John Robson, with Mr. H. D. M. Barton, carried off the whole of the honours. Mr. Robson showing some very nice and correct specimens.

Shropshires.

This breed for a few years appeared to be rather losing ground in Ireland, but this year are of better quality, worth and exceedingly creditable pens of ewes and rams being shown. The Loughcrew flock were represented by a pen of quite first-class ewes, both in breed, character, and condition; some lambs from this flock were also very good and promising for the future. Mr. R. F. White had also several famous entries, and carried off, in addition to several class prizes, the special Perpetual Challenge Cup and the Shropshire Sheep-breeders' special prize as well. Good pens of the breed were also shown from Mr. Richard Barter's flock, Mr. Hamilton Stubber, and one or two others.

Oxford Downs.

There was a fairly good entry of these, but their quality will bear improving. The English bred ewes had little difficulty in taking the lead, and there were also a few entries of local-bred ones that came out very well. Mr. E. T. Dame's Longworth, Mr. T. L. Hodgins, junr., Mr. Cleary, and Mr. Robert Downes were the chief exhibitors of this breed, and some of the prizes fell to each of them. Several very good specimens were bred by Mr. John Treadwell and Mr. J. T. Hobbs in England.

Hampshires.

These were shown in increased numbers, but there is a good deal of ground to be made up in the way of quality before they can compare favourably with the English sheep of this breed. All the entries were in the hands of one exhibitor, Mr. J. C. Hanbury, who was awarded all the prizes.

Southdowns.

These were a small show, and all of them (very smart ewes) were in the hands of Mr. C. M. Doyne, who receives the prizes.

Cheviots.

These, too, were a very short supply, and the three pens exhibited were all owned by Mr. John Robson.

By the death, at Cullompton, of Mr. John Blackmore, aged 90, a family of yeomen who farmed in Devonshire for seven hundred years has become extinct. Moolhayes Farm, at which he died, was for sixteen generations owned by a family named Moore, the only daughter of the last male representative of which became the wife of Mr. Blackmore's grandfather. Mr. Blackmore was one of the few remaining yeomen who had sole right in a pew at church.

The Crops and Live Stock of Great Britain in 1905.

On Friday the Board of Agriculture issued its preliminary statement of the crops and live stock of Great Britain in 1905, compiled from returns collected on June 5, and below we give the table in full. Last year's figures are also given for the sake of comparison; increases are shown thus + and decreases —. It will be noticed that the total acreage under all crops and grass continues to show marked decreases and is many thousands short of the total of last year, which in its turn was considerably less than that of 1903. Wheat, for once in a while, however, shows a larger area, the increase being over 420,000 as compared with last year, and this, we suppose, is due to the favourable seed time experienced. Oats, which in 1904 showed an appreciable increase on 1903, have fallen off; as has also the barley acreage. Other decreases are noted in peas, turnips and swedes, rape and lucerne, whilst other crops show satisfactory improvement. As to live stock, there is only one reduction in numbers when compared with 1904, and that is in pigs, which number 2,424,919, as against 2,861,644—a decrease of 436,725. The total of sheep is more than last year, but in one section there is a decline to be noticed, namely, in that for sheep (other than ewes kept for breeding) one year and above, and these are 166,085 fewer than in 1904. Horses are not yet being killed by the motor car, for there are 12,197 more than in 1904; whilst cattle show a marked improvement, their number being 128,688 more than last year. The official figures are as follows:—

Distribution.	1905.	1904.	Increase or Decrease.	
	CROPS.			
	Acres.	Acres.	Acres.	P.C.
Total area of land and water	56,787,669	56,787,669	—	—

* Excluding 12,763,099 acres returned as mountain and heath land used for grazing in 1905, and 12,788,156 acres in 1904.

† The acreage of any crop or grass grown under the trees in orchards is also returned under its proper heading.

‡ Including mares kept for breeding

RAILWAY RATES FOR AGRICULTURAL PRODUCE.

Great Western Goods Manager's Opinions.

Further evidence on behalf of the railway companies has been heard by Lord Jersey's Committee inquiring into the alleged preference given to foreign and Colonial over home-grown produce.

Mr. J. E. Hennell, assistant goods manager of the Great Western Railway, said complaints had been made that the railway companies would not carry less than 2½ tons per truck at the same rate as was given to the foreign hay, which was steam or hydraulic pressed so as to carry four tons per truck. The English agriculturists wanted to carry two tons per truck at the same rate as the foreigner paid for four tons, but this would not pay the railway companies, who were receiving less per truck for the home produced hay. The traders really wanted to have the unpressed hay carried at the same rate as the foreign pressed hay. That would be ruinous to the railway companies, because they would just get about one-half the receipts they got from the foreigner.

Then as to the grain rates from the Severn ports, those were necessarily low in order to meet the water competition, and they had been held by the Railway Commissioners in the case brought by the Liverpool Corn Trade Association to be in the public interest. Any comparison between the rates per ton for occasional two-ton consignments from country stations, and train loads of full waggons containing about five tons each was unfair and misleading. With regard to the rates for apples from Cardiff to London for two-ton lots, the Englishman had the advantage, as he only paid 17s. 1d., and had in addition the expensive service of cartage in London.

Circulars had been issued to agriculturists showing them that if they sent larger consignments they would get lower rates for their meat, butter, fruit, and eggs. These had resulted in getting a slight increase of traffic, but it was very slow work to persuade the farmer where a new departure was necessary. If the farmers or growers combined, they would be able to get a distinct benefit from the present system of rates.

With reference to the complaint that the foreign meat rate from Birkenhead to London was unduly low as compared with the rate for English meat from other places, witness said it had to be borne in mind that the meat business between Birkenhead and London had attained enormous proportions. The amount of money involved in the live cattle trade alone was from £90,000 to £100,000 per week; while in the live cattle and dead meat trade together the money involved was £15,000,000 per annum. So large was the business that the traffic was conveyed in full train loads throughout from Birkenhead to London, and the cost per ton was very much less than when trains had to take in and put off a truck or two at intermediate stations. If the low rate were not given for the large traffic from Birkenhead to London the vessels would run direct from America to London, or some port to the south, and therefore no benefit would be conferred on the English farmer.

With regard to the proposal to transfer the present powers over railway rates of the Board of Trade to the Board of Agriculture, the witness considered it would be most objectionable. If a separate tribunal were created for agriculturists, similar tribunals would be asked for by the various other trading interests. Conciliation conferences were held at the Board of Trade between the traders and the railway companies, with beneficial results to all parties concerned. As to the suggestion that rates should be on an equal mileage basis, that had been declared by Royal Commissions and Committees to be impracticable, and if adopted would prevent railway companies lowering their fares and rates. A very heavy loss would be inflicted upon the railway companies if they were forced to give up the conveyance of traffic subject to water competition. The circumstances in regard to traffic varied so widely that it would be very unfair to compel the companies to make equal mileage charges. There was no industry in the country that the railway companies favoured to the extent that they did agriculture.

Views of the Great Eastern Goods Manager.

Mr. Walter Gardner, the goods manager of the Great Eastern Railway Company, said that his company had been trying to develop the home market in agricultural produce for many years, and all their efforts by reducing rates for meat had resulted in only half the quantity in the last twenty years being brought to London by their company—viz., between 5,000 and 6,000 tons. The imported foreign meat was practically killing that trade, and if they carried the meat for nothing he was afraid it would not improve. He denied that there was any preference given by the company to this imported meat. Their imported rates were very much governed by the water rates to London, and if they did not meet this water competition they would lose the traffic, and this would ultimately be a loss to the farmer. If they reduced their rates to the basis of their lowest figures it would simply mean ruination to the railways of the country. He would not recommend protective duties as a remedy for this state of things. As to the suggestion that the Board of Agriculture should take the place of the Board of Trade in attending to the grievances of agriculturists, he was opposed to that, and considered that the Board of Trade acted fairly between the traders and the railway companies.

The Rates on Fruit: Memorial to the Board of Agriculture.

A memorial has been presented by the National Federation of Fruit and Potato Trades' Associations to the President of the Board of Agriculture and Mr. A. S. T. Griffith-Boscawen with reference to the various recommendations contained in the report of the Departmental Committee appointed by the Board to inquire into the fruit industry of Great Britain.

The memorial, after expressing appreciation of the action of the Board in causing the inquiry to practical legislative and other results from the recommendations of the Committee, strongly confirms the importance of quick transit and reasonable rates on the railways of the country, and urges that, in providing for the latter, a more simple and uniform system and a more practical classification are very desirable and indeed urgently necessary.

The protection of traders against the result of the combined action of railway companies, says the memorial, has become a vital question, and the associations offer their services to ensure that the effect of the report of the Committee shall be such as to enable Parliament to recognise the great and increasing importance of the fruit and potato growing industry, and to pass the requisite statutory enactments.

The memorialists hope that the action of the Board may cause the necessities and requirements of these trades, affecting as they do the whole country, to be better understood, to the advantage not only of the trades and the railway companies, but to the whole population.

Canals and the Agricultural Rates Act.

At the meeting of the Worksop Board of Guardians last week the Clerk stated that the Assessment Committee had received an application from the Great Central Railway Company to have the Chesterfield Canal (their property), where it runs through agricultural districts, put into the agricultural rates column, so that the company would only have to pay half the rates they pay on the canal at the present time.

Mr. Barker, who represented the company, said he relied on an old Act of Parliament, George III., 1779, and he advised that the canal was not liable to more rates than would have been the case if the land had been left as it was before the canal was made. He therefore claimed for it to be treated as agricultural land.

The Clerk said that the Retford Union had adopted Mr. Barker's view, and had placed the canal on the agricultural list. Personally he could not quite see that this was right, as the Agricultural Rates Act was passed entirely for the benefit of agriculturists, and he did not think it was ever intended to place this canal on the list. The company, he said, were going to raise this question at Chesterfield and Gainsborough. He suggested that the case might be laid before counsel, and this suggestion was adopted, providing the fee does not exceed £5 5s.

A New Fruit and Vegetable Market for London.

For three years Portman Market, Marylebone, has been a desolate, untenanted wilderness, but now a determined effort is to be made to start it afresh on a career of usefulness. It was originally opened as a meat and fish market, both wholesale and retail, but it proved a failure. It is now to be transformed into a market for flowers, fruit, and vegetables, for wholesale trading only.

It is intended that the market shall be open in the morning from about five o'clock until ten. In the afternoon private auctions of consignments of fruit, flowers, or vegetables can be held under the central dome. Produce from the West of England and the Channel Isles often arrives at Paddington in the afternoon. It could be at once transferred to Portman Market and sold by auction, whereas if it be taken to Covent Garden it cannot be disposed of till the next morning.

The fact that it is contiguous to the termini of the Great Central and Great Western Railways, both of which bring immense quantities of these products to London, it is thought will prove it to be of the greatest service. Further, there is an immense population in the neighbourhood, and if the market can be made successful it will not only be of great benefit to the people of the district, but will do much to relieve the congestion at Covent Garden, which every year becomes more intolerable.

Yorkshire Farmers to Visit Denmark.

Arrangements have been completed for a visit of Yorkshire farmers to Denmark, with the object of witnessing and investigating the methods of co-operation and production which have proved so profitable to Danish farmers. Mr. H. Norman Roe, of Harrogate, has organised the affair, and he and his party will include quite a representative gathering of Yorkshire farmers, several societies being represented.

The party leave Harrogate on Thursday next, and will travel via Harwich for Esbjerg, which will be reached on Friday evening. The following day will be spent at Esbjerg. Sunday will be passed in the Danish capital, Copenhagen, and on Monday the milk depots and farms in the district will be visited. The delegates visit Haslev on Tuesday, when one of the largest co-operative dairies in Denmark, dealing with the milk from 3,500 cows, or 2,500,000 gallons a year, will be inspected. The membership of this co-operative dairy is made up of large estate owners, each having from 100 to 250 cows. Butter and cheese making are both important departments, especially cheese-making at Trifolium, where the buildings and equipment cost nearly £40,000.

The programme of the tour also includes a visit on the Wednesday to other farms, and the Danish Milk Company's depot. On the Thursday the party visit the co-operative dairy and bacon factory at Odense, and the Dalum High School, Friday being reserved for the Askov Agricultural College. The return journey will be commenced on Saturday week from Esbjerg, the main port for the export of bacon, butter, and eggs consigned to this country.

The 1905 Barley Show at the Royal Agricultural Hall.

The prize schedule has now been issued for the great malting and seed barley competition at the twenty-seventh annual Brewers' Exhibition and Market, to be held, as usual, at the Royal Agricultural Hall, Islington, on October 14 to 20. As at previous shows the prizes offered are well worth winning, and it may be mentioned that it is possible for one sample to secure six cups, two gold and other medals, diplomas, and upwards of £100 in cash—surely something worth trying for. If, however an exhibitor wins one prize only, it means that he gets a better price for his barley, so that it pays a barley-grower to exhibit his best at this exhibition. There are upwards of two dozen special and champion awards ranging up to £50 in value, offered chiefly by various firms, and amongst them is the MARK LANE EXPRESS Champion Challenge Cup for the best seed barley grown in the United Kingdom or Colonies, exhibited by the grower only.

In the classes themselves numerous gold, silver, and bronze medals, and, in some cases, money are offered in prizes, so that altogether there is every inducement to the barley-grower to send samples for exhibition. Entries close on Wednesday, October 4, and at double fees on October 5, but earlier entry is requested. Entries for beers close September 26, cider September 28, and hops October 7. Entry forms, prize schedules, etc., can be obtained from the managing directors, Messrs. Dale and Reynolds, 46, Cannon Street, E.C. We may add that all official announcements in connection with the exhibition will appear from time to time in these columns, and the full list of entries and awards will be published on October 16.

From Messrs. Ben. Reid and Co., Limited, Aberdeen, has come an illustrated catalogue of Dutch flower roots for the season 1905, from which a choice selection of these plants can be made.

Home Notes.

Our Picking Season

has commenced. Already a few pockets have arrived, some of which have been sold at prices that, considering the quality of this early produce, may be taken as satisfactory indications of the probable course of the future market. In another week the in-gathering will be in full swing, and our speculations as to the crop will soon pass into the region of certainty. In the meantime, traders and growers are anxiously watching the climatic conditions upon which the final results so largely depend. From some districts we hear that recent rains have assisted the development of the cones, and improved the estimates of yield, from others we are told that the hops have suffered from the high winds, and I think we may generally conclude that the changes of temperature from the warm sunshine to the chilly nights must be rather detrimental than otherwise. The somewhat large proportion of blind bine reported from nearly all gardens is also an important feature of this season. Taking into account the whole of the circumstances, and examining them impartially, we may infer that if nothing unforeseen occurs during the next few weeks, a full crop will be harvested, but that it will not be nearly so heavy as was at one time predicted. Personally, I am disposed to abide by my approximate calculation of last week, as I cannot at present see any reason for increasing the average figure. With regard to quality, I believe there will be little, if any, cause for complaint, as I do not attach much importance to the rumours we have heard as to the spread of white or red mould. There is perhaps some possibility that premature picking may cause the earlier supplies to be more or less unsatisfactory, also that too rapid ripening may overtake the later growths, and that the latter end of the season may therefore leave growers with some pieces unpicked. But, given normal conditions, we may safely assume that the great bulk of our 1905 crop will be exceptionally good, and if this be so, we may hope that the market value will be better than the anticipated large yield might lead us to expect.

The Borough.

is waiting anxiously for further developments. But there are evident signs that brewers' stocks are generally very low, as inquiries are more frequent during the past few days, and when low offers have been refused, there appears to be decidedly more readiness on the part of buyers to consent to holders' views of value. Reports are also current that some large quantities of yearlings are required by consumers for immediate use, and efforts will doubtless be made to secure these at low rates, but if their offers are too low for acceptance, their necessities will doubtless induce them to pay such prices, as holders may consider fair and reasonable. It therefore appears to me that a healthier, stronger tone is notable in our business, and I earnestly trust that this will be maintained, so that our new market may be opened on a satisfactory basis.

The Medway Valley.

Hops in this district are not looking quite as well as a week since. They look very nice going along the roads or rail, but if one goes into them they will, in many grounds, find much, too much, mould, and, where touched with the white mould, are turning into red mould. It is feared a good many will not keep well. Picking, in consequence, is being rather hurried on, and nearly all growers will commence on Monday.

All official reports and notices of the National Association of English Hop Growers are printed in the MARK LANE EXPRESS, *and current information from all parts of the world, likely to be of interest and benefit to the members of the society, and Hop Growers generally.*

Prospects in Worcestershire and Herefordshire.

Worcestershire hop-growers are rejoicing in the prospect of a generous return for the many months of constant care and attention devoted to the plantations. Rarely has a more favourable season for hop-growing been experienced, and the hop gardens of Worcestershire, especially along the fertile Teme Valley, are now looking their best. Last year, with a maximum of expense for cultivation, growers reaped but a poor harvest, but this year the season has been most favourable, and should the present conditions continue for the short remaining time before the hops are picked there should be a crop nearly equal to that of 1894, which established a record. So heavy is the crop in some gardens that growers are expecting to get a ton to the acre where in most seasons eight hundredweight is a good average crop.—It is anticipated that the yield of hops in Herefordshire will equal, if not surpass, the famous crop of 1901. Whether the return per acre will be quite as heavy it is difficult just at present to estimate, because, although the hops are excellent at the top of the poles the under ones in many places are not so abundant, but more hops are being grown generally, and consequently the crop is bound to be very big. The yards certainly never looked cleaner, and the quality is excellent. One great advantage to the grower this season has been the absence of the usual pests, rendering washing unnecessary, and this, compared with last year, for instance, means an enormous saving. Mould is the only thing that has made its appearance, and but very little of that is reported.—*Birmingham Post.*

Foreign Notes.

America.

The perusal of correspondence from the hop districts on the other side of the Atlantic affords me much amusement. The reports are so opposite, and yet so definite, that I am compelled to give up the task of reconciliation. I am reminded of the present *impasse* at Portsmouth (U.S.A.) that hinders the settlement of the Russo-Japanese difficulty. Each party is resolved, neither will yield, and compromise appears to be impracticable. Thus it is also with respect to the crop estimate. On the one side I am assured that the indications favour a smaller total yield than in 1904, as in New York State the consensus of opinion is that the crop will be one-fourth to a third deficient. The same authority puts the Californian harvest at not exceeding last year's probably much less; and, as as illustration, I am told that the Pleasanton Yard of 340 acres will hardly grow a third of a crop. Regarding Oregon, I hear from more than one correspondent that the plantations are in a dangerous condition, and cannot possibly produce so much as in 1904. The other view of the picture, sketched by an equally competent artist, is thus presented:—"We have never seen a season wherein weather conditions have been so favourable for a large crop in this country. The New York and Washington Yards are in almost perfect condition. While the Oregon and Californian growths did not start off well, they are steadily improving under the genial weather we are having, and will certainly produce more hops than last year. The estimates for the whole (300,000 bales) have not changed." In the same way as we are sometimes recommended to exercise our ingenuity in the solution of trifling problems, I may say to my readers: "Puzzle, find the truth."

Referring to the recent arsenic-in-hops scare, one of my friends on the other side says that any ingredients that do not kill outright can be used in food preparations in the U.S.A., and facetiously remarks that the danger arising from adulterated food and drink seems to add a certain zest, which the average Yankee likes. Buyers of American hops, therefore, attach no importance to the possibility of even a heavy percentage of arsenic being found in them.

Germany: Crop Reports.

ARSBERG (Spalt).—Hops much improved by rain. Before this arrived a small crop was expected; now, however, the outlook favours about the same as last year. The quality will be good.

WINDSBACH (Spalt).—Condition of plantations very good on the whole. Early and late sorts have both developed well, and a full crop is anticipated.

PLEINFELD (Spalt).—Some rain has fallen with good results, but a hailstorm has done much damage. Hops are sound and free from disease.

GERMERSBERG (Hersbruck).—A recent thunderstorm has done damage, and caused much labour in resetting poles, etc. Hops are fine and sound, but not more than half a crop is expected.

SCHNAITTACH (Hersbruck).—Hops continue to develop, but have been seriously damaged by a recent storm.

NEUSTADT (Aischgrund).—The early crop is disappointing, and if nothing occurs in the meantime the later growth may yield about half a crop, not more.

ROTTENBURG (Wurtemberg).—Hops are growing out well, and present conditions, being satisfactory, indicate a favourable crop.

TETTNANG (Wurtemberg).—The hop harvest is advancing slowly on account of weather. Very hot days and cold nights have caused the plants in many places to become yellow. The further the picking advances the more evident it is that the crop will not fulfil the trade estimates. In several plantations the yield will be at least one-fourth less than last year.

Nuremberg.

Holders of 1904 hops are urgently pressing for sale, with the result that quotations for medium qualities have fallen about 20s. in the last fortnight. Choice samples, being very scarce, fairly maintain their value, but are only sold in very small lots. This desire for clearance before the arrival in bulk of the new crop, has induced a little export trade at the low price of 40s. to 50s., but only for very common quality. During the past week a fair quantity of new earlies has been put on the market. These were readily sold at 90s. to 110s. according to quality and condition, and the agerness with which the samples were examined by consumers seems to indicate that a brisk trade will meet the supplies when they appear in sufficient quantity to demand attention.

Belgium.

The imports of hops during the seven months ending July 31 last were about 16,000 cwts., being slightly in excess of same period last year; but during the month of July the imports have nearly doubled those of July, 1904, the heavy receipts from England contributing largely to this increase. In July, last year, Belgium exported over 10,000 cwts.; this year, in corresponding month, her exports have only reached about 5,000 cwts. For the seven first months of last year she shipped no less than 35,500 cwts., of which the great bulk came to England. This year her exports for these seven months have not exceeded 7,000 cwts., of which England has received less than 3,500 cwts.

Crop reports continue to be favourable, the weather being also helpful to development of the cones. Next week picking will commence in the Poperinghe district, and some days later in Alost. Holders of 1904's are anxious to clear out, and as brewers have hardly any stock, a fair business is passing at prices ranging from 60 to 90 francs.

Mr. R. W. M. Nesfield.

Mr. R. W. M. Nesfield, for nearly half a century agent to the Duke of Rutland, died on Wednesday at an advanced age. By a somewhat sad coincidence he passed away on the day of the Bakewell Farmers' Club Show, in which years ago he took a warm personal interest, and at the hour when the equally venerable Duke of Rutland was presiding at the show luncheon. Mr. Nesfield, who was 90 years of age, had served under three dukes, and had the oversight of 30,000 acres of land, including the Haddon Hall estate, with its romantic associations. This was no sinecure, but he found time throughout his career for both the pleasures and the duties of a country life. He was a zealous sportsman, and was Master of the High Peak Harriers for 52 years.

Miss Edith Bradley has, for private reasons, resigned her post as Warden of Lady Warwick's Agricultural College, Studley, which she has filled with so much ability from the founding of the Institution at Reading seven years ago.

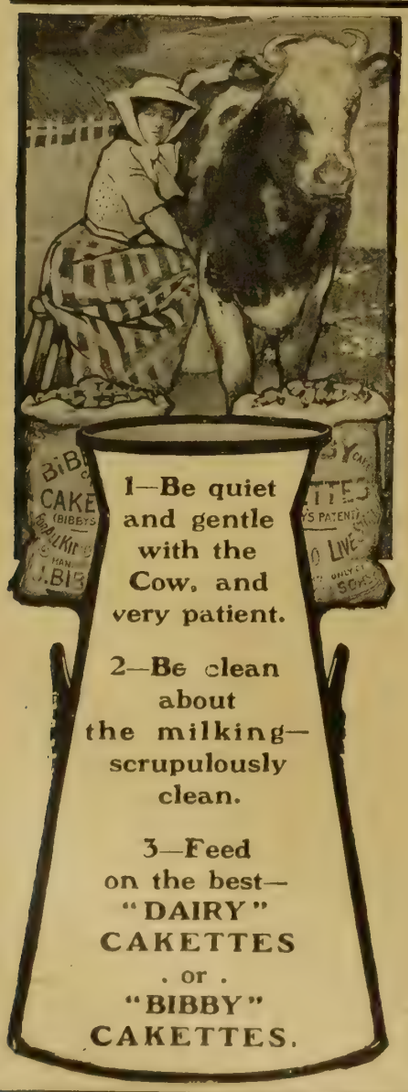
ORWELL WORKS, IPSWICH

HOW TO FILL THE KIT
.. WITH ..
WHOLESOME MILK.



1—Be quiet and gentle with the Cow, and very patient.
2—Be clean about the milking—scrupulously clean.
3—Feed on the best—
"DAIRY" CAKETTES
. or .
"BIBBY" CAKETTES.

NOTE.

If Dairy Cows are allowed to go off their milk at this time of the year, nothing will bring them on again; hence the importance of keeping up the supply by timely attention to Rule 3.

YOUNG STEERS and HEIFERS.

NOW is the time for the farmer to give a little Cake to the young Steers, if he wants them to come into the auction-ring in the autumn in fresh, thriving condition, with good bright coats on them, and looking big and well. It pays to do them well.

The Heifers, also, which are intended for the dairy, should have a little . . .

BIBBY'S "FEEDING" CAKE or the "BIBBY" CAKE,

to make them thrive and get some size and stamina before the strain of milking comes on them.

A NATIONAL DANGER.

WITHIN THE LAST THIRTY YEARS OVER TWO MILLION ACRES HAVE BEEN WITHDRAWN FROM CEREAL CULTIVATION IN GREAT BRITAIN.

This simple statement, appearing in the columns of the leading daily for the 29th ult., is so startling that the reader will almost suspect some error of the press. Unhappily, it is only too accurate, and the agricultural returns issued just before the close of August are conclusive evidence of tendencies to which Professor Karl Pearson in England, M. Maurice Barrès in France, and the famous scientist Lombroso in Italy, have been bearing witness within the last few weeks. With Continental troubles we have not now to deal, but with what is occurring in Great Britain we have the most obvious and direct concern. Thirty years ago Great Britain devoted 3,630,300 acres to wheat; the present harvest has been grown on 1,796,985 acres only. The area of wheat land which has passed out of cultivation within the lifetime of all of us who have attained even early middle age is 1,834,000 acres, or more than the area now remaining under cultivation!

The barley crop is less affected, but a decline from 2,335,913 acres in 1873 to 1,713,664 acres in 1905 exceeds 622,000 acres in thirty-two years, and means that barley culture will be extinct before the close of the century. Of oats the culture was well maintained till quite recently, but 1905 returns are two hundred thousand acres less than those of 1904, and the enormous Russian supplies make it impossible to have any confidence in recovery. The Russian grain gets over here in a week, and the sea freights from the shores of Finland to the quays of London are much less than the railway charges from the Midlands to the metropolis. Is the tale ended here? No. The *Times* is content to speak of cereals, but only too ample corroboration is to hand. Beans in 1873 occupied 586,561 acres; in 1905 the area was 254,765 acres only. Beans, like wheat, will be an extinct crop before 1935. Peas have fallen from 318,213 to 175,608 acres; less than beans, but half a century will suffice to see the last of them.

But at least it will be surmised that cattle are gaining in provision made for them of home-grown food. Unfortunately, the land withdrawn from wheat, barley, oats, beans, and peas has *not* gone into use for the growth of turnips or swedes, for of these two crops the area in 1874 was 2,133,336 acres, but in 1905 is 1,589,273 acres only. Mangold does indeed show some increase, but against 322,614 acres in 1874 there are only 404,123 acres now, so that swedes and turnips at the present rate of changes will have gone out of cultivation on 1,589,273 acres before the increasing culture of mangolds has reached to half a million acres.

But enough of figures. The evidence is overwhelming. It is simply impossible to exaggerate its significance. It means a wholly urban population within fifty years time; the country a desert or a mere place of pleasure resort. The urban population enjoys good health for one generation, experiences nerve degeneration in the second, and is usually unable to carry on the species in the third. That in four generations 90 per cent. of urban families become extinct is a recognised scientific fact, and nothing but immigration from the country keeps up population in the older towns. But we are now within measurable distance of a time when the country will be so thinly populated that it will be utterly unequal to supplying the needed immigrants. And why is the country becoming thus depopulated? For no other reason than that of this decline of agriculture, which *no* amount of successful stock-breeding or horse-rearing can conceal. The matter has ceased to be one of Fair v. Free Trade; it is simply a question of—is the English race worth preserving? Has not the time come, we would ask, when the Government of the hour, Liberal or Conservative, should consult the people, and lay before them a plain issue? Here, such a Government would say, here are certain most serious and absolutely indisputable facts; here are their corollaries and consequences which in all countries have been the same, and by no political party are now denied. Are you prepared for such consequences happening, or have we your mandate to go to the root of the matter?

It is not necessary to discuss what reforms might on examination prove requisite; that which is to-day required is an invincible and national determination to win back to agriculture the lost acres of the past thirty years.

The blackberry crop in Cumberland is the most abundant for many years, and picking commenced last week. At Wigton the pickers were receiving half a crown per stone last week, but it is expected that the price will fall to below a third of that sum. Last year, an average one, the rate of pay fell to 9d. per stone. Tons of the fruit are sent to the larger towns in the North of England.

Ilminster Fair.—There was a good attendance at this annual Dorset fair, held on Wednesday, and the demand, especially for store sheep, was very good, a clearance being effected. Quotations:—Lambs, up to 40s. 0d.; wethers, 46s. 0d.; ewes, 46s. to 48s. 6d.; heifers and calves, £15 to £17 8s.; fat calves, 65s. to 90s.; fat beef, 11s. per score; couples, 58s.; store beasts, little demand; store sheep, a total clearance, at slightly advanced rates; rams 5½ gns. to 10 gns.

Proposed New Market for Penistone.—The Penistone Market was established in 1699 and from that date it has been held weekly in the streets; but a recent order of the Board of Agriculture has the effect of putting a stop to this practice, and a meeting of the inhabitants, presided over by Colonel Turnbull, was held on Wednesday to consider whether the market should be allowed to lapse, or whether a properly constructed market should be provided. It was stated that the market resulted in a revenue in the twelve months of considerably over £200 (1900) by various means in Penistone, and that any capital outlay on a new building would ultimately result in a decided net gain to the corporation. On a vote being taken there was a large majority in favour of a market being provided. Seven sites were suggested, but no definite decision was arrived at, and the matter was left for the further consideration of the Urban District Council.

Seasonable Topics.

Even if the calendar did not tell us that September had arrived we should be aware of it, from the indications of the season which Nature gives. The shortening of the days, the ripening of fruit and foliage in orchard and on hedgerow, the chilliness of mornings and evenings, and the occasional frostiness in the air, are all reminders that summer has nearly run its course and autumn is at hand. During the last few days the report of the sportsman's gun has been a familiar sound in the fields, and we are gratified to learn that partridges are strong and fairly plentiful. The sportsmen may indulge in a little grumble about the scantiness of cover, because cornfields are mostly bare stubble, but the farmer has reasons to rejoice over the early harvest and the fact that his wheat and oats are safe in the stack. Indeed, we think that the farming outlook is brighter than it has been in many a September we can recall. At one time earlier in the season it looked as if the fate of farmers hung in a balance, but matters took a favourable turn, and though hay crops were light, we had grand weather for getting it, and those people who have bad hay this year have only themselves to blame. The glorious sunshine suited the corn admirably, and not for years have better wheat, oats, and barley, nor a better harvest-time for getting it in. We feared once for the root crops, but it is surprising how turnips and wurzel have come along of late, and good fields may be seen in most districts. Potatoes promise well; there is a good market for cattle; the reports of lamb sales are encouraging; and wool is up. Surely farmers have been worse off than they are now; and, in spite of what pessimists may say, agriculture is by no means done up in the old country. Foreign competition still stands like a bugbear in the eyes of many, but we cannot do away with it, and the only wise course is to adopt methods by which we can meet it and still hold our own.

September.

* * *

For a long time the hop county has been famous for the breed of sheep which owes its name to the Romney Marshes, of historic fame, and where the natives still talk with some show of pride of the palmy days of smuggling, but of late Kentish sheep have come more to the front than ever. Not only do the animals thrive on their native marsh, but they have proved themselves to be excellent for exportation, and this season Kentish flockmasters have sent rams to the Argentine, Australia, the Falkland Islands, and elsewhere. Abroad the Kentish sheep have earned a reputation for themselves, and the demand for rams is certainly encouraging to the breeders at home. Indeed, all roads are gradually leading to Britain from the countries which raise wool, hides, beef, and mutton, and though these commodities, coming here in such great quantities, may affect the home trade, it is gratifying to know that in order to keep up the standard of their flocks and herds foreign stock-breeders and sheep-rearers can find nothing equal to the blood of British breeds. So far as Romney sheep are concerned, our acquaintanceship with them has been close for some years; and, knowing also something of the best-known breeders in the hop county, we are not surprised that the former are forging ahead, and we have faith enough in the business capacities of the latter to know that they will be equal to keeping the supply level with the demand.

Kentish Sheep.

* * *

It is perhaps the dairy farmer more than any body who is chiefly concerned with aftermaths, and he displays his humanity by longing for continued fine weather till he has finished hay making, and then sighing for rain to set the grass growing again. Of course, this is only natural, for pastures usually get bare during the heat of summer, and meadow aftermaths are relied on to provide juicy grass for the milk supply in early autumn. Some weeks ago considerable anxiety was felt about the slow way grass was growing, but we have had heavy rains since then, and there is now promise of an abundance of keep. Some little judgment is necessary in order to make the most of aftermaths. In certain moist and sheltered meadows grass grows quicker than it does in others, and a little forethought tells the farmer that these should be the first to be cut for hay, as they will quickly recover and provide useful pasture for the stock. In many places grass is none too plentiful just now, but if September is genial we fancy that there will be quite as much feed later on as the stock will be able to keep down.

We recently had a little discussion with a gentleman who farms his own land as to selling all his straw and buying artificial fertilisers, or retaining the straw for the sake of the manure it helps to make, and the question is one of considerable interest. When straw is fetching a good price, those people who have it to sell are naturally tempted to turn it into money, but the question is whether it can be fully and properly replaced by purchasing artificial fertilisers. It seems to us to be a question of moderation. In the first place, we see no reason why one should retain large quantities of straw for the sake of making manure, when a portion of it might be conveniently disposed of, but, on the other hand, we must have manure. After admitting that artificial manures are valuable, the fact remains that dung is indispensable, and the most rational system of manuring is that of laying the foundation with dung and supplementing it with concentrated fertilisers. If one sells off his farm all the material which is essential for making manure, and thinks to replace it entirely with artificials, it is not unlike putting up a building on a weak foundation.

Selling Straw and Making Manure.

* * *

Quite recently another case came before our notice of a number of animals being poisoned by eating yew, and this kind of thing seems to be almost of frequent occurrence. The remedy is simple enough, and it consists of banishing yew trees from fields, woods, and plantations, or any place to which cattle may gain access. In the days of the long bow it was necessary to grow yew in order to obtain arms, but archery is only an amusement in this age, and yew trees can be dispensed with. Of course, there is no need to abolish them entirely, and in a churchyard, for instance, yew trees are in keeping with the surroundings. In private grounds, too, yew trees are in place, but they should never be planted where they may eventually overhang boundary fences and present deadly temptations to cattle feeding on the other side. We know of yew trees growing in clumps in fields and parkland surrounded by loose stone walls, but even this is risky, because walls and fences are always liable to be broken down, and before they are noticed considerable damage to stock may be done. Besides, there are plenty of trees more ornamental than yews that might be planted in such places, and without any risk of cattle being poisoned if they happen to eat them.

Yew Poisoning.

* * *

Though in orchards and plantations in many parts fruit is sparsely represented, blackberries are a full crop, and this delicious fruit is now ripening. In the old days the blackberry was a fruit that anyone was at liberty to pick at will, and the public claimed it as their own; but of late the man in the street has learnt what a tasty fruit the blackberry is, and every year it gets to be more and more a commercial commodity. It is quite reasonable that it should be so, as the blackberry has a delicious flavour of its own, and is useful for jelly-making, preserving, and so on. Should a farmer look upon the blackberries on his holding as a legitimate crop and turn them into money? Judging from the quantities that find their way to London and other great central markets, some must do this, and we know a farmer who tried it with success. At the same time, however, he made a bad name for himself in the vicinity, through forbidding anyone from picking blackberries on his farm. From time immemorial the cottage folk had been in the habit of going where they pleased in search of blackberries, and they resented what they considered to be any interference with their rights. Prosecution for trespass followed, and we draw a kindly veil over the unkind things said about the farmer who only protected what he looked upon as his own. Blackberry pickers in many places are a nuisance, because of their entire disregard for property. Farmers, as a rule, do not object to the poor people picking the blackberries and making a little money out of them, but when they damage the hedges and break fences all to pieces, it is not surprising if the former resent it. This, however, seems to be characteristic of a certain section of the British public, who, when given an inch, are not contented with taking less than a yard.

The Blackberry Season.

Railway Rates for Agricultural Produce.

More Evidence of Railway Managers.

The general manager of the South-Eastern and Chatham and the goods manager of the London and South-Western Railway Companies are among the latest to give evidence before Lord Jersey's Committee as to the way in which they deal with foreign and home-grown agricultural produce for the London and other markets throughout the country.

Mr. Vincent W. Hill gave evidence with reference to the complaints made against the rates of the South-Eastern and Chatham Railway for agricultural produce, and especially with regard to fruit from Kent and abroad. He said they had exceptionally low rates for fruit, and if they were sent in loads of over two tons they were allowed 10 per cent., and over four tons 15 per cent. below their authorised scale. These lower rates for fruit were very seldom taken advantage of. If the fruit growers and others would combine it would be better for them; but they did not like their neighbours to know with whom they were dealing, and in many cases they split up their own consignments and sent them to different salesmen to see who gave them the best price. Their company had very little egg or potato traffic, the great item being fruit.

The fruit brought by them to London was 50,509, of which the Continental fruit via Boulogne and Calais was only 5,952 tons. The Continental fruit almost always came when the fruit could not be produced in England. The rates from Boulogne and Calais were in direct competition with those charged by the steamers running direct to the Thames and the North of England. The rate charged by the steamers running to the North of England affected the rates to Manchester very much. Special boats ran from Boulogne up to Goole, where they got the short railway journey across to Manchester. If they did not give the foreigner a lower rate per mile, but not by ton, the traffic would go by water entirely, and there would be more severe competition with the Kentish growers, perhaps. If the company were to lose the traffic altogether they would have to look round for other sources of income, and in that way the company would have to put up the English fruit rate.

In answer to Lord Jersey, who asked whether the Board of Agriculture might approach the railway companies on behalf of the agriculturist with any special grievance, witness said it would be much better if the farmer himself went to the railway company direct. If the Board of Agriculture went to the railway company for the agriculturist, then every other trader would want a Government department to do the same for him.

Mr. Alfred Malby, the goods manager of the London and South-Western Railway Company, denied that there was any preference given to foreign produce. There was no industry in the country which received such favourable treatment from railway companies as the agricultural interest. The incidence of the railway rates was so small as to have no appreciable effect upon the competition between the farmer and the foreign producer. English agricultural districts did not produce sufficient meat, butter, cheese, bacon, and eggs to supply their own local requirements. The railway companies sent far larger quantities of these articles from London to the country than they received in London from the country.

West of Scotland Agricultural College.

At a meeting of the governors of the West of Scotland Agricultural College, held in Glasgow on Monday, there was much discussion on a recommendation of the Committee on Teaching and Staff that a course of lectures on agricultural law should be instituted, and finally the minute was remitted to the committee, who were granted powers to act in the matter, and advertise for a lecturer. Mr. R. A. Berry, assistant lecturer on agricultural chemistry, and analyst to the department of agriculture, Cambridge College, was appointed to the chair of chemistry at a salary of £300 per annum. Miss Janet M'Naughton, who has acted as interim instructress at Hutton Farm School, was appointed instructress in poultry-keeping at a salary of £80 per annum, with an annual allowance of £10 in lieu of a house.

Mr. Leopold de Rothschild has consented to lay the memorial stone in connection with the extension of the Brentford Fruit and Vegetable Market on September 18. The existing market, which was opened by the then Lord Mayor of London in 1894, cost £15,000, and has proved a profitable investment to the ratepayers. The extensions, which cover over twelve acres, have entailed an outlay of £50,000.

Agricultural Politics.

By a LOBBYIST.

Heaven forfend that the correspondence in the *Times* on the deserted village theme should result in an exodus of the English labourers and a tide of migration to the north. Most assuredly, however, the north is the only apparent abode of bliss for the rural labourer. If Mr. Boyd Kinnear is to be accepted—and we all know him to be a sagacious observer and a capable man—then the lack of rural labour in England is due to the fact that the same conditions are not offered the rural worker here as are offered him in Scotland. "From northwards through Scotland" vide Mr. Boyd Kinnear—there is no such thing as a scarcity of labour. And why? Because the labourer can earn 20s. a week in addition to enjoying a free cottage and garden, while his wife and children can earn half as much again. Beyond that, too, his wages are continuous, and not intermittent. This notwithstanding, Mr. Boyd Kinnear points to the farmer being able to pay out of profits ten per cent. on his capital. Here is a vision of an idyllic life which should quicken every fibre of the British farmer's being. He has only to enable his labourers, with their wives and children, to earn about £2 a week, or rather, 30s. a week plus a cottage and garden, and at once he will re-invoke the roseate day of prosperity! Methinks the English farmer will scarcely care to make the experiment. I fear me that he believes the vista would be closed in by the workhouse.

• • •

I am afraid that we are apt to dogmatise on this question of rural depopulation chiefly for the purpose of showing that we have, as Mrs. Malaprop would have said, a fine command of our oracular tongues—for the purpose of showing that we can summon fine sweltering phrases and sentences from the vast depths of our intellect. What, for instance, does Mr. Munro-Ferguson, M.P., one of the Roseberian esquires of Scotland, mean by declaring that the prime necessity of the hour is that land "should be placed on a natural instead of a sentimental, sporting, or extravagant basis?" for the life of me I do not know. Does this clever politician mean by objecting to a "sentimental basis" that the territorial sentiment should be combated, that the affection, say, of a landlord for maintaining his broad acres should be baffled? Well, if it be so, he may accept consolation from the fact that the process of dispossessing landlordism has set in, and that ere yet even the State may give it an added impetus. Does he mean that estates should not be maintained for mere sporting purposes? Well, if this be the case, the portents of the hour should satisfy him. What does he, however, mean by an "extravagant basis"? And what, too, by a "natural basis"? If by the latter phrase he means that land should be simply regarded and cultivated and maintained for its productivity—a most desirable ambition, I agree; and which the Lowlands of Europe have in some measure shown to be a possibility—he meditates, not a panacea for the present human dearth, but a social and economic revolution. Revolutions cannot be accomplished by rose-water, and economic revolutions are very slowly evolved. What is wanted is labour now—at this very hour, at this very moment. We require to apply a cure now. We do not need one whose effectiveness will be perceived five decades hence.

• • •

Mr. Munro-Ferguson has certainly deftly and ably epitomised a grievous anomaly when he points out that, while we grow timber on two or three million acres at a loss, we import timber (and its products) worth nearly thirty millions a year, the bulk of which could be raised at home had we a large rural population. And despite the talks, Parliamentary and otherwise, which we have indulged in on the wisdom of prosecuting timber culture upon disciplined and scientific lines, not more than a spasm of interest has been evolved. The Board of Agriculture is proceeding in the matter in but a desultory fashion, probably, I opine, because it has no adequate funds or equipment to enable it to proceed in any other manner; the timber trades are apathetic, and the attitude of the general public itself is only one of dull, leaden, obtuse indifference. Even those Socialists who indulged in dreams of the out-o'-works finding suitable, picturesque, and profitable employment in rearing stately oaks, lofty pines, and straight poplars on the derelict lands of England, seem to have abandoned the enjoyment and to have relapsed into acquiescence in the general attitude of inattention. I had hoped for a good deal from the sympathy which the House of Commons in all its sections exhibited when the question was brought before it and the possibilities of timber-culture were faintly outlined; but this sympathy was an evanescent sentiment. What is wanted is that some legislator should adopt this question as his hobby and make himself a nuisance over it. Then our Legislature, which has always a regard for pertinacity, might be induced to a determined appreciation. Timber-culture should be either undertaken or financially encouraged by the State, and it would be a good investment.

• • •

The Hon. T. A. Brassey is somewhat of a wayward politician. An anti-Home Ruler, he wants Home Rule-all-Round; a Chamberlainite, he disagrees with Mr. Chamberlain. His disagreement with Mr. Chamberlain is, however, a practical evidence that there is a growing appreciation of the fact that colonial preference would mean the sacrifice of the British agriculturists. This much Mr. Brassey explicitly and emphatically avows. It would flood the British markets with products grown under favourable conditions that the British farmer can never, under the present economic system, enjoy. The Chamberlain economists—and I in particular refer to Mr. Chaplin—may continue to preserve a systematic reticence in reference to this matter; but their silence has not served to quiet the quaking suspicion that the new ovangel might be a penalty to the farmer rather than a boon, might, in a word, be the very antithesis of that Protection the anticipation of which has so long solaced him. Colonial preference in the eyes of the Canadian colonists means the British markets for the Canadian farmers. This is the absolute fact, and it is no use imagining that purposely-put-on blinkers will blind the vision to it.

• • •

A Liberal Member of Parliament has remonstrated with my persistence in nominating Mr. George Lambert to the Liberal portfolio of Agriculture. In averring that this nomination is by no means assured, he in no wise seeks to minimise the excellent reputation of Mr. Lambert or his practical work on behalf of agriculture. Moreover, he is certain that such an appointment would give unqualified satisfaction to the southern counties, and particularly to Devonshire, Cornwall, and Somersetshire, in whose politics Mr. Lambert is, of course, one of the most picturesque figures. At the same time he declares that it would be an act of ungenerosity and unchivalry to disregard the work of Mr. F. A. Channing. The Member for the Kettering division has certainly been an assiduous spade worker in the cause of rural reform, and, spade worker though he has been, he has also in a great degree been an encouraging standard-bearer. His Bill to which I have so often called attention, may be said to epitomise the Liberal anxiety in regard to agrarian reform. Beyond this he has, by his Land Law Reform Association, sought to permeate Liberalism generally with sympathy with the ambition of agrarian reformers, and has certainly, by means of the same instrument, disciplined the purpose of the Liberal Parliamentarians. All this I freely confess. My anticipation, however, of the selection of Mr. Lambert for the position is based upon the expectation existent within the party. Certainly, were his old friend and admirer, Mr. Seale Hayne, still alive, his prospects of being selected for the portfolio would be even brighter. Mr. Seale Hayne had no significant authority in statecraft, but he had a great influence with his colleagues on the Front Bench of Liberalism.

• • •

"We should have no difficulty whatever in accepting Mr. Rider Haggard as a Liberal, and providing him with a desirable constituency, if his rural purposes were to be the only test. We cannot, however, discount Mr. Haggard from his other professions. He is a well-known Liberal—not the M.P. I have referred to—to me in connection with a suggestion of mine that Mr. Rider Haggard would be a considerable reinforcement to the reform party. Of course, I am not for a moment assuming in this that Mr. Rider Haggard is anxious to be accepted by, or even under any conditions would be accepted by, the Liberal party. What most moved this Liberal politician was the recollection of Mr. Rider Haggard's South African views piquantly and forcefully expressed during the war, and epitomised in his remarkable novel, "Jess." He questioned, too, how far he would be in sympathy with the anti-Imperialistic sentiments of modern Liberalism, and how far he would accept the domination of the extreme teetotallers and the enthusiastic sympathy of the passive resisters. "We all recognise," purused the legislator, "the excellent work he is doing on behalf of our villages, and, in particular, on behalf of the small holders. We cannot, however, afford in our appreciation to plant a thorn in our political side."

• • •

Is there, then, no resting-place for the sole of Mr. Rider Haggard's political foot? Most assuredly the constituencies themselves look askant at the man who has enfranchised himself from the shackles of partyism, the man who says he has a mission beyond the anxieties of whips and organisers and wire-pullers. Not a few of his avowed purposes would be distasteful to old-fashioned Toryism, and Liberals fear that he does not go the whole-hog pathway with them. It may be, of course, that he has convinced himself of the immunity of Parliament, and thinks he can do better work outside its portals. And he would not be altogether wrong. It is, of course, by Parliamentary means we shall secure economic redemption; but it is as well to have a refreshing educational force at work beyond it.

• • •

As I close I read this declaration of Sir Charles Tupper, the eminent Conservative statesman: "Canadians are united in favour of Mr. Chamberlain's policy. In a few years Canada will be able to feed the whole population of Great Britain." And, I assume, will seek to do so by means of a system of Colonial preference. How, then, would the British farmer regard his Colonial and successful rival? Would he give him the smile which he now withholds from the foreign competitor? Would he welcome his own economic undoing because the instrument accomplishing it came from a British Colony in which the Americans are a keen factor, and in which an American sentiment is dominant?

PUBLICATIONS RECEIVED.

Messrs. Webb and Sons' bulb catalogue for 1905 has a tasteful and artistic cover, depicting a Dutch bulb farm and a Dutch maiden. This is printed in colours, and is very effective. Numerous other illustrations in black and white help to make the work an attractive one, whilst the details given are of service to buyers of bulbs.

The receipt of Messrs. John K. King and Sons' catalogue of bulbs, etc., for 1905 reminds us of the approach of planting time for our spring display of spring flowers. As Messrs. King and Sons justly observe in their introductory remarks: "No flowers are more welcomed than those which come after the dark days of winter. They bring with them a sense of joy and gladness, and have been properly named 'The harbingers of spring.'" The catalogue is a neat and well printed publication of 40 pages. It is beautifully illustrated with reproductions of photographs, and, besides containing an exhaustive list of all the best varieties of flower seeds, it has the additional advantage of giving useful hints for their successful cultivation both indoors and outdoors, which cannot fail to be appreciated by the amateur, as well as the professional, gardener.

Midland Notes.

Midland farmers are enjoying a full share of the good things going. There are some quite exceptional crops of wheat to be seen in Warwickshire and Worcestershire, and a good proportion of the harvest has been easily and expeditiously saved, for the beginning was unusually early. In Oxford the first cuttings of wheat were made as long ago as July 21, in Worcester they were but a day later, while reaping was begun in Northampton by July 24, and in Warwick and Salop by the 26th. There was little trouble in the harvesting of these first cut fields, but the gales and heavy rain we have had since, have told their tale, so that much of the later harvested corn will be sadly weather-beaten by the time it is stocked. Oats are another heavy crop in the midland district. A Shirley farmer of long experience told the writer he had never grown such an oat crop before; and there are equally heavy yields elsewhere. Roots, too, are now making up arrears of growth very fast, and look conspicuously healthy and promising.

Midland fruit growers have suffered not a little from the effects of the high winds, and there are bitter complaints to be heard, too, of the ravages of birds. Local fruit growers may, indeed, be readily excused if they fail to cherish the warm affection for our feathered songsters which some well-meaning people demand of them. The trouble started this season with the strawberries; here the blackbirds were the principal offenders. When the raspberries and gooseberries were at their best the same thieves took toll of them, and so did the thrushes; and now come complaints that blackbirds, thrushes, starlings, and sparrows are one and all raiding the apple trees, especially the choice dessert varieties. It is no question of digging grubs out, for all the inside of the fruit is devoured, and the cultivator is left with nothing but the skin, core, and stalk for his pains.

Hop pickers have everywhere a bad name, but those who are now working in the plantations of Worcestershire and Herefordshire have done little to earn their evil reputation, and people like the Rev. George Dunnett, who founded the Midland Mission to the Hop-pickers, and now acts as its secretary, would give them a better character. The slums of Birmingham furnish a certain proportion of the gangs; but nailmakers from Cradley, chainmakers from the Lye, colliers from Tipton, and iron workers from Netherton are the majority. They are a rough looking, unkempt lot. Their language is apt to be "painful and frequent and free," and the railway companies carry them by special trains composed of their oldest and least luxurious coaches. But they are good workers, and adapt themselves surprisingly well to their changed conditions of life. There will be plenty of work for them this season, for the crop is so heavy that in some gardens the wires have given way under their load. But these wet days are miserable for the ill-clad immigrants from the Black Country, and unless there comes a change they will not look back upon the season with any feelings of pleasure.

One has always regarded the colony of lady agriculturists at Studley Castle as such a happy family that the rumours of a rift within the lute have come as something of a surprise. Whatever may be the cause, Miss Bradley (the warden), the two sub-wardens, and five instructors are all leaving very shortly; and it is understood that we may see the seceders embarking on their own account upon a similar enterprise somewhere in the midlands this time, however, pushing the venture somewhat further, and forming a little settlement of women agriculturists who have passed through the college course. Miss Bradley has been the warden of the Lady Warwick College ever since it was started at Reading in 1898; it has apparently thriven in every way under her leadership, and her place may not prove easy to fill. It is to be hoped, however, that the changes may not adversely affect the college at Studley, which has passed the experimental stage, and ought to have a long career of usefulness before it.

That the market gardeners and fruit growers of the Vale of Evesham are amongst the most enlightened and progressive to be found is evidently recognised by the enterprising Department of Agriculture in Ireland, which has been sending a deputation to study local methods. Ireland can learn something from Evesham in the utilisation of every yard of ground, and the writer were much interested at finding how the midland growers worked in catch crops at every opportunity, and took care of their trees by regular grease branching and spraying; they were surprised, too, at the number of small holdings they found, and at the great use made of artificial manures. In their turn, however, the visitors had some hints to give to Evesham, particularly in regard to scientific pruning and systematic spacing of trees. They were able, too, to pride themselves upon the better grading and packing which are being encouraged in the "distressful country." The cheap, square, non-returnable boxes which they are gradually inducing the Irish growers to use might profitably be introduced into the Evesham district.

Fruit Growing in Ireland: Visit of Officials to Evesham.

A party of officials of the Department of Agriculture in Ireland recently visited Evesham to examine local methods of fruit-growing and market-gardening with the view of gaining information which might be of value in the great effort the Department is making to promote fruit culture in Ireland. The party consisted of skilled and trained men employed by the Department of Agriculture in Ireland, and they were accompanied by seven pupils. In conversation with a representative of the *Birmingham Post*, Mr. Moore agreed that in the Evesham district fruit growers were doing by their own initiative much work which was being carried out by the aid of the State in Ireland. There the Department of Agriculture is stocking free of cost, one acre plots on farms with the varieties of fruit best suited to the district, and putting experts in charge of centres to teach proper methods of fruit culture and pruning and the marketing of the produce. Mr. Moore agreed with the suggestion put forward that the Government would be likely to do more for fruit growers in England if the fruit growers themselves would state their wants and bring pressure to bear. He was sanguine of good results from the recommendations of the Departmental Commission on Fruit Culture, but agreed that this depends much upon the fruit growers themselves, who should show that they appreciate the proposals and urge upon the Government the desirability of carrying them out.

The visitors were all much struck with the intensive culture in the Evesham district, the way in which every yard of ground is used, and how catch crops are worked in, and these things Mr. Moore regarded as the most forcible lesson they had learned by the visit. The cleanliness of the trees in the district was remarkable compared with some districts they had visited. Grease branching and spraying were evidently regularly carried out, and these were methods they were trying to make growers in Ireland adopt. They thought that some of the pruning they saw was not first rate, and there was a lack of system, particularly in the old plantations, which were irregularly laid out.

In Ireland they had adopted definite plans for planting. There were definite distances between each tree, and dwarf trees were put in between permanent trees, and would eventually be cut out when the permanent trees were fully grown, leaving them at the proper distances apart. In some of the Evesham plantations the time would come when some of the trees would have to be cut out, and then those remaining would be too far apart. The visitors were much struck with the large number of small holders in the district and with the general use of artificial instead of farmyard manure.

In the Evesham market they were struck with the large amount of produce and the quick way in which it was disposed of. They thought that some of the stuff was rather indifferently packed and not graded, and they attached great importance to proper grading and packing. In Ireland they were trying to substitute cheap square non-returnable boxes of various sizes for the many measures now in use. Mr. Moore said the difference in the price obtained for selected stuff made up in such boxes was astonishing—so much so that the question of the cost of the box was hardly worth considering. In conclusion, Mr. Moore spoke generally in compliment of Evesham methods, and referred to the great interest and value of the information gained.

Importation of Canadian Cattle.—At the annual federation of the Meat Traders' Associations of Great Britain, held in Glasgow on Thursday, a resolution approving of free imports of Canadian cattle into this country was passed. It was stated that a deputation of meat traders to the Minister of Agriculture had received an unsatisfactory reply, and the opinion was expressed that the federation should urge the Canadian Government to induce the British Board of Agriculture to relax the existing restrictive regulations as to the importation of Canadian cattle.

EAST ANGLIAN NOTES.

"Plenty of birds" was the jovial remark made to the writer on meeting his farm friends in Essex, Herts, Cambridge, and Norfolk in the early part of the week, and ocular demonstration as one rushed through the cleared cornfields—although in the Fen district much grain is yet to be drawn home—fully justified the statement. But perhaps the most pleasant sight was the happier look on farmers' faces, for, in spite of the fact that wheat prices have dropped considerably at the different country corn exchanges, the cereals as a whole this season are a satisactory investment, although the barley crop comes out the worst of the three white straw crops. Again, with days of changing winds, bringing welcome rain for the farmers' root crops, we have throughout the Eastern counties the harvest thanksgiving services and the festivities that proclaim the finish of harvest operations.

With the month of September, we may say that the English farmers' year begins, and so it is quite right and natural that ploughing in the stubble and preparing the grounds to receive its seed for the coming season should engage the attention of agriculturists. All over the Eastern counties, therefore, it will not be surprising for our readers to learn, fallow work is proceeding apace with a few intervals, occasioned by downpours of rain that only helped to mellow the dry soil and give the hard-worked ploughmen and their teams a brief period of rest.

Between King's Lynn and North Walsham the writer could not but notice how shallow the ploughmen in that district plough the land as compared with the work done on the heavy lands of Essex. Of course, the explanation is a simple one, but in this connection it may be as well to call attention to the fact, that it is beneficial to deepen the soil on all ordinary land, and the best way is to do it gradually, while the best time to deepen a soil has proved to be, by experience in East Anglia, before it is fallowed or prepared for a root crop. Such land, as a rule, in the Eastern counties, has just produced a corn crop, and so, after harvest, and previous to winter, it should be ploughed about half an inch deeper than usual, so that the lighter-coloured fresh soil will then be completely mixed with the top soil, which will result in the land being enriched in the process of root cultivation or fallowing, and this fresh soil become added to the ordinary soil of the field. In this way a gradual increase of soil is obtained without deluging the top soil with a quantity of unmanured hard subsoil.

Not far from Fakenham, Norfolk, is to be seen a fine crop of maize, and just now the dainty green of its lovely leaves, the luxuriant tints of its stem, and its magnificent tassels undulating in the breeze can explain how Longfellow, in his "Song of Hiawatha," felt when he made that young Indian cry out with rapture on finding "this new gift to the nations":—

> "Maize in all its beauty,
> With its shining robes about it
> And its long, soft, yellow tresses;
> . . . . . Mondamin!"

We know for certain that "Mondamin," the Indian name for maize, was unknown in Europe at the time of the Romans, and by a close scrutiny botanically, "the friend of man," which is the translation of the word Modamin, we cannot but acknowledge that the cultivation of maize in the Old World dates from after the discovery of America.

A very practical and instructive discussion took place at the half-yearly meeting of the Eastern Counties Dairy Farmers' Society, held at Chelmsford, on Friday last, when the Hon. Edward Gerald Strutt, of Whitelands, Hatfield Witham, presided. It was reported, in the first place, that at the present time there was a more hopeful feeling with regard to the price of milk than there was last March, while the hon. sec., Mr. G. Macmillan, stated that steps had been taken by the council with reference to the short weight of wet grains when delivered by the railway company, and mentioned that his own shortage varied from a ton to a ton and a half per six-ton truck. After some discussion, it was suggested that members should only pay carriage for the quantity actually delivered, and the council were empowered to defend any member who was sued by the railway company for any excess of that amount. A specimen calendar prepared by the sub-committee, and which is to be hung in cowhouses, was then handed round for inspection, and a good deal of amusement was created by the question should cows be groomed? And, as it was pointed out that health depended upon milk more than anything else, and they ought, as dairy farmers, to do their best therefore to produce milk under most sanitary conditions, so cows ought to be groomed.

By Lupulin.

The Hop Acreage.

The experience of the 1904 season naturally suggested the probability of a moderate enlargement of the area under hops. The good prices realised in September and October last were very encouraging to planters, as, although the average of the yield was low, there were several gardens that were fairly productive, the money value of which must have been very profitable. Growers are generally optimistic in their views of the future, and there is, perhaps, a tendency to conclude that a successful season is necessarily an indication of the commencement of a series of remunerative years.

Increase of the acreage consequently follows, but I am glad to note that caution is also evident, and the wisdom of this tentative action is proved by our knowledge of the capacity of an area of under 50,000 acres to produce, with favourable climatic conditions, all the hops needed to meet the annual requirements of British brewers.

The total increase of hop acreage, shown by the official returns to be 1,169 acres, is fairly distributed over most of our districts. East Kent has increased by 145, Mid Kent by 181, and the Weald by 488 acres, giving a total for the premier county of 814 acres. Sussex has enlarged to the extent of 173 acres, Hampshire 78, Hereford 84, Worcester 55, and Gloucester and Suffolk 4 acres. The gross increase is, therefore, 1,208 acres; but this figure is discounted by a falling off in Salop and Surrey of 39 acres. The proportionate increase in the several counties is shown as follows:—Kent 2.76 per cent., Sussex 3.86 per cent., Hampshire 4.10 per cent., Hereford 1.24 per cent., and Worcester 1.46 per cent.; the average net increase of the whole being about 2.44 per cent.

The Weald of Kent, with its enlargement of 488 acres, gives the largest proportion, being no less than 5.25 per cent. increase from 1904, and it is notable that, while the other divisions of the county fell off between 1903 and 1904, the hop area of the Weald alone was increased, the addition in this division in two years being 741 acres, or nearly 8¼ per cent. The inference follows that hop growing in the Weald is a satisfactory industry, and, judging by the past, we may expect to see its further development. The present comparison between the southern and the midland districts shows that in the south we have 38,127 acres, and in the midlands 10,841 acres of hop land, the latter representing about 22 per cent. of the whole.

It appears to be conclusive that under the conditions of our open ports, and with the improvements in our methods of cultivation, it is not desirable that our hop acreage should be further extended. It is, indeed, questionable whether the English industry as a whole has progressed in a pecuniary sense during the past ten years. If this be the practical result of our working, our hop farmers should carefully consider their position, and limit their efforts to taking the best possible advantages of the circumstances as they now find them:—

Counties, &c.		1905. Acres.	1904. Acres.	1903. Acres.
Kent ..	East	10,417	10,272	10,478

Home Notes.

Crop Estimates.

are still uncertain, but there appears to be a fair consensus of opinion that, with a continuance of present conditions, a heavy yield is inevitable. With reports of the early pickings before me, added to my own observations during a visit this week to some Mid Kent gardens, I am reluctantly compelled to enlarge any previous average, and to confess my fear that our English crop may approach very near to, and may perhaps actually reach, 15 cwt. per acre. It is usual to refer to the bounteous gifts of Nature as unquestionably beneficial, but in this department of agriculture an excessive harvest is not profitable to the producer, nor is the ultimate consumer of the product advantaged. The intermediate traders are burdened with additional expenses, and their profits are proportionately reduced; therefore I cannot help regretting that our crop prospects as regards quantity are so exceptional. There are, however, some possible set offs, which may yet reduce the final figures. For instance, I hear of important damage done in the Midlands by recent wind and rain. A correspondent writes me as follows:—"Through Leigh and the adjacent lower part of the Teme Valley one hop yard in every four has gone down. Between Ledbury and Hereford, and between Worcester and Leominster it is a rare thing to meet with a grower who has not some of his hops thrown over. The wires in nearly all cases are broken, and some yards have gone down wholesale. One of the largest growers in Worcestershire has lost 25 per cent. of his total acreage." In the South, also, some damage has been done by the gales, the heavy bine being unable in places to withstand the pressure of the combined wind and copious downfall of rain. I hear further from several growers that the hops do not look so well in the cribs as they appeared on the bine, and that in some gardens the weighing up is rather disappointing. It is, therefore, too early to make exact estimates, but I think we must be prepared to face a large output, and can only hope that the requirements of our brewers will be sufficient to counterbalance any tendency to important depreciation of values.

The Borough.

The present atmosphere of our trade is, I regret to say, rather in the direction of panic. Buyers appear to be alarmed, and ridiculous prices are talked about. The few new hops that have arrived are being sold, or, I should rather say, given away, as must be the case when the figures do not cover much more than the cost of picking, drying, and packing. This cannot continue. After the first rush is over, it is hoped that a steadier market will be established, and values settled on a more satisfactory basis. In the meantime quotations are so irregular that it is almost unsafe to name them, and we must wait for further developments before we can speak with any approach to certainty.

Advancement in Hop-Drying.

By the courtesy of Mr. E. Goodwin, of Wateringbury, I have been privileged to-day to examine an installation of the "Sirocco" system of hop-drying machinery, recently erected for him by Messrs. Davidson and Co., Limited, Belfast. The inventor, Mr. Davidson, being present. The whole of the details, both of construction and working, were fully explained. This is no new experiment, Mr. Davidson having been engaged for more than thirty years in the adaptation of the system to the drying of tea in the plantations of India and Ceylon, where several hundreds of these machines have been erected. About three years ago the system was introduced to the English hop industry, and already over 30 important growers can testify to its value by their own experience. Although the process of working is sufficiently simple to be easily comprehended and operated by any agricultural labourer, yet it is somewhat difficult without the aid of drawings to describe clearly the construction of the machine, every part of which has been most carefully considered, the various sections being covered by no less than 22 patents.

The success of the whole design appears to centre in the peculiar arrangement of the "Sirocco" fan, concerning which I heard a pleasant story to the effect that when the fan was shown to an Admiral of the United States Navy, he gazed at it for some time in silent wonder, and, when asked his opinion of its merits, replied, "Sir, I guess it oughtn't to blow, but the dam'd thing does blow." It is simply a framed skeleton wheel, fitted around its periphery with a series of small blades curved in the direction of the revolution of the wheel. An uninformed observer would be inclined to agree with the American Admiral, but contrary to ordinary knowledge of the action of revolving fans, it actually propels a blast of air at a speed of 80 per cent. in excess of the speed of the fan itself, this being accomplished by the exertion of a minimum amount of power. Thus it gives the maximum of efficiency with the utmost economy.

The "Sirocco" being the motive agent, we now seek for the object of its action. This we find in the anterior portion of the machine, which consists of a heating furnace and a suitable arrangement of tubes. The furnace is capable of burning any description of fuel, although, of course, desirable to supply it with material of the highest calorific efficiency. It is so constructed as to be a practical smoke consumer, and is therefore able to render the greatest heat at the lowest cost. The products of combustion, being drawn at the rear of the furnace, pass by way of several chambers, through a double battery of tubes of about three inches diameter, and eventually reach the smoke stack. The passage of the heated gases through the tubes raises the temperature of the latter to about 2,000 degrees. Into immediate contact with the tubes, the outer air is drawn by the vacuum created by the action of the fan, and a continuous current is thus created, which is propelled into the oast at the rate of 25,000 cubic feet per minute, and at any desired degree of heat. It may be added that the fan which does such excellent work is only 45 inches diameter, and requires barely 3 h.p. to drive it at its normal speed of 175 revolutions per minute.

The heated volume of air thus set in motion is conveyed by suitable ducts into the kilns at an average temperature of 130 to 135 degrees with sufficient force to penetrate a load of hops 3 feet deep. For general working a load of about 18 inches deep appears to be the most practicable, and under these conditions this apparatus will supply 4 kilns, each 20 feet square, a total of 1,600 square feet, and will perfectly dry from 2½ to 3 tons of hops per 24 hours.

My available space would be exceeded if I were to describe the various ingenious arrangements made for regulating the flow of air, for ascertaining its temperature at various stages of its progress, for providing against any disturbance of the construction by metallic expansion or contraction, and for the burning of sulphur. But I can confidently refer to the highly satisfactory results of the system. A load of hops taken from the kiln in my presence, by means of Hetherington's Roller Floor, was pronounced to be perfect in wholeness, uniformity of colour, and finished condition. Indeed, I hardly see how it could be otherwise, when the hops had been cured by the action of pure air, only applied at a regular and moderate heat, and had not been disturbed from the moment of their deposit on the floor until the drying was completed. These advantages must be evident to every thoughtful planter, and I am prepared to hear that many orders will be placed for similar installations. In conclusion I am requested to state that the system is applicable to any existing kilns, and that the initial outlay for the plant above described does not exceed £400.

Hop Reports.

The following reports on the hop crop of 1905 have come to hand:—

Messrs. W. H. and H. Le May state: We have, as has been our custom for the last 32 years, made a most exhaustive examination of the hop gardens of Kent, Sussex, Surrey, Hampshire, Worcester, and Hereford, and can only come to the conclusion that England will produce one of the grandest crops of hops ever put upon the market. The majority of the gardens to-day show hops perfect in every particular, being full of lupuline and bright in colour, while the minority may be classed as good copper hops. Seldom indeed have the brewers of England had such an opportunity to replenish their depleted stocks with such fine quality (and there can be no question that their stocks are depleted almost to vanishing point), and we must congratulate them on their good fortune in having so good a supply to draw from. If it had been otherwise, a famine of hops must have ensued, and consequently famine prices, as never before in our recollection has the stock of hops been reduced to so small a quantity as exists to-day. This being the case we trust the consumers will be content to pay such a price as will remunerate the grower for the cost of production, otherwise a considerable grubbing of the plantations will take place.

With the present reduced consumption of hops by the falling-off in the consumption of beer, we have no doubt that England will produce sufficient hops to satisfy the requirements of her brewers until another crop can be placed upon the market; consequently there will be no need to import a single cwt. of foreign hops, as consumers can with confidence rely on the English growth to satisfy their requirements for the year.

Messrs. E. Goodwin and Co., Borough, London, in their annual report of the hop crop of 1905, state: "The hop plant has done exceedingly well this year, and if the weather keeps favourable during the next four or five weeks picking time) it is generally expected that we shall have a large crop of very fine quality, in fact, the

finest for some years, although the latest reports speak of mould in places, but nothing of a serious nature, unless wet and cold nights should set in, and then it would run quickly, and that would reduce both quantity and quality. It is the general opinion that the bumper crop, estimated a month since, will not be realised, as there are reports that some of the bine is blind, and the strong winds of Tuesday last has also done some little damage.

Continental reports all speak of a good crop. American and Californian crops are uncertain, and it is still impossible to place a reliable estimate upon the probable yield. To sum up the position, we should say that the English crop will be above an average one, of exceptional quality, and possibly twice as large as last year's, and as prices are likely to be low, doubtless a large trade will be done, as brewers will not lose this favourable opportunity to replenish their almost exhausted stocks.

Messrs. Pattenden and Smith report as follows: "This year there is a crop of hops in this country which has been grown under the most favourable circumstances thus far, and which promises better brewing qualities than we have had for many years past. There is, as usual, a certain proportion of mouldy pieces, and these the growers will be well advised not to pick. The quantity is variously estimated, but is probably about sufficient for one year's consumption without the aid of any foreign supplies. The brewers have for some time past been suffering from bad trade, and this made itself felt in the very reduced and disappointing demand for hops last year, when consumers preferred to use up all their available stocks rather than increase their holding beyond absolute necessities. We have no hesitation in saying that the brewers in this country as a body have seldom, if ever before, held such small stocks of hops as they do at the present time. This crop, therefore, comes as a great boon to them. That there must be a large demand when full supplies are at market cannot be doubted.

"Last year our clients acted wisely in selling their hops, as the level of values was not a speculative one. This year the situation is very different, and calls for both patience and judgment in marketing hops, for we believe all that are sound and healthy will be wanted, and in our opinion there will be nothing gained by pressing sales before the demand is established. The most effective barrier to foreign competition, short of a protective duty, is a good and sufficiently abundant home-grown article, and this we possess in the present season's crop of hops. The prices for the first pickings are called from 40s. to 80s. There are hardly any ripe hops at market yet."

The following is Messrs. Manger and Henley's report for 1905: "For some years we have had to report that the hops have been suffering from a severe attack of aphis blight. This year, we are glad to say, we hardly remember a crop being grown with less vermin. Very little washing or sulphuring have been done, so the bountiful crop before us has been grown naturally, without the usual trouble and difficulties, and must therefore be of more than ordinary value to the consumer. The very forcing weather in June made the bine grow so rapidly that the joints became very wide apart; this accounts for the long streamers of blind bine and the subsequent heavy head where the cones are fully exposed to the sun, which should give us good quality and flavour. There is not a bad district this year; even those who do not go to great expense have a fair crop, and there will be sufficient for all our requirements without any importations. After five years of decrease in the acreage, reaching the lowest for many years, we have to report an increase of 1,169 acres, making a total of 48,968 acres.

"Other countries seem to be as much favoured as we are. There is a large crop on the Continent, in most districts, and the estimate, as far as it can be believed, in the States of America and the Pacific Coast is 25 per cent. more than last year. Of course, after three short years the stocks in hand must be reduced very much, and we feel confident consumers will see it is to their advantage to secure a full year's requirements under these favourable conditions.

"Brewers have bitterly complained of the slackness of trade in the country and the falling off in the consumption of beer, but we think they will now use more hops, and thus make their beers sounder and more acceptable, and so regain what they have lost; they have a splendid opportunity if the Legislature would only give us a Pure Beer Bill and compel brewers to use hops and malt we would have no more complaints."

The Use of Hop Substitutes.

The use of hop substitutes increases in England but not so in Scotland, for the Aberdeen brewers who tried them a year ago has not repeated the experiment. Hence none were used in Scotland in the past brewing year. They are not employed in Ireland. Of the seventeen tons of substitutes purchased by brewers, one-third went to Derby, one-fourth to Bolton, and one-fifth to Northampton.

Foreign Notes.

America.

Latest cable messages from one correspondent speak of enlarged estimates of the total yield, and consequent lowering of market values, this information being imparted in most confident terms. On the other hand, some friends in California and Oregon stand by their earlier estimates, and predict that the U.S.A. crop will be under that of last year. The barometer of the market, however, tends to confirm the more optimistic reports. There is no doubt that hops can be bought at lower rates, and I accept this as an indication that the crop must be promising to be on the heavier side rather than the lighter.

Nuremberg.

Although within the last few days quotations have advanced by a few shillings, the general tone of the market is inclined towards weakness, being influenced by the favourable crop reports that are arriving from most districts. I hear from one of the most reliable authorities in this city that Bavaria will harvest a heavier weight than last year, and that the Bohemian crop will probably amount to 300,000 cwts., which is a larger production than has ever been experienced there before. From Alsace I have a communication to following effect:—"The harvest of early hops has commenced, and the general ingathering of later sorts will speedily follow. The quality and the quantity promise well, but the traders' estimate of 130,000 cwts. appear to be somewhat extreme; even when the extension of the plantation is taken into account. The rain that has recently fallen may favourably affect the later harvest in assisting the development of the cones, but it will add to the labour of picking and drying. Growers are generally willing sellers, as the condition of their picked hops leaves much to be desired."

Belgium.

The promises of a full yield, both in Poperinghe and Alost are being confirmed by harvesting experience. Prices are consequently lowered, although demand is fairly active.

Storm Effects in South Worcester

Sir,—At the end of July it promised to be one of the earliest and best corn harvests in this neighbourhood that we have experienced for many years, but the high winds and continuous stormy weather has done a great deal of damage, both before the corn was cut and since.

Wheat was beaten down, and was difficult to cut with machine, and shed very much; I never saw the stubbles with so much shed corn and loose straw. Am afraid that it will now thrash out an under average crop.

There are still many fields of spring corn out, and the very heavy rains of Sunday and Monday, with the close atmosphere, has caused it to sprout.

The rain has suited the roots, which may now grow into a good crop, and grass is plentiful.

Fruit is a partial crop, in some places scarcely any, and in other orchards about half a crop.

All stock has done well lately; trade is very bad for beef, but mutton sells well; also good store sheep.

J. W. D.

September 1, 1905.

Essex (Maldon District): Poor Roots.

Sir,—Harvest in this district is now finished, with the exception of a very small minority. There is plenty of straw, which stood up well, both of wheat and barley. Winter oats are good, but spring oats are a very light crop; the corn at places, especially the heavy land, rises rather disappointing, there being a good deal of blight. Everything has been carted in a most excellent condition, it being almost impossible to cart it otherwise.

There is every appearance of an average mangold crop, but otherwise the root crop is very bad, indeed, the turnip crop for many miles around has the appearance of being the worst crop for a great many years, as we have had no rain worth mentioning since the first week in June.

The pastures are very much burnt up, some cowkeepers are already using their mangolds for their cows. Sheep are scarce, wether sheep especially so. Mutton sells well, making 6s. per 8 lb. Beef trade not so good. A good soaking rain is greatly needed. S. R.

August 25, 1905.

Harvesting in Montgomeryshire.

Sir,—The rain last week and the beginning of this has delayed work considerably, but some started to carry on Thursday. Although the rain has hindered some of the harvest operations, it has helped the roots and grass greatly. Partridge shooting was started to-day by several gentlemen in this county.—Yours, faithfully,

R.

September 1.

Hampshire Prospects.

Sir,—Hill farms suffered from a dry June and July, a light hay crop, and roots very backward, many pieces having to be resown, a bad outlook for sheep farming, unless a mild autumn comes on. Wheat good, barley good, oats a light crop. The acreage of barley has gone back very much, and oats increased.

Trade in cattle good, sheep good also; but from all quarters wheat, barley, and oats seem on the drop.

More land than ever is being put to grass. The best way to improve is to look back to 1830-1840, in which period the "tithe was commuted."

J. R.

September 1, 1905.

Season in Wilts.

Sir,—We have had a very favourable season on the whole, and crops are above the average.

Most of the corn is secured in good order, but there is still a little outstanding on most farms. Recent heavy rains, though bad for the corn left out, have done good to grass and turnips, and should benefit the sheep trade.—Yours, very truly,

Will Stratton.

September 1.

Harvest Delayed in Cornwall.

Sir,—Wheat and barley are good crops in this county generally, the straw is not quite as long as it is in some years; but the ear is well filled up, and promises to yield well. Oats in some parts are almost a failure, rust being very prevalent, especially in West Cornwall.

The extremely heavy rains of the last week or ten days have delayed harvest operations, and somewhat injured the corn, especially barley for malting purposes. Roots are very good, much improved since the recent rains. Grass is rather scarce, owing to the very dry time in May and the early part of June.

Fat bullocks have been selling rather badly all the summer, and report says the outlook is not good for beef. Mutton and wool are both selling well, and have been all the season. Pigs have been as high as 10s. per score lb.; but are now down to 9s. per score. We consider the pig trade has been fairly good all the year. Cornwall sends thousands of pigs out of the county every week, and a shilling or two per score lb. makes all the difference between profit and loss to the pig farmers, who mostly live in West Cornwall.

The price of wheat is most unsatisfactory as soon as any new wheat was offered, the buyers dropped the price two or three shillings per qr., and the price is now 26s. 8d. per qr. of 496 lb. Many farmers are obliged to sell at this time at what they can get, some are giving up their farms at Michaelmas, and most of them want money.

The outlook for the coming winter is fair, but not as good as last year. Good stockmen are very scarce, and seem to be more difficult to get every year; wages for good men are high, and all men who are willing to work have plenty of work to do.

September 1, 1905.

Agricultural Colonies for American Jews.

The *Jewish World* states that arrangements are being made in the United States to settle a colony of some 5,000 Jews on 2,000 acres of farming lands in Alabama. The purchase is made by the Independent Order of B'nai B'rith ("Children of the Covenant"), the largest and most representative organisation of American Jews, which was responsible for the monster Kishineff petition some two years ago. One of the activities of the Order is to lessen the pressure in the crowded Jewish quarters of New York and other cities.

Harvest Weather.

1, Essex Street, Strand, Monday, September 4th, 1905.

SPECIAL THREE-DAY FORECAST. GENERAL PREDICTION.

The general conditions are favouring the continuance of Westerly and South-Westerly moderate to fresh and sometimes strong winds, rather cloudy skies and fair spells, especially in the South. Some rain at times, least in the South, Centre and East, most in the North and West. The day-to-day sequence is somewhat uncertain, owing to the numerous small cyclonic systems which are passing Eastwards across our Northern boundaries, but will probably be as follows:—(1) At first cloudy to fair in the Southern half, fair to showery in the Northern. (2) Later, freshening winds and some rain at times, chiefly in the West and North, fair with some showers elsewhere. (3) Finally, showery to fairer generally. Wind chiefly W. to S.W. and then N.W. to W. Temperature milder and more normal than of late.

LOCAL PREDICTIONS.

No 1.—Scotland:—At first, cloudy, some showers, chiefly in the North-East, to fairer. Later, fair to cloudy, some showers in the West. Finally, showery to fairer generally. Wind fresh to strong at times, W. to S.W. and N.W.

„ 2.—England (N.E.) and part of Scotland:—Peebles, Selkirk, Durham, Lincoln, Northumberland, Roxburgh, Yorkshire, (N. & E. Ridings).—**At first, mostly fair with cloud. Later, cloudy and some rain. Finally, some showers to fairer. Wind moderate to fresh or strong. Temperature mild to normal.**

„ 3—England (East):—Bedford, Cambridge, Essex, Hertfordshire, Huntingdonshire, Norfolk.—**At first, cloudy to fair. Later, fair to cloudy and some showers. Finally, some showers to fairer. Temperature mild to normal. Winds as in General Prediction, moderate to fresh.**

„ 4—Midland Counties:—Buckingham, Derby, Gloucester (part), Hereford, Leicester, Northampton, Nottinghamshire, Oxford, Rutland, Shropshire, Stafford, Warwick, Worcestershire, Yorkshire (West Riding).—**At first, fair with moderate Westerly winds. Later, fair to cloudy, some rain, chiefly in the Northern districts, and freshening South-West winds. Finally, some showers to fairer, with North-West winds.**

No. 5.—England (South):—Middlesex, Berkshire, Kent, Surrey, Sussex, Wiltshire, Channel Islands, Hampshire.—**The same as No. 3. Temperature mild to normal and then cooler.**

„ 6.—Ireland.—At first, cloudy, some rain, chiefly in the West. Later, some more general showers Finally fairer, wind S.W. to W. and N.W., fresh on the whole. Temperature about normal.

„ 7.—England (North-West) and North Wales. Cheshire, Lancashire, Westmorland, Anglesey, Carnarvon, Denbigh, Flint, Merioneth, Montgomery.—**At first fair with cloud and Westerly, moderate winds; later, some rain at times, freshening S.W. winds; finally N.W. to W. winds, some showers to fairer. Temperature normal to mild and then cooler.**

„ 8.—England (South-West) and South Wales:—Brecon, Cardigan, Carmarthen, Glamorgan, Pembroke, Radnor, Cornwall, Devon, Gloucester (part), Monmouth, Somerset.—**At first, fair with cloud and moderate Westerly winds; later, freshening S.W. winds, fair to cloudy and some showers. Finally, fairer again with W. fresh to moderate winds.**

One-Day Forecast prepared by the Meteorological Office at 11 a.m. on Monday, Sept. 4th.

GENERAL INFERENCE.—The distribution of pressure continues in an unstable condition, the fall of the barometer in the North-West and West indicating that further cyclonic disturbances are approaching our islands. These are likely to cause unsettled weather and some increase of wind during to-day in Ireland and the extreme West and North of Great Britain, and some showers later in the East and South.

ENGLAND N.E.—South-Westerly winds, light or moderate; fair, then unsettled, with some rain; mild.

ENGLAND, E., MIDLAND COUNTIES, & S. (London and Channel).—Wind backing to South-West or South, light or moderate; fair to-day, some showers to-morrow; temperature about normal.

ENGLAND, N.W. (and N. Wales).—Same as England N.E.

ENGLAND, S.W. (and S. Wales).—Wind backing to South-West and freshening; fair, then some rain.

SCOTLAND N. & E.—Freshening Southerly and South-Westerly winds: cloudy or dull, rain at times; rather cool.

SCOTLAND, W.—Same as Scotland N. & E.

IRELAND, N. & S.—Same as Scotland N. and E.

CORN MARKETS.

LONDON.

Mark Lane, Wednesday.—Wheat: English steady, quiet, late rates. Foreign in very limited demand, at about unchanged prices. Maize: Slow, and 3d easier for American, to arrive; La Plata steady, quiet. Barley: Firmer, with a small inquiry. Oats: Steady, with prices tending in sellers' favour, with a small inquiry.

Mark Lane, Friday. — Wheat: English firm, unchanged prices. Foreign: Sellers still maintain a firm attitude, but buyers do not respond freely. South Russians quoted at 31s 6d to 35s; Plata at 31s to 34s; No. 2 Club Calcutta at 31s; and No. 3 Northern Manitoba at 33s 6d. Flour dull and neglected. Maize dull and easier, with only a small demand. Mixed American, ex ship, quoted at 22s 9d; and La Plata at 22s 9d to 23s. Barley firm; small business passing at full prices; Odessa, Nico, Kherson, landed, quoted at 19s; ex ship; to arrive, at 18s 3d to 18s 6d.

COUNTRY.

Ashford, Tuesday.—Better trade for new wheat, but the weather hinders thrashing and restricts supply. Sales took place at 27s to 31s, or about 1s up on the week. New barley of melting quality offered, but no buyers yet. New oats were unchanged at 14s to 18s. New peas were somewhat cheaper, ranging from 28s to 29s. A few new tares made 6s to 7s per bushel. Maize and foreign corn unchanged on the week.

Banbury, Thursday.—Wheat, red (new), 27s to 28s; barley, 23s to 28s; beans (new), 29s to 30s; ditto (old), 32s to 33s; oats, 18s to 19s; ditto (old), 20s to 22s; peas, 28s to 31s per quarter.

Berwick, Saturday.—Limited attendance, with a few samples of new grain on offer, many of which were affected by the past week's weather. New barley, 21s to 28s; new oats, 19s to 20s 6d; old oats, 21s to 23s.

Birmingham, Thursday.—Good attendance. More English wheat on offer, and making from 28s to 30s per quarter (496lb). Quiet trade for foreign wheat at slightly easier rates; Plate, 31s to 32s per quarter Sharpness; Russian, 31s 3d to 32s per quarter Sharpness; Indian, 30s to 30s 9d per quarter Sharpness. Plate maize, 23s 6d per quarter Sharpness; flat maize, 23s 6d Bristol. Grinding barley 18s 9d per quarter (400lb) Sharpness.

Brighton, Thursday.—Wheat in good supply. Slow trade at late prices. New white wheat, 29s to 30s; new red ditto, 28s to 29s.

Bristol, Thursday.—English wheat in fair supply to-day, price about 28s to 29s per qr., condition generally good. Foreign firm and unchanged. Maize, barley, and oats, all firm at late rates. Flour unaltered in values.—GRACE BROTHERS.

Bury St. Edmunds, Wednesday.—The bad weather of the present week having curtailed threshing operations, a large diminution in the quantity of new corn on offer was very noticeable. Wheats were rather firmer on the week, and reds were worth from 28s to 29s, delivered to mills. Though the barley trade has scarcely commenced at present, some few samples were on offer; the trade was not encouraging, good mediums realising from 26s to 28s, and feeding qualities 23s to 24s. Oats, 17s to 18s per qr., 12 stones. Trefoil in cosh 12s 6d to 13s. Cakes firm. Linseeds £8 5s to £8 10s. Offals scarce and dear, at late prices. Peas 13s to 14s per coomb.

Carlisle, Saturday. — Small supply of oats in our market to-day, quick sale at last week's prices, 18s to 18s 9d per 336lb. No old oats shown. — THOMAS ROBINSON.

Cambridge, Friday.—There was a fair supply of wheat. Trade was quiet, and prices as last week. Red wheat, 27s to 28s, and white up to 30s per 504lb. A small supply of barley, but not much trade yet, and prices are not settled. Beans and oats very firm, and, in some cases, the turn dearer.

Canterbury, Saturday.—English wheat quiet, ranging from 29s to 39s; English oats a better demand, and a shade dearer; new black oats of disappointing quality.

Chester, Saturday.—The quality of this year's grain varies considerably, and prices consequently are irregular. Only the finest lots of wheat and oats realised top quotations. American Indian corn is scarce, and has advanced 3d. per sack. Quotations: Wheat, white, 4s 3d to 4s 6d; red, 4s 2d to 4s 6d per 75lb; barley, grinding, 3s to 3s 2d per 64lb; beans, 5s 9d to 6s per 80lb; oats, new, 2s 2d to 2s 4d; ditto, old, 3s 2d to 3s 4d per 46lb; Indian corn, 13s to 13s 6d per 240lb.

Chichester, Wednesday.—Good attendance and brisk trade. New white wheat, 28s to 29s; new red ditto, 28s to 29s; old white ditto, 34s to 34s 6d; old red ditto, 34s to 34s 6d; grinding barley, 19s 3d; oats, English, 15s 6d to 22s; rye, 21s to 23s; peas, 28s to 31s; beans, 31s to 33s; maize, 24s to 26s; flour, 27s to 29s.

Colchester, Saturday.—There was a fair supply of wheat here to-day, which met a quiet sale at last week's prices. The barley offering shows great variation in quality and prices are very irregular. Beans and peas were in sellers' favour, and not much offered. JOSEPH WILLS AND SON, LIMITED.

Coventry, Friday.—Supply of wheat was fair and sales were effected at last week's prices. Samples of new corn coming in more freely. Quotations:—Old wheat, 11s 6d to 12s per 480lb; new wheat, 10s 6d to 11s 3d per 480lb; barley, 20s to 30s per 448lb; old oats, 25s to 28s per 352lb.; new oats, 18s 6d to 20s per 352lb.; beans, 12s 6d to 13s per 496lb.; peas, 11s 6d to 14s per 496lb.

Derby, Friday. New wheat fetches prices equal to those of last week. Spring corn unchanged. Quotations: Wheat, new white, 28s to 29s; red, 27s to 28s; barley, 24s to 24s; old beans, 34s to 35s; oats, old, 24s to 24s; new, 18s to 19s.

Devizes, Thursday.—There was a small quantity of new corn at market, and the prices show no alteration in value, but wheat is firm, at the full rates of last week. The following were the quotations: Best old wheat, 16s to 17s 6d; secondary ditto, 15s 6d to 16s 6d; new wheat, 15s to 16s; secondary, 15s to 15s 6d; best barley, 29s to [illegible]; secondary, 26s to 27s; rye, 23s to 24s; old black oats, 21s to 22s; white ditto, 20s to 21s; malting barley, 26s to 28s; beans, 16s to 18s; fine flour, 24s to 26s; extra fine, 27s to [illegible].

Doncaster, Saturday. Smaller supply of English wheat due to the unsettled weather and the comparatively late period. Last week's values of 11s per load was the rule. Foreign wheat firm. Oats unchanged. Not sufficient [illegible] to fix prices. Maize firm.

Dorchester, Saturday. Although, with the terminal [illegible] to harvest there was a greatly improved attendance of farmers, samples were not quite so freely offered as previous markets, the compared very low rates now ruling not pressing and special inducement to farmers to bring their wheat to market, especially as most of the grain has been well put together, and there is no immediate reason—except the very important one of a scarcity of cash—for disturbing the stacks so soon; consequently trade ruled steady, and last week's rates about governed the sales transacted, foreign at the same time being very firmly held. Grinding barley was rather against buyers, but malting descriptions, of which there is no lack of good samples being put on the market, only with difficulty maintained their values, and this related more particularly to the bettermost lots. No great demand for any kind of feeding stuffs, the abundance of grass keep everywhere effectually checking sales, but we cannot quote any reduction in values.

Dublin, Friday.—Malting barley, 18s 6d to 20s; oats, 11s to 13s 3d; oatmeal, extra pinhead, 11s 6d to 13s; flour, 11s to 12s 6d; pollard and bran, 6s to 6s 6d.

Glasgow, Friday.—Wheat firmer in tone, sellers asking 1d advance on Wednesday's prices. Flour, however, was quiet and unchanged; Glasgow millers fully employed. Mixed American maize moves in a quiet way at 13s 9d nominal. Grinding beans remain firm, owing to scarcity. Other articles unaltered.

Exeter, Friday.—Good attendance, but trade not brisk. English wheat very plentiful, 3s 3d outside value; foreign wheat unchanged. Not a great deal of English barley on the market, 3s 6d to 3s 9d being quoted for good qualites; foreign barley, 3d cheaper. Maize also 3d cheaper. Oats unchanged. Flour firm; superfine flour, 25s to 28s; fine, 23s to 26s.

Gloucester, Saturday.—English wheat in small supply and prices favour sellers. There is a better tone in the foreign trade, and last week's prices are fully maintained. Grinding barley unaltered. Plate maize 6d cheaper. Oats quiet.—WAIT, JAMES AND CO.

Grantham, Saturday.—Wheat was in small supply, and a fair number of sales were effected at last week's prices. Fair number of samples of new barley, for which inquiries were pretty numerous, but prices are as yet unquotable. New beans changed hands at 30s to 32s, and oats at 16s 6d to 18s 6d per qr.

Hereford, Wednesday.—Rather poor attendance, and small show of English grains. Wheats were quietly steady at last week's figures; round 3s 6d per bushel. Barleys nothing doing. Oats unchanged. Beans in good demand at late rates. Vetches somewhat easier. Wholesale quotations:—Wheat, 3s 5d to 3s 9d per 62lb.; barley, 3s to 3s 9d per 56lb.; oats, old, 2s 6d to 3s per 40lb.; new, 2s to 2s 4d per 40lb.; beans, old, 4s to 4s 6d per 65½lb.; new, 3s 6d to 3s 9d per 65½lb.; vetches, 4s 6d to 5s 6d per 65½lb.

Ipswich, Tuesday.—There was a moderate supply of wheat, the trade being firm at late rates. Prices:—Reds, 29s 6d per 504lb. A few samples of barley on offer, prices ranging from about 26s per qr. Small supply of oats, which made from 17s upwards per 336lb. Maize rather easier. Beans and peas unaltered.

Lincoln, Friday.—Fair show of English wheat in condition hardly equal to last week, but holders were enabled to obtain an advance of 3d to 6d per quarter. Barley trade nominal, maltsters not having yet begun operations. Oats a small show at unaltered rates.

Leeds, Tuesday.—Owing to rainy weather little corn has been gathered during the past week, meantime quality and condition are deteriorating. The trade has inclined to greater firmness, although the demand is by no means active. Both strong Russian and Indian wheats have met a fair sale at full prices; dry English wheats favour sellers, damp lots are neglected. Feeding stuffs unchanged.—DUNNS AND CO.

Leeds, Friday.—New English wheats fully maintain Tuesday's advance with an upward tendency for the best descriptions. No change in old or foreign. English oats, fine, were firmly held, at a slight advance for choice lots. No change in beans, peas, oats, barley, maize, or flour.

Leicester, Saturday.—The delay of threshing operations by the wet weather reduced the supplies of new home-grown wheats, but the samples were in very good condition, and sold freely at the extreme limit of last week's rates, while, in some cases, 6d per qr. advance was established. Red wheats 27s to 29s; white wheats, 28s to 30s per 36 stones. No new barley on offer. New oats of poor quality made 17s to 20s; old oats, 24s to 25s per 26 stones.

Liverpool, Friday.—Wheat: The market has had a small attendance, but wheat receives more inquiry from millers, chiefly for good Russian and Plate sorts, and prices are generally ¼d over last Tuesday. Flour: A very quiet trade at late currencies for both foreign and home-made flour. Maize: Mixed, owing to scarcity of ready stuff and a good inquiry, is firm at ¼d advance; Plate is quietly steady, without change; European sorts are steady, and favour sellers. Barley: Malting is firm, with a better demand; feeding quiet, unchanged. Beans rule very strong, Egyptians being 9d dearer owing to scarcity; Syrians are 6d higher, with a good inquiry. Peas steady, with a moderate demand at last prices. Oats quiet but steady, with a rather better demand. Oatmeal steady, but inactive. Oilcake: A better trade for American linseed; other makes quietly steady at late rates.—SEGAR AND TUNNICLIFFE.

Maidstone, Thursday.—There was a slight indication toward a little more money for wheat, but barely sufficient to note an actual advance; but general opinion is not for a further decline this season. The barley trade fairly good, and business proceeded at quite full terms. Oats remain at former cost, the supply of new English not being large. Beans and peas are without alteration, nor is there any particular change in maize. All other grain much as heretofore.

Manchester, Thursday.—Small attendance. English wheat 6d to 1s dearer on the week, but the advance checks sales. Foreign slow and unchanged. Flour dull at late rates. New English oats easier and in buyers' favour. Indian corn mixed, dearer; Plate easier. Foreign barley ½d to 1d lower. Foreign beans 3d to 6d dearer. Feeding stuffs unchanged.

Newark, Wednesday. Wheat a small show, which sold slowly at an advance of 6d per qr. on the week. Oats and beans repeated former values. Barley, an occasional sample showing, at irregular prices. Quotations: Wheat, 27s to 29s; barley, 24s to 28s; oats, 16s to 17s; new beans, 30s to 31s per qr.

Newcastle-on-Tyne, Saturday.—At to-day's market wheat was firmly held for fully last week's prices; demand, however, was not active. Beans and peas firm at late rates. Maize tending in favour of buyers. Foreign oats 3d to 6d dearer; Scotch, 3d to 6d cheaper since last Saturday. No barley on offer. JOSEPH POLLARD AND [illegible].

Norwich, Saturday. Wheat was only in small supply at our market to-day, with a firm trade at last week's prices, but 3d to 6d per qr. dearer for good conditioned lots. Fair supply of barley on offer, but mostly unripe. The first three days of the past week were wet and boisterous, but it is now finer with higher temperature. Wheat, red, 27s 6d to 28s 6d per qr., weight 63lb. per imperial bushel. Corn inspector's return for the week ending August 26, 1905. Wheat, 4,515; 29s 7d; barley, 739; 25s 3d. J. ARTHUR MILLS.

Nottingham. Saturday. Wheat being plentiful, millers can supply their wants at previous rates. Barley nominal. Oats command full rates. Beans scarcely so firm.—ROBT. HUBBLE.

Northampton, Saturday.—There was a large show of wheat, which commanded a ready sale at firm prices: Wheat, 27s to 28s; malting barley, 26s to 32s; barley, 24s to 26s; new white oats, 17s to 18s; new black oats, 16s to 18s; old beans, 32s; new, 28s to 29s; peas, 27s to 28s; flour, 24s 6d to 28s.

Peterborough, Saturday.—There has not been a large supply of any kind of grain to-day. Wheat was rather slow without change in price. Barley selling irregularly; no general demand at present. Oats firm but quiet.—THOMAS HILL AND SON.

Plymouth, Thursday.—There was a fair attendance on our market to-day. Wheat unchanged. Maize 6d cheaper. Barley 3d advanced. Oats quiet.—ORLANDO DAVIS AND CO.

Preston, Saturday.—During the week the market for wheat has remained firm, and occasionally more money has been paid for some descriptions. American maize continued scarce, and prices are maintained. At this morning's market there was a fair attendance. New grain is making its appearance very slowly, and farmers are not disposed to make sales at much less than the prices of last Saturday, but the demand is limited. Flour unaltered. Quotations:—Wheat, white, new, per windle of 220lb., 12s 9d to 13s; ditto red, 12s 6d to 12s 9d; oats, old, per bushel, 3s to 3s 2d; ditto new, 2s 6d to 2s 8d; beans, per windle of 220lb., 16s 6d to 17s.

Reading, Saturday.—A vastly improved attendance, with increased business, at the following prices: Wheat, 28s to 30s; barley, 24s to 30s; oats, new, 17s to 19s; old, 20s to 22s; flour, 21s 6d to 23s 6d; peas, 28s to 32s; beans, 29s to 34s.

Retford, Saturday. — Only a small supply of new grain. Prices generally were considerably lower. The new wheat on offer was in good condition, and met with a fair demand at 28s to 28s 6d per qr. Very few samples of malting barley on offer, and currencies as yet were wholly unsettled. Maize made 26s to 27s. English beans, old, 35s; new, 32s; and oats, 16s to 17s per qr.

Ripon, Thursday.—A few samples of new oats on offer at full prices, but little business is being done. Local wheat shows no alteration. A fair attendance. New wheat, 27s to 28s 6d; wheat, foreign, 32s to 36s; barley, grinding, 23s to 24s; new oats, 17s, maize round, 25s 6d to 26s 6d; maize, flat, 25s 6d to 26s 6d per quarter.

Shrewsbury, Saturday.—Quotations: Wheat, 14s to 14s 6d per 225lb.; new wheat, 12s to 12s 9d; old white oats, 16s to 17s; new oats, 11s 6d to 12s 6d per 240lb.; peas, 11s 6d to 12s6d per 240lb.; beans, 13s to 14s per 240lb.

Stamford, Friday.—A fair average attendance and a moderate trade. Wheat was held for 28s to 29s; new oats, 16s to 18s; barley, 26s to 30s; beans, 30s to 31s.

Sunderland, Saturday.—Unsettled weather delays farmers threshing, and there was no local grain offering at this day's market. Prices remain nominally unaltered. Arrivals nil.—E. AND F. RICHARDSON.

Tunbridge Wells, Friday.—New white wheat, 30s to 31s; new red ditto, 29s to 30s; barley, 27s to 32s; grinding ditto, 19s to 23s; oats, English, 16s to 19s; rye, 23s to 24s; peas, 31s to 36s; beans, 32s to 36s; tares, 48s to 56s; maize, 24s to 28s.

Warwick, Saturday.—Very little wheat offering, and best samples sell in advance of last week's prices. Very few beans and little barley and oats on offer. Feeding stuffs very firm.

Wisbech, Saturday.—A small supply of grain, after a showery week. Wheat maintained late rates; best reds, 28s to 28s 6d. Oats 16s to 17s 6d. Other articles unchanged.—JAMES FLETCHER.

Winchester, Saturday.—English wheat in fair supply at last week's quotations; foreign unaltered. Barley and maize 6d cheaper, now due. Oats unchanged. Flour rather quiet demand at late rates.—FEAR, COLEBROOK AND CO., LIMITED.

Wolverhampton, Wednesday.—There was a small attendance, and very little business was transacted. Quotations:—Wheat, 14s to 14s 6d per 216lb; English beans, 13s 6d per 196lb.; new oats, 11s to 11s 6d; old oats, 13s to 14s per 196lb

Worksop, Wednesday. A small show of grain. A few samples of new wheat in good condition made up to 28s 6d, wheat in indifferent condition 25s 6d to 26s 6d per qr. A few samples of very good new barley, but they failed to meet with buyers. Oats were very scarce. Prices:—White wheat, 27s 6d to 28s 6d; red wheat, 26s 6d to 27s 6d; grinding barley, 25s to 26s 6d; old white oats, 20s to 22s; new white oats, 16s to 17s; old black oats, 20s to 21s; new ditto, 14s 6d to 16s; maize, 26s to 27s; old beans, 36s to 38s; new beans, 30s to 31s 6d per qr.

Worcester, Saturday.—This week a general start was made with hop-picking, and, to-day, a good many growers were a market with their samples. Trade ruled slow for early varieties and moderate qualities. The few Bramblings on offer sold better. Prices have opened very reasonable, and a brisk demand is expected. Yearlings are inquired for, but are scarce. Some growers have had acres of poles and wirework knocked down by the wind and rain.—CHARLES FARAM AND CO.

Yeovil, Friday.—A fair offer of new season's crop. Samples showedimproved condition and values hardened all round, wheat recovering 6d to 1s of last week's decline. Best samples of home-grown wheat sold at 29s to 32s; secondary 27s to 28s 6d; foreign, 32s to 35s; best barley, 27s to 28s; secondary, 20s to 25s; foreign grinding, 19s to 19s 6d; beans, 32s to 36s; rye, 22s to 24s; old oats, white, 20s to 23s; new ditto, 18s 9d to 20s 9d; old black oats, 21s to 23s; new ditto, 20s to 21s; Irish black, 16s 3d to 17s; tares, winter, 47s 6d to 49s 6d; ditto, spring, 40s to 42s; maize, round, 23s 3d to 25s; ditto, flat, 23s 6d to 25s 3d; vetches, 6s to 7s per bushel. Flour from old wheat firmly held; new produce quiet, trade passing on the basis of 24s to 25s forfine. Bran and pollard down 2s 6d per ton; barley meal unchanged.

York, Saturday.—There were a few samples of new wheat, which was generally in good condition, and sold readily at quite as much money as last week. Fine white, 28s to 29s; red and mixed, 27s to 28s per qr. of 36 stones. There were practically no quotations for barley, the malting season having scarcely commenced. Feeding barley makes 24s to 26s per qr. of 32 stones; new oats, 16s to 17s; old oats, 19s to 21s per qr. of 24 stones; rye, 20s to 21s; old beans, 33s to 36s per qr. of 36 stones.

FOREIGN

Hamburg, Saturday.—Barley: Trade is rather lifeless, as our local maltsters and brewers are little disposed to operate. The quality leaves much to desire; in north of Germany most of the barleys are stained. Bohemians are of better quality, and of this sort fair sales have been made to here, the choice Slovakians are held at former extreme prices, and probably will be wanted a little later on. In Hungary business remains quiet; offers are more freely, but for export, via Fiume, few sales have been made so far.—FRANCIS M. TH. DUHNE.

Hamburg. Saturday.—Weather rainy, endangering the potato crop, which, particularly in the Eastern districts, looks very promising. Market firm for all articles. Quality of the new grain from the Midlands of Germany shows poor quality, and also in quantity it turns out deficient. In the Northern districts it is better. Fine dry new Holstein and Mecklenburg wheat is selling at 30s to 31s; new Saale is held at 31s 6d to 32s per 504lb. f.o.b.; American hard winter No. 2 September October is offering at 30s; 80 Ko fine River Plate on the spot at 30s 3d to 30s 9d per 480lb. Rye firm; 9 25 30 South Russian afloat is held at 25s to 25s 3d per 480lb. c.i.f. Hamburg. Good middling qualities of malting barley are in demand for home use, while high priced Austrian and Hungarian meet less attention. Stout Bohemian is selling at 32s 6d to 33s 6d; Holstein, Danish, and East Prussian at 28s to 32s per 448lb. Fine Bohemian and Slovakian is held at 34s to 36s; best quality at 37s to 39s per 448lb. f.o.b. 60-61 Ko South Russian afloat is taken at 16s 9d to 17s, October November 17s to 17s 6d per 400lb. c.i.f. Hamburg. American mixed maize afloat is offering at 23s, September-October nominally 20s 9d, January 20s 6d, River Plate June-July and August-September 22s 3d per 480lb. c.i.f. Hamburg.—JOHN TATLOCK.

Paris, Wednesday.—There is still little business doing in the provincial markets; offers, however, are more liberal, as threshings are beginning to acquire a certain importance, but the prices asked seem too high, and have consequently checked the demand from millers. At the Bourse de Commerce the approach of settling day has rendered business a little brisker. Offers were fairly regular on the part of some holders of surplus stocks, and prices lost from 10c. to 15c. for flour, and from 5c. to 10c. for wheat. Rye is still devoid of interest, but late prices are maintained. Business in oats is steady, but the tendency is heavy, and prices showed no marked alteration on those ruling yesterday. At the weekly spot market no great change has taken place in connection with home-grown wheat. Generally speaking, farmers seem to have the upper hand, and business, though still steady, is not so brisk as it was; both holders and buyers are eagerly awaiting precise information as to the total harvest yield. Stocks here have increased by 15,640 quarters, and prices have fallen 50c. Business is also small in consumption marks of flour, as bakers, whilst awaiting more favourable prices, are only buying as required. In rye flour the tendency is calm, but prices remain firm, due to the scarcity in offers of the raw material. Prices of rye remain firm, due doubtless to the scarcity of offers, whilst the demand is regular.—*Dornbusch.*

THE BALTIC.

The cargo trade at the close of August was flat for wheat, but since September came in business has been better. Prices realised have included 33s. per 492 lb. for fine Russian Winter, 31s. 6d. for Odessa Ghuka, and 30s. 6d. for Taganrog, 29s. per 492 lb. for Roumanian, 33s. per 480 lb. for fine South Australian, 32s. 3d. per 500 lb. for Californian Blue Stem, 31s. per 500 lb. for Walla Walla, 30s. per 480 lb. for Bahia Blanca, 29s. 3d. per 472 lb. for Entre Rios, and 31s. 4½d. per 480 lb. for the New Manitoba crop, best quality October shipment.

Maize has kept at a fair price. Two cargoes of American on passage have made 22s. 4½d., and one of Argentine has fetched 22s.: in each case the weight is 480 lb. to the quarter.

Barley has lost ground. A cargo of Californian has been parted with at 24s. 9d. per 448 lb., and Russia is pressing sales of grinding corn at 18s. per 400 lb.

Oats have been quiet, but 14s. 6d. per 320 lb. has been made for new American crop October shipment, and 13s. 6d. per 304 lb. for Petersburg continues to lead to business.

Linseed has made 38s. per 410 lb. for a cargo arrived from India, 37s. for two cargoes (416 lb.) on passage from Argentina, and 40s. 6d. per 424 lb. for a Russian cargo. A cargo of Poppy-seed sold for 37s. 3d. per 377 lb. on Friday for November shipment from Bombay.

The London Corn Trade Association C. F. and I. quotations for the settlement of rejections and difference in weights on wheat under Rule No. 4 of the Association East Indian Wheat Contracts are as follows:—No. 2 Club Calcutta 31s., Soft Red Calcutta 29s. 6d., Bombay Soft White Delhi 31s. 3d., Karachi Soft White Delhi 31s. 3d., Soft White Karachi 30s. 3d., Choice White Karachi 30s. 9d., Soft Red Karachi 30s. (all per 492 lb.).

The arrivals of grain and seed-laden vessels at Ports-of-Call for the week were 2 wheat, (1 Bahia Blanca, 1 Buenos Ayres)

The sailings of grain and seed-laden vessels from Ports-of-Call for the week were 6 wheat (1 Antwerp, 3 Cardiff, 1 Liverpool, 1 London), 3 linseed (1 Antwerp, 1 Bristol. 1 Sharpness)—Total 9.

Since January 1, 1905, the total arrivals have been 269 wheat, 2 flour, 2 wheat and oats, 1 wheat and linseed, 1 flour and wheat, 13 barley and wheat, 8 barley, 5 maize, 1 beans, 4 locust beans, and 46 linseed—Total 352.

Last year during the same time the arrivals were 203 wheat, 1 wheat and maize, 32 barley and wheat, 16 barley, 4 maize, 4 beans, 4 locust beans, 1 rye, 29 linseed, and 1 canaryseed—Total 295.

Review of the British Corn Trade

DURING THE PAST WEEK

Written exclusively for the Mark Lane Express.

August was not quite up to an average temperature, and there was decidedly less sunshine than usual. There was also less wind, but the rainfall at several of the chief stations exceeded, on average, the fall from the 24th to the 30th often being larger than on the other 25 days of the month. As the great bulk of the wheat and oats had been secured before the 24th, the heavy rains since then have done no extraordinary amount of damage to these two crops. Barley will not have sustained any reduction of yield, but quality and fitness for malting will, one fears, have been rather gravely affected, the more so as the rains which had spared East Anglia up to the 24th travelled eastward on the 25th and 26th, giving to Norfolk, Suffolk, and Essex an inch and a half of rainfall on the 27th, 28th, 29th, and 30th ult. Better weather has prevailed in the "granary of England" since Thursday morning, but there is little sun to dry the saturated and uncarted sheaves. Tares and rye are at least average crops; often they are ten per cent. over average, and there seem to be no absolute disappointments. Beans have made much "straw," and are also frequently a good yield to the acre of the actual pulse. Peas are not quite so satisfactory.

When will America enter the arena as a really serious shipper of grain? This is the inquiry which is heard on every market. At present the exports are a great deal below the average, but prices of wheat for October shipment are decidedly below the spot values, and the finest North-Western Patent Flour is offered for Michaelmas shipment at 27s. per sack, after being held on Mark Lane from 30s. 6d. to 31s. from Midsummer to the end of the cereal year. It is probable, therefore, that October will see a brisk business in American wheat and flour for the first time for many months. English farmers have been far from wise in accepting less than 30s. for their wheat, but they will certainly have been able to place a good deal of corn before the American food crop of 1905 gets into motion. Canada, Manitoba, and the two new provinces, whose capitals are Alberta and Regina respectively, are credited with record wheat crops. Figures from the Dominion are apt to require considerable adjustment; in fact, on the last ten years they have shown a statistical want of accuracy second only to that of Russian returns. At the same time, we have reason to believe that the largely-increased area of wheat in Canada will prove a record yield even on an average production per acre.

The highest price made for English wheat in the cereal year just closed was 32s. 3d. on July 15, the lowest accepted was 27s. 1d. on August 26. A gradient of 5s. 2d. is shown, which is about an average, a five-shilling range marking a year of neither stagnation on the one hand nor excitement on the other. In 1901 value only fluctuated a florin, and holders must have had an unprofitable time of it, with warehouse charges at anything from 6d. to 1s. 6d. per qr. per month, according to the town and warehouse. In 1898, on the other hand, prices ranged 22s. 8d., and nearly a sovereign of this was in a period of four months.

The highest price made for English barley in the cereal year was 26s. on June 17, the lowest accepted being 22s. on August 5. A range of 4s. is about 1s. less than usual.

The highest price made for English oats in the cereal year was 19s. 7d. on July 1, and the lowest quotation was 15s. 8d. on October 14; the range of 3s. 11d. which this indicates is a little less than in most years.

Ten cereal years' averages for English produce are as follows:

	Per Qr.
Wheat	27s. 3d.
Barley	24s. 1d.
Oats	17s. 1d.

The quantity of wheat on passage at the beginning of a new cereal year is 400,000 qr. less than an average, and the absence of Californian is a remarkable feature.

WHEAT ON PASSAGE

	Quarters.
1 Sept., 1905	2,160,000
1904	2,560,000
1903	1,671,000
1902	1,624,000
1901	2,280,000

The expectations of foreign flour are singularly small. The usual total in the last 25 years of the old century was half a million sacks.

	Sacks.
1 Sept., 1905	144,000
1904	200,000

Of barley there is rather less than usual on passage, but the deficiency is nothing like so marked as in the case of flour.

	Quarters.
1 Sept., 1905	296,000
1904	440,000

Of oats the quantity on passage shows a great increase, Russia being a very free shipper and England apparently as free a buyer.

	Quarters.
1 Sept., 1905	525,000
1904	70,000

Of maize expectations are heavy; they were so a year ago, and they are still heavier now.

	Quarters.
1 Sept., 1905	1,340,000
1904	950,000

Other expectations on September 1, 1905, were linseed 210,000 qr., cottonseed 21,000 tons, and rice 28,000 tons.

The sales of English wheat at the statute markets for the cereal year ended August 31, 1905, were 1,747,000 qr. (in round numbers), and the average of 52 weeks' sales was 30s. 7d. per qr. The sales of English barley were, at the same statute markets, 3,142,000 qr., and the average price for 52 weeks was 24s. 5d. per qr. The like figures for oats were 1,179,000 qr. at 17s. 1d. per qr. For the preceding cereal year figures were wheat 2,130,000 qr. at 27s. 3d. per qr., barley 2,781,000 qr. at 21s. 11d. per qr., and oats 1,133,000 qr. at 16s. 5d. per qr.

Imports of the United Kingdom last week were as follows:—

Wheat, 523,000 quarters; a very large supply.
Barley, 79,000 quarters; a small arrival.
Oats, 119,000 quarters; a fair arrival.
Maize, 345,000 quarters; exceptionally large supplies.

Of flour the quantity imported equalled 58,925 sacks, or not much more than a third of the average expectations.

Imports of the United Kingdom for the cereal year ended August 31 last are returned as follows. These figures are the addition of 52 weeks' returns, and are always liable to slight correction. On the other hand, the mistakes discovered in the course of a year are never serious, and are practically always due to the shipowners returning "quarters" as "cwts.," or the like. Such mistakes are soon adjusted, but not in time for the weekly returns which the Custom House now publishes with exemplary promptitude on Saturday night, the figures being up to the same day at 2 p.m.

Coming, then, to the actual figures as they are at present before us, we get the following totals:—

	Quarters.
Foreign wheat	24,523,000
Foreign flour	3,646,000
Breadstuffs	28,169,000

In the previous cereal year the figures were:—

	Quarters.
Foreign wheat	21,532,000
Foreign flour	6,436,000
Breadstuffs	27,968,000

The imports of spring corn for the cereal year were:—

	Quarters.
Barley	5,839,000
Oats	6,324,000
Maize	9,917,000

While for the preceding cereal year they had been:—

	Quarters.
Barley	8,719,000
Oats	5,568,000
Maize	11,924,000

The salient features of the above returns are:—

(1) A startling increase in the imports of wheat pretty fully balanced by reduced imports of flour. This argues an exceptionally prosperous twelvemonth for the home mills.

(2) Increased use of foreign, chiefly Russian, oats.

(3) Reduced supplies both of foreign barley and of Indian corn.

Linseed shipments for the eight completed months of 1905 have been as follows:—

From India, 1,260,000 quarters, of 410lb.
From Argentina, 2,810,000 quarters, of 416lb.
From Russia, 150,000 quarters, of 424lb.

It will be seen that the usual method of adding these totals together and saying "Linseed shipments, 4,260,000 qr." is not quite accurate, the weight of all these qrs. differing. The necessity for uniform weight, preferably the cental or true hundredweight, is nowhere more manifest than in the seed trade. All the above linseed shipments are smaller than for the like eight months of last year.

Prices for linseed and cottonseed show a decline of about 3d. per cwt. on the week, and the new cereal year has opened with only a small inquiry for oil seeds. Owing to there being no plethora of offers, values are maintained for rape seed, poppy seed, and sunflower seed. Indian linseed makes about 39s. per 410lb., Argentine 38s. per 416lb., and Russian 42s. per 424lb. There are sellers of Indian and Argentine cargoes at a somewhat lower price.

Last week 17,000 qr. of linseed and 10,000 qr. of rapeseed were shipped from India, and 32,000 qr. of linseed from Argentina.

TO-DAY'S MARKETS.

MARK LANE, MONDAY, September 4.

[FIRST REPORT.]

The market to-day was a little stronger for English wheat, decidedly so in the case of all samples that had escaped the effect of the recent rainy weather. Foreign wheat was steadier for Indian, but quiet for other descriptions. Barley was rather cheaper for Russian and Turkish sorts. A few lots of new English malting worth 32s. to 33s. were offered, but the majority of samples were below a thirty-shilling level, albeit of fair weight. There is a good deal of discoloration, and other samples are rejected as "harsh." New English oats were in increased supply, and the price asked being very moderate, a good trade was done. More demand was also experienced for Russian kinds, for which full prices were paid. Peas were 3d. dearer for Indian, otherwise there was no change in that staple. Beans were steady. New tares gave satisfaction, and made a fair price. Maize declined 6d. per qr. for all sorts; the large quantity on passage is telling on the spot trade. Oil-cakes were firmly held; there being rather more inquiry in London and also in Hull.

CLOSE OF THE MARKET.

THE MARKET CLOSED WITHOUT CHANGE FOR ANY LEADING STAPLE. THERE WAS A FAIR RETAIL BUSINESS PASSING.

THE FLOUR TRADE.

MARK LANE, MONDAY, September 4.

London Town Whites and Town Households were 6d. per sack cheaper on the week. Country flour was a good sale at the decline quoted on Monday last. This brought prices down to so low a level that an excellent inquiry was stimulated. There were a good many bakers represented on the market to-day, and a good many visitors were up for the show at Islington. American flour declined 6d. per sack for fine sorts, but first bakers' grades were already low in price, and consequently did not call for any fresh modification. Of Argentine flour only a small quantity of the fancy type was on offer. London took so kindly to the supplies of Argentine flour earlier in the year that it is somewhat strange how shipments have fallen off. Australian flour continued to be offered at a low price without attracting much notice. Hungarian flour declined 6d. per sack. French flour was not quotably cheaper, but sales at currencies were very difficult to effect.

LONDON TERM MARKET.

This market is open to elected members only, and is held at the Baltic Club St. Mary Axe. No business except for future delivery is done, and the smallest quantity that can be purchased is 1,000 quarters, or 4,800 cental.

Prices quoted on Saturday at the close of the week's trade were :—

WHEAT (per cental).

No. 2 American Red	6s. 7d.	Sept. delivery.
,, ,, ...	6s. 6d.	Nov. ,,
,, ,, ...	6s. 6d.	Jan. ,,
,, ,, ...	6s. 5d.	Mar. ,,

MAIZE (per cental).

American	4s. 9d.	Sept. delivery.
,, ...	4s. 8d.	Nov. ,,
,, ...	4s. 8d.	Jan. ,,

The Term Market this morning opened steadily, with American Red Winter wheat offered for October delivery at 6s. 9d. per cental, and with American maize at 4s. 10d. per cental for September delivery.

HOPS.

W. H. and H. Le May, 67, Borough, London, report the market is now well supplied with new English hops, which are being taken freely at the low prices current. Choice hops are selling cheaper than we have known before in the opening week of the season.

GRAIN AND FLOUR FACTORS REPORT.

Flour.—The tendency of prices is rather lower, although American millers make no change in offers. Grain.—Indian corn is now plentiful at 13s. 9d. per 280 lbs. Plate maize is easier at 14s. 3d. per 280 lb. Oats very dull, stocks being heavy and new oats offering more freely. Barley being dear on spot is only in small demand. Pease quiet. Beans strong, both on spot and for shipment. Oilcake unchanged. Mill stuffs. Bran is rather firmer, and Thirds, especially Fine Thirds, are in active demand, values respectively 82s. 6d., 85s., and 107s. 6d. per ton.—MCKINNON AND MCDONALD (Glasgow).

Flour.—Demand only moderate, and prices remain unchanged. Offals.—Prices of bran continue steady, with a fair demand. No new feature to report. GREENHILL BROTHERS (Belfast).

Milling Offals.—There is no change to record, and millers keep clear at current prices.—JOHN BAWCOMB AND CO.

Flour has met a fair demand to-day at fully last week's prices.—T. S. MEDILL AND SONS, LIMITED.

The demand still drags on for trifolium, rape, mustard, and rye. Prices firm. Winter tares coming out more freely find buyers at the reduced prices asked. There is no speculation in spring sowing seeds.—JOHN PICARD AND CO.

Wheat supplies are moderate. Market quiet, and late prices are unchanged. Flour sells slowly at late rates. No change in price of maize, barley, and oats.—COVENTRY AND CO.

FEEDING STUFFS.

Mark Lane, Monday.—Linseed cake: Although prices remain firm, the consumptive demand is small as usual at this season of the year. Both for decorticated and ordinary cotton cake the demand is slow.

ROBERT AND JOHN HEWETSON.

THE BALTIC, 1 p.m.

STATE OF TRADE.

Wheat to-day is rather steadier from Saturday, and there is an improved enquiry for the 200 to 500 ton part-cargoes known as "parcels." For maize prices are unaltered. Barley cargoes are rather weak. Oats are well held. There are no changes in prices for linseed cargoes; but peas are 3d. dearer from Saturday.

BUSINESS DONE.

WHEAT.—White Kurrachee, 30s 9d per 492lb., prompt shipment; Red Kurrachee, 30s 3d per 492lb., prompt shipment; White Calcutta, 31s 3d per 492lb., prompt shipment; No 1 Northern Manitoba, 21s 6d per 480lb., October shipment; No. 2 Northern Manitoba, 30s 6d per 480lb., October shipment; No. 3 Northern Manitoba, 29s 6d per 480lb., October shipment; Roumanian, 29s per 492lb., September shipment; Walla Walla, 31s per 500lb., September shipment; Blue Stem, 32s per 500lb., September shipment; Rosario, 29s per 480lb., September shipment.

MAIZE.—Argentine, 22s 6d per 480lb., September shipment; American, 22s 6d per 480lb., September shipment.

BARLEY.—Azoff, 18s per 400lb., September shipment, Roumanian, 26s 6d per 424lb., September shipment.

OATS.—Vologda, 14s 6d per 304lb., September shipment; Petersburg, 13s 9d per 304lb., prompt shipment.

BEANS.—Smyrna, 32s per 480lb., October shipment.

PEAS.—White Calcutta, 28s 9d per 504lb., October shipment; Green Calcutta, 23s per 504lb., October shipment. Green Calcutta, 23s 3d per 504lb., December shipment.

LINSEED.—Argentine, 37s 3d per 416lb., September shipment.

RAPESEED.—Ferozepore, 34s 6d per 416lb., September shipment.

COTTONSEED.—Egyptian, £5 8s 9d per 2,240lb., on passage.

CATTLE.

Metropolitan Market, Islington.

	Monday, Sept. 4, 1905. British.	Total. Sept. 5, 1904.	Monday, Sept. 5, 1904.
Beasts	1,089	1,089	1,260
Sheep and Lambs	5,100	5,100	5,400
Calves	10	10	5
Milch Cows	20	20	20

Quotations per 8 lbs. (sinking the offal).—

ENGLISH

	Inferior.	Second	First
Beasts	3s 10d	4s 4d	4s 6d
Sheep	3s 8d	4s 8d	5s 10d
Lambs	4s 10d	5s 4d	6s 2d

Milch cows, per head, £16 to £21.

British arrivals included as follows: Scotland, nil; Eastern Counties, 57; Midland, Home, and Western Counties, 932; Devon, 5; Ireland, 69.

In the beast market to-day the supply compared with the previous Monday showed a decrease of 210 head, principally composed of Midland Counties cattle. Trade for best prime and second quality fat beasts was of a very sluggish nature, with a downward tendency in regard to value, though barely sufficient to enable us to quote it so. The arrivals from Ireland to-day consisted of 37 Dublins and 23 Waterfords, for which, however, there was a very limited enquiry. Fat butchering cows and bulls in slightly larger numbers, also shared in the general depression of trade, late currencies being barely maintained. A clearance is extremely doubtful.

The following are top quotations per 8 lb. (sinking the offal):—

	To-day.	Monday, Sept. 5, 1904.
Black Polled Dublins	4s 5d	-
Devons	-	4s 6d to 4s 7d
Herefords	4s 4d to 4s 6d	4s 6d to 4s 8d
Runts	4s 0d to 4s 4d	ex 4s 6d 4s 6d to 4s 7d
Lincolns	3s 8d to 3s 10d	4s 0d to 4s 4d
Irish	3s 10d to 4s 2d	-
Fat Cows	3s 4d to 3s 6d	3s 6d to 3s 8d

To-day's supply compared with the corresponding day last week showed a decrease of 100 in the number of sheep and lambs penned. For all descriptions of both Downs and Halfbreds trade ruled fairly firm and steady, last Monday's valuations governing all sales. On the other hand Irish sheep met with little or no enquiry at less money. Scotch also shared in the generally better trade, all on offer being disposed of early in the day at late rates. Lambs greatly in excess of the enquiry, but no lower rates however being quotable. A clearance in this part of the market is fully expected.

Undermentioned quotations are at per 8 lb. (sinking the offal), and are for the best of each class penned:—

	To-day.	Monday, Sept. 4, 1905.
7½ to 8 st Downs	5s 8d to 5s 10d	5s 6d to 5s 8d
9 st Downs	5s 6d to 5s 8d	5s 4d to 5s 6d
10 st Half-breds	5s 4d to 5s 6d	5s 2d to 5s 4d
10 st Irish	4s 10d to 5s 0d	5s 0d to 5s 2d
10 st Down Ewes	4s 2d to 4s 4d	3s 10d to 4s 0d
11 st Half-bred ditto	3s 10d to 4s 0d	3s 6d to 3s 8d
5 st Down Lambs	6s 0d to 6s 2d	5s 10d to 6s 0d
6 st Half-bred ditto	5s 10d to 6s 0d	5s 8d to 5s 10d

Calf trade not worth noting or quoting.

No pigs on the market.

London (Central), Monday.—Good supplies. Trade quiet. Beef, Scotch, 3s 10d to 4s 6d; English, 3s 6d to 3s 8d; American, 3s 9d to 4s. Mutton, Scotch wethers, 4s 6d to 5s 4d; ewes, 3s 6d to 3s 8d; English wethers, 4s 4d to 5s; ewes, 3s 2d to 3s 6d. Lamb, Scotch, 5s to 5s 4d; New Zealand, 3s 2d to 3s 9d. Veal, 2s 6d. to 4s 4d. Pork, 4s to 5s per 8 lb.

St Ives (Hunts), Monday.—Beasts 161, sheep and lambs 1,385, pigs 345, beef 7s 3d to 8s, mutton 7s 7d to 10s 6d, lamb 9s to 10s, pork 6s to 6s 6d, fat cattle, sheep, and pigs, and store sheep and pigs, good demand; store cattle fair demand, milch cows short supply, prices £14 to £22.

FOREIGN.

Deptford, Monday.—Beasts, 1,757. To-day's supply of beasts, compared with Monday last, showed an increase of 1,089 head, but did not include all arrivals, 150 States and 400 Canadians being held back for Wednesday next. To-day's arrivals consisted of 1,024 from the United States and 713 from Canada, trade for which was decidedly slower than on Saturday last, with a reduction in value to the extent of 1d to 2d. Quarter-ots of States, 3s 10½ to 4s; 10Os., 3s 9½ to 3s 10½; 9-st. Canadian 3s 10d; 12-st. 3s 8d. On Saturday 1,692 beasts were shown, consisting entirely of shipments from the United States. Trade throughout the day ruled firm, with a good finish, best being quoted at 3s 10d to 4s 1d per 8lbs.

Liverpool, Monday.—Supply of cattle was about same as on Monday last, demand fair but prices unchanged, sheep shown in much larger numbers, finished quality, handyweights, in good demand at higher prices, lambs fair trade at slightly easier rates, beef sixpence farthing to fivepence per lb., mutton eightpence halfpenny to sixpence, lamb eightpence halfpenny; total at market 1,145 cattle and 9,869 sheep.

GAME AND POULTRY.

Smithfield, Saturday.—Trade dull for native short supplies. Prices: Young partridges, 4s 9d; old partridges, 3s 6d; young grouse, 4s 6d to 5s 6d; old grouse, 3s to 3s 6d per brace; goslings, 5s to 6s; country dressed fowls, 2s to 2s 6d; Aylesbury ducks, 2s 3d to 2s 9d; Surrey fowls, 2s 8d; to 3s 6d; Lincolnshire fowls, 2s to 2s 9d; Essex fowls, 2s 3d to 3s; Irish fowls, 1s 6d to 2s 3d; Russian fowls, 1s 6d to 1s 9d; wild ducks, 1s 3d; widgeons, 1s to 2s 3d; snipe, 6d to 9d; black game, 2s 9d; pheasants, 1s to 1s 9d; feathered pigeons, 9d; bloomed pigeons, 9d to 1s 2d; English hares, 2s 3d to 2s 6d; Scotch hares, 1s 6d; leverets, 1s 9d; tame rabbits, 2s 4d; wild rabbits, 8d to 10d; live hens, 2s to 2s 6d each. Australian rabbits, 6s to 7s 6d per dozen; venison, haunches, 1s 3d each; forequarters, 2d per lb.

PROVISIONS.

London, Monday.—Bacon: The arrivals of bacon last week were from Ireland, 1,924 bales, and from foreign ports 10,677 bales. The bacon market was steady but quiet last week, influenced by heavy Danish arrivals, and reported large killings. Prices range—Irish, 58s up to 67s up to 71s; Danish, 56s to 64s up to 70s; Canadian, 58s to 60s up to 65s and quoted 68s. Butter. The butter market was quiet, and in some cases easier. Prices ranging: French, 98s to 110s; Danish, 102s to 110s; Russian, 90s to 102s; Irish, 98s to 112s; Canadian, 98s to 112s; Australian, 108s to 116s; American, 98s to 104s. Lard: The lard market was quiet, at advanced rates:—Irish, 50s to 54s; Danish, 52s; American, 41s to 43s.

LIVE STOCK AND MEAT TRADE REVIEW

(Written Specially for the "Mark Lane Express.")

Trade in London.

Trade for fat beasts of both prime and second quality at Islington was of a very slow and dragging nature, especially for the latter descriptions, rates ruling in favour of the buyers to the extent of fully 2d. per 8 lb. The majority of the consignments, as usual at this season of the year, consisted of Herefords and runts from the Midland counties, including a few choice Devons, which sold fairly early in the day at about last week's values. Ireland also was very fairly well represented, the supply comprising 62 Dublins (10 of which were black polled beasts) and 21 Waterfords. No store cattle on the market. These also shared in the general depression of trade, meeting a loss of 2d. per 8 lb.

At the Foreign Cattle Market, Deptford, trade opened slow at the commencement of the week, with a slight decline in value. Towards the latter end, however, it brisked up a trifle, rates ruling in favour of the sellers. The total number offered for sale at both markets was 4,360, as against 5,340 during the previous week, consisting of 1,300 British (increase, 175) and 3,060 foreign (decrease, 1,155). These latter comprised 2,870 from the United States and 190 from Canada. The following were the top rates obtained per stone (sinking the offal):—80 to 90 stone Devons, 4s. 6d.; 90 to 95 stone Herefords, 4s. 6d.; 95 stone runts, 4s. to 4s. 4d, ex. 4s. 6d; 100 stone shorthorns, 3s. 8d. to 3s. 10d.; 110 stone ditto, 3s. 6d.; 80 to 90 stone black-polled Dublins, 4s. 4d. to 4s. 5d.; 95 stone ditto, 3s. 10d. to 4s 2d.; 90 stone States, 3s. 9d. to 4s. 1d.; 95 stone Canadians, 3s 10d; 90 stone fat cows, 3s. 6d.; fat bulls, 2s 10d to 3s. 3d.

The sheep trade at Islington on Monday last was of a decidedly firmer and steadier nature, at an advance of from 2d. to 4d. for ewes and 2d. per 8 lb. for wether sheep. Scotch descriptions also were fairly steady, and shared in the generally better tone of the trade. On the other hand, Irish sheep met a very limited demand, salesmen having to accept a decline of 2d. to effect sales. Lambs were in average supply, but more than sufficient for the demand. No quotable decline in value, however, can be recorded. On Thursday all sales were governed by Monday's quotations.

At Deptford throughout the week 200 sheep were offered for sale. The total number penned was 7,810, as against 9,630 during the previous week (decrease, 1,820), the supply composed entirely of British. Best pens made per 8 lb. (offal given in), 7½d. to 8 stone Dawns, 5s. 10d; 8 stone Scotch, 5s. 8d. to 5s. 10d; 9 stone Downs, 5s. 8d.; 10 stone Irish, 5s. to 5s. 2d; 10 stone Downs, 5s. 6d; 10 stone half-breds, 5s. 4d. to 5s. 6d.; 10 stone Down ewes, 4s. 2d. to 4s. 4d.; 5 stone fat Down lambs, 6s. to 6s. 2d.; 6 stone half-bred ditto, 5s. 10d. to 6s.

Calf trade very slow. Best on offer to dress from 144 to 166 lb., and were quoted at 5s. to 5s. 4d. per 8 lb. (sinking the offal).

No pigs on the market.

Trade in the West.

Now that the harvest is practically at an end, we may expect to see a little revival in trade, which for some time past has been far from what could have been desired—at least, from a seller's point of view. Barreners are a bit out of season just now; still they can hardly reconcile themselves to the present poor run of prices, even for animals that promise well, few of which now make over from about £26 to £27 per pair. Store sheep, though buoyed up by an exceptional shortage all over the country, are hardly making the prices expected, in view of the improved keep prospects in many parts of the country. Prices, however, are keeping fairly steady, without any distinct advance. In the absence of any very great demand for any particular class of stock for butchering purposes, prices all round are showing but very little, if any, change. Well-finished steers and heifers command attention at from 11s to 11s. 6d. as a general run, 12s. being occasionally reached for very choice weights; fat cows and other secondary qualities are much slower of sale at 9s. to 10s. or 10s. 6d.; heavy bulls, 8s. to 8s. 6d. Calves are about holding their own; but that is all that can be said, and 5d to 6½d may be quoted as a very extreme price, plenty of plain veal selling from 6½d. to 7d. Attention in mutton is largely confined still to wethers, which bring now from 7½d. to 8d., and seconds 7d.; young ewes also make 7d. to 7½d., but coarse old sheep make a very disappointing 5½d. to 6d.; choice lamb occasionally makes 10d. per lb., though a more average figure may be given as 9½d to 9d. The pig trade keeps remarkably buoyant with prices in no way showing the least approach to weakness.

Trade in Scotland.

The number of fat cattle on offer has been under an average. Everything of good quality met an active trade at an advance of about 15s. per head. Secondary cattle were also the turn dearer. A fair show of fat cows, and they made rather less money. Fat sheep in moderate numbers, and these made an advance of 1s. per head. Fat lambs also met a good market at last week's prices. A large and exceedingly good show of fat calves, which met a similar trade to last week. Fat pigs scarce and dear. There were rather fewer store sheep on offer, for which a better demand was experienced, and a good clearance was effected at hardening prices. Store cattle are still shown in small numbers. These have met a rather better inquiry, and a nearly total clearance was effected. A very large and exceedingly fine show of milch cows, for which a fair trade was got at high prices for the best class. Quotations:—Top price of best cattle per live cwt., 39s.; current from 35s. 6d. to 36s. 6d.; mutton to 9½d. per lb.—John Swan and Sons, Limited.

Trade in Ireland.

The Dublin market last Thursday was supplied moderately, and for the primer sorts of cattle values were from 10s. to 20s. a head better, but middling and coarse beasts were hard to clear, especially the latter. For choice heavy-weight bullocks and heifers fit for the London and Glasgow markets competition was much healthier than for some time past. Extreme rates were more frequently realised, and an upward tendency was noticeable. This revival is attributed to the scarcity of cattle of high quality, and it is thought may be likely to continue to the end of the season. Official returns show that there is a deficiency of over 33,000 head of cattle in Ireland as compared with 1904, and this, of course, must make a great difference. Coarse beasts and dairy cows, however, showed little or no improvement, and the general opinion is that these classes will become weaker and weaker, in face of the immense importations of frozen beef with which they have to come into competition. For the week ending August 26 the quantity of frozen beef landed at English ports was over 111,000 cwts., or nearly double that for the corresponding week of 1904. Prime ox and heifer beef sold at from 54s. to 56s., and for extra quality up to 58s. per cwt.; good second-class beef from 47s. to 52s., and inferior from 45s. to 46s. 6d. per cwt.

Notwithstanding the increased supply of sheep, trade in the mutton department was firmer and more encouraging than for some time past. Wethers and ewes of the best description were briskly inquired for home consumption at prices in advance of last day, and the shipping trade was also better by from 1s. to 2s. per head for nice hoggets suitable for the English Midlands markets. Supply of such was short of the requirements. Lambs were in good demand, and those of good quality changed hands briskly. Prime wether mutton was sold at from 7d. to 7¾d. per lb.; ewe, 6d. to 7d.; and rough sheep from 5d. per lb. upwards. Heavy hoggets sold at from 44s. to 56s. each, and light to medium ditto from 32s. to 42s. Lambs averaged from 20s. to 28s. each, but large fat brought from 30s. to 45s. each. Well-fed veal calves were in good request at from 7½d. to 8½d. per lb., but lower-grade calves were neglected.

The trade for milch cows was active, particularly for choice and secondary qualities, which were wanted by English buyers, who were in large attendance, and sold at improved prices. Some choice springers were sold at from £18 to £21, other sorts at from £9 to £16. Store cattle are still a quiet trade, but the late heavy rains will doubtless soon bring about a reaction. Some large and satisfactory sales of ewes have lately been held in Dublin and other parts. Though the supply of pigs was small, the market was of a very dragging nature, although there was a good attendance of cross-Channel buyers, but home dealers were poorly represented. In the early morning prices gave way about 4s. per cwt. A clearance was effected with difficulty. Nice light-weight pigs sold at from 48s. to 51s. per cwt. Coarse pigs from 36s. per cwt.

LONDON.

Islington, Thursday.—The supply of beasts consisted of fat butchering cows and bulls from the Midland Counties, business for which ruled slow but steady at recent currencies. Rough cattle, however, proved difficult to vend at a reduction of 2d per 8lb; inferior, 2s 10d; seconds, 3s 6d. Sheep were fairly plentiful, and for Downs and half breds trading was firm, with last Monday's quotations fully maintained; inferior, 3s 8d; seconds, 4s 10d; firsts, 5s 10d. Lambs had an inactive session, with a downward tendency in values; inferior, 4s 10d; seconds, 5s 9d; firsts, 6s 2d. Quotations: 7½ at to 8st Downs, 5s 10d; 8st Scotch, 5s 8d to 5s 10d; 9st Downs, 5s 8d, 10st 5s 6d; 10st half breds, 5s 4d to 5s 6d; 10st Down ewes, 4s 2d to 4s 4d; 5st fat Down lambs, 6s to 6s 2d; 6st half-bred, 5s 10d to 6s. Calves, though scarce, had an indifferent demand; inferior 3s 6d, second 4s 8d, first 5s 4d. Total supplies:—Beasts 30, sheep and lambs 1,830, calves 30.

London (Central), Friday. — Supplies were on a heavy scale, for which a fair demand again prevailed at firmer prices. Beef arrivals included 70 tons Scotch, 610 Liverpool sides, 2,500 hindquarters, and 1,650 forequarters American refrigerated, also 800 Argentine chilled hindquarters. Quotations:—Beef: Scotch short sides, 4s 4d to 4s 6d; long sides, 3s 10d to 4s; English, 3s 6d to 3s 8d; American Deptford-killed, 3s 4d to 3s 7d; Liverpool sides, 3s 2d to 3s 5d; American refrigerated hindquarters (best), 3s 9d to 4s; forequarters, 2s 4d. to 2s 6d; New Zealand hindquarters, 2s 3d to 2s 4d; forequarters, 1s 7d to 1s 8d; Argentine chilled hindquarters, 2s 10d to 3s. Mutton: Scotch wethers, 4s 6d to 5s 4d; ewes, 3s 6d to 3s 8d; English wethers, 4s 4d to 5s; ewes, 3s 2d to 3s 6d; New Zealand, 2s 6d to 3s; River Plate, 2s 5d to 2s 6d; Dutch wethers, 4s 4d to 4s 8d; ewes, 3s 4d. Lamb: Scotch, 5s to 5s 4d; New Zealand, 3s 2d to 3s 9d; Dutch, 4s 8d to 5s. Veal: English and Dutch, 3s to 4s 4d. Pork: English, 4s 4d to 5s; Dutch, 4s to 4s 6d per 8lb.

COUNTRY.

Ashford, Tuesday.—Beasts of fair quality made up to 4s 8d per stone, and cows about 4s. Prime beasts were very scarce. Down wethers fetched 5s 2d to 5s 10d, and small Kents up to 5s. Old sheep neglected. Veal unchanged at 5s 6d as top price. Large pork and small roasters alike made 4s to 4s 2d per stone.

Basingstoke, Wednesday.—At Raynbird and Sons' sale-yard there was a fair attendance of buyers to meet a supply of 45 fat beasts, 56 calves, 589 fat sheep and lambs, 216 pigs, and 147 head of dairy and store cattle, for which the following prices were realised:—Grass and cake-fed shorthorn steers made up to £20, heifers £19 10s, and extra fat cows £16, Galloway cows and heifers up to £15, young bulls up to £13 5s, fat calves 70s to £6 10s, small 20s to 55s, fat porkers 25s to 54s, store pigs 15s to 21s, dairy cows £8 10s to £18 5s, prime quality fat Down wethers and ewes made from 52s to 60s, small 46s to 48s, cross-bred 46s, old ewes 28s to 38s, eight months' old Down lambs 40s to 48s, small 35s to 38s, Down ram lambs 46s to 63s, three months old sucking Down lambs 30s to 40s, small store Down lambs made 29s, and ditto crossbreds 25s. The prime quality beasts of moderate weight were cleared at late rates, but secondary and inferior cattle met a slow demand, with receding prices. Fat sheep and lambs met a good inquiry; a clearance nearly made, and prices maintained. With a shorter entry of milch cows on offer prices ruled higher for all descriptions. Store cattle met a clearance, with more inquiry. Fat calves were a brisk trade at late rates. Fat pigs of all classes sold readily, with a quick trade. Store pigs also were in demand. Ruling values:—Prime fat beasts, 6½d to 7 per lb; secondary ditto, 6d to 6½d; bulls, cows, and inferior, 5d to 5½d per lb; best fat sheep, 8½d to 9d; secondary ditto, 7½d to 8d; old ewes, rams, and inferior, 6d to 6½d; choice fat lambs, 9d to 10d per lb; fat calves, 6½d to 8½d per lb; fat porkers, 9s 6d to 10s 6d per score.

Berwick, Saturday.—Another holiday market, only 13 beasts being offered. No demand.

Birmingham, Thursday.—Small supply of beasts, sheep, and pigs; good trade for pigs; fair trade for beasts and sheep. Beef, 5½d to 6½d per lb.; a few Herefords 7d per lb.; mutton, 6½d to 8¾d per lb.; lamb, 8d to 9d per lb.; bacon pigs, 10s per score; cutting pigs, 9s 10d to 10s per score; sows, 8s per score.

Chester, Thursday.—There was a small supply, and trade was quiet. Milch cows, £17 to £21; calvers, £14 to £18; barrens, £10 to £12; heifers, £9 to £14; stirks, £6 to £10. Sheep were in good supply, and fetched from 18s to 34s each.

Bristol, Thursday.—Beef was in moderate supply, and the trade was slow. Best qualities made 58s; secondary, 55s. There was a fair supply of sheep and lambs, and trade was quiet. Best light Downs fetched 8d to 8½d; light wethers, 7¾d; heavy wethers, 7d; ewes, 6d. Lambs sold slowly at 8d to 9d. Pigs were in short supply, baconers making 9s and porkers 10s 3d. Three hundred store cattle were on offer, but there was scarcely any demand.

Calne, Friday.—Present prices for prime pigs, in lots of not less than ten, on rail within 100 miles of Calne.

Prime Stores.	Thickness of fat in any part of Back.	Price per Sc. s.	d.
6sc. 10 lb. to 9 sc. 10 lb...	2½ in. and under	9	0
Under 10 sc.	Not exceeding 2½ in. ...	9	0
Under 11 sc. 10 lb. ...	2¾ in. ...	8	6
Under 12 sc.	3 in. ...	8	0

C. and T. Harris and Co., Ltd.

Canterbury, Saturday.—Small supply sheep. Good breeding ewes, 42s 6d to 47s 6d; old sheep, 22s to 38s; lambs, up to 27s; heifers, with calves, averaged £13 10s. Wool little business doing; Kents, 1s; halfbred, 1s to 1s 0½d; Downs, 1s 1d.

Carlisle, Saturday.—Between 200 and 300 Irish store heifers on the sands, chiefly of a good stamp. Buyers were rather scarce, and trade ruled slow at £7 10s to £10 10s for wintering heifers, and £12 10s to £15 10s for the best descriptions for finishing-off purposes.

Chichester, Wednesday.—The best dairy cows and heifers continue in good demand at late prices. Fat cattle sold firmly at recent currencies. There is not yet much inquiry for store cattle. Quotations:—Prime Devon steers, 4s 4d to 4s 8d; prime Southdown wether sheep, 6s 4d to 6s 6d; prime West Country wether sheep, 5s 8d to 6s; fat ewes, 4s 4d to 4s 8d; veal, 4s 6d to 5s; porkers, 3s 8d to 4s. Stock at market: Cattle, 473; sheep, 4,771; pigs, 667; calves, 154; horses, 13; total, 6,078; tolls, £32 8s.

Colchester, Saturday.—There was again a poor supply, and no lamb was offered. Grass beef sold at from 4s 4d to 4s 6d per stone; mutton, 5s 6d to 6s; and pork, 8s 6d to 9s per score.

Dorchester, Saturday.—Moderately good all round supplies came to hand to-day, especially of store sheep, of which special sales were held by both Messrs. Enson and Son and also by Messrs. Duke and Son, and a good steady trade ruled throughout for most kinds of stores, which well maintained their values throughout to, in some cases, a slight improvement. Milch beasts, next to the store sheep, attracted most attention, and prices generally ruled against buyers, best heifers making £17 to £20 10, and other milch beasts £11 to £16; barreners, £16 to £24, the latter being the best price; bulls, £8 to £15. Fat heifers met a fair consumptive trade at from £14 15s to £21 each; steers, £18 10s to £21 10s; and cows, £11 to £16. Fat sheep sold at about late rates; ewes, 40s to 48s 6d; wethers, 46s to 49s 6d; and lambs, which are not a particularly good trade, 28s to 32s each (or 9d to 9½d). Mutton generally sells from 6½d to 8d per lb for best wethers and beef 10s to 11s; very choice steers or heifers, 11s 6d.

Dublin, Thursday.—Numbers in market: Beasts, 3,074, decrease 161; sheep, 9,144, increase 186; calves, 46, increase

11. Choice bullocks were scarce, and in good demand at somewhat better prices. Other classes met with fair competition, and an early clearance was effected, but without change in last week's quotations. Sheep easier sold. Best fat lambs in request at late rates; middling and inferior getting out of season. Cattle, live weight (best), 29s to 32s per cwt; secondary and inferior classes, 26s to 28s per cwt; mutton, dead weight, 5½d to 7½d per lb.—GANLY, SONS AND CO.

Edinburgh, Wednesday.—There were larger supplies of cattle. Polled bullocks sold from £13 to £13 10s; shorthorn cows, £22 to £24 10s; and crosses, to £21. A small supply of sheep, with a good demand. Cheviots brought 30s to 37s; half-breds, 34s to 38s; and lambs, 24s to 28s.

Glasgow, Wednesday.—Market steady, with supplies abundant. Sheep sold at late rates, although the numerous stock sales earlier in the week told against the demand. Scotch cattle again scarce and dear. Middling qualities difficult to cash. Top Scotch cattle, 62s to 64s; secondary, 57s to 59s; top Irish, 58s to 60s; Canadians and States, 56s per cwt; home sheep, 8½d to 8¾d; lambs, 8½d to 9d per lb.

Exeter, Friday.—Large supply of beasts, and prices showed a downward tendency, only exceptional quality making 11s 3d per score. Very large supply of sheep of all kinds. Rather better class of wethers, which sold at from 7½d to 8d per lb.; fat ewes, 6d. Slack inquiry for breeding ewes, 36s to 43s; fat lambs, 10d; calves, 7½d.

Gloucester, Saturday.—Messrs. Bruton, Knowles and Co. report their sales as follows:—70 head of cows and calves and in-calvers with a fair trade. Heifers and calves to £23 5s; cows and calves to £20 15s. A fair supply of store cattle with bad trade. This was the annual sale of rams, ewes, and lambs. A few rams changed hands at good prices. A smaller supply of ewes and lambs than usual, met a very good trade, and all were sold; ewes to 49s 6d, lambs to 32s 6d. A good number of buyers went away disappointed.

Hereford, Wednesday.—There was not an over-supply of beef, and trade continued firm. Best heifer and bullock beef realised 6½d to 7d per lb; cow beef, 4½d to 5d per lb. Calves a small supply, and sold dearer than last week, making 7½d to 8d per lb. Sheep also a short supply; wethers made 8d per lb, and ewes 6d per lb. Lambs moderate supply, and in demand, making 8½d per lb. Porks made 5½d per lb, trade being firmer, and bacons 5d per lb. Slow trade for store stock.

Leicester, Saturday.—With greatly improved pastures there were larger consignments of home-bred stock. Trade slightly brisker at firm rates. Choice milch cows, £20 to £22; good do. £17 to £19; inferior, £14 to £16; Irish bullocks, £13 to £15 5s; Welsh cattle, £9 to £13; calves, 15s to 35s per head. Sheep were a good supply, and sold freely at very high prices, breeding ewes making 40s to 48s, and lamb hoggs 30s to 38s.

Lincoln, Friday.—Poor display of store beasts, and a slow trade was experienced. Cows, £18; lambs, 28s to 34s each.

Lynn, Tuesday.—Average show of fat beasts; firm trade; 7s to 7s 6d per stone. Few store beasts, very little trade, £6 to £12 each. Average show of fat sheep, firm trade, 9s to 9s 6d per stone. Store sheep, 38s to 44s; store lambs, 25s to 30s; fat lambs, 25s to 40s each.

Manchester, Friday.—Beef: Firsts, 5⅜d; seconds, 4¾d to 5d; thirds, 3¾d to 4d. Mutton: Firsts, Scotch, 7¼d; others, 7¼d; seconds, 6¼d to 7d; thirds, 5¼d to 6d. Veal: Firsts, 6¼d; seconds, 5½d to 6d; thirds, 4¼d to 5d. Bacon pigs: Firsts, 5¼d; seconds, 5d to 5¼d; thirds, 4d to 4¼d. Porket pigs: Firsts, 6¼d; seconds, 6d to 6¼d; thirds, 5¾d to 6d. Lamb: Firsts, 7¼d; seconds, 6¼d to 7d per lb.

Nottingham, Saturday. — Large supply of stock all round. In-calf cows realised £18 to £21, and in-calf heifers, £15 to £16. There were no sheep or pigs on offer.

Norwich, Saturday. — Trade firm for fat beasts, the supply of which was equal to home requirements; firm demand at 7s 6d to 8s per 14lb. All store cattle offered were Irish beasts, which met with a slow demand at £5 to £16 per head; lambs made from 25s to 35s per head; and breeding ewes, 35s to 65s. Fat sheep made 9s 6d to 10s 6d store. Good supply of fat pigs, and prices hardened to 6s 3d to 6s 6d per stone, with an extra 3d for best quality. Good show of store pigs, which met with ready sales at increased prices.

Preston, Wednesday.—Moderate show of cattle, and as trade showed no improvement prices ruled in favour of buyers. Calves were in better request. Prices:—Cows and bulls, 5d to 5¼d; heifers and bullocks, 6d to 6¼d; hoggs, 8d to 8¼d; lambs, 8¼d to 8¾d; ewes, 6d to 6½d; tups, 5d to 5¼d; and calves, 6d to 7¼d per lb.

Retford, Saturday. — An extremely small supply of store stock, and with a thin attendance the business was restricted and prices low. milch cows making £15 to £18; steers and heifers, £10 to £12; yearlings, £5 to £7; and calves, 35s to 40s per head.

Romford, Wednesday.—Fat beasts were in short supply and trade very slow. Best animals, 4s to 4s 6d; middlings, 4s to 4s 2d per stone. Calves scarce, but trade was a little better at 5s to 5s 2d per stone. Average supply of sheep; trade about the same. Best sheep, 5s 4d to 5s 6d; middlings, 5s to 5s 2d per stone. The trade for ewes was a little better at 4s to 4s 2d per stone. Very few lambs on offer; slow demand at 5s 8d to 6s per stone. Very slow demand for store beasts. Pig trade rather better.

Thame, Tuesday.—Messrs. Bond and Burrows had a large entry of all descriptions of stock on Tuesday last, with the usual attendance of buyers from the neighbouring towns. Clearing trade ruled throughout, more cattle being disposed of than in any previous market this season. Fat cows were decidely firmer. Best beef still continues to sell satisfactorily. Sheep were not up to the usual quality, although nearly every lot was disposed of. Pigs still continue scarce and dear. Weaning calves are now coming to hand in larger numbers, trade for which was good. This firm's sale comprised 149 beasts: Bullocks, £16 to £21; heifers, £14 to £22. 260 sheep: Ewes to 46s 6d; wethers to 54s 6d; lambs to 35s. 90 calves: Weaners, 30s to 63s. Pigs, 70: £2 to £5 10s.

Wolverhampton, Wednesday.—Fewer animals offered and better demand. Prices: Beef, 5d to 6¾d per lb; mutton, 6¼d to 8¼d per lb; veal, 6d to 7d per lb; lamb, 8d to 8¼d per lb.

Worksop, Wednesday.—Small supply of stock. Trade very brisk for mutton and lamb. Best beef, 7s 3d to 7s 6d; secondary, 6s 9d to 7s per stone. Best Southdown wethers and cross-breds, 8d to 8¼d, and in a few instances up to 9d; lambs, 9d to 9¼d per lb.

York, Thursday.—There was a very poor trade in store cattle, all the interest being in the first of the sheep fairs, fully 10,000 sheep being penned. There were no English store cattle on offer, and only a few pens of Irish, for which there was little or no inquiry, there being very few buyers present. Calving and milch cows were an average show, but met with a bad trade owing to the absence of buyers. Many lots remained unsold. About the highest price paid for good young animals was £20, but most of the sales were made at £15 to £18. There were plenty of buyers in the sheep market, and trade was good for anything in good condition. The best twice-crossed shearlings made up to 50s; others, 44s to 48s; Masham shearlings, 40s to 45s; North country lambs, in small offer, met with a middling trade at 26s to 29s; South-country lambs, to 34s. There was a very large display of West-country lambs, which made 28s to 31s each. A few North-country ewes were on offer, and made up to 44s each.

Yeovil, Friday.—Good demand for milking beasts and in-calf cows and heifers, best descriptions of which sold at from £19s to £22 5s; secondary, £16 10s to £18 10s; barreners made £13 to £15 5s; yearling steers, £6 17s 6d to £9 15s; two-year-olds, £10 to £11 15s; yearling heifers, £7 5s to £9 10s; two-year-olds, £9 15s to £11 5s; three-year-olds, £12 to £15; ewe sheep, 42s to 47s 6d; wethers, 42s 6d to 55s; lambs, 30s to 37s 6d.

FEEDING STUFFS.

London, Thursday.—Linseed. The market continues very dull and there is scarcely any demand except to cover; closing values are: Calcutta London Spot 38s., and July-August 38s., August-September 38s., September-October 38s. La Plata: July-August 37s. Hull: Dull, scarcely any business possible. La Plata spot 37s., passage 37s., August-September 37s. 6d., September-October 37s. 3d. Rapeseed is steady, but quiet, with scarcely any alteration in values. Brown Cawnpore, September-October, 34s. 6d., Brown Calcutta, September-October, 34s. Cottonseed has been been very quiet; prices for crop are rather easier. London—Passage £5 11s 3d, September £5 11s. 3d. sellers, September Fayoumi £5 17s. 6d. sellers,, November-January £5 17s 6d. Hull—Spot, passage and August £5 7s. 6d. and £5 8s. 9d., September £5 10s.; September Fayoumi £5 16s. 3d., November-January £5 16s. 3d. Linseed oil remains quiet but steady. We quote spot and month in pipes £17, barrels £17 5s., September-December £17 17. 6d, January-April £17 12s 6d. Hull naked spot, £16, September-December £16 10s., January-April £16 12s. 6d. Rape oil steady. Brown oil naked in all positions £19 15s. Refined £22 10s. in casks. Ravison oil £18 17s. 6d. naked nearest value on the spot, and £18 5s forward. Oil Cakes.—Linseed Cakes.—Firm. London made £7 15s. and £7 17s 6d. Cotton cakes firmer. London made £4 12s. 6d. and £4 15s.—THE PRODUCE BROKERS CO., LIMITED.

Hull, Tuesday.—Linseed.—The arrivals of linseed for the week ending August 25, are: 25 qrs. from Harlingen and 6,730 St. Petersburg; total, 6,755 qrs. The shipments for week ending August 25 are: Calcutta, 8,000 London, 1,000 Continent. Bombay, 8,000 Continent. Plate, 8,000 Hull, 13,000 orders, 11,000 Continent; total, 49,000 qr. Linseed has been depressed throughout the week. River Plate: Spot nominal; afloat and to September-October, 37s 6d; October-November, 37s 9d. Duluth: October-November, 38s 6d. Cottonseed.—There has not been much doing since our last, and prices have favoured buyers. Old crop Egyptian sold at £5 8s 9d to £5 7s 6d on spot, £5 8s 9d passage, and £5 10s, September. New crop has scarcely been dealt in, with sellers, September Fayoumi, at £ 5 17s 6d and £5 16s 3d coupled, and November-January £5 17s 6d. A few second-hand lots of Bombay, spot and afloat, done at £4 12s. 6d., and £4 13s 9d accepted September-October, £4 15s. to £4 14s 6d, December-January, which are the nearest values to-day. Russian hemp.—Although prices continue quite as firm, if not firmer than previously reported, a little more business has been done during the past week Operations seem more restricted, owing rather to the difficulty of obtaining hemp than by the prices asked. Hemp tows: There is very little offering, but quotations are unaffected by the dulness in transactions.—KEIGHLEY, MAXSTED, AND CO.

Mark Lane, Monday.—Linseed cakes: The demand generally is very disappointing, but supplies are limited and, consequently, values are not any easier since last week. Russian find most favour and can be bought on last week's terms. American unchanged. East India seed pures for arrival have been cleared off. London-made find little inquiry but remain unaltered. Cotton cakes: The trade is very inactive and buyers will not take anything beyond their actual requirements, and although stocks are small the quantity is more than sufficient to meet the demand and values are barely maintained. Decorticated have found more inquiry, and are rather dearer, as stocks of American are nearly exhausted. London-made are firmly held at £6 17s 6d for cake and meal, and £5 5s for special digestive meal. American "Open Hand" brand are still quoted at £6 17s 6d, and meal at £6 12s 6d per ton ex docks. Rape cakes: East India and Ravison unchanged. Maize germ meal: White American still finds a fair inquiry for December-January despatch at last week's prices, but English makes are slightly easier at 1s 3d per ton less money. Maize gluten meal is only nominally quoted at £5 15s per ton. Rice meal: Parcels on passage have changed hands at £4 12s 6d per ton ex ship, and, with little coming forward, prices remain firm. Broken Rangoon rice is relatively cheap at £4 15s per ton. Locust beans are scarce and firmly held at £5 10s per ton. Nitrate of soda is slightly easier and spot parcels can be had at £10 15s per ton.

—PINNOCK BROS., 30, Mark Lane, E.C.

MOLASSINE FEEDING MEAL, packed in bags of 1 cwt. each. Price per ton, £6 15s., in ton lots and upwards. £7 10s. per ton in less than ton lots. Free on rail, Liverpool or London. Uniform delivered price for small quantities, 10s. per bag of 1 cwt.

CHEESE.

Frome, Wednesday.—The pitch was not a large one for August. Cheddar mad[illegible] 52s to 52s, but 53s to 55s was paid for fancy lots. Cheshires sold from 44s to 48s.

Glasgow, Wednesday.—The demand was only moderate, and the rates ruled easier. Cheddars sold from 50s to 52s per cwt; Dunlops at 47s.

Newport, Wednesday.—A [illegible] was held. A good demand. Quotations [illegible] per cwt: Tunes during 52s to 54s; Cheshires, 52s to 54s; Derbys, 60s; and Cheddars, 54s to 56s.

BUTTER

(Prices at per lb., except where otherwise stated.)

Thursday.—Axminster: 11d to 1s per lb. Bimingham: 1s 2d to 1s 3d. Brigg: 1s 1d to 1s 3d. Driffield: 1s to 1s 1d. Kidderminster: 1s 2d. Northallerton: 1s 1d. Penistone: 1s 2d. Penzance: 1s to 1s 3d. Plymouth: 1s 3d to 1s 5d. Ripon: 1s 7d to 1s 9d per 4 lbs. Scarborough: 1s 3d. Wellington (Salop): 1s to 1s 1d. Wetherby: 1s 2d to 1s 3d.

Friday.—Altrincham: 1s 2d to 1s 3d. Ashburton, 1s 2d to 1s 4d. Barnstaple: 1s 5d to 1s 6d. Chester: 1s 1d. Congleton: 1s 2d. Crewe: 1s 1d. aCmelford: 1s 1d to 1s 2d. Derby: 1s 3d to 1s 4d. Helmsley: 10d to 1s. Knutsford: 1s 2d to 1s 3d. Leyburn: 1s 7d to 1s 8d per 24 oz roll. Lincoln: 1s 2d to 1s 3d. Macclesfield: 1s 1d. Nantwich: 1s 2d. Northwich: 1s 2d. Otley, 1s 10d per 24 oz roll. Redruth: 1s 1d to 1s 3d. Runcorn: 1s 2d. Stamford: 1s 3d and 1s 4d. St. Austell: 1s 3d to 1s 4d. Stockport: 1s 1d to 1s 2d. Tavistock: 1s 6d. Totnes: 1s 4d to 1s 5d.

Saturday.—Applehy: 1s to 1s 2d. Berwick: 1s to 1s 2d. Carlisle: 1s 1d to 1s 2d. Doncaster: 1s 2d to 1s 3d. Grantham: 1s 2d to 1s 3d. Howden: 1s 1d to 1s 3d. Ipswich: 1s to 1s 2d. Lancaster: 1s to 1s 1d. Malton: 11d to 1s. Pontefract: 1s 2d. Retford: 1s 2d to 1s 4d. Richmond (Yorks): 1s 1d to 1s 3d. Shrewsbury: 1s 1d to 1s 2d. Skipton: 1s 1d to 1s 2d. Stokesley: 1s 1d to 1s 2d. Whitby: 1s 2d to 1s 3d. Worcester: 10d to 1s 3d. York: 1s 2d to 1s 3d.

EGGS.

(Number is 1s., except where otherwise stated.)

Thursday.—Axminster: 11d to 1s per dozen. Birmingham: 9 to 11. Brigg: 13 and 14. Driffield: 13 and 14. Evesham: 11d to 1s 1d per dozen. Kidderminster: 10 Northtawton: 16. Penistone: 12. Penzance, 11d to 1s 3d per dozen. Plymouth: 12. Ripon: 11 and 12. Scarborough: 10. Wellington (Salop): 11 and 12. Wetherby: 10 and 11.

Friday.—Altrincham: 8 and 9. Ashburton: 1s to 1s 2d per dozen. Barnstaple: 9 to 12. Camelford: 12. Chester: 10. Crewe: 9 and 10. Congleton: 10. Derby: 10 and 11. Helmsley: 12 and 13. Knutesford: 9 and and 11. Helmsley: 12 and 13. Crewe: 9 and 10. Congleton. Leyburn: 12 and 13, Lincoln: 13 and 14 Macclesfield: 9 and 10. Nantwich: 11. Northwich: 10. Otley: 10. Redruth: 12. Runcorn: 8 and 9. St. Austell: 12. Stamford: 10 and 11. Stockport: 8 and 9. Tavistock: 12. Totnes: 1s to 1s 1d per dozen.

Saturday.—Appleby: 11 to 13. Berwick: 1s to 1s 2d per dozen. Carlisle: 10. Doncaster: 10 and 11. Grantham: 11 to 13. Howden: 12 to 14. Ipswich: 10 to 12. Lancaster: 8 to 10. Malton: 11 and 12. Pontefract: 12. Retford: 1s 7d to 1s 8d per score. Richmond (Yorks): 10. Shrewsbury: 10 to 12. Skipton: 10 and 11. Stokesley: 10 and 11. Whitby: 10 and 11. Worcester: 10. York: 12.

COLONIAL DAIRY PRODUCE

London, Friday.—The demand for Canadian butter this week has not been quite so brisk, owing probably to the weather and its being the end of the month. Prices, however, are unaltered. Saltless Canadian of best quality is very scarce. Arrivals continue to be good, but show no increase during the past seven weeks. Shipments from Canada from May 1 to August 21 were about 1,[illegible] tons against 5,950 tons last year, and 3,940 tons in 1903. The stock in Montreal on August 21 was about 3,[illegible] tons against 4,100 tons last year, and 4,400 tons in 1903. There is no change to report in the Copenhagen official quotation. Notwithstanding the report current a short time ago that supplies of Siberian would speedily fall off, up to now there are no signs of any diminution in the arrivals. The total imports of all kinds of butter last week were 11,320 cwts. less than for the corresponding period of 1904, the whole of this deficiency being exclusively foreign, as the colonial was 180 cwts. more. Cheese.—The market this week has not been so active, but prices remain at a solid 56s. for choicest Canadian, with an occasional 57s. The shipments of cheese from Montreal from May 1 to August 21 this year were about 39,000 tons, against 35,[illegible] last year, and nearly 49,000 in 1903. The stocks in Montreal this year on August 21 were about 11,[illegible] tons, against 15,600 tons last year and 6,800 tons in 1903.—W. WEDDEL AND CO.

POTATOES.

Spitalfields, Saturday. — Trade remains very slow indeed, arrivals of English still exceeding the demand. Duke of Yorks, 50s to 60s; Puritans, 55s; Royal Kidneys, 60s; Beauty of Hebrons, 50s to 60s; British Queens, 50s to 55s; Blacklands, 45s to 50s; Up-to-Dates, 55s to 65s per ton.

Borough, Saturday.—A fair supply was on offer, but a very quiet demand prevailed. Sirs, 55s to 60s; Blacklands, 50s per ton.

FRUIT AND VEGETABLES.

Covent Garden, Saturday. — Fruit in ample supply and steady demand. Greenstuffs met a fair inquiry, the market being well supplied with all kinds. Quotations for English produce: Apples, 1s to 3s per bushel; plums (Victorias, 2s to 3s per half sieve; damsons, 1s 6d to 2s per half sieve; peaches, 1s to 2s per dozen; nectarines, 1s to 1s 6d; greengages, 1s to 1s 3d per dozen; melons, 6d to 1s each; pears, 1s to 1s 3d per half sieve; blackberries, 2s to 2s 6d per punnet; gooseberries, 3s to 5s per half sieve; filberts, 2s to 2s 6d per lb.; walnuts, 3s to 3s 6d per bushel; tomatoes, 2s to 2s 6d per lb.; cucumbers, 1s to 1s 6d each; marrow runners, 1s to 1s 6d; beetroots, 1s to 1s 6d per bushel; celery, 7s 6d to 10s per dozen bunches; rhubarb, 2s to 3s per dozen bunches; cauliflowers, 1s to 2s per dozen; cabbages, 1s to 3s; endive, 9d to 1s per dozen; cabbages, 3s to 5s per tally; ditto, pickling, 1s 6d to 2s per dozen; mush rooms, 6s to 10s per 12lb.; ditto, 2s 6d to 3s 6d per half sieve; turnips, 1s 6d to 2s; carrots, 1s 6d to 3s; mint, 2s to 2s 6d; parsley, 1s 6d to 2s; radishes, 6d to 1s per dozen bunches; horseradish, 2s to 2s 6d per dozen bundles; marrows, 3s to 5s per tally; potatoes, 50s to 70s per ton.

Cattle Diseases in South Africa.

Among the many papers read at the meeting of the British Association in South Africa was one by Colonel D. Bruce, C.B., entitled, "The Advance in our Knowledge of the Causation and Methods of Prevention of Stock Diseases in South Africa during the last Ten Years." South Africa, he said, was particularly rich in animal diseases, every species of domestic animal seemingly having one or more specially adapted for its destruction. He could only on this occasion deal with the most important of these, which were East Coast fever, ordinary red water or Texas fever, biliary fever of horses, malignant jaundice of dogs, nagana or tsetse fly disease, trypanosomiasis of cattle, rinderpest, horse sickness, catarrhal fever in sheep, heart-water of sheep, goats, and cattle. These he divided under three heads—(1) Diseases caused by parasites belonging to the genus piroplasma, the first four being in this category; (2) diseases caused by parasites belonging to the genus trypanosome, in which the next four were classified; and (3) diseases caused by a parasite unknown, the last four being in this group.

East Coast fever, the most dangerous disease with which the people of the Transvaal had to cope, was due to infection from Portuguese territory. Although it had only been introduced during the last few years, it had already done enormouse damage. In every hundred cattle attacked only about five recovered. It was chiefly the brown tick that acted as carrier. During last year some 15,000 cattle died of the disease, and the loss in money was about £200,000. Yet he was informed that all the South African Governments were cutting down their estimates and were inclined to reduce their veterinary staffs. This was the maddest sort of economy. In 1903 Dr. Koch, of Berlin, was asked to study the disease, and his plan of preventive inoculation had been tried on a large scale in Rhodesia, but found useless, the difficulty being that the blood of an infected animal did not give rise to the disease in another; it was only after its passage through the body of the tick that the parasite was able to infect a healthy animal. Much, however, had been done to stamp out the disease by ordinary methods, such as dipping, fencing, and moving to clean pastures; and the regulations which had been framed, providing for the compulsory slaughter of stock, with compensation, and other precautions, if patiently carried out, must be crowned with success. Redwater was of secondary importance, the native cattle having become immune, and the disease being only fatal to susceptible imported cattle.

With regard to the tsetse fly, which rendered thousands of square miles of Africa uninhabitable, investigation had shown that the disease was not caused by a simple poison elaborated by the fly, but by a minute blood parasite known as trypanosoma, which signified a screw-like body. The fly merely acted as a carrier. The multiplication of the trypanosomes in the tsetse fly was discovered by Gray and Tulloch, two young army medical officers, while working in Uganda on sleeping sickness during the present year.

Further investigation brought to light the curious fact that most of the wild animals—the buffalo, the koodoo, the wildebeeste—carried the trypanosomes in small numbers in their blood, and it was from them that the fly obtained the parasite. It seemed to live in their blood without doing them any harm. This accounted for the fact that tsetse fly disease disappeared from a tract of country as soon as the wild animals were killed off or driven away. He was sorry to say that in spite of numerous experiments no method of vaccination or inoculation had so far been discovered to combat these trypanosome diseases, nor had any medicine or drug been discovered which would kill the parasites without killing the animal itself, though arsenic and certain aniline dyes had a marked effect in prolonging the life of the animal.

Turning next to rinderpest, Colonel Bruce said it had been known from time immemorial in Europe and Central Asia, and was an extremely fatal disease. All the South African colonies had made strenuous efforts to combat it. It was Dr. Koch who had discovered two methods of immunising against it. His methods had been greatly improved upon by Kolle and Turner, and it was to them and other workers that they owed the fact that rinderpest had now lost its terrors. The last outbreak in the Transvaal had been stamped out rapidly and completely.

With regard to horse sickness, which carried off thousands of horses every year, to cope with it would enable the Transvaal to become one of the best horse breeding countries in the world. The disease occurred in epidemics chiefly in the low lying localities, and there was no doubt it was caused by some form of blood parasite, the nature of which was not yet known; nor had the fly, mosquito, or other insect which acts as the carrier been discovered. But a great deal had been done during the past ten years by protective inoculation, and further investigations were in progress. The man who discovered a practical method of dealing with horse-sickness would be one of the greatest benefactors of the country, and would well deserve the highest possible reward.

Sale of Shorthorns at Brougham.

The sale of a large portion of the well-known herd of Shorthorn cattle the property of the Right Hon. Lord Brougham and Vaux, at Camont Bridge, near Penrith, on Friday, by Messrs. John Thornton and Co., attracted a large company, many noblemen and distinguished breeders being represented. The cattle were brought out in excellent condition, the bulls especially, showing the deep flesh and quarters of the old Cumberland stock. For His Majesty the King's herd at Windsor two good purchases were made, viz., Rose of Whinfell 10th, a roan four-year-old cow, at 50 gs., and a bonny yearling heifer, Rose of Whinfell 13th, first prize winner at the Liverpool Show this year for 100 gs. Augusta 96, a seven-year-old cow bred by Mr. J. Bruce, of Invergushomery, made 100 gs. (Mr. J. Lee); Brailes Duchess 4, a red yearling, 83 gs. (Earl of Latham); Daisy Bell 2nd and Japonica 3rd., each went for 81 gs., to Lord Barnard and Mr. G. Rodger respectively.

The older bulls met with rather a slow trade (many of the South American buyers being abroad), but the yearlings made good prices, Mr. Henry Williams giving 305 gs. for Dukedom, a handsome roan, and Lord Barnard 100 gs. for Storm, another good roan, both of them being by Stoneytown Pride, 77972. Altogether the sale was considered most satisfactory, an average of nearly £50 being obtained for the fifty-four head sold. We give below a sale list of the principal lots with purchasers names and prices:—

Sheep Fairs and Sales.

Carlisle.

What is known as the August Fair at Carlisle was held on the 26th ult., and, in accordance with ancient custom, the opening of the institution was "proclaimed" from the Cross steps. The rain had a deleterious effect on the large flocks of sheep and lambs. At the two marts the number of sheep disposed of during the day totalled over 20,000, and represented most of the chief breeders on both sides of the Border. At Harrison's mart there were over 16,000 sheep and lambs, comprising 8,000 half and three-quarter and cross Down lambs, 4,000 cross lambs, 2,000 Cheviot and black-faced lambs, and 2,000 feeding sheep, and they were spiritedly competed for by buyers, both local and Scottish, and from the Midlands and South of England. Quotations:—Lambs—half and three-quarter bred, to 32s. 3d.; crosses, to 28s.; Cheviots, to 24s.; black-faced, to 9s. Feeding sheep—crosses, to 35s. 6d.; Cheviots, to 37s.; and black-faced wethers, to 24s.

Mr. T. M'Intosh's Border Leicesters.

On Wednesday Messrs. Macdonald, Fraser, and Co., Limited, dispersed the well-known flock of Border Leicester sheep belonging to Mr. Thomas M'Intosh, Knowehead, at their Perth auction mart. This flock of Leicester sheep was recognised as one of the premier flocks of the breed in Scotland, and in consequence of this there was a very large attendance of buyers forward, not only from all parts of Scotland, but also a number from England and from Ireland. The sheep all over were an excellent lot, and were shown in the best of bloom, and for all classes an animated demand was experienced at prices highly satisfactory to the exposer. The following are the details of the sale:—

	Highest. £ s. d.	Average. £ s. d.	Total. £ s. d.
40 Shearling rams ..	12 0 0 ..	6 10 7 ..	261 5 0
3 Stud rams	23 0 0 ..	— ..	38 15 0
44 Gimmers	9 0 0 ..	4 1 4 ..	179 0 0
64 Ewes	6 7 6 ..	3 16 4 ..	244 4 0
47 Ram lambs	6 15 0 ..	3 3 1 ..	148 6 0
58 Ewe lambs	4 10 0 ..	2 4 6 ..	129 1 0

Twelve gimmers belonging to Messrs. Smith, Leaston, were also included in the sale, and these made an average price of £3 5s. 5d.

The Amberstone Southdowns.

The Southdown flock (registered No. 163) belonging to Mr. H. M. Simmons, of Amberstone Grange, near Hailsham, was disposed of by auction by Messrs. Stride and Son, of Chichester, on Thursday. The flock comprised about 600 head, and the important character of the sale naturally attracted a large attendance of agriculturists and flockmasters from all parts of the county. The Amberstone flock was established by the purchase of ewes from Mr. William Toop, Mr. J. N. Tompkins, and Messrs. Emery, and the rams used have been selected from the flocks of His Majesty the King, Mr. J. Colman, Mr. William Toop, Mr. A. Heasman, Mr. H. Padwick, Mr. W. P. Hampton, Sir James Duke, Bart., etc. The sheep sold were a hardy set, and possessed the quality, type, and character which distinguished the famous flocks from which they are descended. There was a good attendance at the sale, but prices did not rule high, the average of the various lots being as follows:—88 shearling ewes 44s. 10½d., 85 four-tooth ewes 49s. 11½d., 112 six-tooth ewes 48s. 3½d., 120 full-mouthed ewes 38s. 6½d., 119 ewe lambs 24s. 5⅞d., 80 wether lambs 26s.

The Loughcrew Shropshires.

On Tuesday last at Loughcrew, near Oldcastle, in the Co. of Meath, Messrs. A. Mansell and Co. conducted a sale of about 85 head from the celebrated flock of Shropshires kept at that place by Mr. W. L. Naper. For some of the rams bidding ruled brisk, and realised good prices. Owing to the dry summer and the scarcity of grass a number of the lots were in rather backward condition, and did not command such high figures. However, the general average reached the very satisfactory figure of £8 11s. 6d. Shearling ewes were not so well grown as usual and made from 40s. to 46s. The best prices for rams were 25 gs., given by Mr. J. Doran for a get of Northern Star; 21 gs., given by the Marquis of Downshire for the first prize winner at the Belfast Show, a get of Bachelor's Button; 12 gs., given by Mr. P. J. Steen for the second prize winner at the same fixture; 11½ gs., given by Mr. P. Clark; 9 gs., given by Mr. G. J. Smith, of Navan, and 9 gs., by Captain Fowler for shearlings got by Bachelor's Button.

Live Stock Record.

FOAL FUTURITY CLASSES.

Foal shows are now being held in many districts throughout the kingdom, the early part of September being a favourite time for competitions of weanling foals, especially those of the Shire breed. They are the natural corolleries of high-class horse-breeding, and are of great service to those farmers who have bred good foals by pedigree sires which they desire to dispose of. At the foal show by joining in the competition their colts or fillies attract notice, and if they win prizes, or even commendations, there will tolerably sure to be professional exhibitors, speculative merchants, or agriculturists in search of promising young stock willing, and perhaps anxious, to purchase them. To the latter the foal show is as essential as to numerous breeders. Every successive autumn bears fresh evidence of its utility from several points of view. A small tenant farmer possessed of a good brood mare has often paid his rent with the price of her foal.

Sir P. A. Muntz has remarked in one of his articles:—"Many have been disheartened by the idea that valuable stock could only be bred from grand show mares worth hundreds of pounds apiece, whereas a modest, little, well-bred mare that may be picked up continually at a nominal figure will be quite as likely, or even more likely, to become the proud mother of a stalwart family, if well mated." Many a tenant farmer has had the good fortune to experience the truth of this, and the foal he has bred from such a mare, after bringing him a good round sum, has passed into other hands to become distinguished.

Can our autumn foal shows be improved upon, or invested with any new features calculated to extend the right kind of horse-breeding more generally among farmers? The Committee of the East Berks Horse Show Society are decidedly of opinion that this is to be done, and, in conformity with that opinion, have taken a new departure in their proceedings, about which they state, in a circular to the public, that "they are convinced it is the best scheme for encouraging the retention of good mares in the country, and also the breeding of high-class stock on a greatly extended scale."

What is this scheme? The Society will at once organise classes for its show to be held in the autumn of next year for hunter and Shire foals, the preliminary entries for which will close on September 30 this year. "From £140 to £170, and two champion silver cups will be competed for by the produce of mares covered in 1905," states the circular, "for which preliminary entries close September 30, 1905." After stating that the preliminary entrance fee is 5s., the information is given that "if left in after April 30, 1906, an additional 5s., if left in after July 21 an additional 10s.," would have to be paid.

These are all the particulars of this exceedingly novel scheme the circular supplies beyond the statement that either Mr. Dixon, the Hon. Secretary, of 4, Henrietta Street, Covent Garden, London, or Mr. Nickisson, of Hinton Manor, Swindon, the Treasurer, will supply further details on application. If the results anticipated by the East Berks Society are to be secured by this departure, everybody will heartily wish them success in working on new lines.

STOCK AND SHOW NOTES.

By Herdsman.

Messrs. Stride and Son, auctioneers, live-stock salesmen, and exporters, of Chichester, last week shipped to the Orange River Colony six young Jersey heifers purchased from the well-known herds of his Grace the Duke of Richmond and Gordon, and Mr. Herbert Padwick, Thorney.

Of sales of Aberdeen-Angus cattle in September there seems no end, for I have this week received a catalogue of yet another fixture, not mentioned in my previous notes, and it is an important one, the cattle being the property of Sir G. Macpherson Grant, Bart., and Colonel Smith Grant. Tuesday, September 12, is the date of the sale, and it will take place at Lagmore Farm, Ballindalloch, the auctioneers, as in the other cases, being Messrs. Macdonald, Fraser, and Co., Ltd., of Perth. Both the above herds are so well known that all I need say is that the animals to be brought under the hammer on the above day will be found worthy representatives of their breed, and should prove valuable acquisitions to their purchasers.

Messrs. J. Thornton and Co. announce the sale of Mr. Joliffe's herd of Shorthorns at Goldicote, Stratford-on-Avon, on Friday, October 20, in consequence of the expiration of lease of a portion of the farm. The sale will be particularly interesting to breeders not only for the personal merit of the animals but for their high lineage. the herd almost entirely consisting of the best strains of Scotch blood. The herd contains many remarkably fine cows of the Broadhooks, Fairy Queen, Jenny Lind, Diamond, Kinellar Mary, Missie, Golden Wreath, Sycamore, and other fashionable tribes. Many of the young stock are by Primrose Pride, a son of Mr. Duthie's sire Pride of Morning, from Scottish Primrose by Scottish Archer; this bull has proved himself a most impressive sire, and several of his sons are being used in the herds of leading Scotch breeders. Golden Arrow, by Mr. Marr's Golden Star, from one of the Inverquhomery Augustas, has also left a grand lot of calves. He is from the same dam as Royal Purple, sold at the Uppermill sale last year for 600 gs.

Some good Shorthorns were forwarded to Sydney last Thursday, by the s.s. *Afric* from Liverpool. They included among others, a stylish young bull and heifer from Mr. Richard Stratton's herd at the Duffryn, and a well bred red cow, "Wrestlers Phantom" from Mr. W. S. Garne of Aldsworth.

Two days after the funeral of Mr. Philo L. Mills news was received in Nottingham of the death, at the age of seventy-six years, of Mr. John Gibb, who was in partnership with the late Mr. Philo Mills, and was the co-founder of the extensive dry goods business carried on under the style of Mills and Gibb Incorporated.

At the fair at Moy, Co. Tyrone, on Friday there was a large supply of one and two years old cattle, but demand was slow, and a goodly number remained unsold. Prices:—Yearlings (first class), £7 15s. to £8 5s.; second class, £5 15s. to £7 2s. 6d.; third class, £3 13s. 4d. to £5 2s. 6d. Two-year-olds, second class, £7 10s to £10; third class, £6 5s. to £7 2s. Springers, second class, £12 to £14 10s.; third class, £9 to £10.

Notes and Jottings.

Since penning last week's notes the country has generally been visited by a much needed continuous gentle rain that has refreshed pastures in a brief space of time in a remarkable manner, and there is every probability now of a sweet, though short, bite for the next six weeks or so. It must be remembered, however, that this grass will be very washy and cold, and will be hard for any beasts that are a little tender to withstand. This note has been called for by the fact that in travelling about recently more than the ordinary number of "wasting" cattle appear from the railway. In numbers of herds you will see one or two animals standing away from the others in a dreamy attitude and with staring coats. Moral.—Do not delay dry food too long.

Now that the Board of Trade Returns are public property, our cattle wealth, as regards its numbers, is worth studying. The numbers given show an increase of 128,668 over last year's returns. This, when boiled down, amounts to but 1.9 per cent. upon the whole, so that, formidable as the total increase appears at first sight, it is really quite an inconsiderable item. Fortunately, it is on the right side. A decrease at this time might have been attended with results not as pleasant to think about, but an increase is satisfactory from several points of view; it proves that our supply of both stores and beef produced at home will be more abundant, and it is also tantamount to saying that the agricultural community is getting better off. Stock is money.

A very important item in the returns, too, is the acreage of permanent pasture, by which it appears that this has increased since the last returns were issued to the extent of 179,321 acres, which means a great deal. It is rather questionable whether the seeding down to permanent pasture has not reached a point where its cessation would be better both for individuals and the country in general. There are perhaps a great many districts where labour is scarce and difficult to deal with, in which permanent pasture is still desirable, but experience has proved that far better results are obtainable with live stock, especially cattle, where the farm consists of from one-third to one-half good arable land, than where all is grass; also a good deal of tillage land makes but a very indifferent turf.

The increase of cattle is divided between each of the different sections, which show that the increase in cattle two years and above is 40,681, of those one year and under two 41,237, and of those under one year 18,038, the latter being by far the smallest increase of any of the ages. This goes to say that next year's results may not come out as satisfactory, and should incite all interested to bring up as many well-bred and healthy calves as possible for the next twelve months. At the present time calves are to be purchased very cheaply, good bred ones a few days old being often sold at as low as £1 per head. Where a little milk can be devoted to the purpose, it is an excellent policy to start on this at once. Calves born and reared from this time have a great advantage over those born later.

Crossing from our own country to the Sister Isle matters are not as satisfactory in regard to cattle as they are here. In that country there appears to be a decrease of live stock all round, except horses. Cattle give a decrease of 51,496, which for a country so much devoted to cattle rearing is certainly not serious; still, the balance is on the wrong side, and should stimulate farmers on this side to greater carefulness in raising as many of the best class of young stock as possible. Why there should be any decrease at all in Ireland is quite difficult to account for. Prices for

both stores and fat stock have not been so low as to discourage their production, neither has the country suffered from any famine of roots, fodder, or pasture.

Whilst writing about Irish matters, what a vast improvement (almost incredible) has taken place in the cattle of that country during the past twenty years, and more particularly so during the last seven to ten years. There are many thousands of admirable cattle in that country to-day, even in its remotest parts. The spread of agricultural shows has had much to do with this. These exhibitions are being taken up now in every part of Ireland in a most enthusiastic manner, and nothing encourages a farmer (especially the younger members of the profession) to improve his cattle and endeavour to raise better cattle than his neighbour so much as visiting these agricultural shows, where the difference between good and bad is so conspicuous, both in appearance and pecuniary results.

Another source that is effecting great and widespread improvement in Irish cattle is the custom of providing Premium bulls under the Irish Board of Agriculture. Where these bulls are taken advantage of (and this is becoming very general now) the results are very apparent in the quality of the stock produced by their services. At an auction of store cattle in Ireland the other day a lot of bullocks were driven into the ring that at once commanded the attention of all buyers at the ring side, by their symmetry, growth, quality, and general value, the reason for which was quickly solved when the auctioneer announced that they were the get of one of the Premium bulls. Biddings were on a different scale all at once for these.

In England throughout but little is heard of the doings of our Northern friends with their Ayrshire cattle. In these days of increased attention to milk it is rather cause for wonder why this very hardy, easily kept, and productive breed do not receive more attention. At home, however, the breed appears to be going the right way at a good pace, for though the past year's accounts of the Ayrshire Herd Book Society show a loss upon the year's working, still the substantial funds in hand, the increase of membership, and the list of export certificates for the year (the latter numbering 234) all point to a living business and to a spreading of the name and fame of the Ayrshire that must add to its benefit in the future.

The export of Shorthorns and Herefords continues on an enormous scale, to say the least of it. Scarcely does a vessel sail for almost any foreign country where cattle are kept but notes as to the consignment of so many Shorthorns or Herefords appear in the columns of our stock papers. America as a continent takes by far the majority of these, the Argentine portion of the country and its borders taking the largest number. Indeed, the wealth of the agricultural and stock-breeding public of that country appears to be untold, and their pluck in buying and energy in managing their purchases prove the deep interest they take in their stock, and ought to give our home breeders a note of warning that they must see that the standard of our British herds is well maintained.

The coming month should be, or rather it may be said will be, a very important one for breeders of Aberdeen-Angus cattle. A long list of very important sales is published that will take place during September. Business has been rather quiet of late with these "bonnie blacks," but their season is now coming on, for, in addition to the sales, the Christmas shows will soon be here, and it is upon these occasions and at the Christmas market that the Aberdeen-Angus asserts his superiority over most other breeds. Highlanders, too, will be thought more of during the next two months. To those who are interested in either selling or purchasing this latter breed, it may be mentioned that demand is likely to be rather slow owing to shortness of grass in England.

I have before me the schedule of prizes for the coming London Dairy Show, which, on the whole, are fairly liberal, yet in some important sections are not liberal enough in proportion to the restrictive conditions and also to the rather high entry fees charged. The entry fees of £1 for members and £2 for non-members are rather heavy. Then as regards the bull classes, the restriction to bulls whose dams have won a prize or certificate of merit in the trials and tests at Islington is cutting things rather fine. There was, however, it must be admitted, need for more severe conditions in this respect, as animals have been shown in recent years far removed from prize-winning parents.

THE TENS OF THOUSANDS of users of MOLASSINE MEAL should see that their stock have a portion in every feed all the year round, not simply as a condiment when an animal is out of condition, or occasionally as a tonic. MOLASSINE MEAL is the most valuable and economical feed, displacing all condiments, and should be given in place of the same weight of oats, beans, grain, cake, or other feeding stuffs. Sold by all corn merchants and the MOLASSINE CO., Ltd., 36, Mark Lane, London, E.C. (Advt.)

Sale of Drafts at Perth.

On Wednesday Perth Auction Mart was the scene of the sale, and here Messrs. Macdonald, Fraser, and Co. offered some choice drafts of Shorthorns from the herds of close on a dozen breeders, including Lord Rosebery, Sir Hugh H. Smiley of Ardmore, Mr. James Duncan Balfour, Captain Stirling of Keir, Mr. J. R. Grant, Auchnacree; Mr. Ferguson, Dalcapen; and Mr. Dron, Crieffvechter. There were, however, a good many absentees, the total number that eventually changed hands being seventy. Mr. J. M. Fraser conducted the sale, which at times was rather sluggish, a considerable proportion of the animals being of only moderate quality. For first-class stock there was a fairly active demand, and in some instances competition was keen. The sections for the younger animals were especially good, and both for two-year-old and yearling heifers very satisfactory prices were obtained. Several herds stood out prominently in these sections, notably that of Ardmore, which realised the very excellent average of £52 5s. 3d. for sixteen animals, which was the outstanding figure of the day. For a collection of half that number Captain Stirling of Keir obtained an average of £28 18s. 10d., and he was closely followed by Mr. Dron, Crieffvechter, who had £37 9s. for six. The following were the principal prices:—

The principal prices were:—

Mr. J. Duncan's:—Strowan Buttercup XV.—Mr. Andrew Hutcheson, Perth, 13½ gs.; her heifer calf—Mr. C. E. Law, Holl, 18 gs.; Bangle—Mr. J. Moncrieff, Tufthills, Glencarse, 12 gs.; Lustre XLII.—Mr. Young, Cadball, 31 gs.; her heifer calf—D. Fergusson, jun., Dalcapon, 14½ gs.; Bangle II.—Mr. Anderson, Balachraggan, 18 gs.; her bull calf—Mr. Cameron, Westside, 11 gs.

Mr. W. A. Dron's:—Village Queen—Mr. Robert Taylor, Pitlivie, 40 gs.; Beauty XXV.—Mr. Anderson, Balachraggan, 34 gs.; Emma XLIII.—Mr. G. Campbell, Harthill, 40 gs.; Baroness Beauty 2nd.—Mr. J. Sharp, South Forr, Crieff, 30 gs.; Lady Dorothy—Mr. Robert Taylor, Pitlivie, 55 gs.

Mr. D. Ferguson's:—Highland Lass—Mr. Tong, Hambleton, 23 gs.; Daisy Blossom—Mr. A. Hutcheson, Perth, 15 gs.

Earl of Rosebery's:—Maggie VI.—Mr. T. A. Buttar, Corston, 19 gs.; her heifer calf—Mr. T. A. Buttar, Corston, 20 gs.; Columbine XI.—Mr. A. T. Gordon, Combscauseway, 52 gs.; Gay Bessie—Messrs. Kerr, Lochlane, Crieff, 17 gs.; Veronica III.'s bull calf—Mr. George Harrison, Gainford Hall, 20 gs.; Marchioness XXI.—Mr. G. Inglis of Newmore, 40 gs.; her heifer calf—Mr. George Harrison, Gainford Hall, 31 gs.; Dalmeny Nonpareil X.—Mr. A. T. Gordon, 36 gs.; Dalmeny Ruth—Mr. Anderson, Balachraggan, 36 gs.; Zola (bull)—Mr. Campbell, Harthill, 36 gs.

Sir H. H. Smiley's:—Royal Welcome—The Earl of Moray, 60 gs.; Bounty II.—Mr. G. R. Grant, Auchnacree, 88 gs.; her heifer calf—Mr. George Anderson, East Fingask, 50 gs.; Letty Lind III.—Mr. Robert Anderson of Fingask, 43 gs.; Irish Welcome—Mr. Anderson, Balachraggan, 51 gs.; Victoria LXXXIX.—Mr. Robert Taylor, Pitlivie, 46 gs.; Sunshine III.—Mr. C. M. Cameron, Balnakyle, 50 gs.; Lady Muriel III.—Mr. G. T. Lloyd, Leicester, 72 gs.; Irish Welcome II.—Mr. G. T. Lloyd, Leicester, 51 gs.; Letty Lind IV.—Mr. J. Eccles, Myerscough, Lancs, 31 gs.; Plum Blossom II.—Mr. Wm. Duthie, Collynie, 110 gs.; Fairy Fancy—Mr. G. T. Lloyd, 63 gs.

Captain Stirling's:—Keir Beauty XI.—Messrs. Lumsden and Mackenzie, 50 gs.; Keir Bessie—Mr. George Harrison, Gainford Hall, 69 gs.; Keir Beauty XII.—Mr. Robert Anderson of Fingask, 27 gs.

Mr. P. Shaw's:—Lucknow—Mr. John Cran, Keith, 30 gs.

Colonel Munro's Shorthorns.

The first of this season's pure-bred cattle sales in Scotland took place on Tuesday, when Messrs. Macdonald, Fraser, and Co., Limited, of Perth, brought under the hammer at Moness, Aberfeldy, Colonel Charles Munro's entire herd of Shorthorn cattle from the Mains of Murthly, and a dozen animals from the Huntingtowerfield herd, belonging to Messrs. Lumsden and Mackenzie, the catalogue comprising ninety-three head, of which only three failed to put in an appearance. Colonel Munro has been a noted breeder of Shorthorns for something like a quarter of a century, stock from his herds taking leading places in the principal showyards. The sale accordingly brought together a very large attendance of breeders from all parts of the country. Unfortunately, the weather was not favourable for an open-air gathering, rain falling heavily during the most of the day, but there was no lack of interest, and bidding on the whole was remarkably brisk, and, except in a few instances, very satisfactory prices were obtained, the total received for seventy-nine head belonging to Colonel Munro being £3,019 16s., or an average of £38 4s. 6d.; while for the Huntingtowerfield lot the total was £293 9s. 6d., an average of £26 13s. 7d. The top figure of the sale was 110 guineas, made by Lina II., a dark roan six-year-old, bred at Borlick, and sired by Morning Star. She is full of Shorthorn quality, and for her possession there was a smart competition. The final contest lay between Mr. Calder and the Earl of Moray, and in the end this handsome specimen of the breed went to Mr. Calder. Other prices ranged up to 91 guineas, as the following list will show:

PROPERTY OF COLONEL MUNRO.

Cows:—Red Rose—Mr. T. A. Buttar, Corston, 32 gs.; her heifer calf—Mr. James Calder of Aldargie, 70 gs.; Rose of Ythan—Mr. A. M. Gordon of Newton, 31 gs.; her heifer calf—Mr. A. Robertson, Bellechin, 36 gs.; Maggie B. II.—Mr. James Calder of Ardargie, 62 gs.; Royal Jubilee—Mr. T. A. Buttar, Corston, 60 gs.; her bull calf—Mr. Buttar, Corston, 46 gs.; Arabella—Mr. Webster, Liskeard, 36 gs.; Laurel Leaf—Sir James Sivewright of Tullialian, 66 gs.; her heifer calf—Mr. Bruce, Hants, 27 gs.; Lina II.—Mr. Calder of Ardargie, 110 gs.; her bull calf—Mr. Calder of Ardargie, 38 gs.; Emmeline VII.—Mr. G. R. Fortune, Colinsburgh, 50 gs.; her heifer calf—Mr. Bruce, Elvetham, Hants, 53 gs.; Stroxter Belle—Mr. George Harrison, Gainford Hall, 30 gs.; Lattice Leaf—Mr. Robinson, Moy, Ireland; 41 gs.; Airy Duchess II.—Mr. Douglas, Spott Mains, Kelso, 62 gs.; her bull calf—Mr. Douglas, Spott Mains, 30s gs.; Red Lady VIII.—Mr. W. T. Malcolm, Dunmore, 40 gs.; Chrissie—Mr. Calder of Ardargie, 85 gs.; Circe VII. The Earl of Moray, Doune Castle, 36 gs.; Red Lily—Mr.

Forthcoming Live Stock Sales.

DATE.	STOCK.	OWNER.	PLACE OF SALE.
September 5	Shorthorn Cattle	Mr. H. Williams	Moor Park, Harrogate, Yorks.
5	Shropshire Sheep and Cattle	Mr. J. E. Farmer	Felton, near Ludlow, Salop.
5	Suffolk Sheep	Various	Bury St. Edmunds.
6	South Devon Rams ...	Various	Truro, Cornwall.
6	Rams and Ram Lambs ...	Various	Kempton Green Fair, Norfolk.
6	Do do. ...	Various	Peterborough Ram Fair.
6	Shire & Hackney Horses	Various	Peterborough.
7	Shorthorn Cattle	Various	Bingley Hall, Birmingham.
7	Red Polled Cattle... ...	Late Mr. J. J. Colman ...	Trowse, Norwich.
7	Cattle, Sheep and Horses	Mr. E. Adams	Horner Farm, Selworthy, Somerset.
7	Sheep	Various	Craven Arms, Shropshire.
7 & 8	Horses	Various	Crewe Horse Repository.
7, 8 & 9	Horses, Cattle, Sheep, &c.	Mr. R. Croker	Wantage, Berks.
8	Shropshire Sheep and Shorthorn Cattle	Mr. C. Coxon	Elford Park, Tamworth.
8	Hackneys and Ponies ...	Sir G. Greenall, Bart. ...	Walton Hall, Warrington.
8	Sheep	Various	Kidderminster.
8	Sussex Cattle	Various	Hayward's Heath.
8	Rams	Members of the Border Union Agricultural Society	Kelso.
9	Hackney Ponies	Mr. W. W. Hargrave ..	The Normans, Rusper, near Horsham, Sussex.
11	Hackney Horses	Messrs. J. & A. Moorhouse	Flanshaw, Wakefield.

Douglas, Spott Mains, Kelso, 80 gs.; her heifer calf Mr. Webster, Liskeard, 41 gs.; Betha Mr. Young, Bellycloan, Maddesty, 23 gs.; her bull calf Mr. George Harrison, Gamford Hall, 37 gs.; Lady of Gight Mr. Buttar, Corston, 38 gs.; her heifer calf—Mr. Bruce, Elvetham, Hants, 30 gs.; Rose of Murthly Mr. Webster, Liskeard, 56 gs.; her bull calf Mr. Webster, Liskeard, 30 gs.; Lilac Leaf Mr. Calder of Ardargie, 66 gs.; her bull calf Sir Donald Currie of Glenlyon 32 gs.; Rosebud Mr. Haley, Malton, Yorks, 41 gs.; Cissy Mr. Calder of Ardargie, 36 gs.; Dolly Gray—Mr. Anderson, Lairston, 28 gs.; her heifer calf Mr. Thompson, Inverheath, 40 gs.

Two-year-old heifers:—Lady Flo—Mr. D. Anderson, Lairston, 24 gs.; Myrtle Blossom—Mr. W. T. Malcolm, Dunmore, 25 gs.; Edna May His Majesty the King, Windsor, 70 gs.

Yearling heifers: Kitty Gray Mr. Calder of Ardargie, 72 gs.; Royal Jubilee II.—Mr. Young, Cadboll, 36 gs.; Cecilia Mr. Haley, Malton, Yorks, 41 gs.; Rose of Grandtully—Mr. G. R. Fortune, Colinsburgh, 31 gs.; Blue Bell Mr. Haley, Malton, Yorks, 50 gs.; Frances—Mr. Murray of Polmaise, 38 gs.; Lemon Leaf Sir James Sivewright of Tulliallan, 29 gs.; Carnation II.—Sir James Sivewright of Tulliallan, 91 gs.; Lady Olive—Mr. Calder of Ardargie, 52 gs.; Lily Breadbrooke Mr. Young, Cadboll, 38 gs.; Lady Rona Mr. Calder of Ardargie, 36 gs.

Bulls:—Comely Archer Mr. Sidey, Binkbonny, 23 gs.; Pillar Stone—Mr. Tong, 40 gs.; Hermes—Mr. Matthew Marshall, Stauraer, 25 gs.; Diamond Ensign—Mr. Robinson, Moy, Ireland, 26 gs.

PROPERTY OF MESSRS. LUMSDEN AND MACKENZIE.

Cows: Hilda—Mr. Rothwell, Preston, 28 gs.; her heifer calf, Hilda 5th of Huntingtower Mr. Rothwell, 20 gs.; Pauline 2nd.—Mr. Wm. Duthie, Collynie, 76 gs.; Lady Sophie—Sir James Sivewright of Tulliallan, 24 gs.

Yearling heifer: Hilda 3rd—Mr. Duncan Stewart of Millhills, 26 gs.

Bull:—Golden Star—Mr. Sidey, Blinkbonny, 25½ gs.

NOTE.—The figures for the current year are approximate only.

It is reported that mysterious scourge is sweeping the swine off in scores in the Isle of Ely, and in quite a small area has claimed 100 victims a week, for the owners are absolutely helpless in the face of it. Veterinary surgeons can find no remedy for it, and so fearfully virulent is the disease that in twelve or twenty-four hours after being attacked the pig is dead. The disease is entirely different from swine fever, a red spot first appearing, and the animal becoming a mass of purple before it dies. The disease is said to have been imported—probably from Germany—and is termed erysipelas, though it has nothing in common with ordinary erysipelas.

Horse Notes.

"He doth nothing but talk of his horse."
—Merchant of Venice.

There has been a good deal of talk lately in certain circles about trotting races for Hackneys; but it is difficult to see what practical benefit can be derived from such a new departure. I have seen at more than one show so-called trotting competitions, and could never find that they were of any use, or, for the matter of that, of any great interest to the general public. To see one horse trotting against another may be very exciting for the owners and drivers, but, unless the horses are well-known and their performances are known also, it is difficult to see how the public are to be greatly excited by the spectacle. People who want to see racing will go to see it—they will not take trotting matches at an agricultural show as an equivalent. And those who advocated the new departure should bear in mind that it is the traditions connected with racing traditions which are the accumulation of centuries which make racing popular, and that there are no traditions connected with English trotting.

Time was when the English Hackney was a horse especially intended and especially adapted for carrying a man a long journey. He had sufficient of the thoroughbred blood in him to furnish him with stamina, and he had fine shoulder and hock action; he walked well and at a good pace—a very necessary accomplishment when roads were bad—and he could canter well on occasion. Above all things, he was a pleasant ride, and, on the principle that a good saddle horse makes a good harness horse as well, he was largely used for harness by private owners. In those days match trotting was by no means unknown, and there are many records of matches taking place in the latter half of the eighteenth and beginning of the nineteenth century, and the performances of Shales, Hue and Cry, Phenomenon, and others were the subject of much enthusiastic comment in their day. For when the stoutness of a Hackney was one of his most essential characteristics, the value of a stallion was considerably enhanced by good performances on the road.

But after railways became universal, the Hackney was put to different purposes. Style and quality, and his general appearance and showy action were considered, and there being no further use for stamina, it was neglected, with the result that we see some horses roll hopelessly after being driven a few times round a ring when the ground is holding. The new order of things set in just after the middle of the nineteenth century was turned, and the writer well remembers the late Lord Zetland pointing out the danger of encouraging the showy snap of the knee to the neglect of that fine shoulder action which gets over the ground.

It was about this time that the maxim "You can't have both action and pace" began to have vogue, and the increasing number of agricultural shows encouraged it. Then came the time when showy action was thought more of than make and shape, and when, if a horse only went high enough, had plenty of the knee and curb chain business, what were called minor defects, but what were really serious ones, were more or less ignored. Then came the time when we were told in so many words that the modern Hackney is the typical fashionable harness horse. For many years it has been the object of the principal Hackney breeders to breed high-class harness horses, and that they have succeeded in doing so the harness classes at our shows are sufficient proof.

Putting the case in a nutshell, then, it may be said that Hackney breeders have created a demand by supplying it, for the very high-stepping harness horse of the present day is very different in style and character to his predecessor of the fifties and sixties. They have put action, that is, high fashionable action, in front of pace, and though it may be quite possible to breed a horse on the lines of the American trotting horse by judicious mating, it is quite impossible to do so without sacrificing the action which is at present so fashionable. With a few exceptions, the Hackney breeder ignores the saddle altogether, and breeds, or tries to breed, the kind of horse that fashionable people drive in the parks, or when they make calls. Such horses are, in these days, scarcely ever wanted to go more than ten or twelve miles in a day; if a longer journey is to be taken the motor-car is pulled out. So having with infinite pains got what they have tried to get, it would almost seem as if "Quieta non movere" were the wisest policy for the Hackney breeder to adopt.

At the same time, it is possible that there may be another want which needs supplying. I mentioned a week or two ago that many gentlemen were tiring of motor-cars, and that there were more inquiries for harness horses than there had been for some time. But I scarcely think that the motor-car will go out of favour to such an extent as to bring horses into fashion again for long journeys, and cause a demand for horses bred on fast trotting lines.

The introduction of the Hackney into Ireland has not been productive of good, if we are to take the word of a correspondent in a daily newspaper concerning the light horses shown at the recent Dublin show. He points out that the ponies of the west—Sligo and Mayo—have deteriorated considerably, and that they have lost the fine shoulders and the fine galloping action for which they were once distinguished. In this he is supported by Mr. Miller, who complains that the foundation for the polo pony is no longer so easily obtained as it was a few years ago, before the Hackney stallion was placed at the disposal of the Irish tenant farmer at a small fee. When the inquiry was held in London a few years ago respecting the advisability of sending Hackneys to the congested districts, this danger was much insisted upon by many practical breeders and owners. And now it would seem that the mischief is done to a very great extent, and there is no knowing where it will end.

It is to be feared that we have too much of the "Bookish theorie" in our modern horse breeding. Men get all kinds of whims about what a horse should be, and then go to all kinds of horses to remedy defects which only exist in their own imaginations. So the Hackney, an admirable horse in his place, has been crossed with mares for which he was not suitable, and, in the endeavour to get one type, another and very excellent one has been lost. It is a case of history repeating itself, but it is to be hoped that the case is not quite so bad as some would have us believe.

Indeed, it would seem that there are plenty of good mares left in Ireland if we had only the sense to take care of them, for never have foreign buyers been busier than they were ten days ago at Balls Bridge. Especially were German buyers busy, and of one thing we may be certain—they did not take the worst away. At agricultural show luncheons we frequently hear speakers advise farmers to keep their brood mares, and only part with the crooked-legged ones to the foreigners, and there is no doubt that the speakers think they are saying something clever when they say this. Really they are not. The foreign buyer knows his business well. He is frequently a very good judge; when he is not, he always secures the services of a man who is. And he simply will not buy the cast-offs. But, being a man wise in his generation, he gives from £10 to £20 over the current market price for a good mare, knowing very well that it is impossible to calculate the value of a good brood mare.

There is an enormous amount of talk about keeping brood mares in the country; but not much practical effort made to keep them in the country. It is all very well to talk about "killing the goose that lays the golden egg" and urging upon farmers the necessity of breeding horses. Farmers also see another necessity—it is a necessity which is impressed upon them every day by an exacting Government with its ever-increasing rates and taxes and that is to sell in the best market. That the best market for brood mares is the foreign market is undoubted, and hence the foreigners get a great number of our best mares.

There are some practical attempts made to keep the best brood mares in the country. The Duke of Portland's scheme of lending mares to his tenants has been adopted by other landlords; but the only national scheme in this direction is the Brood Mare Society, a society which does not receive a hundredth part of the support that it merits. There should be as many members

in every county, i.e., in every horse breeding county, as there are altogether. It would be advisable, in the first place, when the funds of society admit of it, to buy the best brood mares as they come into the market, and see that they are placed in the hands of men who are capable managers of light horses. They would, I think, do more good in this way than by lending mares of not quite such good quality to men who have no taste for light horses. And if everyone who airs his knowledge of horse breeding—or want of it—at agricultural shows were to contribute his guinea, and get a few of his friends to subscribe, the annual income of the Brood Mare Society would soon be £30,000, which it ought to be.

THE LOOKER-ON.

Sale in Dublin.

As a sort of wind-up to the Horse Show week in Dublin Messrs. Sewell, Son, and Simpson held a sale of hunters at Dublin on Saturday, the 26th ult, and it was largely attended. There was a very well-filled catalogue, principally consisting of exhibits from the show, and sales were briskly effected, there being good competition. The best prices were obtained for the animals sent by Mr. Nathaniel Morton, who obtained three-figure prices for nearly every one of his animals, five fetching over 200 gs. each. Details of these, together with the other principal prices, are given in the following list:—

Mr. Nathaniel Morton's.—Royal Sport, bay gelding, 5 years, by Harkaway King, 190 gs.; Sunburst, chestnut gelding, 4 years, 105 gs.; Signature, dark chestnut gelding, 5 years, by Penman, 110 gs.; Look Out, bay gelding, 5 years, by Beware, dam by Arthur, 220 gs.; Sky Blue, grey gelding, 5 years, by Beware, 150 gs.; Mascot, bay gelding, 5 years, by Mascarille, 210 gs.; Jump the Gate, bay gelding, 4 years, by Walmsgate, 120 gs.; Simplicity, bay gelding, 5 years, 250 gs.; Raratonga, brown gelding, 4 years, by Wild Sherry, dam by Playactor, 130 gs.; My Sort, brown gelding, 4 years, by Derncleugh—Pure and Simple, 180 gs.; Marksman, bay gelding, 4 years, by Havoc—Lily Langtry, 130 gs.; Merry Boy, bay gelding, 4 years, by Monarch III.—Vera, 120 gs.; Life Guard, bay gelding, 4 years, by Gay Reveller, 140 gs.; Queen of the Bog, chestnut mare, 5 years, by Bog of Allan, 230 gs.; Moor Cock, chestnut gelding, 4 years, by North Mayo, 230 gs.

Mr. R. A. Sinclair's.—Clomeen, bay gelding, 7 years, by Bruree, 56 gs.

Mr. A. Topham's.—Bay gelding, 6 years, by Wondebar, 55 gs.; bay gelding, 5 years, 48 gs.; bay gelding, 5 years, 66 gs.

Mr. Patrick Meenan's.—Doll, bay mare, 5 years, by Cottingham—The Foyle, by Aughrim, 50 gs.; Slip Along, brown mare, 4 years, by Traverser, dam by Poucet, 50 gs.

Mr. M. Quinn's.—May Queen, chestnut mare, 6 years, 48 gs.; Rasper, chestnut gelding, 6 years, 48 gs.; bay mare, 6 years, 80 gs.; Gold Digger, chestnut gelding, 4 years, 70 gs.

Mr. Wm. Higgins's.—Merry Andrew, bay gelding, 6 years, by Connaught, 60 gs.; Togo, bay gelding, 5 years, by St. Patrick, dam by Strathblane, 56 gs.; Tacita, bay mare, 6 years, by Tacitus, 48 gs.

Mr. H. M'Kee's.—Imperialist, grey gelding, 8 years, by Beehive, 120 gs.

Sale at Wrexham.

On Tuesday, at the Whitegate Stud, Wrexham, Messrs. F. Lloyd and Sons brought under the hammer, in the presence of a large and representative company of breeders, a choice selection from Mr. J. Jones's well-known stud, and, as was to be expected from the high-class quality of the animals, some good prices were realised. Gold Dust, a magnificent chestnut gelding, 15 h. 3 in., made the top figure of the sale, for, after a keen competition between Mr. Parker, of Stanwell, and Mr. Rennie (Paisley), he was secured by the former at 330 gs. A pair of chestnut geldings, Active and Activity, caused a sharp competition between Mr. Edmond, of Liverpool, and Mr. Blackman, Piccadilly. The former, however, stayed longest, and got them for 240 gs., it was understood for shipment abroad. A chestnut gelding by Cassius, under 14 hands, was bought by Mr. Rennie, Paisley, at 140 gs., and L'Oh, a fine goer, was sold to Mr. James Taylor, Wrexham, for 100 gs. Other animals went below 100 gs. Champion Cassius was withdrawn at 280 gs., and Whitegate Swell at 250 gs., these being the two animals Mr. Jones reserved the right of putting in one bid for, this price being much below what he expected. Some capital prices were realised for the foals, as the following list of the principal sales shows. The average realised by the various lots were: Harness horses, £114 5s.; brood mares, £49 10s.; foals, £42 15s.; yearlings, £38 16s.; two and three year olds, £41 4s.

Harness horses and cobs.—Gold Dust, Mr. Parker, Cromwell, Middlesex, 330 gs.; Active and Activity, Mr. Edmond, Liverpool, 240 gs.; Master, 14.3, Mr. Rennie, Paisley, 140 gs.; L'Oh, Mr. J. Taylor, Wrexham, 100 gs.; Princess, Mr. H. D. Dennis, Rhuddlan, 74 gs.; Forest Queen, Mr. Bonner, 70 gs.; Amazement, Mr. Bagnley, 65 gs.; The Toff, Mr. Cash, 65 gs.; Gold Finder, Mr. [illegible], 62 gs.; The Trapper, Mr. W. Jones, Coed-y-Mor.

Brood mares.—Lowood Carmen, Miss Eaton, Welling, 70 gs.; Topsy Turvy, Mr. Craggs, Borough, 40 gs.; Express, 13.2, Mr. E. P. Burton, Yelverton, Whitegate Bell, 13.3, Mr. H. E. Parry, Wrexham, Whitegate Lass, 14.1, Mr. Berry, Leyland, 51 gs.; Agnes, Mr. J. M. Dugdale, Llwyn, 60 gs.; Carmen, 14 hands, T. Smith, Hall Green, Charm, 14 hands, Mr. Jagger, Epping, Cracker, 13 hands, Mr. Jagger, Epping.

65 gs.; Whitegate Fairy II., 13.2—Mr. Francis, Wem, 42 gs.; Whitegate Britannia, 13.2—Mr. E. P. Burton, 54 gs.; Whitegate Concert, 14.2—Mr. Berry, 26 gs.; Whitegate Plaid, 14.2—Mr. J. Bourne, Mucklestone, 30 gs.; Rosy Jane—Mr. W. J. Milton, Birkenhead, 32gs.; Whitegate Lady Kate, 14 hands—Mr. S. Woodiwiss, Great Watham, 31 gs.; Whitegate Bang, 13.1—Mr. Fox, Gainsborough, 76 gs.

Foals by His Majesty.—Leyswood Carmen's filly—Mr. Edwards, Johnstown, 40 gs.; Express's 13.3 filly—Mr. E. P. Burton, 52 gs.; Bell's 13.3 colt—Mr. A. Nuttall, 30 gs.; Agnes's colt—Dr. Harper, Stranraer, 40 gs.; Charmer's 13 hands filly—Mr. Thos. Smith, Hall Green, 45 gs.; Cracker's 13 hands filly—Mr. Thos. Smith, Hall Green, 70 gs.

Yearling ponies.—Wavelet—Mr. Baguley, 32 gs.; Janet—Mr. Thos. Smith, 50 gs.; Viola—Dr. Harper, 38 gs.; Little Dot—Mr. W. S. Miller, Brecon, 38 gs.

Two and three-year-olds.—Actress J. Bourne, Mucklestone, 39 gs.; Fashion—Mr. Humphreys, Gainsborough, 35 gs.; Glynceiriog—Mr. Lea, Kinsale, 38 gs.; King Mr. Cash, 51 gs.; Sensation—Mr. Davies, Denbigh, 31 gs.; Sir Richard Calmady—Mr. Nuttall, 46 gs.; Satisfaction—Mr. Dutton, Chester, 31 gs.; Speculation—Dr. Iliffe, Coventry, 42 gs.; All Fours—Mr. Huxley, Bromington, 40 gs.; Wonder—Mr. Wilson, Dunlop, 48 gs.; Monarch—Dr. Iliffe, 86 gs.

Notes and Jottings.

The export demand for stud sheep has been a much more general one this year from the South American countries than in former years. The breeds most in request after the Lincolns—which, as usual, have secured the larger demand—are the Kent or Romney Marsh, the Hampshire Down, and the Shropshire.

In our last week's notes we referred to several important sales of Kent or Romney Marsh rams. To these we are able to add this week others of equal importance. The first consists of thirty-two head, which have been purchased through Messrs. Spearing and Waldron for export to Patagonia and the Falkland Islands for the Patagonian Sheep Farming Company, Limited, and the South American Export Syndicate, Limited. The flocks from which this large lot of rams have been selected were Mr. H. Rigden's, who contributes eight rams of fine merit; Mr. W. Millen, who contributes nine very superior even-fleece, typical rams of masculine type and carriage; Mr. Charles File, whose flock supplies eight of that well-known Windsor strain of prize-winning blood, and the remainder came from Mr. F. Butter's old flock at Frindsbury, Rochester. The other sales of last week were fourteen yearling rams from Mr. Arthur Finn's flock at Westbrook, Lydd, through the agency of Mr. W. W. Chapman, to Mr. W. M. Dean for export to the Falkland Islands, and two ewes and eight ewe lambs, through the same agent, also to Mr. Dean, from Mr. W. Millen's flock at Syndale, Faversham, Kent.

Messrs. P. and G. Hughes have also purchased a very fine lot of these Romney Marsh rams, ten in number, from that well-known flock owned by Mr. H. Rigden.

Amongst the Shropshires recently purchased for the Argentine are seventeen specially fine yearling rams bred by Mr. T. A. Buttar at Corston. These were all secured by Mr. R. Taylor at the annual ram sale.

Argentine advices by the last mail inform us that on August 3 last a consignment of ninety head of Shropshires arrived there, and another consignment of seventy Lincoln rams.

The keenness of the Argentine demand for Lincoln rams was clearly demonstrated by the high prices paid by the Argentine buyers at the recent sale of Mr. T. C. B. Dixon's rams, and, from information received from different Lincoln breeders, it is evident, although the demand during the past season has been a very large one, that all the orders are not yet filled. This is a good augury for the sales yet to be held, and it would appear more than probable that the demand for ram lambs will be a keen one.

The selling of ram lambs for export, however, is not likely, in the long run, to be beneficial for the best interests of the breeders of Longwool sheep. As a rule, the ram lambs of these breeds need longer to develop than of the Down breeds, and consequently there is greater risk in the selected ram lambs not being all they should be when they become yearlings. For this reason the demand for ram lambs is not one that should be encouraged.

The system of giving individual official export certificates with stud sheep is one that has not yet become general, but that it will do so in the near future is quite certain. Why it has not long ago been insisted upon by every purchaser of imported sheep into the country they go to we cannot imagine. It is fully as necessary for the purchaser to know the breeding and pedigree of every sheep imported as it is of bulls and cows, stallions and mares, and yet it is still very often left undone.

A recent decree of the Argentine Government (March 2, 1905), however, goes a long way towards making the issue of official export certificates necessary. Under this decree it is now necessary for the signatures of the secretaries of the breed societies to be properly verified at the Argentine Consul's before the latter will visé the official export certificates. Probably some objection will be raised against this new decree, but from a knowledge of the whole business of sheep export, there can be no question but that it is a step in the right direction. Anything that tends to increase the value of the official export certificate, or any step taken to render the correct pedigree of each and every animal exported being sent with it, is to be commended. The fuller information in respect to the breeding of all animals exported for stud purposes that can be supplied to their purchasers the better it is. Such information will certainly enable them to make better use of the imported animals, and in proportion to the satisfaction given so will the demand for them increase. It has been asked by more than one flockmaster: How can the better demand for stud sheep this season be accounted for? The reply is one ready to hand, namely, the large increase in the value of wool. For instance, a large grower of wool in South America recently told the writer that his sales this season had resulted in an average of 8¾d. per lb., as against 4d. per lb. three years back. With so large an increase in the receipts from wool, there can be no question but that it has made the buyers more keen, and many of them have invested a part of the increased receipts from wool in the purchase of stud rams, by means of which, if all goes well, the value of their flocks, both for production of wool and mutton, will be still further increased.

The result of the large increase in breeding cross-bred lambs two or three years back, particularly in the Lincoln and Kent or Romney Marsh districts, has been to make the supply of ewes of these breeds very short indeed. The recent lamb sales held in Kent particularly emphasise this by the notably high prices paid for ewe lambs. This position of affairs is satisfactory to those who have kept their flocks pure, and it proves that, despite all the temporary advantages secured by those who went in for cross-breeding, that the turn of the pure-bred flockowner has come again, as has always been the case.

THE LINCOLN RAM SALE.

The result of the keen demand experienced during the past season for the Lincoln rams was very apparent when we examined the rams entered for the great annual sale at Lincoln. In all our experience we have never before seen so few leading sheep offered at this sale. The export buyer has taken pretty nearly all the best, and consequently, although the average realised for the whole sale this season is so much lower than last year, there can be no question but that it is compartively a far better average, and probably one of the best ever realised at this fixture, if the quality of this year's entry be compared with any of the preceding sales.

The whole of the rams present at the sale were sold, the entry numbered 289, of which five were absent, and the sales include 284 rams and others. In this respect the sale is, we believe, almost, if not quite, a record one. Last year's average was £31 18s. 9d. for 151 rams, and that for the present year was £19 7s. 5d. for 284, the aggregate total of the whole sale being £5,581.

Taking a view of the entry as a whole—if we take out two lots, those sent by Messrs. W. B. Swallow and J. Pears—we found that in nearly every case the rams sent were either those left by the Argentine buyer or those which came from flocks not generally considered as the leading ram breeding flocks. These facts emphasise the excellence of the demand, and make the relative value of the average realised, when compared with those of previous years, very much better than a mere cursory reference to the records of former years would indicate. The top price realised last year

was 300 guineas, and the top average £125 6s.; but this was an exceptional one. This year's top price was 200 guineas, and the best average £63, both realised by Mr. W. B. Swallow's excellent consignment, that was composed of the best rams of his flock this year. These rams were the first offered, and right away from the start there was clear indication of a very keen demand indeed. This is the first time Mr. Swallow has made the top price at the fair, and also the first time he has made the top average. His first ram, a real good one for the Argentine, was put in at 50 guineas, and by fives and tens he was very soon at 200 guineas, at which price Messrs. P. and G. Hughes secured him for the Argentine; the same buyers gave 135 guineas for another, a real typical Argentine ram, and they also took two others at 40 and 30 guineas. Messrs. Wright, who were bidders for the leading rams, got a capital sheep at 43 guineas and another at 25 guineas; Mr. R. Fisher took one at 38 guineas, and Mr. J. Brocklebank one at 37 guineas. Mr. Moore's selection cost him 30 guineas, and that made for Mr. W. Savage 22 guineas; the ten averaged £63, ranging from 200 guineas to 21 guineas. All Mr. Tom Casswell's best rams have been sold for export. Another lot sent to Lincoln, with the exception of two, were the tail end of the 1904 crop. The first ram, a very fine sheep, went, after keen competition, to Mr. F. Ward, at 180 guineas, Mr. W. J. Brooks taking the next one at 38 guineas, to Northamptonshire, two others made 31 guineas each, to Mr. Thompson; another went at 21 guineas to Messrs. Wright, and the others went at 16 and 15 guineas. The nine averaged £42 2s. 4d., ranging from 180 to 15 guineas. Mr. J. Pears sent a very good lot of rams, probably one of the best lots he has sent to this sale for several years. They were in great request. An Argentine buyer, under the name of Mr. Carden, gave the top price, 110 guineas, for the second ram of this lot; the same purchaser also took five others at 51, 44, 30, 23, and 18 guineas. Mr. T. C. B. Dixon got two real good stud rams, one cost 65 guineas and the other 50 guineas. Mr. Henry Dudding also secured two of these fine rams; his top price was 65 guineas, and the other he got at 38 guineas. Mr. McLean, for the Argentine, gave 60 guineas; Mr. J. E. Casswell, 61 guineas; Mr. L. Stephenson, 35 guineas; Mr. G. Marris, 34 guineas; Mr. Watson, 24 guineas; Mr. Cullen, 21 guineas; Messrs. Needham, 17 guineas; Mr. Allen, 16 guineas, etc. The average for the 22 was £40 18s., and the prices ranged from 110 to 11 guineas.

Messrs. S. E. Dean and Sons sent twenty-five, the largest lot entered in the sale from any single flock. These rams were all in good request, at from 70 gs., at which price Mr. Stewart purchased for the Argentine, the same buyer also taking others at 48, 20, 20, and 15 gs. Mr. H. Dudding gave 50 gs. for his choice, a capital ram; but those selected by Messrs. Casswell and Money each cost 60 gs. Mr. F. Ward paid 42 gs., Mr. Watson 36 gs., Mr. Hankin (for Holland) 21 gs., Mr. Jackson taking one at this price to Yorkshire and another at 20 gs., Mr. Marshall gave 30 gs. Messrs. Needham 24 gs., Mr. E. H. Cartwright 25 gs., etc. The average for the twenty-five was £33 11s., and the range of prices from 70 to 13 gs. Mr. J. E. Casswell's nine were not so even as we have seen this flock's entries at some former sales, so far as regards prices realised. Mr. J. Redmore gave the top price, 52 gs. Mr. F. Ward was a good second, for he paid 50 gs. for his selection. Three others made 19 gs. each to Messrs. J. Brocklebank, Cooper, and Dickinson. Another went to Mr. Vergette at 16 gs.; two others made 14 gs. to Mr. J. Wilks (for the Argentine) and Yarrad, and the other made 12 gs. The average for the nine rams was £25 1s. 8d., and the range of prices from 52 to 12 gs.

Messrs. W. Crowder Brothers sent a real good lot of rams, for which was found a first-class demand. Messrs. P. and G. Hughes took the top-priced one at 32 gs., and they also secured two others at 26 and 13 gs. Messrs. S. E. Dean and Sons got a very fine ram at 27 gs.; Mr. Gale one at 22 gs.; Messrs. Wright two at 17 and 16 gs.; and Mr. Harvey one at 17 gs. The average for eight was £22 6s. 3d., and the range of prices 32 to 12 gs.

Mr. W. Taylor Sharp's consignment were one of the best we have seen sent from this flock for a very considerable time. Several of these rams were of a superior merit, and we were pleased to see they were appreciated. Mr. E. H. Cartwright gave the top price, 47 gs., and the ram secured was of high merit and nice type. Mr. J. Fisher's selection for his flock near Grantham, cost 44 gs.; this was also a ram of capital merit. Mr. J. Cartwright, of Dunstan, gave 40 gs. for another typical sire; and at the same price Messrs. T. Atkinson and Son purchased another. The next best price was 24 gs. to Mr. Pearson Gregory, then came 17 gs. to Mr. Cranfield, 16 gs. three times to Messrs. Pears, T. Barrow, and G. Sanderson. Three made 15 gs., one to Messrs. Wright and two for the Argentine to Messrs. J. Wilks and McLean. The average of this lot was £21 2s. 1d., and the range of prices 47 to 10 gs.

Messrs. J. T. and A. W. Needham sent a consignment that were not quite so even in merit as we have seen them. Some were real good rams, and had the consignment been smaller a much better average would have been made, and doubtless the lower grade of rams would have realised more money at the latter fairs. Messrs. P. and G. Hughes got the first sheep or ram of high merit at 46 gs.; they also took another pretty nearly as good at 36 gs. Mr. Leslie Stephenson gave 35 gs. for another, but for the remainder a lower range of prices prevailed; Mr. G. Marris getting a cheap ram at 14 gs., two others made 13 gs. to Messrs. T. R. Casswell and R and R. Hilton. The average for the fourteen rams was £17 5s. 9d., with the range of prices from 46 to 7 gs.

Mr. J. B. Nelson's eight were in good request. Mr. J. Evans took the top-priced ram at 23 gs., another went at 20 gs. to Mr. Pears. One made 16 gs. to Mr. Bayles, another 15 gs. to Mr. J. S. Cartwell, and two others 14 gs. to General Wilson and Mr. W. Seagrave. The average for the eight was £16 5s. 9d., with the range of prices from 23 to 10 gs.

Mr. J. Cartwright's consignment sold very well indeed, and made fully their value. Mr. Bemrose, the well-known judge, took two, one at 22 gs. and the other at 14 gs.; two made 17 gs. to Mr. R. Botherill and Machin, the last-named taking another at 12 gs. Mr. Brown, for Shropshire, gave 15½ gs. for one and Mr. Poels 15 gs. for another. The average for the twelve rams was £15 6s. 3d. with a range of from 22 to 11 gs.

Mr. S. Yarrad's consignment came into the sale ring in an attractive condition. These rams were in request. Messrs. Wright took three at 18, 17, and 14 gs. respectively; three others made 11 gs. each. The average for the eight was £13 5s. 1d., and the range of prices from 18 to 9 gs.

Mr. G. Langdale sent a very useful lot of rams that were in good demand so far as regards the best of them. Mr. W. Ward, buying, we understand, for the Argentine, gave 33 gs., the top price; Mr. C. E. Howard gave 28 gs. for another, and Mr. F. Ward 21 gs. for a third. Mr. Hensman's selection realised 14 gs., the next best price; Mr. Pears gave 10½ gs., at which figure Mr. C. E. Howard took one also; Messrs. A. Davy and Walter Ward gave 10 gs. for two others. The twenty rams averaged £12 2s. 6d., and the prices ranged from 33 to 5½ gs.

Mr. J. Redmore's top price was 14 gs., to Mr. W. M. Casswell, who also gave 12 gs. for another, at which price Mr. Croft also purchased. The average for the eight was £11 17s. 6d., and the range of prices from 14 to 10 gs.

Sir J. H. Thorold, Bart., sent his usual consignment. The best price here was 21 gs., to Mr. W. Savage for the Argentine, who also took others at 16, 12, 10 (two), and 9 gs.; Mr. Barlow gave 16 gs., Mr. G. Spilman 14 gs., Mr. Wilks, for the Argentine, 12 gs., etc. The average for twenty was £11 16s. 3d., with a range of prices from 21 to 6 gs.

Messrs. W. and W. H. Watson. The best price here was 16 gs., to Messrs. Money, who also took a second one at 9½ gs.; Mr. J. C. Mountain gave 13 gs., Mr. H. L. Barker 12 gs., and Mr. Pears got another at the same price. The average for the fourteen was £11 6s. 6d., with a range of prices from 16 to 6½ gs. Mr. H. Goodyear, from whose flocks several excellent stud rams have been purchased in former years, had a very even and typical lot of rams for sale. These were shown late and sent in store condition. The best price was 15 gs., to Mr. R. Turton; another made 10½ gs., to Mr. R. Botherill, and one 10 gs. to Tomlinson and Hayward, from which figure they ranged down to 7 gs., with an average of £10 7s. 4d. for eight.

Mr. G. Hoyle's five sold for an average of £9 15s. 8d.; the best price was 10 gs., at which two were sold, one to Mr. Batholomew, and the other to Messrs. Poels and Brewster, the remainder ranging down to 8½ gs. Mr. C. M. Johnson had in his consignment one outstanding ram, which, had it been in the hands of one of the leading breeders, would have made a long figure. As it was it went at 22 gs. to Mr. G. Spilman, Mr. Barker taking next highest-priced one at 11½ gs., and the remainder ranged down to 6 gs., with an average of £9 12s. 4d. for ten.

Mr. J. Evans had a dozen well-bred and very typical rams offered; like all the others offered at this sale, they were all sold; the best price was 10½ gs., realised for two rams to Mr. Fieldsend, two others making 10 gs., one to the last named purchaser, and the other to Messrs. Tomlinson and Hayward; the remainder ranged from this price to 5½ gs., giving an average for the twelve of £9 8s. 1d.

Mr. C. Hensman's entry numbered ten; 10½ gs. was the top price, to Mr. F. Scorer; two others made half-a-guinea less, to Mr. Poels and J. Copping, and the remainder ranged down to 6 gs., making the average £9 1s. 7d.

Mr. C. Rudkin entered and sold ten; the best price was 11 gs., to Mr. R. Chatterton; the remainder ranged from 9 to 6½ gs., and gave an average of £8 13s. 4d.

Mr. T. S. Pearson Gregory sent ten, and here again 11 gs. was the top price, Mr. R. Chatterton taking one at this price, and Mr. H. Coles, for Essex, another; the remainder ranged down to 5 gs., with an average of £8 10s. 1d.

Mr. W. H. Pates sent twelve, the best price for which was 9½ gs., to Mr. W. Pate, from which figure the remainder ranged down to 6 gs., with an average of £8 2s. 9d.

Messrs. Calthorpe and Briggs, Dickinson and Regall, Escritt, and Barrell, Howse and Lawrence, W. A. Richardson, Saul Bros., and J. E. Walter were the auctioneers engaged at these sales, which, as has been the case since 1892, are conducted under the rules and regulations of the Lincoln Long Wool Sheep Breeders' Association, of which Mr. S. Upton is the popular Secretary.

Sheep Fairs and Sales.

Chichester.

Messrs. Stride and Sons held their annual second sale of about 278 Southdown rams and ram lambs and 3,500 Southdown ewes and ewe lambs at Chichester Cattle Market on Wednesday. There was a very large company of buyers present from all parts of England, and several from Wales and Scotland. Trade for regular draft and young ewes was brisk, and the good prices realised at the first sale were well maintained. There was an excellent show of lambs, and with the harvest practically cleared and the better winter keep prospect after the recent rains, the best trade of the season was experienced. The entry of rams and ram lambs was very good indeed, considering that 420 were disposed of at the first sale, only three weeks previous. When the sale opened at eleven o'clock there was a large company present, and a good demand prevailed for the best shearlings and lambs, but secondary sorts, although they changed hands, met a dragging trade. A large number of rams were taken into Kent and Wales for crossing purposes. Shearling rams made from 5 to 16 guineas, and ram lambs from 3 to 8½ guineas.

The following were the principal buyers:—Mr. Mackenzie, for his Grace the Duke of Richmond and Gordon; Earl Cadogan; Mr. Ingram, for the Earl of Chichester; Duke of Grafton; Earl Amhurst; Mr. Beattie, for the Duchess of Newcastle; Col. McCalmont, Newmarket; Mr. Cook, Surrey; Mr. Geo. Duck, Petworth; Mr. Coryton, Liss; Mr. West, Liphook; Mr. Strong, Guildford; Mr. John Jones, Dinarth Hall; Mr. Holding, Kent; Mr. A. M. Singer, Michelgrove; Mr. S. Haines, Jun.; Mr. Pritchard, Wilts; Mr. Bradridge, Essex; Mr. Barclay, Dorking; Mr. Everall, Watergate; Mr. H. Neale, Lidsey; Mr. F. Neale, Felpham; Mr. Gray, Winchester; Mr. D. Humphrey, Amberley; Mr. Kenward, Lewes; Mr. Chissell, Oakley; Mr. Peacock, for the West Sussex County Asylum; Mr. King, for Mr. Tennent, Adsdean; Mr. Lintott, Guildford; Mr. Badcock, Ticehurst; Captain Barwell, Cowfold; Mr. Collver, Bersted; Mr. Carn, Petworth; Mr. Crutchley, Ascot; Mr. Challen, Midhurst; Mr. Calder, Edinburgh; Mr. Howard; Mr. C. Whicher, West Stoke; Mr. Issac, Wisboro' Green; Mr. A. H. Harris, Donnington; Mr. Mills, Portsmouth; Mr. Phillips, Shoreham; Mr. Rudwick, Cackham Towers; Mr. Jas. Reddaway, Hayling Island; Mr. Stacey Lewes; Mr. Shrewster, Billingshurst; Mr. Saillard; Mr. Street, Havant; Mr. F. Standford, Middleton, etc.

Haverhill.

There was a capital attendance at Mr. Chas. Boardman's annual sale of sheep and rams at Haverhill on 25th ult. Consignments aggregating to 2,200 were placed before the buyers, who came from a wide area. The quality of the sheep on the whole was very good, some fine Suffolk ewes coming from Mr. D. M. Gurteen's Hanchett Hall farm, whose entire flock was placed on the market. A pen of two-shear Suffolk ewes from this flock made 55s. per head; three shears, in lots of 24, 25, and 15, sold at 47s., 46s. 6d., and 47s. per head. Pens of full-mouthed registered Suffolk ewes from flocks in the district made 42s., 38s. 6d., and 39s. each. Some very good Suffolk shearlings were consigned, and in pens of twenties they changed hands at 53s. 6d., 53s., 52s.; 50s. 6d., 50s., 48s. 6d., 45s. 6d., and 44s. 6d. per head. There were a lot of lambs penned, and they sold at prices ranging from 30s. 6d. to 42s. The rams offered were of very good quality, and satisfactory prices were realised. A two-shear Suffolk from Mr. D. M. Gurteen sold at £5. Shearlings made up to £5 10s., this one coming from Mr. C. E. Webb, Nosterfield End. For the ram lambs there was keen competition, especially for those from Mr. J. T. Stockburn, Clare, and Mr. C. E. Webb's flocks. One from the latter consignor's made the top price of £6 5s., and others made £5 15s., £5, etc. Mr. Stockburn's consignment were sold at prices which reached £6 2s. 6d.

Warwickshire.

The weather was not altogether kind to the show of the Warwickshire Agricultural Society, held at Coventry, on Wednesday and Thursday, for the first day was dull and cold, with the result that the attendance of visitors was affected, and the takings fell short of last year. The second day, however, was more favourable, and the attendance was so good that it was thought the deficiency on the first day was more than made up.

As in 1900, when the society last visited Coventry, the exhibition was held on the King's Fields, Stoke, and covered an area of about 20 acres. Although a mile and a half out of the city, it was very accessible, a frequent service of electric trams running from the railway station to the entrance of the show ground, and thus visitors had no difficulty in getting to the show. The entries, so far as live stock is concerned, compared favourably with the shows of recent years. The total was 564, as compared with 603 at Leamington in 1904, and 540 when the exhibition was held at Coventry five years ago. The horses numbered 294—a rather substantial decrease on last year's figures—but compared with other recent years about a normal entry. The show of light horses was one of the best which has ever been held by the society; and, in most respects, the Shires and agricultural horses were well up to the average, viewed either from the point of numbers or of quality. Cattle numbered 143, an advance of 15; and an improvement was noticeable in the returns of sheep, which numbered 92; the other figures being as follows—pigs, 35; dairy produce, 36 (a big falling off compared with last year); eggs, 15; dressed poultry, 10; and implement stands, 63.

Horses, as previously remarked, were up to the average of previous shows, and in both light and heavy sections the classes were well filled, the exhibitors including some of the best-known breeders in the country. Shire horses were admirably represented, one of the chief winners being Sir Albert Muntz, who headed a strong class of two-year-old stallions with his Dunsmore Regent, a big horse with excellent movement, which has often been distinguished in the show-yard. Shire yearling fillies were fairly well represented and here Sir Albert came again to the front, this time with Dunsmore Flirty, a tall and well-proportioned animal which has won many honours. Sir Albert's noted champion, Dunsmore Fuchsia, was, as might have been expected, an easy winner in a strong class; and of the three-year-old fillies the best was Sir Albert Muntz's Bonny Blue, a thick, weighty mare, shown in the pink of condition, and she also secured the gold medal offered by the Shire Horse Society. Shire mares made a first-rate show, and here the premier award fell to Mr. Hamer Towgood, of Cambridge, with his noted winner Rolleston Fuchsia. Speaking generally, local tenant farmers responded well to the society's invitation. The best Shire foal was exhibited by Mr. H. J. Dewes, of Nuneaton, who brought into the ring a big brown colt, with perfect feather, feet, and joints. The foal also took the premier honour in the open class. Warwickshire farmers made a creditable show with agricultural horses; the classes were fairly well filled, and in several instances competition was keen.

There were twenty-eight classes of light horses, and they were capitally filled, there being a brisk competition, particularly in the hunter classes. Hacks were well represented. Mr. James Lea, of Kenilworth, scored well with his beautiful bay mare, Maypole. The animal has well nigh perfect action, and was shown in excellent condition. A nice type of bay gelding, five years old, headed a fairly strong class for animals over 14 hands. The standard of merit of the ponies was very high; indeed, it is a long time since a better lot was got together. The chief prize-taker was Mr. William Foster, of Moseley, who showed three animals all of which have been repeatedly honoured in the showyard. Much interest was taken in the hunter classes, and in the performances of the animals in the ring. A good-quality brown colt, which has the makings of a first-rate hunter, was shown by Mr. Kendall of Stratford, and to this exhibit fell the special award of a silver medal. Two-year-old fillies made an exceptionally strong class and were headed by Phyllis, a stylish moving bay, the property of Mr. Danby, of Leamington, which later was awarded the Hunters' Improvement Society's special. Breeding mares were a mixed lot, and of these a grey mare, the property of Mr. Haye, of Leicester, which was placed third, was given the silver medal of the Hunters' Improvement Society. There was, however, a lot of merit among the four-year-old hunters, and the three-year-old fillies and geldings, and in each Mr. Stokes, of Market Harborough, took the leading honours, as he has done at other shows this season. The best tenant farmer's hunter was shown by Mr. C. L. Kendall, of Stratford-on-Avon.

The cattle classes were well filled with good quality animals. Provision was made for Shorthorns, Longhorns, Channel Island cattle, and cattle best adapted to dairy purposes, of which there was an excellent collection. The Shorthorns were the more numerous, and among them were many magnificent specimens of the breed. There were only four bulls, over 20 months and under three years old, but they made a striking show; the winner was Meteor, a substantial white bull, the property of Mr. R. P. Cooper, of Shenstone Court, Lichfield. In the next class for Shorthorn bulls, not more than two years old—competition was limited here to tenant farmers who occupy land in the county of Warwick or within a ten-mile radius of Coventry—there was an outstanding winner in Lodge Crown Prince, the property of Messrs. J. Gowling and Sons, Hill Farm, Radford, Leamington. He is a heavy roan, a little over eighteen months old, and likely to take a prominent part at future shows. At this show he also took the prize of £10 awarded by the Shorthorn Society of Great Britain and Ireland for the best Shorthorn bull in the county of Warwick, calved in 1904. In the Shorthorn Society's class there was a good entry; no second prize was offered for competition, but the judges awarded two highly commended cards, being unable to overlook the merits of certain of the animals; indeed, a finer lot of Shorthorn bulls has never been previously seen at this show. The cows were numerous, and their quality of a superior kind, for many well-known owners and breeders entered into the contests, and the competition was rendered spirited and keen. There was a special class for the encouragement of pure-bred milking Shorthorns, the first prize being £10 given by the Shorthorn Society of Great Britain and Ireland. The cows were of any age, in milk, but eligible for and entered in Coate's Herd Book or pedigree sent for such entry previous to the show. The class was a strong one, but the judges had little hesitation in giving the premier award to Mr. J. C. Holland's (Warton Grange, Newport, Salop) Valentine, a roan, 5½ years old, and undoubtedly a grand specimen of a Shorthorn milker. With many of the cows in this class the judges were greatly pleased. The same may be said of the animals in the next class, in milk or in calf above three years old. Considerable interest was attached to the heifer class, for the animals collected here constituted a magnificent lot.

As usual at Warwickshire shows, the picturesque Longhorns made an excellent show. Mr. W. L. Riley, of Wyken House, Coventry, won in the class for bulls calved since January 1, 1901, with Wychnor Prince, a dark brindle and white, a magnificent bull, which took first prize at the Royal; whilst in cows (a wonderfully good lot) Mrs. Cheape, of Bentley Manor, Redditch, took first and third, and in the heifer class secured a second, the winner this time being Lord Gerard. The Channel Island cattle were few but good, Mr. James Joicey, of Poulton Priory, Fairford, Gloucester, taking second in the bull class and first in the cow or heifer class, whilst he was well in the running for the first prize in the bull class with Netina's Dairy Lad, but the judges, after careful and lengthy consideration, awarded premier honours to the Hon. Mrs. Murray-Smith, who showed Smiler, whole colour, a year and five months old. In the six classes for cattle best adapted to dairy purposes, remarkable success was achieved by Mr. F. J. Stanhope, Claybrooke, Rugby, he securing three firsts, three seconds, and two thirds in four classes.

There was a good collection of sheep, but only a fair competition, and the prizes were distributed amongst a section of the exhibitors, Mr. R. S. Potter, of Hawkeswell, Coleshill, gaining numerous prizes, and the bulk of the other awards going to Messrs. Richard Raywood, of Harley, Much Wenlock; R. P. Cooper, S. A. Berry, Nuneaton; W. Arkell, Fairford; G. Street, of Ampthill; J. Phipps Smith, Evesham; and G. Beale, Hinckley. Mr. R. P. Cooper occupied a prominent position among the Shropshire winners, as he always does at other shows. He showed remarkably good shearling rams, ewes, and ewe lambs in the best of condition. Mr. R. S. Potter also did very well in the Shropshires, showing symmetrical and compact sheep. In the Oxford Downs, Mr. William Arkell, of Fairford, took two firsts, with ram and ewe lambs.

Pigs were numerous and good. The chief successes were secured by Messrs. Sanders Spencer and Son, of Holywell Manor, St. Ives, Hunts, they winning the first prize and the National Pig Breeders' Association silver medal for both the best boar and sow of the Large White or Middle White breed; whilst in Tamworths Mr. R. Ibbotson, Knowle, had much his own way, he securing the gold medal of the British Tamworth Pig Breeders' Association.

The gentlemen who officiated as judges were—Shire and agricultural horses: A. J. Flowers, Aylesbury; W. Richardson, Doddington. Hunting horses, hacks, ponies, etc.; T. Clark, Brompton; John Cooke, Norwich. Driving: W. Evans, Wrexham, and Mevnell Hunt, Birmingham. Jumping: Sir P. Albert Muntz, Bart., M.P.; J. Mayfield, Parkfields, Alleslev; G. Whitmoor, Atherstone; J. Newton Jones, Redditch. Shorthorns, dairy cattle, etc.: James Peter, Berkeley; F. W. Lester, Winslow. Longhorns: W. S. Shaw, Fradlev. Channel Island cattle: G. P. Mead, Shrewsbury. Coventry butchers' prizes: J. Bausor, Coventry. Shropshire sheep, etc.: J. E. Farmer, Ludlow. Oxford Downs: D. Gibbard, Banbury. Pigs: C. R. Lynn, Stroxton, Grantham.

Derbyshire.

The two-day show of the Derbyshire Agricultural and Horticultural Society has gained for itself a wide and well-deserved reputation, and that held last week was fully up to the high standard of recent years. For forty years the society held its show in the Derby Cattle Market, but with the growing horticultural and poultry departments this site at last became too cramped, and last September a change of scene was made. The Midland Railway Company placed Osmaston Park at the disposal of the society, and this offer enabled those responsible for the arrangements to manage the 1904 show on better lines than had before been practicable. The result was that last year's show was a record from several points of view, though the number of competitive exhibits was under the average. The same showground was this year again utilised, and proved once again a most adequate one, although the entries—795—showed an increase of 100 on those of 1904, and this was a matter of congratulation on every hand. There was a record of 884 in 1901, while a year later the number was 880, falling to 852 in 1903 and to 695 in 1904, the last total showing a drop of 157. This year's recovery was mainly acounted for by an additional entry of sixty-two horses, whilst cattle numbered fifteen more.

The judges were:—Cattle: Shorthorns—J. W. Beech (Leigh, Stoke-on-Trent) and W. Porter (Loughborough); Channel Islands, Kerries, and Dexters—W. G. M. Townley (Grange-over-Sands). Horses: Shire and draught—Thomas B. Freshney (South Somercotes, Louth, Lincolnshire) and James Whinnerah (Carnforth); Hunters and Polo Ponies—the Hon. A. E. Parker (Doveridge, Derby); Hackneys—A. Fewson (Hedon, Hull); Leaping and bending—W. D. Winterbottom (Aston Hall, Derby), Gerald H. Hardy, M.F.H. (Derby), and J. H. Gascoyne (Derby). Sheep: W. Barrs (Tempe, Marsham, Atherstone), and Henry Smith, sen. (Cropwell Butler, Notts). Cheese, butter, and dairy produce: J. Pakeman (Chellaston, Derby) and R. W. Spriggs (Derby).

The show of horses in each department was most successful, especially in the Shire classes, which were exceedingly strong. Foals were a feature of the show. Mr. Elsey, of Hopwell Hall, offered a silver challenge cup for the best female animal in the Shire classes, and this was awarded to Mr. Egerton Orme, of Etwall, for Duchess, a beautiful three-year-old bay by Watnall Harold. Bearwardcote Fashion, shown by Messrs. Walwyn, of Etwall, being reserve. One of the conditions of the competition was that the animals had to be bred and exhibited by the owner, and as Mr. Orme's exhibit had not been bred by the exhibitor, an objection was lodged. Mr Orme unreservedly withdrew his claim to the trophy, which was duly awarded to Messrs. Walwyn's representative. A cup offered by Mr. J. W. Whitehurst, of the Markenton Stud Farm,

was won by Messrs. Hutchinson Bros., of Foremark Park, with Prince, a two-year-old bay by Pride of Blagdon. Mr. Deaville, of Strottle, was reserve with a chestnut by Brandmark. The gold medal of the Shire Horse Society was awarded to Mr. Philo L. Mills's well-known mare Hargate Bound, which has won all up and down the country, a six-month's-old black filly from the same stud being reserve.

The hunters formed a grand collection—in fact, it was admitted on all hands to be the best ever seen at Derby. Mr. F. B. Wilkinson, of Cavendish Lodge, Edwinstowe, Newark, was very successful, carrying off the majority of premier awards in the open classes. The medal offered by the Hunters' Improvement Society was awarded to Mr. Henry Boden, of The Friary, Derby, for Sweetheart, a smart-looking bay aged six years. Of Hackneys there was a very creditable display, whilst the saddle classes were particularly strong. The Hackney Horse Society's silver medal fell to Mr. A. W. Hickling, of Adbolton, Nottingham, for Adbolton Princess, a two-year-old filly which has won at all the principal shows, the same society's silver medal for the best mare or gelding exhibited in the harness classes being won by Mr. S. R. Tennant, of Driffield, with Authority, which gained premier honours in the open-to-all-England hack or roadster class (ridden), and the open-harness class. Wigginton Nook, the property of the Wigginton Stud, Tamworth, which won the open-harness class for horses between fourteen and fifteen hands, was reserved. The silver medal of the Polo and Riding Pony Society went to Mr. F. H. Unwin's (Farnah, Derby) Zoe, an old bay mare by Fitz-James. The Earl of Harrington's pony, by Nomination, was reserve.

In the cattle section Shorthorns were the most prominent, but they were more representative of Derbyshire than the country. In the open old-bull class Colonel the Hon. W. A. W. Lawson, of Melton Mowbray, led with Farmer's Glory, which was attended by Barton Prince, shown by Mr. F. Royle Bristowe, of Mildenhall, Suffolk. The prizes for yearling bulls were awarded to Mr. P. Walker, of Shipley, Ilkeston, and Mr. W. Holden, of Chevin, Belper. Bull calves were useful, the pick of them having been forwarded by Mr. T. Potter, of Daybrook House, Notts, and Mrs. W. F. Inge, of Thorpe, Tamworth. Mr. R. Shelton, of Ruddington, Nottingham, exhibited Ruth Clarence 33rd in a Shorthorn dairy class, and she won. In the remaining open classes Sir Oswald Mosley took three first prizes with Yours Faithfully, Proud Duchess, and Rolleston Regina, three animals which have more or less distinguished themselves in different showyards. The farmers' dairy cattle were creditable to the county. Four of the premiums for Channel Island cattle were taken by Captain L. G. Gisborne, of Allestree, Derby, whilst the Earl of Harrington and Mrs. C. Ratcliffe, of Loughborough, took a prize each. The four premiums offered for Kerry or Dexter cattle were awarded to the Duchess of Devonshire.

Sheep and pigs showed a disappointing falling off. Of the pigs, what entries there were were of remarkably good quality, but the restrictions on the removal of pigs are always reflected in the entries at the Derbyshire show. The sheep were moderate in quality, and probably the reason why there were no more than thirty-two on show is to be found in the fact that Derbyshire is not a sheep-breeding county.

A popular feature of the show was the butter-making competition in connection with the Midland Agricultural and Dairy Institute, Kingston, and the travelling dairy school of the Derbyshire County Council. Both institutions have done a great deal of good in improving the knowledge of butter-making among the farming community of Derbyshire. There were four classes, the competitions being confined to residents of the county, and the butter reached a fairly high standard.

Cheshire.

The show of the Cheshire Agricultural Society, held at Chester on Wednesday, was a successful one so far as the attendance of visitors was concerned, the total constituting a record, despite the fact that the weather was none too good. Thus the first of the five shows to be held in this town, instead of different parts of the country, justified the experiment. As to the show itself, however, there were some noticeable changes, which were brought about chiefly by the limitation of the society's radius to the county and a diminution in the number of open classes. This may have been the cause of the disappointing displays of cattle and horses, for the former were fewer than in any of the previous ten years, whilst horses have only been so few once during that period. Nevertheless, the total entry—2,151—constituted a record, the next highest being 2,016. The increase is accounted for in the fact that an horticultural show was introduced, and attracted 280 entries, whilst there were considerable increases in the classes for seeds, vegetables, dogs, poultry, and dairy produce. Although poor in number horses made a good show for quality, the best feature being the classes for brood mares and fillies. This was especially true in the case of the hunters. Heavy horses were not as numerous as those who have known the show for some years expected they would be. The judges, however, had no difficulty in finding for prize-winners animals which would hold their own in any showyard. Stallions, however, were exceedingly few, though the competition was open. The Shire Horse Society's medal for stallions was awarded to Mr. J. W. Kenworthy, Kelsall, for Delamere Warrior, a splendid beast which well deserved the honour. He was the only animal shown in the class for stallions foaled before 1902. Lymm Spark, a well-made two-year-old, shown by Mr. James Gould, was reserved for the medal. In the class for mare or gelding for agricultural purposes, first place was given to a five-year-old gelding, Invincible, shown by Mr. E. Davies, of Partington. This animal has not made many appearances in the showyard. The second in this class was Mr. J. W. Kenworthy's stylish filly, which took a first and a second at Liverpool, and has gained other honours, and on the present occasion she was awarded the Shire Horse Society's silver medal. The judges reserved for the medal Countess Belgrave, the property of Mr. R. E. Evans, a young bay, which was first in a large class for brood mares with foals at foot.

There was a fair display of hackneys, with a few excellent animals amongst them, but some of the classes were not well filled. In a good class of stallions the first prize was given to Mr. A. L. Goodson's Heathfield Fireaway, a smart young horse which is experiencing his first showyard season. The brood mares were of a useful type, and appeared in fair numbers. Here again Mr. Goodson was successful. His Polly Ailsa, nine years of age, was placed first, having Mr. J. Taylor's Ferrington Dulcimer a good second. Neither of these animals complied with the conditions of competition for Mr. Macfie's silver cup for the best roadster brood mare, fifteen hands or over, the property of a tenant farmer. This trophy went to Mr. John Beckett, of Betchton Stud, for a six-year-old chestnut, Baucis. Sir Lees Knowles gained two first prizes in the classes for mares or geldings foaled in 1902 and 1903.

Hunters made a very good show. Brood mares were a strong class, and Mr. R. Brocklebank's (Tarporley) Banshee, a magnificent brown just over eight years old, won fairly easily. Second to her was Whisper Low, a bay belonging to Mr. C. Schwabe, of Arden. Mr. Robert Needham, Knutsford, Mr. Noel Forward, of Whitchurch, and Mrs. M. Griffiths, Northwich, exhibited animals of excellent hunter types. The Hunter Improvement Society's medal for the best brood mare was awarded to an aged bay, Lady Templar, sent by Mrs. M. Griffiths, whilst a chestnut sired by Red Eagle, exhibited by Mr. C. Schwabe, won the society's medal for the best hunter filly.

Though some of the cattle classes were weak numerically, the beasts made a very select show. There were quite a number of good bulls. Amongst those above two years of age appeared Mr. Thomas Parton's roan Duke of Sedburgh. He is a weighty beast nearly five years old, but although he is said to have got past his best condition, he was able to take the first place in the favour of the judges. A roan of two years and a half, sent by Mr. George Cooke, of Chester, was well worthy of the second place. In the competitions for younger bulls, Mr. J. A. Brown, of Tarporley, Mr. Richard Clarke, of Warrington, and Mr. Charles Bell, of Norley Hall, gained prizes. The dairy cows made excellent classes. The cows sent by Mr. S. S. Raingill, of Altrincham, easily got before all their competitors. Mr. Raingill's famous cow Blue Bell, which appeared in the class for pairs, won the Day challenge cup and the Chester traders' cup. In the class for dairy heifers under two years old Colonel Cotton-Jodrell gained all the three prizes.

There was a marked improvement in the sheep in respect both of breeding and numbers. The short wools were nearly all of the Shropshire breed, and were of a rather better type than those usually seen at a Cheshire show. The long wools were of the improved Leicester and the Lincoln types.

The pigs, which were well classified, came from some of the best breeders in the county, and made a decidedly creditable show. Sir Gilbert Greenall sent a number of fine animals which found their way to the top in the classes in which they were entered.

"RATIONAL PIG-KEEPING."

If you wish to learn all about Pig-Keeping, and have the subject analysed and placed before you in simple language, read this book. You can readily obtain all the information you require. *Beautifully Illustrated.*

Arranged in ten sections, each with many sub-sections.

SHOWS IN BRIEF.

Airedale.

Although in its thirty-eighth year, the Airedale agricultural show was on the point of dropping out of the list this season, for the attendance at the last annual meeting was so small and the interest apparently felt in the society's fortunes so meagre that the abandonment of the show was talked of. But this talk only had the effect of arousing the local people to a sense of what was due from themselves, and so a show was organised after all, and it took place on Wednesday in the pleasant grounds of the Grammar School at Bingley. The weather was cloudy, but the rain kept off until late in the afternoon and the attendance of visitors was large, so that the society, with £100 already in hand, need no longer think of dropping their show. At the luncheon a great deal was said about motor-cars, and among those present was Mr. Tom Mitchell, the well-known breeder of Hackneys, who, through one of the ironies that sometimes come across a mortal's path, had his arm in a sling, the result of an accident in a motor-car! He was, it appears, going up a moorland hill when the engine failed, and he was backing the car into a ditch, when it toppled over on him. Mr. Mitchell laughingly admitted the incongruity of appearing at an agricultural show with his arm in a sling, the effect of a motor accident, but as excuse said we were living in a progressive age. The Mayor of Bradford had, he said, advised people to learn motor-car driving. He (Mr. Mitchell) was going to attend that school. He had been recognised as one of the steadiest of drivers, but he now found that the steadiest drivers had the most accidents.

Buxton Horse.

Unfavourable weather has in past years generally been the lot of the Buxton and High Peak Horse Show Society, so that to have it dry even on Friday was a change, but if it had been a little warmer it would have been all the better. The society has lost a good deal through past inclement weather, but there was a good attendance last week, and some of the deficit should be made up as a result of this show. The entries totalled 305, an increase of three as compared with 1904, and of 27 as compared with 1903, whilst the quality, generally speaking, was distinctly good. Hunters were quite the feature of the show. Included in a dozen classes were a remarkably well-bred lot of animals, the mares shown being especially of a very high class. Mr. R. B. Tennent and Mr. F. B. Wilkinson pretty well shared the majority of the honours. The couple of awards offered by the Hunters' Improvement Society for the best hunter brood mare and the best hunter filly were both taken by Mr. Tennent. Taking the youngsters altogether they were a very blood-like lot, and though the yearling, two, and three-year-old classes were only poorly filled in regard to numbers they produced some excellent quality. Hackneys were a very uneven lot; all the winners were far in front of the animals which did not get into the honours list. However, the open class for mares and geldings shown in the saddle gave the judges a good deal of trouble, and there was practically very little to choose between the first, second, and third prize winners. Previous years have brought together a better show of Shire horses; the best, however, being found amongst the mares, which were a fairly good lot. Filly foals were more numerous than colt foals, but were not nearly so good in quality.

Cleveland.

The Cleveland Agricultural Society is most unfortunate as regards the weather experienced for their annual show, it being most unfavourable for several years past, and once again, on the 26th ult., it did everything possible to spoil the event. From early morning a persistent small rain fell to the accompaniment of a cold east wind, with the result that, whereas the attendance might have been measured by thousands, it was computed by hundreds. In view of the fact that the society has arrived at a crisis in its history and special efforts had been made to make the show successful, the sequel, so far as the weather and attendance were concerned, was grievously disappointing. This was the more tantalising considering that a record entry had been received, the total being 1,008, or an increase of over 300

on last year's total. Not only were the classes of the several sections well filled, but the quality throughout was uniformly excellent, and in advance of last year's show.

Craven.

Despite the fact that rain fell heavily all the previous afternoon and evening, the show-ground of the Craven Agricultural Society at Skipton on the 26th ult. was in fair condition, and the show proved a great success, being visited by a very large number of persons, whilst there was an exceptional number of exhibits; 1,539 was the total - the highest but one in the society's career of fifty-one years, and 125 in advance of last year's record. The increases were in the sections for horses, sheep, pigs, poultry, pigeons, and dogs. The quality of the exhibition as a whole was quite up to the average of former shows in fact, one of the vice-presidents described it as the best show all round seen in Skipton for half-a-dozen years.

East Somerset.

The annual show of the East Somerset Agricultural Society was held at Wincanton on Thursday, in splendid weather. The society, since its fusion with that of Bruton, justly claims to be the oldest district organisation in the county, the joint work having been carried on for considerably over a century. All evidences were in favour of the exhibition, every department showing a vitality most encouraging to the committee, who on their part spare no pains to make the fixture an annual success. The entries, except those of butter, showed an increase in numbers all along the line. The details read:—Cheese, 199; butter, 15; cattle, 49; hunters and nags, 90; and agricultural horses, 18. The cheese did credit to this well-known dairy district, both in number and appearance. In the first class there were many excellent samples, although in some of the other events there was a deal of immature cheese, which a week or two later will doubtless pass for prime stuff. Competition in some of the classes was very keen; otherwise the judges had a fairly easy matter to place in order of merit, their most difficult task being the first class. Butter on the whole was fairly good, although some of the entries were lacking in colour and flavour, some unquestionably through over-churning. There was a capital lot of dairy cattle, and the old frequenters of the exhibition were loud in their praises of the horse section, especially the hunters.

Fareham and Hants Farmers' Club.

Delightful weather favoured the Horse Show of the Fareham and Hants Farmers' Club at Aldersnap Meadows, Petersfield, on Friday, this being the third time since its establishment fourteen years ago that the show has been held at Petersfield, the first being about eight years ago, when, unfortunately, the weather was very unpropitious, and the second four years back, when the gathering was a record one. On Friday another record was achieved, the entries being strong in all classes and the competition keen. Cart horses were a fine lot throughout, and were more numerous than ever. Hunters, harness horses, and polo ponies were also well represented, and altogether it was a most attractive show.

Garstang.

Established something like 100 years ago, the Garstang agricultural show has grown from very small proportions to a fixture of some importance, for that held on Thursday attracted 1,600 entries. The Fylde district is famous for the quality of the Shire horse it rears, and, as Garstang is right in the heart of it, it is natural that this section should be very strong, both as regards quantity and quality. Light horses were somewhat few in number, and were not remarkable for quality. Sheep were excellent, and were the best ever seen at this show. In the cattle classes bulls were specially noticeable, and included some of the winners at the Lancashire County and Great Yorkshire shows. In addition to the ordinary agricultural exhibits there was a horticultural section, which included about 300 entries and a good display of dogs.

Guildford.

Rain fell during the progress of the annual show of the Guildford Agricultural Society, held at Guildford on Wednesday, but this did not seriously affect the attendance. On the other hand, the number of visitors was the best in the history of the society. The show itself was an exceedingly good one, the radius restrictions in the county classes letting in several well-known breeders, and all round the entries, both in quality and quantity, were up to, and in some cases above, the average. The hunters made one of the best groups in the show, a fine lot of blood mares being headed by Mr. Ernest W. Robinson's Gulden, whose filly foal is by Merman. The chestnut mare Gaiety Girl, the property of Mr. John A. Mullens, was second. A prize was offered by the Committee of the West Surrey Staghounds for the best weight-carrier, and it was won by Mr. F. Dartnall's unnamed brown gelding, while the pick of the five-year-olds was Mr. Mullens's Sheen. The medal of the Hackney Horse Society was awarded to Mr. R. P. Evans's pony, Polyanthus. The best exhibits in the live-stock section were the Shorthorns of Lord Calthorpe and Mr. Jeremiah Colman, the former's Sweetheart, bred by Queen Victoria, winning the Duke of Northumberland's special prize which was offered for the best cow in calf or with a calf at foot. The Channel Islands breeds were very representative, Mr. A. F. Perkins's Dort winning the late Mr. W. M. Chinnery's prize as being the best bull in the section, while Lily Duchess of Marlborough's prize offered for the best heifer went to Mr. H. Rhodes Cobb's Maid of Honour. The Duke of Northumberland won all the leading prizes in the section for Southdown sheep, and Sir Alexander Hargreaves Brown, M.P., and Mr. W. G. Langlands were the most successful exhibitors of pigs.

Leominster.

The show of the Leominster Agricultural Society, held at the Easters, Leominster, on Thursday was one of the most successful yet held. Some two or more years ago it was feared that the society must be abandoned, but, thanks to the efforts of the local committee, of which Captain E. L. A. Heygate is chairman, there has been a revival of public interest, and the future now seems assured. The exhibits, numbering about the same as last year, fully maintained the reputation of the show. There were, as might be expected in the home of the well-known Herefords, some excellent specimens in the cattle classes, while the horses were a fine display, the awards in some of the classes being a matter of no little difficulty. The weather being fine, a large crowd watched the ring competitions, whilst the dog trials were a great attraction.

Lord Londonderry's Tenants.

Nine years ago the Marquess of Londonderry established an agricultural and horticultural show at Wynyard Park, Stockton, for the benefit of all classes connected with his extensive estates, farmers as well as cottagers, and in the matter of quality it has become a model of what such shows ought to be, that held on the 26th ult. being particularly good, though the same could not be said of the weather. The number of entries supplied ample evidence of the interest taken in his lordship's efforts, but Lord Londonderry will not be contented until every tenant sends something to the show. As compared with twelve months ago, there was this year a great increase in the entries for all departments, and the total of 952 compared favourably with the record entry of 988 in 1898, when the show of flowers and vegetables was responsible for 80 more entries than on the present occasion. This remark implies an increase in the other departments, and it is pleasing to be able to record that the horse entries were 30 in excess of those of the record year; whilst the quality was better than ever.

Worsley.

Although the area over which the Worsley Agricultural and Horticultural Society's operations extend is largely urban in character, a good deal of farming is carried on on the outskirts of the numerous small manufacturing towns which the district includes. And that the farming is of the successful kind was evidenced by the quality of the entries in the local classes at the show held on the 26th ult., and by the position obtained by many of the same exhibitors in the open competitions. The total number of entries was 2,867, of which 983 were horticultural, and, as to quality, this was very meritorious. Heavy horses were perhaps the feature, some well-known prize-winners being forward. Cattle were a serviceable lot, whilst a few pigs were shown, but no sheep. Dogs, poultry, pigeons, etc., added to the attractiveness of the show.

Rural Housing Question.—The Earl of Crewe, in the course of a lecture, given at the Oxford University Extension Summer Meeting on the Housing Problem, said the rural depletion could fairly be ascribed to the housing difficulty. The average wage of agricultural labourers would not permit them to prove lucrative tenants. The remedy seemed to be the provision of cheaper houses and the multiplication of small holdings in suitable places on which these cheaper houses could be built. Though our climate forbade certain cheap structures, still he thought there had been a rather pedantic adherence to solid British ideas in the bye-laws by which the erection of buildings was regulated. When there was real cause for the creation of cottage holdings and land could not be acquired by agreement there was reason for the intervention of local authority.

MILLING.

Wheat Strengths.

The flour trade still keeps quiet, and most bakers are only buying for immediate requirements. The offal trade is fairly brisk for the time of year, and most millers can manage to keep clear of these products.

Although the recent wet weather has interfered with threshing, new wheat has been coming to the mills freely. In most cases both yield and condition are satisfactory, enabling millers to use more in their mixtures. Great care, however, should be exercised in this direction just at present. Of course, the quality of the wheat varies, but some samples, both of white and red, have never been beaten. One sample of red on a country market was clean, plump, and in splendid condition, and gave the appearance of possessing strength in a remarkable degree for home-grown wheat. Several samples of white wheat which the writer saw were excellent, and could not be beaten. The weights did not transpire, but undoubtedly they were high. These red and white wheats are what millers like to get hold of, instead of the yellow varieties.

Although they have little strength, they are just the kinds to provide colour and flavour. At the same time, the judging of a wheat for strength is sometimes deceptive. Strength implies gluten of good quality—gluten which will not dissolve in water. From the time of earing to that of ripening the wheat plant went through just the kind of weather to produce gluten of the right quality, and the writer would not be surprised if, generally speaking, English wheat is not found to be stronger than usual. After a very wet ripening and harvest-time this wheat often contains a great deal of gluten, but it is of the ragged sort, which will easily dissolve in water. In the matter of gluten, it is quality which is wanted, not quantity.

Good Profit from Grass Land.

The hay crop on Mr. Ernest Parke's experimental grass fields at Kineton once again affords to occupiers of naturally poor clay land pasture a useful lesson on the results that may be achieved by a little enterprise in the direction of manuring. Both fields have been under grass about thirteen years, and are annually mown in the summer and grazed in the autumn. The portions under experiment are divided into various half-acre plots, manured (in accordance with Dr. Dyer's advice) with super-phosphate, potash salts, and nitrate of soda separately and in combination, basic slag being substituted for superphosphate in one of the fields, the soil of which is poorer in lime than the other. In each case a plot is preserved for comparison, which gets no manure except that incidentally supplied by autumn grazing. The unmanured plot in Upper Hale Field this year gave 14½ cwt. of hay per acre, which is more than the unmanured land has yielded in any of the last three seasons. Basic slag alone (5 cwt. per acre) raised the yield to two tons of hay per acre, and nitrate of soda alone (2 cwt. per acre) to two tons 1 cwt. When both dressings were combined, the yield was 2 tons 5 cwt. of hay per acre—an increase of more than 1½ tons of hay per acre over the yield of the unmanured land. The application of sulphate of potash in this field increased the yield only very slightly. On the field known as Five and Three Acres the unmanured plot this year gave 11½ cwt. of hay per acre. The application of 3 cwt. of superphosphate per acre raised the crop to 1 ton 16 cwt., and 2 cwt. per acre of nitrate of soda alone raised it to 2 tons 1 cwt. Superphosphate and nitrate of soda used together gave 2 tons 3 cwt., which in this field was further increased to 2 tons 7 cwt. by the addition of 1 cwt. per acre of sulphate of potash, showing an increase of 1¾ tons of hay per acre over the unmanured land. During the last four seasons the annual gain due to manuring on the best plots of the two fields has averaged nearly 1¾ tons of hay per acre, in return for an average annual expenditure of about £1 16s. per acre for manures. Although the plots are all autumn-grazed, and therefore under natural farming conditions, the manuring is already found, as at Rothamsted, to be altering the character of the herbage. The plots with nitrate alone are more grassy, and those with mineral manure alone have more clovers. The most flourishing mixture of herbage, however, as well as the heaviest crop, is found, as should be expected, on the plots receiving both nitrogenous and mineral manure.

The Marquis of Bristol has, as an experiment, started a movement to provide a Saturday market for the allotment and other small holders on his estates in the neighbourhood of Shotley, Suffolk, and, as a nucleus, has supplied a number of light stalls.

Our Butter and Cheese Imports.

Messrs. W. Weddel and Co., of 16, St. Helen's Place, London, E.C., etc., have issued a most interesting review of the Colonial dairy produce trade for the year ending June 30, 1905. Numerous figures and details are given of the various imports, and these cannot fail to be of the greatest interest and usefulness to all concerned in the trade, whilst to the British farmer the figures will reveal how large a quantity of butter and cheese we import into this country. From the review we make the following extracts:—

The imports of butter into the United Kingdom were in the year 1886 first entered separately from those of margarine, when 77,178 tons of butter of the value of £8,141,438 were received. Ten years later the imports had risen to 151,886 tons valued at £15,344,364, and last year (1904) the large amount of 212,050 tons of the value of £21,117,162 were imported, which shows an increase since 1886 of 134,872 tons in amount and of £12,975,724 in value. In 1886 the import of cheese was 86,745 tons valued at £3,871,359. In 1896 the amount had risen to 112,226 tons and the value to £4,900,342, while in 1904 the import reached 127,715 tons and the value £5,843,770, which shows an increase of 31,358 tons since 1886 of the value of £1,972,411

Butter.

The large and steady augmentation in the imports of butter into the United Kingdom, which, during the last decade especially, had continuously gone on, culminated in the year ending June, 1904, with an increase of 18,700 tons over the previous twelve months. In strong contrast to this continuous growth, which averaged for the last decade over 8,000 tons a year, the twelve months ended June 30, 1905, show the enormous decrease of 15,046 tons. This fundamental change in the position of imports was due to the severe drought on the Continent of Europe, chiefly in the centre and south, which existed all through the late summer and autumn of 1904. So great was the heat and the lack of rain, that, in those parts of Europe, nearly the whole of the grass crop and the second crop of hay were total failures, and farmers and dairymen in the late summer and autumn were unable to make anything approaching to their usual output of butter, and, unfortunately for them, they were further compelled to largely reduce their milking herds during last winter, owing to the impossibility of providing sufficient fodder for their cattle. Even up to to-day they have not been able to replace their normal number of cows.

The total imports of butter from all countries for the year ended June 30, 1905, was 203,897 tons, of which 152,015 tons were from foreign sources, and 51,882 tons from British Colonies. It is gratifying to our racial feelings to record, that though our total foreign supplies of butter decreased by 21,558 tons in 1905, our Colonial receipts increased by 6,512 tons. From the year 1900 to 1903 inclusive, Colonial supplies of butter steadily declined, and those from foreign sources steadily increased. Since the last date, however, there has been an absolute reversal of this position, Colonial has yearly augmented and foreign similarly diminished. Our imports of butter from Germany have almost reached their vanishing point. About twenty years ago Germany exported to the United Kingdom 15,000 tons a year, but this amount has gradually declined until for last year it was below 100 tons. Early in the nineties of last century Germany changed from an exporting to an importing country, and the surplus of imports over those of exports were in 1904 about 30,000 tons. For each year from 1896 the excess of imports over exports have been 726 tons, 6,482 tons, 7,697 tons, 9,902 tons, 14,097 tons, 14,619 tons, 12,668 tons, 22,129 tons, and 30,000 tons respectively.

Cheese.

The imports of cheese into the United Kingdom during the last six years remain practically stationary, and as the home production exhibits a similar condition, it is evident that cheese is losing its former relative position in the British dietary, and trustworthy evidence shows it is being replaced by the importation of Colonial and foreign frozen meat, which, owing to its cheapness and excellent quality, is economically supplanting cheese. Although the total imports of cheese for the last six years show no increase, changes are steadily being made in the amounts sent by the various exporting countries. The Colonies are making rapid progress in supplying our markets, owing to the excellent quality of their product, and during the last ten years the receipts from this source have grown by 33,902 tons, and for the past six years by 21,678 tons.

Foreign cheese, on the contrary, is steadily vanishing from our tables, espécially what is known as hard cheese, such as the cheddar class. The soft cheeses of France and Belgium, such as the Camembert variety, are holding their position with difficulty, but as the total supply of this kind is only 4.5 per cent. of the whole, it has little effect on the general position. The total import of foreign cheese in the last ten years has declined by 18,851 tons, and in the past six years by 28,185 tons. There are only four main sources from which our supplies of foreign cheese are received, two of them, France and Belgium, as above stated, are holding their very small trade with difficulty, while exports from Holland and the United States of America are steadily declining. The imports of Dutch cheese have fallen from 17,000 tons in 1900 to 10,700 tons in 1905, while American has declined in the same time from 32,000 tons to 9,000 in 1905. The imports of cheese from New Zealand during the last ten years have increased 1,100 tons, but for the past six years by only 100 tons.

Butter Prospects for next Season.

The expectation expressed last year that the supplies of butter from Australia would show an increase of 20 per cent., and the doubts then cast upon an anticipated increase of 30 per cent. have been fairly fulfilled, as receipts have totalled only 19 per cent. For the coming year it is difficult to gauge the increase, but considering that the extraordinary growth in the imports from Queensland is most unlikely to be continued in the same ratio during the coming year, and the uncertainty of the climate over such a length of country from north to south as is presented by the three States of Queensland, New South Wales, and Victoria, viz., some 2,500 miles, it is a liberal view to expect an increase of 4,000 tons, which is nearly 18 per cent. Last year all of these three States were fortunate in their rainfall, and consequently fertile pastures were universal. From New Zealand, which possesses a climate less liable to great fluctuations of temperature than Australia, an augmentation of 1,500 tons may be expected, as that is about the average normal growth of the past five years. From Canada supplies for next winter are certain to be less. Since the first of May this year, though receipts have been larger than last year, they have mostly gone into consumption, instead of as in former seasons being put into cold store for winter use, consequently the reserves of Canadian butter for use during the coming winter will be considerably smaller than usual.

The Continent of Europe will certainly supply more butter than it did in the past twelve months, as, although the weather has been hot and dry over the drought area of last year, the pastures and hay crop are better than they were then, but they are still much less than normal, and as the milking herds are considerably below their usual numbers, it will be impossible to make up the heavy shortage of the past season's butter production during the ensuing winter. From the United States, and from Argentina, no increase worth mentioning can be expected, as the latter country finds a better market for its export butter in South Africa than in the United Kingdom, and the former finds its home requirements capable of absorbing all its supplies.

The Home supplies of butter will certainly show a decline, as the hay crop for Great Britain this year is estimated at nearly 5 cwt. per acre, or 17 per cent. below that of 1904, which makes a deficiency of about 1,750,000 tons of hay. For Ireland the estimate has not yet been published, but the crop is certainly not equal to last year. It is probable, therefore, that the make of butter in the United Kingdom will show a shortage of about 1,500 or 2,000 tons in comparison with 1904, when the production was the largest on record.

The General Outlook.

therefore, leads us to expect this year during the time Australasian butter is on our markets, an increase of 4,000 to 5,000 tons from Australasia, and about 3,000 tons from Europe. As our normal increase of imported butter averaged 8,000 tons a year for the decade ending 1904, the increased supplies, just mentioned, will about meet this, but there is the leeway of 15,000 tons shortage during the year ended June, 1905, to make up. With the shortage in the Home production, and with not a fourth of the normal amount of butter of all kinds in cold store, the prospects clearly point to a higher level of prices for the coming season. Probably nearly an average of 7s. 6d. per cwt. above last year will not be far from correct, and if any recurrence of a partial drought appears in Australia, or from some unforseen cause supplies are reduced elsewhere to any appreciable extent then the higher level of prices will certainly exceed 7s. 6d. per cwt.

Cheese.

Owing to the larger make of butter in Canada there is not room for any great expansion in the supply of cheese from that colony. Indeed there is a general expectation that the make will show a reduction. New Zealand will not add any increase, and the only country likely to do so is Holland, from which our receipts may be augmented to the extent of 2,000 tons; but as this is not 2 per cent. of our total supply, it cannot seriously affect prices. The outlook for cheese, therefore, leads to the conclusion that values will at least average about the same as for the year just ended.

The Standard of Butter Fat in Milk.

A valuable test of the average product of milk in the instance of a typical herd of some thirty cows was made by a representative of the Board of Agriculture last June and July. The returns, now carefully tabulated in the form of a chart, show that the milk then produced very seldom fell below the regulation standard of 3 per cent. of butter fat, and frequently exceeded this ratio. From this, however, it is clear, as the Board say, that dairy farmers who desire to escape the annoyance of having their milk challenged should have samples tested at intervals. This can be done for 6d., plus postages, by sending the sample to the nearest agricultural college or agricultural department of a university.

Nantwich Cheese Fair.

Mr. Challinor reports as follows:—Pitch about fifty tons; good attendance of buyers; trade fairly brisk, prices for best lots 56s. to 62s.; medium, 50s. to 55s.; lower qualities down to 45s.

Cheese from the Bath and West School.

The second draft (over 40 cwt.) of this year's cheese made during the month of May at the Cheese School carried on by the Bath and West and Southern Counties Society for the Somerset County Council at Glendale Farm, Wedmore, has been sold to Messrs. Hill Bros., of Evercreech, at 62s. per cwt. of 112 lb. 5,235 gallons of milk made 4,942 lb. of green cheese, which weighed, when sold at 12 weeks old, 4,671 lb., showing a shrinkage of about 5½ per cent. The School has been well attended by students, 33 having already entered, while other applications are still being received.

Agricultural Imports.

The following is an account showing the quantities of certain kinds of agricultural produce imported into the United Kingdom in the week ended August 26, 1905, together with the quantities imported in the corresponding week of the previous year:—

	1904.	1905.		1904.	1905.

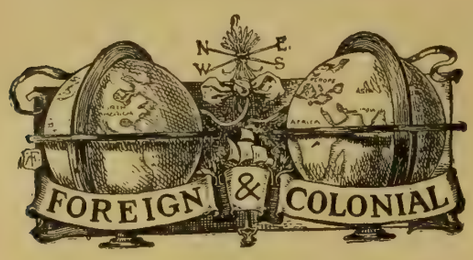
British Possessions
beyond the Seas
AND THEIR
London Representatives.
NOVA SCOTIA.

Offers advantages to British Agriculturists with moderate capital. Improved Farms at Low Rates. Fertile Lands. Famous Fruits. Enormous mineral deposits of Coal, Gold, Silver, Iron, Copper, Lead and Tin. Climate temperate and healthy. Easily accessible to all the principal markets.—Full information supplied by the Agent-General for Nova Scotia, MR. JOHN HOWARD, 57a, Pall Mall, London, S.W.



Crops and Live Stock of South Australia.

The Agent-General for South Australia has received the official agricultural (other than wheat) and live-stock statistics for the year ended March 31, 1905, and the figures prove how rapidly the farmers and other producers are increasing their material wealth. The statistics for March, 1904, showed great improvement over the preceding year, and the following comparative figures prove the solid advance made till 1905:—The number of horses increased from 176,648 to 183,481, milch cows from 83,348 to 88,156, horned cattle from 161,262 to 184,303, sheep from 5,298,720 to 5,820,301, pigs from 88,246 to 111,497; goats, poultry, and bees increased similarly in numbers. The number of vines is 12,300,000, and of olive trees 83,138, from which 2,625,430 gallons of wine and 15,980 gallons of olive oil were respectively produced.

Fruit-growing is flourishing, and the growing of apples for export is making great strides. During the year 101,814 apple trees were planted, gringing the total number of these trees to 688,031, from which 362,436 cases of apples were obtained. Apart from land used for pastoral purposes, the quantity of land cultivated increased to 3,316,574 acres, of which 112,000 acres were devoted to vine-growing and fruit-raising, the balance being utilised for wheat and other cereals. The information respecting the state of the growing crops shows every promise of a harvest even more bountiful than the last.

A Splendid Offer.

The New South Wales Exhibition at the Guildhall has created much interest, and the huge nuggets of gold, the innumerable fleeces of merino wool, samples of grain, minerals, and produce have aroused the keen interest of over 25,000 visitors during the past week. Lord Jersey, who has always taken great personal interest in Australian affairs, paid a prolonged visit to the exhibition. To those who have expressed doubt as to the desire of Australia for new settlers, it will come as a surprise to learn that the Premier has now set aside 50 farms, varying from 200 to 500 acres, in the best district of New South Wales, which will be allotted to the first British applicants. These are improved freehold farms, all ready for the plough, and at a cost of from 2s. to 3s. per acre per annum, paid over a series of years, new settlers can secure a comfortable and prosperous freehold homestead in one of the choicest farming districts in the world. It seems an opportunity that should not be missed. Full particulars may be obtained at the New South Wales Government Office, 33, Eastcheap, London, E.C.

Local Taxation.—A Parliamentary Return was issued last week showing, in respect of the financial year ended March 31, 1905, the distribution of the local taxation licence duties, estate duty, and local taxation (customs and excise) duties paid into the local taxation account in pursuance of the provisions of the Local Government Act, 1888, the Local Taxation (Customs and Excise) Act, 1890, and the Finance Act, 1904. The total amount paid to or on behalf of the councils of administrative counties or county boroughs in England and Wales in respect of the duties mentioned was £6,889,494 15s. 2d. Of this amount, £150,000 was paid to the Receiver for the Metropolitan Police District, in aid of the Metropolitan Police Pension Fund.

Agriculture in Holland.
VIII.*
Typical Friesland Farms.

The Friesland farms intended for cattle-rearing have, as a rule, an acreage of about 75 to 100 acres. The purpose of the breeding is to get cows which give a large yield of milk with a high percentage of fat. Quantities of about 1,135 to 1,365 gallons per cow during one milking period are not rare. Good dairy farms have an average output of 900 gallons of milk, with 3 per cent. of fat, per cow per milking period. Breeders who make a speciality of breeding cows with a great milking power obtain results far beyond the results given above. To what extent the capacity of the Friesland milch cow can be improved can be seen from the results obtained by Mr. Kuperus. At last year's exhibition at St. Louis a Dutch cow of Friesland breed obtained the first prize in the international competition with seventy-four cows of four different breeds. The production of this cow was 330.26 lb. of butter (286.6 lb. butter-fat) in 120 days.

No wonder that the Friesian bull and cow have been used in nearly every part of the world for breeding where great milking capacity of the cows is required. In the United States of America, Sweden, Transvaal, Russia, Spain, and Italy there is still a great demand for Friesian breeding cattle. As a rule, the Friesian horn cattle are large and heavy. On clay grounds they attain a height of 1.35 to 1.42 metres (53½ to 56 in.), and a weight up to 750 kgr. (1,650 lb.). On the moor grounds the medium-size cow is found with a height of 1.31 to 1.34 metres (52 to 53½ in.), and a weight of 600 kgr. (1,450 lb.). On the sandy soil the average height is from 1.28 to 1.31 metres (51 to 52 in.). The colour is usually black-spotted.

Since 1897 the milk of each cow of the farm has been tested every fortnight, in the evening and the next morning, separately weighed, and put to the test in fat-property by a controller. By selling the bad ones and breeding the best ones, the result is that the average amount of fat in the milk of the whole season has been:—

	Per Cent.
In 1897	3.15
In 1898	3.28
In 1899	3.39
In 1900	3.46
In 1901	3.47
In 1902	3.44
In 1903	3.50
In 1904	3.52

The highest milk produce of a cow has been 1,865 gallons of milk in 329 days, and the highest butter produce of a cow has been 615 lb. of butter in 317 days. The cows calve for the first time when two years old, and, with some exceptions, it takes place in the months of February and March. The cattle are taken to the meadows about May 1, and stay there till about November 1, after which they are taken into the stable, to stay there again till about May 1. During the last six months the cattle are plentifully fed on hay, with one or two linseed cakes daily.

The farm is rented from an institution, and has a selling value of about £66.14 per acre. The hay-barn, stable, and living-rooms are all under one roof. Mr. Kuperus enjoys a high reputation in the Netherlands as a rearer of cattle, and numerous are the prizes which he has won at cattle shows.

This brought to a conclusion a week of varied experience in the practice of Dutch farming, which the party will never forget. Everywhere the visitors went they were received with courtesy and goodwill. Never before has such an itinerary been accomplished in Holland, and the impression derived from the excursion will remain long a pleasurable memory to those who had the good fortune to take part in it. I cannot, therefore, allow this opportunity to pass without tendering my thanks to the members of the Reception Committee: Messrs. P. J. A. De Bruine, president of the Netherlands Agricultural Committee (chairman); F. B. Löhnis, Inspector of Agriculture (hon. secretary); Dr. A. Ferf, secretary of the Netherlands Agricultural Committee (treasurer); K. J. A. G. Baron Collot D'Escury, president of the General Netherlands Dairy Association; P. J. J. Repelaer, president of the Agricultural Society for the Provinces South Holland and North Holland; Dr. W. C. G. Van Eysinga, president of the Friesian Agricultural Society; Dr. K. H. M. v. d. Zande, director of the Government's agricultural experimenting station at Hoorn; E. Posthuma, secretary of the G.N.D.A.; Tj. Kuperus, president of the Association of Co-operative Creameries in Friesland; A. J. Van Der Paauw, representative of Messrs. Wm. H. Müller and Co. (Batavier line), to whom I am indebted for much of my information acquired during the journey.

* This Article completes the series. The other instalments appeared in our issues of June 5, 12, 19, 26, July 3, 10, 17, and 24.

POULTRY.

Jottings.

Those poultry houses which have not already been lime-washed should be done now, care being taken to use plenty of disinfectant in the lime. The unslaked lime should be put in a pail or bucket with a little water in, just to slake it so that it all rises up like hot steam powder, then the water should be mixed with it ready for lime-washing. It can be put on hot. In this way it kills all the germs, whether of insect life or disease.

Many people use lime which has been slaked for a long time, but new lime is far better. By this we mean the unslaked lime, as when once it has been slaked it never gets hot again. One dressing when the lime is hot and new is worth three times as much as when it is cold and slaked.

We have often seen black varnish recommended in the place of tar for the outside of the poultry houses, but it is more than four times the price of tar. If a little paraffin is mixed with the tar it answers just the same purpose. We have tried both, and like one equally as well as the other. Poultry keepers who use tar should have a bottle of paraffin by them, so that they can keep on adding some to the tar.

It is not necessary to make the tar hot, as some people do; if the paraffin is used it dries much quicker than even hot tar, and does not stick to the hands in going through the gates and doors. When tarring a new house, a good deal of paraffin should be used, as it causes the tar to soak right into the wood, which not only preserves it, but keeps the wet out.

Every poultry keeper who has had any experience must know their birds cannot thrive if covered with insects. Should they be neglected, even for one month, the fowls become stunted in their growth and never develop so well. The best way to dust chickens and hens with the powder is to place a sheet of paper on the table and place the bird on its back on the paper and dust it all over, rubbing the powder well in so that the whole of the skin is covered, then knock the loose dust off the outside of the feathers and turn the chicken or hen over and serve the back the same, after which the loose powder can be placed in the box again.

It is rather a slow occupation where there are a number of birds infested with insects, but unless they are seen to it weakens the birds very much, especially chickens, and not only so, but when the latter are so weak, they are more susceptible to diseases—viz., colds, roup, or consumption, which some people call going light, that is to say, the chickens eat well all day long and yet do not put on flesh.

Overcrowding during the hot weather must be particularly avoided. It is far better to kill or sell some of the old stock, as the birds must be got rid of sooner or later. Where a poultry keeper has only a limited space the hens coming broody which are intended for killing should be taken off the nest the first night. It is a great mistake to allow them to sit a few days, as the flesh becomes very stringy, or, in other words, they are out of condition, and are really not fit to kill.

It is better to dispose of them two or three days before they leave off laying than leave them on the nest for two or three days, as it spoils the flavour of the flesh, and the latter is not so juicy. Old hens can be utilised for eating purposes, just as well as young chickens, if they are only cooked properly.

There is an old superstition amongst poultry keepers that chickens hatched in June and July do not pay. This may be true in some cases, more especially when chickens are reared in the old fashioned way—allowing them to run with earlier hatched chickens of all ages. It is better not to hatch at all unless the late chickens can be kept separate.

SOCIETIES & NOTICES.

THE NATIONAL ASSOCIATION of ENGLISH HOP GROWERS.
(Founded June 1894.)
SECRETARY.—THOMAS IRONMONGER.
CENTRAL OFFICE.—86, HOP EXCHANGE, BOROUGH, LONDON.

GENERAL OBJECTS.

To promote united action among English hop growers as a body for the improvement of the industry.

To promote, support, or oppose such legislative and other measures as may affect the industry.

To collect and publish, for the benefit of members, special statistical and other useful information relating to English and foreign hop-culture.

To arrange for arbitrations in cases of dispute between sellers and buyers of hops, for the avoidance of litigation.

ANNUAL SUBSCRIPTIONS.

Ordinary members, 3d. per acre of hops under cultivation; honorary members, £1 1s.; hop factors, £1 1s.

FROME SHOW.

WEDNESDAY, SEPTEMBER 27th, 1905.
Entries close September 13th.

COLQUHOUN'S

Scotch Tweeds & Knitting Yarns.

To the Public.

Scotch Tweeds mean value, and Colquhoun's Ladies and Gentlemen's Scotch Tweeds, Knitting Yarns, Blankets, &c., mean perfection of value. Their wear is magnificent. All goods are made to my own Mills under my own supervision, and nothing is sold as wool that is not pure wool. Any length at Mill price and carriage paid. Self-measurement forms sent, and Suits made up if desired. 400 Patterns, post free. Write for them.

To Wool Growers.

What do you do with your wool? Do you make the most of it? One thing is quite certain. You cannot do better than send it to my Mills and have it made into woollen cloth, blankets, or other goods. I have 400 patterns to select from, and pay carriage on wool sent to me for manufacture. Write for booklet, which tells you all you want to know, and receive patterns, so that you may say what you want made and the patterns you prefer.

These Three Tests:

APPEARANCE
ANALYSIS
PRICE

Are they Conclusive Guides for Valuing and Buying Compound Cakes and Meals.

?CAKES

WE ANSWER—MOST DECIDEDLY, NO!

For here the old proverb—that "Appearances are deceptive," is often true.

Analysis by itself cannot be relied upon, for damaged and inferior material analyses the same as sound fresh stuff, although the feeding value is very much poorer. Also it is often difficult to detect damaged ingredients when spiced and mixed with other stuff.

SILCOCK'S

Is the lowest priced article the cheapest? We are continually in competition with compound foods having as high, or nearly as high, an analysis as our brands, sold in some cases at 10/- or 15/- per ton less, and claimed to be "just as good as Silcock's." **This is not possible,** considering our exceptional facilities for manufacturing cheaply on a large scale, our extensive experience, and the many valuable patents we own for labour-saving machinery.

There will invarlably be found a greater deficiency in feeding value than the difference in price implies.

We have no difficulty in retaining customers who have used our Cakes and Meals regularly, as the more our brands are known the better they are liked, but we have the difficulty of price to contend with in those feeders who do not know our goods. We specially invite such to make a comparative feeding test, feeling sure that it will bring us new customers and also benefit the buyer.

NOTE THIS.

Our first principle has always been to supply the best possible quality, and sell large quantities at a small margin of profit. In feeding stuffs the lowest priced article is certainly not the cheapest. SILCOCK'S brands are the highest standard of Compound Foods. Linseed Cake and Maize are at present priced above their feeding value, and by using Silcock's Cakes and Meals you will obtain really first-class articles and save money.

TENANT FARMERS' CONVENTION AT DARLINGTON.

The neglect of agricultural interests by the present Parliament has brought its natural issue. Farmers are a long-suffering race, not readily aroused to action, but if trifled with they have a power and determination, and woe to those who stand in the way. The farmers of the North of England have taken the preliminary steps for holding a convention in the ensuing month at Darlington. A public meeting was held last week in that town, at which it was not only resolved to organise for the occasion, and to issue invitations to agriculturists of the northern counties to join in the gathering, but the object of the movement was declared to be that of getting farmers' interests more thoroughly and effectively dealt with by Parliament. A programme of questions was agreed to, on which the meeting thought the opinions of all candidates for Parliamentary seats should be elicited, and the convention will be recommended to take them into consideration, as well as the course to be taken in eliciting the sentiments of Parliamentary candidates on agricultural subjects.

Several speakers at this preliminary meeting urged the important point that the best way to bring pressure to bear on the House of Commons in the endeavour to get agricultural interests better promoted, is to send tenant-farmer members there. Norfolk men in the seventies of last century thought so likewise, and returned Clare Sewell Read, whose death we have been so recently deploring; and in the following decade the farmers of Hereford shire followed suit by returning the late Thomas Duckham. As William Shaw, the first editor of the MARK LANE EXPRESS, was the first tenant-farmers' candidate, we may naturally be expected to feel more than ordinary interest on the subject, but, dealing with the matter on its merits, it has always been found that those who "paddle their own canoes" get to harbour swiftest. The most important resolution passed at the late meeting declared it to be highly desirable that three measures should be taken in hand, the first being that farmers should be represented in Parliament; the second was that a schedule of questions should be submitted to all Parliamentary candidates for agricultural constituencies; the third that care should be taken in electing county, district, and parish councillors, with a view to securing more adequate representation for agriculturists.

What will be the ultimate outcome of this convention to open on October 20 next it is impossible to foregather. The men of the northern counties seem in earnest. They have appointed a good standing committee, which will have permanent existence, for it is intended to hold an annual convention after the one of next month, so long as there are any tenant-farmers' interests held in abeyance by the British Parliament or requiring to be promoted either in the Senate-house or elsewhere. The organisation is limited at present to the three counties of Yorkshire, Durham, and Northumberland, it is true, but if successful in carrying out its grand schemes, the spirit aroused will very soon extend itself to other parts of the kingdom.

THE CEREAL YEAR.

I.

Breadstuffs.

The cereal year just ended has been of an interesting character, and, to the observer of brief periods, it has been of a deceptive character. Longer surveys reveal its true nature. It has been more or less of what breeders call a "sport." At this time last year, the stock of foreign wheat in the United Kingdom did not equal a month's supply, and this at a time when a war was in progress which might at any moment embroil the British Empire. With August we finished reaping our home crop, and early in September, 1904, we knew that with all possible reserves called up not more than 4,691,000 qrs. of British wheat was available to tide us over until the arrival of another harvest. Russia and Argentina between them were endeavouring to supply the gap left by American shipments, but their efforts were only very partially successful. In this juncture not only was 34s. per qr. obtainable for sound wheat of the home crop, but all the outstanding chances were in favour of a still higher price. There was no serious probability of value going below 30s.; there were various possibilities indicating that a rise on that price was worthy of consideration. This being the state of affairs, there arrived an autumn singularly favourable to wheat sowing. Out of this position, so remarkable for its coincidences that it may almost be called unique, there arose that occurrence which has been dwelt upon by some of the non-agricultural journals with something approaching elation. The wheat area of the United Kingdom increased! It rose to 1,835,024 acres. That this was more and not less than in 1904 was enough for the sanguine. Few stopped to note that when returns began to be both regular and trustworthy—viz., in 1874—the area was 3,830,767 acres, our figures include those for Ireland, which were not available a week ago, and that, therefore, the so-called "recovery" to 1,835,024 acres was a very small affair indeed.

As the cereal year wore on, wheat prices rather hardened than otherwise, and against an average for the whole country of 30s. 4d.

in December, 32s. was reached in July. In London the rise was from 31s. to 33s. per or. But for a mild winter and the pacific foreign policy of the Marquis of Lansdowne, the price must have been considerably higher. Even as it was, the market had its "moments," as when the Russian fleet fired on British fisher smacks, and when a touch of really cold weather sent up retail food wants by some 10 per cent. With respect to foreign wheat the intrinsic strength of the market has been shown by nothing more fixedly than by the fact that although Argentine and Russian wheat supplies have been exceptionally large, and consistently-maintained prices have kept at 32s. to 34s. for both sorts, demand, in other words, has never failed to answer to the supply. American wheat has been genuinely scarce throughout the entire twelve months.

It has been a splendid cereal year for home mills, which have done a record business. The imports of flour from September 1 to August 31 did not exceed 4,376,000 sacks against 7,656,750 sacks in the year before, and, at least, ten million sacks in an average year. English mills, therefore, have done an extra business of fully five million sacks, and, with an increase of population at the rate of a thousand persons a day, the probability is that the figures have been considerably over five millions. The increased demand for skilled labour, and for young learners, for milling machinery, traction motors, and every sort of appliance, has been a salient feature of the campaign. With respect to prices, fine London flour has made a steady 31s. per sack, and has had an unusually good sale at that by no means unprofitable price. The reason has been that American North-Western patents, which are the chief rival type, have been hardly quotable. The price asked was at one time 33s., and although August closed with offerings at 30s. 6d., the supply was always meagre. Hungarian flour was not plentiful, the Austrian, Hungarian, and Roumanian wheat harvests of 1904 having been, one and all, much below the mean, and the Hungarian miller being, for all his superb "artistry" as a flour-maker, curiously dependent upon his local supply.

The type of flour which is known as "Household," the flour that most of us eat in our daily loaf, has been on offer at a level of 25s. per sack, and London millers have kept their reputation to the full—a reputation for a marvellously even production. When we bear in mind that Household flour is a mixture, that such mixture does and must vary every season, and also that the consumer must on no account be alarmed by the least perceptible change in the loaf, we see what a difficult task the great London millers have set before them.

The country flour, which has reached London since September last year has given unwonted satisfaction. We write from market gossip and with no statistics available, when we say that the past cereal year has been the best season for London sales of country flour on record, but we have every confidence in our informants, and the matter has been one of general remark among the frequenters of Mark Lane. The price made cannot be averaged, but 24s. may be given as a probable mean of value.

Owing to the very small imports of flour, an increased purchase of foreign wheat has been necessary. The total purchased comes to some 24,512,000 qrs. of 480lb., but those who compare this with previous years, and do not bear in mind the decrease in foreign flour imported, will find themselves misled. Total breadstuffs imports of the cereal year just concluded show no material increase on those of the cereal year 1903 1904.

The retrospect of the cereal twelvemonth is satisfactory, but it is the view of an oasis. It was between desert and desert. From 1899 to 1903, wheat was almost continuously grown and sold at a loss, with an effect on the acreage which needs no emphasising. To a decennial average of 27s. 3d., the past campaign has added 3s. 4d., and has lifted value into the region of the profitable. But value with the present cereal year, young as it is, has already slipped back to 27s. 1d. per qr., and the outlook for anything like remunerative prices is disheartening in the extreme.

Seasonable Topics.

When corn harvesting operations first commenced the weather was fine, and all went merry as a marriage bell. Indeed, it looked as if all the corn would be picked up in double-quick time, and that the harvest season would be one of the shortest on record. Matters have turned out a little different to expectation, however, in this respect, and the finishing up of the corn-carrying has been a dragging affair. It is true we wanted the rain which has upset harvesting calculations, but it is disappointing, to say the least of it, when one has corn in the best possible condition for carrying, and only a couple of fine days are wanted to clear up everything, and the rain comes down in torrents, stopping further progress. Without being continuous enough to do serious damage, the frequent showers during the past few weeks were sufficient to prevent the corn drying and being transferred to the stack. In consequence of this the harvest has dragged on somewhat, and a dragging harvest is wearying to the patience of a farmer who has a wage bill to consider and other work is waiting to be done.

Protracted Harvesting.

The building of a cornstack is certainly not classed as a fine art, but there is a right and a wrong way of doing it, and a good stacker is a valuable asset to any farm where corn is largely grown. The art of stack-building consists in arranging the sheaves not only in an orderly fashion, but in such a way that the wet will not penetrate. The heavy showers experienced since the corn was carried must have made some farmers anxious about its welfare, particularly amongst those who have not got full confidence in their stack-builders, because considerable damage can quickly be done by wet if the stacks are badly built. Very often there is some delay in getting cornstacks thatched, for the simple reason that material has been scarce of late years, and many farmers commence harvest with never a particle of wheat straw on the place. If they are short of the means or the opportunity of purchasing the needful straw the stacks have to remain unthatched and unprotected until the first of the wheat is threshed out, and the necessary straw is forthcoming.

Building and Thatching Cornstacks.

September is the month when attention is directed to hedge-cutting, and the innocent cyclist goes on his way in continual fear of getting his tyres punctured by the sharp thorns that scatter themselves on the road, with business end upwards. At one time hedge-cutters used to think it a good joke to strew the road with thorns, to the discomfiture of wheelmen, but the law has proved itself to be on the side of the latter in this matter, and he receives more consideration. It fairly does one good to see a neat, well-kept hedge after its annual autumn trimming, because it proves to one how valuable, as well as effective, a really good living fence is. On the other hand, the sight of a once good hedge allowed to go wild for the want of cutting is equally distressing. What after-trouble and labour would be saved if people would only keep their quick hedges properly trimmed from the beginning! The missing of one season's brushing begins the story of neglect which ends in having a hedge bulky at the top, thin at the bottom, and of little use as a fence. To bring it back into anything like condition it has to be laid, and a good deal of this slow and costly work might be avoided if timely attention was paid to brushing in the autumn. We know hedges of thirty years' growth thick and impenetrable to-day, and yet they have had no other attention than an annual brushing. We know others of the same age that have been laid twice in the time, and as fences now they are not nearly so good, and all because the labour of trimming them up in the autumn was accounted too much. Laying is, of course, a good means of improving a thin, overgrown hedge, but we think there is a tendency to put too much faith on this operation. A wise course is to not let the hedge get thin at the bottom and overgrown at the top, but keep it in proper condition by annual brushings. Another important thing is to keep the bottoms of young hedges clean. It is a fatal mistake to let the quick get choked by the growth of weeds and the accumulation of rubbish in the bottom. Too often, however, this is done, and instead of getting a good hedge one obtains only a patchy apology for the same.

Hedge Cutting.

To what extent the hedges dividing fields on farms can also be utilised for fruit culture is largely a matter of soil, conditions, and locality. To even suggest the growing of fruit in hedgerows at all may be received by some as being the height of absurdity, but the fact that it is already done to a considerable extent prompts us to introduce the subject. As a case for illustration, there is a district in North Staffordshire where damsons grow very prolificly. Every farm and small holding has its damson orchard attached, and though this year fruit is scarce in some seasons the return from the damsons is a considerable item towards paying the rent. And not only do damsons grow in enclosed orchards, but the hedgerows on some farms are studded with them, and they seem to grow as well in the hedges as they do in the orchards proper. In some cases the trees were originally planted in the hedgerows, but in others they established themselves from seedlings or suckers, and the conditions being adapted to their requirements, they have developed into profitable specimens. We are aware that the damson is a fruit which adapts itself to certain localities, but where it grows freely it is profitable, and asks for little in the way of cultivation. The fact that the damson will thrive in a hedgerow is proof of its accommodating nature, and in districts suitable for it there are good reasons for developing this mode of culture. In the same way one may observe in the west of England cider apple and perry pear trees growing in the hedgerows. The very fact that some of these trees are in the hedges by the roadside, and yet the fruit hangs untouched by the travellers who use the road is evidence that there is something wanting in its edible qualities, but the apples and pears are suitable for making the beverages for which they are grown, and, judging from their size and vigour, they do not object to the conditions under which they are grown. Again, in Kent, damsons and common plums are grown in hedgerows to form a wind-break for fruit plantations, and in addition to acting as a means of protection, they invariably give a return which pays for the outlay.

Hedgerow Fruit.

In the last issue of the MARK LANE EXPRESS there appeared a short report of the agricultural and horticultural show at Wynyard Park, which was established nine years ago by the Marquess of Londonderry for the benefit of the tenants on his extensive estates. It is gratifying to know that the show was one of the best yet held, and the example set by Lord Londonderry might be followed with advantage by other large landowners. Too often, we fear, there is a want of sympathy between the landlord and tenants on large estates, and the interest of the former is centred more in securing rents than encouraging agriculture. It is not easy to gauge the amount of good that may be done by shows of the above character, because there are plenty of tenant farmers who will exhibit their animals at what they call their own show, when they would never think of competing at a big county affair, and if they are successful in local competition they are induced to aspire to higher things, with the result that the standard of quality in stock, horses, and sheep is raised. Big shows are doubtless beneficial, because they provide opportunities for the stock-breeder, but it is an open question whether local shows are not even more useful on account of the encouragement they give to the tenant farmer, whose facilities are not equal to exhibiting much at the bigger events. There are numerous large estates in the country on which shows similar to that established at Wynyard might be held, and, if organised properly, they would encourage the tenants without the landlords being losers.

Tenants' Shows.

At the moment when hop-picking is in full swing in those parts of the country where this crop is grown it is interesting to learn that there is an increase of 1,169 acres of land, according to the official returns, under hop-culture. This does not seem a great deal, but it must be remembered in the first place that hops are only grown in about seven counties in England, and, secondly, that only a certain area, estimated at about 50,000 acres, is required under ordinary conditions to produce all the hops needed by the brewing trade. No class of farmer is liable to more ups and downs than a hop grower. The crop is necessarily an expensive one to grow, and a bad season means lost money and drooping spirits. On the other hand, when crops and prices are both good, hops bring grist to the grower's mill that would make the

The Increase of Hop-Culture.

eyes of the ordinary farmer sparkle, and, being encouraged by the success of one season, the grower throws his energy and capital into further planting. Thus it is that hops must ever be a speculative crop, and that hop growers are first up and then down. When everything is satisfactory, and prospects are fair, official returns show an increase of acreage, but if growers get a few unfavourable seasons it falls just as quickly. The acreage, like the industry, is always liable to fluctuations.

* * *

Mushrooms and Mushroomers.

The season of the edible fungi being now in, it is no uncommon experience for a farmer to meet one or more individuals carrying a red or white handkerchief and strolling across the fields with as much assurance as if they were the rightful owners. At any other time they would admit to trespassing, but by some peculiar law, known only to themselves, they look upon mushrooms as a public perquisite, with a perfect right of walking over anybody's land in search of them. If you took the trouble to follow the man with the handkerchief you would probably find him striking a bargain with some one for the purchase of the mushrooms, and later they might be seen in a shop window with 6d. or 8d. per lb. marked on them. If the nomadic mushroomer can make money out of what he picks up, why should not the farmer treat the fungi as a crop and protect them for his own benefit? Why not? Some farmers do this, but the nomad referred to treats this as a gross interference with his rights, and he will resent it by deliberately selecting the protected farm for his operations, even at the risk of being summoned for trespass. Of course, there are mushroomers and mushroomers, and there is a marked difference between the respectable citizen who picks up a few for breakfast in the course of a country walk and the ne'er-do-well to whom mushrooms means beer, and who is not particular about adding a rabbit to his bag if one crosses his path.

Agricultural Imports.

The following is an account showing the quantities of certain kinds of agricultural produce imported into the United Kingdom in the week ended Sept. 2, 1905, together with the quantities imported in the corresponding week of the previous year:—

	1904.	1905.		1904.	1905.

At Thorpe (Essex) on Monday, Samuel H. Tickell, gentleman farmer and graduate of Dublin University, was sentenced to a month's hard labour for causing a horse to be worked whilst in an unfit state. Accused, who had been previously fined, told the Royal Society's officer that he had often worked horses with sores in Ireland without interference.

Embargo on Canadian Cattle.—A telegram from Ottawa states the reply of the Board of Agriculture refusing to remove the embargo on Canadian cattle has been published, but has caused little comment. As this course was anticipated, the feeling of many influential agriculturists is that the agitation against the embargo is a mistake, as its removal would only tempt the farmer to export immature cattle, which would result in the impoverishment of the land.

Agricultural Politics.

By a LOBBYIST.

There should be one political lesson understood by those Northern farmers who are in revolt against what I may describe as the agricultural acquiescence in the policy of Parliamentary neglect. This is that you should always demand more than the minimum that Parliament is willing to concede. It cannot be said that the Darlington conference of Northern farmers revealed the characteristic fault once attributed to the Dutch—the fault of giving too little and asking too much. Their platform is, so far as it goes, an excellent one; but, like the servant girl's child, "'tis only a little one." There be few of the anxieties it epitomises which would evoke anything like vigorous dissent in the present Parliament. The continuance of the Rates Act until the general re-adjustment of taxation is undertaken, the throwing of the cost of secondary education (why secondary education?) on the Imperial exchequer, legislation on the lines of Mr. Ailwyn Fellowes' Butter Bill, the partial relief of localities from the increased cost of the maintenance of roads entailed by motor-traffic, the better regulation of that traffic itself, the prevention of preferential railway rates to the advantage of the foreigner—all these things may be described as among the commonplace anxieties of scores of Parliamentarians. Of course, it is well that they should be subscribed to and formally recognised by bodies of farmers. This must tend to give the proposals the character of immediacy and authority. Still, we were justified in anticipating something more definite and vigorous; something, in a word, which would deal with the verities of rural economy, with the laws in reference to tenure, with the question of compensation for improvement, and with the ambition which possesses even certain Conservative minds to utilise the resources of the State in recalling the old type of British yeomen.

• • •

Within the last three years the anxiety of rural reformers has become more emboldened. It has been stiffened and nerved. It is well, I repeat, to aim at securing those ambitions which the Darlington conference has accepted as its own. We might, however, have had some indication of the attitude of the northern farmers towards the proposals of Mr. Channing in regard to compensation for improvements and in regard to capricious eviction. We might have had some indication of their attitude towards the specific proposal that compensation should be given for the whole value an improving tenant has added to the holding on a renewal of the tenancy, whether he quits or remains on the holding, and towards the further specific suggestion that compensation should be given for the value added to the holding, both by continuous good farming and by the laying down of permanent pasture. It would not have been altogether out of place to have yielded a revelation of the view of the contention that compensation should be obtainable for damage caused by ground or winged game. How, too, would they like the bestowal of compulsory powers for the acquisition of land, both by hire and purchase, for the purpose of small holdings, and the provision of easy facilities for the small holder to borrow money? Above all, how do these farmers regard the proposal of Mr. Jesse Collings—with whom is associated Conservatives like Sir John Dorington and Sir John Kennaway—which would first enable the Board of Agriculture to acquire estates by voluntary arrangement with the landlord, and then to sell to the tenant-farmers, the Board advancing to the purchaser for the purpose as large a sum as £7,000, or even £9,000, this sum to be repaid by means of a purchase-annuity?

• • •

These have become vital issues, not merely because they have a considerable force of opinion behind them, but because they reveal a desire to apply to the rural situation something more than gratifying opiates, which, after all, can only confer an illusory contentment. Of course, I can already hear the reply that with a body so mentally conservative as the British farmers it is absolutely the wiser policy to be moderate. *Festina lente.* On the other hand, it is the height of unwisdom to wax enthusiastic over the frills of problem and to be stolidly indifferent to its real heart and kernel. There is a moderation which sometimes degenerates into tepidity and innocuousness. Surely a suggestion coming from men of the political calibre and conservative texture of Sir John Dorington and Sir John Kennaway—neither of whom would accept the red hat or prance enthusiastically to the music of the Carmagnole—should not be regarded as beyond the realm of rural consideration because of its demagogic extravagance? However, one excellent thing has been achieved by this northern conference. It has provided us with an evidence of the possibility of uniting the farmers in a political programme of practical self-interest. It has shown us that there is in existence a sentiment of revolt—not yet too vivid or vivifying in its character—against the farming community being made the pawns in partisan-anxieties which rarely concern their own weal or status. This is good. Now, the first purpose of the active reformers—and I appeal to Collingsites as well as Channingites—is to seek to give this anxiety a backbone. We now know that an Agricultural Parliamentary Party is not an intangible vision. It is a possibility.

• • •

Of course, I am aware that this Darlington conference is but a prelude. The real declaration of purpose is to be made at a more representative and authoritative convention. It is too much to hope that this convention will take its courage into both its hands and seek to range the avowed purpose of the farmers abreast of what I may describe as the more moderate spirit in the House of Commons itself? Farmers must not be content merely to lisp their obvious necessities and the assured concessions. They must profess desires which proceed beyond the conventional, desires which will breed discussion, contention, and even antagonism. Reform is born of attrition; reform is the first-fruit, in a word, of controversy.

• • •

I do not know that farmers are anxious for the advent of the trades' union demagogue and the Socialist agitator in the country-side. All the same, they must be amused at the absolute and scientific manner in which the Trades' Union Congress has disregarded the rural workers. The necessities of labour mean, in a word, to this congress the necessities of the town workers and the miners. Not in an expressed thought, not in a single resolution not on a single platform was the rural worker permitted the undesired luxury of intrusion. A few years ago Mr. Joseph Arch—who, by the way, is now living the most somnolent of somnolent lives at Barford, a kird of unheeding dolce far niente—was acclaimed at the congress with a rapture that seemed to indicate that no person in our life was so dear to the heart of demagogy as the person that demagogy always dubbed "Hodge." That rapture, however, never had a revival, and to-day is a forgotten sentiment. Gratifying as this may be to those who regard the trades' union leader as the harbinger of discontent and disaffection, the meal-ut is not in itself without a significant meaning. It is a justification of the act of self-assertion on the part of the northern farmers. It is a proof that in the Parliamentary arena the race is not only to the lusty of lungs, but that the men who will not clamour are destined to be neglected and forgotten. The necessity of a Parliamentary Agricultural Party, or, at least, of a Parliamentary Agricultural Committee, is proved, indeed, by the very fact that its appearance would be regarded with amazement. That farmers should dare associate themselves in an electoral

organisation with defined aims would be regarded almost with indignation by the industrial and commercial sections which fight only for their own hands. An admirable example for farmers is provided by a recent act of the greater industrialists and machine-users of the towns. Without distinction of party or sect, heedless of the anxiety of partisanism, acting solidly and in combination, they have united to prevent the rating of the machinery they use. They care not for partisan anxiety on this point, and their solidity and mutual confidence are so excellent that they will succeed. Farmers could accomplish as much if they would.

• • •

The agricultural sympathy with the co-operative principle is extending. This sympathy is now having practical expression in Staffordshire and Hertfordshire. In the one case the milk-producing farmers are uniting for the purpose of securing a market, and in the other case the apple-producing farmers are uniting with the same object. Common depots are the chief feature of the scheme in both instances. This is well; but I would that in this case the Board of Agriculture were capable of a more definite attitude of appreciation. Of course, the eventual direction of this principle must apply to the greater produce of the country-side. The railway companies apparently believe that in the co-operative distribution of farm produce and the association with it of a more scientfic method of packing, we shall find the real solution of the railway rates' problem. In a matter of this gravity the Board of Agriculture should have the ability to extend a practical, helping, financial hand. Lord Onslow was against conceding help of this character; he thought the State approval should be confined to pretty platitudes. It is, I opine, different with Mr. Ailwyn Fellowes. The present Minister for Agriculture comprehends that the value of the principle has yet to be tested—that, indeed, it must be, in its earlier application, of the nature of an experiment. If that experiment succeeds the State will itself benefit; hence the State ought to bear a share of the financial responsibility.

• • •

The Board of Agriculture has, however, at this moment no money at its command for such a purpose. In that future extension of the powers of the department which is inevitable, experiments of this character should be regarded as in the same category as experimental farms. If the State holds that it is its duty to experiment in the interest of better culture (and, of course, this is being very widely done in Ireland), it should be the duty of the State to occasionally experiment in the interest of the profitable distribution of the produce of that culture. "Where," I can hear the affrighted Individualist asking, "if this position be accepted, will State intervention end?" Our own sanity will provide the boundary. The temperament of the British farmer would not permit him to ask the State to do for him what he ought properly, and could fittingly, perform for himself.

Fruit Growers and the Board of Agriculture.

With reference to the findings of the Departmental Committee appointed by the Board of Agriculture to inquire into and report upon the fruit industry of Great Britain, the National Federation of Fruit and Potato Trades Associations have forwarded the following memorial to the President of the Board of Agriculture and to Mr. Griffith Boscawen, M.P., the chairman of the Committee:

"We, the National Federation of Fruit and Potato Trades Associations, representing the fruit and potato trades associations throughout the United Kingdom, numerous members of the trades affected, and many others, do hereby beg:

"(1) To express (a) our appreciation of the action of the Board of Agriculture in causing an inquiry to be made into the fruit industry of Great Britain, and (b) our anxiety to assist in obtaining practical legislative and other results from the recommendations of the Departmental Committee which has conducted such inquiry.

"(2) To strongly confirm (a) the importance of quick transit and reasonable rates on the railways of the country, and (b) our belief that in providing for the latter a more simple and uniform system and a more practical classification are very desirable and, indeed, urgently necessary.

"(3) To state that, in our experience, the protection of traders against the result of the combined action of railway companies has become a vital question in the interests of our trades.

"To offer our services to ensure that the effect of the report of the Departmental Committee shall be such as to enable Parliament to recognise the great and increasing importance of the fruit and potato growing industry, and to pass the requisite statutory enactments.

"And (5) whilst again expressing our appreciation of what has been done by the Board of Agriculture, to hope that the action of the Board may cause the necessities and requirements of these trades, affecting as they do the whole of the country, to be better understood, to the advantage not only of the trades and the railway companies, but the whole population."

OBITUARY.

Mr. George Heath, one of the elective auditors for Exeter, and a prominent member of that town, died on Monday from muscular rheumatism. By profession Mr. Heath was a land agent and surveyor, and as such was regarded as a man of considerable ability. He was more particularly known among the agriculturists throughout the West of England, and was looked upon as, as he undoubtedly was, an authority on agricultural matters. The deceased gentleman often contributed to our columns on agricultural matters of the moment, and his occasional letters on the state of the crops, etc., in his district will be sadly missed from these pages. Deceased, who was between sixty and seventy years of age, leaves several grown-up sons and daughters.

Mr. Samuel Kingston, one of the oldest and best known auctioneers and valuers in Lincolnshire, died on Wednesday at his residence in the Terrace, Spalding, aged 76. He had filled the position of president of the Lincolnshire Auctioneers' and Valuers' Association, and was a recognised authority on matters connected with the valuation of tenant right and farming, in which he was extensively engaged in the Deeping district. He was a magistrate for the Holland Division, had been chairman of the Spalding Urban Council, and by his death Spalding loses one of its ablest and most esteemed residents.

Mr. John White, Edgefield Farm, Loanhead, one of the best-known men as well as one of the oldest farmers in Midlothian, died suddenly on the 2nd inst. He was driving alone in his pony trap through one of his fields when he sank down in the vehicle, and died from heart failure. The pony plodded on, and brought its master's body towards some stacks of grain which the farm hands were building. His servants lifted Mr. White's body from the vehicle, but life was extinct.

An even sadder death is that of Mr. W. Kelman, of Burnside, a well-known Banffshire farmer. He was in the harvest field, and in bending down to pick up some corn he injured himself internally. From the first but little hope was entertained of his recovery, and he succumbed within twenty-four hours of the occurrence. Deceased, who was 72 years of age, a few years ago removed from the farm of Wester Lovat, Ross-shire, to the Duke of Richmond and Gordon's farm of Burnside, one of the best farms in the Enzie.

On the eve of Totnes Races there passed away at Stretchford, Staverton, in the person of Mr. Edwin Shinner, one who had witnessed every day's racing at Totnes since 1846, and on several occasions won races on his own horses. Born in the neighbouring parish of Littlehempston, the deceased, on his marriage, about 50 years ago, went to the farm where all his wedded life has been spent. As an agriculturist he was probably as well known as any man in South Devon, and the stamina of the horses on the farms has undoubtedly been much improved by the enterprise he displayed in connection with the stud animals which he kept at Stretchford, and with which he attended the markets and fairs, being present with them at 59 successive Totnes May Fairs and 58 annual spring fairs at South Brent. He took an active part in connection with the Totnes Union Agricultural Society and other organisations for the benefit of his industry. Deceased was in his 76th year.

A large number of householders in North London have been apprised by circular, issued through the medium of the London Master Bakers' Protection Association, that in consequence of the danger to health occasioned by the exchange of stale bread for new, by which infectious disease may be conveyed from one house to another, in future no new bread will be given in exchange for stale.

EAST ANGLIAN NOTES.

Mushrooms! That is the topic of conversation at the moment throughout the rural districts of East Anglia, and it is amusing to those that know the joy to be obtained in the early morn to see those that generally have the privilege, even at the farmhouse, to lay abed longer than their elders in the fields with their London cousins or visitors before the break of day and in the half-mist of morning busy filling their baskets or sacks like bags with the quick outcrop of the previous night. This year, by reason of the long, hot summer and the plentiful rain that we have since had, that brings a condition of smothered heat in the soil which is exactly what the mushroom loves, we have a magnificent crop, much to the delight of the farm folk and the epicures, who take great interest in this "vegetable." The writer does not remember, while travelling on the Great Eastern, to have noticed so many baskets of mushrooms being sent to the market towns and London as has been the case during the last few days.

As regards East Anglia, we can now say that the corn harvest is over, and even in most cases the harvest festivities that accompany the arrival at the farmstead of the last load are pleasures of the past fading already from one's mind. So now we hear more generally the hum of the threshing machine that proclaims the fact that farmers are sampling this season's yield of wheat, and while this work is progressing we cannot help but notice in the landscape that the golden stubble has been manured for next season's crop, and the barley fields are already lined at intervals with brown guiding furrows for the ploughs that will in a day or so be at work accompanied by the usual crowd of rooks, that then as birds are the farmers' friend indeed, while in the next field can be seen the ploughs busy at work finishing the last headland, so making a complete change in the colour of our landscape.

At the village of Thornham, situated between Wells and Lynn, in Norfolk, an interesting industry is carried on by some of the inhabitants, and so artistic and well made are the wrought-iron articles by these artisans that, on seeing some of the beautiful examples, the King has ordered a pair of ornamental gates, which will be erected when completed on his Sandringham estate.

During the past week we have heard at the different market towns of the glut of English fruit, which is a great disadvantage, inasmuch as the remuneration due to the grower is not forthcoming. In this connection we would point out that with proper care it is possible to store fruit, especially if the fruit is gathered in a proper manner. In the storage of fruit, a cool, even temperature is all that is necessary, and the specimens should be set out in a single layer upon open wooden shelves or trays. Some of them may be covered with sweat, when a current of air through the room will help to dry a good deal of it away. This is part of the natural process of maturation, but unless checked with a dry air it sometimes affects the fruit, so that a weak spot will soon turn rotten. The stock should be gone over twice a week in order to remove those that show the slightest signs of decay. In this way good prices can be obtained when the glut of fruit is past.

A strange disease has broken out in West Essex among poultry, with the result that chickens and turkeys are dying in great numbers. So rapid is the spread of the disease that one farmer lost birds to the value of £40 in one night. Some of the carcases have been forwarded to the Board of Agriculture, who report that in all probability the birds died from "fowl cholera."

September 8, 1905.

Important Butter Prosecution. — At the South-Western Police-court on Thursday, Mr. Francis fined a provision dealer 40s. and three guineas costs for infringing the Margarine Act by selling a substitute for butter, called "Marvo," otherwise than as margarine. The prosecuting solicitor's point was that the substance was in fact margarine, while the defendant pleaded that it was really sold as such, but that if the court held that it was not, he relied upon the following notice :— "Marvo, the new butter substitute, equal in flavour to the finest dairy butter. To comply with the provisions of the Sale of Food and Drugs Act this article is sold as margarine." Mr. Francis said the notice was capable of a double interpretation, and he was inclined to take it as meaning: "We have to sell it as margarine; but it is really something better; it is Marvo, the new butter substitute." It led the purchaser to believe he was getting something other than margarine, whereas it was only margarine dressed up in another name. There would probably, added the magistrate, be an appeal.

A Northern Convention of Farmers.

A Good Programme, but——

A preliminary conference of representatives of several of the largest farmers' associations in the north-eastern district was held at Darlington on Monday to consider matters relating to the organisation of the farming interest, and to arrange for a general convention of farmers in October. The arrangements for the meeting were made by Mr. Charles Marshall, secretary of the Northumberland and Durham Dairy Farmers' Association; Captain R. Cecil Hedley, secretary Newcastle Farmers' Club; and Mr. P. Kent, secretary of the Darlington Farmers' Protection Association. Delegates were present from the Newcastle-on-Tyne Farmers' Club, Northumberland and Durham Dairy and Tenant Farmers' Association, Darlington Farmers' Protection Association, Cleveland Chamber of Agriculture, Stockton Chamber of Agriculture, Hexham Farmers' Protection Association, and the Ripon Chamber of Agriculture.

Mr. George Smurthwaite, chairman of the Darlington Farmers' Protection Association, took the chair, and briefly opened the proceedings by calling upon Mr. P. B. Kent, one of the conveners of the meeting.

Mr. Kent said letters had been received from gentlemen interested in agriculture, from Chambers of Agriculture, and from farmers' associations throughout different parts of England and Scotland, all expressing their deep sympathy and interest in the movement, and wishing it great success, and intimating their intention, if invited, to attend any gathering or congress that might be held.

Captain Hedley then moved:—"That it is desirable we have a Standing Committee representative of all agricultural organisations in the Northern Counties of England for the consideration as they arise of all questions relating generally to the interests of tenant farmers, for the purpose of taking immediate and combined action whenever necessary." He remarked that the voice of the different farmers' organisations would be much more effective if they had some means of focussing the opinions of all the associations, which at present there was no means of doing. He held that it is the duty of all farmers to belong to an association such as they proposed to establish. They must to a certain extent be prepared to give up party politics. It was a case of every man for himself.

Mr. W. Parlour (Darlington) seconded the motion. He said farmers have a number of associations, but he did not see that they had made the least advance in organisation. They should get all the leading spirits in farmers' clubs and Chambers of Agriculture to combine in an agricultural programme, and get it accepted in the different counties at the next election. They should also try to get proper representation in Parliament, and in the county and other councils where the interests of farmers are concerned. They also wanted a strong body to meet any other body such, for instance, as railway companies. They had no chance without combination

Replying to questions, Captain Hedley said it was not proposed to supersede the Central Chamber of Agriculture, but to supplement it. The distance to London and the times of meeting did not suit farmers, and, besides, many of the representatives of local chambers on the Central Chamber were not tenant farmers, nor had they a practical knowledge of the exigencies of their business. They wanted not only to supplement the Central Chamber, but to keep the Board of Agriculture in the right groove, to educate them, and restrain them if necessary. If a question arose in any particular district the secretary would convene a meeting of the standing committee, and its decision would go forward as the voice of the North of England.

The resolution was unanimously agreed to.

Mr. G. Gibson (Darlington) moved that they should embrace in the organisation the whole of the six counties of the North of England, Northumberland, Cumberland, Westmorland, Durham, Yorkshire, and Lancashire.

Mr. Kent said they had had no reply from Cumberland and Westmorland to the invitation.

Mr. Marshall (Newcastle) held that the proposed association should not be too big. Cumberland and Westmorland might form an association of their own. A national association would be a very cumbrous thing. He thought they should comprise Northumberland, Durham, and North Yorkshire.

Mr. Trotter urged that they should take in the whole of Yorkshire.

Mr. W. Hill moved that the three counties, Northumberland, Durham, and Yorkshire, should be invited. Mr. Bainbridge seconded this motion, which was carried unanimously.

Mr. Parlour moved that each association be represented at the conference by two members and the secretary ex officio. If there were 500 members there should be five representatives, with four for 400, three for 300, and so on.

This resolution was carried, and it was also agreed that the delegates at that meeting appointed by the various associations pending the conference be constituted an executive committee.

On the motion of Mr. J. H. Walker (Darlington), it was resolved: "That a convention take place annually in different centres, the first to be held in Darlington on October 20, at which the various subjects brought before this meeting be further discussed, and resolutions passed thereon."

It was further resolved that an endeavour should be made to obtain fuller representation for farmers on county, district, and parish councils.

On the motion of Mr. Marshall, it was decided to ask all Parliamentary candidates whether they are in favour of the following proposals:—

The continuation of the Agricultural Rating Act until the whole system of rating is dealt with.

Absolute prohibition of preferential railway rates for foreign produce.

Better regulations for motor-car traffic with a view to the safety of the public and the prevention of dust.

The whole cost of secondary education under the Education Act being borne by the Imperial Exchequer

A Bill to prevent the adulteration of butter by fats, milk, water, or other substances.

Making railway companies responsible for damage done by sparks from locomotives.

Agricultural M.P.s: Discussion at Fareham.

At the last meeting of the Fareham Farmers' Club there was an interesting discussion, having for its topic the above-mentioned proposed Convention. Mr. Christian brought the matter forward by asking whether the club would send representatives to the conference, he being of the opinion that it was very desirable that they should send one or more—perhaps the secretary and a delegate. Such an association would tend to great good, he believed, if it steered clear of two things. One was party politics. Of course, it would become a political organisation, for if they could not get better representation in Parliament, they would in time endeavour to send men themselves. That, however, would be an expensive matter, and it would be better to make use of the men who were there, and there were able men in Parliament, who only required to know their wants. They would never make any great headway in regard to getting their needs met until they had, it might be, an agrarian party. That was what they wanted, and what would come. But here was such a movement as they had been advocating loudly and long in that club, and they ought not now to be asleep.

Mr. A. H. Lee, M.P., who presided, said he had heard it suggested that this new association might in some way be distasteful to the Central Chamber of Agriculture, and they ought to be clear on the point before they took any action. Asked why this should be the case, Mr. Lee said, in the same way as two cocks did not like to share the same dung-hill. They required to have all agricultural interests co-operating in this movement, but it would not be wise while it was in a nebulous state to throw in their lot with it until they knew whether the Central Chamber was in favour of it. In the legislative programme that was proposed he saw nothing at the first sight to object to. As regarded representation in the House of Commons, it was a wise decision not to send special delegate members, as they did not have anything like the same influence as members at large, though they might have greater technical knowledge. The man who was an avowed representative of a certain interest might be listened to with attention as an expert, but not to such an extent as an independent member, who might put the case equally forcibly. He moved that the discussion be adjourned till next meeting, when Mr. Christian might be invited to bring up further information.

Mr. Christian said they would not make very much headway until they got some such organisation as that proposed. He failed to see why men could not go into the House of Commons and do their business in the same way as other bodies of business men. Men went to a Board of Guardians and voted according to their judgment, taking sides on questions as, of course, they must do. Why need there be these parties? Some of them were getting a bit sick of this strong party feeling, for they felt that the business of the country was not done as it ought to be and as it would be but for this party feeling.

Mr. Lee explained why, in his opinion, Parliament could not be conducted like a Board of Guardians, or a meeting of that club. One side did not want the other to do any business, and did its best to prevent it. One side was always trying to put a spoke in the wheel of the other, and preventing it carrying through its ideas of legislation. The Radical party regarded Tory legislation as bad for the country, and the Tory party regarded Radical legislation as bad. Only rarely was non-contentious matter introduced on which both sides would agree, and then he would advise the taxpayers to look out, as some iniquity was probably going on.

Eventually the matter was deferred to another meeting.

The Relative Prices of Wheat and Flour.

In the course of an interesting letter to the *Daily Telegraph*, "A Norfolk Farmer" draws attention to a matter that has so often been dealt with, but is ever presenting fresh facts. He says: This season we have had an earlier harvest than usual, with the result that most of the wheat has been secured in splendid condition, and though the threshing machine has already proved, in this county of Norfolk, at any rate, that the yield is not so great as was expected, yet the quality is very fine, and will compare most favourably with any foreign produce. Wheat was quoted at the different markets about a month since at about 32s. to 35s. per quarter. As soon, however, as some of the present crop was put on the market, the price fell for our home produce something like 5s. per quarter, and we are now called upon to take 27s. to 28s., delivered at Norwich, for some of the best wheat that has been put on the market for years. Has there been a corresponding decrease in the price of flour to the consumer? I assert there has been none whatever, and that the same price is now charged as was the case before the drop on wheat. What is the reason for this sudden drop? It seems to me that in every county one or two big firms monopolise the whole trade, and arrange the market to suit their purpose.

This year I celebrate by fortieth year as a farmer, and I well remember in the early part of my time that in nearly every village there was a wind or a water mill, that made into flour several loads of wheat every week, and sold the flour in the district, with the advantage also that the farmer could ensure having bran and offals of such a character as would guarantee him perfect safety against swine fever and other complaints which are the result of freely using the present foreign imported pollards, etc. Unfortunately, these home industries have all been gradually swept away, and at the present time the milling is all concentrated in a few hands, all striving to make the whitest flour they can produce at the cost of removing every nutritive particle therefrom.

At the same time their chief aim is to keep the price of home produce at the lowest point. There has been a great deal written the last few years on the country being more self-dependent for its food supply and of farmers being induced to grow more wheat. I should like to know where the inducement comes in when, in the case of the finest wheat that has been produced for years, we are obliged to sell at the ruinous rate of 9d. per stone, or eighteen stones for 13s. 6d., out of which, in many instances, something like 8d. per coomb has to be paid for railway transit to the mill. I live some eighteen miles from Norwich, and the rail charges for not less than five-ton lots from my nearest station, two miles distant, is 5s. 5d. per ton.

Had the price of wheat gone up 5s. per quarter what an outcry we should have heard of a dear loaf, advance in the price of flour, etc., but when it has dropped that sum not a sound is heard; there is no difference in the price of the loaf, no corresponding drop to the consumer's flour. I ask your readers, many of whom, perhaps, know little of agricultural matters, whether this is fair usage, or whether such conditions will induce a further area of wheat cultivation. I can quite understand there being an increase of wheat cultivation this past season, as the farmer had a fine sowing time last autumn, and the promise of a small advance in the price made him eager to grow all he could. With the present conditions I fear that the coming year will see a corresponding decrease again, and that more land will have again to go out of cultivation. These are facts which it would be well for the whole community to look in the face, and consider whether it is to the well-being of this country that the home grower should be like the country millers—crushed entirely out of existence.

Prevention of Sparks from Railway Engines. — We learn that for the past three months an invention has been in use on a colliery siding at Hucknall, near Nottingham, which prevents sparks being emitted from railway engines. It is the patent of a Midland Railway engine-driver, and consists of a series of projecting blades between the bottom of the blast pipe and the foot of the chimney, by which the sparks are intercepted and thrown back. Not only does it prevent sparks being thrown out, but by careful tests it has been discovered that it acts as a great coal saver, and an engine fitted with these bars is said to burn from 6 cwt. to 7 cwt. of coal less per day.

"BE WISE IN TIME."

FARMERS should take care (especially in view of the comparatively low rates of premium) to insure against loss through **STORMS** and **FIRE.**

The **HOMESTEAD, FURNITURE, OUT-BUILDINGS, LIVE STOCK, IMPLEMENTS, STACKS, AND GROWING CROPS** all represent property which can, by the present modern system of **INSURANCE**, be covered at a trifling annual outlay.

INSURANCE against death or injury through accidents should not be neglected.

ROYAL INSURANCE COMPANY.

FIRE, LIFE, HAILSTORM.

Invested Funds . . £13,062,125.

HAILSTORM INSURANCE.

The Royal, besides being the largest Fire Insurance Company in the world, is one of the few offices that undertakes risk from Hailstorm. The important feature for Agriculturalists when effecting protection on their property is the opportunity afforded them of combining insurance against Hailstorm and that of Fire Insurance in one office.

Gentlemen able to influence introductions with this object are invited to make application for Agencies.

Offices, 28, Lombard Street, London, E.C.

Cheerless Outlook in Cornwall.

Sir,—Harvest prospects are not at all favourable. Much of the corn still remains in the fields, and little hope remains of saving it at all well. In the earlier districts the wheat and winter oats, also some barley, have been saved very well, and will be a fair crop. Spring oats are a failure. The rust has spoilt the sample of corn, so much so that it is scarcely worth thrashing.

Sheep are selling very well, and there is an abundant supply of grass. Roots are also doing well. Beef is not a good trade, and store cattle are a poor trade.

The outlook on the whole cannot be said to be a good one. M.

September 8, 1905.

Doubtful Prospects in East Suffolk

Sir,—For this district, chiefly light land, the season cannot be said to have been altogether favourable to satisfactory crops of corn, although I must confess, take them on the whole, they might have been very much worse.

The splendid rains we got here in the second week of June saved a failure. I think another week's drought at that time would have sealed the fate of hundred of acres of peas, oats, and barley. As it is peas are fair.

Oats rather indifferent, especially where late drilled, being affected with tulip root, causing two-thirds reduction in crop. Barley I estimate to be fair average quality, but not full crop. Wheat not much grown, full average crop of splendid quality. Most of the corn in this district has been harvested in splendid condition with less labour than for many years past.

With regard to root prospects, mangold only are good, and should be rather over average crop. Swedes are not so, and in some instances were last from ravages of fly. Turnips very patchy; many not set, being too small. The result of the crop depends upon the weather to follow. If an open, mild time up to Christmas they will be fair, not otherwise.

Taking the year from the beginning of April, it has not been favourable, for feed layers gave poor yield in consequence of wet, frosts, and droughts. Catch crops, such as mustard and coie, etc., almost a failure.

Ewes and lambs felt the pinch in consequence, but remained very healthy. Result was lambs were not shown in quite the usual condition at lamb sales, but the price paid for them by buyers was highly satisfactory to breeders. J. G.

Prospects in Gloucestershire.

Sir,—The season now fast closing will, I think, be classed with the good ones by the agriculturists of this district. May was a very dry month, which caused a light hay crop on the pasture land, but artificial crops, clover, sainfoin etc., was a good average crop; roots started badly but promised to be average, especially mangolds. Wheat promises to be the best crop; then winter beans, barley and oats, the latter crop the lightest. Peas fairly good and spring beans generally so.

Beef trade still bad, stores paying little to feed on. Sheep trade fairly good, milk, the farmer's last resort, being overdone.

Canadian cattle, if allowed to enter our ports free, will bring only disease, and lessen the production of English-bred cattle.

Wool has helped the hill farms considerably. Not much threshing done yet, but enough to decline the price of all home-grown produce. Hops a good crop of good quality, but prices too low to recoup the grower.

Fruit in most cases not selling as if it was half a crop, which it is

The weather of the past month has been the wettest of the year. Yet hay and corn has been well got—between the storms. T. R. H.

September 7, 1905.

Rain Causes Delay in Wiltshire.

Sir,—The crops this season are not particularly good, as some of them ripened prematurely, owing to the severe heat in July, especially oats. These showers are delaying the carting, and doing some mischief in staining the barley. Prices for corn are still too low for farmers to make any profit. are still too low for farmers to make any profits, and hay also is going cheap. It is a bad thing for this country to find the land going out of cultivation, and I think legislation ought to step in.

W. C. S.

Durham Harvest Nearly Over.

Sir,—In the spring we had a good seed-time; most of the land could not have worked better, but all through the summer months there was practically no rain, and the hay crops were very light, consequently were cheaply and well got.

Wheat a good average crop. Barley nearly average crop. Oats considerably under average. There are still patches of corn to harvest.

Turnips are for the most part a failure in this district, though they have improved since the rain came a few weeks ago; am afraid will finish less than half a crop.

Pastures have had no grass in them all summer, and cattle done badly; in fact, we hear of some selling out now at a less price than they were bought in for in the spring.

Beef, which, as a rule, improves in June and July, has this summer never made a spurt, 7s. to 7s. 6d. per 14lb. stone having been the very top price all along. Mutton has sold very well, and wool the highest price for some years.

Lambs are selling fairly well, the lamb sales being, if not equal to last year, nearly so.

W. F. B.

September 6, 1905.

Outlook in Hampshire.

Sir,—Wheat above average. Barley under average. Oats very good, except late sown. Hay rather above average, and made well. Worst crop of roots known for years. No fruit on account of late frost.

Sheep about 2s. per head more than last year. Store cattle very cheap. H. S.

September 9, 1905.

Wild and Wet Weather in Kerry.

Sir, The weather during latter half of August has been wild and wet. Corn much injured, in some places almost totally destroyed. Late-cut hay in a bad way.

Roots fair in some places.

A bad look-out for the small farmers of this district.

Grass good. Cattle hard to dispose of at any price. Potato crop above average. Weather at present, wintry, wild, and wet. J. E. B.

Harvest Prospects in East Ulster.

Sir, The beautiful weather of summer passed us all too soon, and the heavy rains of the last fortnight, although desired by some, have not been welcome to the farmers in the North of Ireland.

Upland hay was a good crop, and had an excellent time for gathering and saving the seed, the market for which are just opening, but the price of grass seed is none too good. Of meadow hay much has been lost by floods, especially along the course of the Bann.

A larger acreage was under wheat this year than for several years past, and there is a heavy crop, both of straw and wheat. Oats are not so good, for although there are some exceptionally fine fields of corn, most farmers consider their crop of oats light.

Early potatoes are a good heavy crop, abundant on the ground, and excellent on the table, and although the later crops had an equally good appearance, the disease has caught hold of the haulms, and the present weather is too favourable for the development of the disease for the tuber to escape.

Mangolds, turnips, and other root crops look well, but the weight of these crops will only be known a few months hence.

Store cattle have grown vigorously, but prices have gone down so much since spring that scarcely any of them would bring as much in the market now as they cost when being put on the grass. Graziers must lose money, if the prices do not rise.

Small fruit were somewhat less than an average crop. Stone fruit is a smaller crop, and apples are much worse, and the low price of apples adds to the misfortune of fruit-growers.

W. W. D.

September 6, 1905.

Poor Root Crops in Wensleydale.

Sir,—It has been one of the most indifferent seasons we have had for years, the drought having affected all crops. Turnips are practically a failure, many fields having nothing at all on, and where they have been sown two and three times, and have come up, the grub have gone with them. The hay has not been half a crop; and cattle have done no good at all, and are not worth so much now as in the spring.

Clover seeds are a failure, and will have to be ploughed up.

There is still part corn out, which has been late sown.

Since the rain has come grass has grown quickly, but fogs are only very moderate.

The only redeeming feature are sheep, which have done fairly well and maintain good prices.

September 9, 1905. B. J. H.

Imports of Agricultural Produce in August.

According to the Board of Trade returns, we imported more articles of food and drink in August than we did in the same month of last year, the increase on nondutiable goods being £650,382. Of butter we imported £2,065,508 worth, as against £1,789,533 in August, 1904; cheese, £784,388, compared with £595,544; eggs, £602,687, as against £499,607; lard, £304,609, as against £180,994. Meat, including animals for food, also shows a big increase of £604,393. Fresh beef is mainly responsible for this increase, totalling £885,817, as against £540,969 last year. Both the Argentine Republic and United States of America have largely increased their exports to us in this commodity. Bacon to the value of £1,217,403 was imported. While Denmark and the United States show a considerable decrease, Canada has doubled the value of their exports to us, the total value being £500,316, against £231,420 last year.

Grain and flour likewise show an increase of £558,762. The amount of wheat imported was 9,595,800 cwt., as against 8,517,000 cwt., the increased supplies being drawn from Russia, the Argentine, and British East Indies. The import from Canada, however, shows a remarkable decrease, being over 185,400 cwt., against 848,700 cwt. in 1904 and 1,426,958 cwt. in 1903. Wheat meal and flour also show a big decrease, the amount imported being only 785,023 cwt., as compared with 1,016,520 cwt. in 1904 and 1,361,594 cwt. in 1905. The amount of maize imported during the month was 4,505,700 cwt., as against 4,085,400 cwt. in 1904.

Harvest Weather.

1, Essex Street, Strand, Monday, September 11th, 1905.

SPECIAL THREE-DAY FORECAST. GENERAL PREDICTION.

The general movements and distribution of the pressure systems over Europe are favouring a further continuance of the recent South-Westerly, cloudy, showery and occasionally stormy type. The sequence of general weather will be as follows:—(1) At first some showers to fairer in the North, West, and North-East, cloudy to fairer in the South, East, and North-East. Temperature cool. (2) Later, fair to cloudy and some showers in the North-East, centre and South-East. Cloudy and some rain at times in the West, South-West and North-West. Temperature milder. (3) Some rain at times to fairer in the former and showery to fairer in the latter districts. Temperature about normal. The wind in most districts will vary from W. to S.W., and then N.W. to W., and from moderate to fresh, and then strong to moderate.

LOCAL PREDICTIONS.

No 1.—Scotland:—At first, some showers to temporarily fairer. Later, wind backing to S.W., fresh to strong, with cloud and some rain, chiefly in the West. Finally, N.W. to W. fresh to moderate winds. Showery to fairer. Temperature oscillating from about 3 degrees below to above the normal. Normal on the whole.

,, 2.—England (N.E.) and part of Scotland:—Peebles, Selkirk, Durham, Lincoln, Northumberland, Roxburgh, Yorkshire, (N. & E. Ridings).—**The same as No. 1, the rain in the second period beginning later and lighter.**

,, 3—England (East):—Bedford, Cambridge, Essex, Hertfordshire, Huntingdonshire, Norfolk.—**At first, cloudy to temporarily fairer. Westerly moderate winds. Later, W. to S.W. freshening winds, fair to cloudy and some showers. Finally, showery to fairer with westerly or North-westerly strong or fresh to moderate winds. Temperature cool to milder and then normal.**

,, 4—Midland Counties:—Buckingham, Derby, Gloucester (part), Hereford, Leicester, Northampton, Nottinghamshire, Oxford, Rutland, Shropshire, Stafford, Warwick, Worcestershire, Yorkshire (West Riding).—**The same as No. 3.**

No. 5.—England (South): — Middlesex, Berkshire, Kent, Surrey, Sussex, Wiltshire, Channel Islands, Hampshire.—**The same as No. 3.**

,, 6.—Ireland.—The same as No. 1.

,, 7.—England (North-West) and North Wales. Cheshire, Lancashire, Westmorland, Anglesey, Carnarvon, Denbigh, Flint, Merioneth, Montgomery.—**At first, cloudy to temporarily fairer. Later, cloudy to showery; finally some rain to fairer; wind moderate to strong and then moderate. W. to S.W. and then N.W. to W. Temperature cool to milder and then normal.**

,, 8.—England (South-West) and South Wales:—Brecon, Cardigan, Carmarthen, Glamorgan, Pembroke, Radnor, Cornwall, Devon, Gloucester (part), Monmouth, Somerset.—**The same as No. 3 only with rain setting in earlier in the second period.**

One-Day Forecast prepared by the Meteorological Office at 11 a.m. on Monday, Sept. 11th.

GENERAL INFERENCE.—The shallow depression over Brittany appears likely to travel away over France and to affect our most southern stations only. As there are no indications of the immediate approach of any further disturbances from the Atlantic, the weather over our Islands generally will be fair during the ensuing twenty-four hours.

SCOTLAND, N. & E.; ENGLAND, N.E. & E.; MIDLAND COUNTIES.—Light or moderate winds between North-West and West; fair generally; temperature rather low.

ENGLAND, S. (London and Channel).—Light Westerly or variable winds; cloudy or overcast, slight rain locally; very cool.

SCOTLAND, W.; ENGLAND, N.W. (and N. Wales).—Same as Scotland N. & E.

ENGLAND, S.W. (and S. Wales); IRELAND, N. & S.—Light or moderate North-Westerly to Westerly winds; fair as a whole; very cool.

CORN MARKETS.

LONDON.

Mark Lane, Wednesday.—Both English and foreign steadily held at late rates, but demand slow. South Russians quoted at 31s to 35s; No. 2 Club Calcutta, at 31s 3d; choice white Karachi, at 31s. Flour slow, unchanged. Maize rather steadier, but quiet. Mixed American landed, quoted at 23s 6d, and River Plate, ex ship; to arrive, at 22s 9d. Barley firm, but quiet. Odesha-Nico., to arrive, quoted at 18s 4½d, and landed, at 19s. Oats steady, inactive. Common sorts quoted at 14s. 3d.

Mark Lane, Friday.—English wheats were steadily maintained at 28s 6d to 30s 6d for red, and 29s to 31s for white. Foreign grades were quiet at 35s 6d for No. 1 Northern Manitoba landed; No. 2 Club Calcutta offered at 31s 3d and New Zealand at 30s to 32s. Maize firm at 3d to 6d advance; mixed American ex ship quoted at 23s 4½d, ex quay at 23s 9d, and La Plata landed at 23s. Flour dull at unchanged rates. Barley firm but quiet; Odessa Nicolaieff ex ship held for 18s 4½d, and landed for 19s. Oats rather dearer; 14s 3d to 14s 6d asked for 38lb. Russian. Beans and peas slow.

COUNTRY.

Ashford, Tuesday.—A large quantity of new wheat offered, but mostly out of condition, and prices consequently were 6d. to 1s. lower on the week, ranging from 26s. to 28s. A better demand for new peas, at 28s to 29s; malting barley was offered, but not taken. Tares fell 6d per bushel, and made 6s to 6s 6d; maize 1s. cheaper, at 25s 6d to 27s; new oats, 14s to 18s; beans, 2s to 36s per quarter.

Banbury, Thursday.—Wheat, red, new, 27s to 28s; barley, 23s to 30s; beans, new, 29s to 30s; ditto old, 31s to 32s; oats, 16s to 18s 6d; ditto, old, 20s to 23s; peas, 29s to 31s per qr.

Berwick, Saturday. — Larger attendance; numerous samples of barley on offer. Prices remained unchanged, with the tendency to give slightly over last week's figures for the finest quality. Few oats onoffer, and quality disappointing. Barley, 23s to 29s; new oats, 18s to 23s 6d.

Birmingham, Thursday.—There was a small attendance, and only a moderate amount of business doing. Quotations remained unaltered. New English wheat was not so plentiful, and realised 10s 6d to 11s per bag. Grinding barley, 18s 9d per qr. Sharpness. Flat maize, 5s to 5s 1d per cental Liverpool, and Plate 23s 6d per qr. Sharpness. New English oats, 17s to 17s 6d per qr.

Hereford, Wednesday. — Fairly good attendance. English wheats, oats, and barleys lower in price, quite 3d per qr. Beans and vetches in good demand. Quotations:—Wheat, 3s 5d to 3s 9d per bushel; barley, 3s to 3s 9d; oats, old, 2s 6d to 3s; new, 2s to 2s 4d; beans, old, 4s to 4s 6d; new, 3s 6d to 3s 9d; vetches, 4s 6d to 5s 6d.

Brighton, Thursday.—New white wheat, 28s to 30s; new red ditto, 28s to 30s; grinding barley, 19s 6d to 21s; oats, English, 16s 9d to 19s 6d; rye, 24s to 26s; peas, 29s to 32s; beans, 29s to 32s; maize, 26s to 29s. Small attendance, and very little offering.

Bristol, Thursday.—There was a good attendance on market to-day, being September fair. English wheat in good supply, condition variable, prices about same as last week. Foreign wheat very firm. Maize, barley, and oats about unchanged in value. Flour firm. — GRACE BROTHERS.

Bury St. Edmunds, Wednesday.—There was not a large supply of wheat, and the average condition was not so good as last week's. This, with a rather dull demand, made a quiet trade, at about last week's prices. Reds 27s 6d to 28s 6d; whites, 27s 6d to 29s. A fine sample of revets made 28s per qr. Oats quiet and unchanged, at 16s to 17s per qr. Maize steady on the week at 25s per qr. delivered. Malting barley: A few samples were on the market. Trade was rather of a speculative character, as the real demand from maltsters has not yet commenced. A small trade was done at prices running from 26s to 31s per qr. Grinding barley steady. Foreign grinding barley, also Indian lentils, peas, and gram were a dull trade. Linseed cakes remain firm, at £8 10s per ton, and cottons at £5 7s 6d to £5 10s. Bran steady, at £4 15s to £5 per ton.

Cambridge, Saturday. Some little progress has been made with the harvest, but a few farmers have not finished yet, and there is some sprouted corn on the market. At this market on Saturday there was a fair supply of wheat; prices ruled quite steady for all good dry lots. Secondary and damp lots were a shade easier. Barley in rather more demand. Beans firm, and oats rather dear. Wheat, red, 26s to 29s, and white up to 30s per 504lb.

Canterbury, Saturday.—There was more barley on offer at to-day's market, but not quite so much wheat. Values for English wheat are maintained at from 29s to 31s; and oats range from 18s to 19s. Good offering of barley, and a few samples were disposed of from 26s to 28s per qr.

Carlisle, Saturday. Larger supply of oats in our market to-day. Good demand at late rates. New, 18s to 18s 9d per 312lb.; old, 22s to 23s per 336lb. THOMAS ROBINSON.

Chester, Saturday. The quality of this year's grain varies considerable, and consequently prices are irregular. Only the finest lots of wheat and oats realised the quotations. Values generally were unchanged on the week. Stocks of Egyptian corns were exhausted, and shipments are nil. American Indian corn was scarce, and prices advanced 3d on last week. Quotations: New wheat, 4s 3d to 4s 9d; old, 4s 6d to 4s 6d per 75lb.; new grinding barley, 4s to 4s 2d per 64lb.; old beans, 5s 9d to 6s per 20lb.; oats, old, 3s 2d to 3s 4d; new, 2s 2d to 2s 4d per 46lb.; new Indian corn, 12s 9d to 13s 3d per 240lb.

Colchester, Saturday. There was a fair supply of wheat to-day, which could clear at fully last week's prices. Barley more inquired for. Buyers were more numerous, and sellers could quote their samples at previous rates. Beans and peas fully 6d to 1s per quarter dearer. Oats very firm and the tendency is in favour of sellers. JOSEPH WILLIS AND SON.

Coventry, Friday. Moderate attendance and small supply of wheat. Sellers made a shade better prices, but few lots changed hands. Barley in good condition and rather scarce. Other grains unchanged. Quotations: Old wheat, 31s 6d to 32s per qr.; new wheat, 31s 6d to 31s 9d per 496lb. Barley, 30s to 33s per 448lb.; old oats, 23s to 25s per 392lb.; new oats, 19s 6d to 21s per 304lb. beans, 34s 6d to 35s per 496lb. peas, 31s 6d to 32s per 496lb.

Derby, Friday. — New wheat firm at last week's full rates; spring corn unchanged. Quotations: White wheat, 31s to 32s; red wheat, 30s to 31s; malting barley, 30s to 32s; oats, 20s to 21s.

Doncaster, Saturday. Fewer samples of farmers' corn than expected. The finer qualities were in fair demand, but inferior lots were neglected. Fore 20

wheat continued firm, Indians being 6d per quarter dearer. Malting barley irregular yet, and prices not fixed. Oats did not come up to expectation in quality, and values varied greatly. Feeding stuffs firm but unchanged.

Dorchester, Saturday. — The market was fairly attended, and ther was a moderate offer of samples, but tended, and there was a moderate offer of samples, but and as a consequence there was no great demand for wheat, prices of which remained practically unchanged from the previous week, and the same may be written of foreign. Some very good malting barley was shown, the best of which sold at prices nominally the same as at the previous market, seconds being little inquired for, and the same may be said of grinding descriptions. Keep being now so plentiful everywhere there was no great demand for feeding sorts of any kind.

Exeter, Friday.—Large attendance; trade slow. English wheat plentiful, prices about the same as last week. Foreign firm. English barley, not much offering. Foreign 3d dearer. Maize and oats unaltered. Flour firm. English wheat, 3s 3d to 3s 6d; English barley, 3s 6d to 4s; superfine flour, 25s to 28s; fine, 23s to 25s.

Glasgow, Wednesday.—There was the usual attendance at our exchange. Wheat and flour firm at last Wednesday's prices. Indian corn quiet and unchanged, but price, if anything, in buyers' favour. Maize firm in tone, owing to the quay being nearly cleared. New oatmeal, 6d to 1s cheaper since Wednesday. Scotch oats cheaper on the week, but foreign unaltered. Other articles of the trade quiet, and nominally unaltered on the week.—GIBSON AND CLARK.

Gloucester, Saturday.—English wheat in moderate supply at about late rates, the value of reds being 3s 6d to 3s 7d per bushel; foreign firm, and any change in sellers' favour. Grinding barley, maize, and oats are unaltered.—WAIT, JAMES, AND CO

Grantham, Saturday. — Average attendance, and better show of corn. Wheat was in fair supply, and commanded 26s to 27s per quarter. A few samples of barley, which changed hands at 25s to 29s per quarter. New oats, 16s to 7s; beans, 30s to 31s per qr.; and peas 40s to 44s per quarter.

Ipswich, Tuesday.—An average supply of wheat, in very fair condition. The demand was quiet, but steady, and prices practically unchanged on the week, at 28s to 29s 6d for reds, and 28s to 30s for whites. There were a few samples of malting barley on the market, but only very moderate prices were obtained, running from 25s to 31s per quarter. Oats were unchanged, at 16s to 17s 6d per quarter; old firm. Beans selling at about 29s to 29s 6d per 36 stones. Indian corns slow; English feeding corns being so cheap—lentils, 24s; grain, 24s 6d; and green peas, 24s per 504lb. Maize steadier, at 23s 9d to 24s per quarter. Feeding stuffs all firm.

Leeds, Tuesday. — Harvest drags slowly to a close, quality and condition having suffered more or less deterioration. There has been little or no change in the trade during the week, the heavy shipments being mostly for the Continent do not materially affect our market; crop prospects in India remain unfavourable, and supplies of English wheat are smaller; still, millers operate with caution, last week's rates being about maintained for all descriptions. Indians, however, are 6d to 9d dearer. Feeding steady and unchanged.—DUNNS AND CO.

Leicester, Saturday.—Only moderate supplies of home-grown wheats, and the condition was not quite so good. Trade active at firm rates. Red wheats made 28s to 30s, and white 29s to 31s per 36 stones. Barley in small supply, and in slow request at 25s to 30s per 32 stones. New oats in faulty condition made 18s to 20s, and old 24s to 25s per 26 stones. Flour, 24s 6d, 27s 6d, and 2s9 6d per 280lb.

Lincoln, Friday.—Large show of home-grown wheat, which met with a fair demand at barely 6d per qr. less than last week, the condition being somewhat variable. A few samples of malting barley shown, but prices not yet fixed. Oats and beans unaltered.

Liverpool, Friday.—There was a small attendance at the market, but wheat is firmly held for an occasional ½d advance, except old crop Manitobas, which are ½d lower; only a moderate trade has been done. Flour a quiet trade, for both foreign and home-milled brands at last market day's prices. Maize, mixed, is easy, owing to larger arrivals, and owing to a quiet demand prices are ½d lower. Plate is steadily held for ½d advance, but there is only a small demand. European sorts are steady but quiet at about unchanged prices. Barley, malting, firm at full prices; feeding firm, and partially ½d dearer. Beans are firm and very scarce at 3d advance. Peas quiet but steady at unchanged prices. Oats quieter for American, with more liberal offers at the turn easier rates; other foreign sorts quiet, little demand. English firm at late rates, with a better demand for good samples. Oatmeal nominally unchanged, nothing doing. Oilcake a fair trade at the quotations.—SEGAR AND TUNNICLIFFE.

Manchester, Thursday.—In wheat, Indian is dearer, but English is quiet and practically unchanged. Flour firmer, but somewhat dull. Indian corn steady at 5s 3d to 5s 3½d, to arrive ½d less. Plate 5s 1d. English oats of good quality are rather dear, but foreign unchanged. Beans scarce. Barley and other cereals unchanged.

Newcastle-on-Tyne, Saturday. — A steady trade here to-day for wheats of all kinds at last week's prices. Maize slightly favouring buyers. Foreign oats firm and in sellers' favour. Scotch slow demand at last week's quotations. Peas, also beans, remains quiet, and prices in buyers' favour. No barley on offer.—JOSEPH POLLARD AND CO.

Newark, Wednesday.—A small show of grain at market. Wheat in variable conditiou; last week's prices realised for dry samples. Oats a firm trade. Barley irregular in price at present. Wheat, white, 27s to 28s per qr.; red, 27s to 28s; malting barley, 25s to 28s per qr.; oats, white, 16s per qr; black, 15s per qr.; new, 29s to 31s per qr.

Northampton, Saturday.—Good attendance; prices unchanged. New wheat, 27s to 28s; malting barley, 26s to 30s; barley, 24s to 26s; new white oats, 17s to 18s; new black, 16s to 18s; new beans, 29s to 30s; peas, 27s to 28s; flour, 24s 6d to 28s 6d.

Norwich, Saturday. There was rather more wheat on offer at our market to-day, but condition not good, with a steady demand at last weeks's prices. Barley was in good supply, with a slow trade, which made from 24s. to 30s per quarter. Wet and showry weather has prevailed during the past week. Wheat, red, 27s 6d to 28s 6d per quarter, weight 64lbs. per bushel imperial. Corn returns return for the week ending September 4 1905. Wheat 27s 7d, barley, 11,582 26s 6d. J. ARTHUR MILLS.

Peterborough, Saturday. The trade for wheat has been rather slow, but with only a moderate supply last weeks prices were made. The few barleys showing still irregularly. Oats firm and harder to buy. THOMAS HILL AND SON.

Plymouth, Thursday. There were a very small attendance on our market here to-day, owing to the local horse races farmers all being away. Wheat unchanged. Barley and maize 2s 6d to 3s dearer. Oats unaltered. ORLANDO DAVIS AND CO.

Preston, Saturday.—No change from last week, wheat, if anything, being rather firmer, with a little more disposition on the part of buyers to do business. Maize of all descriptions holds its own, being none too plentiful. Beans are the turn dearer, and peas and feeding barley are firm but unchanged. To-day's market differs little from those of the past few weeks. New grain still continues to come forward slowly, and only samples in good condition find purchasers at about previous prices. Flour unchanged. Quotations: Wheat, white, new, 12s 9d to 13s; ditto red, 12s 6d to 12s 9d per windle of 220lb.; flour, extra superfine,. 26s to 26s 6d; ditto superfine, 24s to 24s 6d ditto, best fine, 22s 6d to 23s per sack of 250lb.; oats, old, 3s to 3s 2d; ditto, new, 2s 6d to 2s 8d per bushel; beans, 16s 6d to 17s; bran, 10s 6d to 11s per windle of 220lb.

Reading, Saturday.—A fair attendance, but trade was not brisk at the following prices: Wheat, 28s to 31s; new barley ranged from 24s to 30s, and old 21s to 23s 6d; new oats made 16s to 19s, and old 18s 6d to 22s; peas, 28s to 32s; beans, 28s to 34s; flour, 21s to 23s; rye, 19s 6d to 22s 6d.

Ripon, Thursday.—A fair attendance of buyers, and a moderate trade at late rates. Malting barley shows a firm tone. Prices:—New wheat, 27s to 28s 6d; foreign wheat, 32s to 36s; grinding barley, 23s to 24s; malting barley, 26s to 28s; new oats, 17s; round maize, 25s 6d to 26s 6d; flat maize, 25s 6d to 26s 6d per qr.

Retford, Saturday.—Show of new wheat much larger than the previous week, and a considerable business was transacted at an average of 28s per quarter. There was also an improved supply of malting barley, the season having already well commenced in this neighbourhood; demand moderate for different lots, but the best changed hands freely, quotations being 25s 6d to 27s 6d per quarter. No flat maize on offer; round made 26s 6d to 27s per 34 stone, delivered here. English beans, new, 30s; and old, 33s; new black oats, 16s; new white, up to 17s; and old oats 24s per quarter.

Shrewsbury, Saturday.—Quotations:—Wheat, 14s to 14s 6d per 225lb; new, 12s to 12s 9d per 225lb; oats, old white, 16s to 17s per 225lb: new, 11s 6d to 12s 6d per 225lb; peas, 11s 6d to 12s 6d per 240lb; beans, 13s to 14s per 240lb.

Stamford, Friday.—A very good attendance, and a further good improvement in the market. Wheats, 27s to 28s; oats, 16s to 18s; beans, 30s to 31s 6d. Barley is to hand in only meagre quantities, and some little time will elapse before it is offered in anything like satisfactory quality, to-day's supply being chiefly of poor quality samples, which made 25s to 32s; peas, 40s to 45s per qr.

Sunderland, Saturday.—A few samples of new grain offering; condition moderate and prices irregular. Little doing in spring corn. Arrivals, coastwise: Wheat, 900 quarters; barley, 850 quarters; oats, 451 quarters. Foreign nil.—E. AND F. RICHARDSON.

Tunbridge, Friday.—New white wheat, 28s 6d to 29s; new red wheat, 28s to 28s 6d; barley, 27s to 32s; grinding barley, 19s to 23s; oats, English, 16s to 19s; rye, 23s to 24s; peas, 31s to 36s; beans, 32s to 36s; tares, 48s to 56s; maize, 24s to 28s.

Warwick, Saturday.—There was a small supply of wheat on offer, which made the full price of last week. Very few beans to be obtained. Feeding stuffs rather easier.

Winchester, Saturday. — A small supply of English wheat. Prices a shade better. Foreign unchanged. Barley, oats, and maize a fair inquiry at last week's quotations. Flour steady trade at late rates.—FEAR, COLEBROOK AND CO., LTD.

Wisbech, Saturday.—A fair supply of grain. Good dry wheat sold at full prices. Reds, 28s to 28s 6d. Oats firm, 16s to 17s 6d. Barley, 24s to 27s.—JAMES FLETCHER.

Wolverhampton, Wednesday.—There was only a moderate attendance and but little business was transacted. Quotations:—New wheat, 12s to 13s per 2161b.; English beans, 13s 6d per 196lb.; new oats, 11s to 11s 6d; old oats, 13s to 14s per 196lb.

Worksop, Wednesday.—Small attendance. Moderate supply of grain. A few samples of new wheat and oats showing, in varying condition. White wheat, 28s to 29s; red ditto, 27s to 28s; grinding barley, 25s to 26s 6d; old white oats, 20s to 22s; new ditto, 16s to 17s; old black oats, 20s to 21s; new ditto, 14s 6d to 16s; maize, 26s to 27s; old beans, 36s to 38s; new ditto, 30s to 31s 6d per qr.

Yeovil, Friday.—Best samples of home-grown wheat sold at from 29s 6d to 32s 6d; secondary, 27s 6d to 29s; foreign wheat, 32s to 35s; best barley, 27s 6d to 32s; secondary, 21s to 26s; foreign grinding, 18s 9d to 19s 3d; beans, 32s 6d to 35s; rye, 22s 6d to 25s; old oats, white, 19s 6d to 23s; new ditto, 18s 6d to 20s; new black, 20s to 21s; old ditto, 21s to 23s; Irish black, 16s to 17s; beans, 32s to 36s; winter tares, 47s to 49s; spring ditto, 40s to 42s; round maize, 23s 6d to 25s; flat ditto, 23s 3d to 25s 3d; vetches, 6s to 7s per bushel. Flour from old wheat firmly held, from new wheat easier sales taking place at from 24s to 25s for fines. Free offer of milling offals at prices favoured sellers. Meals without change.

York, Saturday. — The broken weather prevents any great supply of wheat, and prices remain firm for the few samples on offer. The following are the quotations: Fine whites, 28s to 29s; red and mixed, 27s to 28s per quarter of 36 stones. There is a very limited supply of new barley, and prices are so irregular as to render accurate quotations impossible. There is some improvement in the inquiry for oats, which remain firm. White Tartary, 15s to 16s 6d; black, 16s 6d. to 17s; white Garton, 17s to 18s per quarter of 24 stones. Rye, 20s to 21s per quarter of 36 stones; old beans, 33s to 36s ditto,; new beans, 27s to 30s ditto.

FOREIGN

Hamburg, Saturday. Barley: Trade remains slow here, our local maltsters and brewers only cover their immediate wants and buy principally Danish and Bohemian Chevaliers, for which prices are fairly well maintained. Quotations of our home grown barleys are pretty nominal, as the quality is generally unsatisfactory, and only in the South it is better. Austrians of choice quality are held at extreme prices, and also in Hungary the trade is slow. Orders from Great Britain seem to unobtainable, and the export from Fiume is decidedly small.—FRANCIS M. TH. DRUNE.

Paris, Wednesday. Business in wheat continues dull in the provincial markets, which will probably continue till threshings have acquired greater importance. At the Bourse de Commerce business has been lacking in activity, but the tone of the market remained firm throughout the day, whilst prices, after advancing a few centimes, again dropped almost to their late level, both as regards wheat and flour. At the weekly spot market the situation of home grown wheat has not altered much during the past eight days; business has, perhaps, been a little busier, but did not attain that volume which is customary at this time of the year. Business in consumption Marks of Flour was little easier, and prices show greater firmness. Business in rye flour is very quiet, but holders are able to keep up their prices due to the

dearness of rye. In rye the situation remains unchanged, and offers are meagre in all directions. In spite of the fall in price, at Paris, oats remain steady in provinces, where offers are becoming smaller. In maize the market is firmer, due to better demand for Argentine cargoes afloat. *Dornbusch.*

THE BALTIC.

There is a recovery of tone in the trade for wheat cargoes, which argues that the English farmer has only to hold his hand a little in order that the market should regain a generally healthy position. The sales of foreign wheat cargoes and parcels since the 4th inst. have comprised fine Russian winter at 34s. per 492 lb.; Odessa Ghuka at 31s. 9d. per 492 lb; Hard Taganrog at 30s. 9d. per 492 lb.; South Australian at 33s. per 470 lb.; Bahia Blanca at 30s. per 480 lb; Blue Stem at 32s. 3d. per 500 lb.; and Walla Walla at 31s. 3d. per 500 lb.

Maize cargoes fluctuate daily. Four cargoes of La Plata have been placed at 23s.; two have been sold for 22s. 9d. per 480 lb. American is quoted 20s 3d. per 480 lb. for December and 20s. for January shipment.

Barley is well maintained in price. A cargo of South Russian for prompt shipment from Theodosia, has made 18s. 3d. per 400 lb., and one of Californian, also for prompt shipment, has made 25s. per 448 lb.

Oats are firm. A cargo of Black Libau for prompt shipment has made 14s 6d. per 304 lb., and American new crop is held for 14s. per 320 lb. October shipment. Other cargo sales include White Calcutta peas at 28s. 3d. per 504 lb.; locust beans at 100s. per ton; and Smyrna beans at 32s 6d. per 480 lb.

East Indian Wheat Rejections.—The London Corn Trade Association C. F. and I. quotations, for the settlement of rejections and difference in weights on wheat under Rule No. 4 of the Association East Indian Wheat Contracts, are as follows:—No. 2 Club Calcutta 31s. 6d., Soft Red Calcutta 30s. 3d., Bombay Soft White Delhi 31s. 6d., Karachi Soft White Delhi 31s. 6d., Soft White Karachi 30s. 9d., Choice White Karachi 31s. 3d.; Soft Red Karachi 30s. 3d., all per 492 lb.

The arrivals of grain and seed-laden vessels at ports-of-call for the week were 3 wheat (1 Melbourne, 1 Streaky Bay, 1 Taganrog), 1 barley (Benghazi); total 4.

The sailings of grain and seed-laden vessels from ports-of-call for the week were 1 wheat (Cardiff), 1 barley (Hull); total 2.

Since January 1, 1905, the total arrivals have been 272 wheat, 2 flour, 2 wheat and oats, 1 wheat and linseed, 1 flour and wheat, 13 barley and wheat; 9 barley, 5 maize, 1 beans, 4 locust beans, and 46 linseed; total 356.

Last year during the same time the arrivals were 210 wheat, 1 wheat and maize, 32 barley and wheat, 16 barley, 4 maize, 4 beans, 4 locust beans, 1 rye, 30 linseed, and 1 canaryseed; total 303.

COLONIAL DAIRY PRODUCE.

London, Friday.—Butter: Australian butter is meeting a good demand at last week's prices. Winter grass made parcels of "Choicest" quality are selling at 110s to 112s per cwt., other kinds are making 108s to 110s. The "China" arrived this week with 1,800 boxes from New South Wales, 980 boxes from Victoria, and 200 boxes from South Australia. The "Sincere" arrived on August 30th with 1,035 boxes from Sydney and 650 from Victoria. The price of Victorian butter is 102s. 8d. per cwt. f.o.b., and of New South Wales 107s. each. The higher price of New South Wales is most unusual, but is due to climatic conditions. The Copenhagen Official Quotation remains unchanged, and prices generally of Continental butters are in a similar position. Danish is selling in this country at about 5s per cwt. above last year's prices, but the official quotation is 7s. above. Cheese: The demand is somewhat dull, although prices remain firm at 56s. on the spot. The c.i.f. quotations from Canada are about 55s 6d. with an expected rise.—W. WEDDEL AND Co.

FRUIT AND VEGETABLES.

Covent Garden. Saturday.—Ample and varied supplies of fruit and vegetables at market, business generally being fairly good. Quotations per English measure: Grapes, 0d to 5s per lb.; pears, cooking to 3s 6d per sieve; ditto, 3s 6d to 5s 6d per box; peaches, 2s to 10s 6d; green figs, 6d to 1s 3d; nectarines, 1s 6d to 3s per dozen; apples, 2s 6d to 7s per bushel; ditto, 1s 6d to 2s per peck; plums (Victoria), 2s 6d to 3s 6d (Ponds Seedlings), 2s 6d to 4s; lemons, 3s 6d to 4s 6d half sieve; melons, 6d to 1s 6d; filberts, 3s to 3s 6d per lb.; nuts, 3s 6d to 4s 6d per lb.; parsley, 2s 6d to 3s 6d per dozen bunches; tomatoes, 1s 6d to 3s; celery, 6d to 1s per bundle; cucumbers, 8s to 10s 6d per dozen; mushrooms, 2s to 3s; cauliflowers, 1s to 2s 6d; salads, 2s to 3s per dozen; cabbages, 3s to 5s per dozen; onions, 2s to 3s per dozen bunches; onions, 2s to 3s per cwt.; marrows, 1s 6d to 2s 6d per dozen; beans, 1s 6d to 2s 6d; turnips, 1s 6d to 2s 6d; carrots, 1s 6d to 2s 6d; beetroots, 2s to 2s 6d; parsnips, 2s 6d to 3s; swedes, 1s 6d to 2s 6d; turnips, 1s 6d to 2s 6d; leeks, 2s to 3s per dozen bunches; Jerusalem artichokes, 2s 6d to 3s per half-sieve; cos lettuces, 2s 6d to 3s per dozen; endive, 2s to 3s per dozen; capsicums, 2s to 3s per 12lb; ditto (outdoor), 2s to 3s per half-sieve; potatoes, 50s to 70s per ton.

HOPS.

Canterbury. Saturday.—There is an active demand for the best samples, which realise from 5os to 70s per cwt., but there is a very indifferent market for the medium and lower grades.

Review of the British Corn Trade

DURING THE PAST WEEK

Written exclusively for the Mark Lane Express.

The new stacks of wheat look large, and there is an over-average yield of straw, no less than of grain, in many counties and off the stronger soils. The oat stacks are bulkier than had been anticipated, but barley is not up to expectation, even in straw. The threshings of barley at present afford no real index to the quality of the crop as a whole, which, seeing how very second-rate the offers have as yet been, is a good thing. The barley grown on the fine "malting" lands is too precious a crop to be hurried, and the wise farmer will not thresh before October. There is blight among the potatoes in too many counties, and insect pests among the turnips, but, for the most part, roots and tubers promise to be considerable yields, and there is a good deal of autumn hay.

Germany has a full average yield of all cereals save rye, but the quality of wheat and barley is seldom quite first class. It already looks as if the best pale and bright barley samples would be at a premium in Europe generally.

Italy undoubtedly has a large wheat crop. Threshings are proving this, the yield being above anticipation in the whole country, except a portion of the north.

Russia reports short wheat yields in the eastern provinces, and poor crops generally in the Caucasus and the Asiatic districts, where the riots have been so serious. But wheat and barley exceed an average yield in the chief producing provinces.

The Hungarian Minister of Agriculture (whose annual survey appeared on Wednesday) does not rank very high as a crop estimator, and we do not propose to take notice of his calculations outside the areas with which he has a specific right to deal. For these areas his figures are interesting, and have usually been found reliable. He assigns to Roumania a wheat crop of 9,890,000 qr., against 5,300,000 qr. last year; to Bulgaria, 4,922,000 qr., against 5,500,000 qr.; to Servia, 1,702,000 qr., against 1,200,000 qr.; to Turkey, some 7,912,000 qr., against 6,900,000 qr.; and to Greece, 1,702,000 qr., against 1,500,000 qr. His own national estimate is as follows:—

	Quarters.
Austria	7,130,000
Hungary	21,252,000
Total	28,382,000

For 1904 the returns were:—

	Quarters.
Austria	7,800,000
Hungary	18,400,000
Total	26,200,000

The Chilian wheat crop, reaped in January and February last, has only recently been the subject of an official estimate. The returns are as follows:

	Quarters.
1905	1,840,000
1904	3,500,000

The falling off is not in yield per acre so much as in the area under cultivation, and Chili has now passed from the best of the countries growing more wheat than she needs into the reverse category.

A report from Cape Colony just to hand compares the figures for 1904 with those for 1892; the reason for the latter date being chosen is not obvious to us, but is probably of local significance. Anyhow, a decline of 1,500,000 qr. in wheat production is shown on the twelve years, and Cape Colony now imports fully half a million quarters of foreign wheat.

The standing controversy between the Free Traders and the Tariff Reformers at least has the advantage of bringing out new facts and evidences. It is certainly interesting to learn that for the last thirty years the price of wheat in England has been 1s. 8d. per qr. dearer than in the United States, but it is difficult to see what conclusion either controversialist can hope to draw from the fact. America imposes an import duty of 7s. per qr. on foreign wheat, but then she is an export country for the most part, and the duty is little more than an unfriendly act towards those Canadian farmers who live near her northern borders. In America, we may note in passing, "an average price" is itself a very difficult thing to be settled. If States are omitted, where is the average? If each State is included, is New York to be balanced by Utah, or a great wheat region like Ohio by a semi-desert like Arizona?

The supply of wheat on passage to the United Kingdom is now moderate.

	Quarters.
American	76,000
Russian	375,000
Indian	506,000
Argentine	590,000
Australasian	325,000
Various	70,000
Total	1,942,000
A week ago	2,100,000

The supply of flour on passage is 186,000 sacks, or not much more than a third of an average expectation.

Of maize the supply on passage continues large.

Russian	40,000
Argentine	950,000
American	270,000
Total	1,260,000

The expectations of oats are not so large as they were in later August, but 325,000 qr. are still on passage, nearly all from Russia.

Of barley 465,000 qr. are on passage; Russia in this case also is the principal contributory.

Other supplies on passage are as follows:—

	September 9.	A week ago.
Rice	35,000 tons.	28,000 tons.
Linseed	200,000 qrs.	189,000 qrs.
Cottonseed	11,000 tons.	21,000 tons.

There are also on passage 12,000 qr. of rapeseed and 8,000 qr. of beans.

Imports of the United Kingdom for the past week have been as follows:—

Wheat, 444,000 qrs.; a good supply.
Flour, 48,600 sacks; a third of an average.
Barley, 174,000 qrs.; more than usual.
Oats, 76,000 qrs.; a small supply.
Maize, 178,000 qrs.; a little under the average.

Imports of cereals for the three summer months have been as follows:—

	June.	July.	August.
Wheat	1,769,000	2,831,000	2,035,000
Barley	367,000	193,000	265,000
Oats	836,000	1,077,000	506,000
Maize	647,000	825,000	1,016,000

Of flour the imports were remarkably small, actual totals being:—

June	297,000 sacks.
July	268,800 sacks.
August	292,800 sacks.
Total	860,600 sacks.

Since the new cereal year came in Mark Lane trade in British produce has been as follows:—

	Deliveries.	Sales.
Wheat	5,385 qrs.	4,839 qrs.
Barley	2,950 qrs.	256 qrs.
Oats	4,700 qrs.	2,070 qrs.

It will be seen that wheat has been in far and away the best request, and then oats. There is not much demand at present for barley.

Last week's shipments were as follows:—From America, wheat 75,000 qr., barley 6,000 qr., oats 35,000 qr., maize 127,000 qr., and flour 74,000 sacks; from Argentine, wheat 163,000 qr., maize 375,000 qr., and linseed 44,000 qr; from Russia, wheat 530,000 qr., barley 483,000 qr., oats 241,000 qr., and maize 8,000 qr; from Roumania, wheat 444,000 qr., and barley 87,000 qr.; from India, wheat 70,000 qr., and linseed 9,000 qr.; and from Australia, wheat 1,000 qr. The large wheat shipments of Roumania are the chief shipping event of the week.

Linseed during the past week has been hard to sell at currencies. Indian is offered at 38s. to 38s. 6d. per qr. for cargoes, and Argentine for 6d. to 1s. less than Indian. There are a few offers of American at 37s. to 38s. per qr. for November shipment, but for the most part the United States require all their own linseed. Linseed oil has been the turn in buyers' favour, with 17s. per cwt. accepted for pipes and 17s. 3d. for barrels. Cottonseed on the 5th and 6th was weak, but rallied before the end of the trading period and closed fairly firm at £5 8s. 9d. per ton for cash. This was for Egyptian. For Indian there is little or no spot demand, but for winter shipment Bombay telegraphs a quotation of £4 15s. per ton. In the rice trade there is not much doing on spot, but the supply on passage has increased to 35,000 tons.

TO-DAY'S MARKETS.

MARK LANE, MONDAY, September 11.

[FIRST REPORT.]

There was a little less pressure to-day to sell new English wheat, but the offers at under 30s. were still far too numerous. Foreign was firmer from the 8th, with a good retail inquiry for Indian and Russian, and a fair demand for Argentine. Other sorts were not easily placed. Maize was the turn in buyers' favour, though cargoes and futures are firmer. This market just now is decidedly unsettled. Barley was dull, and cheaper for English, but there was no particular change in foreign. Oats were steady for new English, and 3d. dearer for both Russian and American. Considering the large arrivals, this is an especially good sign. Beans and peas were firm, the former seem to sell best when offered already split. Egyptian split came at 21s. 6d. per 320 lb. Tares sold well at a good price. Chilian clover seed made 52s. per cwt.; the new English crop is a fine one, and will now be on offer shortly. Linseed cake was in very poor demand, and some holders were willing to accept 2s. 6d. per ton less money to effect sales.

CLOSE OF THE MARKET.

WHEAT AND OATS CLOSED A LITTLE MORE FIRMLY THAN THEY OPENED, BUT MAIZE WAS 6d. CHEAPER, AND RUSSIAN BARLEY ALSO WAS WEAK.

THE FLOUR TRADE.

MARK LANE, Monday, September 11.

The top price of flour was reduced to 30s., and the market for Town Whites and Town Households tended in the same direction. It is the cheap and free offer of an East Anglian flour which have had this effect on the prices quoted by the chief London mills. Choice Country Patent were offered to-day for the modest quotations subjoined, and at 6d. under these terms for delivery within a month. Another sort of flour which is fully 6d. lower to buyers who can wait a month for delivery is fine Hungarian. The mills of Buda-Pesth are busy grinding the new crop, but prompt delivery is difficult to secure.

Importers of American flour offer little for delivery on this side of Michaelmas, and they prefer to sell with no guarantee for delivery before the end of October. To buyers willing to meet their convenience to this extent, they quote Minneapolis at 27s, 9d. to 28s., second Spring Patent Minnesota 26s. 6d. to 29s., good Manitoba Patent 28s. 6d. to 28s. 9d., Ohio Patent 24s. 9d. to 25s., Milwaukee Standard 24s. to 24s. 6d., and Kansas 23s. 6d. to 24s. per sack. Other flour sales included Weinstein's Best Russian at 28s..

LONDON TERM MARKET.

This market is open to elected members only, and is held at the Baltic Club, St. Mary Axe. No business except for future delivery is done, and the smallest quantity that can be purchased is 1,000 quarters, or 4,800 cental.

Prices quoted on Saturday at the close of the week's trade were :—

WHEAT (per cental).

No. 2 American Red	6s. 9d.	Sept. delivery.	
,, ,,	6s. 7d.	Nov.	,,
,, ,,	6s. 7d.	Jan.	,,
,, ,,	6s. 7d.	Mar.	,,

MAIZE (per cental).

American	4s. 9d.	Sept. delivery.	
,,	4s. 9d.	Nov.	,,
,,	4s. 3d.	Jan.	,,

These quotations showed a slight improvement in both articles between the 2nd and 9th instant.

American winter wheat for December delivery was in fair request to-day at 6s. 8d. per cental. American maize of the old crop was held above buyers' ideas, but new crop for January delivery was in request at 4s. 3d. per cental.

GRAIN AND FLOUR FACTORS REPORT.

Flour.—Trade remains quiet, and in view of American quotations buyers appear indisposed to operate, except for immediate requirements. GREENHILL BROS. (Belfast).

Offals.—Bran continues in fair demand; prices unchanged. GREENHILL BROS. (Belfast).

The trade for milling offals remains slow, with prices unchanged from last week. JOHN BAWCOMB AND CO.

Trade to day has been quiet, but the time has been firm, and a fair business has passed at fully late prices. T. S. MEDILL AND SONS, LTD.

We have moderate arrivals of wheat. The trade is firm at prices of last Monday. Flour unchanged in value. Maize.—Large arrivals, and prices are in favour of buyers. Barley sells slowly at late prices. Oats. A fair demand at an advance of 3d. and 6d. per qr.—COVENTRY.

Flour. — Owing to freer arrivals of American Winter wheat spot values are now on a parity with shipment prices. Grain.—Indian corn firmer at 13s. 7½d. per 280 lb. Oats are rather firmer and meeting with more attention, the price being relatively low. Barley now more plentiful, and 1s. per boll lower for American. Beans and peas firm. Oilcake unchanged. Mill Stuffs continue in good demand, and mills have no difficulty in keeping clear of stock. — MCKINNON AND MCDONALD (Glasgow).

FEEDING STUFFS.

London, Monday.—Linseed cake: The trade has been dull during the past week, but with a declining oil market and no material change in prices of seed, London made remain firm. There is a demand for American made. Undecorticated cotton cake: Not much inquiry, but values are about the same as last. Decorticated cotton cake and meal. There has been a little buying for future requirements and the small stocks on hand fetch full prices. Linseed: Market steady.

English Linseed Cake	ex mill	7 17 6	to 8 0 0	
American Calcutta Linseed Cake	ex quay

ROBERT AND JOHN HEWETSON.

THE BALTIC, 1 p.m.

STATE OF TRADE.

As compared with Saturday, wheat and maize open in buyers' favour for cargoes, but small parcels (200 to 500 tons) of wheat are in request. Oats and barley are held for 3d. advance. Argentine linseed cargoes favour buyers; all other oil-seed cargoes are firm.

BUSINESS DONE.

WHEAT.—No. 1 Northern Manitoba, 31s 6d per 480lb., October shipment; No. 2 Northern Manitoba, 30s 6d per 480lb., October shipment; No. 3 Northern Manitoba, 28s. 6d. per 480lb., October shipment; Odessa Ghirka, 31s 9d per 482lb., October shipment; Santa Fé, 29s 3d per 480lb. October shipment; No. 1 Red Walla, 31s per 500lb., October shipment; Roumanian, 29s 6d per 492lb., October shipment; Roumanian, 29s per 480lb., prompt shipment; White calcutta, 31s 6d per 492lb., on passage; White Kurrachee, 31s 3d per 492lb., on passage.

MAIZE.—Argentine, 22s 3d per 480lb., on passage; American, 20s per 480lb., to be shipped by January 15.

BARLEY. Azoff, 18s 3d per 400lb., prompt shipment; Roumanian, 20s 3d per 424lb., September shipment.

OATS.—South Russian, 14s 3d per 304lb., September shipment.

PEAS.—Green Calcutta, 23s 9d per 504lb., September shipment.

LINSEED.—Bombay, 38s 6d per 416lb., September shipment.

COTTONSEED.—Egyptian, £5 15s per 2,240lb., new crop. November shipment.

HOPS.

London, Monday.—W. H. and H. Le May, 67, Borough, report:—The gale of last week has somewhat retarded picking, and it is now quite certain that all the hops will not be picked. The market continues fully supplied, and prices remain unchanged. The demand improves, and doubtless will continue to do so as the season advances, the fine quality and low prices tempting brewers to stock up with English hops. The imports of hops into England for the month ending August 31, 1905, were 1,529 cwt.; for the corresponding month last year, 5,483 cwt. The exports of British and foreign hops for the month ending August 31, 1905, were 1,155 cwt.; for the corresponding month last year, 439 cwt.

SEEDS

London, Monday.—In spite of the inclement weather the demand for trifolium still keeps up. Stocks are extremely light, prices firm. Rape, mustard, and winter tares move off at unchanged prices. There is no speculation in spring sowing seeds.—JOHN PICARD AND CO.

CATTLE.

Metropolitan Market, Islington.

	Monday, Sept. 11, 1905 British	Total Sept. 14, 1903	Monday Sept. 12, 1904
Beasts	1,099	1,099	1,399
Sheep and Lambs	6,179	6,179	5,800
Calves	10	10	—
Milch Cows	35	35	9

Quotations per 8 lbs. (sinking the offal).

ENGLISH

	Inferior.	Second.	First.
Beasts	3s 10d to 4s 2d	4s 3d to 4s 8d	4s 9d to 4s 10d
Sheep	4s 10d to 5s 2d	5s 3d to 5s 6d	5s 8d to 5s 10d
Lambs	4s 8d to 5s 0d	5s 2d to 5s 6d	5s 8d to 5s 10d

Milch cows, per head, £17 to £22.

British arrivals included as follows: Scotland, and Eastern Counties, 31; Midland, Home, and Western Counties, 927; Devon, 15; Ireland, 51.

We note to-day a decrease of 39 head in the number of beasts offered for sale, compared with Monday last. The arrivals from the Midland Counties as usual at this season of the year, forming the majority of the supply. The Irish arrivals consisted entirely of fat cattle, viz.: 23 Dublins and 27 Waterfords, trade for which, though slow, was firm, as regard to value, late currencies governing all sales. For all descriptions of both prime and second quality English beasts, trade also ruled firm, the tendency in regard to value being an upward one. Fat butchering cows and bulls, in average numbers, also met a slightly better enquiry, the best meeting an advance of fully 2d. per 8 lbs. A clearance is expected.

The following are top quotations per 8 lb. (sinking the offal):—

	To-day.	Monday, Sept. 12, 1904.
Devons	4s 6d to 4s 8d	4s 4d to 4s 6d
Herefords	4s 6d to 4s 8d	4s 6d to 4s 8d
Runts	4s 0d to 4s 4d	4s 4d to 4s 6d
Lincolns	3s 10d to 4s 0d	4s 0d to 4s 2d
Irish	3s 10d to 4s 2d	
Fat Cows	3s 6d to 3s 8d	3s 6d to 3s 8d

There was an increase of 240 in the number of sheep and lambs penned. Trade, taken as a whole, was of a fairly steady nature, with an upward tendency in regard to value, in some cases to the extent of 2d. per 8 lbs., anything small and choice finding ready purchasers. Scotch were in average numbers, and also shared in the generally higher tone of the trade. Fairly large supply of Irish, which sold slowly but steadily, salesmen both asking and obtaining an advance of 2d. per 8 lbs. on last Monday's quotations. Lambs greatly in excess of the enquiry, nevertheless no quotable decline in value can be noted. Clearance expected.

Undermentioned quotations are at per 8 lb. (sinking the offal), and are for the best of each class penned:—

	To-day.	Monday, Sept. 12, 1904.
7½ to 8 st Downs	5s 10d to 6s 0d	5s 10d to 6s 0d
9 st Downs	5s 6d to 5s 8d	5s 6d to 5s 8d
10 st Half-breds	5s 4d to 5s 6d	5s 4d to 5s 6d
10 st Irish	5s 2d to 5s 4d	5s 4d to 5s 6d
10 st Down Ewes	4s 0d to 4s 2d	4s 0d to 4s 2d
11 st Half-bred ditto	3s 10d to 4s 0d	3s 10d to 4s 0d
5 st Down Lambs	6s 0d to 6s 2d	5s 10d to 6s 0d
6 st Half-bred ditto	5s 10d to 6s 0d	5s 8d to 5s 10d

Calf trade nominal.

London (Central), Monday. Fair supply; trade quiet. Beef: Scotch, 3s 10d to 4s 6d; English, 3s 7d to 3s 8d; American, 3s 2d to 3s 6d. Mutton: Scotch wethers, 4s 4d to 5s 2d; ewes, 3s 6d to 3s 8d; English wethers, 4s 4d to 4s 10d; ewes, 3s 4d to 3s 6d. Lamb: Scotch, 5s to 5s 4d. Veal, 3s to 4s 4d per 8lb.

St. Ives (Hunts), Monday.—Beasts 209, sheep and lambs 1,870, pigs 452. Beef, 7s to 7s 6d; mutton, 8s 2d to 9s 11d; lamb, 8d to 10d; pork, 6s 6d to 7s 3d. Fat and store cattle middling trade, fat sheep good demand, stores fair, fat and store pigs very sharp trade and much dearer, milch cows short supply, middling trade, prices £14 to £22.

FOREIGN.

Deptford, Monday.—Beasts, 917. To-day's supply of beasts, compared with Monday last, shows a decrease of 329 head, and consisted of 759 from the United States, and 158 from Canada. Trade was of a firm and steady nature at an advance of from 1d to 2d on last week's quotations. The best on offer to dress from 4cwt. made from 4s 1d to 4s 2d exceptionally; seconds, 4s to 4s 1d; Canadians, 3s 10d to 4s per 8lb. (offal given in). On Saturday, the supply consisted of 1,685 from the United States, and 185 from Canada, which, with a firm and steady trade, were quoted at from 3s 11 to 4s 1d for the former and from 3s 9d to 3s 11d for the latter. Besides the above number given, 300 States and 300 Canadians were withheld for Monday's market. No sheep on the market to-day.

Liverpool, Monday. There was a larger supply of cattle in market to-day; exceptionally good sorts made late rates, but inferior were lower. A few more sheep on offer; demand slow at lower prices for all classes. Lamb trade practically over. Beef, 9d to 5d per lb.; mutton, 8d to 6d. At market, 1,277 beasts, and 10,157 sheep.

GAME AND POULTRY.

Smithfield, Saturday.—There was a fairly good supply and demand. Prices:—Young grouse, 4s to 4s 6d; old, 2s 3d to 2s 9d; young partridges, 2s 3d to 2s 9d; old, 1s 6d to 1s 9d per brace; geese, 5s to 6s; country ducks, 1s 9d to 2s 3d; Aylesbury ducks, 2s 3d to 2s 9d; Surrey fowls, 2s 9d to 3s 0d; Essex fowls, 2s 3d to 2s 6d; Lincolnshire fowls, 2s to 2s 6d; Irish fowls, 1s 8d to 2s; Russian fowls, 1s 8d; wild ducks, 1s 4d to 1s 8d; hen game, 1s 3d; snipe, 6d to 8d; quails, 1s to 1s 3d; reared pigeons, 7d to 9d; Bordeaux pigeons, 3d to 4d; English hares, 2s 3d to 2s 9d; leverets, 1s 9d; Scotch hares, 1s 9d; tame rabbits, 1s 4d; wild rabbits, 9d to 11d.

PROVISIONS.

London, Monday. Bacon: The arrivals of bacon last week were, from Ireland, 1,700 boxes and from foreign ports, 12,867 bales. At the reduced prices for bacon the market closed steadier, with quotations ranging:—Irish, 59s to 60s up to 68s; Danish, 58s to 64s up to 66s; Canadian, 57s to 59s up to 62s. Butter: The butter market was quiet. French, 92s to 110s; Danish, 92s to 106s; Russian, 98s to 106s; Irish, 98s to 112s; Canadian, 92s to 112; Australian, 102s to 114s; American, 98s to 108s. Lard was a quiet market. Irish, 56s to 64s; Danish, 58s; American, 40s 6d to 41s.

Cottonseed.—Alexandria (Sept. 9).—Shipments for the first eight days of the new cereal year are 9,400 tons, against 13,400 tons in the same period last year.—(By cable.)

LIVE STOCK AND MEAT TRADE REVIEW

(WRITTEN SPECIALLY FOR THE "MARK LANE EXPRESS.")

Trade in London.

At Islington Cattle Market on Monday there was an increase in the supply, the majority of it being drawn from the Midland counties and Ireland, this being usual at this season of the year, the latter supply consisted of 37 Dublins (10 of which were black polled cattle) and 23 Waterfords; these, however, met with a very limited inquiry at a slight decline in value. For both prime and second-quality fat beasts the same remark applies. On both market days fat butchering cows and bulls were in poor demand by both town and country buyers, late currencies, however, governed all transactions.

At the Foreign Cattle Market, Deptford, trade was slow throughout the week, in fact, on Wednesday no sales were made, consequently quotations were not recorded. The total number on offer at both markets was 4,561, as against 4,360 during the previous week, consisting of 1,090 British (decrease 210) and 3,471 foreign (increase 411), consisting of 2,499 from the United States and 972 from Canada. The following were the top rates obtained per 8 lb. (sinking the offal):—90 to 95 stone Herefords, 4s. 4d. to 4s. 6d.; 95 stone Runts, 4s. to 4s. 4d., ex. 4s. 6d.; 100 stone Shorthorns, 3s. 8d. to 3s. 10d.; 110 stone ditto, 3s. 6d.; 95 stone Irish, 3s. 10d. to 4s. 2d.; 90 stone States, 3s. 10d. to 4s.; 95 stone Canadians, 3s. 8d. to 3s. 10d.; 90 stone fat cows, 3s. 4d. to 3s. 6d.

The sheep trade at Islington on Monday was of a firm and steady nature, rates favouring the seller, especially was this so for small sheep; Scotch descriptions also sold well, on the other hand, Irish sheep, though shorter in point of numbers, met with a dull trade, salesmen having to accept from 1d. to 2d. per 8 lb. less money to effect sales. Lambs were in excess of the demand, nevertheless, no lower rates were quoted. On Thursday, trade remained firm with an upward tendency in value. No sheep on offer at Deptford. The total number penned at both markets was 7,320, as aginst 7,810 during the preceding week, consisting entirely of British consignments. Leading pens made per 8 lb. as follows (sinking the offal):—7½ to 8 stone Downs, 5s. 8d. to 5s. 10d.; 8 stone Scotch, 5s. 8d. to 5s. 10d.; 9 stone Downs, 5s. 8d.; 10 stone Irish, 5s.; 10 stone halfbreds, 5s. 4d. to 5s. 6d.; 10 stone ewes, 4s. 2d. to 4s. 4d.; 5 stone fat Down lambs, 6s. to 6s. 2d.; 6 stone halfbreds ditto, 5s. 10d. to 6s. per 8 lb. (offal given in).

Calves numbered 30, and met with a firm and steady trade at from 5s. 2d. to 5s.4d. per 8 lb.

Trade in the West.

The markets are keeping pretty well supplied with both fat and store things, but the offers are by no means excessive in either case, and there is a lack of quality in the great bulk of the supplies. The choicest springers now selling very freely from £17 up to £22 a piece, which is from 20s. to 30s. a head more than they were making a fortnight since. A general run for store bullocks is from about £22 to £26 per pair for the more useful kinds, with a good healthy demand at the price; but for anything that can only be classed as secondary in character there is much less inquiry, though we rather expect to see the rougher kinds in a good deal more favour once the question of beef is assured; and this, it seems now to be almost beyond a show of doubt. Store sheep are still proving somewhat disappointing in respect to the returns they are bringing. Still, although sheep are wanted, there is a disposition to give only a moderate price, and whilst buyers are actuated by this feeling there is no great prospect of any material advance, though as far as we can see there are very few sheep sent back unsold at the numerous sales and fairs in progress all over the western district.

In fat stock, cattle showing anything like quality are steadily hardening in value, and we may put the advance at from 10s. to 15s. a head, if not more for the best, which are now bringing from 52s. to 56s. per cwt. for small, medium-sized heifers and steers, and animals not quite so choice at about 50s., with very good demand at the price; but for decidedly second rate qualities there is a much slower sale foreign importations seriously affecting prices down to as low as 44s. or 45s., which is certainly a very low price for home-bred produce. Good-class calves keep firm at late value 7½d. to 8½d. per lb. but there is practically no change to note in value, though the more ordinary runs are certainly more neglected than they were. Fat sheep, on the other hand, are selling a little more freely than they were, and at a distinct improvement in value, more particularly for wethers, some of the best of wethers are making 8½d. per lb. and over, though from 7d. to 7¾d. per lb. is a more average rate for ordinary grades; heavy ewes, 6d. to 7d. Lamb continues to find a good sale for those of good quality, the best bringing 9½d. to 10d.; but those lacking finish meet a much quieter sale at 8½d. to 9d. Fat pigs maintain their old firmness all round, some of the neatest weights selling up to 10s. 9d. per score, though from 9s. to 10s. is a more average figure for nice qualities; and 8s. to 8s. 6d. for coarser breeds.

Trade in Scotland.

The number of fat cattle on offer has been larger. Trade throughout generally quieter, and about 10s. a head less for the best, and 20s. for the secondary had to be accepted. Sheep have been a fair show. Anything good maintained previous prices, but secondary kinds were the turn cheaper. A full supply of fat lambs, and these met a good inquiry without change in value. A moderate supply of store sheep. These got well sold out at fully higher prices for lambs, and previous prices for sheep. Store cattle still continue to be shown in small numbers. Farmers generally are not yet ready to buy, and a slow demand was experienced, and a part left unsold. There was a good trade for milch cows of the best descriptions. Quotations:—Top price of best cattle per live cwt., 38s. 8d.; current, from 34s. to 35. 6d.; Irish, from 30s. to 33s.; mutton, from 8½d. to 9d. per lb.— JOHN SWAN AND SONS, LTD.

Trade in Ireland.

Dublin Market on last Thursday had largely increased supplies of both cattle and sheep, the number of cattle being 3,481, or over 400 more than the previous Thursday, and sheep, 10,024, or 880 more. The attendance of both home buyers and shippers was good, and trade opened actively. There was an improved demand for shipping cattle, and business all round was of a satisfactory nature, though it could not be said that there was any material change in prices. It is expected that for the next four months the Dublin Market will be largely supplied with cattle, as it is calculated that nearly 20,000, which should have been marketed during the summer months will only be coming in before the close of the year.

Prime ox and heifer beef sold at from 54s. to 56s. and up to 60s. per cwt. for extra choice; good second class beef, from 47s. to 50s; and inferior beasts at 45s. to 46s. per cwt. An early clearance was effected. The increased supply of sheep did not appear to interfere with trade, and the previous week's rates were fairly well maintained. Heavy hoggets made a rather slow sale, owing to the dulness of trade in London, but average-weight hoggets sold freely for the English Midland markets.

Good fat ewes sold well, but for inferior and wasting sheep it was difficult to negotiate at very irregular prices, and a number were left over unsold. Though the lamb season is supposed to be over, there was an active demand for them at full prices for well-meated ones. Best wether mutton was worth from 7d. to 7½d. per lb.; ewe, 6d. to 7d., and inferior sheep from 5d. per lb. upwards.

Large fat hoggets sold at from 44s. to 56s., and small to medium at from 32s. to 42s. each. Large heavy lambs were worth from 30s. to 40s., and other sorts from 20s. each, upwards. Veal was in supply to fill all requirements, with a slow trade, choice selling at from 7d. to 8d. per lb., and coarse calves from 5d. per lb. upwards. Only milch cows of prime quality were in demand, and best springers sold up to £20 and £21 each; other sorts brought from £8 upwards, and were considered to be fully 30s. under the prices of the previous week. The store cattle trade is dull, and at the country fairs only animals in good condition are in demand, thin stores being almost unsaleable. Some large sales of rams and breeding ewes took place in Dublin and other parts during the week, and satisfactory prices were realised. The best figures got by Mr. Gavin Low at his thirty-fifth annual sale of pedigree rams were:—For Oxford Down rams, from 7 to 9½ gs.; Lincolns, 5 gs.; Shrops., 8 to 10 gs., and Border Leicesters from 7 to 9½ gs. Large sales of Cheviot and horned ewes took place.

There was a small supply of pigs in the market, and buyers were also less. Large country fairs were responsible for the absence of many buyers. Prices were slightly higher, but not to any quotable extent. Choice light-weight pigs made from 52s. 6d. to 54s. per cwt., inferior pigs from 35s. per cwt. upwards.

LONDON.

Islington, Thursday.—Beast supply consisted entirely of fat butchering cows and bulls from Midland counties, trade for which, though slow, was firm in value, last trade for which, though slow, was firm in value, last Monday's quotations being well maintained. Top prices: Fat cows, 3s 6d; fat bulls, 7s 10d to 8s 3d per 8lb. Decrease of 280 in the number penned in sheep market, compared with last Thursday; trade for both wethers and ewes was slow, but steady; small, choice sheep selling best. Lambs met little or no demand. Best pens made per 8lb. as follows: 7½ to 8st. Down sheep, 5s 10d to 6s; 9st. ditto, 5s 8d; 10st. ditto, 5s 6d; 10st. halfbreds, 5s 4d to 5s 6d; 10st. Down ewes, 4s to 4s 2d; 5st. fat Down lambs, 6s to 6s 2d; 6st. halfbred ditto, 5s 10d to 6s. Short supply of calves, which met a slow trade. Best offered, to dress, from 144lb. to 166lb., quoted at 5s 2d to 5s 4d per 8lb. Quotations per 8lb., sinking the offal: Beasts, 2s 10d to 3s 6d; sheep, 3s 10d to 6s; calves, 3s 8d to 5s 4d; lambs, 4s 10d to 6s 2d. Total supply: Beasts, 30; sheep and lambs, 1,440; calves, 20; milch cows, 5.

London (Central), Friday.—Fair supplies and trade slow, but firm; English beef, 3s 6d to 3s 8d; Scotch sides, 3s 10d to 4s; shorts, 4s 2d to 4s 6d; Deptford and Liverpool-killed, 3s to 3s 7d; refrigerated hindquarters, best, 3s 8d to 4s; ditto seconds, 2s 8d to 3s 4d; ditto forequarters, 1s 8d to 2s 4d; inferior beef, 2s 4d to 2s 8d. Mutton, Scotch wethers, 5s to 5s 4d; ditto lambs, 4s 4d to 5s 4d; ditto ewes, 3s 4d to 3s 8d; English wethers, 4s 4d to 4s 10d; ditto ewes, 3s 4d to 3s 8d; foreign sheep, 3s 8d to 4s 6d. English lamb, 4s 4d to 5s 4d. Veal, 3s 4d to 4s 8d. English pork, 3s 8d to 4s 4d; Dutch ditto, 3s 8d to 4s per 8lb.

COUNTRY.

Ashford, Tuesday.—Prime beef scarce, and quoted up to 4s 6d per stone; inferior and cow beef about 4s. Mutton unchanged, small half-bred wethers making up to 5s 10d, and Kents to 5s. Veal and lamb unchanged. Pork, owing to large supply, fell about 2d per stone, a few roasters making over 4s; large hogs made nearly the same price.

Basingstoke, Wednesday.—At Raynbird and Sons' sale-yard there was a good attendance of buyers to meet a supply of 30 fat beasts, 63 calves, 497 fat sheep and lambs, 180 pigs, and 105 head of dairy and store cattle, for which the following prices were realised:—Prime two-year-old Devon steers made from £17 10s to £20; heifers, £19 5s; well-bred two-year-old Polled Aberdeens, £16 to £17 15s; three-parts-fat Shorthorn steers, £19; heifers, £19; cows, £13 10s; fat calves, 80s to £5 15s; small, 20s to 55s; fat hogs, 60s to 75s; porkers, 42s to 55s 6d; small, 26s to 38s; store pigs, 12s 6d to 24s 6d; dairy cows, £8 to £21; prime quality Down wethers and ewes, 52s to 57s 6d; small, 46s to 50s; old ewes, 30s to 38s; rams, 42s to 52s; eight-months-old Down lambs, 45s to 55s; small, 38s to 43s; Southdown lambs, 33s to 38s; three-months-old sucking lambs, 30s to 36s; Exmoor sheep, 35s 6d; black-faced Scotch wethers, 35s; mixed Down store lambs, 36s. A firm trade for the prime quality fat beasts, and a clearance made; not much inquiry for low qualities, and to make sales lower prices had to be accepted. A good show of fat sheep and fat lambs (mostly Downs of choice quality) attracted the attention of buyers from the locality and from distant markets. A clearance made, with an advance on the prices, for the fancy lots. Dairy cows of good class sold readily with a brisk trade; store cattle moved off slowly and with difficulty business was done. Fat calves sold readily at late rates. Fat porkers and store pigs met a fair trade and a slight reduction on last week's market. Ruling values:—Best beasts, 6½d to 7d; second ditto, 6d to 6½d; old ewes, rams, and inferiors, 5d to 5½d per lb.; best fat sheep, 8½d to 9d; second ditto, 7½d to 8d; old ewes, rams, and inferior, 6d to 6½d; choice fat sucking lambs, 9d to 10d per lb.; fat calves, 6½d to 8½d per lb.; fat porkers, 9s to 10s per score.

Berwick, Saturday.—Only eight beasts on offer, and these experienced no demand.

Birmingham, Thursday.—Small supply of beasts, sheep, and pigs. Trade good for bacon pigs, but slow for beasts and sheep. Beef, 5½d to 6¾d per lb.; a few Herefords, 7d per lb.; mutton, 6½d to 8½d per lb.; lamb, 8d to 9d per lb.; bacon pigs, 10s per score; cutting pigs, 9s 9d to 9s 10d per score; sows, 7s 10d to 8s per score.

Bristol, Thursday.—At to-day's market, which was exceptionally large and well attended, it being September Fair Day, beef was in plentiful supply, and trade quiet at late rates. Mutton and lamb were offered in about the usual quantity, and an average business was done, values being unchanged. Pigs were again in limited number and prices unchanged.

Calne, Friday.—Present prices for prime pigs, in lots of not less than ten, on rail within 100 miles of Calne.

Prime Stores.	Thickness of fat in any part of Back.	Price per Sc. s.	d.
6sc. 10 lb. to 9 sc. 10 lb.	2½ in. and under	9	0
Under 10 sc.	Not exceeding 2½ in.	9	0
Under 11 sc. 10 lb.	2¾ in.	8	6
Under 12 sc.	3 in.	8	0

C. AND T. HARRIS AND CO., LTD.

Canterbury, Saturday.—There was a large supply of sheep. Good ewes made up to 43s, rough old ewes from 28s to 33s, useful old sheep 38s; lambs averaged from 27s to 29s.

Carlisle, Saturday.—The supplies on the Sands comprised between 300 and 400 Irish beasts, chiefly good heifers for wintering purposes. Buyers attended in good numbers, and there was a distinct improvement in business. Small heifers made £8 10s to £10 10s, and better sorts almost ready for the butcher, £14 to £15 10s each.

Chester, Thursday.—Good supplies of cattle, and a better demand. Best lots of store and dairy stock were sold without much difficulty at last week's top prices. Inferior cattle were not easy to dispose of, and for these quotations were irregular. The sheep pens were filled, and a good business was done at satisfactory prices. Quotations:—Milch cows, £17 to £22; calvers, £16 to £20; barrens, £10 to £13; heifers, £9 to £15; stirks, £6 to £10; sheep, 17s to 40s each.

Colchester, Saturday.—There was a bad supply all round. Beef (grass) sold at from 4s 4d to 4s 8d; mutton, 5s 6d to 6s; lamb, 6s 6d to 7s per stone of 8lb.; and pork, 9s per score.

Doncaster, Saturday. Only a moderate supply of cattle, and small attendance, with a slow demand at late rates. Milch beasts made £16 to £23; bullocks, £12 to £17; heifers and drapes, £11 to £15; stirks, £8 to £10; and yoom stores, £4 to £6 each. Better supply of sheep and lambs, and the latter were 1s per head dearer; ewes made 42s to 50s, and lambs 35s to 38s each.

Dorchester, Saturday. Good average supplies came to hand to-day at Messrs. G. Ensor and Son's sale at the cattle market, but the attendance was somewhat affected by the drenching rain which set in the first thing and lasted practically all through the day. Trade was affected by these adverse conditions, and a good clearance resulted. Milch beasts were a decidedly better trade at prices ranging from £17 to about £20 as a general run for the best, and others £12 to £16 10s; barreners in good fresh condition also found a readier sale at from about £10 to £— per pair. In fat stock the best steers and heifers sold up to 11s 6d per score (or from £16 to £— each); seconds, 9s 6d to 10s 6d. Well-finished mutton of nice quality also commanded a good sale at 8d to 8¾d per lb.; seconds, and best ewes, 7d to 7½d; old sheep, 6d to 6½d.

Dublin, Thursday. — Numbers in market: Beasts 3,481, increase 407; sheep 10,024, increase 880; calves 45, decrease 1. There was again a good demand for choicely finished heavy weight bullocks and heifers, and last week's quotations were readily obtained; secondary and inferior sorts in fair request, but prices show no improvement. The large increase in sheep caused a quieter trade, and late rates were maintained with difficulty. Lambs, except the very best, getting out of season. Cattle, live weight, best, 29s to 32s per cwt; exceptional for Angus crosses up to 34s per cwt; secondary and inferior qualities, 26s to 28s 6d per cwt. Mutton, dead weight, 54d to 74d per lb.—GANLY, SONS, AND CO.

Edinburgh, Wednesday. — There were small supplies of store sheep and a slight increase of cattle. Cattle dull, but sheep met with a fair selling trade. Half-bred sheep, 34s to 40s; Cheviots, 33s to 40s; blackfaced to 28s; half-bred lambs to 31s; Shorthorn cows to £26 15s; Ayrshires to £19 10s; crosses to £24.

Exeter, Friday.—Large supply; prices tending downwards. Steers and marden heifers, 11s; cows, 9s to 10s; some unsold. Very large supply of sheep; very dragging sale; best wethers, large size, 7½d; small, 8d; ewes, 6d to 6½d. All real good mutton sold out. Breeding ewes in large supply; very quiet trade, 36s to 42s; some unsold. Lambs, choice, 9d to 10d; plain not wanted. Calves, 7½d.

Glasgow, Wednesday. — Supplies of cattle and sheep were scarcely so heavy as last week. There was a good demand for all classes, and prices were firm. Best hoggs, 8¼d to 8¾d; best wethers, 8d; secondary, 7½d; best lambs, 9d per lb.; top Scotch cattle, 64s; extreme, 58s to 60s current; Irish, 58s per cwt. Dead meat slow, but values firm; best Scotch beef, 6d to 6½d; best States, 5¾d to 5¾d per lb.

Gloucester, Saturday. — Messrs. Bruton, Knowles, and Co., report their sales as follows:—A shorter supply of 50 cows and calves and incalvers, and a very good trade, almost every lot being sold. A larger supply of store cattle, with a considerable improvement in prices.

Hereford, Wednesday.—There was a big supply of stock, but the demand was poor. Best bullock and heifer beef realised 6¼d per lb., and best cow 5d to 6d. Calves, a fair supply, made 7d. Very full supply of sheep, with trade fairly good for wethers, although not so good for ewes; prices remaining the same as last week. Store and fat lambs sold fairly well, making 8½d. Porks, moderate supply, 5½d.

Leicester, Saturday.—With greatly improved pastures there was more disposition to do business, and although there were only moderate supplies of stock, buyers were better represented. Choice milch cows sold freely at £20 to £22, and good lots at £17 10s to £19 10s per head; secondary, £14 10s to £16 10s; Irish bullocks, £11 to £15; Welsh cattle, £9 to £13; and calves, 15s to 35s per head. Sheep were a small supply, and sold slowly at irregular prices.

Lincoln, Friday.—A small show of store cattle, and very little business doing. Sheep were in better supply, and trade was fair for lambs at 28s to 35s, and gimmers up to 55s. No ewes or wethers.

Lynn, Tuesday.—Average show of fat beasts, trade slow, 7s to 7s 6d per stone. Very few stores, £6 to £11 each. Average show of fat sheep, trade firm, 9s to 9s 6d per stone. Lambs, 28s to 35s; fat lambs, 25s to 36s per stone.

Norwich, Saturday.—The trade for fat cattle, supply of which was quite equal to the demand, was about the same as for the past few weeks, prices being 7s 6d to 8s per 14lb. Larger number of store beasts offered, but all Irish, £6 to £17 per head being the prices quoted. Trade for ewes and lambs was dull, and the supply was an average one, young breeding ewes making 55s to 62s per head, and lambs 28s to 38s. A firm demand for fat sheep, at 10s to 10s 6d per stone, a little more money being paid for best animals. Trade good for fat pigs, at 6s 3d to 6s 6d per stone, with an extra 6d for best lots. A short supply of stores met with a ready sale.

Nottingham, Saturday.—An average show of milch beasts, and a fair trade. Best made £18 to £22, and in-calf heifers £14 to £19. Small show of store beasts, with trade about the same. Strong heifers and steers realised £10 to £14, and younger beasts from £6 to £10. Calves fetched from 25s to 50s. There were no sheep or pigs.

Preston, Wednesday.—There was a large supply of cattle and sheep, and the fair was well attended. Only a slow trade was experienced all round. Cows and bulls made 5d to 5½d, heifers and bullocks 6d to 6¼d, choice heifers 6½d per lb. There was a very slow trade in sheep. Hoggs 8d to 8¼d, tups 5d to 5½d, ewes 5½d to 6½d, and lambs 8d to 8¾d per lb.

Retford, Saturday.—Very few store stock on offer, but quite sufficient to satisfy all requirements. Barely the rates of the previous Saturday were obtained, milch cows making £16 to £18; two-year-old steers and heifers, £10 to £12; yearlings, £6 to £8; and calves, 35s to 45s per head.

Romford, Wednesday. — Fat beasts scarce; trade slow; best animals 4s 4d to 4s 6d; middlings, 4s to 4s 2d per stone. Fair supply of calves; average trade at 5s 2d to 5s 4d per stone. Sheep in good supply; trade unchanged; best sheep, 5s 4d to 5s 6d; middlings, 5s to 5s 2d; ewes, 4s to 4s 2d; lambs, 5s 6d to 5s 8d per stone. Larger supply of pigs; trade rather better.

Thame, Tuesday.—Entries were not quite so numerous as previous weeks. Buyers were again in attendance from the usual quarters. Choice beasts again sold readily, secondary quality and cows were decidedly slower. Sheep were in better demand, and realise fully 2d per stone more money. Veal all disposed of. Bacon dear. Pork especially in demand. Large supplies of weaning calves a late rates. Messrs. Bond and Burrows' sale comprised 107 fat beasts, 213 fat sheep, 87 fat and weaning calves, and 101 fat and store pigs. Fat oxen made from £16 to £19 10s; fat heifers, £15 to £20 7s 6d; fat wethers, 45s to 55s; fat ewes, 40s to 48s 6d; fat lambs, 30s to 45s; fat calves, £3 10s to £5; weaning cow calves, 36s o 64s; bull calves, 10s to 55s; bacon hogs, £3 10s to £5 5s; porkers, 28s to 45s; store pigs, 10s to 26s.

Wolverhampton, Wednesday.—Fair supply; slow trade all round. Beef, 5¼d to 6¾d per lb.; mutton, 6¼d to 8¾d per lb.; lamb, 8¼d to 8¾d per lb.; veal, 6d to 7d per lb.

Worksop, Wednesday. Moderate supply of stock. Trade slow. Best mutton and lamb made fully late rates. Best beef, 7s to 7s 6d; secondary qualities, 6s 6d to 7s per stone; best Southdown and cross-bred mutton, 8d to 9d per lb. Ewes declined quite ½d per lb., making 5½d to 6½d; lamb, 8½d to 9½d per lb.

York, Thursday.—This was the first of the extra markets for the sale of breeding sheep. There was a good show of all classes. About 1,000 north-country ewes were penned, and made 35s to 45s each. There were no rams on offer, but it is anticipated that they will be forward next week, when a very large show of ewes is expected. The best twice-crossed shearling sheep made up to 50s; medium sorts, 44s to 48s; Masham shearlings, 38s to 44s each. The best twice-crossed lambs realised up to 36s 6d, medium, 26s to 34s each. A few north-country lambs were on offer, and made 23s to 28s; and a few Holderness lambs fetched up to 24s. English store cattle were not shown, and there was little or no trade for the few lots of Irish store cattle penned. Calving

FEEDING STUFFS.

Hull, Tuesday.—Linseed: The arrivals of linseed for the week are 45 quarters from Harlingen, 1,000 Riga, 8,592 Rosario, 15,004 St. Petersburg; total, 22,751 quarters. The shipments for week ending September 1 are: Plate, 13,000 Orders, 9,500 Continent; Calcutta, 7,000 London; Bombay, 2,000 Continent; total, 31,500 quarters. Linseed has remained quietly steady throughout the week. River Plate: Spot, 36s 9d accepted; afloat and September made 37s. Duluth: October-November, held for 38s. Cotton seed: The market has ruled dull all the week, and £5 7s 6d accepted again for Egyptian on spot, which is to-day's value, passage and September shipment. A fair business done in new crop Sept.-Oct., also Nov.-Jan., at £5 15s., whereat still sellers. Bombay on spot done at £4 12s 6d, and a little new crop Jan.-Feb. changed hands at £4 14s, and this price still obtainable. Oilseed cakes: There is no change to report.—KEIGHLEY, MAXSTED AND CO.

London, Thursday. — Linseed: The market has been steady, with a rather better demand, but sellers are now more pressing, and at the close the tone very dull. Calcutta London Spot, 38s and August-September, 38s 3d; September-October, 38s 3d; La Plata, July-August, 37s. Hull Quiet, little business passing. La Plata spot, 36s 9d; passage, 37s; September-October, 37s 3d. Rapeseed is extremely quiet, with very little doing. Brown Cawnpore, Sept.-Oct., 34s 9d; Brown Calcutta, Sept.-Oct., 34s 6d. Cottonseed has declined in value, especially for new crop. London—Spot, £5 8s 9d; Sept., £5 10s sellers; Sept. Fayoumi, £5 16s 3d sellers; Nov. Jan., £5 16s 3d. Hull—Spot passage and August, £5 8s 9d; Sept., £5 8s 9d; Sept. Fayoumi, £5 15s; Oct. to Jan., £5 15s. Linseed oil has improved in value. We quote spot and month in pipes, £17; barrels, £17 5s; Sept.-Dec., £17 7s 6d; Jan.-April, £17 15s. Hull naked spot, £16 5s; Sept.-Dec., £16 10s; Jan.-April, £16 15s. Oil cakes: Linseed cakes firm. London made, £7 15s to £7 17s 6d. Cotton cakes quiet. London made, £4 12s 6d.—THE PRODUCE BROKERS CO., LTD.

Mark Lane, Monday.—Linseed cakes: Markets have been poorly attended during the past week, buyers only filling their actual requirements, but as supplies continue to come along very sparingly values are still well maintained at last week's quotations. Russian command most attention at last week's prices for mats, with bags slightly cheaper. A little business has been passing in American, but values are unchanged. East India seed pures are only nominally quoted. London made are neglected, but prices remain the same. Cotton cakes: There has been a total absence of demand during the past week, and with some fresh arrivals quotations are a trifle easier for most descriptions, with Egyptians offering at 1s 3d per ton less money, and English and Bombays unaltered. Decorticated are going more freely into consumption, and a fair trade has been done in London made at £6 17s 6d for cake and meal, £5 5s for special digestive meal. American stocks are practically exhausted, but a limited quantity can still be had at £6 15s., "Open Hand" brand being £7 and meal at £6 12s 6d per ton ex docks. Rape cakes quiet. East India and Ravison unchanged. Maize germ meal: A fair trade has been done in white American for winter despatch from the west at a slight reduction on last week's prices, but English is rather dearer in consequence of some heavy selling for abroad, and sellers now ask 1s 3d per ton more money. Maize gluten meal is but nominally quoted at £5 15s per ton. Rice meal: Stocks have been cleared off, and with little offering in first hands the market is steady at £4 12s 6d per ton ex ship terms. Broken Rangoon rice is relatively cheap at £4 15s per ton. Broken Rangoon are scarce and firmly held at £5 10s per ton. Nitrate of soda is again slightly easier on spot, at £10 13s 9d per ton ex docks.—PINNOCK BROS.

MOLASSINE FEEDING MEAL, packed in bags of 1 cwt. each. Price per ton, £6 15s., in ton lots and upwards. £7 10s. per ton in less than ton lots. Free on rail, Liverpool or London. Uniform delivered price for small quantities, 10s. per bag of 1 cwt.

HAY AND STRAW.

Birmingham, Friday.—Small supply; trade quiet. Old hay, £2 5s to £3 17s 6d per ton; new hay, £2 5s to £3 5s per ton; straw, 2s 6d to 2s 9d per cwt.

Derby, Friday.—New hay, 75s to 80s per ton; best hay, 80s to 90s per ton; other hay, 75s to 85s per ton; best old clover, 80s to 90s per ton; wheat straw, 60s to 70s per ton; pressed straw, 50s to 55s per ton; oat straw, 50s to 60s per ton; peat moss litter, 35s to 40s per ton.

Manchester, Friday.—Beef, first-class, 5½d; second-class, 4¾d to 4¾d; third-class, 5¼d to 5¾d. Mutton: First-class, Scotch Cheviots, 7¾d; others, 7d; second-class, 6d to 6¼d; third-class, 5d to 5¼d. Veal: First-class, 6¼d; second-class, 5¼d to 5¾d; third-class, 4¾d to 4¾d. Bacon pigs: First-class, 5¾d; second-class, 4¾d to 5d; third-class, 3¾d to 4d. Porket pigs: First-class, 6¾d; second-class, 6¼d to 6¼d; third-class, 5¾d to 6d. Lamb: First-class, 7d; second-class, 6d to 6¼d per lb.

Whitechapel, Saturday.—Arrivals were on a smaller scale, and a better demand was experienced at previous prices. Best clover, 72s 6d to 80s; inferior ditto, 60s to 70s; specially picked hay, 75s; good ditto, 53s to 72s; inferior ditto, 45s to 50s; mixture and sainfoin, 65s to 72s 6d; straw, 27s to 38s per load.

MILK.

London, Saturday.—For the week ending September 9: Milk has been in good demand, and although some has been sold at 7d per imperial gallon, higher prices up to 1s have been obtainable.—THE CENTRAL ASSOCIATION OF DAIRY FARMERS.

CHEESE.

Glasgow, Wednesday. — Arrivals were liberal, especially of Cheddars. A moderate demand was experienced, cheese Cheddars commanding in some cases top quotations. Cheddars, 54s to 56s; Dunlops, 50s to 52s per cwt.

BUTTER

(Price per lb., except where otherwise stated.)

Wednesday.—Barnsley: 1s to 1s 2d. Beeston: 1s to 1s 1d. Colne: 1s 3½d. Dorchester: 1s to 1s 2d. Goole: 1s 1d to 1s 2d. Hereford: 1s 2d to 1s 3d. Holsworthy: 1s 2d. Keighley: 1s 2d to 1s 3d. Kirbymoorside: 10d to 11d. Knaresborough: 1s 6d to 1s 8d per 24 oz. roll. Louth: 1s 1d. Market Drayton: 1s 1d to 1s 2d. Market Weighton: 1s to 1s 1d. New ton Abbot: 1s 3d to 1s 5d. Northallerton: 1s 5d to 1s 7d per roll of 24 oz. Stockton: 1s 2d to 1s 4d. Truro: 1s to 1s 1s 2d. Uttoxeter: 1s 2d to 1s 3d. Worksop: 1s 2d to 1s 3d.

Thursday.—Birmingham: 1s 2d to 1s 3d. Brigg: 1s 1d to 1s 3d. Driffield: 1s to 1s 1d. Kidderminster: 1s 2d. Northtawton: 1s 3d. Penistone: 1s 1d. Penzance: 1s to 1s 3d. Ripon: 1s 6d to 1s 8d per 24 oz. roll. Scarborough: 1s 3d. Wetherby: 1s 1d to 1s 2d.

Friday.—Altrincham: 1s 1d to 1s 2d. Ashburton: 1s 2d to 1s 4d. Barnstaple: 1s 4d to 1s 6d. Chester: 1s 2d. Congleton: 1s 2d. Crewe: 1s 1d to 1s 2d. Camelford: 1s 2d. Derby: 1s 3d. Exeter: 1s 3d to 1s 4d. Helmsley: 10d to 11d. Knutsford: 1s 3d. Leyburn: 1s 6d to 1s 7d per 24oz. roll. Lincoln: 1s 2d to 1s 3d. Lostwithiel: 1s 2d. Macclesfield: 1s 1d to 1s 2d. Nantwich: 1s 2d. Northwich: 1s 2d to 1s 3d. Otley: 1s 7d to 1s 9d per 24oz. roll. Redruth: 1s to 1s 2d. Runcorn: 1s 3d. Stamford: 1s 2d to 1s 4d. St. Austell: 1s 4d. Stockport: 1s 1d to 1s 3d. Tavistock: 1s 5d to 1s 6d. Totnes: 1s 3d to 1s 4d.

Saturday.—Appleby: 11½d to 1s 2d. Bridgnorth: 1s 1d to 1s 3d. Carlisle: 1s 2d to 1s 3d. Doncaster: 1s 2d to 1s 3d. Grantham: 1s 2d to 1s 3d. Howden: 1s 1d to 1s 2d. Ipswich: 1s to 1s 2d. Lancaster: 1s 1½d to 1s 2d. Malton: 11d to 1s. Pontefract: 1s 2d. Retford: 1s 3d to 1s 4d. Richmond (Yorks): 1s 1d to 1s 3d. Shrewsbury: 1s 2d. Skipton: 1s 1d to 1s 2d. Stokesley: 1s 1d to 1s 2d. Whitby: 1s 2d to 1s 3d. Worcester: 10d to 1s 2d. York: 1s 2d to 1s 3d.

EGGS.

(Number per 1s., except where otherwise stated.)

Wednesday. — Barnsley: 10 and 11. Boston: 13. Colne: 2s per score. Goole: 11 and 12. Holsworthy: 12. Hereford: 12 and 13. Keighley: 10 and 11. Kirbymoorside: 12. Knaresborough: 10 and 11. Louth: 14. Market Drayton: 12. Market Weighton: 13. Newton Abbot: 1s to 1s 1d per dozen. Northallerton: 11 and 12. Stockton: 9 and 10. Truro: 11. Uttoxeter: 1s 8d to 1s 9d per score. Worksop: 1s 8d to 1s 10d per score.

Thursday.—Birmingham: 9 and 10. Brigg: 13 or 14. Driffield: 13 or 14. Evesham: 11d to 1s 0½d per dozen. Kidderminster: 10. Penzance: 11d per dozen. Northtawton: 14. Penistone: 11. Ripon: 12. Scarborough: 10. Wetherby: 10 or 11.

Friday.—Altrincham: 8 and 9. Ashburton: 1s to 1s 2d per dozen. Barnstaple: 10 to 12. Camelford: 12. Chester: 9 and 10. Crewe: 10. Congleton: 9 and 10. Derby: 11. Exeter: 10. Helmsley: 12 and 13. Knutsford: 10. Leyburn: 12. Lincoln: 13 and 14. Lostwithiel: 14. Macclesfield: 9and 10. Nantwich: 10 and 11. Northwich: 9. Otley: 10. Redruth: 12. Runcorn: 9 and 10. St. Austell: 12. Stamford: 9 to 11. Stockport: 8 and 9. Tavistock: 10. Totnes: 1s to 1s 1d per dozen.

Saturday.—Appleby, 11 and 12. Carlisle, 10 and 11. Doncaster, 11. Grantham, 12 to 14. Howden, 13 to 14. Ipswich: 10 to 12. Lancaster: 7 to 10. Malton: 11 and 12. Pontefract: 12 and 13. Retford: 1s 9d to 1s 10d per score. Richmond (Yorks): 10 and 11. Shrewsbury: 10. Skipton: 10 and 11. Stokesley: 10 and 11. Whitby: 10. Worcester: 10. York: 12. Bridgnorth: 10.

POTATOES.

Borough, Saturday.—Good supplies were received this morning, and experienced a very slow demand. Silts, 55s. and Blacklands, 45s per ton.

Goole, Wednesday.—There was little stirring at this market, despite the fact that there was a fair attendance of buyers. Buyers were not numerous, and the few lots which changed hands were at last week's prices. In the retail market prices were 4d to 7d per stone.

Spitalfields, Saturday. The market was very heavily supplied indeed, and trade ruled exceptionally slow. Duke of Yorks, 50s to 60s; Puritans, 50s to 60s; Royal Kidneys, 55s to 65s; Beauty of Hebrons, 50s to 60s; British Queens 50s to 55s; Blacklands, 45s to 50s; Up-to-Dates, 50s to 60s per ton.

WOOL.

Canterbury, Saturday. — Kent wool, 11½d to 12d.; lamb wool, 8d; halfbred fleeces, 1s to 1s 0½d; and Downs 1s 1d per lb.

London, Saturday.—English—per pk. of 240 lb.—Fleeces S. Dn. Hggs., £12 10s to £14; halfbred hoggs, £12 10s to £13 10s; wethers, £12 to £13 5s; Kent fleeces, £12 to £12 15s; South Down ewes and wethers, £10 to £14; Leicester ditto, £12 to £12 10s. Colonial—per lb.: Vic. Fleece super, 1s 11d to 2s 1d; scoured super, 1s 1d to 1s 2d; scoured average, 1s 11d to 2s; greasy average to fair, 1s 1½d to 1s 2½d; N.S.W., scoured aver., 1s 1d to 1s 3½d; greasy average, 11d to 2s; N.Z. Scoured average, 1s 3d to 1s 9½d; greasy average, 1s 0d to 1s 1½d; Cape scoured super, 1s 9½d to 1s 10d; three average 2s 1d to 2s 1d; greasy average, 7½d to 9d; Natal Scoured, 1s 3d to 1s 5d; greasy average, 8½d to 9½d. Crossbreds—Cape: W. good to super, 1s 2d to 1s 3d. New Zealand fine, 1s 2d to 1s 3d; medium, 1s to 1s 1d; coarse, 10d to 11d.

Halifax, Saturday. The tendency of wool is still to higher prices. Home-grown hog wools especially are hardening, and some varieties appear to be scarce. Yorkshire hogs are now quoted 1s 2d. Lincoln fleeces from 1s 1½d to 1s 4d, picked Shropshires are about 1s 4d; while North hogs are very steady at late rates. In weather wools Lincolns are selling at 1s 1d, and half-breds at 1s 1½d. Merino wools are also fetching high prices.

Sheep Fairs and Sales.

Lothian Ram Society's Show and Sales.

The annual show and sale under the auspices of the Lothian Ram Society took place at Coltbridge, Murrayfield, on Wednesday and Thursday. As usual the sale on the first day was confined to blackfaced rams and ram lambs and Cheviot lambs. The total number of all breeds was 917, or a decrease of 77 on last year. Blackfaced tups numbered 69, or 97 fewer, and tup lambs 35, or 47 fewer. There was, however, a good entry of Cheviot rams. The awards and prices on the first day were as follows:—

Best Blackfaced Shearling Ram—1, John Archibald, Overshiels; 2, John Murray, Midcrosswood; 3, A. D. Mitchell, West Loch. Best Group of Five Blackfaced Shearling Rams—1, John Archibald; 2, John Murray; 3, A. D. Mitchell. Best Cheviot Shearling Ram—1 and h.c., A. and J. K. Smith, Leaston; 2, A. T. Wright, Longnewton; 3, Wm. Millar, South Slipperfield; v.h.c., John Murray, Parkhall. Best Group of Five Cheviot Shearling Rams—1 and 2, A. and J. K. Smith; 3, John Murray; v.h.c., A. T. Wright; h.c., William Millar. The highest price was paid for the last lot offered at the sale. This was one in the Parkhill consignment, which was placed only fourth in the prize-list, but which was second at the Highland Society's Glasgow Show. Miss Grieve, Skelfhill, was the purchaser at £58. The Leaston first prize single ram sold at £23 to Mr. Burnett, Greenside Hall, while the Longnewton second-prize-taker and the third prize ram from Slipperfield brought £7 and £12 10s. respectively.

On the second day the Leicesters, Shropshires, Oxford, and half-breds were offered. The numbers forward were pretty much the same as last year's show and sale, though there was a shrinkage in the Leicesters, 413 being penned, as against 466 last year. The entries in the other breeds were well up, and altogether there were about 700 within the yard. Prizes offered for the Border Leicesters were allocated by Mr. James Dunlop, Midland, Fenwick, as follows:—Best Leicester Shearling Ram—1, David Hume, Barrelwell, Brechin; 2, R. G. Murray, Spittal, Biggar; 3, A. and J. K. Smith, Leaston; v.h.c. and c., the Earl of Morton, Dalmahoy; h.c., J. and J. R. C. Smith, Galalaw. Best Group of Five Leicester Shearling Rams—1, David Hume; 2, Messrs Smith, Leaston; 3, Messrs. Smith, Galalaw; v.h.c. and h.c., John Mark, Sunnyside; c., William Scott, Thornhouse.

Mr. Hume's first prize single shearling ram was taken out at £30 by Mr. Sharp, Ewingston. The Barrelwell prize-winning group of five averaged £19 4s., the top figure being £24. The Leaston consignment of two score met a good demand, the representative of the Earl of Derby being an extensive purchaser. For 13 he paid from £8 to £15. Mr. Douglas, Early Pier, bought the third prize shearling for £16; while the average for the second prize group was £14 4s., the highest being £16 10s. Mr. Murray's second prize single shearling ram ran out to £33, the highest price of the sale, paid by Mr. Murray, Heaviside.

The Aghavoe Shropshire Sheep.

This important annual event was held at the Glebe Farm, Aghavoe, Ireland, on August 30, when Mr. R. F. H. White exposed for sale 40 shearling rams, 60 shearling and breeding ewes, 10 ram lambs, 25 ewe lambs, and 50 crossbred Aberdeen-Angus cattle. Mr. White's recent successes at the Royal Dublin Show (where he secured the bulk of the prizes for Shropshire sheep) attracted a large company, and Mr. Alfred Mansell, of Surewsbury, who officiated as auctioneer, can be congratulated on a very successful sale. The champion shearling ram at Dublin went cheaply to Mr. Barker at 21 gs. The second prize ram was much fancied, and made the good price of 40 gs., his purchaser being Mr. T. S. Minton, of Montford, England. No. 4, a grand ram, one of the Dublin cup winners, by Ulster Councillor, was secured by Mr. R. H. Stubbes at 27 gs. Another ram, also a son of Ulster Councillor from a John Bull ewe, was purchased for Mr. A. A. Mansell of Tasmania. The first prize two-shear at Dublin made 17 gs. to Mr. Jackson, who got a very cheap ram. A good, steady sale followed, the general average being £9 5s. 1d. Shearling ewes, a nice matchy lot, sold well, Mr. Jackson giving 95s., 70s., 57s. 6d., 55s., Mr. Green 72s. 6d., and Mr Duncan 55s.; the average working out at £3 3s. 8d.

The Japanese Cavalry Horse.

The "Times" correspondent with the Japanese Army has written an interesting account of our ally's cavalry in time of war. The combatant aspect is not the one which appeals to our readers, but he has something interesting to say about the type of horse used. It appears Japan produces poor horses. They are lacking in size, shape, and weight, and, being mostly entire, their tempers are frequently fiendish. Animals of this description are not calculated to gain the affections of men; and so there is not among the Japanese that sympathy and understanding for horses which are essential to horsemastership. Horsemastership partakes very much of the instinct which teaches a mother how to take care of her child. A good man with horses knows when the digestion of his charge is out of order, understands what is comfort for him, and what is discomfort, when to feed him up and when to cut his feed, and feels when strength is exhausted and rest imperative. Were it not for results, one would be inclined to accuse the Japanese of being entirely devoid of the faculty of horsemastership, and appear to suffer from chronic indigestion; whilst their ideas of what means comfort for a horse are frequently opposed to mere common sense. During a halt horses will be allowed to stand in a burning sun or a biting wind, heads tied high in the air, girths unloosed, generally suggesting the acme of discomfort. In their stalls the horses, by continual pawing, as if in protest of their treatment, will wear a deep hole, in which, with weight thrown on to the forelegs, they will be allowed to stand all day, tied up so that they cannot move. Nevertheless, excellent results have been obtained, and it is impossible to deny that the Japanese have exercised great judgment in their treatment of horses, however opposed to Western ideas some of their methods may be. As I wrote last year from General Kuroki's army in regard to their transport horses:—"They have acted on the principle which a prudent man adopts in regard to his income—that of living within it. They ask a horse to do only that which is easily within his compass. They load him, not with what he can pull on the level road, but with what he can drag up a steep mountain pass without inducing serious fatigue." That practically sums up the Japanese treatment of horses. A continual regard for the capacity of horses and care never to exceed that capacity has resulted in an economy in remounts that makes one blush for our own extravagance in South Africa, despite our vaunted knowledge of horseflesh.

The unvarying food of the Japanese horse throughout the war has been barley, uncrushed and unboiled. It might be thought that only stomachs lined with brass could deal with such scouring food. Yet the Japanese horse keeps in wonderful condition. Good coats, bright eyes, and arching necks are characteristics of this curious, thousand-cornered animal. On service they feed him twice a day, deciding that as a mid-day meal is always uncertain in the field it is better to accustom him to do without. Shoeing, on the German system, is carefully attended to—cold when on the move, hot when possible. The hoofs of Japanese horses are usually contracted, and feet cause more trouble than anything else. Horses are usually allowed to stand in water near a cavalry camp. A good deal of this might be obviated in the stable by keeping the ground level and by applying wet bandages after long journeys on hard ground. Though the forelegs of Japanese horses are usually very close together, there is very little brushing, a testimony to the condition in which the horses are kept. So far no disease has manifested itself; and from the fine type and unvarying excellence of condition of the Chinese, or, properly speaking, Mongolian, pony, it may be assumed that the Manchurian climate is highly favourable to horses. In regard to the horses, it may finally be remarked that after fifteen months in the field the Japanese cavalry have only required 50 per cent. of remounts, a result in extraordinary contrast to our South African campaign, in which annual remounts of 250 per cent. were required for cavalry, and 400 per cent. for mounted infantry and irregulars.

DAIRY.

Milk Deficient in Fat: Interesting Case.

A case of some interest to dairy farmers was heard at Wolverhampton on Wednesday by the Stipendiary Magistrate, Mr. N. C. A. Neville. The defendant was Robert Bradburn, a dairy farmer, of Wednesfield, and the charge against him was that he had sold milk from which 20 per cent. of the original fat had been abstracted.—Mr. Van Tromp, the inspector under the Food and Drugs Act, prosecuted, and stated that several samples of defendant's milk had been taken by the assistant inspector, and Mr. Jones, the county analyst, had certified that it was deficient in fat to the extent of 20 per cent. There was no dispute as to the samples, as Mr. Bradburn and himself had taken samples of the milk from time to time, and many analyses had been made. The cows were milked three times a day at irregular intervals, and the analyses showed that the morning's milk was not as rich in fat as the afternoon and evening milk. Mr. Van Tromp would not say that the milk had been improperly manipulated, but he asked the Stipendiary to say that probably owing to improper feeding or other causes the milk did not come up to the proper standard, and was not legal milk according to the requirements of the Act and the Board of Agriculture regulations.

In answer to Mr. R. A. Willcock, who appeared to defend, witness said he could not understand why the morning milk was so low in its percentage. He had not known such a case before. There was no question as regards the milking, as the inspector had been present; but all the samples which had been taken showed that the milk given by the cows was weaker in the morning than in the afternoon and evening. He believed that Mr. Bradburn had taken scientific advice and done all he could to find out what was wrong and what could be done to improve the quality of the milk.

The Stipendiary said there had been no improper milking in this case, and he was of opinion that the defendant had done all he could to find out the causes of the milk being poor. It might be that the cows during the night absorbed some of the fat, and this accounted for the milk being poor in the morning. The case was dismissed.

Chester Cheese Fair.

Mr. Challinor reports as follows:—"Pitch about 55 tons; good attendance of buyers; business fairly brisk. Prices:—Finest lots 57s. 6d. to 62s., one special dairy making 64s.; medium 52s. to 56s.; lower grades down to 45s."

PUBLICATIONS RECEIVED.

During May and June of this year an interesting series of articles on "Aberdeen-Angus Cattle: Their Recent History" appeared in the columns of the *Banffshire Journal*, the writer being Mr. J. R. Barclay. These papers have now been published in small book form, and thus should be read by even a larger number of those interested in this popular breed of cattle, for the work is well done and worthy of careful perusal.

Mr. Perry, of the Hardy Plant Farm, Winchmore-hill, N., has issued Part I. of his new autumn catalogue, this part being devoted to bulbs and tubers. It contains particulars of many new plants offered for the first time, as well as the old ones which have won for themselves such popularity.

The Board of Agriculture has issued a circular calling the attention of Agricultural Associations to a letter addressed by the President to railway companies, suggesting the desirability of local conferences between officers of the companies and agriculturists to discuss any questions of railway charges and facilities that need attention. The replies from the companies are stated to be of a very cordial character, and it is suggested that the Agricultural Associations should communicate with the Board if any of their members have complaints or suggestions to make in relation to the subject, in order that arrangements for conferences may be made.

ADVERTISEMENTS RECEIVED TOO LATE FOR CLASSIFICATION.

SHAFTESBURY FARMERS' CLUB,
At SHAFTESBURY,
OCTOBER 4th, 1905.
Entries close September 30th.
T. PINNEY, Secretary,
High Street, Shaftesbury.

ROYAL SOUTH BUCKS AGRICULTURAL ASSOCIATION,
Near SLOUGH STATION,
OCTOBER 4th, 1905.
Entries closed: Root Crops, July 1st; Pulled Roots, August 31st.
R. H. BARRETT, Secretary,
Stacey House, Slough, Bucks.

BRITISH DAIRY FARMERS' ASSOCIATION,
At the ROYAL AGRICULTURAL HALL, ISLINGTON,
OCTOBER 3rd, 4th, 5th and 6th, 1905.
Entries closed September 4th.
W. C. YOUNG, Secretary,
12, Hanover Square, London, W.

TUXFORD AGRICULTURAL SOCIETY,
At TUXFORD,
OCTOBER 3rd, 1905.
Entries close September 23rd.
C. E. WHITTINGTON, Secretary,
Tuxford, Newark.

Live Stock Record.

POISONOUS v. NON-POISONOUS SHEEP-DIPS.

On July 31 last we drew attention to a very sad case of a large number of sheep having died owing to the improper use of a poisonous sheep-dip, and of a jury having awarded to the owner no less than £1,400 damages for his loss. The ingredients for this dip were partly arsenical, and the remarks we made bore mainly on a circular of the Board of Agriculture in which a division had been made between arsenical preparations and dips composed of sulphur and lime or carbolic acid, which are non-poisonous. The Board gave recognition to the large number of sheep-dips on sale, and had made arrangements to test any or all of them if submitted, in which case those found efficacious, and which could be employed with impunity, would receive a diploma of recommendation.

The subject is so important that it cannot possibly be discussed too much. Not that we think there is any danger of losses of sheep from poisonous dips frequently happening; much less of sheep owners in general having the slightest cause to feel apprehension in making use of those of the best brands. They have been before the public too long for any doubt to be cast either on their efficacy or harmlessness. Sheep-dipping is no new thing, having been habitually practised by the majority of English flockowners for half a century or more. When a farmer has been using a dip for several years, and never lost a sheep in consequence, he would be very foolish to refrain from employing it again because he learns for the first time that it has arsenic in its composition. As a matter of fact, all our best and most reliable dips are of the arsenical class, and those of the well-known brands have been used on so many thousands and tens of thousands of sheep devoid of the slightest loss, that they stand in need of no Government hall-mark to make them popular. Still, the tests offered by the Board of Agriculture may prove of service in respect to fresh, newly-introduced preparations, especially if they should prevent any improperly prepared ones, calculated to poison sheep, to come into commerce.

The Departmental Committee did not recommend any special dip, giving the very excellent reason for this that "the evidence and the experiments both lead to the conclusion that the best representative dips of the types commonly used in the country are effective against the sheep-scab acari, and, to a great extent, against keds, and are also advantageous for the general health of sheep." In the report on the Bangor experiments it is admitted that the carbolic, no less than the arsenic, dips require skilful preparation, as, "unless the strength is carefully regulated, they cause irritation to the sheep for some time after dipping." This undoubtedly is the keynote of the opera; and it is because of the skilful preparation of our most popular sheep-dips that they have been so very successfully made use of in the past without in any way proving deleterious to the health of the animals subjected to their influence.

STOCK AND SHOW NOTES.

By Herdsman.

The late Sir Jacob Wilson's well-known herd of Shorthorn cattle is to be dispersed by auction on Friday next, the 15th inst., at Chillingham Barns, Northumberland, Messrs. J. Thornton and Co. being the auctioneers. Nothing but the very best was ever used in the herd, and the result is seen in the exceptional merit of the animals to be sold, the young stock being from highly-bred milking dams in natural breeding state, whilst some of the calves are worth training on for show. The sale is noteworthy, though regrettable, and is sure to attract a large company of breeders from all parts.

Some good prices should be obtained at the sale of Aberdeen Angus cattle to be held at Preston Bissett, Buckinghamshire, on Tuesday, the 26th inst., for all the animals to be sold are of the very best breeding, and amongst them are some excellent milkers. They have chiefly been bred by the Rev. C. Bolden, who has won prizes with them at the Royal, Bath and West, Royal Counties, and other shows, whilst breeders in America have shown their appreciation by taking a number of the bulls, cows, and heifers. Included in the catalogue are five yearling heifers from Mr. Bridges's famous herd at Horley, Surrey, and, as is only to be expected, they are animals worthy of entrance to any herd. The scene of the sale is only a little over one hour's journey from London, and is easily got at from other centres, so that a good attendance of breeders may be anticipated; the four other sales held here have been successful ones. There will be a luncheon at 12 noon, and the sale will commence half an hour later.

I would draw the attention of intending exhibitors at the Altrincham Agricultural Society's show to the fact that they can only make entries at double fees now, for single-fee entries closed on Saturday, and those at double fees will only be received up to Wednesday, the 13th inst. It is the largest one-day show in the Kingdom, and this year the area has been increased by 5 acres, so that the entries are likely to be more numerous than usual, for the handsome sum of £1,750 is offered in prizes, with nearly 200 specials, medals, and championships. The greatest care is taken of all exhibits, which are all under cover, and fed by experienced assistants. There are four railway stations that serve the show ground, and trains from Manchester run out to Altrincham every few minutes, so that there is every convenience for visitors. The Secretary is Mr. J. Herbert Hall, 2, Dunham Road, Altrincham, who will foward a prize list and entry form free on receipt of postcard.

On Wednesday, the 26th inst., at Clapton, Thrapston, Northamptonshire, Messrs. J. Thornton and Co. will dispose of a number of Mr. Rowland Wood's pure-bred Shorthorns. The herd is of long standing, and has a good reputation in the Midland counties, not alone for its good dairy properties, but for its young bulls. Sixteen bulls sold from the herd this year have averaged £82 18s. 6d., a very satisfactory sum from a tenant farmer's stock; whilst animals from the herd have frequently won prizes at Birmingham, both at the spring and autumn sales.

Speaking at a luncheon held in connection with the agricultural show held at Long Newton, Stockton, on Tuesday last week, the Marchioness of Londonderry advised farmers to breed the best stock and, in horses, to pay particular attention to a good class of hunter. "We cannot go over the land in motor-cars," was one of her observations, "and so long as the tenant farmers of this country preserve foxes, good hunters will always be required."

Notes and Jottings.

In Essex the other day the question of grooming cows was discussed, and when first broached appeared to create some amusement amongst certain of the company. These gentlemen had evidently not tested this business for themselves (far the better way of ascertaining results), or they would not have been simply amused. There are few things connected with either milch or fatting cattle, or even young stock when confined in their sheds during the winter season, that pay so well as using plenty of "elbowgrease" upon them. So far as milch cattle are concerned, the matter of cleanliness alone is worth great consideration, but is not in it when compared with the benefit accruing to the cows themselves.

Far back in the last century the late Mr. McCombie, of Tillyfour, who turned out the finest fat cattle of his day, was very particular in having the brush kept going over his favourites once every day. The comfort the poor animals derive from it causes them to rest in peace, and put on flesh, instead of being, as the majority of the ungroomed animals are, fidgeting and trying to rub their shoulders and necks against their mangers or standing boards, and their other ends against each other. Only some two or three years since the writer was inspecting a large farm in Suffolk, where several yards of Galloways and their crosses were being fattened, and was struck with the gentleness that prevailed amongst these cattle in every fold.

It must be borne in mind that in a general way the breed of cattle mentioned are as little civilised as any of our bovine race, yet though a perfect stranger, the bullocks in each of these yards came up with an enquiring look, rubbed their heads, and tried to caress with their rough tongues like the greatest of pets. In asking how it was that these cattle were so docile, their owner said, "It all comes of having them groomed. All these cattle are brushed over once a day, and it has a marvellous effect on their quietness. They rest better, fatten better, and pay better by far than if left to themselves." This was the case when in a loose yard. What must it be when the poor animals are helplessly tied by the neck?

In most of the cattle markets the autumn fall in prices has come rather earlier than usual. In most of the markets in the leading fattening districts the last few days before writing these lines beef and stores, too, have been very flat, and the flatness also noted in the Metropolitan Market, where the quotation for the best stock was given at 6¾d. per lb. The recent rains have refreshed pastures marvellously, and given on the best land quite a fair bite, but apparently graziers think that winter will soon be upon them, and that it is better to take a bad price now than a worse later on. "Wise, too." There is, however, from all reports, both at home and abroad, a fair prospect of prices in best-finished beef at Christmas.

Discussing the question with some extensive butchers immediately previous to writing these notes, great complaints were made by them as to the lack of suet in the cattle this season. Already, though early, suet is in greater demand than usual, so that the not over fat cattle that

are suiting the weather and the consumer, so far as beef is concerned, are, so far as the suet is concerned, inconveniencing a large portion of the community. This alone speaks very much in favour of a good demand later on for cattle that are finished and likely to die well. By-the-bye, nothing makes so much kidney suet (and with this weight) as a little maize in some shape or other.

Still the Shorthorn keeps at the head of affairs so far as prices and export are concerned. At home very good prices and an excellent average were produced at the sale of Lord Brougham's Shorthorns near Penrith, the average of fifty-four head being put upon £50 each. In the Argentine, too, capital prices and keen demand appear to exist, a sale by auction having just taken place in that country, where the bulls averaged £204 15s., the cows £250 16s. 8d., and the heifers £241. From the particulars given it would appear that these Shorthorns were all round more of the beef than the milking types. A good, really good, Shorthorn, however, of either type is sure of a purchaser at the present time.

Travelling through the Midlands the other day a herd of bullocks were fattening in a rich green pasture that were certainly of the old smoky-faced Montgomeryshire breed. What a time it is since the eye rested upon a herd of these fine old cattle—and useful rent-payers, too! When the jubilee of the "Royal" was held at Windsor there were, I believe, one or two exhibits of this breed, but they appear to be well-nigh ousted from their own hunting-ground by the white faces. This is a matter much to be regretted. The breed must have some good points that will probably be much wanted ere long. Surely some wealthy lover of our old breeds might be found to take up the interests of this decaying breed and reinstate them. We ought not to lose any breed of cattle now.

On the same journey that brought to view these old, handsome, smoky faces some fine Herefords were seen on very rich grass, and enough of it, but their owner was very wisely giving them some good, sound, sweet hay. This will be a great help to them now. The grass is very washy, and when eaten plentifully, whilst still saturated with the heavy night dews, is a very chilling breakfast. In a field adjoining those mentioned were also some of the most symmetrical Welsh runts it has been my pleasure to see for a long time. Rotund, well-ribbed cattle, and in fine condition, and—"sqeak it softly"—they were, from all appearances, real Welsh, no alien blood in them; and there is no doubt they will find a ready market.

Welsh breeders, by the bye, are doing an excellent thing in amalgamating the northern and southern breeds of blacks. Unity is strength, and in these latter days there is quite a tendency to too much "herd-book literature." It is very satisfactory to read that the funds of the Welsh Cattle Society are on a sound basis, and the council are acting wisely, there is little doubt, in discussing the question of a reduced subscription to tenant farmer occupiers of limited acreage. This will tend to give increased interest to these farmers, and the tenant farmer is the soundest foundation on which to build up any breed of live stock. The tenant farmer must have them sound in constitution; he must have them rent-payers; and these are the kind of animals—the only kind—that are worth encouraging.

The Welsh Society are also broaching another very important subject in connection with their cattle, and that is equally important to all other breeds—namely, the establishing of a scale of points. This is a very vital matter, and it is much to be regretted that such a thing is not more generally looked up and consulted at our leading shows of cattle. It would not, perhaps, be a superfluous innovation if all our breeds of cattle were once or twice in the year say, at any rate, at our "Royal" Show—judged by their scale of points. Such a proceeding would be immensely instructive, both to the rising race at home and to all foreigners who visit our country, and would also be more satisfactory to exhibitors or, at least, ought to be if properly carried out.

The amalgamation of these Welsh herd book societies, it is to be hoped, will not be without its effect upon some of our other breeds. Our good old friends the Shorthorns would be much better, and, more important, if the lineage of the whole of the sects could be traced under one heading. Why should the Lincoln red be alienated from the red, white, and roan? Then there appears quite a probability that a Dairy Shorthorn herd book will be forthcoming ere long, thus making confusion more confused. Too much study is a weariness, and seeing that all denominations of Shorthorns are in reality simply "Shorthorns," it would appear quite superfluous to distinguish them by having separate herd-books.

The receipts of cattle at the Chicago Market during one week (six days) prior to August 22 totalled no less than 75,115 head. In spite of this enormous supply, reports state that really prime cattle become scarcer at every succeeding market. To those who have large herds of fat cattle to get rid of there is little room for congratulation that the number of cattle shipped from Chicago during a week at the above date was some 1,600 less than at the same period last year, and when markets are overdone every thousand makes a difference. The general outlook in this important centre—important to English feeders as well as American—is said to be much brighter than for two or three weeks past, especially in the best article.

Sale of Mr. Henry Williams' Shorthorns.

An important sale of pure-bred Shorthorn cattle, the property of Mr. Henry Williams, was conducted by Messrs. Thornton and Co. on Tuesday at Moor Park, Harrogate. The herd was founded over twenty years ago from the stocks of the most distinguished breeders in Yorkshire and the North of England, and latterly some good animals were added to the herd from bzreeders of great repute in Scotland. The stock was brought out in good condition. The weather, being very wet, undoubtedly kept many visitors from attending the sale. The biddings for the cows were not very brisk, but the heifers and calves generally made satisfactory prices. Mr. A. Haley was an extensive buyer, among his purchases being a handsome white heifer by Sir Archibald Christen at 61gs, and Lavinia, a five-year-old cow bred by Mr. A. M. Gordon, at 40gs. Lord Brougham and Vaux gave 42gs. for Rose of Antrim, and 52gs. for her red heifer calf by Italian, which was considered to be one of, if not the best young animal in the sale. A very charming yearling heifer, Augusta Olive, after sharp competition, fell to the bid of Mrs. Walsh, from Ireland, at 65gs., this being the highest price of the afternoon. The bulls did not realise very high prices. Mr. G. H. Proctor, the Mayor of Durham, secured the stud bull, Orangeman, cheaply at 35gs., and Mr. A. S. Thornton and Mr. A Milnthorpe got useful animals at 25gs. each. The following were the leading prices and buyers:—

COWS, HEIFERS, AND CALVES.

Sale of Shorthornes at Plumpton

On Wednesday, at Ashurst Farm, Plumpton, close to the Plumpton race course, Messrs. Drawbridge and Ansell, of Haywards Heath, brought under the hammer the fine herd of Shorthorn milch cows belonging to Mr. W. Hodgkinson, who is relinquishing the milk business. The prime large-framed cows were nearly all selected from the Vale of Aylesbury, and high characters were given of the milk producing propensities of the herd. There was a large attendance, and very good prices were realised, the whole herd being sold with one exception. The highest figure obtained was £25 for a light roan cow, with calf by side, bought by Mr. Crowleigh, of Heathfield. Several cows sold at £22, £21 10s., and £20 The prices ranged down to £15. The herd of 37 cows and one bull realised £691, averaging about £18 4s. per head.

Sale of Sussex Cattle at Haywards Heath.

The annual autumn sale of pedigree cattle held at Haywards Heath by Messrs. T. Bannister and Co., took place on Friday, in the presence of a goodly company, but trade was not brisk, nor prices high, the best being 25 gs. obtained by Mr. E. E. Braby, for two bulls, viz., Champion of Drungewick, bought by Mr. A. E. Dudeney, of Barcombe; and Earl of Drungewick, bought for Lord Leconfield; other prices ranged up to 22 gs. Details are appended, the name of the seller being given in parenthesis:—

BULLS.—Lynwick Prince (Mr. John Aungier, Rudgwick), Mr. F. G. Bolton, Littlehampton, 22 guineas; Champion of Drungewick (Mr. E. E. Braby), Mr. A. E. Dudeney, Barcombe, 25 guineas; unnamed (Colonel J. C. Humphreys, Cuckfield), Mr. C. D. Leland, East Grinstead, 15½ guineas; Earl of Drungewick 2nd (Mr. E. E. Braby), Lord Leconfield, 25 guineas; Limehurst Marshal (Mr. T. Bannister, Haywards Heath), Mr. W. H. Langmead, Yapton, 15 guineas; Champion of Drungewick 2nd (Mr. E. E. Braby), Mr. J. Kenward, Hamsey, 20 guineas; Limehurst Jester (Mr. T. Bannister), Mrs. M. A. Packham, Fletching, 15½ guineas; Ticehurst (Mr. W. Ford, Ticehurst), Mr. J. Wallis, Lewes, 21 guineas; Bolney Boy (Mr. E. Roberts, Bolney), Mr. G. Williams, Henfield, 12½ guineas; North Quedley (Miss L. Cohen, Tunbridge Wells), Messrs. Gander Bros., Haywards Heath, 12½ guineas; Birling Gap (Mrs. A. Taylor, Summer Hill, Five Ashes), Messrs. Holmden and Sons, Forest Row, 12½ guineas; Quedley Chapel (Mr. F. Bradley, Wivelsfield), Messrs. Gander Brothers, Haywards Heath, 8 guineas; unnamed (Mrs. A. Taylor), Mr. A. Best, Fletching, 11½ guineas.

COWS AND HEIFERS.—Brantridge Derby 5th (Colonel Humphreys), Mr. F. G. Bolton, Littlehampton, 14 guineas; Brantridge Derby 7th (ditto), Mr. G. Williams, Henfield, 15½ guineas; unnamed (ditto), Sir Weetman D. Pearson, Bart., M.P., 15½ guineas; Bewbush Pirate (Mr. P. F. R. Saillard), Mr. F. G. Bolton, Littlehampton, 20 guineas; unnamed (Earl of Derby), Mr. C. Edwards, Lingfield, 16 guineas.

Sale of the Whittingham Red Polls.

The remainder of the Red Polled herd, bred at Whittingham for so many years, was sold by auction on Thursday, in very inclement weather, by Messrs. Thornton and Co., at Kirby Bedon Stud Farm, Norwich. There was a small but representative company, nearly all the principal breeders being present; but the bad weather, combined with the distance from the station, had its effect upon the sale, and only commercial prices were realised. The stock, however, was purchased for many distant counties, several going to Ireland, Shropshire, Oxfordshire, Kent, Essex, and South Wales. On Thursday 107 head were sold at an average of £14 3s., thus the entire herd of 300 head, sold in three parts since last October, have averaged £20 all round, and proves that the old "Home Birds" have still many supporters, not only in the counties of Norfolk and Suffolk, but in other parts of England. We give below a list of the principal lots, with purchasers' names and prices:—

COWS AND HEIFERS.

Birmingham Shorthorn Show and Sale.

The annual autumnal show and sale of Shorthorns at Bingley Hall, Birmingham, though not so important as the spring fixture, has its attractions for both breeders and buyers, and that held on Thursday proved no exception to the rule. True the entries were not quite so numerous as last year, but the total 277 was a good one, and the quality was, on the whole, up to the average, though there were a few poorish animals forward. There was, however, keen competition for the prizes, and then, when the sale began, the best specimens of the breed commanded considerable attention, and fair prices were realised. There was a large attendance of visitors and buyers, and some of the most useful heifers and bulls were bought for exportation to Germany and South America. The auctioneers were Messrs. Lythall and Co., and the judges Messrs. G. Bickford (Somerford, Brewood, Staffordshire), G. Taylor (Cranford, Hounslow), W. Bell (Ratcheugh, Alnwick), and J. Peter (Berkeley, Gloucestershire).

The cows and heifers numbered 124, and of these more than one-half were entered in the class for cows and heifers exceding three years old. The first prize was taken by Mr. G. Gerrard, Hindlip, Worcester, with Wandering Lass, a particularly nice cow, as fresh and sweet as a heifer, in spite of the fact that she is nine years old, and has had six calves. She was bought by Mr. G. Harrison, the well-known Shorthorn breeder, of Gainford Hall, Darlington, for 30 gs., The same purchaser also gave 23 gs. to Mr. T. M. Dewhurst, Lichfield, for the second prize-taker, Shelford Daisy Girl, six years old. The Earl of Harrowby, Sandon Hall, Staffordshire, sold the seven-year-old Cricket, which was highly commended, to Mr. W. H. Rider for 31 gs. Mr. Howorth gave 30 gs. for the seven-year-old highly-commended cow Susan Girl, the property of Mr. S. C. Pilgrim, Hinckley; and Mr. F. A. W. Wythes, Bedford, received 31 gs. from Mr. Scott for the highly-commended Bonny Lass 11th, seven years old. At 60 gs. the Earl of Sefton purchased the commended "Sweet Melody," six years old, from Mr. J. Newton, Warburton, Cheshire; Mr. W. C. Cooper, Whittlebury, Towcester, sold the highly-commended Marigold 53rd, five years old, to Mr. J. B. Brooks for 31 gs.; and Mr. Scott paid 30 gs. to Mr. T. Stokes, Warmington, for the three-year-old highly-commended Englethorpe Empress 3rd.

Several of the heifers between two and three years old were remarkably good in point of quality. Th best of the lot was Gwendoline 9th, the property of Mrs. L. H. Holland, Newport, and she was sold to Mr. Steward for 55 gs. Mr. Rider secured very cheaply, at 22 gs., the second prize-taker, Coral Wreath, shown by Mr. B. Read, Dursley; and at 42 gs. Mr. J. R. Newton sold the reserve exhibit, Sweeter Melody, to Mr. Scott; while Mrs. L. H. Holland's commended Honeysuckle went to Mr. J. B. Brooks for 31 gs.

The yearling heifers were a creditable collection, and here Mr. T. Atkinson, Bury, took the first award with Towy Princess, bought by Mr. G. Harrison for 51 gs. The second prize went to Whitewall Emma, belonging to Mr. A. A. Haley, Malton, and the purchaser, at 41 gs., was Mr. E. Smith, whilst Mr. C. Smith gave 42 gs. for the reserve heifer, Shenstone Highness, exhibited by Mr. R. P. Cooper, Shenstone, Lichfield, Mr. D. H. Mytton's commended Sample going to Mr. Haley at 32 gs.

There were not many heifer calves, but they looked healthy and promising. Mr. A. A. Haley won the first prize with Whitewall Anna 2nd, a useful animal, which was disposed of to Mr. W. Bass at 40 gs. Mr. G. Harrison gave 28 gs. for the second winner, White Socks, shown by Mrs. L. H. Holland; and the Earl of Sefton bought two highly-commended youngsters, one Charming Duchess 91st, for which he paid Messrs. Dyke Bros., Banbury, 45 gs., and the other Barn Hall Pride, for which he gave 30 gs. to Mr. A. C. Brown, Ombersley, Droitwich.

The principal class of bulls was for animals between twelve and eighteen months old. Ninety-five were entered, and they included several splendid specimens. The best of the lot was Star of Strawberries, a promising youngster seventeen months old, shown by Mr. J. Graves, Wigton. The home buyers and the foreign representatives were anxious to secure him, and after some sharp bidding Mr. Bucka became the purchaser at 105 gs., the highest price realised during the sale. The bull is to be exported to Germany, and he will be accompanied by the second prize winner, Whitewall Broadbrooks 2nd, for which Mr. Bucka paid 60 gs. to Mr. A. A. Haley. Mr. J. W. Barnes, Wigton, sold Benedict, the third prize winner, to Mr. McCulloch for 38 gs.; Mr. C. Coxon bought the fourth prize-taker, Carwin Josephine, from Mr. J. A. Preece, Thrapton, for 45 gs.; and Mr. G. Harrison paid the fifth winner, Roseberry, to Mr. Bibby for 35 gs. Mr. H. Turner, however, had to bid 80 gs. before he secured Mr. E. F. Blackwell's highly commended Rural Baron. Mr. R. P. Cooper gave 50 gs. to Mr. A. Hughes, Knowle, for the commended Packwood Hugo; the Earl of Macclesfield paid 40 gs. to Mr. W. S. Dowding, Longney, for the reserve bull, Lord Lee; and Mr. McCulloch gave 41 gs. to Major G. L. Holford, Tetbury, for Royal Matchless. Numerous other sales were effected up to 41 gs.

The last class was for bulls and bull calves of any age. No prizes were offered, but the entries numbered 57. A two-year-old bull, Claines Dolphin, entered by Mr. W. S. Carless, Worcester, attracted much attention, and Mr. G. Harrison had to go up to 75 gs. before he could secure possession of him. Mr. W. Wright gave 53 gs. to Mr. L. de Rothschild, Leighton Buzzard, for the twenty-one-months-old Golden Cross; Messrs. J. Haslam and Sons, Takeley, Essex, received 30 gs. from Mr. Wythes for the twenty months-old Takeley Silver Cup; Lieutenant-Colonel Turnor, Malmesbury, sold Pinkney Victor, eighteen months old, to Mr. J. B. Brooks for 31 gs.; and Mr. J. Slater gave 32 gs. to Mr. J. W. Sanders, Gilmorton, Lutterworth, for Carolus 15th, eleven months old.

THE TENS OF THOUSANDS of users of MOLASSINE MEAL should see that their stock have a portion in every feed all the year round, not simply as a condiment when an animal is out of condition, or occasionally as a fillip. MOLASSINE MEAL is the most valuable and economical food, displacing all condiments, and should be given in place of the same weight of oats, beans, grain, cake, or other feeding stuffs. Sold by all corn merchants and the MOLASSINE CO., Ltd., 36, Mark Lane, London, E.C. —[ADVT.]

Transactions in Store Stock.

(Reported to the Department of Agriculture and Technical Instruction for Ireland.)

At Longford Town, on Tuesday, there was a very slow sale for cattle, only those of choice quality and in very good condition being sold. Calves, first class, £4 5s. to £4 13s. 4d., second class, £3 10s.; yearlings, second class, £6 to £6 5s; two-years-old, first class, £11 to £12, second class, £8 to £9 10s.; three-years-old, first class, £14 to £14 10s., second class, £10 10s. to £12; springers, first class, £17 to £19, second class, £13 to £15.

At Ballinasloe Fair, Co. Galway, held on the following day—Fair not quite so large as last year and composed chiefly of ewes suitable for breeding purposes; demand brisk, and almost a complete clearance effected at prices favouring sellers. Lambs, first class, £1 9s. to £1 10s., second class, £1 4s. to £1 7s., third class, £1 to £1 1s. 6d.; two-years-old and upwards, first class, £2 6s. to £2 9s., second class, £1 19s. to £2 5s., third class, £1 10s. to £1 14s. 6d.; young pigs, eight to ten weeks old, sold at from 25s. to 30s. each.

Contagious Diseases of Animals.

Summary of Returns issued by the Board of Agriculture for the week ending Sept. 2, 1905:—

NOTE.—The figures for the current year are approximate only.

Horse Notes.

"He doth nothing but talk of his horse."
—Merchant of Venice.

There was probably never such a demand for high-class harness ponies as there is at the present, and the prices they bring are out of all proportion to those realised by horses of a larger size. Of course, ponies good enough to show are few in number compared with horses of a larger growth, and this may, and probably does, affect the price somewhat, but, at the same time, the demand for them is decidedly cheering, and shows that horses still hold a place in the affections of the nation.

Whether the demand for ponies is caused altogether by the many prizes offered for ponies in harness, and by the emulation of exhibitors, may well be questioned, for our native breeds of ponies seem to be in more active demand than ever, and good individuals of the breeds bring more remunerative prices. The various societies that have these native breeds of ponies under their fostering care have so far done well in keeping the ancient types well in view. There was a danger—perhaps it still exists—of so-called improvement being made in such a manner as to alter the characteristics of the breeds altogether. All honour to those who have fought to preserve the old type, for it may fairly be laid down that with the old type will disappear many of the old and valuable attributes of our native breeds.

It is curious how frequently the cross between the thoroughbred horse and the pony mare turns out a good weight-carrying hunter. I have one in my mind's eye as I write. He was by Cape Flyaway, not a very powerful thoroughbred, but a very stoutly-bred one, being by The Flying Dutchman—Canezou, by Melbourne. His dam was a pony under 14 hands high, and on the light side. The horse in question was under rather than over 15 hands 3 inches; he was a short-legged, deep-girthed, well-ribbed horse, built on correct lines, and was one of the best fifteen-stone horses I ever saw. It has always been the opinion of Lord Harrington that the old English pony made an excellent foundation for hunter-breeding, and I have seen many excellent hunters bred in the way I have mentioned. Another I remember was a very remarkable instance of a horse differing from and, at the same time, resembling his parents. He was a four-year-old when I saw him, and he was by An Arab, that certainly did not stand 14 hands 2 inches, off an old-fashioned pony that had been used to play polo. Like sire and dam, he was a rare galloper and full of quality, and he had some Arab character about his head and neck and quarters, but he was rather over 16 hands high. He looked, all over him, a weight-carrier, and as if he would be well master of 16 stone when he arrived at maturity.

It is interesting to learn what our ancestors thought of hunters and hunter-breeding, and to that painstaking maker of books, Gervase Markham, we are indebted for much valuable information respecting horses and their treatment. Writing of hunters, he says:—"If you will chuse a horse for hunting, let his shape in general be strong and well knit together, making equall proportions; for as unequall shapes shew weakness so equall members assure strength and indurance. Your unequall shapes are a great head to a little neck, a big body to a thin buttock, a large limb to a little foot, or any of these contraries, or where any member suits not with the whole proportion of the body or with any limb next adjoyning. Above all, let your hunting horse have a large, lean head, wide nostrils, open chauld, a big weasand, and the windpipe straight, loose, well covered, and not bent in the pride of his Reining: The English horse bastardised with any of the former Races first spoke of is all of the best." Open chauld, I take it, means open jowled. "The Races first spoke of" are the "Courser of Naples," which Markham tells us are the best, "the Almain, the Switzman, or the French."

These races would undoubtedly all be of Eastern descent. The Neapolitan horses had long been famous. More than half a century before Gervase Markham's book was written Shakespeare makes Portia say of the Neapolitan Prince that he is a colt indeed who doth nothing but talk of his horse, and the other breeds are all highly spoken of by old writers. The Neapolitans were famous merchants, and in their Mediterranean trading would constantly be coming in contact with Eastern merchants, from whom they would occasionally at any rate, purchase stallions, and it is probably due to their greater infusion of Eastern blood that the Neapolitan horses owed the superiority which they evidently possessed. Now, our English horses of the sixteenth century were what we should call ponies in these days—or, at any rate, a great proportion of them were—and it is not a little curious to find a seventeenth century writer and a twentieth century master of foxhounds recommending the same cross for the breeding of hunters.

It will be noticed that our ancestors attached a great deal of importance to characteristics which are not much noticed; at any rate, which are not much talked of in the present day. It is seldom, for instance, that much notice is taken of the windpipe when men are buying, though, of course, a veterinary surgeon will take particular notice of it if he suspects that anything is wrong with a horse's respiratory organs. Yet it is a very important point to consider, especially when buying young horses. Speaking of this point, Capt. Hayes, than whom there was never a more painstaking writer or closer observer, writes:—"The windpipe should be large, and well detached from the neck, as it will then indicate a good breathing power. Roaring often accompanies a wasted appearance of the tissues which cover the larynx, and is caused by paralysis of one or both of the muscles which open the larynx. The size of these muscles is too small to account for this partially emaciated condition." Practically the seventeenth century and the twentieth century experts are of the same opinion as to the shape a horse's throat should be.

Trade was not very good at Mr. Haslewood's annual sale at Buxton, and young stock sold well within its value. Two-year-olds at from 28gs. to 37½gs. seemed cheap enough, for the quality was good. Still, these are not unremunerative prices for young stock, which up to that age does not cost such a very great deal for keeping. A two-year-old thoroughbred by Dubuque brought 95gs., a remunerative price enough, and Dubuque himself was sold at about his value at 375gs. He is now ten years old, and he has in all probability seen his best day as a show horse. But there is plenty of good work left in him yet, and as his stock is turning out remarkably well, he is sure to be well patronised for many years to come. Then there is always the chance—though it is perhaps a remote one—of siring a big winner, and then he would be in great demand indeed. He is well bred enough for anything, being by Doubloon—Ivy Mantle by Mask, her dam Epomœa by Springfield. Doubloon combined the blood of Sterling, The Duke and Gemma di Vergy, so that it would be difficult to find a better bred one. And he is a big, powerful horse withal.

THE LOOKER-ON.

Sale in Buxton.

The annual sale of horses belonging to Mr. A. O. Haslewood, Fairfield Stud Farm, near Buxton, took place on the 2nd inst., and was rather disappointing, bidding being somewhat slow, and prices not so good as the animals deserved. The following were among the sales of stallions:—Admiral, bay thoroughbred, two years old, by Dubuque, which won a silver medal as a yearling at the Staffordshire County Show, 95 gs.; Baird, thoroughbred, seven years old, by Fourposter, dam Bayonne, 200 gs.; Nectar II., No. 6,143 in H.S.H., sire Ganymede, 115 gs.; Springald, by Galliard, dam Cataract, 85 gs.; Dubuque, thoroughbred, by Doubloon Ivy Mantle, 16 hands, winner of the King's premium, 375 gs.; Braintree, by Rosebery Despatch Roe, King's premium winner 1904, 310 gs.; Irish Comet, by Egerton—Idalia, five years, 97 guineas; The Black Watch, by Calwick Victor, 95 guineas.

Sale at Walton Hall, Warrington.

Sir Gilbert Greenall's fame as a breeder of pedigree hackneys and ponies is widespread, so that a big attendance is only to be expected at any sale of his stock, and expectations were fully realised at a sale of about seventy of his animals held at Walton Hall, Warrington, on Friday, and with keen competition, some good prices were realised. A special attraction of the sale was that the whole of the yearling hackney and pony colts were included placing before breeders an opportunity of acquiring young stallions of the very highest breeding on both sire and dam's side. In addition, a few choice young fillies were sold, and the whole of the three-year-old geldings, many of which give great promise of making show or match horses. Besides these, about twelve mares and their foals were offered on account of leaving daughters and sisters in the studs to continue the breed.

As previously mentioned, a brisk trade was experienced. The top price was 255gs., to which sum, Lord Ashdown, Co. Galway, had to go before he could secure the handsome yearling colt Terrington Recruit. Another Irish breeder, the Hon. F. Wrench, Dublin, secured the next best yearling colt, namely, Terrington Finsbury, for which he had to give 110gs. Two-year-old fillies also sold well, one fetching 170gs. and six others well over 50gs., in fact, two nearly touched three figures, as will be seen from the following list of the chief sales:—

YEARLING COLTS.

		Gs.
Terrington Recruit	Lord Ashdown	255
Terrington Finsbury	Hon. F. Wrench	118
Terrington Conjurer	Mr. Archdale	60
Terrington Cleophas	Mr. Montgomery	57
Terrington Candidate	Mr. Montgomery	37
Terrington Ghourka	Mr. Blackburn	26

YEARLING FILLIES.

Terrington Asset	Mr. Evans	37
Terrington Cordova	Lord Ashdown	30

TWO-YEAR-OLD FILLIES.

Flourish	Mr. McKibben	170
Ringleader	Mr. R. Heaton	95
Callender	Mr. Heaton	90
Flodden	Mr. Heaton	77
Terrington Ruth	Mr. Evans	68
Terrington Hyacinth	Mr. Montgomery	68
Viceroy	Mr. Irvine	65

BROOD MARES AND FOALS.

Miss Caxton	Mr. Gemmell	57
Chestnut filly	Mr. Evans	100
Ringobell	Mr. Smith	88
Chestnut colt	Mr. D. Evans	61
Bury Daisy	Sir Walter Gilbey	66
Terrington Bella Dona	Mr. Smith	62
Moor's Modesty	Mr. Archdale	51
Modesty		52

PONY BROOD MARES AND FOALS.

Omen	Mr. Evans	32
Tissington Safety Pin	Mr. Rushford	46
Polly Perkins	Mr. Rushford	37

THREE-YEAR-OLD PONY GELDINGS.

Goldmine	Mr. Deurdon	75
Graduate	Mr. Eyre	30

Sale at Peterborough.

A special sale of Shire horses, pedigree hackneys, and harness horses was held at Peterborough on Wednesday in connection with Peterborough Foal Show by Messrs. Sexton, Grimwade, and Beck. Prizes were offered for the shire geldings and mares not eligible for the Stud Book, and for eligible Shire mares. In the ineligible class, a bay mare of Mr. T. Gee's, by Winchilsea, took the first prize, and sold for 36gs.; while the second prize went to Mr. J. H. Cade, of Banbury, for a five-year-old mare by Barometer, which fetched 35gs. In mares eligible for the Stud Book, Mr. E. Gee took the first prize with a four-year-old mare by Normoor Regent, which made 33gs., and the same breeder also took the second prize with a four-year-old by Bury Blood Royal, which was not sold.

Perth Ram Society's Show and Sale.

The Perth Ram Society's annual show and sale of blackfaced rams at Perth took place last week, and was very successful. Taking the stock all through, they were shown in excellent condition, a result largely due to the open winter and the fine summer. The trade in general was exceedingly satisfactory, especially for sheep showing size and breeding. The first prize pen of Cadzow shearling rams averaged £24 6s.; the second prize pen, from Crossflatt, £20 8s.; the third, from Overshiels, £16 8s.; the fourth, from Claggan, £16 13s.; the fifth, from South Brownhill, £11 13s. 6d; and the sixth, from Lettre, £14 2s. In the ram lamb section, the first prize pen, from Messrs Cadzow, Weston, realised £6 15s.; the second and fourth, from Mr. Grieve, Ladybank, £7 15s. and £5 5s. respectively; while the third, from Woolfords, fetched £6 1s. The best prize for a shearling ram was 50s., secured by Mr. D. McRae, Stenhouse, next to this coming £40, this sum being obtained by Messrs. A. and D. McDougall, Claggan; Mr. C. Fraser, Rankinston; and Messrs. Cadzow, Boreland. Other top prices for shearlings were:—36gs., 35gs., 33gs., 28gs., 26gs., 25gs., 23gs., 21gs., 18gs., etc. Top figure for lambs was £12, given for some of Mr. Angus Grieve's, whilst £10 was the next best price, and this was secured by Messrs Paterson and Cadzow and Mr. R. Cadzow.

Among recent wills proved is that of Mr. J. W. Rowland, of Fishtoft, Lincolnshire, a well-known agriculturist, and an alderman of Holland County Council, who left £20,070.

At Clonmel Fair, Co. Tipperary, held on Tuesday, there was a fair supply of stock; trade moderately good for cattle in forward condition, but small, thin animals sold slowly, and a number failed to find buyers. Good supply of springers, for which there was a fair demand; while at Brandon, Co. Cork, on the same day, there was a large fair but few buyers in attendance; demand slow, and thin cattle almost unsaleable.

Notes and Jottings.

What are the most profitable breeds of sheep? This has been a query often asked, and has been replied to in many different ways. Some say the cross-bred, and others the pure-bred, the tenour of the reply being mainly determined by the experience of the author. Viewed, however, in a general way, it may be taken that in districts in which breeding has not proved remunerative, the cross-bred is the better sheep, but in those districts in which both breeding and feeding can be carried on, then the pure-bred is pretty nearly, if not quite so fully, as profitable.

If, however, the cross-bred be the choice, it is well that these should be the resultant cross between two pure-breds, and not from the mating of cross-bred animals. The first cross is that which experience has proved the more successful, and hence it is either this or the pure-bred most generally kept in the district that should be chosen.

Flock masters ought to avoid the old practice of breeding sheep from cross-bred ewes by mating with a pure-bred ram. Years ago this was a common practice, but, from personal experience, the result was not altogether satisfactory. Looking backward along the road we have traversed affords many instances in which success has been secured from both the first cross and also the pure-bred. If full information be obtained of each case, it will generally be found that not a little of the success secured depended upon the management. When we have before us from time to time in the agricultural press the results secured in many series of experiments with either cross-bred or pure-bred sheep and lambs, it is always well to remember that these results have been obtained under thorough management, and that the only way to secure similar results is to adopt the same thorough and systematic management.

It is also advisable, when reading the results of experiments either in respect to breeding or feeding, to remember that before such results can be relied upon, it is necessary for them to be continued for a series of years. It is the short duration of experiments that has, in our opinion, often been the cause of failure to repeat similar results when put into actual practice. In some lamb-breeding experiments, as they are termed, carried out at Newton Rigg, we find from the report the result of last year is again fully confirmed this year, so far as one regards the produce of the Wensleydale and Border Leicester ram lambs upon Cheviot-Border Leicester cross-bred ewes, but—and proving the need of lengthened experiments—the produce of the Oxford ram lamb upon the same kind of ewes gave reverse results from those of the previous year.

Another experiment in cross-breeding has come to our notice. This took place in New South Wales, and the test was between the Suffolk-Merino and the Lincoln-Merino. The result was more favourable to the first-named cross than the latter, for at the age of six months the Suffolk-Merino lambs scaled 81.5 lb., and the Lincoln-Merino lambs scaled 77 lb. This experiment is one of those which have given a result not generally anticipated. Why it should be that the Lincoln-Merino cross-bred lamb should be so much lighter in weight than the Suffolk Merino is strange, and the cause for this large difference in weight would, if it is possible to be ascertained, be of great interest.

The export buyer has never been more prominent amongst our flocks than in the present season. Not a week now for some time has passed but that we have had to record one or more important sales of stud sheep for export. During the past week we have received information of the sale of all the yearling Lincoln rams from the flocks owned by Messrs. Joseph Brocklebank and Mr. John Anderson, the purchaser in each case being Mr. F. Miller, the well-known export buyer for the Argentine, to which country the whole of these fine rams are shipped.

Mr. T. C. B. Dixon, whose notably successful sale of Lincoln yearling rams was reported a fortnight since, has since then sold a further selection of yearling rams to Mr. A. A. Haley, who was a considerable purchaser at his annual home sale for the Argentine.

Mr. Alfred Amos, the breeder of Kent and Romney Marsh rams has sold a third consignment of yearling rams for the Argentine, the purchasers in this case being Messrs. J. Thornton and Co. for an Argentine client.

Mr. W. Millen, of Syndale Valley, Faversham, Kent, has also during the past week sold another consignment of yearling rams and ewes, the selector in this case being Mr. W. W. Chapman, whose clients, Messrs. J. Hoare and Co., are London agents for the purchaser, who resides in the Falkland Islands.

Another export sale recorded during the past week was some Hampshire Down ram lambs, which were despatched by Mr. James Flower to an Argentine client who has had three annual shipments of lambs from Mr. Flower. In each instance the lambs have been shipped direct to the Argentine from Chilmark, and the repetition of the same order for three years in succession clearly shows what great satisfaction has been given.

Southdown breeders have again this season, taken it as a whole, experienced a disappointing demand for their rams. We have not yet before us a full compilation of the ram sales as a whole, but from the results that are at hand it is evident that the Southdown rams and ram lambs have not been in near so keen demand others of other breeds have.

The choice quality of the Southdown mutton, and the great weight of first-class mutton produced by these sheep in proportion to the weight of food consumed, ought to make them more popular than they are at the present time. It is difficult to understand the noticeable falling-off in the demand for this breed, for none has a higher reputation either for mutton or wool production, when the cost of it and the market value be compared with that of any other breed.

A very choice lot of well-bred Southdown sheep, which combine high merit and special quality, will be sold by auction by direction of Mr. Elmer Speed, of Knowlton Court, Canterbury, on October 2 next by Messrs. C. Stride and Son, in consequence of the farm in hand being let.

Sheep Fairs and Sales.

Ashford.

At Ashford on Tuesday Messrs. Swaffer Bros. held their second lamb fair, disposing of the greater part of 1,500 sheep and lambs. Kent lambs made from about 24s. to 29s. and 29s. 6d., the latter price being given for a pen of Kent ewe lambs. Half-breds sold up to 27s. and some two-lambed ewes up to 45s.

Battle.

The nineteenth annual sheep and lamb fair at Battle was held on Wednesday at the fair field, North Trade Road, and attracted considerable interest. The catalogue for the auction sale embraced about 3,000 sheep, lambs, and rams. The attendance of buyers was highly satisfactory, and trade very fair. Southdown ewes and wether lambs averaged from 21s. to 35s., and tegs and ewes from 23s. up to 48s. The following were the averages of the various descriptions:—506 ewe and wether lambs, £1 4s. 5½d.; 495 ewe and wether lambs, £1 5s. 5½d.; 936 ewe and wether lambs, £1 1s. 4d.; 890 tegs and ewes, £1 9s. 9d.; and 21 rams, £2 3s. 8d.

Billingborough.

Important consignments of pedigree sheep from some of the leading Lincolnshire and Hampshire Down flocks were forward at Billingborough on Wednesday, in connection with the annual sheep fair. In Lincoln rams, Mr. F. Money, Silk Willoughby, Sleaford, secured first prize; Mr. J. E. Casswell, Laughton, Folkingham, second; and Mr. F. Ward, Quarrington, third. The prize offered for Hampshire Down rams was awarded to Lord Rothschild, Tring Park. For the best pen of Lincoln long-wool theaves, Mr. T. T. Houghton, Billingborough, secured first, second, and third; Mr. E. J. Grummitt, Folkingham, was first for the best twenty half-bred lambs; Mr. B. Garton, Helpringham, second; and Mr. J. Truswell, Billingborough, third.

A large company attended the auction of the prize and other sheep conducted by Mr. Walter Ward. The first prize winners in the Lincoln long-wool class made 7 gs. to 13½ gs.; Mr. J. E. Casswell's rams ranged from 4½ gs. to 7 gs.; the rams sent by Mr. Ward, of Quarrington, varied from 4½ gs. to 5½ gs. Hampshire Down rams were sent from the flocks of Lord Rothschild and Mr. Edward Pink, Kingsdom, Sevenoaks, and these made up to 62s. Mr. Pink's rams averaged about 2¾ gs. About 500 sheep were offered by auction, and the theaves sold up to 62s., whilst prize-winning pens of lambs made 46s., 41s., and 40s. 6d. respectively.

Brampton.

Hetherington's Auction Company, Carlisle, on Wednesday conducted the annual sale of lambs on Brampton Sands, on behalf of Messrs. Dobson, Geltsdale and Tarnhouse Farms. The lambs generally were scarcely so good as last season's, and were under a further disadvantage owing to the heavy rains. There was a large gathering of buyers, and competition proved keen. The lambs from Geltsdale made the following prices: Cross lambs, to 27s.; Cheviot wedder lambs, to 20s. 6d.; Cheviot ewe lambs, to 17s.; black-faced tup lambs, to 17s. 6d.; and black-faced ewe lambs, to 18s. 6d. The prices for the Tarnhouse lambs were:—Cheviot wedder lambs, to 21s. 6d.; Cheviot ewe lambs, to 20s. 9d.; black-faced lambs, to 17s. 3d.

Bury St. Edmund's.

The Bury Sheep Fair, which for several years has taken the place of the old Horringer Fair, was held in the Cattle Market, Bury St. Edmund's, on Tuesday. The chief department of interest was Messrs. Simpson and Sons' Auction Mart, where the supply of sheep was considerably larger than last year, the Suffolk ram lambs including many of excellent quality. There was also a very large attendance of buyers, and there was a very sharp trade, especially for the best bred lots. Suffolk rams met a brisk trade at prices from 2½gs. to 10gs. This was the general range, but the latter figure was exceeded in one or two instances, 15gs. being obtained more than once. The trade for Southdown, Oxford, and Cotswold ranms was poor compared with that experienced for Suffolks, and prices did not go higher than 7gs.

Cirencester

The second of the yearly ram fairs at Cirencester took place on Monday, and was well supplied, whilst buyers were forward in large numbers. Fat and store sheep numbered about 5,000 head, and required extra accommodation than that of the ordinary pens, others being improvised and the sale of rams and ram lambs conducted in an adjacent meadow. Trade was generally good. Stock ewes sold readily at from 41s. to 56s. a head. A noticeable lot was 240 grand Oxford Down ewes from the Earl of Eldon, which averaged 47s. each. A consignment of cross-bred theaves from Mrs. Taylor, Rendcombe Park, made 50s. each. A lot of forty ewes from Sir M. Hick-Beach's farm sold at 52s. each; 170 from Mr. E. Handy made 47s. each; 80 from Mr. A. Handy made 47s. 6d. each; Mr. T. Pinniger's theaves made 48s. each; 80 from Lord Biddulph sold at 45s. each; 80 theaves from Mrs. Taylor's Home Farm made 50s. each; and Mrs. Cooke (Quennington) sold 100 ewes at 45s. each. The supply of lambs was rather short, and those on offer sold well, animals of fairly good breeding and size making from 33s. to 45s each. Ordinary stock lambs were in request at 32s. 6d to 35s. 6d. each. Altogether the sheep trade was considered a very fair one.

In the ram fair there was a brisk trade. Mr. Moore sold for Mr. John Fowler, of Aston Farm, seventeen out of twenty Cotswold ram lambs at an average of 4¾ gs.; for Mr. Hugh Baker, Chedglow Manor, one Oxford Down two-shear ram at 15½ gs. (to Mr. A. Smith, Bagendon), one shearling ram 11 gs. (Mr. Daniels, Hazelcote), and twelve Oxford Down ram lambs at an average of 6½ gs., 8½ gs. being the highest price; for Mr. A. Apperley, of Hyde Farm, fifteen Hampshire Down ram lambs sold at an average of 5½ gs., two going at 10 gs. to Mr. Jaspar Gardener (Bisley) and Mr. Edward Blackwell (Overley), and one at 8 gs. to Mr. Everall (for Mr. J. H. Large, Crudwell). Fifteen Oxford Down shearling rams sold at an average of 7½ gs., the highest figure being 10 gs., paid by Mr. W. Drew, Beverstone, others making 9 gs. and 8 gs. for Mr. A. W. Porter, Barington. Ten Hampshire Down shearling rams, all close-shorn, made an average of about 5 gs.

Mr. A. F. Hobbs sold about 1,000 ewes, theaves, and lambs, consignments realising 36s., 38s., 40s., 41s., 41s. 9d., 43s., 43s. 3d., and 44s. Lambs made up to 35s. Mr. Hobbs also submitted by auction 155 ram lambs, and several consignments sold well. Those fram Sir Alexander Henderson, M.P., Buscot Park, averaged £4 8s. 3., one being sold to go to Westmorland; Mr. R. W. Hobbs, Kelmscote, Lechlade, averaged £8 2s. 3d., the highest price of 12 gs. being paid by Mr. B. Swanwick, Coates; Mr. W. T. Stevens, Ranbury, averaged £4 10s. 5d., the highest price, 6 gs., being given by Mr. Sydney Dennis. Mr. W. J. P. Reading, Langford, Lechlade, averaged £5 6s. 6d.; Mr. W. Arkell, Kempsford, £5 9s. 10d., 10½ gs. being paid by Mr. Cave, of Holwall Downs, and 10 gs.

by Mr. Sansome, for Lord Eldon. Sir M. Hicks-Beach, M.P., Williamstrip Farm, averaged £6 6s. 11d., the highest price being 8½ gs., paid by Mr. L. Smith, Winson. The Hon. R. Hardinge, South Lawn, Burford, averaged £4 5s.

Mr. J. H. Taylor sold fifteen Oxford Down ram lambs for Mr. G. Adams, of Wadley, Faringdon, at an average of 5 gs.; twenty for Mr. J. Horlick, of Cowley Manor, at an average £6 13s. 9d.; highest price 9 gs. (Mr. Murby, Cotswold Farm); sixteen well-bred ram lambs for Mr. H. Akers, Blackbourton, average £7 8s. 3d., highest price 10½ gs. (Mr. J. Pineger, Chelworth). The trade for Cotswolds was not so good as at the August fair. Mr. Taylor sold four Cotswold shearlings for Mr. C. Barton, of Fyfield, average 8 gs., seven for Mr. W. Houlton, of Broadfiel, at from 5½gs. to 8gs., and others.

Crewkerne.

At the fair held at Crewkerne on Wednesday there was a large entry of sheep and lambs, over 3,000 being penned. The following were the chief sales:—Mr. Ingham Baker's lambs, 48s. 6d.; Mr. W. Pile's Down lambs, 35s. 6d.; Mr. Bryant's cross-breds, 35s. 6d.; Mr. R. W. Hebditch's cross-breds, 40s.; Mr. Hurford's Downs, 33s. 6d.; Captain Bragge's Downs, 33s. 6d. to 34s. 6d. Mr. Broughton's Downs, 45s.; Mr. G. Poole's wether lambs, 30s. to 46s.; Mr. Tolley's pure lambs, 29s. 6d. to 33s. 6d.; Down ewes, 44s.; Mr. T. Pile's Down wethers, 33s. 6d.; Mr. A. Wyatt's cross-bred lambs, 41s. 6d.; Mr. C. Priddy's, 28s. 6d. to 41s. 6d.; Mr. R. Wyatt's Down pure lambs, 34s. 6d.; Mr. J. Dunell's Down lambs, 34s 6d.; Mr. W. Penny's, 31s. to 42s.

Dorchester.

The September sheep sales at Dorchester took place on the 2nd inst. Messrs. Ensor and Son had nearly 2,000 penned. There was a good attendance of buyers, and although sales cannot be described as fast, they were fairly good, but a complete clearance was not effected. Offgoing ewes made up to 44s. 6d. for the best, and from 27s. to 37s. for second drafts; two-teeth ewes, 39s. to 49s. 6d.; grazing ewes, 26s. to 32s.; two-teeth wethers, 45s. to 50s. 6d.; wether lambs, 35s. 6d. to 37s. 6d.; mixed lambs, 26s. 6d. to 31s. 6d.

Messrs. Hy. Duke and Son held their annual sale of early Down lambs and other draft sheep, the entries exceeding by far any previous season's. The sale was well attended, and trade proved firm, though prices generally showed a slight drop in lambs and a drop in ewes of quite 1s. 6d. to 2s. per head. Best Down lambs made 39s. to 43s.; working Down lambs, 28s. to 34s.; Down ewes, 36s. to 43s 6d.; Dorset horn ewes, 38s. to 46s.; Dorset horn ewe lambs scarce and much in demand at 40s.

Mr. Farmer's Shropshires.

Owing to Mr. J. E. Farmer having given up Wigley Farm, his entire herd of Shropshires, known the country over, was on Tuesday dispersed by auction at Felton, near Ludlow, Mr. Alfred Mansell being the auctioneer. Every ram used in the flock since 1881 had been entered in the flock book, and these comprised many notable sires purchased by Mr. Farmer at prices ranging up to 150gs. The rams were all practically pasture rangers, big, strong sheep, full of flesh, but in active and serviceable condition. The ewes were a particularly nice lot, true of type, and showing the result of a long course of careful and judicious breeding. Sir W. M. Curtis, Bart. (Caynham Court), presided at the customary luncheon, and there was a large company present. At the sale the prices realised were as follows: Shearling rams, from 18gs. down to 5½gs.; pasture rangers, 11gs. down to 5½gs.; shearling ewes, from 115s., 80s., 75s., 65s., 67s. 6d. down to 48s. each; two-shear ewes, 80s., 72s. 6d., 65s.; young stock ewes, 67s. 6d., 65s., 60s., 55s. down to 48s.; ewe lambs, 48s., 32s. 6d., 35s., 34s. down to 32s.; ram lambs, 4gs., 3½gs., 5gs., down to 2gs. each.

Hull.

In the Hull Cattle Market, on Tuesday, Mr. Santon conducted a special sale of rams, and included in the catalogue were eleven from Mr. E. Richardson's Arnold flock, which realised good prices, viz.—£25 4s., Mr. R. Jackson, Cherry Burton; £21 10s. 6d., Mr. Blashill, Beswick; £15 15s., Mr. Strickland, Brandsby; £16 18s., and £14 3s. 6d., Mr. O. Simpson, Leven; £12 12s., Mr. Brumby, South Dalton, and Mr. Dunhill, Market Weighton; £11 0s. 6d., Mr. Strickland; £10 10s., Mr. Woodcock, Barton; £7 7s., Mr. Dunhill; and £8 8s., Mr. Watson, Beverley. Mr. R. Taylor, Withernwick, also sent several rams which realised from £5 5s. to £16 16s.

Kerry Hill Sheep.

The annual show and sale of sheep of the Kerry Hill breed, under the auspices of the Kerry Hill Sheep Breeders' Association, was held at Kerry on the 1st inst., and was a great success. Between 5,000 and 6,000 sheep were penned. Mr. E. R. Morris conducted the sale of the rams, and Mr. J. D. Marshall that of the ewes and wethers. The top price for both ewes and wethers was secured by Mr. J. Morris, Gwernygoe, who sold a pen of ewes to Mr. Peter Coates at 54s. each, and a pen of wethers to Mr. Adams, Cleobury Mortimer, at 64s. each. The top price for rams was paid by Mr. Price, Cwmearl, for a ram typical of the breed in every respect, the figure being 35 gs. This animal was from Gwernygoe, and, though only given second place in the prize list, was generally admired. Another sold by Mr. Jones, Gwernyhnarth, made 30 gs.

Lanark.

Some remarkably good prices were obtained at the sale of Blackfaced rams held at Lanark on Tuesday by Messrs. Lawrie and Symington. The top figure was £130, and this was obtained by Mr. M. Hamilton, Woolfords, for his shearling ram which won a second prize at the Highland Glasgow Show; the purchaser was Mr. Howatson, Glenbuch. Others from Mr. Hamilton's flock sold well, his average for thirteen working out at £37 3s., the best of the sale. Mr. S. Scott, Bogside, sold sixteen at an average per head of £26 6s. 10d., top figure being £95, whilst Messrs. Cadzow Bros. also got an average of £20 3s. 8d. for nineteen shearlings, the highest price being £58. Shearling rams from other flocks sold at £56, £55, £48, £45, £40, £37, £30, £27, £26, etc. The top figure for lamb rams was £21, secured by Mr. J. Anderson, Greenockdyke, others ranging from £17 to £1.

Perth.

Messrs. Macdonald, Fraser, and Co., Limited, held their annual show and sale of Border Leicester and Shropshire sheep at Perth on Wednesday, when the numbers entered were 447 Leicester rams and ram lambs, 19 Shropshires, and 228 ewes and gimmers, as compared with 551 rams and ram lambs, 27 Shropshires, and 143 ewes and gimmers last year. For general breeding, all round the display of Leicesters was about equal to that of recent years. The sheep were well grown as a rule, and shown in capital bloom, although some lots looked as though they had been shaded quite enough from the sun during the warm days of summer, and perhaps over-protected on the crowns of their heads.

Leicesters met a good trade at satisfactory prices. The Newmill lot met a fair demand, and for the second prize-winner bidding was very brisk. Ultimately it was knocked down to Mr. Robertson, Dublin, at £23. The fourth prize met even more spirited competition, and, starting at £10, was taken out at £30 by Mr. Pople, Newhouse. With a lot of ten, good prices were maintained, and the average came out at £11 5s., as against £6 10s. 4d. last year. Competition was also keen for the Barrelwell collection, and the first prize single brought out a bid of £30, and was knocked down £2 later to Mr. Gordon, Arabella. The Barrelwell lot also included the second prize pen, and the leading prices given for the best in the pen were £18 and £14 by Mr. Wood, Carnoustie; £16 by Mr. Geekie, Rosemount; and £15 10s. by Mr. M'Corqudale, Carnoustie. A number of the pen also brought £10 a head. With twenty animals Mr. Hume realised a total of £231 12s. 6d., and an average of £11 11s. 7d., an increase of £2 17s. on last year. Mr. Richmond, Dron, placed the large consignment of fifty-four in the ring, and for them got an average of £8 3s. 1d., his highest price being £13 15s., given by Mr. Hutcheson, Beechwood, the next best being £11 by Mr. Cunningham, Leitham. Competition was seen at its best when the Hayston lot were selling, and £27 was rapidly run up for the third prize single, followed shortly after by £30 for the fifth prize, the purchasers being the Countess of Cromartie and Mr. Grant, Ingliston, respectively. The consignment also included the first-prize pen, and the principal figures paid for the outstanding of these was £25 by Mr. Douglas, Auchcairnie; £15 from Mr. Duguid, Durris, and Mr. Robertson, Dublin; £12 10s. from Mr. Dunbar, Laurencekirk; and £12 from Mr. Ballingall, Tarbrax. The total consignment of twenty-five realised £319 17s. 6d., or an average of £12 15s. 11d., which showed an increase of £3 17s. 5d. on last year's figures.

Peterborough.

There was a substantial increase in the number of entries at the Peterborough Ram Fair, in the Stanley Recreation Ground, on Wednesday, about 450 sheep being penned. There were plenty of customers, and the best sheep ran up to excellent prices, but the average would be better if breeders did not include so many of the smaller and younger rams in their consignments.

Messrs. Fox and Vergette had 215 Hampshire Downs. Mr. W. C. Young, of Salisbury, sent about the cream of the fair, both for size and quality. They averaged £6 6s. 6d., and included the highest-priced ram in the fair. This was 13½ gs., which Mr. Brocklesby, of Barton-on-Humber, gave. The Marquis of Winchester's new flock at the fair averaged £4 18s. each, the best prices being 8 gs., 7 gs., and 6 gs. Mr. Fowell Buxton sent some youngsters which averaged £4, the top price being £7½ gs., whilst Mr. Scott-Murray's group averaged £5, the best prices being 9½ gs. and 7½ gs.

Mr. J. H. Dibden, of Salisbury, sold a grand lot of rams at an average of 6 gs. each. Mr. Baker, of Morton, gave 12 gs., Mr. Minta, of Apthorne, 11½ gs., and Mr. Simpson, of Ramsey, 8½ gs.

Sir Richard Ryecroft, Bart., M.F.H., sold thirty-five smart and good-coloured young rams at £3 12s. Mr. A. F. T. Drake, of Dogdean, one of the doyens of the Hampshire Down Breeding Association, sent his first consignment. They were a lot of good sheep, and sold at £4 10s. apiece, whilst forty Hampshire Down draft ewes sent by the Hon. N. C. Rothschild met with a ready sale at 49s a head.

The Quarrington Lincolns.

The annual sale of Mr. F. Ward's well-known Quarrington Lincoln Longwool rams took place at Quarrington on the 2nd inst., and, as usual, was well attended by home and foreign buyers. One hundred first-class rams were offered, and met a ready sale at good prices, the average per head working out at £20 2s. 4d. Scopwick Better Times was secured by Mr. H. Dudding at 110 gs., which was the top figure of the sale. The other best sales were as follows:—

Dowsby Quality (7807), Messrs. S. E. Dean and Sons, 56 guineas; Dowsby Quality (7807), Mr. J. Cartwright, 40 guineas; Pointon Standpoint (7999), Mr. Stephenson, 27 guineas; Scopwick Better Times (8057), Mr. T. Caswell, 41 guineas; Pointon Standpoint (7999), Mr. S. W. Stephenson, 51 guineas; Quarrington Mainstay (8012), Mr. F. Scorer, 30 guineas; Quarrington Mainstay (8012), Mr. W. B. Swallow, 31 guineas; Pointon Enterprise (7041), Mr. G. Marris, 53 guineas; Quarrington Cashier (7556), Mr. Hughes, 30 guineas; Quarrington Venture (7562), Lord Ancaster, 27 guineas; Scopwick Better Times (8057), Mr. J. Cartwright, 29 guineas; Quarrington Woolled One (7563), Mr. J. G. Johnson, 22 guineas; Quarrington Banker (7554), Mr. T. Caswell, 34 guineas; Pointon Standpoint (7999), Mr. J. G. Johnson, 27 guineas; Quarrington Woolled One (7563), Mr. R. Wright, 21 guineas; Pointon Enterprise (7041), Mr. C. Howard, 42 guineas; Quarrington Wright's Victor (7564), Mr. F. Smith, 30 guineas; Quarrington Woolled One (7563), Mr. Hughes, 30 guineas; Quarrington Venture (7562), Mr. Clarke, Scopwick, 31 guineas; Bradford Reserve (6712), Mr. Langdale, 24 guineas; Quarrington Cashier (7556), Mr. T. Barker, 25 guineas; Pointon Standpoint (7999), Mr. Waterhouse, 25 guineas; Pointon Standpoint (7999), Mr. W. H. Pate, 35 guineas; Pointon Standpoint (7999), Mr. Hughes, 26 guineas; Pointon Enterprise (7041), Mr. Blankley, 38 guineas; Quarrington Banker (7554), Mr. J. Pears, 30 guineas.

Tenterden.

Tenterden sheep and lamb fair was held on Friday, and, favoured by ideal weather, there was a good attendance of local buyers. The buyers from adjoining counties, more familiarly known as "foreign buyers," were, however, generally speaking, conspicuous by their absence. This had its effect upon the trade; but, on the whole, fair prices were made. The best Kent ewes were easily disposed of, making from 39s. to 45s., but the old sheep dragged rather, prices ranging from 18s. to 35s. Ewe tegs made probably more money than has been made for some years, only medium sheep selling at from 50s. to 55s.; while wether tegs fetched from 34s. to 47s. Lambs changed hands quickly, good Kents making 26s. to 29s. 6d.

Truro.

A sale held under the auspices of the South Devon Flock Book Association took place at Truro on Wednesday. Messrs. M. L. Blamey and Son sold six rams from the flock of Mr. John Jennings, St. Ewe, at an average of seven guineas each. Mr. W. H. Brewer had consignments totalling fifty from noted flocks, and the following averages were made:—Five from Mr. W. Lanyon, Newlyn East, £9 5s.; eight from Mr. G. A. Northey, Gwarnick, £8 10s.; five from Mr. R. H. Ward, Ladock, £9 6s.; seven from Mr. J. C. Lawry, Gorran, £9 16s.; twelve from Mr. W. T. Kendall, Bodrugan, £10 5s.; six from Mr. J. A. Spry, Veryan, £8 10s.; three from Mr. W. Mitchell, Kenwyn, £5 8s.; four ram lambs from Mr. W. Mitchell, £3 5s. The highest price was made by a ram from Mr. J. C. Lawry's flock, which realised £15 12s. 6d. Messrs. H. Thomas, Son, and Co. sold six from the flock of Mr. M. H. Holman, Restronguet, at an average of over 5½ gs. each.

The next session at the South Eastern Agricultural College, Wye, will commence on Monday, October 2, when there will be 94 students in residence. The inaugural address of the session will be given by Professor Marshall Ward, F.R.S., Professor of Botany, Cambridge University.

Peterborough Foal.

The twenty-fifth annual foal show, under the auspices of the Peterborough Agricultural Society, was held on Wednesday last in the Recreation Ground, immediately adjoining the Cattle Market. The weather proved very favourable for the event, and a good many people were at the ringside, intent upon business and deeply interested in the awards alike of the heavy horses, hackneys, and hunters. Few societies devote so much money and energy to the improvement of breeding horses as the Peterborough Society do, and the results have for years been most satisfactory, many of the highest-priced horses having been bred in the district, and the general quality of the farm horses and lighter horses being much improved.

Hunters.
